appearance in 1598, and they were soon followed by the English. But all attempts at exploration were successively abandoned. . . . Permanent European settlements on the coast were first made in 1812, when the English occupied Pontianac and Banjarmassin, which were two years later surrendered to the Dutch. . . . The Dutch, masters of all the rest of Indonesia, except the eastern half of Timor, have not had time to establish their rule over the whole of Borneo. They have, however, gradually reduced or annexed all the section lying south of the equator, as well as about half of the northern districts. But possession of the north-west and northern parts has been secured by the English, through various treaties with the Sultan of Brunei, former suzerain of the whole of this region. In 1846 the British government obtained the absolute cession of the island of Labuan, at the entrance of Brunei Bay, despite the protests of the Netherlands. But the sultan had already granted to James Brooke the principality of Sarawak, comprising the southern part of his kingdom. In return for a yearly subsidy, this soldier of fortune, commonly known as Rajah Brooke, thus became master of an extensive territory, which has since been gradually enlarged at the expense of the sultan's domain. On the opposite side of Brunei the sultan has also yielded the northern part of the island to a powerful British company, which has already obtained a royal charter from the Crown of England. A part of this territory having also been claimed by the sovereign of the Sulu archipelago, that potentate, like his Brunei colleague, has been bought off by a pension. Thanks to this purchase of the land, Spain, which had meantime become the suzerain of the Sulu prince, has henceforth been excluded from all claim to the possession of any part of Borneo. Lastly, the sultanate of Brunei itself depends for its very existence on the suzerainty of England, and it is now proposed to unite it to the other territories of the two companies, under the direct protectorate of Great Britain. But a frontier question still remains to be settled between the Dutch government and the North Borneo Company, arising out of a misunderstanding as to the identity of the river Sebuku, which is accepted by both sides as the boundary line. . . . Borneo still harbours many absolutely savage peoples. . . . The great bulk of the inland populations are collectively known as Dayaks [or Dyaks], a term . . . which, for the Malays, has simply the sense of 'wild' or 'heathen.'"—E. Reclus, *The Earth and its Inhabitants: Oceania*, ch. 3.—See MALAYAN RACE.—"Sir James Brooke visited Borneo in 1839, to succeed in carrying out, by his own personal energy, what the great East India Company had failed to accomplish. He founded Sarawak. With the aid of Admiral Keppel he annihilated the dangerous hordes of pirates that infested the western coasts. He successfully stamped out a rising of Chinese, in which operation the native tribes loyally came to his assistance; and he has demonstrated, financially and politically, the wisdom of those early Dutch and British adventurers who saw a splendid property in the island of Borneo. In 1847 the English government, seeing the importance of a station in this latitude, purchased Labuan, an island off the coast of Borneo, and made it an English colony, with a governor and

all the necessary officers and appliances of an efficient administration. Such is the brief history of Borneo, possession of which is now divided between the Dutch government, the Sultan of Brunei, Rajah Brooke, and the British North Borneo Company, the latter recently [1881] endorsed in its undertaking by the royal charter of her Majesty Queen Victoria. Borneo has been made familiar to the general reader by the settlement of Sarawak, which is situated on the western side of the island. Rajah Brooke's territory consists of over 30,000 square miles. . . . Alone and unaided, without state protection or official service, for forty years Sarawak has maintained an independent position, her English chief holding sovereign power, his government being often spoken of by travellers who have visited Borneo as an example worthy to be studied by some of the world's greatest powers. The British North Borneo Company have raised their flag over about the same extent of country as that which comprises Sarawak; and they have wisely imitated the policy of Rajah Brooke in ruling the natives through their chiefs, and with all due respect to their own laws, customs, and religion. Sarawak is a happy and prosperous colony. With a population of 240,000 souls, it has a respectable military force, garrisons, and forts; it pays a competent staff of European and native officers; and maintains three gunboats to protect its commerce and guarantee the safety of life and property to its subjects. [Rajah Brooke left Sarawak in 1863, and died in England in 1868. He was succeeded as rajah by a nephew who had taken his name. Sarawak was placed under British protection in 1888.] . . . The Dutch claim suzerainty over all the other portions of Borneo that are not occupied by Rajah Brooke in Sarawak, the British North Borneo Company in Sabah and the Sultanate of Brunei. They have established something like a regular government over the coast districts of the west and south. They have Residents in the southern and eastern districts, and their chief town is Pontianak. A native sultan is nominal ruler. They have as yet, however, done nothing in the way of developing this colony compared with their working of other possessions."—J. Hatton, *The New Ceylon*, ch. 2.

BOROUGH.—CITY.—TOWN.—VILLE.—"The burh of the Anglo-Saxon period was simply a more strictly organized form of the township. It was probably in a more defensible position; had a ditch and mound instead of the quickset hedge or 'tun' from which the township took its name; and as the 'tun' originally was the fenced homestead of the cultivator, the burh was the fortified house and court-yard of the mighty man—the king, the magistrate, or the noble"—W. Stubbs, *Const. Hist. of Eng.*, ch. 5.—"I must freely confess that I do not know what difference, except a difference in rank, there is in England between a city and a borough. . . . A city does not seem to have any rights or powers as a city which are not equally shared by every other corporate town. The only

corporate towns which have any special powers above others are those which are counties of themselves; and all cities are not counties of themselves, while some towns which are not cities are. The city in England is not so easily defined as the city in the United States. There, every corporate town is a city. This makes a great many cities, and it leads to an use of the word city in common talk which seems a little strange in British ears. In England, even in speaking of a real city, the word city is seldom used, except in language a little formal or rhetorical; in America it is used whenever a city is mentioned. But the American rule has the advantage of being perfectly clear and avoiding all doubt. And it agrees very well with the origin of the word: a corporate town is a 'civitas,' a commonwealth; any lesser collection of men hardly is a commonwealth, or is such only in a much less perfect degree. This brings us to the historical use of the word. It is clear at starting that the word is not English. It has no Old-English equivalent; burh, burgh, borough, in its various spellings and various shades of meaning, is our native word for urbes of every kind from Rome downward. It is curious that this word should in ordinary speech have been so largely displaced by the vaguer word tun, town, which means an enclosure of any kind, and in some English dialects is still applied to a single house and its surroundings. . . . In common talk we use the word borough hardly oftener than the word city; when the word is used, it has commonly some direct reference to the parliamentary or municipal characters of the town. Many people, I suspect, would define a borough as a town which sends members to Parliament, and such a definition, though still not accurate, has, by late changes, been brought nearer to accuracy than it used to be. City and borough, then, are both rather formal words; town is the word which comes most naturally to the lips when there is no special reason for using one of the others. Of the two formal words, borough is English; city is Latin; it comes to us from Gaul and Italy by some road or other. It is in Domesday that we find, by no means its first use in England, but its first clearly formal use, the first use of it to distinguish a certain class of towns, to mark those towns which are 'civitates' as well as burgi from those which are burgi only. Now in Gaul the 'civitas' in formal Roman language was the tribe and its territory, the whole land of the Arverni, Parisii, or any other tribe. In a secondary sense it meant the head town of the tribe. . . . When Christianity was established, the 'civitas' in the wider sense marked the extent of the bishop's diocese; the 'civitas' in the narrower sense became the immediate seat of his bishopstool. Thus we cannot say that in Gaul a town became a city because it was a bishop's see; but we may say that a certain class of towns became bishops' sees because they were already cities. But in modern French use no distinction is made between these ancient capitals which became bishoprics and other towns of less temporal and spiritual honour. The seat of the bishopric, the head of the ancient province, the head of the modern department, the smaller town which has never risen to any of those dignities, are all alike ville. Lyons, Rheims, Paris, are in no way

distinguished from meaner places. The word cité is common enough, but it has a purely local meaning. It often distinguishes the old part of a town, the ancient 'civitas,' from later additions. In Italy on the other hand, città is both the familiar and the formal name for towns great and small. It is used just like ville in French."—E. A. Freeman, *City and Borough* (*Middleton's Mag.*, May, 1889).

BORROMEAN, OR GOLDEN LEAGUE, The. See SWITZERLAND: A. D. 1579-1630.

BORVSTHENES, The.—The name which the Greeks gave anciently to the river now known as the Dnieper. It also became the name of a town near the mouth of the river which was originally called Olbia,—a very early trading settlement of the Milesians.

BOSCOBEL, The Royal Oak of. See SCOTLAND: A. D. 1651.

BOSNIA. See BALKAN AND DANUBIAN STATES.

BOSPHORUS, OR BOSPORUS, The.—The word means literally an 'ox-ford,' and the Greeks derived it as a name from the legend of Io, who, driven by a gad-fly, swam across the straits from Europe into Asia. They gave the name particularly to that channel, on which Constantinople lies, but applied it also to other similar straits, such as the Cimmerian Bosphorus, opening the Sea of Azov.

The city and kingdom.—"Respecting Bosphorus, or Pantikapæum (for both names denote the same city, though the former name often comprehends the whole annexed dominion) founded by Milesian settlers on the European side of the Kimmerian Bosphorus (near Kertsch) we first hear, about the period when Xerxes was repulsed from Greece (480-479 B. C.) It was the centre of a dominion including Phanagoria, Kepi, Hermonassa, and other Greek cities on the Asiatic side of the strait; and it is said to have been governed by what seems to have been an oligarchy—called the Archæanaktidæ—for forty-two years (480-438 B. C.) After them we have a series of princes standing out individually by name, and succeeding each other in the same family, [438-284 B. C.]. . . . During the reigns of these princes, a connexion of some intimacy subsisted between Athens and Bosphorus; a connexion not political, since the Bosporanic princes had little interest in the contentions about Hellenic hegemony—but of private intercourse, commercial exchange and reciprocal good offices. The eastern corner of the Tauric Chersonesus, between Pantikapæum and Theodosia, was well suited for the production of corn; while plenty of fish, as well as salt, was to be had in or near the Palus Mæotis. Corn, salted fish and meat, hides and barbaric slaves in considerable numbers, were in demand among all Greeks round the Ægean, and not least at Athens, where Scythian slaves were numerous; while oil and

wine, and other products of more southern regions, were acceptable in Bosphorus and the other Pontic ports. This important traffic seems to have been mainly carried on in ships and by capital belonging to Athens and other Ægean maritime towns, and must have been greatly under the protection and regulation of the Athenians, so long as their maritime empire subsisted. Enterprising citizens of Athens went to Bosphorus (as to Thrace and the Thracian Chersonesus), to push their fortunes. . . . We have no means of following [the fortunes of the Bosphoric princes] in detail; but we know that, about a century B. C., the then reigning prince, Parisades IV. found himself so pressed and squeezed by the Scythians, that he was forced (like Olbia and the Pentapolis) to forego his independence, and to call in, as auxiliary or master, the formidable Mithridates Eupator of Pontus; from whom a new dynasty of Bosphoric kings began—subject, however, after no long interval, to the dominion and interference of Rome.”—G. Grote, *Hist. of Greece*, pt. 2, ch. 98.

Acquisition by the Goths. See GOTHs, ACQUISITION OF BOSPHORUS.

A. D. 565–574.—Capture by the Turks.—“During the reign of Justin [A. D. 565–574] the city of Bosphorus, in Tauris, had been captured by the Turks, who then occupied a considerable portion of the Tauric Chersonesus. The city of Cherson alone continued to maintain its independence in the northern regions of the Black Sea.”—G. Finlay, *Greece under the Romans*, ch. 4, sect. 8.—See TURKS: SIXTH CENTURY.

BOSSISM.—The “Spoils System” in American politics [see SPOILS SYSTEM] developed enormously the influence and power of certain leaders and managers of party organizations, in the great cities and some of the states, who acquired the names of “Bosses,” while the system of politics which they represented was called “Bossism.” The notorious William M. Tweed, of the New York “Tammany Ring” [see NEW YORK: A. D. 1863–1871] seems to have been the first of the species to be dubbed “Boss Tweed” by his “heelers,” or followers, and the title passed from him to others of like kind.

A. D. 1657–1669.—The Halfway Covenant and the founding of the Old South Church.—“In Massachusetts after 1650 the opinion rapidly gained ground that all baptised persons of upright and decorous lives ought to be considered, for practical purposes, as members of the church, and therefore entitled to the exercise of political rights, even though unqualified for participation in the Lord’s Supper. This theory of church-membership, based on what was at that time stigmatized as the Halfway Covenant, aroused

intense opposition. It was the great question of the day. In 1657 a council was held in Boston, which approved the principle of the Halfway Covenant; and as this decision was far from satisfying the churches, a synod of all the clergymen in Massachusetts was held five years later, to reconsider the great question. The decision of the synod substantially confirmed the decision of the council, but there were some dissenting voices. Foremost among the dissenters, who wished to retain the old theocratic régime in all its strictness, was Charles Chauncy, the president of Harvard College, and Increase Mather agreed with him at the time, though he afterward saw reason to change his opinion and published two tracts in favour of the Halfway Covenant. Most bitter of all toward the new theory of church-membership was, naturally enough, Mr. Davenport of New Haven. This burning question was the source of angry contentions in the First Church of Boston. Its teacher, the learned and melancholy Norton, died in 1663, and four years later the aged pastor, John Wilson, followed him. In choosing a successor to Wilson the church decided to declare itself in opposition to the liberal decision of the synod, and in token thereof invited Davenport to come from New Haven to take charge of it. Davenport, who was then seventy years old, was disgusted at the recent annexation of his colony to Connecticut. He accepted the invitation and came to Boston, against the wishes of nearly half of the Boston congregation, who did not like the illiberal principle which he represented. In little more than a year his ministry at Boston was ended by death; but the opposition to his call had already proceeded so far that a secession from the old church had become inevitable. In 1669 the advocates of the Halfway Covenant organized themselves into a new society under the title of the ‘Third Church in Boston.’ A wooden meeting-house was built on a lot which had once belonged to the late governor Winthrop, in what was then the south part of the town, so that the society and its meeting-house became known as the South Church; and after a new church founded in Summer Street in 1717 took the name of the New South, the church of 1669 came to be further distinguished as the Old South. As this church represented a liberal idea which was growing in favour with the people, it soon became the most flourishing church in America. After sixty years its numbers had increased so that the old meeting-house could not contain them; and in 1729 the famous building which still stands was erected on the same spot,—a building with a grander history than any other on the American continent, unless it be that other plain brick building in Philadelphia where the Declaration of Independence was adopted and the Federal Constitution framed.”—J. Fiske, *The Beginnings of New Eng.*, ch. 6.

A. D. 1768.—The seizure of the sloop "Liberty."—Riotous patriotism.—"For some years these officers [of the customs] had been resisted in making seizures of uncustomed goods, which were frequently rescued from their possession by interested parties, and the determination of the commissioners of customs to break up this practice frequently led to collisions; but no flagrant outbreak occurred until the seizure of John Hancock's sloop 'Liberty' (June 10, 1768), laden with a cargo of Madeira wine. The officer in charge, refusing a bribe, was forcibly locked up in the cabin, the greater part of the cargo was removed, and the remainder entered at the custom-house as the whole cargo. This led to seizure of the vessel, said to have been the first made by the commissioners, and for security she was placed under the guns of the 'Romney,' a man-of-war in the harbor. For this the revenue officers were roughly handled by the mob. Their boat was burned, their houses threatened, and they, with their alarmed families, took refuge on board the 'Romney,' and finally in the Castle. These proceedings undoubtedly led to the sending additional military forces to Boston in September. The General Court was in session at the time, but no effectual proceedings were taken against the rioters. Public sympathy was with them in their purposes if not in their measures."

—M. Chamberlain, *The Revolution Impending (Narrative and Critical Hist. of Am., v. 6, ch. 1)*.

A. D. 1768.—The quartering of British troops.—"Before news had reached England of the late riot in Boston, two regiments from Halifax had been ordered thither. When news of that riot arrived, two additional regiments were ordered from Ireland. The arrival of an officer, sent by Gage from New York, to provide quarters for these troops, occasioned a town meeting in Boston, by which the governor was requested to summon a new General Court, which he peremptorily refused to do. The meeting then recommended a convention of delegates from all the towns in the province to assemble at Boston in ten days; 'in consequence of prevailing apprehensions of a war with France'—such was the pretence—they advised all persons not already provided with fire-arms to procure them at once; they also appointed a day of fasting and prayer, to be observed by all the Congregational societies. Delegates from more than a hundred towns met accordingly at the day appointed [Sept. 22], chose Cushing, speaker of the late House, as their chairman, and petitioned Bernard to summon a General Court. The governor not only refused to receive their petition, but denounced the meeting as treasonable. In view of this charge, the proceedings were exceedingly

cautious and moderate. All pretensions to political authority were expressly disclaimed. In the course of a four days' session a petition to the King was agreed to, and a letter to the agent, De Berdt, of which the chief burden was to defend the province against the charge of a rebellious spirit. Such was the first of those popular conventions, destined within a few years to assume the whole political authority of the colonies. The day after the adjournment the troops from Halifax arrived. There was room in the barracks at the castle, but Gage, alarmed at the accounts from Massachusetts, had sent orders from New York to have the two regiments quartered in the town. The council were called upon to find quarters, but, by the very terms of the Quartering Act, as they alleged, till the barracks were full there was no necessity to provide quarters elsewhere. Bernard insisted that the barracks had been reserved for the two regiments expected from Ireland, and must, therefore, be considered as already full. The council replied, that, even allowing that to be the case, by the terms of the act, the provision of quarters belonged not to them, but to the local magistrates. There was a large building in Boston belonging to the province, known as the 'Manufactory House,' and occupied by a number of poor families. Bernard pressed the council to advise that this building be cleared and prepared for the reception of the troops; but they utterly refused. The governor then undertook to do it on his own authority. The troops had already landed, under cover of the ships of war, to the number of a thousand men. Some of them appeared to demand an entrance into the Manufactory House; but the tenants were encouraged to keep possession; nor did the governor venture to use force. One of the regiments encamped on the common; for a part of the other regiment, which had no tents, the temporary use of Faneuil Hall was reluctantly yielded; to the rest of it, the Town House, used also as a State House, all except the council chamber, was thrown open by the governor's order. It was Sunday. The Town House was directly opposite the meeting-house of the First Church. Cannon were planted in front of it; sentinels were stationed in the streets; the inhabitants were challenged as they passed. The devout were greatly aggravated and annoyed by the beating of drums and the marching of the troops. Presently Gage came to Boston to urge the provision of quarters. The council directed his attention to the terms of the act, and referred him to the selectmen. As the act spoke only of justices of the peace, the selectmen declined to take any steps in the matter. Bernard then constituted what he called a Board of Justices, and required them to find quarters; but they did not choose to exercise a doubtful and unpopular authority. Gage was finally obliged to quarter the troops in houses which he hired for the purpose, and to procure out of his own military chest the firing, bedding, and other articles mentioned in the Quartering Act, the council having declined to order any expenditure for those purposes, on the ground that the appropriation of money belonged exclusively to the General Court."—R. Hildreth, *Hist. of the U. S., ch. 29, cc. 21*.

A. D. 1770.—Soldiers and citizens in collision.—The "Massacre."—Removal of the troops.—As the spring of the year 1770 appeared, the 14th and 29th regiments had been in Boston about seventeen months. The 14th was in barracks near the Brattle Street Church; the 29th was quartered just south of King Street; about midway between them, in King Street, and close at hand to the town-house, was the main guard, whose nearness to the public buildings had been a subject of great annoyance to the people. . . . One is forced to admit . . . that a good degree of discipline was maintained; no blood had as yet been shed by the soldiers, although provocations were constant, the rude element in the town growing gradually more aggressive as the soldiers were never allowed to use their arms. Insults and blows with fists were frequently taken and given, and cudgels also came into fashion in the brawls. Whatever awe the regiments had inspired at their first coming had long worn off. In particular the workmen of the rope-walks and ship-yards allowed their tongues the largest license and were foremost in the encounters. About the 1st of March fights of unusual bitterness had occurred near Grey's rope-walk, not far from the quarters of the 29th, between the hands of the rope-walk and soldiers of that regiment, which had a particularly bad reputation. The soldiers had got the worst of it, and were much irritated. Threats of revenge had been made, which had called out arrogant replies, and signs abounded that serious trouble was not far off. From an early hour on the evening of the 5th of March the symptoms were very ominous. . . . At length an altercation began in King Street between a company of lawless boys and a few older brawlers on the one side, and the sentinel, who paced his beat before the custom-house, on the other. . . . The soldier retreated up the steps of the custom-house and called out for help. A file of soldiers was at once despatched from the main guard, across the street, by Captain Preston, officer of the guard, who himself soon followed to the scene of trouble. A coating of ice covered the ground, upon which shortly before had fallen a light snow. A young moon was shining; the whole transaction, therefore, was plainly visible. The soldiers, with the sentinel, nine in number, drew up in line before the people, who greatly outnumbered them. The pieces were loaded and held ready, but the mob, believing that the troops would not use their arms except upon requisition of a civil magistrate, shouted coarse insults, pressed upon the very muzzles of the pieces, struck them with sticks, and assaulted the soldiers with balls of ice. In the tumult precisely what was said and done cannot be known. Many affidavits were taken in the investigation that followed, and, as always at such times, the testimony was most contradictory. Henry Knox, afterwards the artillery general, at this time a bookseller, was on the spot and used his influence with Preston to prevent a command to fire. Preston declared that he never gave the command. The air, however, was full of shouts, daring the soldiers to fire, some of which may have been easily understood as commands, and at last the discharge came. If it had failed to come, indeed, the forbearance

would have been quite miraculous. Three were killed outright, and eight were wounded, only one of whom, Crispus Attucks, a tall mulatto who faced the soldiers, leaning on a stick of cord-wood, had really taken any part in the disturbance. The rest were bystanders or were hurrying into the street, not knowing the cause of the tumult. . . . A wild confusion . . . took possession of the town. The alarm-bells rang frantically; on the other hand the drums of the regiments thundered to arms. . . . What averted a fearful battle in the streets was the excellent conduct of Hutchinson—the lieutenant-governor, who made his way promptly to the scene, caused the troops to be sent back to their barracks, ordered the arrest of Captain Preston and the nine soldiers who had done the firing, and began an investigation of the affair the same night. The next day a great town meeting was held, and, as crowds from the surrounding towns pressed in, it was adjourned from Faneuil Hall to the Old South Church, and overflowed in the neighboring streets. A formal demand for the removal of the troops was sent to the governor and council by a committee which had Samuel Adams at its head. Governor Hutchinson disclaimed authority over the troops; but their commanding officer, Colonel Dalrymple, proposed to compromise by sending away the 29th regiment and retaining the 14th. As the committee returned to the meeting with this proposal, through the crowd, Adams dropped right and left the words, "Both regiments or none."—"Both regiments or none." So he put into the mouths of the people their reply, which they shouted as with one voice when the report of the committee was made to them. There was a determination in the cry which overcame even the obstinacy of Governor Hutchinson, and the departure of both regiments was ordered that same day. "In England the affair was regarded as a 'successful bully' of the whole power of the government by the little town, and when Lord North received details of these events he always referred to the 14th and 29th as the 'Sam Adams regiments.'"—J. K. Hosmer, *Samuel Adams*, ch. 11.

A. D. 1770.—The fair trial of the soldiers.—"The episode [of the affray of March 5th] had . . . a sequel which is extremely creditable to the American people. It was determined to try the soldiers for their lives, and public feeling ran so fiercely against them that it seemed as if their fate was sealed. The trial, however, was delayed for seven months, till the excitement had in some degree subsided. Captain Preston very judiciously appealed to John Adams, who was rapidly rising to the first place both among the lawyers and the popular patriots of Boston, to undertake his defence. Adams knew well how much he was risking by espousing so unpopular a cause, but he knew also his professional duty, and, though violently opposed to the British government, he was an eminently honest, brave, and humane man. In conjunc-

tion with Josiah Quincy, a young lawyer who was also of the patriotic party, he undertook the invidious task, and he discharged it with consummate ability. . . . There was abundant evidence that the soldiers had endured gross provocation and some violence. If the trial had been the prosecution of a smuggler or a seditious writer, the jury would probably have decided against evidence, but they had no disposition to shed innocent blood. Judges, counsel, and jurymen acted bravely and honourably. All the soldiers were acquitted, except two, who were found guilty of manslaughter, and who escaped with very slight punishment. It is very remarkable that after Adams had accepted the task of defending the incriminated soldiers, he was elected by the people of Boston as their representative in the Assembly, and the public opinion of the province appears to have fully acquiesced in the verdict. In truth, although no people have indulged more largely than the Americans in violent, reckless, and unscrupulous language, no people have at every period of their history been more signally free from the thirst for blood, which in moments of great political excitement has been often shown both in England and France."—W. E. H. Lecky, *Hist. of Eng. in the 18th Century*, ch. 12 (v. 3).

A. D. 1773.—The Tea Party.—"News reached Boston in the spring of this year [1773] that the East India Company, which was embarrassed by the accumulation of tea in England, owing to the refusal of the Americans to buy it, had induced parliament to permit its exportation to America without the payment of the usual duty [see UNITED STATES OF AM: A. D. 1772–1773]. This was intended to bribe the colonists to buy; for there had been a duty both in England and in America. That in England was six pence a pound, that in America three pence. Ships were laden and sent to Boston, New York, Philadelphia, and Charleston, and they were now expected to arrive in a short time. . . . On the 28th of November, 1773, which was Sunday, the first tea-ship (the 'Dartmouth') entered the harbor [of Boston]. The following morning the citizens were informed by placard that the 'worst of plagues, the detested tea,' had actually arrived, and that a meeting was to be held at nine in the morning, at Faneuil Hall, for the purpose of making 'a united and successful resistance to this last, worst, and most destructive measure of administration.' The Cradle of Liberty was not large enough to contain the crowd that was called together. Adams rose and made a stirring motion expressing determination that the tea should not be landed, and it was unanimously agreed to. The meeting then adjourned to the Old South meeting-house, where the motion was repeated, and again adopted without an opposing voice. The owner of the ship protested in vain that the proceedings were illegal; a watch of twenty-five persons was set, to see that the intentions of the citizens were not evaded, and the meeting adjourned to the following morning. The throng at that time was as great as usual, and while the deliberations were going on, a message was received from the governor, through the sheriff, ordering them to cease their proceedings. It was voted

not to follow the advice, and the sheriff was hissed and obliged to retreat discomfited. It was formally resolved that any person importing tea from England should be deemed an enemy to his country, and it was declared that at the risk of their lives and properties the landing of the tea should be prevented, and its return effected. It was necessary that some positive action should be taken in regard to the tea within twenty days from its arrival, or the collector of customs would confiscate ships and cargoes. . . . The twenty days would expire on the 16th of December. On the fourteenth a crowded meeting was held at the Old South, and the importer was enjoined to apply for a clearance to allow his vessel to return with its cargo. He applied, but the collector refused to give an answer until the following day. The meeting therefore adjourned to the 16th, the last day before confiscation would be legal, and before the tea would be placed under protection of the ships of war in the harbor. There was another early morning meeting, and 7,000 people thronged about the meeting-house, all filled with a sense of the fact that something notable was to occur. The importer appeared and reported that the collector refused a clearance. He was then directed to ask the governor for a pass to enable him to sail by the Castle. Hutchinson had retreated to his mansion at Milton, and it would take some time to make the demand. The importer started out in the cold of a New England winter, apologized to his Excellency for his visit, but assured him that it was involuntary. He received a reply that no pass could be given him. . . . It was six o'clock before the importer returned, and a few candles were brought in to relieve the fast-increasing darkness. He reported the governor's reply, and Samuel Adams rose and exclaimed: 'This meeting can do nothing more to save the country!' In an instant there was a shout on the porch; there was a war-whoop in response, and forty or fifty of the men disguised as Indians rushed out of the doors, down Milk Street towards Griffin's (afterwards Liverpool) Wharf, where the vessels lay. The meeting was declared dissolved, and the throng followed their leaders, forming a determined guard about the wharf. The 'Mohawks' entered the vessel; there was tugging at the ropes; there was breaking of light boxes; there was pouring of precious tea into the waters of the harbor. For two or three hours the work went on, and three hundred and forty-two chests were emptied. Then, under the light of the moon, the Indians marched to the sound of fife and drum to their homes, and the vast throng melted away, until not a man remained to tell of the deed. The committee of correspondence held a meeting next day, and Samuel Adams and four others were appointed to prepare an account of the affair to be posted to other places. Paul Revere, who is said to have been one of the 'Mohawks,' was sent express to Philadelphia with the news, which was received at that place on the 26th. It was announced by ringing of bells, and there was every sign of joy. . . . The continent was universally stirred at last."—A. Gilman, *The Story of Boston*, ch. 23.

A. D. 1774.—The Port Bill and the Massachusetts Act.—Commerce interdicted.—Town Meetings forbidden. See UNITED STATES OF AM. A. D. 1774 MARCH-APRIL.

A. D. 1774.—The enforcement of the Port Bill and its effects.—Military occupation of the city by General Gage.—"The execution of this measure [the Port Bill] devolved on Thomas Gage, who arrived at Boston May 13, 1774, as Captain General and Governor of Massachusetts. He was not a stranger in the colonies. He had exhibited gallantry in Braddock's defeat. . . . He had married in one of the most respectable families in New York, and had partaken of the hospitalities of the people of Boston. His manners were pleasing. Hence he entered upon his public duties with a large measure of popularity. But he took a narrow view of men and things about him. . . . General Gage, on the 17th of May, landed at the Long Wharf and was received with much parade. . . . On the first day of June the act went into effect. It met with no opposition from the people, and hence, there was no difficulty in carrying it into rigorous execution. 'I hear from many,' the governor writes, 'that the act has staggered the most presumptuous; the violent party men seem to break, and people to fall off from them.' Hence he looked for submission; but Boston asked assistance from other colonies, and the General Court requested him to appoint a day of fasting and prayer. The loyalists felt uneasy at the absence of the army. . . . Hence a respectable force was soon concentrated in Boston. On the 4th of June, the 4th or king's own regiment, and on the 15th the 43d regiment, landed at the Long Wharf and encamped on the common." The 5th and 38th regiments arrived on the 4th and 5th of July; the 59th regiment was landed at Salem August 6, and additional troops were ordered from New York, the Jerseys and Quebec. "The Boston Port Bill went into operation amid the tolling of bells, fasting and prayer. . . . It bore severely upon two towns, Boston and Charlestown, which had been long connected by a common patriotism. Their laborers were thrown out of employment, their poor were deprived of bread, and gloom pervaded their streets. But they were cheered and sustained by the large contributions sent from every quarter for their relief, and by the noble words that accompanied them. . . . The excitement of the public mind was intense; and the months of June, July, and August, were characterized by varied political activity. Multitudes signed a solemn league and covenant against the use of British goods. The breach between the whigs and loyalists daily became wider. Patriotic donations from every colony were on their way to the suffering towns. Supplies for the British troops were refused. . . . It was while the public mind was in this state of excitement that other acts arrived which General Gage was instructed to carry into effect." These were the acts which virtually annulled the Massachusetts charter, which forbade town meetings, and which provided for the sending of accused persons to England or to other colonies for trial. "Should Massachusetts submit to the

new acts? Would the other colonies see, without increased alarm, the humiliation of Massachusetts? This was the turning-point of the Revolution. It did not find the patriots unprepared. They had an organization beyond the reach alike of proclamations from the governors, or of circulars from the ministry. This was the Committees of Correspondence, chosen in most of the towns in legal town-meetings, or by the various colonial assemblies, and extending throughout the colonies. . . . The crisis called for all the wisdom of these committees. A remarkable circular from Boston addressed to the towns (July, 1774), dwelt upon the duty of opposing the new laws; the towns, in their answers, were bold, spirited, and firm and echoed the necessity of resistance. Nor was this all. The people promptly thwarted the first attempts to exercise authority under them. Such councillors as accepted their appointments were compelled to resign, or, to avoid compulsion, retired into Boston." General Gage now began (in September) movements to secure the cannon and powder in the neighborhood. Some 250 barrels of powder belonging to the province were stealthily removed by his orders from a magazine at Charlestown and two field-pieces were carried away from Cambridge. "The report of this affair, spreading rapidly, excited great indignation. The people collected in large numbers, and many were in favor of attempting to recapture the powder and cannon. Influential patriots, however, succeeded in turning their attention in another direction. . . . Meantime the fact of the removal of the powder became magnified into a report that the British had cannonaded Boston, when the bells rang, beacons blazed on the hills, the neighbor colonies were alarmed, and the roads were filled with armed men hastening to the point of supposed danger. These demonstrations opened the eyes of the governor to the extent of the popular movement. . . . General Gage saw no hope of procuring obedience but by the power of arms; and the patriot party saw no safety in anything short of military preparation. Resistance to the acts continued to be manifested in every form. On the 9th of September the memorable Suffolk resolves [drawn by Joseph Warren] were adopted [by a convention of Suffolk county, which embraced Boston] . . . and these were succeeded by others in other counties equally bold and spirited. These resolves were approved by the Continental Congress, then in session. Everywhere the people either compelled the unconstitutional officers to resign, or opposed every attempt to exercise authority, whether by the governor or constable. They also made every effort to transport ammunition and stores to places of security. Cannon and muskets were carried secretly out of Boston. The guns were taken from an old battery at Charlestown, where the navy yard is, . . . silently, at night. . . . General Gage immediately began to fortify Boston Neck. This added intensity to the excitement. The inhabitants became alarmed at so ominous a movement; and, on the 5th of September, the selectmen waited on the general, represented the public feeling, and requested him to explain his object. The governor stated in reply that his object was to protect his majesty's troops and his majesty's subjects; and that he had no intention to stop up the avenue, or to obstruct the free passage over it, or to do anything hostile

against the inhabitants. He went on with the works and soon mounted on them two twenty-four pounders and eight nine pounders."—R. Frothingham, *Hist. of the Siege of Boston*, ch. I.

BOURBON: Origin of the name. See BOIANS; also ROME: B. C. 390–347.

BOURBON, The House of: Its origin.—From King Louis IX. (St. Louis), of France, "through his last male child, Robert de France, Comte de Clermont, sprang the House of Bourbon. An ancient barony, the inheritance of Béatrix, wife of this prince, was erected into a dukedom in favour of Louis, his son, and gave to his descendants the name which they have retained, that of France being reserved for the Royal branch. . . . The House which had the honour of supplying sovereigns to our country was called 'France.' But our kings, jealous of that great name, reserved it for their own sons and grandsons. Hence the designation 'fils' and 'petit-fils de France.' The posterity of each 'fils de France' formed a cadet branch which took its name from the title borne by its head, Valois, Artois, Bourbon, &c. At the time of the accession of Henry IV. the name of Bourbon remained with those younger branches of Condé and Montpensier, which had sprung from the main branch before the death of Henry III. But Henry IV.'s

children, those of Louis XIII., and those of their successors in the throne, were surnamed 'de France'; whilst in conformity with the law the descendants of Louis XIII.'s second son received the surname d'Orléans, from the title borne by their grandfather. . . . Possessors of vast territories which they [the Bourbons] owed more to family alliances than to the generosity of kings, they had known how to win the affection of their vassals. Their magnificent hospitality drew around them a numerous and brilliant nobility. Thus the 'hôtel' of those brave and august princes, the 'gracieux ducs de Bourbon,' as our ancient poet called them, was considered the best school in which a young nobleman could learn the profession of arms. The order of the Écu, instituted by one of them, had been coveted and worn by the bravest warriors of France. Sufficiently powerful to outshine the rank and file of the nobility, they had at the same time neither the large estates nor the immense power which enabled the Dukes of Bourgogne, of Bretagne, and other great vassals, to become the rivals or the enemies of the royal authority." The example of the treason of the Constable Bourbon [see FRANCE: A. D. 1520–1523] "was not followed by any of the princes of his House. . . . The property of the Connétable was definitely alienated from his House, and Vendôme [his brother] did not receive the hereditary possessions of the Dukes d'Alençon, to which his wife was entitled. He died on the 25th of March, 1538, leaving but a scanty patrimony to his numerous descendants. . . . Five only of his sons obtained their majority. . . . Two of these princes founded families: Antoine [Duc de Vendôme and afterwards King of Navarre through his marriage with Jeanne d'Albret, see NAVARRE: A. D. 1528–1563], father of Henry IV., who was the ancestor of all the Bourbons now living, and Louis [Prince de Condé, born 1530], who was the root of the House of Condé and all its branches."—Duc d'Aumale, *Hist. of the Princes of the House of Condé*, bk. 1, ch. 1, and foot-note.—See, also, FRANCE: A. D. 1327.

BOURGEOIS.—BOURG.—In France, "the word Bourg originally meant any aggregation of houses, from the greatest city to the smallest hamlet. But . . . the word shifted its meaning, and came to signify an assemblage of houses surrounded with walls. Secondly, the word Bourgeois also was at first used as synonymous with the inhabitant of a bourg. Afterward, when corporate franchises were bestowed on particular bourgs, the word acquired a sense corresponding with that of the English designation Burgess; that is, a person entitled to the privileges of a municipal corporation. Finally, the word Bourgeoisie, in its primitive sense, was the description of the burgesses when spoken of collectively. But, in its later use, the word would be best rendered into English by our term citizenship; that is, the privilege or franchise of being a burgess."—Sir J. Stephen, *Lects., Hist. of France*, lect. 5. See FRANCE: 12TH–13TH CENT'S.

BOURGES, Origin of.—The city of Bourges, France, was originally the capital city of the

Gaulic tribe of the Bituriges, and was called Avaricum. "As with many other Gaulish towns, the original name became exchanged for that of the people, i. e., Bituriges, and thence the modern Bourges and the name of the province, Berri."—C. Merivale, *Hist. of the Romans*, ch. 12.—See, also, *EDUI*, and *GALLI*. B. C. 58-51.

BOUVINES, Battle of (A. D. 1214).—The battle of Bouvines, fought at Bouvines, in Flanders, not far from Tournay, on the 27th of August, A. D. 1214, was one of the important battles of European history. On one side were the French, led by their king Philip Augustus, and fighting ostensibly as the champions of the Pope and the church. On the other side was an allied army of English, under king John, of Germans, under Otho, the Gueff—one of two rival claimants of the imperial crown—and of Flemings and Lotharingians, led by their several lords. Philip Augustus had expelled the English king from his Norman dukedom and caused a court of the peers of France to declare the title forfeit. From that success his ambition rose so high that he had aspired to the conquest of the English crown. A terrible pope—Innocent III.—had approved his ambition and encouraged it; for John, the miserable English king, had given provocations to the church which had brought the thunders of the Vatican upon his head. Excommunicated, himself, his kingdom under interdict, —the latter offered itself a tempting prey to the vigorous French king, who posed as the champion of the pope. He had prepared a strong army and a fleet for the invasion of England; but fate and papal diplomacy had baffled his schemes. At the last moment, John had made a base submission, had meekly surrendered his kingdom to the pope and had received it back as a papal fief. Whereupon the victorious pope commanded his French champion to forego his intended attack. Philip, under these circumstances, determined to use the army he had assembled against a troublesome and contumacious vassal, the count of Flanders. The pope approved, and Flanders was overrun. King John led an English force across the channel to the help of the Flemish count, and Otho, the German king or emperor, who was king John's nephew, joined the coalition, to antagonize France and the pope. The battle of Bouvines was the decisive conflict of the war. It humbled, for the time, the independent spirit of Flanders, and several remoter consequences can be traced to it. It was "the first real French victory. It roused the national spirit as nothing else could have roused it; it was the nation's first taste of glory, dear above all things to the French heart. . . . The battle somewhat broke the high spirit of the barons: the lesser barons and churches grouped themselves round the king; the greater lords came to feel their weakness in the presence of royalty. Among the incidental consequences of the day of Bouvines was the ruin of Otho's ambition. He fled from the field into utter obscurity. He retired to the Hartz mountains, and there spent the remaining years of his life in private. King John, too, was utterly discredited by his share in the year's campaign. To it may partly be traced his humiliation before his barons, and the signing of the Great Charter in the following year at Runnymede."—G. W. Kitchen, *Hist. of France*, bk. 3, ch. 7, sect. 4.—"The battle of Bouvines was not the victory of Philip Augustus alone, over a

coalition of foreign princes; the victory was the work of king and people, barons, burghers, and peasants, of Ile de France, of Orleans, of Picardy, of Normandy, of Champagne, and of Burgundy. . . . The victory of Bouvines marked the commencement of the time at which men might speak, and indeed did speak, by one single name, of 'the French.' The nation in France and the kingship in France on that day rose out of and above the feudal system."—F. P. Guizot, *Popular Hist. of France*, ch. 18.—See, also, *ITALY*: A. D. 1183-1250, and *ENGLAND*: A. D. 1205-1213, and 1215.

BOVATE, OR OXGANG.—"Originally as much as an ox-team could plough in a year. Eight Bovates are usually said to have made a Carucate, but the number of acres which made a Bovate are variously stated in different records from 8 to 24."—N. H. Nicolas, *Notitia Historica*, p. 134.

BOYARS.—"In the old times, when Russia was merely a collection of independent principalities, each reigning prince was surrounded by a group of armed men, composed partly of Boyars, or large landed proprietors, and partly of knights, or soldiers of fortune. These men, who formed the Noblesse of the time, were to a certain extent under the authority of the Prince, but they were by no means mere obedient, silent executors of his will. The Boyars might refuse to take part in his military expeditions. . . . Under the Tartar domination this political equilibrium was destroyed. When the country had been conquered, the princes became servile vassals of the Khan, and arbitrary rulers towards their own subjects. The political significance of the nobles was thereby greatly diminished."—D. M. Wallace, *Russia*, ch. 17.

BOYNE, Battle of the (1690). See *IRELAND*: A. D. 1689-1691.

BOYS IN BLUE.—BOYS IN GRAY.—Soldier nicknames of the American Civil War.—"During the first year of the war [of the Rebellion, in the United States] the Union soldiers commonly called their opponents 'Rebs' and 'Secesh'; in 1862, 'Confeds'; in 1863, 'Graybacks' and 'Butternuts'; and in 1864, 'Johnnies.' The nickname 'Butternuts' was given the Confederates on account of their homespun clothes, dyed reddish-brown with a dye made of butternut bark. The last name, 'Johnnies,' is said to have originated in a quarrel between two pickets, which began by the Union man's saying that the Confederates depended on England to get them out of their scrape. . . . The Union man . . . said that a 'Reb' was no better than a Johnny Bull, anyhow. . . . The name stuck, and in the last part of the war the Confederate soldiers were almost universally called 'Johnnies.' Throughout the war the Confederates dubbed all the Union soldiers 'Yankeos' and 'Yanks,' without any reference to the part of the country they came from. . . . Other nicknames for Union soldiers, occasionally used, were 'Feds,' 'Blue Birds' and 'Blue Bellies.' Since the war

the opponents have been commonly called 'Boys in Blue' and 'Boys in Gray.'—J. D. Champ-
lin, Jr., *Young Folks' History of the War for the
Union*, p. 137.

**BRANDENBURG: A. D. 928-1142.—Be-
ginnings of the Margravate.**—"A. D. 928,
Henry the Fowler, marching across the frozen
bogs, took Brannibor, a chief fortress of the
Wends; first mention in human speech of the
place now called Brandenburg: Bor or 'Burg of
the Brenns' (if there ever was any Tribe of
Brenns.—Brennus, there as elsewhere, being
name for King or Leader); 'Burg of the Woods,'
say others,—who as little know. Probably, at that
time, a town of clay huts, with ditch and palisaded

sod-wall round it; certainly 'a chief fortress of
the Wends,'—who must have been a good deal
surprised at sight of Henry on the rimy winter
morning near a thousand years ago. . . . That
Henry appointed due Wardenship in Brannibor
was in the common course. Sure enough, some
Markgraf must take charge of Brannibor,—he of
the Lausitz eastward, for example, or he of
Salzwedel westward:—that Brannibor, in time,
will itself be found the fit place, and have its
own Markgraf of Brandenburg; this, and what
in the next nine centuries Brandenburg will
grow to, Henry is far from surmising. . . . In
old books are lists of the primitive Markgraves
of Brandenburg, from Henry's time downward;
two sets, 'Markgraves of the Witekind race,'
and of another; but they are altogether uncer-
tain, a shadowy intermittent set of Markgraves,
both the Witekind set and the Non-Witekind;
and truly, for a couple of centuries, seem none
of them to have been other than subaltern Depu-
ties, belonging mostly to Lausitz or Salzwedel;
of whom therefore we can say nothing here, but
must leave the first two hundred years in their
natural gray state,—perhaps sufficiently con-
ceivable by the reader. . . . The Ditmarsch-
Stade kindred, much slain in battle with the
Heathen, and otherwise beaten upon, died out,
about the year 1130 (earlier perhaps, perhaps
later, for all is shadowy still); and were succeeded
in the Salzwedel part of their function by a kin-
dred called 'of Ascanien and Ballenstädt'; the
Ascanier or Anhalt Margraves; whose History,
and that of Brandenburg, becomes henceforth
articulate to us. . . . This Ascanien, happily,
has nothing to do with Brute of Troy or the
pious Æneas's son; it is simply the name of a
most ancient Castle (etymology unknown to me,
ruins still dimly traceable) on the north slope of
the Hartz Mountains; short way from Aschers-
leben,—the Castle and Town of Aschersleben
are, so to speak, a second edition of Ascanien.
. . . . The kindred, called Grafs and ultimately
Herzogs (Dukes) of 'Ascanien and Ballenstädt,'
are very famous in old German History, espe-
cially down from this date. Some reckon that
they had intermittently been Markgrafs, in
their region, long before this; which is conceiv-
able enough; at all events it is very plain they
did now attain the Office in Salzwedel (straight-
way shifting it to Brandenburg); and held it
continuously, it and much else that lay adjacent,
for centuries, in a highly conspicuous manner.
In Brandenburg they lasted for about two-
hundred years."—T. Carlyle, *Frederick the
Great*, *Vol. 2, ch. 3-4*.

A. D. 1142-1152.—The Electorate.—"He
they call 'Albert the Bear (Albrecht der Bär),'
first of the Ascanien Markgraves of Branden-
burg;—first wholly definite Markgrave of Bran-
denburg that there is; once a very shining figure
in the world, though now fallen dim enough
again, . . . got the Northern part of what is
still called Saxony, and kept it in his family;
got the Brandenburg Countries withal, got the
Lausitz; was the shining figure and great man
of the North in his day. The Markgrafdom of
Salzwedel (which soon became of Brandenburg)
he very naturally acquired (A. D. 1142 or earlier);
very naturally, considering what Saxon and
other honours and possessions he had already got
hold of. We can only say, it was the luckiest of
events for Brandenburg, and the beginning of all

the better destinies it has had. A conspicuous Country ever since in the world, and which grows ever more so in our late times. . . . He transferred the Markgrafdom to Brandenburg, probably as more central in his wide lands; Salzwedel is henceforth the led Markgrafdom or Marck, and soon falls out of notice in the world. Salzwedel is called henceforth ever since the 'Old Marck (Alte Marck, Altmarck)'; the Brandenburg countries getting the name of 'New Marck.' . . . Under Albert the Markgrafdom had risen to be an Electorate withal. The Markgraf of Brandenburg was now furthermore the Kurfürst of Brandenburg; officially 'Arch-treasurer of the Holy Roman Empire'; and one of the Seven who have a right (which became about this time an exclusive one for those Seven) to choose, to 'kieren' the Romish Kaiser; and who are therefore called 'Kur-Princes,' Kurfürste or Electors, as the highest dignity except the Kaiser's own." —T. Carlyle, *Frederick the Great*, bk. 2, ch. 4. — See, also, GERMANY: A. D. 1125-1272.

A. D. 1168-1417.—Under the Ascanian, the Bavarian and the Luxemburg lines, to the first of the Hohenzollern.—Albert the Bear was succeeded in 1168 by his son Otho. "In 1170, as it would appear, the name of Brandenburg was substituted for that of North Mark, which had ceased to describe more than the original nucleus of the colony, now one of the several districts into which it was divided. The city and territory of Brandenburg were not probably included in the imperial grant, but were inherited from the Wendish prince, Pribislaw, whom Albert had converted to Christianity. . . . Under Otho II., brother of the preceding, the family inheritance was sorely mismanaged. The Margrave becoming involved in some quarrel with the See of Magdeburg, the Archbishop placed him under the ban; and as the price of release Otho was required to accept the Suzerainty of the prelate for the older and better part of his dominions. His brother and successor, Albert II., was also unfortunate in the beginning of his career; but recovered the favor of the Emperor, and restored the prestige of his house before his death. . . . Very important acquisitions were made during the reign of these two princes. The preoccupations of the King of Denmark gave them a secure foothold in Pomerania, which the native nobility acknowledged; the frontiers were pushed eastward to the Oder, where the New Mark was organized, and the town of Frankfort was laid out; purchase put them in possession of the district of Lebus; and the bride of Otho III., a Bohemian princess, brought him as her dowry an extensive region on the Upper Spree with several thriving villages—all this in spite of the division of power and authority. . . . Otho III. died in 1267, John one year later; and a new partition of the estate was made between their several sons, the oldest, Otho IV., receiving, however, the title and prerogatives of head of the house." The last margrave of the Ascanian line, Walde-mar, died in 1319. "His cousin and only heir, Henry, was a minor, and survived him but a year." Then "a host of claimants arose for the whole or parts of the Mark. The estates showed at first a gallant devotion to the widow, and intrusted the reins of authority to her; but she repaid this fidelity by hastily espousing the Duke of Brunswick, and transferring her rights

to him. The transaction was not, however, ratified by the estates, and the Duke failed to enforce it by arms. Pomerania threw off the yoke which it had once unwillingly accepted; Bohemia reclaimed the wedding portion of Otho's bride; the Duke of Liegnitz sought to recover Lebus, although it had once been regularly sold; and in the general scramble the Church, through its local representatives, fought with all the energy of mere worldly robbers. But in this crisis the Emperor forgot neither the duties of his station nor the interests of his house. Louis II. of Bavaria then wore the purple. By feudal law a vacant fief reverted to its suzerain. . . . It was not therefore contrary to law, nor did it shock the moral sense of the age, when Louis drew the Mark practically into his own possession by conferring it nominally upon his minor son. . . . During the minority of Louis the Margrave, the province was administered by Louis the Emperor, and with some show of vigor." But troubles so thickened about the Emperor, in his conflict with the House of Austria, on the one hand, and with the Pope on the other [see GERMANY: A. D. 1314-1347], that he could not continue the protection of his son. The Mark of Brandenburg was invaded by the King of Poland, and its Margrave "watched the devastation in helpless dismay." The people defended themselves. "The young city of Frankfort was the leader in the tardy but successful uprising. The Poles were expelled; the citizens had for the time saved the Mark. . . . The Margrave finally wearied even of the forms of authority, and sold his unhappy dominions to his two brothers, another Louis and Otho. In the meantime his father had died. The Electors—or five of them—had already deposed him and chosen in his place Charles of Moravia, a prince of the house of Luxemburg, as his successor. He became respectably and even creditably known in history as Charles IV. . . . Although he failed in the attempt to subdue by arms the Margrave of Brandenburg, who had naturally espoused his father's cause, he was persistent and ingenious in diplomatic schemes for overthrowing the House of Bavaria and bringing the Mark under his own sceptre. . . . From Louis he procured . . . a treaty of succession, by which he should acquire Brandenburg in case of the death of that Margrave and his brother Otho without heirs. His intrigues were finally crowned with complete success. Louis died suddenly in 1365. Otho, thenceforth alone in the charge, vacillated between weak submission to the Emperor's will, and spurts of petulant but feeble resistance; until Charles put an end to the farce by invading the Mark, crushing the army of the Margrave, and forcing him to an abject capitulation. In 1371, after a nominal rule of half a century, and for the price of a meagre annuity, the Bavarian line transferred all its rights to the family of Charles IV." Charles died in 1378. His son Wenzel, "for whom the Mark had been destined in the plans of Charles, acquired, meanwhile, the crown of Bohemia, a richer prize, and Brandenburg passed to the next son, Sigismund. The change was a disastrous one." Sigismund pawned the Mark to his kinsman, Jobst, of Moravia, and it fell into great disorder. "Imperial affairs during this period were in scarcely less confusion. Wenzel of Bohemia had been chosen emperor, and then deposed for obvious

unfitness. Rupert, Count Palatine, had next been elected, and had died. Again the post was vacant, and Sigismund, still the real Elector of Brandenburg, . . . issued successfully from the contest. His good fortune was due in a conspicuous degree to the influence and the money of Frederic, Burgrave of Nuremberg [see HOHENZOLLERN, RISE OF THE HOUSE OF]; and it is to the credit of Sigismund that he did not add ingratitude to his other vices, but on his election as emperor hastened [1411] to make his patron statthalter, or viceroy of the Mark." Six years later, in 1417, Frederic was formally invested with the sovereignty of the Mark, as Margrave and Elector.—H. Tuttle, *Hist. of Prussia to the Accession of Frederick the Great*, ch. 1 and 3.

A. D. 1355.—Declared an integral part of the Kingdom of Bohemia. See BOHEMIA: A. D. 1355.

A. D. 1417-1640.—Rising importance of the Hohenzollern family.—Acquisition of the Duchy of Prussia.—On being invested with the Electorate of Brandenburg, Frederick of Nuremberg sold the office of Burgrave to the Nurembergers and devoted himself to his new province. "Temperate, just, and firm in his dealings, he succeeded in reducing Brandenburg from anarchy to order. Already as deputy for Sigismund he had begun the task. . . . During the reign of his son and successor, characteristically known as Frederick Iron-teeth [1440-1472], the strong hand was not relaxed; and Brandenburg became thenceforward tamed to law and order. The Electorate, which during the preceding century had been curtailed by losses in war and by sales, began again to enlarge its borders. The New March, which had been sold in the days of Sigismund to the Teutonic Knights, was now [1455] bought back from them in their need. . . . Albert Achilles, the brother and successor of Frederick II., was a man as powerful and as able as his predecessor. By his accession the principalities of Baireuth and Anspach, which had been separated from the Electorate for the younger sons of Frederick I., were reunited to it; and by a scheme of cross-remainders new plans were laid for the acquisition of territory. . . . It was already understood that the Electorate was to descend according to the law of primogeniture; but Anspach and Baireuth were still reserved as appanages for younger sons; and upon the death of Albert Achilles, in 1484, his territories were again divided, and remained so for more than a hundred years. The result of the division, however, was to multiply and not to weaken the strength of the House. The earlier years of the 16th century saw the Hohenzollerns rising everywhere to power. Albert Achilles had been succeeded [1486] by John, of whom little is known except his eloquence, and by Joachim [1499], who was preparing to bear his part against the Reformation. A brother of Joachim had become, in 1514, Elector of Mentz; and the double vote of the family at the election of Charles V. had increased their importance. The younger branch was rising also to eminence. George of Brandenburg, Margrave of Anspach, and grandson of Albert Achilles, was able in 1524 to purchase the Duchy of Jagerndorf in Silesia, and with it the reversions to the principalities of Oppeln and Ratibor, which eventually fell to him. His younger brother, Albert, had

been chosen in 1511 Grand Master of the Teutonic Order, and was already converting his office into the hereditary Dukedom of Prussia," which it became in 1525 (see POLAND: A. D. 1333-1572). "The Elector Joachim I. of Brandenburg is perhaps the least prominent, but was not the least prudent, of his family. Throughout his life he adhered to the old faith, and preserved his dominions in tranquility. His son and successor, Joachim II., to the joy of his people, adopted the new religion [1539]; and found in the secularized bishoprics of Brandenburg, Havelburg, and Lebus, some compensation for the ecclesiastical Electorate which was about to pass, upon the death of Albert of Mentz, from his family. But he also was able to secure the continuance of peace. Distrustful of the success of the League of Smalkald he refused to join in it, and became chiefly known as a mediator in the struggles of the time. The Electors John George [1571-1598] and Joachim Frederick [1598-1608] followed the same policy of peace. . . . Peace and internal progress had characterized the 16th century; war and external acquisitions were to mark the 17th. The failure of the younger line in 1608 caused Bayreuth, Anspach, and Jagerndorf to fall to the Elector Joachim Frederick; but as they were re-granted almost at once to younger sons, and never again reverted to the Electorate, their acquisition became of little importance. The Margrave, George Frederick, however, had held, in addition to his own territories, the office of administrator for Albert Frederick, second Duke of Prussia, who had become imbecile; and, by his death, the Elector of Brandenburg became next of kin, and claimed to succeed to the office. The admission of this claim placed the Electors in virtual possession of the Duchy. By a deed of co-infeoffment, which Joachim II. had obtained in 1568 from his father-in-law the King of Poland, they were heirs to the Duchy upon failure of the younger line. . . . Duke Albert died in 1618; and Brandenburg and Prussia were then united under the Elector John Sigismund. It was well that the Duchy had been secured before the storm which was already gathering over the Empire had burst. . . . During the long struggle of the Thirty Years' War, the history of Brandenburg is that of a sufferer rather than an actor. . . . George William, who died in 1640, bequeathed a desert to his successor. That successor was Frederick William, to be known in history as the Great Elector."—C. F. Johnston, *Historical Abstracts*, ch. 5.

A. D. 1640-1688.—The Great Elector.—His development of the strength of the Electorate.—His successful wars.—His acquisition of the

complete sovereignty of Prussia.—Fehrbellin.—Frederic William, known in history as the Great Elector, was only twenty years old when he succeeded his father. He found everything in disorder: his country desolate, his fortresses garrisoned by troops under a solemn order to obey only the mandates of the Emperor, his army to be counted almost on the fingers. His first care was to conclude a truce with the Swedes; his second to secure his western borders by an alliance with Holland; his third—not in order of action, for in that respect it took first place—to raise the nucleus of an army; his fourth, to cause the evacuation of his fortresses. . . . To allay the wrath of the Emperor, he temporised until his armed force had attained the number of 8,000. That force once under arms, he boldly asserted his position, and with so much effect that in the discussions preceding the Peace of Westphalia he could exercise a considerable influence. By the terms of that treaty, the part of Pomerania known as Hinder Pommern, the principalities of Magdeburg and Halberstadt, and the bishoprics of Minden and Kammin were ceded to Brandenburg. . . . The Peace once signed, Frederic William set diligently to work to heal the disorders and to repair the mischief which the long war had caused in his dominions. . . . He specially cherished his army. We have seen its small beginning in 1640-42. Fifteen years later, in 1655, or seven years after the conclusion of the Peace of Westphalia, it amounted to 25,000 men, well drilled and well disciplined, disposing of seventy-two pieces of cannon. In the times in which he lived he had need of such an army. In 1654, Christina, the wayward and gifted daughter of Gustavus Adolphus, had abdicated. Her successor on the throne of Sweden was her cousin, Charles Gustavus, Duke of Zweibrücken. . . . The right of Charles Gustavus to the succession was, however, contested by John Casimir, King of Poland. . . . War ensued. In that war the star of Charles Gustavus was in the ascendant, and the unfortunate John Casimir was forced to abandon his own dominions and to flee into Silesia. The vicinity of the two rivals to his own outlying territories was, however, too near not to render anxious Frederic William of Brandenburg. To protect Prussia, then held in fief from the King of Poland, he marched with 8,000 men to its borders. But even with such a force he was unable, or perhaps, more correctly, he was prudently unwilling, to resist the insistence put upon him at Königsberg by the victorious King of Sweden (1656) to transfer to him the feudal overlordship of that province. Great results followed from this compliance. Hardly had the treaty been signed, when John Casimir, returning from Silesia with an Imperial army at his back, drove the Swedes from Poland, and recovered his dominions. He did not evidently intend to stop there. Then it was that the opportunity arrived to the Great Elector. Earnestly solicited by the King of Sweden to aid him in a contest which had assumed dimensions so formidable, Frederic William consented, but only on the condition that he should receive the Polish palatinates (Woiwodschaften) of Posen and Kalisch as the price of a victorious campaign. He then joined the King with his army, met the enemy at Warsaw, fought with him close to that city a great battle, which lasted three days (28th to 30th July 1656), and which terminated then, thanks mainly to the

pertinacity of the Brandenburgers—in the complete defeat of the Poles. The victory gained, Frederic William withdrew his troops. . . . Again did John Casimir recover from his defeat; again, aided by the Imperialists, did he march to the front, reoccupy Warsaw, and take up a threatening position opposite to the Swedish camp. The King of Sweden beheld in this action on the part of his enemy the prelude to his own certain destruction, unless by any means he could induce the Elector of Brandenburg once more to save him. He sent, then, urgent messengers after him to beg him to return. The messengers found Frederic William at Labiau. There the Elector halted and there, joined the next day, 20th November 1656, by King Charles Gustavus, he signed a treaty, by which, on condition of his material aid in the war, the latter renounced his feudal overlordship over Prussia, and agreed to acknowledge the Elector and his male descendants as sovereign dukes of that province. In the war which followed, the enemies of Sweden and Brandenburg multiplied on every side. The Danes and Lithuanians espoused the cause of John Casimir. Its issue seemed to Frederic William more than doubtful. He asked himself, then, whether—the new enemies who had arisen being the enemies of Sweden and not of himself—he had not more to gain by sharing in the victories of the Poles than in the defeats of the Swedes. Replying to himself affirmatively, he concluded, 29th September 1657, through the intermediation of the Emperor, with the Poles, at Wehlau, a treaty whereby the dukedom of Prussia was ceded in absolute sovereignty to the Elector of Brandenburg and his male issue, with reversion to Poland in case of the extinction of the family of the Franconian Hohenzollerns; in return, Frederic William engaged himself to support the Poles in their war against Sweden with a corps of 4,000 men. But before this convention could be acted upon, fortune had again smiled upon Charles Gustavus. Turning in the height of winter against the Danes, the King of Sweden had defeated them in the open field, pursued them across the frozen waters of the Belt to Fünen and Seeland, and had imposed upon their king the humiliating peace of Roeskilde (1658). He seemed inclined to proceed still further in the destruction of the ancient rival of his country, when a combined army of Poles and Brandenburgers suddenly poured through Mecklenburg into Holstein, drove thence the Swedes, and gave them no rest till they had evacuated likewise Schleswig and Jutland (1659). In a battle which took place shortly afterwards on the island of Fünen, at Nyborg, the Swedes suffered a defeat. This defeat made Charles Gustavus despair of success, and he had already begun to treat for peace, when death snatched him from the scene (January 1660). The negotiations which had begun, however, continued, and finally peace was signed on the 1st May 1660, in the monastery of Oliva, close to Danzig. This peace confirmed to the Elector of Brandenburg his sovereign rights over the duchy of Prussia. From this epoch dates the complete union of Brandenburg and Prussia—a union upon which a great man was able to lay the foundation of a powerful North German Kingdom! During the next dozen years, the Great Elector was chiefly busied in establishing his authority in his dominions and curbing the power of the nobles, particularly in

Prussia. In 1674, when Louis XIV. of France provoked war with the German princes by his attack on the Dutch, Frederic William led 20,000 men into Alsace to join the Imperial forces. Louis then called upon his allies, the Swedes, to invade Brandenburg, which they did, under General Wrangel, in January, 1675. "Plundering and burning as they advanced, they entered Havelland, the granary of Berlin, and carried their devastations up to the very gates of that capital." The Elector was retreating from Alsace before Turenne when he heard of the invasion. He paused for some weeks, to put his army in good condition, and then he hurried northwards, by forced marches. The enemy was taken by surprise, and attacked while attempting to retreat, near Fehrbellin, on the 18th of June. After two hours of a tremendous hand-to-hand conflict, "the right wing of the Swedes was crushed and broken; the centre and left wing were in full retreat towards Fehrbellin. The victors, utterly exhausted—they had scarcely quitted their saddles for eleven days—were too worn out to pursue. It was not till the following morning that, refreshed and recovered, they followed the retreating foe to the borders of Mecklenburg. . . . The Great Elector promptly followed up his victory till he had compelled the Swedes to evacuate all Pomerania. Three years later, when they once more crossed the border from Livonia, he forced them again to retreat; and although in the treaty signed at St. Germain in 1679 he was forced to renounce his Pomeranian conquests, he did not the less establish the ultimate right of the State of which he was the real founder to those lands on the Baltic for which he had so hardly struggled at the negotiations which preceded the Peace of Westphalia. When he died (9th May 1688) he left the Kingdom already made in a position of prosperity sufficient to justify his son and successor in assuming, thirteen years later, on the anniversary of the victory of Fehrbellin, the title of King."—G. A. D. 1510-1661.—Portuguese colonization and agriculture.—Introduction of Slavery.—The coming of the Jesuits.—Conquests of the Dutch, and the Portuguese recovery of them.—"Brazil, on which the Portuguese ships had been cast by accident, had been found to unite in itself the capabilities of every part of the world in which Europeans have settled, though happily gold and silver had not yet been discovered, and the colonists betook themselves from the first to agriculture. The first permanent settlements on this coast were made by Jews, exiled by the persecution of the Inquisition; and the government supplemented these by sending out criminals of all kinds. But gradually the consequence of Brazil became recognized, and, as afterwards happened in New England, the nobility at home asked to share the land among themselves. Emmanuel would not countenance such a claim, but this great prince died in 1521, and his successor, John III., extended to Brazil the same system which had been adopted in Madeira and the Azores. The whole sea-coast of Brazil was parcelled out by feudal grants. It was divided into captaincies, each 50 leagues in length, with no limits in the interior; and these were granted out as male fiefs, with absolute power over the natives, such as at that time existed over the serfs who tilled the soil in Europe. But the native Brazilians were neither so easy a conquest as the Peruvians, nor so easily induced to labour; and the Portuguese now began to bring negroes from the Guinea coast. This traffic in human flesh had long been vigorously pursued in various parts of Europe; the Portuguese now introduced it to America. The settlers of Brazil were, properly speaking, the first European colonists. For they sold their own possessions at home, and brought their households with them to the new country. Thus they gradually formed the heart of a new nation, whereas the chief Spaniards always returned home after a certain tenure of their offices, and those who remained in the colony descended to the rank of the conquered natives. Many of those who came to Brazil had already served in the expeditions to the East; and they naturally perceived that the coast of America might raise the productions of India. Hence Brazil early became a plantation colony, and its prosperity is very much due to the culture of the sugar cane. The Portuguese were greatly assisted, both in

the East and the West, by the efforts of the newly founded order of the Jesuits. . . . John III. in [1549] sent out six of the order with the first governor of Brazil. . . . The Dutch, made bold by their great successes in the East, now sought to win the trade of Brazil by force of arms, and the success of the East India Company encouraged the adventurers who subscribed the funds for that of the West Indies, incorporated in 1621. The Dutch Admiral, Jacob Willekens, successfully assaulted San Salvador [Bahia] in 1624, and though the capital was afterwards retaken by the intrepid Archbishop Texeira, one half of the coast of Brazil submitted to the Dutch. Here, as in the East, the profit of the company was the whole aim of the Dutch, and the spirit in which they executed their design was a main cause of its failure. . . . But . . . the profits of the company . . . rose at one time to cent per cent. The visions of the speculators of Amsterdam became greater; and they resolved to become masters of all Brazil. . . . The man whom they despatched [1637] to execute this design was Prince John Maurice of Nassau. . . . In a short time he had greatly extended the Dutch possessions. But the Stad-houder was subject, not to the wise and learned men who sat in the States-General, but to the merchants who composed the courts of the company. They thought of nothing but their dividends; they considered that Maurice kept up more troops and built more fortresses than were necessary for a mercantile community, and that he lived in too princely a fashion for one in their service. Perhaps they suspected him of an intention of slipping into that royal dignity which the feudal frame of Brazilian society seemed to offer him. At any rate, in 1643, they forced him to resign. A recent revolution had terminated the subjection of Portugal to Spain, and the new king of Portugal concluded a truce for ten years with Holland. War was therefore supposed to be out of the question. . . . But the recall of Maurice was the signal for an independent revolt in Brazil. Though the mother countries were at peace, war broke out between the Dutch and the Portuguese of Brazil in 1645. The Jesuits had long preached a crusade against the heretic Dutch. . . . John Ferdinand de Vieyra, a wealthy merchant of Pernambuco, led a general uprising of the Brazilians, and although the Dutch made a stubborn resistance, they received no assistance from home; they were driven from one post after another, until, in 1654, the last of the company's servants quitted Brazil. The Dutch declared war against Portugal; but in 1661 peace was made, and the Dutch sold their claims for 8,000,000 florins, the right of trading being secured to them. But after the expulsion of the Dutch, the trade of Brazil came more and more into the hands of the English."—E. J. Payne, *Hist. of European Colonies*, ch. 2-3.

A. D. 1531-1641.—The Republic of St. Paul.—The Paulistas or Mamelukes.—"The celebrated republic of St. Paul, as it is usually denominated, had its rise about the year 1531, from a very inconsiderable beginning. A mariner of the name of Ramalho, having been shipwrecked on this part of the coast, was received

among a small Indian tribe called the Piratininga, after the name of their chief. Here he was found by De Sousa some years afterwards, and, contrary to the established policy of permitting no settlement excepting immediately on the sea-coast, he allowed this man to remain, on account of his having intermarried and having a family. The advantages of this establishment were such, that permission was soon after given to others to settle here, and as the adventurers intermarried with the natives, their numbers increased rapidly. . . . A mixed race was formed, possessing a compound of civilized and uncivilized manners and customs. The Jesuits soon after established themselves with a number of Indians they had reclaimed, and exerted a salutary influence in softening and harmonizing the growing colony. In 1581, the seat of government was removed from St. Vincent on the coast to St. Pauls; but its subjection to Portugal was little more than nominal. . . . The mixture produced an improved race, 'the European spirit of enterprise,' says Southey, 'developed itself in constitutions adapted to the country.' But it is much more likely that the free and popular government which they enjoyed produced the same fruits here as in every other country. . . . They soon quarreled with the Jesuits [1581], on account of the Indians whom they had reduced to slavery. The Jesuits declaimed against the practice; but as there were now many wealthy families among the Paulistas, the greater part of whose fortunes consisted in their Indians, it was not heard with patience. The Paulistas first engaged in war against the enemies of their allies, and afterwards on their own account, on finding it advantageous. They established a regular trade with the other provinces whom they supplied with Indian slaves. They by this time acquired the name of Mamelukes, from the peculiar military discipline they adopted, bearing some resemblance to the Mamelukes of Egypt. The revolution in Portugal, when Philip II. of Spain placed himself on its throne, cast the Paulistas in a state of independence, as they were the only settlers in Brazil which did not acknowledge the new dynasty. From the year 1580 until the middle of the following century, they may be regarded as a republic, and it was during this period they displayed that active and enterprising character for which they were so much celebrated. . . . While a Spanish king occupied the throne of Portugal, they attacked the Spanish settlements on the Paraguay, alleging that the Spaniards were encroaching on their territory. . . . They attacked the Jesuit missions [1629]. . . . As they had fixed themselves east of the Parana, the Paulistas laid hold of this as a pretext. They carried away upwards of 2,000 of their Indians into captivity, the greater part of whom were sold and distributed as slaves. The Jesuits complained to the king of Spain and to the pope; the latter fulminated his excommunication. The Paulistas attacked the Jesuits in their college, and put their principal to death, expelled the remainder, and set up a religion of their own; at least no longer acknowledged the supremacy of the pope. In consequence of the interruption of the African trade during the Dutch war, the demand for Indian slaves was very much increased. The Paulistas redoubled their exertions, and traversed every part of the Brazils in armed troops. . . . The foundation was laid of enmity to the Portu-

guese, which continues to this day, although a complete stop was put to the infamous practice in the year 1756. . . . When the house of Braganza, in 1640, ascended the throne, the Paulistas, instead of acknowledging him, conceived the idea of electing a king for themselves. They actually elected a distinguished citizen of the name of Bueno, who persisted in refusing to accept, upon which they were induced to acknowledge Joam IV. [1641]. It was not until long afterwards that they came under the Portuguese government."—H. M. Brackenridge, *Voyage to South America*, v. 1, ch. 2.

A. D. 1654-1777.—The Portuguese policy of exclusion and restriction.—Boundary disputes with Spain.—"The period of peace which followed these victories [over the Dutch] . . . was used by the Portuguese government only to get up a kind of old Japanese system of isolation, by which it was intended to keep the colony in perpetual tutelage. In consequence of this even now, after the lapse of half a century since it violently separated itself, Brazilians generally entertain a bitter grudge against the mother country. All the trade to and from Brazil was engrossed by Portugal; every functionary, down to the last clerk, was Portuguese. Any other European of scientific education was looked at with suspicion; and particularly they sought to prevent by all means the exploration of the interior, as they feared not only that the eyes of the natives might be opened to their mode of administration, but also that such travellers might side with the Spaniards in their long dispute regarding the boundaries of the two nations, as the French astronomer, La Condamine, had done. This question, which arose shortly after the discovery, and was hushed up only during the short union of both crowns (from 1581-1640), broke out with renewed vigor now and then, maugre the Treaty of Tordesilhas in 1494 [see AMERICA: A. D. 1494]. . . . By the Treaty of São Ildefonso, in 1777, both parties having long felt how impracticable the old arrangements were—at least, for their American colonies—the boundaries were fixed upon the principle of the 'uti possidetis,' at any rate so far as the imperfect knowledge of the interior allowed; but this effort also proved to be vain. . . . The unsolved question descended as an evil heritage to their respective heirs, Brazil and the South American Republics. A few years ago it gave rise to the terrible war with Paraguay; and it will lead to fresh conflicts between Brazil and the Argentine Republic."—F. Keller, *The Amazon and Madeira Rivers*, pp. 23-24.

A. D. 1808-1822.—Becomes the asylum of Portuguese royalty.—The founding of the independent Empire.—"While anarchy and ruin . . . overspread the greater part of the beautiful continent of South America, the Empire of Bra-

zil won an independent existence without bloodshed, and kept it with credit. The Dutch conquest of Brazil, and its reconquest by the Portuguese, has been mentioned in a former chapter. The country long remained under the close and oppressive monopoly imposed upon it by the Portuguese; but in 1808 [1807] when Napoleon invaded Portugal, the regent embarked [see PORTUGAL: A. D. 1807], with the royal insignia, for Brazil, which at once assumed the dignity of an integral part of the kingdom. The ports were opened to the commerce of the world; the printing-press was introduced; learning was encouraged; the enormous resources of the country were explored; foreign settlers were invited to establish themselves; embassies were sent to European powers of the first rank, and diplomatic agents received. New towns and harbours were planned; new life was breathed into every department of the state. After a few years, the state of affairs in Europe compelled King John VI. to return to Europe, as the only chance of preserving the integrity of the monarchy. The Cortes of Lisbon invited their sovereign to revisit his ancient capital, and deputies from Brazil were summoned to attend the sittings of the National Assembly. But before the deputies could arrive, the Cortes had resolved that Brazil should be again reduced to absolute dependence on Portugal. A resolution more senseless or more impracticable can hardly be imagined. The territory of Brazil was as large as all Europe put together; Portugal was a little kingdom, isolated and without influence among the monarchies of the Old World; yet it was deliberately decreed that all the monopolies of the exploded colonial system should be revived, and that England should be deprived of her free trade to Brazil. The king appointed his eldest son, Dom Pedro, Regent of the new kingdom, and soon after took his departure for Lisbon, with many of the emigrant nobility. Dom Pedro assumed the government under the perplexing circumstances of an empty treasury, a heavy public debt, and the provinces almost in revolt. Bahia disavowed his authority, and the Cortes withheld their support from him. The regent reduced his expenditure to the monthly sum allowed to his princess for pin money; he retired to a country house, and observed the most rigid economy. By great exertions he reduced the public expenditure from \$50,000,000 to \$15,000,000; but the northern and internal provinces still withheld their taxes; the army became mutinous, and the ministers of his father, who still remained in power, were unpopular; the regent in despair demanded his recall. But the Brazilians were at length disarmed by his noble conduct; they recognized his activity, his beneficence, his assiduity in the affairs of government, and the habitual feelings of affection and respect for the House of Braganza, which had for a moment been laid asleep by distrust, were reawakened with renewed strength. It was fortunate that the quarrels which disturbed Brazil were accommodated before the arrival of intelligence from Portugal. Hardly had the king arrived in Lisbon when he found himself obliged to assent to a constitution which treated his Brazilian subjects as mere colonists; succeeding mails brought orders more and more humiliating to the Brazilians. The design of declaring Brazil an independent kingdom, grew

more and more in public favour; but the prince was unwilling to place himself in direct rebellion to the crown of Portugal, and steadily adhered to his determination to leave America. At length, it is related, a despatch was delivered to the regent, which he declined to show to any of his ministers, but which evidently excited in his mind no ordinary emotions of anger: he crushed the paper in his hand, and moved away to a window, where he stood for a few moments in thought; at length he turned to his council with the words 'Independencia ou morte':—the exclamation was received with tumultuous cheers, and was adopted as the watchword of the Revolution. The Portuguese troops were sent back to Europe. The Cortes of Lisbon were now anxious to recall their obnoxious decrees; to admit the deputies from Brazil; to make any concession that might be demanded. But it was too late: the independence of Brazil was formally proclaimed in August, 1822, and in December of the same year, Dom Pedro was crowned Emperor of Brazil. This is the first, and as yet the only instance of a modern colony achieving its independence, and separating itself completely from its metropolis without bloodshed."—Viscount Bury, *Exodus of the Western Nations*, v. 2, ch. 11.

—See, also, PORTUGAL: A. D. 1820-1824.

A. D. 1825-1865.—Wars with the Argentines.—Abdication of Dom Pedro I.—The *Guerra dos Cabanos*.—"In 1825, chiefly through the mediation of England, Brazil was acknowledged as an independent empire. But the inner commotions continued, and were not even soothed by a new Constitution, drawn up in 1823, and sworn to by the Emperor in 1824. New revolts in Pernambuco, and some of the other Northern provinces, and a war of three years with the Argentine Republic, which ended in 1828 by Brazil giving up Banda Oriental, annexed only eleven years before, disturbed and weakened the land. The foreign soldiers, enlisted for this war, and retained after its conclusion to keep down the Opposition, and the extravagant private life of the Emperor, who recklessly trampled down the honour of respectable families, provoked dissatisfaction and murmurs, which rose to the highest pitch when he insisted upon carrying on a most unpopular war in Portugal to defend the rights of his daughter, Dona Maria da Gloria (in whose favour he had abdicated the Portuguese Crown), against his brother, Don Miguel [see PORTUGAL: A. D. 1824-1889]. In April, 1831, Dom Pedro I., so enthusiastically raised to the Brazilian throne only nine years before, was forced to abdicate it, deserted and betrayed by every one, in behalf of his younger son, Pedro. The next period was the most disturbed one that the young Empire had yet witnessed. Slave revolts at Bahia, a civil war in the South, which almost cost it the province of Rio Grande do Sul, and the bloody rebellion known as the *Guerra dos Cabanos*, in Pará and Amazon, from 1835 to 1837, followed each other quickly. In this last revolt, the Brazilians had stirred up the Indians and mestizoes against the abhorred Portuguese, without considering that they should not be able to quench the fire they had themselves kindled. In a short time, the fury of the whole colored population turned against all whites, Brazilians and Portuguese alike, without any

distinction. More than 10,000 persons are said to have perished in this *Guerra dos Cabanos*; and, to the present day, those terrible times and the barbarous cruelties committed by the Indians, half-castes, and mulattoes, continue to be talked of with awe in the two provinces. A revolution in Minas, got up by the personal ambitions of a few political leaders, rather than emanating from the spirit of the people, and the war against Rosas, the Dictator of the Argentine Republic, passed over Brazil without leaving deep traces, at least when compared with the last war against Paraguay; which, besides the stimulus of the old differences about boundaries, was occasioned by the endless vexations and restrictions with which the Dictator Lopez strove to ruin the Brazilian trade on the Paraguay, and to prejudice the province of Mato Grosso."—F. Keller, *The Amazon and Madeira Rivers*, pp. 25-26.

See PARAGUAY: A. D. 1868-1873.

A. D. 1871-1888.—Emancipation of Slaves.—The Brazilian act of emancipation, known as the Law of Rio Branco (taking that name from the Minister who carried it through) was passed on the 28th of September, 1871, "and from that date it was enacted 'that children henceforth born of slave women shall be considered of free condition.' . . . Such children are not to be actually free, but are bound to serve the owners of their mothers for a term of 21 years, under the name of 'apprentices.' These must work, under severe penalties, for their hereditary masters; but if the latter inflict on them excessive bodily punishment, they are allowed to bring suit in a criminal court, which may declare their freedom. A provision was also made for the emancipation of government slaves; and there was a clause which insured a certain sum, to be annually set aside from fines, which was to aid each province in emancipating by purchase a certain number of slaves. . . . The passage of this law did not prove merely prospective in its effects. In a very short time the sums placed aside for emancipating slaves by purchase resulted in the freedom of many bondmen. And more than this, there seemed to be a generous private rivalry in the good work, from motives of benevolence and from religious influence. Many persons in various parts of Brazil liberated their slaves without compensation. . . . I am happy to say that the number liberated, either by the provisions of the State or by private individuals, is always in an increasing ratio. When the writer first went to Brazil [1852] . . . it was estimated that there were 3,000,000 in slavery. . . . There were at the beginning of 1875, when the law of emancipation had been but a little more than three years in operation, 1,476,567 slaves."—J. C. Fletcher and D. P. Kidder, *Brazil and the Brazilians*, ch. 28.—"On the 25th of March, 1884, slavery was abolished in the province of Ceará. The Rio News says, 'The movement began only 15 months ago, the first municipality liberating its slaves on the 1st of January, 1883. The new tax law of last November greatly accelerated this progress, because it made slave-holding impossible, the value of the slave being less than the tax.'" On the 28th of September, 1885, the

impatience of the Brazilians to rid themselves of slavery expressed itself in a new Emancipation Act, known as the Saraiva law. It provided for facilitating and hastening the extension of freedom, by increasing the public fund appropriated to it, by defining the valuation of slaves, and by other effective provisions, so that "within ten years [from its date] it is supposed that slavery will have ceased to exist in Brazil."—H. C. Dent. *A Year in Brazil*, pp. 281-296.—"On March 30, 1887, the official return gave the number of slaves in Brazil as 723,419, of the legal value of \$485,225,212. On May 13, 1888, the Crown Princess, as regent, gave the royal assent to a short measure of two clauses, the first declaring that slavery was abolished in Brazil from the day of the promulgation of the law, and the second repealing all former Acts on the subject. Both Chambers refused to consider the claim for compensation made by the slave owners."—*Statesman's Year-Book*, 1890, p. 391.

A. D. 1889-1891.—Revolution.—Overthrow of the Empire.—Establishment of the Republic of the United States of Brazil.—Religious freedom declared.—"The sudden collapse of the Imperial Government in November [1889], resulting in the downfall of Dom Pedro and his banishment, caused universal surprise. For some time the Government had been credited by the Republican journals with the wish and intention to disperse the army throughout the provinces and along the frontier, so that, with the assistance of the newly-organised National Guard, the succession of the Princess Imperial to the throne might be secured in the event of the death or incapacity through old age of the Emperor Dom Pedro. An infantry battalion, ordered to embark for a distant province, mutinied and refused to go. The War Department resolved to compel them by force to depart." The result was a general mutiny (November 15, 1889), which soon became a revolution. "The organiser of the mutiny was Colonel Benjamin Constant Botelho de Magalhães, an officer of exceptional ability and Professor in the Military Academy. The movement seemed directed at first only against the obnoxious Ouro Preto Ministry; but the enthusiasm of the Republicans, under the leadership of a popular agitator, Jose de Patrocinio, was so very pronounced, that at a meeting held in the city hall, in the afternoon of Nov. 15, a resolution proclaiming the Republic was passed by acclamation. About the same hour, a self-constituted committee, consisting of General Deodoro [da Fonseca], Benjamin Constant, and Quintino Bocayuva, met and organised a Provisional Government," with Marshal Deodoro da Fonseca for its Chief, Colonel Botelho de Magalhães for Minister of War. "A formal decree was issued declaring a federal Republic, the several provinces of the late Empire constituting the States and each State arranging its own constitution and electing its deliberative bodies and local governments. On the morning of the 16th the deposed Emperor received intimation that he and his family must leave the country within twenty-four hours:—'Between 2 and 3 o'clock on the morning of the 17th an officer appeared at the palace and informed the Emperor that he must at once embark, with all the members of his family. The wretched old man protested that he was not a fugitive, and that he preferred

to embark by day; but after listening to the officer's explanation that a conflict might occur and blood might be shed, he finally yielded, protesting that in such a crisis his old grey head was the only one that was cool. And so at the dead hour of night, with no one to say a farewell and bid him God-speed, the aged Emperor, with his devoted wife and children, went down to the Caes Pharonx, where a launch was waiting to convey them out to the small gunboat Parnahyba. About 10 o'clock the gunboat steamed out of the harbour and went down to Ilha Grande to wait for the merchant steamer Alagoas, which had been chartered to convey the exiles to Europe'. . . . It was said that the Imperial Ministry, principally through the instrumentality of Ouro Preto, had arranged with Dom Pedro to abdicate at the end of January, 1890, in favour of his daughter, the Countess d'Eu. But the Countess, with her husband, was extremely unpopular with the army and navy, and from these the feeling of disloyalty spread rapidly among the people. By decree of the Provisional Government, the provinces of Brazil, united by the tie of federation, were to be styled the 'United States of Brazil,' and general elections were to take place in August, 1890, to confirm the establishment of the Republic. A counter-revolution broke out in Rio on Dec. 18. A number of soldiers, sailors, and civilians took part in it, and troops had to be ordered out to disperse them. It was not until the 20th that the disturbance was finally quelled."

—*Annual Register*, 1889, pt. 1, pp. 444-448.—"The revolution was the work of leaders who were not only conscious of their power, but also confident that the nation would inevitably condone their temporary acts of usurpation. There were no signs of weakness, vacillation or uncertainty in their action. . . . A coalition of the army officers and the constitution-makers and political dreamers of the League would have been impracticable if the leaders had not known that the 20 provinces of the Empire were profoundly disaffected and would readily acquiesce in a radical change of government. . . . The Emperor of Brazil has enjoyed the reputation of being one of the most enlightened and progressive sovereigns of his time. . . . He was a ruler with many fascinating and estimable traits, who endeared himself to his people. This and much more may be said in praise of the deposed and banished Emperor; but when the record of his public services and of his private virtues is complete, the fact remains that he stood for a system of centralization that practically deprived the great series of federated provinces of their autonomy and his subjects of the privileges of self-government. Dom Pedro II. was not a constitutional reformer. The charter which he had received from his father was not modified in any essential respect during his long reign."—*N. Y. Tribune Extra*, v. 1, no. 12 (1889).—"A new Constitution . . . was ratified by the first National Congress, convened on Nov. 15, 1890. By this instrument the Brazilian nation constituted itself into a federal republic, under the name of the United States of Brazil. Each of the old provinces was declared a self-governing state, to be administered under a republican form of government, with power to impose taxes, and subject to no interference from the Central Government, except for purposes of national

defense or the preservation of internal order or for the execution of Federal laws. Legislation relating to customs, paper currency, and postal communications is reserved to the Federal Government. The right of suffrage is secured to all male citizens over 21 years old, with the exception of beggars, persons ignorant of the alphabet, soldiers in actual service, and persons under monastic vows, registration being the only prerequisite. The executive authority is vested in the President . . . elected by the people directly for the term of six years, and . . . not eligible for the succeeding term. . . . Senators are elected by the Legislatures of the States for nine years, three from each State, one retiring and his successor being chosen every three years. . . . The Chamber of Deputies has the initiative in all laws relating to taxation. Deputies are elected for three years by direct popular vote in the proportion of one to every 70,000 inhabitants. . . . It is declared that no sect or church shall receive aid from the National or State governments." In 1891, differences arose between the President and Congress, at first over financial measures passed by the Chambers and vetoed by the President and schemes recommended by the President that were voted down by Congress. In November the President published a decree dissolving Congress, closed the Chambers by force, proclaimed himself Dictator on the invitation of officers of the army, and convoked a new Congress, to be charged with the revision of the constitution. The State of Rio Grande do Sul led off in a revolt against this usurpation, and on the 23d of November, after some shots had been fired into the city of Rio de Janeiro by a naval squadron acting against him, President Fonseca resigned. "Floriano Peixoto was immediately installed by the revolutionary committee as President in his stead."—*Appleton's Annual Cyclopædia* 1891, pp. 91-96.—For a time, the government under President Peixoto was maintained with considerable success; but in 1893 a serious rebellion, in which the navy took the lead, broke out. The naval insurgents held the harbor of Rio de Janeiro for some months, but gradually lost support. On the 1st of March, 1894, a presidential election was held, which resulted in the choice of Prudente Moraes, a civilian. This removed the leading grievance of the rebels, that Peixoto was perpetuating a régime of pure militarism. On the 11th of March the fleet which the government had been fitting out in the United States and Europe appeared at the entrance to the harbor of Rio. The insurgent commander offered to surrender on conditions, which being refused, he and his officers sought asylum on first a French and later a Portuguese war vessel. Thus deserted, the crews of the insurgent vessels surrendered without resistance when the government batteries opened fire. In the first part of April the government forces totally defeated the rebels in Rio Grande do Sul. See CONSTITUTION OF BRAZIL.

BREHON LAWS.—"The portion of the Irish tribe system which has attracted most attention is the mode in which the judicial authority was withdrawn from the chief and appropriated by the hereditary caste of the Brehons, and also the supposed anomalous principles which they applied to the decision of the cases which came before them. The earlier English writers found no terms too strong to express their abhorrence and contempt of these native judges, and their contempt for the principles upon which they proceeded. On the other hand, Irish writers attributed to these professional arbitrators advanced principles of equity wholly foreign to an early community. . . . The translation of the existing vast mass of Brehon law books, and the translation [publication?] of the most important of them by the order of the government, have disposed of the arguments and assertions on both sides. It is now admitted, that the system and principles of the Brehon jurisprudence present no characteristics of any special character, although in them primitive ideas of law were elaborated in a manner not found elsewhere; . . . the laws which existed among the native Irish were in substance those which are found to have prevailed among other Aryan tribes in a similar stage of social progress; as the social development of the nation was prematurely arrested, so also were the legal ideas of the same stage of existence retained after they had disappeared in all other nations of Europe. This legal survival continued for centuries the property of an hereditary caste, who had acquired the knowledge of writing, and some tincture of scholastic philosophy and civil law. . . . The learning of the Brehons consisted (1) in an acquaintance with the minute ceremonies, intelligible now only to an archæologist, and not always to him, by which the action could be instituted, and without which no Brehon could assume the role of arbitrator; and (2) in a knowledge of the traditions, customs and precedents of the tribe, in accordance with which the dispute should be decided."—A. G. Richey, *Short Hist. of the Irish People*, ch. 3.

BRETHREN OF THE COMMON LOT OR COMMON LIFE.—"The Societies of the Beguines, Beghards, and Lollards [see BEGUINES], which from the first laboured under various defects and imperfections, had in course of time degenerated, and by their own fault, either fallen to pieces of themselves, or been suppressed. The two things, however, still existed, viz., the propensity to religious association, . . . and, likewise, the outward condition, which required and rendered practicable the efforts of benevolence and charity, strengthened by cooperation. The last was particularly the case in the Netherlands, and most in the northern provinces. . . . Here, then, the Institute of the Common Lot takes its rise. . . . The first author of this new series of evolutions was Gerhard Groot (Geert Groote or de Groot, Gerhardus Magnus), a man of glowing piety and great zeal in doing good, a

powerful popular orator and an affectionate friend of youth [1340-1384]. . . . His affection for Holy Scripture and the ancient Fathers kindled in Gerhard's bosom the liveliest zeal for collecting the records of Christian antiquity. . . . Hence, he had long before employed young men, under his oversight, as copyists, thereby accomplishing the threefold end of multiplying these good theological works, giving profitable employment to the youths, and obtaining an opportunity of influencing their minds. This he continued more and more to do. The circle of his youthful friends, scholars, and transcribers, became from day to day larger, and grew at length into a regular society. Having thus in part owed its origin to the copying of the Scriptures and devotional books, the Society from the outset, and through its whole continuance, made the Holy Scripture and its propagation, the copying, collecting, preserving, and utilizing of good theological and ascetical books, one of its main objects. . . . The members were called 'Brethren of the Common Lot,' [or of the Common Life] or 'Brethren of Good Will,' 'Fratres Collationarii,' 'Jeronymians,' and 'Gregorians.' . . . Imitating the Church at Jerusalem, and prompted by brotherly affection, they mutually shared with each other their earnings and property, or consecrated also their fortune, if they possessed any, to the service of the community. From this source, and from donations and legacies made to them, arose the 'Brother-houses,' in each of which a certain number of members lived together, subjected, it is true, in dress, diet, and general way of life, to an appointed rule, but yet not conventually sequestered from the world, with which they maintained constant intercourse, and in such a way as, in opposition to Monachism, to preserve the principle of individual liberty."—C. Ullmann, *Reformers before the Reformation*, v. 2, pt. 2, ch. 1.—"Through the wonderful activity of that fraternity of teachers, begun about 1360, called the Brethren of the Common Life, the Netherlands had the first system of common schools in Europe. These schools flourished in every large town and almost in every village."—W. E. Griffis, *The Influence of the Netherlands*, p. 3.—See, also, EDUCATION: RENAISSANCE.

BRETHREN OF THE FREE SPIRIT. See BEGUINES.

BRETIGNY, Treaty of.—The treaty, called at the time "the great peace," concluded May 8, 1360, between Edward III. of England and John II. of France, in which Edward renounced his pretensions to the French crown, released for a ransom King John, then a prisoner in his hands, and received the full sovereignty of Guienne, Poitou and Ponthieu in France, besides retaining Calais and Guisnes.—See FRANCE: A. D. 1337-1360.

BRETWALDA.—A title given to some of the early English kings. "Opinions differ as to the meaning of the word Bretwalda. Palgrave and Lappenberg take it as equivalent to 'ruler of Britain': Kemble construes it 'broad-ruling,' and sees in it a dignity without duty, hardly more than an 'accidental predominance.' (Saxons in England, ii., 18.) The list of those who obtained this 'ducatu' includes Ethelbert of Kent, who broke the power of the petty kings

as far as the Humber, Redbald of East Anglia, who obtained it by some means even in the lifetime of Ethelbert, and the three great Northumbrian kings, Edwin, Oswald and Oswy, whose supremacy however did not extend to Kent."—C. Elton, *Origins of English Hist.*, p. 392, note.

BRISTOL: 12th Century.—Its slave trade and other commerce.—“Within its comparatively narrow limits Bristol must have been in general character and aspect not unlike what it is to-day—a busy, bustling, closely-packed city, full of the eager, active, surging life of commercial enterprise. Ostmen from Waterford and Dublin, Northmen from the Western Isles and the more distant Orkneys, and even from Norway itself, had long ago learnt to avoid the shock of the ‘Higra,’ the mighty current which

still kept its heathen name derived from the sea-god of their forefathers, and make it serve to float them into the safe and commodious harbour of Bristol, where a thousand ships could ride at anchor. As the great trading centre of the west Bristol ranked as the third city in the kingdom, surpassed in importance only by Winchester and London. The most lucrative branch of its trade, however, reflects no credit on its burghers. All the eloquence of S. Wulfstan and all the sternness of the Conqueror had barely availed to check for a while their practice of kidnapping men for the Irish slave-market; and that the traffic was in full career in the latter years of Henry I. we learn from the experiences of the canons of Laon.”—K. Norgate, *England under the Angevin Kings*, v. 1, ch. 1.

A. D. 1685.—The commerce and wealth of the city.—“Next to the capital, but next at an immense distance, stood Bristol, then the first English seaport. . . . Pepys, who visited Bristol eight years after the Restoration, was struck by the splendour of the city. But his standard was not high; for he noted down as a wonder the circumstance that, in Bristol, a man might look round him and see nothing but houses. . . . A few churches of eminent beauty rose out of a labyrinth of narrow lanes built upon vaults of no great solidity. If a coach or cart entered those alleys, there was danger that it would be wedged between the houses, and danger also that it would break in the cellars. Goods were therefore conveyed about the town almost exclusively in trucks drawn by dogs; and the richest inhabitants exhibited their wealth, not by riding in carriages, but by walking the streets with trains of servants in rich liveries and by keeping tables loaded with good cheer. The hospitality of the city was widely renowned, and especially the collations with which the sugar refiners regaled their visitors. . . . This luxury was supported by a thriving trade with the North American Plantations and with the West Indies. The passion for colonial traffic was so strong that there was scarcely a small shopkeeper in Bristol who had not a venture on board of some ship bound for Virginia or the Antilles. Some of these venturers indeed were not of the most honourable kind. There was, in the Transatlantic possessions of the crown, a great demand for labour; and this demand was partly supplied by a system of crimping and kidnapping at the principal English seaports. Nowhere was this system in such active and extensive operation as at Bristol. . . . The number of houses appears, from the returns of the hearth-money, to have been, in the year 1685, just 5,300. . . . The population of Bristol must therefore have been about 29,000.”—Lord Macaulay, *Hist. of Eng.*, ch. 3 (v. 1).

A. D. 1831.—The Reform Bill Riots.—The popular excitement produced in England in 1831 by the action of the House of Lords in rejecting the Reform Bill, led to riots in several places, but most seriously at Bristol. “The Bristol mobs have always been noted for their brutality; and the outbreak now was such as to amaze and confound the the whole kingdom. . . . The lower parts of the city were the harbourage of probably

a worse seaport populace than any other place in England, while the police was ineffective and demoralised. There was no city in which a greater amount of savagery lay beneath a society proud, exclusive, and mutually repellent, rather than enlightened and accustomed to social co-operation. These are circumstances which go far to account for the Bristol riots being so fearfully bad as they were. Of this city, Sir Charles Wetherell—then at the height of his unpopularity as a vigorous opponent of the Reform Bill—was recorder; and there he had to go, in the last days of October, in his judicial capacity. . . . The symptoms of discontent were such as to induce the mayor, Mr. Pinney, to apply to the home-office for military aid. Lord Melbourne sent down some troops of horse, which were quartered within reach, in the neighbourhood of the city. . . . Sir Charles Wetherell could not be induced to relinquish his public entry, though warned of the danger by the magistrates themselves. . . . On Saturday, October 29, Sir Charles Wetherell entered Bristol in pomp; and before he reached the Mansion House at noon, he must have been pretty well convinced, by the hootings and throwing of stones, that he had better have foregone the procession. For some hours the special constables and the noisy mob in front of the Mansion House exchanged discourtesies of an emphatic character, but there was no actual violence till night. At night, the Mansion House was attacked, and the Riot Act was read; but the military were not brought down, as they ought to have been, to clear the streets. The mayor had 'religious scruples,' and was 'humane'; and his indecision was not overborne by any aid from his brother-magistrates. When the military were brought in, it was after violence had been committed, and when the passions of the mob were much excited. Sir Charles Wetherell escaped from the city that night. During the dark hours, sounds were heard provocative of further riot; shouts in the streets, and the hammering of workmen who were boarding up the lower windows of the Mansion House and the neighbouring dwellings. On the Sunday morning, the rioters broke into the Mansion House without opposition; and from the time they got into the cellars, all went wrong. Hungry wretches and boys broke the necks of the bottles, and Queen Square was strewn with the bodies of the dead-drunk. The soldiers were left without orders, and their officers without that sanction of the magistracy in the absence of which they could not act, but only parade; and in this parading, some of the soldiers naturally lost their tempers, and spoke and made gestures on their own account, which did not tend to the soothing of the mob. This mob never consisted of more than five or six hundred. . . . The mob declared openly what they were going to do; and they went to work unchecked—armed with staves and bludgeons from the quays, and with iron palisades from the Mansion House—to break open and burn the bridewell, the jail, the bishop's palace, the custom-house, and Queen Square. They gave half an hour's notice to the inhabitants of each house in the square, which they then set fire to in regular succession, till two sides, each measuring 550 feet, lay in smoking ruins. The bodies of the drunken were seen roasting in the fire. The greater number of the rioters were believed to be under twenty years of age, and some

were mere children; some Sunday scholars, hitherto well conducted, and it may be questioned whether one in ten knew anything of the Reform Bill, or the offences of Sir Charles Wetherell. On the Monday morning, after all actual riot seemed to be over, the soldiery at last made two slaughterous charges. More horse arrived, and a considerable body of foot soldiers; and the constabulary became active; and from that time the city was in a more orderly state than the residents were accustomed to see it. . . . The magistrates were brought to trial, and so was Colonel Brereton, who was understood to be in command of the whole of the military. The result of that court-martial caused more emotion throughout the kingdom than all the slaughtering and burning, and the subsequent executions which marked that fearful season. It was a year before the trial of the magistrates was entered upon. The result was the acquittal of the mayor, and the consequent relinquishment of the prosecution of his brother-magistrates."—H. Martineau, *A History of the Thirty Years' Peace*, bk. 4, ch. 4 (v. 2).

BRITAIN, The name. See **BRITANNIA**.

Celtic Tribes.—"It appears that the south-eastern part of the island, or the district now occupied by the county of Kent, was occupied by the Cantii, a large and influential tribe, which in Cæsar's time, was divided among four chiefs or kings. To the west, the Regni held the modern counties of Sussex and Surrey, from the sea-coast to the Thames. Still farther west, the Belgæ occupied the country from the southern coast to the Bristol Channel, including nearly the whole of Hampshire, Wiltshire and Somersetshire. The whole of the extensive district extending from the Belgæ to the extreme western point of the island, then called Antivestæum or Bolerium (now the Land's End) including Devonshire and Cornwall, was occupied by the Dumnonii, or Damnonii. On the coast between the Dumnonii and the Belgæ the smaller tribe of the Durotriges held the modern county of Dorset. On the other side of the Thames, extending northwards to the Stour, and including the greater part of Middlesex as well as Essex, lay the Trinobantes. To the north of the Stour dwelt the Iceni, extending over the counties of Suffolk, Norfolk, Cambridge and Huntingdon. The Coritavi possessed the present counties of Northampton, Leicester, Rutland, Derby, Nottingham and Lincoln; and the south-eastern part of Yorkshire was held by the Parisi. Between the tribes last enumerated, in the counties of Buckingham, Bedford and Hertford, lay the tribe called by Ptolemy the Catyeuchiani, and by others Catuvellani. Another name, apparently, for this tribe, or for a division of it, was the Cassii. West of these were the Atrebatæ, in Berkshire; and still further west were the Dobuni, in the counties of Oxford and Gloucester. . . . The interior of the island northward was occupied by the Brigantes, who held the extensive districts, difficult of approach on account of their mountains and woods, extending from the Humber and the Mersey to the present borders of Scotland. This extensive tribe appears to have included several smaller ones [the Voluntii, the Sestuntii, the Jugantes and the Cangi]. The Brigantes are believed to

have been the original inhabitants of the island, who had been driven northward by successive invasions. . . . Wales, also, was inhabited by a primitive population. The northern counties . . . was the territory of the Ordovices. The south-eastern counties . . . were held by the Demetæ. The still more celebrated tribe of the Silures inhabited the modern counties of Hereford, Radnor, Brecknock, Monmouth and Clamorgan. Between these and the Brigantes lay the Cornabii or Carnabii. The wilder parts of the island of Britain, to the north of the Brigantes, were inhabited by a great number of smaller tribes, some of whom seem to have been raised in the scale of civilization little above savages. Of these we have the names of no less than twenty-one. Bordering on the Brigantes were the Otadeni, inhabiting the coast from the Tyne to the Firth of Forth. . . . Next to them were the Gadeni. . . . The Selgovæ inhabited Annandale, Nithsdale and Eskdale, in Dumfriesshire, with the East of Galloway. The Novantes inhabited the remainder of Galloway. The Damnii, a larger tribe, held the country from the chain of hills separating Galloway from Carrick, northward to the river Ern. These tribes lay to the south of the Forth and Clyde. Beyond the narrow boundary formed by these rivers lay [the Horestii, the Venricones or Vernicomes, the Taixali or Taexali, the Vacomagi, the Albani, the Cantæ, the Logi, the Carnabii, the Catini, the Mertæ, the Carnonacæ, the Creones, the Cerones, and the Epidii]. The ferocious tribe of the Attacotti inhabited part of Argyleshire, and the greater part of Dumbartonshire. The wild forest country of the interior, known as the Caledonia Sylva (or Forest of Celyddon), extended from the ridge of mountains between Inverness and Perth, northward to the forest of Balnagowan, including the middle parts of Inverness and Ross, was held by the Caledonii, which appears to have been at this time [of the conquests of Agricola] the most important and powerful of all the tribes north of the Brigantes."—T. Wright, *The Celt, the Roman and the Saxon*, ch. 2.

B. C. 55-54.—Cæsar's invasions.—Having extended his conquests in Gaul to the British Channel and the Strait of Dover (see GAUL: B. C. 58-51), Cæsar crossed the latter, in August, B. C. 55, and made his first landing in Britain, with two legions, numbering 8,000 to 10,000 men. Portus Itius, from which he sailed, was probably either Wissant or Boulogne, and his landing place on the British coast is believed to have been near Deal. The Britons disputed his landing with great obstinacy, but were driven back, and offered to submit; but when a few days afterwards, Cæsar's fleet suffered greatly from a storm, they reconsidered their submission and opened hostilities again. Routed in a second battle, they once more sued for peace, and gave hostages; whereupon Cæsar reembarked his troops and returned to the continent, having remained in Britain not more than three weeks and penetrated the island a short distance only. The following summer he crossed to Britain again, determined on making a thorough conquest of the country. This time he had five legions at his back, with two thousand horse, and the expedition was embarked on more than eight hundred ships. He sailed from and landed

at the same points as before. Having established and garrisoned a fortified camp, he advanced into the country, encountering and defeating the Britons, first, at a river, supposed to be the Stour which flows past Canterbury. A storm which damaged his fleet then interrupted his advance, compelling him to return to the coast. When the disaster had been repaired he marched again, and again found the enemy on the Stour, assembled under the command of Cassivelaunus, whose kingdom was north of the Thames. He dispersed them, after much fighting, with great slaughter, and crossed the Thames, at a point, it is supposed, near the junction of the Wey. Thence he pushed on until he reached the "oppidum" or stronghold of Cassivelaunus, which is believed by some to have been on the site of the modern town of St. Albans,—but the point is a disputed one. On receiving the submission of Cassivelaunus, and of other chiefs, or kings, fixing the tribute they should pay and taking hostages, Cæsar returned to the coast, reembarked his army and withdrew. His stay in Britain on this occasion was about sixty days.—Cæsar, *Gallie War*, bk. 4, ch. 20-36, and bk. 7, ch. 7-33.

A. D. 43-53.—Conquests of Claudius.—Nearly a hundred years passed after Cæsar's hasty invasion of Britain before the Romans reappeared on the island, to enforce their claim of tribute. It was under the fourth of the imperial successors of Julius Cæsar, the feeble Claudius, that the work of Roman conquest in Britain was really begun. Aulus Plautius, who commanded in Gaul, was sent over with four legions, A. D. 43, to obtain a footing and to smooth the way for the Emperor's personal campaign. With him went one, Vespasian, who began in Britain to win the fame which pushed him into the imperial seat and to a great place in Roman history. Plautius and Vespasian made good their occupation of the country as far as the Thames, and planted their forces strongly on the northern bank of that river, before they summoned the Emperor to their aid. Claudius came before the close of the military season, and his vanity was gratified by the nominal leading of an advance on the chief oppidum, or stronghold of the Britons, called Camulodunum, which occupied the site of the modern city of Colchester. The Trinobantes, whose capital it was, were beaten and the place surrendered. Satisfied with this easy victory, the Emperor returned to Rome, to enjoy the honors of a triumph; while Vespasian, in command of the second legion, fought his way, foot by foot, into the southwest of the island, and subjugated the obstinate tribes of that region. During the next ten years, under the command of Ostorius Scapula, who succeeded Plautius, and Avitus Didius Gallus, who succeeded Ostorius, the Roman power was firmly settled in southern Britain, from the Stour, at the East, to the Exe and the Severn at the West. The Silures, of South Wales, who had resisted most stubbornly, under Caractacus, the fugitive Trinobantine prince, were subdued and Caractacus made captive. The Iceni (in Suffolk, Norfolk and Cambridge-

shire) were reduced from allies to sullen dependents. The Brigantes, most powerful of all the tribes, and who held the greater part of the whole north of modern England, were still independent, but distracted by internal dissensions which Roman influence was active in keeping alive. This, stated briefly, was the extent to which the conquest of Britain was carried during the reign of Claudius,—between A. D. 43 and 54.—C. Merivale, *Hist. of the Romans*, ch. 51.

ALSO IN: E. Guest, *Origines Celticae*, v. 2, pt. 2, ch. 13.—H. M. Scarth, *Roman Britain*, ch. 4.—See, also, COLCHESTER, ORIGIN OF.

A. D. 61.—**Campaigns of Suetonius Paulinus.**—From A. D. 50 to 61, while Didius Gallus and his successor Veranius commanded in Britain, nothing was done to extend the Roman acquisitions. In the latter year, Suetonius Paulinus came to the command, and a stormy period of war ensued. His first movement was to attack the Druids in the isle of Mona, or Anglesey, into which they had retreated from Gaul and Britain, in successive flights, before the implacable hostility of Rome. "In this gloomy lair, secure apparently, though shorn of might and dignity, they still persisted in the practice of their unholy superstition. . . . Here they retained their assemblies, their schools, and their oracles; here was the asylum of the fugitives; here was the sacred grove, the abode of the awful deity, which in the stillest noon of night or day the priest himself scarce ventured to enter lest he should rush unwittingly into the presence of its lord." From Segontium (modern Caernarvon) Suetonius crossed the Menai Strait on rafts and boats with one of his legions, the Batavian cavalry swimming their horses. The landing was fiercely disputed by women and men, priests and worshippers; but Roman valor bore down all resistance. "From this moment the Druids disappear from the page of history; they were exterminated, we may believe, upon their own altars; for Suetonius took no half measures." This accomplished, the Roman commander was quickly called upon to meet a terrific outburst of patriotic rage on the part of the powerful nation of the Iceni, who occupied the region now forming the counties of Suffolk, Norfolk, Cambridge, and Huntingdon. They had been allies of the Romans, first; then tributaries, under their own king, and finally subjects, much oppressed. Their last king, Prasutagus, had vainly hoped to win favor for his wife and children, when he died, by bequeathing his kingdom to the Roman State. But the widowed queen, Boudicea, or Boadicea, and her daughters, were only exposed with more helplessness to the insolence and the outrages of a brutal Roman officer. They appealed to their people and maddened them by the exposure of indescribable wrongs. The rising which ensued was fierce and general beyond precedent. "The Roman officials fled, or, if arrested, were slaughtered; and a vast multitude, armed and unarmed, rolled southward to overwhelm and extirpate the intruders. To the Colne, to the Thames, to the sea, the country lay entirely open." The colony at Camulodunum (Colchester), was destroyed; Verulamium (St. Albans), and Londinium (London), were sacked and burned; not less than 70,000 of the Romans in Britain were slaughtered without mercy. Suetonius made

haste to quit Anglesey when the dreadful news reached him, and pressed, with all speed, along the great highway of Watling Street—gathering up his forces in hand as he went—to reach the awful scene of rage and terror. He had collected but 10,000 men when he confronted, at last, the vast swarm of the insurgents, on a favorable piece of ground that he had secured, in the neighborhood of Camulodunum. But, once more, the valor of undisciplined semi-barbarism wrecked itself on the firm shields of the Roman cohorts, and 80,000 Britons are said to have fallen in the merciless fight. The insurrection was crushed and Roman authority in Britain reaffirmed. But the grim Suetonius dealt so harshly with the broken people that even Rome remonstrated, and he was, presently, recalled, to give place to a more pacific commander.—C. Merivale, *Hist. of the Romans*, ch. 51.

ALSO IN: H. M. Scarth, *Roman Britain*, ch. 5.—T. Mommsen, *Hist. of Rome*, bk. 8, ch. 5.

A. D. 78-84.—**Campaigns of Agricola.**—For seventeen years after the recall of Suetonius Paulinus (A. D. 61) there was a suspension of Roman conquest in Britain. The military power in the island suffered great demoralization, resulting naturally from the chaos of affairs at Rome, between Nero and Vespasian. These conditions ceased soon after the accession of the Flavian Emperor, and he, who had attained first in Britain the footing from which he climbed to the throne, interested himself in the spreading of his sovereignty over the whole of the British island. C. Julius Agricola was the soldier and statesman—a great man in each character—whom he selected for the work. Agricola was made prefect or Governor of Britain, A. D. 78. "Even in his first summer, when he had been but a few months in the island, and when none even of his own officers expected active service, Agricola led his forces into the country of the Ordovices, in whose mountain passes the war of independence still lingered, drove the Britains across the Menai Straits and pursued them into Anglesey, as Suetonius had done before him, by boldly crossing the boiling current in the face of the enemy. Another summer saw him advance northward into the territory of the Brigantes, and complete the organization of the district, lately reduced, between the Humber and Tyne. Struck perhaps with the natural defences of the line from the Tyne to the Solway, where the island seems to have broken, as it were, in the middle and soldered unevenly together, he drew a chain of forts from sea to sea. . . . In the third year of his command, Agricola pushed forward along the eastern coast, and, making good with roads and fortresses every inch of his progress, reached, as I imagine, the Firth of Forth. . . . Here he repeated the operations of the preceding winter, planting his camps and stations from hill to hill, and securing a new belt of territory, ninety miles across, for Roman occupation." The next two years were spent in strengthening his position and organizing his conquest. In A. D. 83 and 84 he advanced beyond the Forth, in two campaigns of hard fighting, the latter of which was made memorable by the famous battle of the Grampians, or Graupius, fought with the Caledonian hero Gathacus. At the close of this campaign he sent his fleet northward to explore the unknown coast and to awe the remoter tribes, and it is

claimed that the vessels of Agricola circumnavigated the island of Britain, for the first time, and saw the Orkneys and Shetlands. The further plans of the successful prefect were interrupted by his sudden recall. Vespasian, first, then Titus, had died while he pursued his victorious course in Caledonia, and the mean Domitian was envious and afraid of his renown.—C. Merivale, *Hist. of the Romans*, ch. 81.

2d-3d Centuries.—Introduction of Christianity. See CHRISTIANITY: A. D. 100-312.

A. D. 208-211.—Campaigns of Severus.—A fresh inroad of the wild Caledonians of the north upon Roman Britain, in the year 208, caused the Emperor Severus to visit the distant island in person, with his two worthless sons, Caracalla and Geta. He desired, it is said, to remove those troublesome youths from Rome and to subject them to the wholesome discipline of military life. The only result, so far as they were concerned, was to give Caracalla opportunities for exciting mutiny among the troops and for making several attempts against his father's life. But Severus persisted in his residence in Britain during more than two years, and till his death, which occurred at Eboracum (York) on the 4th of February, A. D. 211. During that time he prosecuted the war against the Caledonians with great vigor, penetrating to the northern extremity of the island, and losing, it is said, above 50,000 men, more by the hardships of the climate and the march than by the attacks of the skulking enemy. The Caledonians made a pretence of submission, at last, but were soon in arms again. Severus was then preparing to pursue them to extermination, when he died.—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 6.

ALSO IN: T. Mommsen, *Hist. of Rome*, bk. 8, ch. 5.

A. D. 288-297.—Rebellion of Carausius.—“During the reign of Gallienus [A. D. 260-268] . . . the pirate fleets of the Franks infested the British seas, and it became needful to have a fleet to protect the coast. The command of this fleet had been conferred on Carausius, a Menapian by birth; but he was suspected of conniving at piracy, in order that he might enrich himself by becoming a sharer in their booty, when they returned laden with plunder. To save himself, therefore, from punishment, he usurped the imperial power, A. D. 288, and reigned over Britain for seven years. A vast number of his coins struck in Britain have been preserved, so many that the history of Carausius has been written from his medals. He was slain at length by his minister Allectus, who usurped his power. The Franks [as allies of Allectus] had well-nigh established their power over the south portion of Britain when it was broken by Constantius, the father of Constantine the Great, who defeated Allectus in a decisive battle, in which that usurper was slain. . . . Allectus held the government of Britain for three years. Many of his coins are found.”—H. M. Scarth, *Roman Britain*, ch. 10.

A. D. 323-337.—Constantine's Organization.—Under the scheme of government designed by Diocletian and amended by Constantine, “Britain

formed part of a vast pro-consulate, extending from Mount Atlas to the Caledonian deserts, and was governed by the Gallic prefect, through a ‘vicar’ or deputy at York. The island was divided into five new provinces. . . . Britain was under the orders of the Count of Britain, assisted by the subordinate officers. The Duke of Britain commanded in the north. The Count of the Saxon Shore, governed the ‘Maritime Tract’ and provided for the defence of the south-eastern coast. The Saxon Shore on the coast of Britain must not be mistaken for the Saxon Shore on the opposite coast of France, the headquarters of which were the harbour of Boulogne. The names of the several provinces into which Britain was divided are given in the ‘Notitia,’ viz:—1. Britannia Prima, which included all the south and west of England, from the estuary of the Thames to that of the Severn. 2. Britannia Secunda, which included the Principality of Wales, bounded by the Severn on the east and the Irish Channel on the west. 3. Flavia Cæsariensis,—all the middle portion of Britain, from the Thames to the Humber and the estuary of the Dee. 4. Maxima Cæsariensis,—the Brigantian territory, lying between the estuaries of the Humber and Dee, and the Barrier of the Lower Isthmus. 5. Valentia,—the most northern portion, lying between the barrier of Hadrian and that of Antoninus.”—H. M. Scarth, *Roman Britain*, ch. 10.

A. D. 367-370.—Deliverance by Theodosius.—The distracted condition of affairs in the Roman Empire that soon followed the death of Constantine, which was relieved by Julian for a brief term, and which became worse at his death, proved especially ruinous to Roman Britain. The savage tribes of Caledonia—the Picts, now beginning to be associated with the Scots from Ireland—became bolder from year to year in their incursions, until they marched across the whole extent of Britain. “Their path was marked by cruelties so atrocious, that it was believed at the time and recorded by St. Jerome that they lived on human flesh. London, even, was threatened by them, and the whole island, which, like all the other provinces of the Empire, had lost every spark of military virtue, was incapable of opposing any resistance to them. Theodosius, a Spanish officer, and father of the great man of the same name who was afterwards associated in the Empire, was charged by Valentinian with the defence of Britain. He forced the Scots to fall back (A. D. 367-370), but without having been able to bring them to an engagement.”—J. C. L. de Sismondi, *Fall of the Roman Empire*, ch. 5.—“The splendour of the cities and the security of the fortifications were diligently restored by the paternal care of Theodosius, who with a strong hand confined the trembling Caledonians to the northern angle of the island, and perpetuated, by the name and settlement of the new province of Valentia, the glories of the reign of Valentinian.”—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 25.

A. D. 383-388.—Revolt of Maximus.—In 383, four years after Theodosius the Great had been associated in the Roman sovereignty by the young Emperor Gratian, and placed on the throne of the East, the generous Gratian lost his own throne, and his life, through a revolt that was organized in Britain. “One Maximus, a Spaniard by birth occupying a high official position

in that province, forced on step by step into insurrection, by a soldiery and a people of whom he appears to have been the idol, raised the standard of revolt in the island, and passed over into Gaul, attended by a large multitude, — 130,000 men and 70,000 women, says Zosimus, the Byzantine historian. This colony, settling in the Armorican peninsula, gave it the name of Brittany, which it has since retained. The rebel forces were soon victorious over the two Emperors who had agreed to share the Roman throne [Gratian and his boy-brother Valentinian who divided the sovereignty of the West between them, while Theodosius ruled the East]. Gratian they slew at Lyons; Valentinian they speedily expelled from Italy. . . . Theodosius adopted the cause of his brother Emperor" and overthrew Maximus (see *ROME: A. D. 379-395*). — J. G. Sheppard, *Fall of Rome*, lect. 5.

ALSO IN: E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 27.

A. D. 407.—The Usurpation of Constantine.—"The Roman soldiers in Britain, seeing that the Empire was falling to pieces under the feeble sway of Honorius, and fearing lest they, too, should soon be ousted from their dominion in the island (part of which was already known as the Saxon Shore) clothed three usurpers successively with the imperial purple [A. D. 407], falling, as far as social position was concerned, lower and lower in their choice each time. The last and least ephemeral of these rulers was a private soldier named Constantine, and chosen for no other reason but his name, which was accounted lucky, as having been already borne by a general who had been carried by a British army to supreme dominion."—T. Hodgkin, *Italy and Her Invaders*, bk. 1, ch. 5.—The usurper Constantine soon led his legions across the channel into Gaul, then ravaged by the Vandals, Sueves, Alans and Burgundians who passed the Rhine in 406. He was welcomed with joy by the unhappy people who found themselves abandoned to the barbarians. Some successes which the new Constantine had, in prudent encounters with detached parties of the German invaders, were greatly magnified, and gave prestige to his cause. He was still more successful, for a time, in buying the precarious friendship of some tribes of the enemy, and made, on the whole, a considerable show of dominion in Gaul during two or three years. The seat of his government was established at Arles, to which city the offices and court of the Roman Prefect of Gaul had retreated from Trèves in 402. With the help of a considerable army of barbarian auxiliaries (a curious mixture of Scots, Moors and Marcomanni) he extended his sovereignty over Spain. He even extorted from the pusillanimous court at Ravenna a recognition of his usurped royalty, and promised assistance to Honorius against the Goths. But the tide of fortune presently turned. The lieutenant of Constantine in Spain, Count Gerontius, became for some reason disaffected and crowned a new usurper, named Maximus. In support of the latter he attacked Constantine and shut him up in Arles. At the same time, the Emperor Honorius, at Ravenna, having made peace with the Goths, sent his general Constantius against the Gallo-British usurper. Constantius, approaching Arles, found it already besieged by Gerontius. The latter was abandoned by his troops, and fled, to be slain soon afterwards.

Arles capitulated to the representative of the great name which Honorius still bore, as titular Emperor of Rome. Constantine was sent to Ravenna, and put to death on the way (A. D. 411).—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 31.

ALSO IN: P. Godwin, *Hist. of France: Ancient Gaul*, bk. 3, ch. 10.

A. D. 410.—Abandoned by the Romans.—"Up to the moment . . . when the Imperial troops quitted Britain, we see them able easily to repel the attacks of its barbarous assailants. When a renewal of their inroads left Britain weak and exhausted at the accession of the Emperor Honorius, the Roman general Stilicho renewed the triumphs which Theodosius had won. The Pict was driven back afresh, the Saxon boats chased by his galleys as far as the Orkneys, and the Saxon Shore probably strengthened with fresh fortresses. But the campaign of Stilicho was the last triumph of the Empire in its western waters. The struggle Rome had waged so long drew in fact to its end; at the opening of the fifth century her resistance suddenly broke down; and the savage mass of barbarism with which she had battled broke in upon the Empire. . . . The strength of the Empire, broken everywhere by military revolts, was nowhere more broken than in Britain, where the two legions which remained quartered at Richborough and York set up more than once their chiefs as Emperors and followed them across the channel in a march upon Rome. The last of these pretenders, Constantine, crossed over to Gaul in 407 with the bulk of the soldiers quartered in Britain, and the province seems to have been left to its own defence; for it was no longer the legionaries, but 'the people of Britain' who, 'taking up arms,' repulsed a new onset of the barbarians. . . . They appealed to Honorius to accept their obedience, and replace the troops. But the legions of the Empire were needed to guard Rome itself: and in 410 a letter of the Emperor bade Britain provide for its own government and its own defence. Few statements are more false than those which picture the British provincials as cowards, or their struggle against the barbarian as a weak and unworthy one. Nowhere, in fact, through the whole circuit of the Roman world, was so long and so desperate a resistance offered to the assailants of the Empire. . . . For some thirty years after the withdrawal of the legions the free province maintained an equal struggle against her foes. Of these she probably counted the Saxons as still the least formidable. . . . It was with this view that Britain turned to what seemed the weakest of her assailants, and strove to find . . . troops whom she could use as mercenaries against the Pict."—J. R. Green, *The Making of England*, int.

ALSO IN: J. M. Lappenberg, *Hist. of Eng. under the Anglo-Saxon Kings*, v. 1, pp. 57-66.

A. D. 446.—The last appeal to Rome.—"Yet once again a supplicating embassy was sent to the Roman general Ætius, during his third consulship, in the year 446. . . . Ætius was unable to help them."—J. M. Lappenberg, *Hist. of Eng. under the Anglo-Saxon Kings*, p. 63.—"The date of the letters of appeal is fixed by the form of their address: 'The groans of the Britons to Ætius for the third time Consul. The savages drive us to the sea and the sea casts us back upon the savages: so arise two kinds of

death, and we are either drowned or slaughtered.' The third Consulship of Aetius fell in A. D. 446, a year memorable in the West as the beginning of a profound calm which preceded the onslaught of Attila. The complaint of Britain has left no trace in the poems which celebrated the year of repose; and our Chronicles are at any rate wrong when they attribute its rejection to the stress of a war with the Huns. It is possible, indeed, that the appeal was never made, and that the whole story represents nothing but a rumour current in the days of Gildas among the British exiles in Armorica."—C. Elton, *Origins of English Hist.*, ch. 12.

A. D. 449-633.—The Anglo-Saxon Conquest. See ENGLAND: A. D. 449-473, 465-47-633.

6th Century.—The unsubdued Britons.—"The Britons were soon restricted to the western parts of the island, where they maintained themselves in several small states, of which those lying to the east yielded more and more to Germanic influence; the others protected by their mountains, preserved for a considerable time a gradually decreasing independence. . . . In the south-west we meet with the powerful territory of Damnonia, the kingdom of Arthur, which bore also the name of West Wales. Damnonia, at a later period, was limited to Dyvnaint, or Devonshire, by the separation of Cernau, or Cornwall. The districts called by the Saxons those of the Sumorsætas, of the Thornsætas (Dorsetshire), and the Wilsætas were lost to the kings of Dyvnaint at an early period; though for centuries afterwards a large British population maintained itself in those parts among the Saxon settlers, as well as among the Defnsætas, long after the Saxon conquest of Dyvnaint, who for a considerable time preserved to the natives of that shire the appellation of the 'Welsh kind.' Cambria (Cymru), the country which at the present day we call Wales, was divided into several states." The chief of these early states was Venedotia (Gwynedd), the king of which was supreme over the other states. Among these latter were Dimetia (Dyfed), or West Wales; Powys, which was east of Gwynedd and Snowdon mountain; Gwent (Monmouthshire) or South-east Wales, the country of the Silures. "The usages and laws of the Cambrians were in all these states essentially the same. An invaluable and venerable monument of them, although of an age in which the Welsh had long been subject to the Anglo-Saxons, and had adopted many of their institutions and customs, are the laws of the king Howel Dda, who reigned in the early part of the 10th century. . . . The partition of Cambria into several small states is not, as has often been supposed, the consequence of a division made by king Rodri Mawr, or Roderic the Great, among his sons. . . . Of Dyfed, during the first centuries after the coming of the Saxons, we know very little; but with regard to Gwynedd, which was in constant warfare with Northumbria and Mercia, our information is less scanty: of Gwent, also, as the bulwark of Dimetia, frequent mention occurs. On the whole we are less in want of a mass of information respecting the Welsh, than of accuracy and precision in that which we possess. . . . An obscurity still more dense than that over Wales involves the district lying to the north of that country, comprised under the name of Cumbria [see CUMBRIA AND STRATH-

CLYDE]."—J. M. Lappenberg, *Hist. of Eng. under the Anglo-Saxon Kings*, v. 1, p. 119-122.

BRITANNIA, The Origin of the name.—

"Many are the speculations which have been started as to the etymology of the word Britannia, and among the later ones have been some of the most extraordinary. Yet surely it is not one of those philological difficulties which we need despair of solving. Few persons will question that the name Britannia is connected with the name Britanni, in the same way as Germania, Gallia, Graecia, &c., with Germani, Galli, Graeci, &c., and it is not unreasonable to assume that Britanni was originally nothing more than the Latinized form of the Welsh word Brython, a name which we find given in the Triads to one of the three tribes, who first colonized Britain. . . . From the Welsh 'brith' and Irish 'brit,' parti-coloured, may have come Brython, which on this hypothesis would signify the painted men. . . . As far then as philology is concerned, there seems to be no objection to our assuming Brython, and therefore also Britanni, to signify the painted men. How this Celtic name first came to denote the inhabitants of these islands is a question, the proper answer to which lies deeper than is generally supposed. . . . The 'Britannic Isles' is the oldest name we find given to these islands in the classical writers. Under this title Polybius (3. 57) refers to them in connection with the tin-trade, and the well-known work on the Kosmos (c. 3) mentions 'The Britannic Isles, Albion and Ierne.' . . . But in truth neither the authorship nor the age of this last-named work has been satisfactorily settled, and therefore we cannot assert that the phrase 'The Britannic Isles' came into use before the second century B. C. The name Britannia first occurs in the works of Caesar and was not improbably invented by him."—E. Guest, *Origines Celticae*, v. 2, ch. 1.—The etymology contended for by Dr. Guest is scouted by Mr. Rhys, on principles of Celtic phonology. He, on the contrary, traces relations between the name Brython and "the Welsh vocables 'brethyn,' cloth, and its congeners," and concludes that it signified "a clothed or cloth-clad people."—J. Rhys, *Celtic Britain*, ch. 6.

BRITISH COLUMBIA: Aboriginal inhabitants. See AMERICAN ABORIGINES: ATHAPASCAN FAMILY.

A. D. 1858-1871.—Establishment of provincial government.—Union with the Dominion of Canada.—"British Columbia, the largest of the Canadian provinces, cannot be said to have had any existence as a colony until 1858. Previous to that year provision had been made by a series of Acts for extending the Civil and Criminal Laws of the Courts of Lower and Upper Canada over territories not within any province, but otherwise the territory was used as a hunting ground of the Hudson's Bay Company. The

disputes and difficulties that arose from the influx of miners owing to the gold discoveries in 1856, resulted in the revocation of the licence of the Hudson's Bay Company, and the passing of the Imperial Act 21 & 22 Vic., c. 99, to provide for the government of British Columbia. . . . Sir James Douglas was appointed Governor and by his commission he was authorised to make laws, institutions and ordinances for the peace, order and good government of British Columbia, by proclamation issued under the public seal of the colony. . . . The Governor continued to legislate by proclamation until 1864, when his proclamations gave way to Ordinances passed by the Governor with the advice and consent of the Legislative Council. . . . Up to this time the Governor of British Columbia was also Governor of the neighbouring island of Vancouver. Vancouver's Island is historically an older colony than British Columbia. Though discovered in 1592 it remained practically unknown to Europeans for two centuries, and it was not until 1849, when the island was granted to the Hudson's Bay Company, that a Governor was appointed. . . . In 1865 the legislature of the island adopted a series of resolutions in favour of union with British Columbia, and by the Imperial Act 29 & 30 Vic. (i), c. 67, the two colonies were united. . . . By an Order in Council dated the 16th day of May, 1871, British Columbia was declared to be a province of the Dominion [see CANADA: A. D. 1867, and 1869-1873] from the 20th of July, 1871."—J. E. C. Munro, *The Constitution of Canada*, ch. 2.

A. D. 409.—Independence asserted.—At the time that the British island practically severed its connection with the expiring Roman Empire (about 409) the Britons of the continent,—of the Armorican province, or modern Brittany,—followed the example. "They expelled the Roman magistrates, who acted under the authority of the usurper Constantine; and a free government was established among a people who had so long been subject to the arbitrary will of a master."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 31.—"From this time, perhaps, we ought to date that isolation of Brittany from the politics of the rest of France which has not entirely disappeared even at the present day."—T. Hodgkin, *Italy and Her Invaders*, bk. 2, ch. 3.—The Armoricans, however, were found fighting by the side of the Romans

and the Goths, against the Huns, on the great day at Chalons. See HUNS: A. D. 451.

A. D. 818-912.—The Breyzad Kingdom.—Subjection to the Norman Dukes.—"Charlemagne's supremacy over the Armoricans may be compared to the dominion exercised by Imperial Russia amongst the Caucasian tribes—periods during which the vassals dare not claim the rights of independence, intercalated amongst the converse periods when the Emperor cannot assert the rights of authority; yet the Frank would not abandon the prerogative of the Caesars, whilst the mutual antipathy between the races inflamed the desire of dominion on the one part, and the determination of resistance on the other. Brittany is divided into Bretagne Bretonnante and Bretagne Gallicante, according to the predominance of the Breyzad and the Romane languages respectively. The latter constituted the march-lands, and here the Counts-marchers were placed by Charlemagne and his successors, Franks mostly by lineage; yet one Breyzad, Nominos, was trusted by Louis-le-débonnaire [A. D. 818] with a delegated authority. Nominos deserved his power; he was one of the new men of the era, literally taken from the plough. . . . The dissensions among the Franks enabled Nominos to increase his authority. Could there be any adversary of the Empire so stupid as not to profit by the battle of Fontenay. . . . Nominos assumed the royal title, vindicated the independence of his antient people, and enabled them, in the time of Rollo, to assert with incorrect grandiloquence, pardonable in political argument, that the Frank had never reigned within the proper Armorican boundaries." Nominos transmitted his crown to his son Herispos; but the latter reigned briefly, succumbing to a conspiracy which raised his nephew, Solomon, to the throne. Solomon was a vigorous warrior, sometimes fighting the Franks, and sometimes struggling with the Normans, who pressed hard upon his small kingdom. He extended his dominions considerably, in Maine, Anjou, and the future Normandy, and his royal title was sanctioned by Charles the Bald. But he, too, was conspired against, blinded and dethroned, dying in prison; and, about 912, the second duke of Normandy established his lordship over the distracted country. "Historical Brittany settled into four great counties, which also absorbed the Carolingian march-lands, Rennes, Nantes, Vannes and Cornouailles, rivalling and jealousy, snarling and warring against each other for the royal or ducal dignity, until the supremacy was permanently established in Alan Fergant's line, the ally, the opponent, the son-in-law of William the Bastard. But the suzerainty or superiority of all Brittany was vested in the Conqueror's and the Plantagenet's lineage, till the forfeiture incurred by King John—an unjust exercise of justice."—Sir F. Palgrave, *Hist. of Normandy and England*, bk. 1, ch. 3.

A. D. 992-1237.—The First Dukes.—"After the death of Solomon . . . all these districts or territories merged in the three dominations of Nantes, Rennes, and Cornouaille. Amongst the Celts concord was impossible. In early times Nomenoe, the Ruler of Cornouaille, had assumed, by Papal authority, the royal style, but the Counts of Rennes acquired the pre-eminence over the other chieftains. Regality vanished. Geoffrey, son of Conan [A. D. 992-1008] . . . must

be distinguished as the first Duke of Brittany. He constituted himself Duke simply by taking the title. This assumption may possibly have been sanctioned by the successor of Saint Peter; and, by degrees, his rank in the civil hierarchy became ultimately recognized. . . . The Counts of Brittany, and the Dukes in like manner, in later times, rendered homage 'en parage' to Normandy in the first instance, and that same homage was afterwards demanded by the crown of France. But the Capetian monarchs refused to acknowledge the 'Duke,' until the time of Peter Mauclerc, son of Robert, Count of Dreux, Earl of Richmond [A. D. 1213-1237].—Sir F. Palgrave, *Hist. of Normandy and Eng.*, v. 3, p. 165.

A. D. 1341-1365.—The long Civil War.—Montfort against Blois.—Almost simultaneously with the beginning of the Hundred Years War of the English kings in France, there broke out a malignant and destructive civil war in Brittany, which French and English took part in, on the opposing sides. "John III. duke of that province, had died without issue, and two rivals disputed his inheritance. The one was Charles de Blois, husband of one of his nieces and nephew of the King of France; the other, Montfort, . . . younger brother of the last duke and . . . disinherited by him. The Court of Peers, devoted to the king, adjudged the duchy to Charles de Blois, his nephew. Montfort immediately made himself master of the strongest places, and rendered homage for Brittany to king Edward [III. of England], whose assistance he implored. This war, in which Charles de Blois was supported by France and Montfort by England, lasted twenty-four years without interruption, and presented, in the midst of heroic actions, a long course of treacheries and atrocious robberies." The war was ended in 1365 by the battle of Auray, in which Charles de Blois was slain, and Bertrand Du Guesclin, the famous Breton warrior, was taken prisoner. This was soon followed by the treaty of Guérande, which established Montfort in the duchy.—E. De Bonnechose, *Hist. of France*, v. 1, bk. 2, ch. 2 and 4.

ALSO IN: Froissart (Johnes), *Chronicles*, bk. 1, ch. 64-227.

A. D. 1491.—Joined by marriage to the French crown.—The family of Montfort, having been established in the duchy of Brittany by the arms of the English, were naturally inclined to English connections; "but the Bretons would seldom permit them to be effectual. Two cardinal feelings guided the conduct of this brave and faithful people; the one an attachment to the French nation and monarchy in opposition to foreign enemies; the other, a zeal for their own privileges, and the family of Montfort, in opposition to the encroachments of the crown. In Francis II., the present duke [at the time of the accession of Charles VIII. of France, A. D. 1483], the male line of that family was about to be extinguished. His daughter Anne was naturally the object of many suitors, among whom were particularly distinguished the duke of Orleans, who seems to have been preferred by herself; the lord of Albret, a member of the Gascon family of Foix, favoured by the Breton nobility, as most likely to preserve the peace and liberties of their country, but whose age rendered him not very acceptable to a youthful princess; and Maximilian, king of the Romans [whose first wife, Mary of Burgundy, died in 1482]. Brittany

was rent by factions and overrun by the armies of the regent of France, who did not lose this opportunity of interfering with its domestic troubles, and of persecuting her private enemy, the duke of Orleans. Anne of Brittany, upon her father's death, finding no other means of escaping the addresses of Albret, was married by proxy to Maximilian. This, however, aggravated the evils of the country, since France was resolved at all events to break off so dangerous a connexion. And as Maximilian himself was unable, or took not sufficient pains to relieve his betrothed wife from her embarrassments, she was ultimately compelled to accept the hand of Charles VIII. He had long been engaged by the treaty of Arras to marry the daughter of Maximilian, and that princess was educated at the French court. But this engagement had not prevented several years of hostilities, and continual intrigues with the towns of Flanders against Maximilian. The double injury which the latter sustained in the marriage of Charles with the heiress of Brittany seemed likely to excite a protracted contest; but the king of France, who had other objects in view, and perhaps was conscious that he had not acted a fair part, soon came to an accommodation, by which he restored Artois and Franche-comté. . . . France was now consolidated into a great kingdom: the feudal system was at an end."—H. Hallam, *The Middle Ages*, ch. 1, pt. 2.—In the contract of marriage between Charles VIII. and Anne of Brittany, "each party surrendered all separate pretensions upon the Duchy, and one stipulation alone was considered requisite to secure the perpetual union of Bretany with France, namely, that in case the queen should survive her consort, she should not remarry unless either with the future king, or, if that were not possible, with the presumptive heir of the crown."—E. Smedley, *Hist. of France*, pt. 1, ch. 18.

ALSO IN: F. P. Guizot, *Popular Hist. of France*, ch. 26.

A. D. 1532.—Final reunion with the crown of France.—"Duprat [chancellor of Francis I. of France], whose administration was . . . shameful, promoted one measure of high utility. Francis I. until then had governed Brittany only in the quality of duke of that province; Duprat counselled him to unite this duchy in an indissoluble manner with the crown, and he prevailed upon the States of Brittany themselves to request this reunion, which alone was capable of preventing the breaking out of civil wars at the death of the king. It was irrevocably voted by the States assembled at Vannes in 1532. The king swore to respect the rights of Brittany, and not to raise any subsidy therein without the consent of the States Provincial."—E. de Bonnechose, *Hist. of France*, bk. 1, ch. 2.

BRUCTERI, The.—"After the Tencteri [on the Rhine] came, in former days, the Bructeri; but the general account now is, that the Cham-

avi and Angrivarii entered their settlements, drove them out and utterly exterminated them with the common help of the neighbouring tribes, either from hatred of their tyranny, or from the attractions of plunder, or from heaven's favourable regard for us. It did not even grudge us the spectacle of the conflict. More than 60,000 fell, not beneath the Roman arms and weapons, but, grander far, before our delighted eyes."—"The original settlements of the Bructeri, from which they were driven by the Chamavi and Angrivarii, seem to have been between the Rhine and the Ems, on either side of the Lippe. Their destruction could hardly have been so complete as Tacitus represents, as they are subsequently mentioned by Claudian."—Tacitus, *Minor works*, trans. by Church and Brodrick: *The Germany*, with geog. notes.—See, also, FRANKS.

BUDGET, The.—"The annual financial statement which the Chancellor of the Exchequer makes in the House of Commons in a Committee of ways and means. In making this statement the minister gives a view of the general financial policy of the government, and at the same time presents an estimate of the probable income and expenditure for the following twelve months, and a statement of what taxes it is intended to reduce or abolish, or what new ones it may be necessary to impose.—To open the budget, to lay before the legislative body the financial estimates and plans of the executive gov't."—*Imp. Dict.*—Mr. Dowell in his *History of Taxation* (v. 1, ch. 5) states that the phrase 'opening the Budget' came into use in England during the reign of George III., and that it bore a reference to the bougette, or little bag, in which the chancellor of the exchequer kept his papers. The French, he adds, adopted the term in the present century, about 1814. The following, however, is in disagreement with Mr. Dowell's explanation: "In the reign of George II. the word was used with conscious allusion to the celebrated pamphlet which ridiculed Sir R. Walpole as a conjuror opening his budget or 'bag of tricks.' Afterwards, it must, for a time, have been current as slang; but, as it supplied a want, it was soon taken up into the ordinary vocabulary."—*Athenæum*, Feb. 14, 1891, p. 213.

BURGUNDIANS: Origin and early history.—"About the middle of the fourth century, the countries, perhaps of Lusace and Thuringia, on either side of the Elbe, were occupied by the vague dominion of the Burgundians—a warlike and numerous people of the Vandal race, whose obscure name insensibly swelled into a powerful kingdom, and has finally settled on a flourishing province. . . . The disputed possession of some salt-pits engaged the Alemanni and the Burgundians in frequent contests. The latter were easily tempted by the secret solicitations and liberal offers of the emperor [Valentinian, A. D. 371]; and their fabulous descent from the Roman soldiers who had formerly been left to garrison the fortresses of Drusus was admitted with mutual credulity, as it was conducive to mutual interest. An army of fourscore thousand Burgundians soon appeared on the banks of the Rhine, and impatiently required the support and subsidies which Valentinian had promised; but they were amused with excuses and delays, till at length, after a fruitless expectation, they were compelled to retire. The arms and fortifications of the Gallic frontier checked the fury of their just resentment."—E. Gibbon, *Decline and Fall*

of the Roman Empire, ch. 25.—“We first hear of them [the Burgundians] as a tribe of Teutonic stock, located between the Oder and the Vistula, on either bank of the river Warta. When the Gepidæ descended southward with the Goths, the Burgundians were compelled to recoil before the advance of the former tribe: one portion of them took refuge in Bornholm, an island of the Baltic; the remainder turned westward, and made an attempt to enter Gaul. They were repulsed by Probus, but permitted to settle near the sources of the Main. Jovian showed them favour, and gave them lands in the Germania Secunda. This was in the latter part of the fourth century. Just at its close, they adopted Christianity, but under an Arian form. Ammianus tells us that they were a most warlike race.”—J. G. Sheppard, *The Fall of Rome*, lect. 8.—“The other Teutonic people had very little regard for the Burgundians; they accused them of having degenerated from the valor of their ancestors, by taking in petty towns (bourgades), whence their name Burgundii sprang; and they looked upon them as being more suitable for the professions of mechanics, smiths, and carpenters, than for a military life.”—J. C. L. de Sismondi, *The French under the Merovingians*, ch. 3.—“A document of A. D. 786, in noticing the high tract of lands between Ellwangen and Anspach, has the following expression,—‘in Waldo, qui vocatur Virgunnia.’ Grimm looks for the derivation of this word in the Mæso-Gothic word ‘fairguni,’ Old High German ‘fergunnd’=woody hill-range. . . . I have little doubt but that this is the name of the tract of land from which the name Burgundi arose; and that it is the one which fixes their locality. If so, between the Burgundian and Suevic Germans, the difference, such as it was, was probably almost wholly political.”—R. G. Latham, *The Germania of Tacitus; Epilegomena*, sect. 12.

A. D. 406-409.—Invasion of Gaul. See GAUL: A. D. 406-409.

A. D. 443-451.—Their Savoyan kingdom.—“In the south-east of Gaul, the Burgundians had, after many wars and some reverses, established themselves (443) with the consent of the Romans in the district then called Sapaudia and now Savoy. Their territory was somewhat more extensive than the province which was the cradle of the present royal house of Italy, since it stretched northwards beyond the lake of Neufchatel and southwards as far as Grenoble. Here the Burgundian immigrants under their king Gundiok, were busy settling themselves in their new possession, cultivating the lands which they had divided by lot, each one receiving half the estate of a Roman host or ‘hospes’ (for under such gentle names the spoliation was veiled), when the news came that the terrible Hun had crossed the Rhine [A. D. 451], and that all hosts and guests in Gaul must unite for its defence.”—T. Hodgkin, *Italy and Her Invaders*, bk. 2, ch. 3.

A. D. 451.—At the battle of Chalons. See HUNS: A. D. 451.

A. D. 500.—Extension of their kingdom.—“Their [the Burgundians] domain, considerably more extensive than when we last viewed it on the eve of Attila’s invasion, now included the later provinces of Burgundy, Franche-Comté and Dauphiné, besides Savoy and the greater

part of Switzerland—in fact the whole of the valleys of the Saone and the Rhone, save that for the last hundred miles of its course the Visigoths barred them from the right bank and from the mouths of the latter river.” At the time now spoken of (A. D. 500), the Burgundian kingdom was divided between two brother-kings, Gundobad, reigning at Lyons and Vienne, and Godegisel at Geneva. Godegisel, the younger, had conspired with Clovis, the king of the Franks, against Gundobad, and in this year 500 the two confederates defeated the latter, at Dijon, driving him from the most part of his kingdom. But Gundobad presently recovered his footing, besieged and captured his treacherous brother at Vienne and promptly put him to death—thereby reuniting the kingdom.—T. Hodgkin, *Italy and Her Invaders*, bk. 4, ch. 9.

A. D. 534.—Final conquest by the Franks.—“I am impatient to pursue the final ruin of that kingdom [the Burgundian] which was accomplished under the reign of Sigismund, the son of Gundobald [or Gundobad]. The Catholic Sigismund has acquired the honours of a saint and martyr; but the hands of the royal saint were stained with the blood of his innocent son. . . . It was his humble prayer that Heaven would inflict in this world the punishment of his sins. His prayer was heard; the avengers were at hand; and the provinces of Burgundy were overwhelmed by an army of victorious Franks. After the event of an unsuccessful battle, Sigismund . . . with his wife and two children, was transported to Orleans and buried alive in a deep well by the stern command of the sons of Clovis, whose cruelty might derive some excuse from the maxims and examples of their barbarous age. . . . The rebellious Burgundians, for they attempted to break their chains, were still permitted to enjoy their national laws under the obligation of tribute and military service; and the Merovingian princes peaceably reigned over a kingdom whose glory and greatness had been first overthrown by the arms of Clovis.”—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 38.

ALSO IN: W. C. Perry, *The Franks*, ch. 3.

BURGUNDY: A. D. 534-752.—The Merovingian kingdom.—After the overthrow of the Burgundian monarchy by the sons of Clovis, the territory of the Burgundians, with part of the neighboring Frank territory added to it, became, under the name of Burgundia or Burgundy, one of the three Frank kingdoms (Austrasia and Neustria being the other two), into which the Merovingian princes divided their dominion. It occupied “the east of the country, between the Loire and the Alps, from Provence on the south to the hill-ranges of the Vosges on the north.”—P. Godwin, *Hist. of France: Ancient Gaul*, ch. 13.

A. D. 843-933.—Divisions of the early kingdom.—The later kingdoms of the south and the French dukedom of the northwest.—By the treaty of Verdun, A. D. 843, which formally divided the empire of Charlemagne between his three grandsons, a part of Burgundy was taken to form, with Italy and Lorraine, the kingdom of the Emperor Lothar, or Lothaire. In the further dissolutions which followed, a kingdom of Burgundy or Provence was founded in 877 by one Boson, a prince who had married Irmingard, daughter of the Emperor Louis II., son of

Lothaire. It "included Provence, Dauphiné, the southern part of Savoy, and the country between the Saône and the Jura," and is sometimes called the kingdom of Cis-Jurane Burgundy. "The kingdom of Trans-Jurane Burgundy, . . . founded by Rudolf in A. D. 888, recognized in the same year by the Emperor Arnulf, included the northern part of Savoy, and all Switzerland between the Reuss and the Jura."—J. Bryce, *The Holy Roman Empire*, ch. 6, and app., note A.—"The kingdoms of Provence and Transjuran Burgundy were united, in 933, by Raoul II., King of Transjuran Burgundy, and formed the kingdom of Arles, governed, from 937 to 993, by Conrad le Pacifique."—F. Guizot, *Hist. of Civilization*, lect. 24.—Sir F. Palgrave, *Hist. of Normandy and England*, bk. 1, ch. 4.—"Several of the greater and more commercial towns of France, such as Lyons, Vienne, Geneva, Besançon, Avignon, Arles, Marseille and Grenoble were situated within the bounds of his [Conrad the Pacific's] states."—J. C. L. de Sismondi, *France under the Feudal System*, ch. 2.—"Of the older Burgundian kingdom, the northwestern part, forming the land best known as the Duchy of Burgundy, was, in the divisions of the ninth century, a fief of Karolingia or the Western Kingdom. This is the Burgundy which has Dijon for its capital, and which was held by more than one dynasty of dukes as vassals of the Western kings, first at Laon, and then at Paris. This Burgundy, which, as the name of France came to bear its modern sense may be distinguished as the French Duchy, must be carefully distinguished from the Royal Burgundy" of the Cis-Jurane and Trans-Jurane kingdoms mentioned above.—E. A. Freeman, *Historical Geog. of Europe*, ch. 6, sect. 1.

A. D. 888-1032.—The French Dukedom.—The founding of the First Capetian House.—Of the earliest princes of this northwestern fragment of the old kingdom of Burgundy little seems to have been discoverable. The fief and its title do not seem to have become hereditary until they fell into the grasping hands of the Capetian family, which happened just at the time when the aspiring counts of Paris were rising to royal rank. In the early years of the tenth century the reigning count or duke was Richard-le-Justicier, whose distinguishing princely virtue is recorded in his name. This Richard-le-Justicier was a brother of that Boso, or Boson, son-in-law of the Emperor Louis II., who took advantage of the confusions of the time to fashion for himself a kingdom of Burgundy in the South (Cis-Jurane Burgundy, or Provence,—see above). Richard's son Raoul, or Rudolph, married Emma, the daughter of Robert, Count of Paris and Duke of France, who was soon afterwards chosen king, by the nobles who tired of Carolingian misrule. King Robert's reign was short; he fell in battle with the Carolingians, at Soissons, the next year (A. D. 923). His son Hugh, called Le Grand, or The Great, found it more to his taste to be king-maker than to be king. He declined the proffered crown, and brought about the coronation of his brother-in-law, the Burgundian Rudolph, who reigned for eleven years. When he died, in 934, Hugh the Great still held the crown at his disposal and still refused to wear it himself. It now pleased this king-maker to set a Carolingian prince on the throne, in the person of Louis d'Outre Mer, a young son of Charles

the Simple, who had been reared in England by his English mother. But, if Duke Hugh cared nothing for the name, he cared much for the substance, of power. He grasped dominion wherever it fell within his reach, and the Burgundian duchy was among the states which he clutched. King Rudolph left no son to inherit either his dukedom or his kingdom. He had a brother, Hugh, who claimed the Duchy; but the greater Hugh was too strong for him and secured, with the authority of the young king, his protégé, the title of Duke of Burgundy and the larger part of the domain. "In the Duchy of France or the County of Paris Hugh-le-Grand had nothing beyond the regalities to desire, and both in Burgundy and the Duchy he now became an irremovable Viceroy. But the privileges so obtained by Hugh-le-Grand produced very important political results, both present and future. Hugh assumed even a loftier bearing than before; Burgundy was annexed to the Duchy of France, and passed with the Duchy; and the grant thereof made by Hugh Capet to his son [brother?] Henri-le-Grand, severing the same from the crown, created the premier Duchy of Christendom, the most splendid appanage which a prince of the third race [the Capetians] could enjoy—the rival of the throne."—Sir F. Palgrave, *Hist. of Normandy and Eng.*, bk. 1, pt. 2, ch. 1-4.—Hugh-le-Grand died in 956. "His power, which, more than his talents or exploits, had given him the name of Great, was divided between his children, who were yet very young. . . . There is some doubt as to their number and the order of their birth. It appears, however, that Otho was the eldest of his three sons. He had given him his part of the duchy of Burgundy, and had made him marry the daughter and heir of Gislebert, duke of another part of Burgundy, to which Otho succeeded the same year. The latter dying in 963 or 965, the duchy of Burgundy passed to his third brother, sometimes named Henry, sometimes Eudes. Hugues [Hugh], surnamed Capet, who succeeded to the county of Paris and the duchy of France, was but the second son."—J. C. L. de Sismondi, *The French under the Carolingians*, ch. 15.—In 987 Hugh Capet became king of France and founded the lasting dynasty which bears his name. His elder brother Henry remained Duke of Burgundy until his death, in 1002, when his royal nephew, Robert, son and successor of Hugh, annexed the Duchy to the Crown. It so remained until 1032. Then King Henry I., son of Robert, granted it as an appanage to his brother Robert, who founded the first Capetian House of Burgundy.—E. de Bonnechose, *Hist. of France*, bk. 1, ch. 2.

A. D. 1032.—The last kingdom.—Its union with Germany, and its dissolution.—The last kingdom which bore the name of Burgundy—though more often called the kingdom of Arles—formed, as stated above, by the union of the short-lived kingdoms of Provence and Transjuran Burgundy, became in 1032 nominally united to the dominions of the Emperor-King of Germany. Its last independent king was Rudolf III., son of Conrad the Pacific, who was uncle to the Emperor Henry II. Being childless, he named Henry his heir. The latter, however, died first, in 1024, and Rudolf attempted to cancel his bequest, claiming that it was made to Henry personally, not as King of the Germans. When, however, the Burgundian king died, in

1032, the then reigning Emperor, Conrad the Salic, or the Franconian, formally proclaimed the union of Burgundy with Germany. "But since Burgundy was ruled almost exclusively by the great nobility, the sovereignty of the German Emperors there was never much more than nominal. Besides, the country, from the Bernese Oberland to the Mediterranean, except that part of Allemannia which is now German Switzerland, was inhabited by a Romance people, too distinct in language, customs and laws from the German empire ever really to form a part of it. . . . Yet Switzerland was thenceforth connected forever with the development of Germany, and for 500 years remained a part of the empire."—C. T. Lewis, *Hist. of Germany*, bk. 2, ch. 6-7.—"The weakness of Rodolph-le-Fainéant [Rodolph III., who made Henry II. of Germany his heir, as stated above], gave the great lords of the kingdom of Arles an opportunity of consolidating their independence. Among these one begins to remark Berchtold and his son, Humbert-aux-Blanches-Mains (the White-handed), Counts of Maurienne, and founders of the House of Savoy; Otto William, who it is pretended was the son of Adalbert, King of Italy, and heir by right of his mother to the county of Burgundy, was the founder of the sovereign house of Franche-Comté [County Palatine of Burgundy]; Guigue, Count of Albon, founder of the sovereign house of the dauphins of Viennois; and William, who it is pretended was the issue of a brother of Rodolph of Burgundy, King of France, and who was sovereign count of Provence. These four lords had, throughout the reign of Rodolph, much more power than he in the kingdom of Arles; and when at his death his crown was united to that of the Empire, the feudatories who had grown great at his expense became almost absolutely independent. On the other hand, their vassals began on their side to acquire importance under them; and in Provence can be traced at this period the succession of the counts of Forcalquier and of Venaissin, of the princes of Orange, of the viscounts of Marseille, of the barons of Baux, of Sault, of Grignau, and of Castellane. We can still follow the formation of a great number of other feudatory or rather sovereign houses. Thus the counts of Toulouse, those of Rouergue, the dukes of Gascony, the counts of Foix, of Béarn, and of Carcassone, date at least from this epoch; but their existence is announced to us only by their diplomas and their wills."—J. C. L. de Sismondi, *France under the Feudal System*, ch. 2.—See, also, PROVENCE: A. D. 943-1092, and FRANCHE-COMTÉ.

A. D. 1127-1378.—The Franco-Germanic contest for the valley of the Rhone.—End of the kingdom of Arles.—"As soon as the Capetian monarchs had acquired enough strength at home to be able to look with safety abroad, they began to make aggressions on the tempting and wealthy dependencies of the distant emperors. But the Rhone valley was too important in itself, and of too great strategical value as securing an easy road to Italy, to make it possible for the emperors to acquiesce easily in its loss. Hence a long conflict, which soon became a national conflict of French and Germans, to maintain the Imperial position in the 'middle kingdom' of the Rhone valley. M. Fournier's book [*Le Royaume d'Arles et de Vienne* (1138-1178)]; par Paul Fournier] aims at giving an

adequate account of this struggle. . . . From the times of the mighty Barbarossa to the times of the pretentious and cunning Charles of Luxemburg [see GERMANY: A. D. 1138-1268, and A. D. 1347-1493], nearly every emperor sought by constant acts of sovereignty to uphold his precarious powers in the Arelate. Unable to effect much with their own resources, the emperors exhausted their ingenuity in finding allies and inventing brilliant schemes for reviving the Arelate, which invariably came to nothing. Barbarossa won the hand of the heiress of the county of Burgundy, and sought to put in place of the local dynasties princes on whom he could rely, like Berthold of Züringen, whose father had received in 1127 from Conrad III. the high-sounding but meaningless title of Rector of the Burgundies. But his quarrel with the church soon set the clergy against Frederick, and, led by the Carthusian and Cistercian orders, the Churchmen of the Arelate began to look upon the orthodox king of the French as their truest protector from a schismatic emperor. But the French kings of the period saw in the power of Henry of Anjou [Henry II., of England—see ENGLAND: A. D. 1154-1189] a more real and pressing danger than the Empire of the Hohenstaufen. The result was an alliance between Philip Augustus and his successors and the Swabian emperors, which gave Frederick and his successors a new term in which they could strive to win back a real hold over Burgundy. Frederick II. never lost sight of this object. His investiture of the great feudal lord William of Baux with the kingdom of Arles in 1215; his long struggle with the wealthy merchant city of Marseilles; his alliance with Raymond of Toulouse and the heretical elements in Provence against the Pope and the French; his efforts to lead an army against Innocent IV. at Lyons, were among the chief phases of his constant efforts to make the Imperial influence really felt in the valley of the Rhone. But he had so little success that the French crusaders against the Albigenses waged open war within its limits, and destroyed the heretic city of Avignon [see ALBIGENSES: A. D. 1217-1229], while Innocent in his exile could find no surer protection against the emperor than in the Imperial city of Lyons. After Frederick's death the policy of St. Louis of France was a complete triumph. His brother, Charles of Anjou, established himself in Provence, though in later times the Angevin lords of Provence and Naples became so strong that their local interests made them enemies rather than friends of the extension of French power on their borders. The subsequent efforts of the emperors were the merest shams and unrealities. Rudolf of Hapsburg acquiesced without a murmur in the progress of Philip the Fair, who made himself master of Lyons, and secured the Free County of Burgundy for his son [see FRANCHE-COMTÉ]. . . . The residence of the Popes at Avignon was a further help to the French advance. . . . Weak as were the early Valois kings, they were strong enough to push still further the advantage won by their greater predecessors. The rivalry of the leading states of the Rhone valley, Savoy and Dauphiny, facilitated their task. Philip VI. aspired to take Vienne as Philip IV. had obtained Lyons. The Dauphin, Humbert II., struggled in vain against him, and at last accepted the inevitable by

ceding to the French king the succession to all his rights in Dauphiny, henceforth to become the appanage of the eldest sons of the French kings. At last, Charles of Luxemburg, in 1378, gave the French aggressions a legal basis by conferring the Vicariat of Arles on the Dauphin Charles, subsequently the mad Charles VI. of France. From this grant Savoy only was excepted. Henceforth the power of France in the Rhone valley became so great that it soon became the fashion to despise and ignore the theoretical claims of the Empire."—*The Athenæum*, Oct. 3, 1891 (reviewing "*Le Royaume d'Arles et de Vienne*," par Paul Fournier).

A. D. 1207-1401.—Advance of the dominions of the house of Savoy beyond Lake Geneva. See SAVOY: 11TH-15TH CENTURIES.

A. D. 1364.—The French Dukedom.—The Planting of the Burgundian branch of the house of Valois.—The last Duke of Burgundy of the Capetian house which descended from Robert, son of King Robert, died in December, 1361. He was called Philip de Rouvre, because the Château de Rouvre, near Dijon, had been his birth-place, and his residence. He was still in his youth when he died, although he had borne the ducal title for twelve years. It fell to him at the age of four, when his father died. From his mother and his grandmother he inherited, additionally, the county of Burgundy (Franche Comté) and the counties of Boulogne, Auvergne and Artois. His tender years had not prevented the marriage of the young duke to Margaret, daughter and heiress of the Count of Flanders. John II. King of France, whose mother was a Burgundian princess, claimed to be the nearest relative of the young duke, when the latter died, in 1361, and, although his claim was disputed by the King of Navarre, Charles the Bad, King John took possession of the dukedom. He took it by right of succession, and not as a fief which had lapsed, the original grant of King Robert having contained no reversionary provision. Franche Comté, or the county of Burgundy, together with Artois, remained to the young widow, Margaret of Flanders, while the counties of Boulogne and Auvergne passed to John of Boulogne, Count de Montfort. A great opportunity for strengthening the crown of France, by annexing to it the powerful Burgundian dukedom, was now offered to King John; but he lacked the wisdom to improve it. He preferred to grant it away as a splendid appanage for his favorite son—the fourth—the spirited lad Philip, called the Fearless, who had stood by his father's side in the disastrous battle of Poitiers, and who had shared his captivity in England. By a deed which took effect on King John's death, in 1364, the great duchy of Burgundy was conferred on Philip the Fearless and on his heirs. Soon afterwards, Philip's marriage with the young widow of his predecessor, Philip de Rouvre, was brought about, which restored to their former union with the dukedom the Burgundian County (Franche Comté) and the county of Artois, while it gave to the new duke prospectively the rich county of Flanders, to which Margaret was the heiress. Thus was raised up anew the most formidable rival which the royal power in France had ever to contend with, and the magnitude of the blunder of King John was revealed before half a century had passed.—*Froissart (Johnes) Chronicles*, bk. 1, ch. 216.

A. D. 1467.—Charles the Bold.—His position, between Germany and France.—His antagonism to Louis XI.—The "Middle Kingdom" of his aims.—Charles, known commonly in history as Charles the Bold, became Duke of Burgundy in 1467, succeeding his father Philip, misnamed "The Good." "His position was a very peculiar one; it requires a successful shaking-off of modern notions fully to take in what it was. Charles held the rank of one of the first princes in Europe without being a King, and without possessing an inch of ground for which he did not owe service to some superior lord. And, more than this, he did not owe service to one lord only. The phrase of 'Great Powers' had not been invented in the 15th century; but there can be no doubt that, if it had been, the Duke of Burgundy would have ranked among the foremost of them. He was, in actual strength, the equal of his royal neighbour to the west, and far more than the equal of his Imperial neighbour to the east. Yet for every inch of his territories he owed a vassal's duty to one or other of them. Placed on the borders of France and the Empire, some of his territories were held of the Empire and some of the French Crown. Charles, Duke of Burgundy, Count of Flanders and Artois, was a vassal of France; but Charles, Duke of Brabant, Count of Burgundy, Holland, and a dozen other duchies and counties, held his dominions as a vassal of Cæsar. His dominions were large in positive extent, and they were valuable out of all proportion to their extent. No other prince in Europe was the direct sovereign of so many rich and flourishing cities, rendered still more rich and flourishing through the long and, in the main, peaceful administration of his father. The cities of the Netherlands were incomparably greater and more prosperous than those of France or England; and, though they enjoyed large municipal privileges, they were not, like those of Germany, independent commonwealths, acknowledging only an external suzerain in their nominal lord. Other parts of his dominions, the Duchy of Burgundy especially, were as rich in men as Flanders was rich in money. So far the Duke of Burgundy had some great advantages over every other prince of his time. But, on the other hand, his dominions were further removed than those of any prince in Europe from forming a compact whole. He was not King of one kingdom, but Duke, Count, and Lord of innumerable duchies, counties, and lordships, acquired by different means, held by different titles and of different overlords, speaking different languages, subject to different laws, transmitted according to different rules of succession. . . . They lay in two large masses, the two Burgundies forming one and the Low Countries forming the other, so that their common master could not go from one capital to another

ABOUT 1475,
WITH THE DATES OF THEIR ACQUISITION
BY THE DUKES OF THE HOUSE OF VALOIS.

The division between France and the Empire is shown thus

without passing through a foreign territory. And, even within these two great masses, there were portions of territory intersecting the ducal dominions which there was no hope of annexing by fair means. . . . The career of Charles the Bold . . . divides itself into a French and a German portion. In both alike he is exposed to the restless rivalry of Lewis of France; but in the one period that rivalry is carried on openly within the French territory, while in the second period the crafty king finds the means to deal far more effectual blows through the agency of Teutonic hands. . . . As a French prince, he joined with other French princes to put limits on the power of the Crown, and to divide the kingdom into great feudal holdings, as nearly independent as might be of the common overlord. As a French prince, he played his part in the War of the Public Weal [see FRANCE: A. D. 1461-1468], and insisted, as a main object of his policy, on the establishment of the King's brother as an all but independent Duke of Normandy. The object of Lewis was to make France a compact monarchy; the object of Charles and his fellows was to keep France as nearly as might be in the same state as Germany. But, when the other French princes had been gradually conquered, won over, or got rid of in some way or other by the crafty policy of Lewis, Charles remained no longer the chief of a coalition of French princes, but the personal rival, the deadly enemy, of the French King. . . . Chronologically and geographically alike, Charles and his Duchy form the great barrier, or the great connecting link, whichever we choose to call it, between the main divisions of European history and European geography. The Dukes of Burgundy of the House of Valois form a sort of bridge between the later Middle Age and the period of the Renaissance and the Reformation. They connect those two periods by forming the kernel of the vast dominion of that Austrian House which became their heir, and which, mainly by virtue of that heirship fills such a space in the history of the 16th and 17th centuries. But the dominions of the Burgundian Dukes hold a still higher historical position. They may be said to bind together the whole of European history for the last thousand years. From the 9th century to the 19th, the politics of Europe have largely gathered round the rivalry between the Eastern and the Western Kingdoms—in modern language, between Germany and France. From the 9th century to the 19th, a succession of efforts have been made to establish, in one shape or another, a middle state between the two. Over and over again during that long period have men striven to make the whole or some portion of the frontier lands stretching from the mouth of the Rhine to the mouth of the Rhone into an independent barrier state. . . . That object was never more distinctly aimed at, and it never seemed nearer to its accomplishment, than when Charles the Bold actually reigned from the Zuyder Zee to the Lake of Neufchâtel, and was not without hopes of extending his frontier to the Gulf of Lyons. . . . Holding, as he did, parts of old Lotharingia and parts of old Burgundy, there can be no doubt that he aimed at the re-establishment of a great Middle Kingdom, which should take in all that had ever been Burgundian or Lotharingian ground. He aimed, in short, as others have aimed before and since, at

the formation of a state which should hold a central position between France, Germany and Italy—a state which should discharge, with infinitely greater strength, all the duties which our own age has endeavoured to throw on Switzerland, Belgium and Savoy. . . . Undoubtedly it would have been for the permanent interest of Europe if he had succeeded in his attempt."—E. A. Freeman, *Charles the Bold (Historical Essays, 1st series, no. 11)*.

A. D. 1467-1468.—The war of Charles the Bold with the Liegeois and his troubles with Louis XI.—"Soon after the pacification of the troubles of France [see FRANCE: A. D. 1461-1468], the Duke of Burgundy began a war against the Liegeois, which lasted for several years; and whenever the king of France [Louis XI.] had a mind to interrupt him, he attempted some new action against the Bretons, and, in the meantime, supported the Liegeois underhand; upon which the Duke of Burgundy turned against him to succour his allies, or else they came to some treaty or truce among themselves. . . . During these wars, and ever since, secret and fresh intrigues were carried on by the princes. The king was so exceedingly exasperated against the Dukes of Bretagne and Burgundy that it was wonderful. . . . The king of France's aim, in the meantime, was chiefly to carry his design against the province of Bretagne, and he looked upon it as a more feasible attempt, and likelier to give him less resistance than the house of Burgundy. Besides, the Bretons were the people who protected and entertained all his malcontents; as his brother, and others, whose interest and intelligence were great in his kingdom; for this cause he endeavoured very earnestly with Charles, Duke of Burgundy, by several advantageous offers and proposals, to prevail with him to desert them, promising that upon those terms he also would abandon the Liegeois, and give no further protection to his malcontents. The Duke of Burgundy would by no means consent to it, but again made preparations for war against the Liegeois, who had broken the peace." This was in October, 1467. The Duke (Charles the Bold) attacked St. Tron, which was held by a garrison of 3,000 of the men of Liège. The Liegeois, 30,000 strong, came to the relief of the besieged town, and were routed, leaving 6,000 slain on the field. St. Tron and Tongres were both surrendered, and Liège, itself, after considerable strife among its citizens, opened its gates to the Duke, who entered in triumph (Nov. 17, 1467) and hanged half-a-dozen for his moderate satisfaction. In the course of the next summer the French king opened war afresh upon the Duke of Bretagne and forced him into a treaty, before the Duke of Burgundy, his ally, could take the field. The king, then being extremely anxious to pacify the Duke of Burgundy, took the extraordinary step of visiting the latter at Peronne, without any guard, trusting himself wholly to the honor of his enemy. But it happened unfortunately, during the king's stay at Peronne, that a ferocious revolt occurred at Liège, which was traced beyond denial to the intrigues of two agents whom king Louis had sent thither not long before, for mischief-making purposes. The Duke, in his wrath, was not easily restrained from doing some violence to the king; but the royal trickster escaped from his grave predicament by giving up the unhappy

Liegeois to the vengeance of Duke Charles and personally assisting the latter to inflict it. "After the conclusion of the peace [dictated by Charles at Peronne and signed submissively by Louis] the King and the Duke of Burgundy set out the next morning [Oct. 15, 1468] for Cambrai, and from thence towards the country of Liège: it was the beginning of winter and the weather was very bad. The king had with him only his Scotch guards and a small body of his standing forces; but he ordered 300 of his men-at-arms to join him." Liège was invested, and, notwithstanding its walls had been thrown down the previous year, it made a stubborn defense. During a siege of a fortnight, several desperate sallies were made, by the last one of which both the Duke and the King were brought into great personal peril. Exhausted by this final effort, the Liegeois were unprepared to repel a grand assault which the besieging forces made upon the town the next morning—Sunday, Oct. 30. Liège was taken that day almost without resistance, the miserable inhabitants flying across the Maes into the forest of Ardennes, abandoning their homes to pillage. The Duke of Burgundy now permitted King Louis to return home, while he remained a few days longer in desolate Liège, which his fierce hatred had doomed. "Before the Duke left the city, a great number of those poor creatures who had hid themselves in the houses when the town was taken, and were afterwards made prisoners, were drowned. He also resolved to burn the city, which had always been very populous; and orders were given for firing it in three different places, and 3,000 or 4,000 foot of the country of Limbourg (who were their neighbours, and used the same habit and language), were commanded to effect this desolation, but to secure the churches. . . . All things being thus ordered, the Duke began his march into the country of Franchemont: he was no sooner out of town, but immediately we saw a great number of houses on fire beyond the river; the duke lay that night four leagues from the city, yet we could hear the noise as distinctly as if we had been upon the spot; but whether it was the wind which lay that way, or our quartering upon the river, that was the cause of it, I know not. The next day the Duke marched on, and those who were left in the town continued the conflagration according to his orders; but all the churches (except some few) were preserved, and above 300 houses belonging to the priests and officers of the churches, which was the reason it was so soon reinhabited, for many flocked thither to live with the priests."—Philip de Commines, *Memoirs*, bk. 2.

A. D. 1476-1477.—Charles the Bold and the Swiss.—His defeats and his death.—The effects of his fall.—"Sovereign of the duchy of Burgundy, of the Free County, of Hainaut, of Flanders, of Holland, and of Gueldre, Charles wished, by joining to it Lorraine, a portion of Switzerland, and the inheritance of old King René, Count of Provence, to recompose the ancient kingdom of Lorraine, such as it had existed under the Carolingian dynasty; and flattered himself that by offering his daughter to Maximilian, son of Frederick III., he would obtain the title of king. Deceived in his hopes, the Duke

of Burgundy tried means to take away Lorraine from the young René. That province was necessary to him, in order to join his northern states with those in the south. The conquest was rapid, and Nancy opened its gates to Charles the Rash; but it was reserved for a small people, already celebrated for their heroic valour and by their love of liberty, to beat this powerful man. Irritated against the Swiss, who had braved him, Charles crossed over the Jura, besieged the little town of Granson, and, in despite of a capitulation, caused all the defenders to be hanged or drowned. At this news the eight cantons which then composed the Helvetic republic arose, and under the very walls of the town which had been the theatre of his cruelty they attacked the Duke and dispersed his troops [March 3, 1476]. Some months later [June 21], supported by young René of Lorraine, despoiled of his inheritance, they exterminated a second Burgundian army before Morat. Charles, vanquished, reassembled a third army, and marched in the midst of winter against Nancy, which had fallen into the hands of the Swiss and Lorrainers. It was there that he perished [Jan. 5, 1477] betrayed by his mercenary soldiers, and overpowered by numbers."—E. de Bonnechose, *Hist. of France*, v. 1, bk. 3, ch. 2.—"And what was the cause of this war? A miserable cart-load of sheep skins that the Count of Romont had taken from the Swiss, in his passage through his estates. If God Almighty had not forsaken the Duke of Burgundy it is scarce conceivable he would have exposed himself to such great dangers upon so small and trivial an occasion; especially considering the offers the Swiss had made him, and that his conquest of such enemies would yield him neither profit nor honour; for at that time the Swiss were not in such esteem as now, and no people in the world could be poorer." At Granson, "the poor Swiss were mightily enriched by the plunder of his [the Duke of Burgundy's] camp. At first they did not understand the value of the treasure they were masters of, especially the common soldiers. One of the richest and most magnificent tents in the world was cut into pieces. There were some of them that sold quantities of dishes and plates of silver for about two sous of our money, supposing they had been pewter. His great diamond, . . . with a large pearl fixed to it, was taken up by a Swiss, put up again into the case, thrown under a wagon, taken up again by the same soldier, and after all offered to a priest for a florin, who bought it, and sent it to the magistrates of that country, who returned him three francs as a sufficient reward. [This was long supposed to be the famous Sancy diamond; but Mr. Streeter thinks that the tradition which so connects it is totally disproved.] They also took three very rich jewels called the Three Brothers, another large ruby called La Hatte, and another called the Ball of Flanders, which were the fairest and richest in the world; besides a prodigious quantity of other goods." In his last battle, near Nancy, the Duke had less than 4,000 men, "and of that number not above 1,200 were in a condition to fight." He encountered on this occasion a powerful army of Swiss and Germans, which the Duke of Lorraine had been able to collect, with the help of the king of France and others. It was against the advice of all his counsellors that the headstrong, half-mad Duke Charles dashed his little army upon this

greater one, and he paid the penalty. It was broken at the first shock, and the Duke was killed in the confused rout without being known. His body, stripped naked by the pillagers and mangled by wolves or dogs, was found frozen fast in a ditch. . . . I cannot easily determine towards whom God Almighty showed his anger most, whether towards him who died suddenly, without pain or sickness in the field of battle, or towards his subjects, who never enjoyed peace after his death, but were continually involved in wars against which they were not able to maintain themselves, upon account of the civil dissensions and cruel animosities that arose among them. . . . As I had seen these princes puissant, rich and honourable, so it fared with their subjects: for I think I have seen and known the greatest part of Europe, yet I never knew any province or country, though of a larger extent, so abounding in money, so extravagantly fine in their furniture, so sumptuous in their buildings, so profuse in their expenses, so luxurious in their feasts and entertainments, and so prodigal in all respects, as the subjects of these princes in my time; and if any think I have exaggerated, others who lived in my time will be of opinion that I have rather said too little. . . . In short, I have seen this family in all respects the most flourishing and celebrated of any in Christendom; and then, in a short space of time, it was quite ruined and turned upside down, and left the most desolate and miserable of any house in Europe, as regards both prince and subjects."—Philip de Commines, *Memoirs*, bk. 5, ch. 1-9.—"The popular conception of this war [between Charles the Bold and the Swiss] is simply that Charles, a powerful and encroaching prince, was overthrown in three great battles by the petty commonwealths which he had expected easily to attach to his dominion. Grandson and Morat are placed side by side with Morgarten and Sempach. Such a view as this implies complete ignorance of the history; it implies ignorance of the fact that it was the Swiss who made war upon Charles, and not Charles who made war upon the Swiss; it implies ignorance of the fact that Charles's army never set foot on proper Swiss territory at all, that Grandson and Morat were at the beginning of the war no part of the possessions of the Confederation. . . . The mere political accident that the country which formed the chief seat of war now forms part of the Swiss Confederation has been with many people enough to determine their estimate of the quarrel. Grandson and Morat are in Switzerland; Burgundian troops appeared and were defeated at Grandson and Morat; therefore Charles must have been an invader of Switzerland, and the warfare on the Swiss side must have been a warfare of purely defensive heroism. The simple fact that it was only through the result of the Burgundian war that Grandson and Morat ever became Swiss territory at once disposes of this line of argument. . . . The plain facts of the case are that the Burgundian war was a war declared by Switzerland against Burgundy . . . and that in the campaigns of Grandson and Morat the Duke of Burgundy was simply repelling and avenging Swiss invasions of his own territory and the territory of his allies."—E. A. Freeman, *Historical Essays*, v. 1, no. 11.

Also in: J. F. Kirk, *Hist. of Charles the Bold*, bk. 5.—L. S. Costello, *Memoirs of Mary of Burgundy*, ch. 14-27.

A. D. 1477.—Permanently restored to the French crown.—Louis XI. of France, who had been eagerly watching while Charles the Bold shattered his armies and exhausted his strength in Switzerland, received early news of the death of the self-willed Duke. While the panic and confusion which it caused still prevailed, the king lost no time in taking possession of the duchy of Burgundy, as an appanage which had reverted to the crown, through default of male heirs. The legality of his claim has been much in dispute. "Charles left an only daughter, undoubted heiress of Flanders and Artois, as well as of his dominions out of France, but whose right of succession to the duchy of Burgundy was more questionable. Originally the great fiefs of the crown descended to females, and this was the case with respect to the two first mentioned. But John had granted Burgundy to his son Philip by way of appanage; and it was contended that the appanages reverted to the crown in default of male heirs. In the form of Philip's investiture, the duchy was granted to him and his lawful heirs, without designation of sex. The construction, therefore, must be left to the established course of law. This, however, was by no means acknowledged by Mary, Charles's daughter, who maintained both that no general law restricted appanages to male heirs, and that Burgundy had always been considered as a feminine fief, John himself having possessed it, not by reversion as king (for descendants of the first dukes were then living), but by inheritance derived through females. Such was this question of succession between Louis XI. and Mary of Burgundy, upon the merits of whose pretensions I will not pretend altogether to decide, but shall only observe that, if Charles had conceived his daughter to be excluded from this part of his inheritance, he would probably, at Conflans or Peronne, where he treated upon the vantage ground, have attempted at least to obtain a renunciation of Louis's claim. There was one obvious mode of preventing all further contest, and of aggrandizing the French monarchy far more than by the reunion of Burgundy. This was the marriage of Mary with the dauphin, which was ardently wished in France." The dauphin was a child of seven years; Mary of Burgundy a masculine-minded young woman of twenty. Probably Louis despaired of reconciling the latter to such a marriage. At all events, while he talked of it occasionally, he proceeded actively in despoiling the young duchess, seizing Artois and Franche Comté, and laying hands upon the frontier towns which were exposed to his arms. He embittered her natural enmity to him by various acts of meanness and treachery. "Thus the French alliance becoming odious in Flanders, this princess married Maximilian of Austria, son of the Emperor Frederic—a connexion which Louis strove to prevent, though it was impossible then to foresee that it was ordained to retard the growth and to bias the fate of Europe during three hundred years. This war lasted till after the death of Mary, who left one son Philip and one daughter Margaret."—H. Hallam, *The Middle Ages*, ch. 1, pt. 2.—"The king [Louis XI.] had reason to be more than ordinarily pleased at the death of that duke [of Burgundy], and he triumphed more in his ruin than in that of all the rest of his enemies, as he thought that nobody, for the future, either of

his own subjects, or his neighbours, would be able to oppose him, or disturb the tranquillity of his reign. . . . Although God Almighty has shown, and does still show, that his determination is to punish the family of Burgundy severely, not only in the person of the duke, but in their subjects and estates; yet I think the king our master did not take right measures to that end. For, if he had acted prudently, instead of pretending to conquer them, he should rather have endeavoured to annex all those large territories, to which he had no just title, to the crown of France by some treaty of marriage; or to have gained the hearts and affections of the people, and so have brought them over to his interest, which he might, without any great difficulty, have effected, considering how their late afflictions had impoverished and dejected them. If he had acted after that manner, he would not only have prevented their ruin and destruction, but extended and strengthened his own kingdom, and established them all in a firm and lasting peace."—Philip de Commynes, *Memoirs*, bk. 5, ch. 12.—"He [Louis XI.] reassured, caressed, comforted the duchy of Burgundy, gave it a parliament, visited his good city of Dijon, swore in St. Benignus' church to respect all the old privileges and customs that could be sworn to, and bound his successors to do the same on their accession. Burgundy was a land of nobles; and the king raised a bridge of gold for all the great lords to come over to him."—J. Michelet, *Hist. of France*, bk. 17, ch. 3-4.

BUSSORAH AND KUFA, The rise and importance of.—In the first years of their conquest and occupation of Mesopotamia and the Delta of the Euphrates and Tigris—as early as A. D. 638—the Moslems founded two cities which acquired importance in Mahometan history. In both cases, these cities appear to have arisen out of the need felt by the Arabs for more salubrious sites of residence than their predecessors in the ancient country had been contented with. Of Bussorah, or Bassorah, the city founded in the Delta, the site is said to have been changed three times. Kufa was built on a plain very near to the neglected city of Hira, on the Euphrates. "Kufa and Bussorah . . . had a singular influence on the destinies of the Caliphate and of Islam itself. The vast majority of the population came from the Peninsula and were of pure Arabian blood. The tribes which, with their families, scenting from afar the prey of Persia, kept streaming into Chaldaea from every corner of Arabia, settled chiefly in these two cities. At Kufa, the races from Yemen and the south predominated; at Bussorah, from the north. Rapidly they grew into two great and luxurious capitals, with an Arab population each of from 150,000 to 200,000 souls. On the literature, theology, and politics of Islam, these cities had a greater influence than the whole Moslem world besides. . . . The people became petulant and factious, and both cities grew into hotbeds of turbulence and sedition. The Bedouin element, conscious of its strength, was jealous of the Coreish, and impatient of whatever checked its capricious humour. Thus factions sprang up which, controlled by the strong and wise arm of Omar, broke loose under the weaker Caliphs, eventually rent the unity of Islam, and brought on disastrous days."—Sir W. Muir, *Annals of the Early Caliphate*, ch. 18.—See, also, MAHOMETAN CONQUEST: A. D. 632-651.

BYZANTINE EMPIRE.—The Eastern Roman Empire, having its capital at Byzantium (modern Constantinople), the earlier history of which will be found sketched under the caption **ROME**: A. D. 394—395, to 717—800, has been given, in its later years, the name of the Byzantine Empire. The propriety of this designation is questioned by some historians, and the time when it begins to be appropriate is likewise a subject of debate. For some discussion of these questions, see **ROME**: A. D. 717—800.

Its part in history.—Its defence of Europe.—Its civilizing influence.—"The later Roman Empire was the bulwark of Europe against the oriental danger; Maurice and Heraclius, Constantine IV. and Leo the Isaurian were the successors of Themistocles and Africanus. . . . Until the days of the crusades, the German nations did not combine with the Empire against the common foe. Nor did the Teutons, by themselves, achieve any success of ecumenical importance against non-Aryan races. I may be reminded that Charles the Great exterminated the Avars; but that was after they had ceased to be really dangerous. When there existed a truly formidable Avar monarchy it was the Roman Empire that bore the brunt; and yet while most people who read history know of the Avar war of Charles, how few there are who have ever heard of Priscus, the general who so bravely warred against the Avars in the reign of Maurice. I may be reminded that Charles Martel won a great name by victories in southern Gaul over the Saracens; yet those successes sink into insignificance by the side of the achievement of his contemporary, the third Leo, who held the gate of eastern Europe against all the forces which the Saracen power, then at its height, could muster. Every one knows about the exploits of the Frank; it is almost incredible how little is known of the Roman Emperor's defence of the greatest city of Christian Europe, in the quarter where the real danger lay. . . . The Empire was much more than the military guard of the Asiatic frontier; it not only defended but also kept alive the traditions of Greek and Roman culture. We cannot over-estimate the importance of the presence of a highly civilised state for a system of nations which were as yet

only beginning to be civilised. The constant intercourse of the Empire with Italy, which until the eleventh century was partly imperial, and with southern Gaul and Spain, had an incalculable influence on the development of the West. Venice, which contributed so much to the growth of western culture, was for a long time actually, and for a much longer time nominally, a city of the Roman Empire, and learned what it taught from Byzantium. The Byzantine was the mother of the Italian school of painting, as Greece in the old days had been the mistress of Rome in the fine arts; and the Byzantine style of architecture has had perhaps a wider influence than any other. It was to New Rome that the Teutonic kings applied when they needed men of learning, and thither students from western countries, who desired a university education, repaired. . . . It was, moreover, in the lands ruled by New Rome that old Hellenic culture and the monuments of Hellenic literature were preserved, as in a secure storehouse, to be given at length to the 'wild nations' when they had been sufficiently tamed. And in their taming New Rome played an indispensable part. The Justinian law, which still interpenetrates European civilisation, was a product of New Rome. In the third place the Roman Empire for many centuries entirely maintained European commerce. This was a circumstance of the greatest importance; but unfortunately it is one of those facts concerning which contemporary historians did not think of leaving records to posterity. The fact that the coins of the Roman Emperors were used throughout Europe in the Middle Ages speaks for itself. . . . In the fourth place, the Roman Empire preserved a great idea which influenced the whole course of western European history down to the present day—the idea of the Roman Empire itself. If we look at the ecumenical event of 800 A. D. from a wide point of view, it really resolves itself into this: New Rome bestowed upon the western nations a great idea, which moulded and ordered their future history; she gave back to Old Rome the idea which Old Rome bestowed upon her five centuries before. . . . If Constantinople and the Empire had fallen, the imperial idea would have been lost in the whirl of the 'wild nations.' It is to New Rome that Europeans really owe thanks for the establishment of the principle and the system which brought law and order into the political relations of the West."—J. B. Bury, *History of the Later Roman Empire*. See **TRADE**.

A. D. 717.—Its organization by Leo the Isaurian.—"The accession of Leo the Isaurian to the throne of Constantinople suddenly opened a new era in the history of the Eastern Empire. . . . When Leo III. was proclaimed emperor [A. D. 717], it seemed as if no human power could save Constantinople from falling as Rome had fallen. The Saracens considered the sovereignty of every land, in which any remains of Roman civilization survived, as within their grasp. Leo, an Isaurian, and an Iconoclast, consequently a foreigner and a heretic, ascended the throne of Constantine and arrested the victorious career of the Mohammedans. He then reorganized the whole administration so completely in accordance with the new exigencies of Eastern society that the reformed empire outlived for many centuries every government contemporary

with its establishment. The Eastern Roman Empire, thus reformed, is called by modern historians the Byzantine Empire; and the term is well devised to mark the changes effected in the government, after the extinction of the last traces of the military monarchy of ancient Rome. . . . The provincial divisions of the Roman Empire had fallen into oblivion. A new geographical arrangement into Themes appears to have been established by Heraclius, when he recovered the Asiatic provinces from the Persians; it was reorganized by Leo, and endured as long as the Byzantine government. The number of themes varied at different periods. The Emperor Constantine Porphyrogenitus, writing about the middle of the tenth century, counts sixteen in the Asiatic portion of the Empire and twelve in the European. . . . The European provinces were divided into eight continental and five insular or transmarine themes, until the loss of the exarchate of Ravenna reduced the number to twelve. Venice and Naples, though they acknowledged the suzerainty of the Eastern Empire, acted generally as independent cities. . . . When Leo was raised to the throne the Empire was threatened with immediate ruin. . . . Every army assembled to encounter the Saracens broke out into rebellion. The Bulgarians and Slavonians wasted Europe up to the walls of Constantinople; the Saracens ravaged the whole of Asia Minor to the shores of the Bosphorus."—G. Finlay, *Hist. of the Byzantine Empire*, bk. 1, ch. 1.

A. D. 803.—Treaty with Charlemagne, fixing boundaries. See VENICE: A. D. 697-810.

A. D. 820-1057.—The Amorian and Basilian or Macedonian dynasties.—Michael, the Amorian (820-829) so named from his birth-place, Amorium, in Phrygia, was a soldier, raised to the throne by a revolution which deposed and assassinated his friend and patron, the Emperor Leo V. Michael transmitted the crown to his son (Theophilus, 829-842) and grandson. The latter, called Michael the Drunkard, was conspired against and killed by one of the companions of his drunken orgies (867), Basil the Macedonian, who had been in early life a groom. Basil founded a dynasty which reigned, with several interruptions, from A. D. 867 to 1057—a period covering the following reigns: Basil I., A. D. 867-886; Leo VI., A. D. 886-911; Constantine VII. (Porphyrogenitus), A. D. 911-959; Romanus I. (Collegue), A. D. 919-944; Constantine VIII. (Collegue), A. D. 944; Romanus II., A. D.

959-963; Nicephorus II., A. D. 963-969; John Zimisces, A. D. 969-976; Basil II., A. D. 963-1025; Constantine IX., A. D. 963-1028; Romanus III., A. D. 1028-1034; Michael IV., A. D. 1034-1041; Michael V., A. D. 1041-1042; Zoe and Theodora, A. D. 1042-1056; Constantine X., A. D. 1042-1054; Michael VI., A. D. 1056-1057.

A. D. 865-1043.—Wars, commerce and Church Connection with the Russians. See RUSSIANS: A. D. 865-900; also CONSTANTINOPLE: A. D. 865 and 907-1043.

A. D. 870-1016.—Fresh acquisitions in Southern Italy. See ITALY (SOUTHERN): A. D. 800-1016.

A. D. 963-1025.—Recovery of prestige and territory.—"Amidst all the crimes and revolutions of the Byzantine government—and its history is but a series of crimes and revolutions—it was never dismembered by intestine war. A sedition in the army, a tumult in the theatre, a conspiracy in the palace, precipitated a monarch from the throne; but the allegiance of Constantinople was instantly transferred to his successor, and the provinces implicitly obeyed the voice of the capital. The custom, too, of partition, so baneful to the Latin kingdoms, and which was not altogether unknown to the Saracens, never prevailed in the Greek Empire. It stood in the middle of the tenth century, as vicious indeed and cowardly, but more wealthy, more enlightened, and far more secure from its enemies than under the first successors of Heraclius. For about one hundred years preceding there had been only partial wars with the Mohammedan potentates; and in these the emperors seem gradually to have gained the advantage, and to have become more frequently the aggressors. But the increasing distractions of the East encouraged two brave usurpers, Nicephorus Phocas and John Zimisces, to attempt the actual recovery of the lost provinces. They carried the Roman arms (one may use the term with less reluctance than usual) over Syria; Antioch and Aleppo were taken by storm; Damascus submitted; even the cities of Mesopotamia, beyond the ancient boundary of the Euphrates, were added to the trophies of Zimisces, who unwillingly spared the capital of the Khalifate. From such distant conquests it was expedient, and indeed necessary to withdraw; but Cilicia and Antioch were permanently restored to the Empire. At the close of the tenth century the emperors of Constantinople possessed the best and greatest portion of the modern kingdom of Naples, a part of Sicily, the whole [present] European dominions of the Ottomans, the province of Anatolia or Asia Minor, with some part of Syria and Armenia."—H. Hallam, *The Middle Ages*, ch. 6.

A. D. 1057-1081.—Between the Basilian and the Comnenian dynasties.—A dark period.—"The moment that the last of the Macedonian dynasty was gone, the elements of discord seemed unchained, and the double scourge of civil war and foreign invasion began to afflict the empire. In the twenty-four years between 1057 and 1081 were pressed more disasters than

had been seen in any other period of East Roman history, save perhaps the reign of Heraclius. . . . The aged Theodora had named as her successor on the throne Michael Stratioticus, a contemporary of her own who had been an able soldier 25 years back. But Michael VI. was grown aged and incompetent, and the empire was full of ambitious generals, who would not tolerate a dotard on the throne. Before a year had passed a band of great Asiatic nobles entered into a conspiracy to overturn Michael, and replace him by Isaac Comnenus, the chief of one of the ancient Cappadocian houses, and the most popular general of the East. Isaac Comnenus and his friends took arms, and dispossessed the aged Michael of his throne with little difficulty. But a curse seemed to rest upon the usurpation; Isaac was stricken down by disease when he had been little more than a year on the throne, and retired to a monastery to die. His crown was transferred to Constantine Ducas, another Cappadocian noble, who reigned for seven troubled years. His three immediate successors were Romanus IV., A. D. 1067-1071; Michael VII., A. D. 1071-1078; Nicephorus III., A. D. 1078-1081.—C. W. C. Oman, *The Story of the Byzantine Empire*, ch. 20.

A. D. 1081.—The enthronement of the Comnenian Dynasty. See **CONSTANTINOPLE**: A. D. 1081.

A. D. 1081-1085.—Attempted Norman conquest from Southern Italy.—Robert Guiscard, the Norman adventurer who had carved for himself a principality in Southern Italy and acquired the title of Duke of Apulia,—his duchy coinciding with the subsequent Norman kingdom of Naples—conceived the ambitious design of adding the Byzantine Empire to his estate. His conquests in Italy had been mostly at the expense of the Byzantine dominions, and he believed that he had measured the strength of the degenerate Roman-Greeks. He was encouraged, moreover, by the successive revolutions which tossed the imperial crown from hand to hand, and which had just given it to the Comnenian, Alexius I. Beyond all, he had a claim of right to interfere in the affairs of the Empire; for his young daughter was betrothed to the heir-expectant whose expectations were now vanishing, and had actually been sent to Constantinople to receive her education for the throne. To promote his bold undertaking, Robert obtained the approval of the pope, and an absolution for all who would join his ranks. Thus spiritually equipped, the Norman duke invaded Greece, in the summer of 1081, with 150 ships and 30,000 men. Making himself master, on the way, of the island of Corcyra (Corfu), and taking several ports on the mainland, he laid siege to Dyrrachium, and found it a most obstinate fortification to reduce. Its massive ancient walls defied the Norman engines, and it was not until February, 1082, that Robert Guiscard gained possession of the town, by the treachery of one of its defenders. Meantime the Normans had routed and scattered one large army, which the Emperor Alexius led in person to the relief of Dyrrachium; but

the fortified towns in Illyria and Epirus delayed their advance toward Constantinople. Robert was called home to Italy by important affairs and left his son Bohemund (the subsequent Crusader and Prince of Antioch), in command. Bohemund defeated Alexius again in the spring of 1083, and still a third time the following autumn. All Epirus was overrun and Macedonia and Thessaly invaded; but the Normans, while besieging Larissa, were undone by a stratagem, lost their camp and found it necessary to retreat. Robert was then just reentering the field, in person, and had won an important naval battle at Corfu, over the combined Greeks and Venetians, when he died (July, 1085), and his project of conquest in Greece ended with him. Twenty years afterwards, his son Bohemund, when Prince of Antioch, and quarreling with the Byzantines, gathered a crusading army in France and Italy to lead it against Constantinople; but it was stopped by stubborn Dyrrachium, and never got beyond. Alexius had recovered that strong coast defence shortly after Robert Guiscard's death, with the help of the Venetians and Amalfians. By way of reward, those merchant allies received important commercial privileges, and the title of Venice to the sovereignty of Dalmatia and Croatia was recognized. "From this time the doge appears to have styled himself lord of the kingdoms of Dalmatia and Croatia."—G. Finlay, *Hist. of the Byzantine and Greek Empires*, bk. 3, ch. 2, sect. 1.

A. D. 1096-1097.—The passage of the first Crusaders. See **CRUSADES**: A. D. 1096-1099.

A. D. 1146.—Destructive invasion of Roger, king of Sicily.—Sack of Thebes and Corinth.—When Roger, king of Sicily, united the Norman possessions in Southern Italy to his Sicilian realm he became ambitious, in his turn, to acquire some part of the Byzantine possessions. His single attack, however, made simultaneously with the second crusading movement (A. D. 1146), amounted to no more than a great and destructive plundering raid in Greece. An insurrection in Corfu gave that island to him, after which his fleet ravaged the coasts of Eubœa and Attica, Acarnania and Ætolia. "It then entered the gulf of Corinth, and debarked a body of troops at Crissa. This force marched through the country to Thebes, plundering every town and village on the way. Thebes offered no resistance, and was plundered in the most deliberate and barbarous manner. The inhabitants were numerous and wealthy. The soil of Boeotia is extremely productive, and numerous manufactures established in the city of Thebes gave additional value to the abundant produce of agricultural industry. . . . All military spirit was now dead, and the Thebans had so long lived without any fear of invasion that they had not even adopted any effectual measures to secure or conceal their movable property. The conquerors, secure against all danger of interruption, plundered Thebes at their leisure. . . . When all ordinary means of collecting booty were exhausted, the citizens were compelled to take an oath on the Holy Scriptures that they had not concealed any portion of their property."

yet many of the wealthiest were dragged away captive, in order to profit by their ransom; and many of the most skilful workmen in the silk-manufactories, for which Thebes had long been famous, were pressed on board the fleet to labour at the oar. . . . Benjamin of Tudela, who visited Thebes about twenty years later, or perhaps in 1161, speaks of it as then a large city, with two thousand Jewish inhabitants, who were the most eminent manufacturers of silk and purple cloth in all Greece. The silks of Thebes continued to be celebrated as of superior quality after this invasion. . . . From Boeotia the army passed to Corinth. . . . Corinth was sacked as cruelly as Thebes; men of rank, beautiful women, and skilful artisans, with their wives and families, were carried away into captivity. . . . This invasion of Greece was conducted entirely as a plundering expedition. . . . Corfu was the only conquest of which Roger retained possession; yet this passing invasion is the period from which the decline of Byzantine Greece is to be dated. The century-and-a-half which preceded this disaster had passed in uninterrupted tranquillity, and the Greek people had increased rapidly in numbers and wealth. The power of the Slavonian population sank with the ruin of the kingdom of Achrida; and the Slavonians who now dwell in Greece were peaceable cultivators of the soil, or graziers. The Greek population, on the other hand, was in possession of an extensive commerce and many flourishing manufactures. The ruin of this commerce and of these manufactures has been ascribed to the transference of the silk trade from Thebes and Corinth to Palermo, under the judicious protection it received from Roger; but it would be more correct to say that the injudicious and oppressive financial administration of the Byzantine Emperors destroyed the commercial prosperity and manufacturing industry of the Greeks; while the wise liberality and intelligent protection of the Norman kings extended the commerce and increased the industry of the Sicilians. When the Sicilian fleet returned to Palermo, Roger determined to employ all the silk-manufacturers in their original occupations. He consequently collected all their families together, and settled them at Palermo, supplying them with the means of exercising their industry with profit to themselves, and inducing them to teach his own subjects to manufacture the richest brocades, and to rival the rarest productions of the East. . . . It is not remarkable that the commerce and manufactures of Greece were transferred in the course of another century to Sicily and Italy."—G. Finlay, *Hist. of Byzantine and Greek Empires, from 716 to 1453*, bk. 3, ch. 2, sect. 3.

A. D. 1147-1148.—Trouble with the German and French Crusaders. See CRUSADES: A. D. 1147-1149.

A. D. 1185-1204.—The Angeli.—Isaac II., A. D. 1185-1195; Alexius III., A. D. 1195-1203; Alexius IV., A. D. 1203-1204.

A. D. 1203-1204.—Its overthrow by the Venetians and Crusaders.—Sack of Constantinople.—The last of the Comnenian Emperors in the male line—the brutal Andronicus I.—perished horribly in a wild insurrection at Constantinople which his tyranny provoked, A. D. 1185. His successor, Isaac Angelus, collaterally related to the imperial house, had been a

contemptible creature before his coronation, and received no tincture of manliness or virtue from that ceremony. In the second year of his reign, the Empire was shorn of its Bulgarian and Wallachian provinces by a successful revolt. In the tenth year (A. D. 1195), Isaac was pushed from his throne, deprived of sight and shut up in a dungeon, by a brother of equal worthlessness, who styled himself Alexius III. The latter neglected, however, to secure the person of Isaac's son, Alexius, who escaped from Constantinople and made his way to his sister, wife of Philip, the German King and claimant of the western imperial crown. Philip thereupon plotted with the Venetians to divert the great crusading expedition, then assembling to take ship at Venice, and to employ it for the restoration of young Alexius and his father Isaac to the Byzantine throne. The cunning and perfidious means by which that diversion was brought about are related in another place (see CRUSADES: A. D. 1201-1203). The great fleet of the crusading filibusters arrived in the Bosphorus near the end of June, 1203. The army which it bore was landed first on the Asiatic side of the strait, opposite the imperial city. After ten days of parley and preparation it was conveyed across the water and began its attack. The towers guarding the entrance to the Golden Horn—the harbor of Constantinople—were captured, the chain removed, the harbor occupied, and the imperial fleet seized or destroyed. On the 17th of July a combined assault by land and water was made on the walls of the city, at their northwest corner, near the Blachern palace, where they presented one face to the Horn and another to the land. The land-attack failed. The Venetians, from their ships, stormed twenty-five towers, gained possession of a long stretch of the wall, and pushed into the city far enough to start a conflagration which spread ruin over an extensive district. They could not hold their ground, and withdrew; but the result was a victory. The cowardly Emperor, Alexius III., fled from the city that night, and blind old Isaac Angelus was restored to the throne. He was ready to associate his son in the sovereignty, and to fulfill, if he could, the contracts which the latter had made with Venetians and Crusaders. These invaders had now no present excuse for making war on Constantinople any further. But the excuse was soon found. Money to pay their heavy claims could not be raised, and their hatefulness to the Greeks was increased by the insolence of their demeanor. A serious collision occurred at length, provoked by the plundering of a Mahometan mosque which the Byzantines had tolerated in their capital. Once more, on this occasion, the splendid city was fired by the ruthless invaders, and an immense district in the richest and most populous part was destroyed, while many of the inhabitants perished. The fire lasted two days and nights, sweeping a wide belt from the harbor to the Marmora. The suburbs of Constantinople were pillaged and ruined by the Latin soldiery, and more and more it became impossible for the two restored emperors to raise money for paying the claims of the Crusaders who had championed them. Their subjects hated them and were desperate. At last, in January, 1204, the public feeling of Constantinople flamed out in a revolution which crowned a new emperor,—one Alexis Duca,

nicknamed Mountzophlos, on account of his eyebrows, which met. A few days afterwards, with suspicious opportuneness, Isaac and Alexius died. Then both sides entered upon active preparations for serious war; but it was not until April 9th that the Crusaders and Venetians were ready to assail the walls once more. The first assault was repelled, with heavy loss to the besiegers. They rested two days and repeated the attack on the 12th with irresistible resolution and fury. The towers were taken, the gates were broken down, knights and soldiers poured into the fated city, killing without mercy, burning without scruple—starting a third appalling conflagration which laid another wide district in ruins. The new emperor fled, the troops laid down their arms,—Constantinople was conquered and prostrate. “Then began the plunder of the city. The imperial treasury and the arsenal were placed under guard; but with these exceptions the right to plunder was given indiscriminately to the troops and sailors. Never in Europe was a work of pillage more systematically and shamelessly carried out. Never by the army of a Christian state was there a more barbarous sack of a city than that perpetrated by these soldiers of Christ, sworn to chastity, pledged before God not to shed Christian blood, and bearing upon them the emblem of the Prince of Peace. . . . ‘Never since the world was created,’ says the Marshal [Villehardouin] ‘was there so much booty gained in one city. Each man took the house which pleased him, and there were enough for all. Those who were poor found themselves suddenly rich. There was captured an immense supply of gold and silver, of plate and of precious stones, of satins and of silk, of furs and of every kind of wealth ever found upon the earth.’ . . . The Greek eye-witness [Nicetas] gives the complement of the picture of Villehardouin. The lust of the army spared neither maiden nor the virgin dedicated to God. Violence and debauchery were everywhere present; cries and lamentations and the groans of the victims were heard throughout the city; for everywhere pillage was unrestrained and lust unbridled. . . . A large part of the booty had been collected in the three churches designated for that purpose. . . . The distribution was made during the latter end of April. Many works of art in bronze were sent to the melting-pot to be coined. Many statues were broken up in order to obtain the metals with which they were adorned. The conquerors knew nothing and cared nothing for the art which had added value to the metal.”—E. Pears, *The Fall of Constantinople*, ch. 14-15.

A. D. 1204.—Reign of Alexius V.

A. D. 1204-1205.—The partitioning of the Empire by the Crusaders and the Venetians.—“Before the crusaders made their last successful attack on Constantinople, they concluded a treaty partitioning the Byzantine empire and dividing the plunder of the capital. . . . This treaty was entered into by the Frank crusaders on the one part, and the citizens of the Venetian republic on the other, for the purpose of preventing disputes and preserving unity in the expedition.” The treaty further provided for the creation of an Empire of Romania, to take the place of the Byzantine Empire, and for the election of an

Emperor to reign over it. The arrangements of the treaty in this latter respect were carried out, not long after the taking of the city by the election of Baldwin, count of Flanders, the most esteemed and the most popular among the princes of the crusade, and he received the imperial crown of the new Empire of Romania at the hands of the legate of the pope. “Measures were immediately taken after the coronation of Baldwin to carry into execution the act of partition as arranged by the joint consent of the Frank and Venetian commissioners. But their ignorance of geography, and the resistance offered by the Greeks in Asia Minor, and by the Vallachians and Albanians in Europe, threw innumerable difficulties in the way of the proposed distribution of fiefs. The quarter of the Empire that formed the portion of Baldwin consisted of the city of Constantinople, with the country in its immediate vicinity, as far as Bizya and Tzouroulos in Europe and Nicomedia in Asia. Beyond the territory around Constantinople, Baldwin possessed districts extending as far as the Strymon in Europe and the Sangarius in Asia; but his possessions were intermingled with those of the Venetians and the vassals of the Empire. Prokonnesos, Lesbos, Chios, Lemnos, Skyros, and several smaller islands, also fell to his share.”—G. Finlay, *Hist. of Greece from its Conquest by the Crusaders*, ch. 4, sect. 1-2.—“In the division of the Greek provinces the share of the Venetians was more ample than that of the Latin emperor. No more than one fourth was appropriated to his domain; a clear moiety of the remainder was reserved for Venice and the other moiety was distributed among the adventurers of France and Lombardy. The venerable Dandolo was proclaimed Despot of Romania, and was invested, after the Greek fashion, with the purple buskins. He ended at Constantinople his long and glorious life; and if the prerogative was personal, the title was used by his successors till the middle of the fourteenth century, with the singular, though true, addition of ‘Lords of one fourth and a half of the Roman Empire.’ . . . They possessed three of the eight quarters of the city. . . . They had rashly accepted the dominion and defence of Adrianople; but it was the more reasonable aim of their policy to form a chain of factories and cities and islands along the maritime coast, from the neighbourhood of Ragusa to the Hellespont and the Bosphorus. . . . For the price of 10,000 marks the republic purchased of the marquis of Montferrat the fertile island of Crete or Candia with the ruins of a hundred cities. . . . In the moiety of the adventurers the Marquis Boniface [of Montferrat] might claim the most liberal reward; and, besides the isle of Crete, his exclusion from the throne [for which he had been a candidate against Baldwin of Flanders] was compensated by the royal title and the provinces beyond the Hellespont. But he prudently exchanged that distant and difficult conquest for the kingdom of Thessalonica or Macedonia, twelve days’ journey from the capital, where he might be supported by the neighbouring powers of his brother-in-law, the king of Hungary. . . . The lots of the Latin pilgrims were regulated by chance or choice or subsequent exchange. . . . At the head of his knights and archers each baron mounted on horseback to secure the possession of his share, and their first efforts were

generally successful. But the public force was weakened by their dispersion; and a thousand quarrels must arise under a law and among men whose sole umpire was the sword."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 61.

A. D. 1204-1205.—The political shaping of the fragments. See ROMANIA, THE EMPIRE; GREEK EMPIRE OF NICEA; TREBIZOND; EPIRUS; NAXOS, THE MEDIEVAL DUKEDOM; ACHAIA; A. D. 1205-1387; ATHENS: A. D. 1205-1456; SALONIKI.

A. D. 1261-1453.—The Greek restoration.—Last struggle with the Turks and final overthrow.—The story of the shadowy restoration of a Greek Empire at Constantinople, its last struggle with the Turks, and its fall is told elsewhere.—See CONSTANTINOPLE: A. D. 1261-1453, to 1453.—“From the hour of her foundation to that in which her sun finally sank in blood, Christian Constantinople was engaged in constant struggles against successive hordes of barbarians. She did not always triumph in the strife, but, even when she was beaten she did not succumb, but carried on the contest still; and the fact that she was able to do so is alone a sufficient proof of the strength and vitality of her organization. . . . Of the seventy-six emperors and five empresses who occupied the Byzantine throne, 15 were put to death, 7 were blinded or otherwise mutilated, 4 were deposed and imprisoned in monasteries, and 10 were compelled to abdicate. This list, comprising nearly half of the whole number, is sufficient indication of the horrors by which the history of the empire is only too often marked, and it may be frankly admitted that these dark stains, disfiguring pages which but for them would be bright with the things which were beautiful and glorious, go some way to excuse, if not to justify, the obloquy which Western writers have been so prone to cast upon the East. But it is not by considering the evil only, any more than the good only, that it is possible to form a just judgment upon an historic epoch. To judge the Byzantine Empire only by the crimes which defiled the palace would be as unjust as if the French people were to be estimated by nothing but the Massacre of St. Bartholomew, the Reign of Terror, and the Commune of 1871. The dynastic crimes and revolutions of New Rome were not a constant feature in her history. On the contrary, the times of trouble and anarchy were episodes between long periods of peace. They arose either from quarrels in the imperial family itself, which degraded the dignity of the crown, or from the contentions of pretenders struggling among themselves till one or other had worsted his rivals and was able to become the founder of a long dynasty. . . . The most deplorable epoch in the history of the Byzantine Empire, the period in which assassination and mutilation most abounded, was that in which it was exposed to the influence of the Crusaders, and thus brought into contact with Western Europe. . . . The Byzantine people, although in every respect the superiors of their contemporaries, were unable entirely to escape the influence of their neighborhood. As the guardians of classical civilization, they strove to keep above the deluge of barbarism by which the rest of the world was then inundated. But it was a flood whose waters prevailed exceedingly upon the earth, and sometimes all the high hills were

covered, even where might have rested the ark in which the traditions of ancient culture were being preserved. . . . The Byzantine Empire was predestinated to perform in especial one great work in human history. That work was to preserve civilization during the period of barbarism which we call the Middle Ages. . . . Constantinople fell, and the whole Hellenic world passed into Turkish slavery. Western Europe looked on with unconcern at the appalling catastrophe. It was in vain that the last of the Palaiologoi cried to them for help. ‘Christendom,’ says Gibbon, ‘beheld with indifference the fall of Constantinople.’ . . . Up to her last hour she had never ceased, for more than a thousand years, to fight. In the fourth century she fought the Goths; in the fifth, the Huns and Vandals; in the sixth, the Slavs; in the seventh, the Persians, the Avars, and the Arabs; in the eighth, ninth, and tenth, the Bulgars, the Magyars, and the Russians; in the eleventh, the Koumanoi, the Petzenegoi, and the Seljoukian Turks; in the twelfth, thirteenth, fourteenth, and fifteenth, the Ottomans, the Normans, the Crusaders, the Venetians, and the Genoese. No wonder that at last she fell exhausted. The wonder is, how she could keep herself alive so long. But it was by this long battle that she succeeded in saving from destruction, amid the universal cataclysm which overwhelmed the classical world, the civilization of the ancients, modified by the Christian religion. The moral and intellectual development of modern Europe are owing to the Byzantine Empire, if it be true that this development is the common offspring of antiquity upon the one hand and of Christianity upon the other.”—Demetrios Bikelas, *The Byzantine Empire* (Scottish Rev., v. 8, 1886).

BYZANTIUM, Beginnings of.—The ancient Greek city of Byzantium, which occupied part of the site of the modern city of Constantinople, was founded, according to tradition, by Megarians, in the seventh century B. C. Its situation on the Bosphorus enabled the possessors of the city to control the important corn supply which came from the Euxine, while its tunny fisheries were renowned sources of wealth. It was to the latter that the bay called the Golden Horn was said to owe its name. The Persians, the Lacedaemonians, the Athenians and the Macedonians were successive masters of Byzantium, before the Roman day, Athens and Sparta having taken and retaken the city from one another many times during their wars.

ÇA IRA: The origin of the cry and the song.

—“When the news of the disastrous retreat [of Washington, in 1776] through the Jerseys and the miseries of Valley Forge reached France, many good friends to America began to think that now indeed all was lost. But the stout heart of Franklin never flinched. ‘This is indeed bad news,’ said he, ‘but ça ira, ça ira [literally, ‘this will go, this will go’], it will all come right in the end.’ Old diplomats and courtiers, amazed at his confidence, passed about his cheering words. They were taken up by the newspapers; they were remembered by the people, and, in the dark days of the French Revolution, were repeated over and over again on every side, and made the subject of a stirring song which, till the Marseillaise Hymn appeared, had no equal in France.”—J. B. McMaster, *Hist. of the People of the U. S.*, v. 2, p. 89.—L. Rosenthal, *America and France*, p. 263.—“The original words (afterward much changed) were by Ladré, a street singer; and the music was a popular dance tune of the time composed by Bécourt, a drummer of the Grand Opera.”—*Century Dictionary*.—“The original name of the tune to which the words were written is ‘Le Carillon National,’ and it is a remarkable circumstance that it was a great favourite with the unfortunate Marie Antoinette, who used to play it on the harpsichord.”—J. Oxenford, *Book of French Songs* (note to “Ça ira”).

CAABA AT MECCA, The.—“An Arab legend asserts that this famous temple was erected by Abraham and his son Ishmael with the aid of the angel Gabriel. Mahomet lent his authority to the legend and devoted to it several chapters in the Koran, and thus it became one of the Mussulman articles of faith. Even before the introduction of Islamism this story was current through a great part of Arabia and spread abroad in proportion as the Ishmaelitic tribes gained ground. . . . This temple, whose name ‘square house’ indicates its form, is still preserved. It was very small and of very rude construction. It was not till comparatively recent times that it had a door with a lock. . . . For a long time the sole sacred object it contained was the celebrated black stone hadjarel-aswad, an aerolite, which is still the object of Mussulman veneration. . . . We have already mentioned Hobal, the first anthropomorphic idol, placed in the Caaba. This example was soon copied. . . . The Caaba thus became a sort of Arabian Pantheon, and even the Virgin Mary, with her child on her knees, eventually found a place there.”—F. Lenormant, *Manual of Ancient Hist. of the East*, bk. 7, ch. 3.

ALSO IN: Sir W. Muir, *Life of Mahomet*, ch. 2.

CABAL, The. See CABINET, THE ENGLISH; also, ENGLAND: A. D. 1671.

CABALA, The.—“The term Cabala is usually applied to that wild system of Oriental philosophy which was introduced, it is uncertain at what period, into the Jewish schools; in a wider sense it comprehended all the decisions of the Rabbinical courts or schools, whether on religious or civil points.”—H. H. Milman, *Hist. of the Jews*, v. 2, bk. 18.—“The philosophic Cabala aspired to be a more sublime and transcendental Rabbism. It was a mystery not exclusive of, but above their more common mysteries; a secret

more profound than their profoundest secrets. It claimed the same guaranty of antiquity, of revelation, of tradition; it was the true, occult, to few intelligible sense of the sacred writings and of the sayings of the most renowned Wise Men; the inward interpretation of the genuine interpretation of the Law and the Prophets. Men went on; they advanced, they rose from the most full and perfect study of the Talmuds to the higher doctrines, to the more divine contemplations of the Cabala. And the Zohar was the Book of the Cabala which soared almost above the comprehension of the wisest. . . . In its traditional, no doubt unwritten form, the Cabala, at least a Cabala, ascends to a very early date, the Captivity; in its proper and more mature form, it belongs to the first century, and reaches down to the end of the seventh century of our era. The Sepher Yetzira, the Book of Creation, which boasts itself to be derived from Moses, from Abraham, if not from Adam, or even aspires higher, belongs to the earlier period; the Zohar, the Light, to the later. The remote origin of the Cabala belongs to that period when the Jewish mind, during the Captivity, became so deeply impregnated with Oriental notions, those of the Persian or Zoroastrian religion. Some of the first principles of the Cabala, as well as many of the tenets, still more of the superstitions, of the Talmud, coincide so exactly with the Zendavesta . . . as to leave no doubt of their kindred and affiliation.”—H. H. Milman, *Hist. of the Jews*, bk. 30.

CABILDO, The. See LOUISIANA: A. D. 1769.

CABINET, The American.—“There is in the government of the United States no such thing as a Cabinet in the English sense of the term. But I use the term, not only because it is current in America to describe the chief ministers of the President, but also because it calls attention to the remarkable difference which exists between the great officers of State in America and the similar officers in the free countries of Europe. Almost the only reference in the Constitution to the ministers of the President is that contained in the power given him to ‘require the opinion in writing of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices.’ All these departments have been created by Acts of Congress. Washington began in 1789 with four only, at the head of whom were the following four officials: Secretary of State, Secretary of the Treasury, Secretary of War, Attorney General. In 1798 there was added a Secretary of the Navy, in 1829 a Postmaster General, and in 1849 a Secretary of the Interior. . . . Each receives a salary of \$8,000 (£1,600). All are appointed by the President, subject to the consent of the Senate (which is practically never refused), and may be removed by the President alone. Nothing marks them off from any other officials who might be placed in charge of a department, except that they are summoned by the President to his private council. None of them can vote in Congress, Art. XI., § 6 of the Constitution providing that ‘no person holding any office under the United States shall be a member of either House during his continuance in office.’”—J. Bryce, *The Am. Commonwealth*, ch.

9—"In 1862 a separate Department of Agriculture was established. . . . In 1889 the head of the Department became Secretary of the Department of Agriculture and a Cabinet officer. A Bureau of Labor under the Interior Department was created in 1884. In 1888 Congress constituted it a separate department, but did not make its head a Secretary, and therefore not a Cabinet officer." There are now (1891) eight heads of departments who constitute the President's Cabinet.—W. W. and W. F. Willoughby, *Govt. and Administration of the U. S. (Johns Hopkins Univ. Studies, series IX., nos. 1-2), ch. 10.*

CABINET, The English.—"Few things in our history are more curious than the origin and growth of the power now possessed by the Cabinet. From an early period the Kings of England had been assisted by a Privy Council to which the law assigned many important functions and duties [see PRIVY COUNCIL]. During several centuries this body deliberated on the gravest and most delicate affairs. But by degrees its character changed. It became too large for despatch and secrecy. The rank of Privy Councillor was often bestowed as an honorary distinction on persons to whom nothing was confided, and whose opinion was never asked. The sovereign, on the most important occasions, resorted for advice to a small knot of leading ministers. The advantages and disadvantages of this course were early pointed out by Bacon, with his usual judgment and sagacity: but it was not till after the Restoration that the interior council began to attract general notice. During many years old fashioned politicians continued to regard the Cabinet as an unconstitutional and dangerous board. Nevertheless, it constantly became more and more important. It at length drew to itself the chief executive power, and has now been regarded, during several generations, as an essential part of our polity. Yet, strange to say, it still continues to be altogether unknown to the law. The names of the noblemen and gentlemen who compose it are never officially announced to the public. No record is kept of its meetings and resolutions; nor has its existence ever been recognized by any Act of Parliament. During some years the word Cabal was popularly used as synonymous with Cabinet. But it happened by a whimsical coincidence that, in 1671, the Cabinet consisted of five persons the initial letters of whose names made up the word Cabal, Clifford, Arlington, Buckingham, Ashley, and Lauderdale. These ministers were therefore emphatically called the Cabal; and they soon made that appellation so infamous that it has never since their time been used except as a term of reproach."—Lord Macaulay, *Hist. of Eng., ch. 2.*—"Walpole's work, . . . the effect of his policy, when it was finally carried through, was to establish the Cabinet on a definite footing, as the seat and centre of the executive government, to maintain the executive in the closest relation with the legislature, to govern through the legislature, and to transfer the power and authority of the Crown to the House of Commons. Some writers have held that the first Ministry in the modern sense was that combination of Whigs whom William called to aid him in government in 1695. Others contend that the second administration of Lord Rockingham, which came into power in 1782, after the triumph of the American colonists, the fall of Lord North, and the defeat of

George III., was the earliest Ministry of the type of to-day. At whatever date we choose first to see all the decisive marks of that remarkable system which combines unity, steadfastness, and initiative in the executive, with the possession of supreme authority alike over men and measures by the House of Commons, it is certain that it was under Walpole that its ruling principles were first fixed in parliamentary government, and that the Cabinet system received the impression that it bears in our own time. . . . Perhaps the most important of all the distinctions between the Cabinet in its rudimentary stage at the beginning of the century and its later practice, remains to be noticed. Queen Anne held a Cabinet every Sunday, at which she was herself present, just as we have seen that she was present at debates in the House of Lords. With a doubtful exception in the time of George III., no sovereign has been present at a meeting of the Cabinet since Anne. . . . This vital change was probably due to the accident that Anne's successor did not understand the language in which its deliberations were carried on. The withdrawal of the sovereign from Cabinet Councils was essential to the momentous change which has transferred the whole substance of authority and power from the Crown, to a committee chosen by one member of the two Houses of Parliament, from among other members. . . . The Prime Minister is the keystone of the Cabinet arch. Although in Cabinet all its members stand on an equal footing, speak with equal voice, and, on the rare occasions when a division is taken, are counted on the fraternal principle of one man, one vote, yet the head of the Cabinet is 'primus inter pares,' and occupies a position which, so long as it lasts, is one of exceptional and peculiar authority. It is true that he is in form chosen by the Crown, but in practice the choice of the Crown is pretty strictly confined to the man who is designated by the acclamation of a party majority. . . . The Prime Minister, once appointed, chooses his own colleagues, and assigns them to their respective offices. . . . The flexibility of the Cabinet system allows the Prime Minister in an emergency to take upon himself a power not inferior to that of a dictator, provided always that the House of Commons will stand by him. In ordinary circumstances, he leaves the heads of departments to do their own work in their own way. . . . Just as the Cabinet has been described as being the regulator of relations between Queen, Lords and Commons, so is the Prime Minister the regulator of relations between the Queen and her servants. . . . Walpole was in practice able to invest himself with more of the functions and powers of a Prime Minister than any of his successors, and yet was compelled by the feeling of the time earnestly and profusely to repudiate both the name and title, and every one of the pretensions that it involves. The earliest instance in which I have found the head of the government designated as the Premier is in a letter to the Duke of Newcastle from the Duke of Cumberland in 1746."—J. Morley, *Walpole, ch. 7.*—"In theory the Cabinet is nothing but a committee of the Privy Council, yet with the Council it has in reality no dealings; and thus the extraordinary result has taken place, that the Government of England is in the hands of men whose position is legally undefined: that while the Cabinet is a word of every-day use, no

lawyer can say what a Cabinet is: that while no ordinary Englishman knows who the Lords of the Council are, the Church of England prays, Sunday by Sunday, that these Lords may be 'endued with wisdom and understanding'! that while the collective responsibility of Ministers is a doctrine appealed to by members of the Government, no less than by their opponents, it is more than doubtful whether such responsibility could be enforced by any legal penalties: that, to sum up this catalogue of contradictions, the Privy Council has the same political powers which it had when Henry VIII. ascended the throne, whilst it is in reality composed of persons many of whom never have taken part or wished to take part in the contests of political life."—A. V. Dicey, *The Privy Council*, p. 143.

CADE'S REBELLION. See ENGLAND: A. D. 1450.

CADESIA (KADISIYEH), Battle of.—This was the first of the decisive series of battles in which the Arab followers of Mohammed effected the overthrow of the Persian Empire (the Sassanian) and the conquest of its dominions. It was desperately fought, A. D. 636, under the walls of the fortified town of Cadesia (Kadisiyeh in the Arabic) situated near the Sea of Nedjef, between the Euphrates and the Arabian desert. The Persians numbered 120,000 men, under Rustam, their best general. The Arabs were but 30,000 strong at first, but were reinforced the second day. They were commanded by Sa'ad and led by the redoubtable Kaled. The battle was obstinately prolonged through four days, but ended in the complete rout of the Persians and the death of Rustam, with 40,000 of his men.—G. Rawlinson, *Seventh Great Oriental Monarchy*, ch. 26.—See, also, MAHOMETAN CONQUEST: A. D. 632-651.

CÆRLEON.—"Caer," like the "Ceaster" of the Saxons, is a corruption by Celtic tongues of the Roman "Castrum." "In memory of the second legion, which had been so long established at the Silurian Isca, they [the Welsh] gave to the ruins of that city the name of Caer-Legion, the city of the legion, now softened to Caerleon."—T. Wright, *Celt, Roman and Saxon*, ch. 5.

CÆSAR, JULIUS, Career and death of. See ROME: B. C. 69-63, to 44; GAUL: B. C. 58-51; and BRITAIN: B. C. 55-54.

CÆSAR, The title.—"Octavius was the adopted heir of Julius Cæsar; from the moment of his adoption the surname Cæsar became appropriated to him, and it was by this name accordingly that he was most familiarly known to his own contemporaries. Modern writers for the sake of distinction have agreed for the most part to confine this illustrious title to the first of the Cæsarian dynasty; but we should doubtless gain a clearer conception of the gradual process by which the idea of a dynastic succession fixed itself in the minds of the Romans, if we followed their own practice in this particular, and applied the name of Cæsar, not to Augustus only, but also to his adopted son Tiberius, to the scions of the same lineage who succeeded him, and even to those of later and independent dynasties. As late indeed as the reign of Diocletian, the Roman monarch was still eminently the Cæsar. It was not till the close of the third century of our era that that illustrious title was deposed from its preeminence, and restricted to a secondary and deputed authority. Its older use was however revived and perpetuated, though less exclusively, through the declining ages of the empire, and has survived with perhaps unbroken continuity even to our own days. The Austrian Kaiser still retains the name, though he has renounced the succession, of the Cæsars of Rome, while the Czar of Muscovy pretends to derive his national designation by direct inheritance from the Cæsars of Byzantium."—C. Merivale, *Hist. of the Romans*, ch. 31.—See, also, ROME: B. C. 31—A. D. 14.

CÆSAR-AUGUSTA.—One of the fortified posts established in Spain by the Emperor Augustus, B. C. 27, and in which the veterans of the legions were settled. The place and its name (corrupted) survive in modern Saragossa.—C. Merivale, *Hist. of the Romans*, ch. 34.

CALAIS: A. D. 1346-1347.—Siege and capture by Edward III.—Immediately after his great victory won at Creci, the English king, Edward III. laid siege to the strong city of Calais. He built a town of huts round the city, “which he called ‘Newtown the Bold,’ and laid it out with a market, regular streets and shops, and all the necessary accommodation for an army, and hither were carried in vast stores of

vituals and other necessities, obtained by ravaging the country round and by shipment from England.” Calais held out for a year, and angered the king so by its obstinacy that when, in August, 1347, starvation forced its people to surrender, he required that six of the chief burgesses should be given up to him, with halters round their necks, for execution. Eustache St. Pierre and five others nobly offered themselves for the sacrifice, and it was only by the weeping intercession of Queen Philippa that Edward was induced to spare their lives. He expelled all the inhabitants who refused to take an oath of fealty to him and re-peopled the town with Englishmen.—W. Warburton, *Edward III., Second Decade*, ch. 3.—See, also, FRANCE: A. CALATRAVA AND SANTIAGO, Knights of.—“It was to repress the never-ceasing incursions of the Mohammedans, as well as to return these incursions with interest, that, in the time of Fernando [Fernando II. of the early Spanish kingdom of Leon], two military orders, those of Calatrava and Santiago [or St. Jago—or St. James of Compostella], were instituted. The origin of the former order was owing to the devotion of two Cistercian monks; St. Raymond, abbot of Fitero, and his companion, the friar Diego Velasquez. These intrepid men, who had both borne arms previous to their monastic profession, indignant at the cowardice of the Templars, who resigned into the king of Castile's hands the fortress of Calatrava, which had been confided to their defense by the emperor Alfonso, proposed, in 1158, to the regency of that kingdom, to preserve that position against the assailants. The proposal was readily accepted. The preaching of the warlike abbot was so efficacious, that in a short time he assembled 20,000 men, whom he conducted to Calatrava, and among whom were not a few of his own monks. There he drew up the institutions of the order, which took its name from the place, and which in its religious government long followed the Cistercian rule, and wore the same monastic habit,—a white robe and scapulary. [By pope Benedict XIII. the habit was dispensed with, and the knights allowed to marry ‘once.’—Foot-note.] The other order commenced in 1161. Some robbers of Leon, touched with their past enormities, resolved to make reparation for them, by defending the frontiers against the incursions of the Mohammedans. Don Pedro Fernandez—if the ‘don’ has not been added to give something like respectability to the origin—was the chief founder of the order. He engaged the brethren to assume the rule of St. Augustine, in addition to the ordinary obligations of knighthood. His military and monastic fraternity was approved by king Fernando; at whose suggestion the knights chose Santiago as their patron, whose bloody sword, in form of a cross, became their professional symbol. These two orders were richly endowed by successive kings of Leon and

Castile, until their possessions became immense."—S. A. Dunham, *Hist. of Spain and Portugal*, bk. 3, sect. 2, ch. 1, div. 2.—In 1396 the knights of the order of St. James of Compostella "received permission to marry. In 1493, the Grand Mastership was united to the crown of Spain." In 1523 the right of nomination to the Grand Mastership of the Order of Calatrava was transferred from the Pope to the crown of Spain, "and since that time the order has gradually merged into a court institution. The state dress is a white robe, with a red cross on the left breast. The permission to marry has been enjoyed since 1540."—F. C. Woodhouse, *Military Religious Orders*, pt. 4.

CALAUARIA, Confederation of.—A naval confederation, formed at a very early period of Greek history, by the seven maritime cities of Orchomenus, Athens, Egina, Epidaurus, Hermione, Prasie and Nauplia against the kings of Argos. The island of Calauria, off the eastern point of Argolis, was the center of the confederacy.—E. Curtius, *Hist. of Greece*, v. 1, bk. 1, ch. 3.

CALENDAR, The French Republican. See FRANCE: A. D. 1793 (OCTOBER).

CALENDAR, Gregorian.—**Gregorian Era.**—"This was a correction and improvement of the Julian [see CALENDAR, JULIAN]. It was discovered at length, by more accurate astronomical observations, that the true solar or tropical year was 365 days, 5 hours, 48 minutes, and 57 seconds; whence it fell short of the Julian or Egyptian computation of 365 days and 6 hours by an interval of 11 minutes, 3 seconds, . . . which, in the course of 130 years, amounted to a whole day. At the end of 130 years, therefore, the tropical year began a day earlier than the civil, or fell back a day behind it. . . . In the time of Pope Gregory XIII., A. D. 1582, . . . the [vernal] equinox was found to be on the 11th of March, having fallen back ten days. In order, therefore, to bring it forward to its former place of the 21st, he left out ten days in October, calling the 5th the 15th day of that month. Whence in that year of confusion, the 22d day of December became the first of January, A. D. 1583, which was the first year of the Gregorian Era.

In making this correction, he was principally assisted by the celebrated mathematician Clavius. But to prevent the repetition of this error in future, a further reformation of the Julian Calendar was wanting. Because the vernal equinox fell backwards three days in the course of 390 years, Gregory, chiefly by the assistance of Aloysius Lilius, decreed that three days should be omitted in every four centuries: namely, that every first, second and third centurial year, which would otherwise be bissextile, should be a common year; but that every fourth centurial year should remain bissextile. Thus, the years A. D. 1700, 1800, 1900, and 2100, 2200, 2300, were to be common years; but A. D. 1600, 2000, 2400, to remain leap years. By this ingenious reform, the Julian Calendar is rendered sufficiently accurate for all the purposes of chronology, and even of astronomy, for 6000 years to come. . . . The Gregorian or reformed Julian year was not adopted in England until A. D. 1751, when, the deficiency from the time of the Council of Nice then amounting to eleven days, this number was struck out of the month of September, by Act of Parliament; and the 3d day was counted the 14th, in that year of confusion. The next year A. D. 1752, was the first of the new style, beginning January 1, instead of March 25."—W. Hales, *New Analysis of Chronology*, v. 1, bk. 1.—The change from Old Style, as the Julian Calendar, and dates according with it, now came to be called to New Style, or the reformed, Gregorian Calendar, was made in Spain, Portugal, part of Italy, part of the Netherlands, France, Denmark, and Lorraine, in A. D. 1582; in Poland in 1586; in Hungary in 1587; in Catholic Switzerland in 1583; in Catholic Germany in 1584; in most parts of Protestant Germany and Switzerland in 1700 and 1701, and, lastly, in England, in 1751. In Russia, Greece, and the East generally, the Old Style is still retained.—Sir H. Nicolas, *Chronology of History*.

CALENDAR, Julian.—**Julian Era.**—"The epoch of the Julian Era, which precedes the common or Christian Era by forty-five years, is the reformation of the Roman calendar by Julius Cæsar, who ordained that the Year of Rome 707 should consist of 15 months, forming altogether 445 days; that the ensuing year, 708, should be composed of 365 days; and that every fourth year should contain 366 days, the additional day being introduced after the 6th of the calends of March, i. e., the 24th of February, which year he called Bisextile, because the 6th of the calends of March were then doubled. Julius Cæsar also divided the months into the number of days which they at present contain. The Roman calendar, which was divided into calends, nones and ides, was used in most public instruments throughout Europe for many centuries. . . . The calend is the 1st day of each month. The ides were eight days in each month: in March, May, July and October the ides commence on the 15th, and in all other months on the 13th day. The nones are the 5th day of each month, excepting in March, May, July and October, when the nones fall on the 7th day. The days of the month were reckoned backwards instead of forwards: thus, the 3d calends of February is the 30th of January; the 4th calends of February the 29th January. . . . Excepting July and August, which were named after Julius and Augustus Cæsar, having been called Quintilis and Sextilis, the

Roman months bore their present names. An error prevailed for 37 years after the death of Julius Cæsar, from reckoning every third instead of every fourth year a bissextile, or leap year, as if the year contained 365 days, 8 hours. When this mistake was detected, thirteen intercalations had occurred instead of ten, and the year consequently began three days too late: the calendar was, therefore, again corrected, and it was ordered that each of the ensuing twelve years should contain 365 days only, and that there should not be any leap year until A. U. C. 760 or A. D. 7. From that time the years have been calculated without mistakes, and the Roman year has been adopted by all Christian nations, though about the sixth century they began to date from the birth of our Saviour."—Sir H. Nicolas, *Chronology of History*, p. 4.—"It might naturally have been expected that Julius Cæsar would have so ordered his reformed solar year, as to begin on the day of the winter solstice, which, in the 'Year of Confusion' [i. e., the year in which the error of the calendar was corrected] was supposed to fall on Dec. 25. But he chose to begin his new year on the first of January following, because on that day the moon was new, or in conjunction with the sun, at 7 hours, 6 minutes and 35 seconds after noon. By this means he began his year on a most high or holy day among the ancient Druids, with whose usages he was well acquainted, and also made his new year the first of a lunar cycle."—W. Hales, *New Analysis of Chronology*, v. 1, bk. 1.

A. D. 1543-1781.—Origin of the name.—Early Spanish exploration and settlement.—The founding of the Franciscan missions.—The settlements of the Spanish missionaries within the present limits of the State of California date from the first foundation of San Diego in 1769. The missions that were later founded north of San Diego were, with the original establishment itself, for a time known merely by some collective name, such as the Northern Missions. But later the name California, already long since applied to the country of the peninsular missions to the Southward, was extended to the new land, with various prefixes or qualifying phrases; and out of these the definitive name Alta [or Upper] California at last came, being applied to our present country during the whole period of the Mexican Republican ownership. As to the origin of the name California, no serious question remains that this name, as first applied, between 1535 and 1539 to a portion of Lower California, was derived from an old printed romance, the one which Mr. Edward Everett Hale rediscovered in 1862, and from which he drew this now accepted conclusion. For, in this romance, the name California was

already before 1520 applied to a fabulous island, described as near the Indies and also 'very near the Terrestrial Paradise.' Colonists whom Cortes brought to the newly discovered peninsula in 1535, and who returned the next year, may have been the first to apply the name to this supposed island, on which they had been for a time resident. The coast of Upper California was first visited during the voyage of the explorer Juan Cabrillo in 1542-43. Several landings were then made on the coast and on the islands, in the Santa Barbara region. . . . In 1579 Drake's famous visit took place [see AMERICA: A. D. 1572-1580]. . . . It is . . . almost perfectly sure that he did not enter or observe the Golden Gate, and that he got no sort of idea of the existence of the Great Bay. . . . This result of the examination of the evidence about Drake's voyage is now fairly well accepted, although some people will always try to insist that Drake discovered our Bay of San Francisco. The name San Francisco was probably applied to a port on this coast for the first time by Cermeñon, who, in a voyage from the Philippines in 1595 ran ashore, while exploring the coast near Point Reyes. It is now, however, perfectly sure that neither he nor any other Spanish navigator before 1769 applied this name to our present bay, which remained utterly unknown to Europeans during all this period. . . . In 1602-3, Sebastian Vizcaino conducted a Spanish exploring expedition along the California coast. . . . From this voyage a little more knowledge of the character of the coast was gained; and thenceforth geographical researches in the region of California ceased for over a century and a half. With only this meagre result we reach the era of the first settlement of Upper California. The missions of the peninsula of Lower California passed, in 1767, by the expulsion of the Jesuits, into the hands of the Franciscans; and the Spanish government, whose attention was attracted in this direction by the changed conditions, ordered the immediate prosecution of a long-cherished plan to provide the Manila ships, on their return voyage, with good ports of supply and repairs, and to occupy the north-west land as a safeguard against Russian or other aggressions. . . . Thus began the career of Spanish discovery and settlement in California. The early years show a generally rapid progress, only one great disaster occurring,—the destruction of San Diego Mission in 1775, by assailing Indians. But this loss was quickly repaired. In 1770 the Mission of San Carlos was founded at Monterey. In 1772, a land expedition, under Fages and Crespi, first explored the eastern shore of our San Francisco Bay, in an effort to reach by land the old Port of San Francisco. . . . After 1775, the old name began to be generally applied to the new Bay, and so, thenceforth, the name Port of San Francisco means what we now mean thereby. In 1775, Lieutenant Ayala entered the new harbor by water. In the following year the Mission at San Francisco was founded, and in October its church was dedicated. Not only missions, however, but pueblos, inhabited by Spanish colonists, lay in the official plan of the new undertakings. The first of these to be established was San José, founded in November, 1777. The next was Los Angeles, founded in September, 1781."—J. Royce, *California*, ch. 1, sect. 2.

A. D. 1846-1847.—The American conquest and its unexplained preludes.—"Early in 1846, the Americans in California numbered about 200, mostly able-bodied men, and who in their activity, enterprise, and audacity, constituted quite a formidable element in this sparsely inhabited region. The population of California at this time was 6,000 Mexicans and 200,000 Indians. We now come to a period in the history of California that has never been made clear, and respecting which there are conflicting statements and opinions. The following facts were obtained by careful inquiry of intelligent parties who lived in California during the period mentioned, and who participated in the scenes narrated. The native Californians appear to have entertained no very strong affection for their own government, or, rather, they felt that under the influences at work they would inevitably, and at no very distant period, become a dismembered branch of the Mexican nation; and the matter was finally narrowed down to this contested point, namely, whether this state surgery should be performed by Americans or English, the real struggle being between these two nationalities. In the northern part of the territory, such native Californians as the Vallejos, Castros, etc., with the old American settlers, Leese, Larkin, and others, sympathized with the United States, and desired annexation to the American republic. In the south, Pio Pico, then governor of the territory, and other prominent native Californians, with James Alexander Forbes, the English consul, who settled in Santa Clara in 1828, were exerting themselves to bring the country under English domination. . . . This was the state of affairs for two or three years previous to the Mexican War. For some months before the news that hostilities between the United States and Mexico had commenced [see MEXICO: A. D. 1846-1847] reached California, the belief that such an event would certainly occur was universal throughout the territory. This quickened the impulses of all parties, and stimulated the two rivals—the American and English—in their efforts to be the first to obtain a permanent hold of the country. The United States government had sent Colonel Fremont to the Pacific on an exploring expedition. Colonel Fremont had passed through California, and was on his way to Oregon, when, in March, 1846, Lieutenant Gillespie, of the United States marine service, was sent from Washington with dispatches to Colonel Fremont. Lieutenant Gillespie went across Mexico to Mazatlan, and from thence by sea to California. He finally overtook Fremont early in June, 1846, a short distance on the road to Oregon, and communicated to him the purport of his dispatches, they having been committed to memory and the papers destroyed before he entered Mexico. What these instructions authorized Colonel Fremont to do has never been promulgated, but it is said they directed him to remain in California, and hold himself in readiness to coöperate with the United States fleet, in case war with Mexico should occur. Fremont immediately returned to California, and camped a short time on Feather River, and then took up his headquarters at Sutter's Fort. A few days after, on Sunday, June 14th, 1846, a party of

fourteen Americans, under no apparent command, appeared in Sonoma, captured the place, raised the Bear flag, proclaimed the independence of California, and carried off to Fremont's headquarters four prominent citizens, namely, the two Vallejos, J. P. Leese, and Colonel Prudhon. On the consummation of these achievements, one Merritt was elected captain. This was a rough party of revolutionists, and the manner in which they improvised the famous Bear flag shows upon what slender means nations and kingdoms are sometimes started. From an estimable old lady they obtained a fragmentary portion of her white skirt, on which they painted what was intended to represent a grizzly bear, but not being artistic in their work . . . the Mexicans, with their usual happy faculty on such occasions, called it the 'Bandera Colchis,' or 'Hog Flag.' This flag now ornaments the rooms of the Pioneer Society in San Francisco. On the 18th of June, 1846, William B. Ide, a native of New England, who had emigrated to California the year previous, issued a proclamation as commander-in-chief of the fortress of Sonoma. This proclamation declared the purpose to overthrow the existing government, and establish in its place the republican form. . . . General Castro now proposed to attack the feebly manned post at Sonoma, but he was frustrated by a rapid movement of Fremont, who, on the 4th of July, 1846, called a meeting of Americans at Sonoma; and this assembly, acting under his advice, proclaimed the independence of the country, appointed Fremont Governor, and declared war against Mexico. During these proceedings at Sonoma, a flag with one star floated over the headquarters of Fremont at Sutter's Fort. The meaning of this lone-star flag no one seems to have understood. . . . Just as Fremont, with his company, had started for the coast to confront Castro, and act on the aggressive generally, he was suddenly brought to a stand by the astounding intelligence that Commodore Sloat had arrived at Monterey, and that, on the 7th of July, 1846, he had raised the American flag and taken possession of the place; also, that, by command of Commodore Sloat, Commander Montgomery, of the United States sloop-of-war Portsmouth, then lying in San Francisco Bay, had, on the 8th of July, taken possession of Yerba Buena and raised the American flag on the plaza. This of course settled the business for all parties. The Mexican flag and the Bear flag were lowered, and in due time, volens volens, all acquiesced in the flying of the Stars and Stripes. . . . Commodore Sloat . . . had heard of the commencement of hostilities on the Rio Grande, . . . sailed from Mazatlan for California, took possession of the country and raised the American flag on his own responsibility. These decisive steps on the part of Commodore Sloat were not taken a moment too soon, as on the 14th of July the British man-of-war Collingwood, Sir George Seymour commanding, arrived at Monterey," intending, as Sir George acknowledged, "to take possession of that portion of the country." In August, Commodore Sloat relinquished the command of the Pacific squadron to Commodore Stockton, who "immediately instituted bold and vigorous measures for the subjugation of the territory. All his available force for land operations was 350 men—sailors and marines. But so rapid and skilful were Stockton's move-

ments, and so efficient was the coöperation of Fremont with his small troop, that California was effectually conquered in January, 1847. During all this period the people of the United States were ignorant of what was transpiring in California and vice versa. But the action of Commodore Sloat . . . and . . . Commodore Stockton . . . did but anticipate the wishes of the United States Government, which had, in June, 1846, dispatched General Kearney across the country from Fort Leavenworth [see NEW MEXICO: A. D. 1846], at the head of 1,600 men, with orders to conquer California, and when conquered to assume the governorship of the territory. General Kearney arrived in California via San Pasqual with greatly diminished forces. December, 1846, a few weeks before active military operations in that region ceased."—E. E. Dunbar, *The Romance of the Age*, pp. 29-42.

A. D. 1848.—Cession to the United States. See MEXICO: A. D. 1848.

A. D. 1848-1849.—The discovery of Gold and the immigration of the Gold-hunters.—"In the summer of 1847 the American residents of California, numbering perhaps 2,000, and mostly established near San Francisco Bay, looked forward with hope and confidence to the future. Their government held secure possession of the whole territory, and had announced its purpose to hold it permanently. . . . It so happened that at this time one of the leading representatives of American interests in California was John A. Sutter, a Swiss by his parentage; a German by the place of his birth in Baden; an American by residence and naturalization in Missouri; and a Mexican by subsequent residence and naturalization in California. In 1839 he had settled at the junction of the Sacramento and American rivers, near the site of the present city of Sacramento." His rancho became known as Sutter's Fort. In the summer of 1847 he planned the building of a flour-mill, and "partly to get lumber for it, he determined to build a saw-mill also. Since there was no good timber in the valley, the saw-mill must be in the mountains. The site for it was selected by James W. Marshall, a native of New Jersey, a skilful wheelwright by occupation, industrious, honest, generous, but 'cranky,' full of wild fancies, and defective in some kinds of business sense. . . . The place for his mill was in the small valley of Coloma, 1,500 feet above the level of the sea, and 45 miles from Sutter's Fort, from which it was accessible by wagon without expense for road-making." Early in 1848 the saw-mill was nearly completed; "the water had been turned into the race to carry away some of the loose dirt and gravel, and then had been turned off again. On the afternoon of Monday, the 24th of January, Marshall was walking in the tail-race, when on its rotten granite bed-rock he saw some yellow particles and picked up several of them. The largest were about the size of grains of wheat. . . . He thought they were gold, and went to the mill, where he told the men that he had found a gold mine. At the time, little importance was attached to his statement. It was regarded as a proper subject for ridicule. Marshall hammered his new metal and found it

malleable; he put it into the kitchen fire, and observed that it did not readily melt or become discolored; he compared its color with gold coin; and the more he examined it the more he was convinced that it was gold." He soon found an opportunity to show his discovery to Sutter, who tested the metal with acid and by careful weighing, and satisfied himself that Marshall's conclusion was correct. In the spring of 1848 San Francisco, a village of about 700 inhabitants, had two newspapers, the 'Californian' and the 'California Star,' both weeklies. The first printed mention of the gold discovery was a short paragraph in the former, under date of the 15th of March, stating that a gold mine had been found at Sutter's Mill, and that a package of the metal worth \$30 had been received at New Helvetia. . . . Before the middle of June the whole territory resounded with the cry of 'gold!' . . . Nearly all the men hurried off to the mines. Workshops, stores, dwellings, wives, and even ripe fields of grain, were left for a time to take care of themselves. . . . The reports of the discovery, which began to reach the Atlantic States in September, 1849, commanded little credence there before January; but the news of the arrival of large amounts of gold at Mazatlan, Valparaiso, Panama, and New York, in the latter part of the winter, put an end to all doubt, and in the spring there was such a rush of peaceful migration as the world had never seen. In 1849, 25,000—according to one authority 50,000—immigrants went by land, and 23,000 by sea from the region east of the Rocky Mountains, and by sea perhaps 40,000 from other parts of the world. . . . The gold yield of 1848 was estimated at \$5,000,000; that of 1849 at \$23,000,000; that of 1850 at \$50,000,000; that of 1853 at \$65,000,000; and then came the decline which has continued until the present time [1890] when the yield is about \$12,000,000."—J. S. Hittell, *The Discovery of Gold in California* (*Century Magazine*, February, 1891).

A. D. 1856.—The San Francisco Vigilance Committee.—"The association of citizens known as the vigilance committee, which was organized in San Francisco on the 15th of May, 1856, has had such an influence on the growth and prosperity of that city that now [1877], at the end of 21 years, a true account of the origin and subsequent action of that association will be read with interest. For some time the corruption in the courts of law, the insecurity of the ballot-box at elections, and the infamous character of many of the public officials, had been the subject of complaint, not only in San Francisco, but throughout the State of California. It was evident to the honest and respectable citizens of San Francisco that . . . it would become the duty of the people to protect themselves by reforming the courts of law, and by taking the ballot-box from the hands of greedy and unprincipled politicians." The latter were represented by a newspaper called the Sunday Times, edited by one James P. Casey. The opinion of

the better classes of citizens was voiced by the Evening Bulletin, whose editor was James King. On the 14th of May, 1856, King was shot by Casey, in the public street, receiving a wound from which he died six days later, and intense excitement of feeling in the city was produced. Casey surrendered himself and was lodged in jail. During the evening of the 14th some of the members of a vigilance committee which had been formed in 1851, and which had then checked a free riot of crime in the suddenly populated and unorganized city, by trying and executing a few desperadoes, came together and determined the organization of another committee for the same purpose. "The next day (the 15th) a set of rules and regulations were drawn up which each member was obliged to sign. The committee took spacious rooms, and all citizens of San Francisco having the welfare of the city at heart were invited to join the association. Several thousands enrolled themselves in a few days. . . . The members of the vigilance committee were divided into companies of 100, each company having a captain. Early on Sunday (the 18th) orders were sent to the different captains to appear with their companies ready for duty at the headquarters of the committee, in Sacramento Street, at nine o'clock. When all the companies had arrived, they were formed into one body, in all about 2,000 men. Sixty picked men were selected as a guard for the executive committee. At half-past eleven the whole force moved in the direction of the jail. A large number of spectators had collected, but there was no confusion, no noise. They marched through the city to Broadway, and there formed in the open space before the jail. . . . The houses opposite the jail were searched for men and arms secreted there, the committee wishing to prevent any chance of a collision which might lead to bloodshed. A cannon was then brought forward and placed in front of the jail, the muzzle pointed at the door." The jailer was now called upon to deliver Casey to the committee, and complied, being unable to resist. One Charles Cora, who had killed a United States marshal the November previous, was taken from the jail at the same time. The two prisoners were escorted to the quarters of the vigilance committee and there confined under guard. Two days afterwards (May 20th) Mr. King died. Casey and Cora were put on trial before a tribunal which the committee had organized, were condemned to death, and were hanged, with solemnity, on the 22d, from a platform erected in front of the building on Sacramento Street. "The executive committee, finding that the power they held was perfectly under control, and that there was no danger of any popular excesses, determined to continue their work and rid the country of the gang of ruffians which had for so long a time managed elections in San Francisco and its vicinity. These men were all well known, and were ordered to leave San Francisco. Many went away. Those who refused to go were arrested and taken to the rooms of the committee, where they were confined until opportunities offered for shipping them out of the country. . . . The governor of California at this time was Mr. J. Neely Johnson. . . . The major-general of the second division of state militia (which included the city and county of San Francisco) was Mr. William T. Sherman

[afterwards well known in the world as General Sherman] who had resigned his commission in the United States army and had become a partner in the banking house of Lucas, Turner & Co., in San Francisco. . . . Toward the end of May, Governor Johnson . . . appealed to General Sherman for advice and assistance in putting a stop to the vigilance committee. At this time General Wool was in command of the United States troops, and Commodore Farragut had charge of the navy yard." General Wool was applied to for arms, and Commodore Farragut was asked to station a vessel of war at anchor off San Francisco. Both officers declined to act as requested, having no authority to do so. "When Governor Johnson returned to Sacramento, a writ was issued, at his request, by Judge Terry of the supreme court, commanding the sheriff of San Francisco to bring before him one William Mulligan, who was then in the hands of the vigilance committee." The vigilance committee refused to surrender their prisoner to the sheriff, and General Sherman was ordered to call out the militia of his division to support that officer. At the same time the governor issued a proclamation declaring the city of San Francisco in a state of insurrection. General Sherman found it impossible to arm his militia for service, and resigned the command. The governor sought and obtained arms elsewhere; but the schooner which brought them was seized and the arms possessed by the committee. On attempting to arrest the person who had charge of the schooner, one of the vigilance committee's policemen, named Hopkins, was stabbed by the afterwards notorious Judge Terry, who, with some others, had undertaken to protect the man. "The signal for a general meeting under arms was sounded, and in a short time 1,500 men were reported ready for duty. In an hour 4,000 men were under arms and prepared to act against the so-called law-and-order party, who were collected in force at the different armories. These armories were surrounded." Judge Terry was demanded and delivered up, and all the arms and ammunition in the armories were removed. "In this way was settled the question of power between the vigilance committee, who wished to restore order and were working to establish an honest judiciary and a pure ballot, and their opponents, the law-and-order party, who wished to uphold the dignity of the law by means of a butcher's knife in the hands of a judge of the supreme court. Although the committee were masters in San Francisco, their position was made more precarious by the very fact of their having disarmed their opponents. The attention of the whole Union was attracted to the state of things in California, and it was rumored that instructions had been sent from Washington to all the United States vessels in the Pacific to proceed at once to San Francisco; and that orders were on the way, placing the United States military force in California at the disposal of Governor Johnson. The committee went on steadily with their work. . . . All the important changes which they had undertaken had been carried out successfully, and they would gladly have given up the responsibility they had assumed had it not been for the case of Judge Terry. . . . At last the physicians announced that Hopkins was out of danger, and on the 7th of August Judge Terry was released. . . . Having got rid of

Judge Terry the committee prepared to bring their labours to a close, and on the 18th of August the whole association, numbering over 5,000 men, after marching through the principal streets of San Francisco, returned to their headquarters in Sacramento Street, where after delivering up their arms they were relieved from duty. . . . In the following November there was an election of city and county officers. Every thing went off very quietly. A 'people's ticket', bearing the names of thoroughly trustworthy citizens, irrespective of party, was elected by a large majority, and for the last 20 years San Francisco has had the reputation of being one of the best governed cities in the United States."—T. G. Cary, *The San Francisco Vigilance Committee* (*Atlantic Monthly*, Dec. 1877).

Also in: H. H. Bancroft, *Hist. of the Pacific States*, v. 18 (*California*, v. 6), ch. 25.—Gen. W. T. Sherman, *Memoirs*, ch. 4 (v. 1).

A. D. 1877-1880.—Denis Kearney and the Sand Lot Party.—The new state constitution.—"Late in 1877 a meeting was called in San Francisco to express sympathy with the men then on strike at Pittsburg in Pennsylvania. . . . Some strong language used at this meeting, and exaggerated by the newspapers, frightened the business men into forming a sort of committee of public safety. . . . The chief result of the incident was further irritation of the poorer classes, who perceived that the rich were afraid of them, and therefore disposed to deal harshly with them. Shortly after came an election of municipal officers and members of the State legislature. The contest, as is the custom in America, brought into life a number of clubs and other organizations, purporting to represent various parties or sections of a party, and among others a body calling itself 'The Working men's Trade and Labor Union,' the Secretary of which was a certain Denis Kearney. When the election was over, Kearney declared that he would keep his union going, and form a working man's party. He was a drayman by trade, Irish by birth, brought up a Roman Catholic, but accustomed to include his religion among the established institutions he reviled. He had borne a good character for industry and steadiness till some friend 'put him into stocks,' and the loss of what he hoped to gain is said to have first turned him to agitation. He had gained some faculty in speaking by practice at a Sunday debating club called the Lyceum of Self Culture. . . . Kearney's tongue, loud and abusive, soon gathered an audience. On the west side of San Francisco, as you cross the peninsula from the harbor towards the ocean, there is (or then was) a large open space, laid out for building, but not yet built on, covered with sand, and hence called the Sand Lot. Here the mob had been wont to gather for meetings; here Kearney formed his party. At first he had merely vagabonds to listen, but one of the two great newspapers took him up. These two, the Chronicle and the Morning Call, were in keen rivalry, and the former seeing in this new movement a chance of going ahead, filling its columns with sensational matter and increasing its sale among working men, went in hot and strong for the Sand Lot party. . . . The advertisement which the Chronicle gave him by its reports and articles, and which he repaid by advising working men to take it, soon made him a personage; and his

position was finally assured by his being, along with several other speakers, arrested and prosecuted on a charge of riot, in respect of inflammatory speeches delivered at a meeting on the top of Nob Hill, one of the steep heights which make San Francisco the most picturesque of American cities. The prosecution failed, and Kearney was a popular hero. Clerks and the better class of citizens now began to attend his meetings, though many went from mere curiosity, as they would have gone to a circus; the W. P. C. (Working man's Party of California) was organized as a regular party, embracing the whole State of California, with Kearney for its President. . . . The Sand Lot party drew its support chiefly from the Democrats, who here, as in the East, have the larger share of the rabble; hence its rise was not unwelcome to the Republicans, because it promised to divide and weaken their old opponents; while the Democrats, hoping ultimately to capture it, gave a feeble resistance. Thus it grew the faster, and soon began to run a ticket of its own at city and State elections. It carried most of the city offices, and when the question was submitted to the people whether a new Constitution should be framed for California, it threw its vote in favor of having one and prevailed. . . . Next came, in the summer of 1878, the choice of delegates to the convention which was to frame the new Constitution. The Working man's Party obtained a substantial representation in the convention, but its nominees were ignorant men, without experience or constructive ideas. . . . However the working men's delegates, together with the more numerous and less corruptible delegates of the farmers, got their way in many things and produced that surprising instrument by which California is now governed. . . . 1. It restricts and limits in every possible way the powers of the State legislature, leaving it little authority except to carry out by statutes the provisions of the Constitution. It makes 'lobbying,' i. e., the attempt to corrupt a legislator, and the corrupt action of a legislator, felony. 2. It forbids the State legislature or local authorities to incur debts beyond a certain limit, taxes uncultivated land equally with cultivated, makes sums due on mortgage taxable in the district where the mortgaged property lies, authorizes an income tax, and directs a highly inquisitorial scrutiny of everybody's property for the purposes of taxation. 3. It forbids the 'watering of stock,' declares that the State has power to prevent corporations from conducting their business so as to 'infringe the general well-being of the State'; directs the charges of telegraph and gas companies, and of water-supplying bodies, to be regulated and limited by law; institutes a railroad commission with power to fix the transportation rates on all railroads and examine the books and accounts of all transportation companies. 4. It forbids all corporations to employ any Chinese, debars them from the suffrage, forbids their employment on any public works annuls all contracts for 'coolie labour,' directs the legislature to provide for the punishment of any company which shall import Chinese, to impose conditions on the residence of Chinese, and to cause their removal if they fail to observe these conditions. It also declares that eight hours shall constitute a legal day's work on all public works. When the Constitution came to

be submitted to the vote of the people, in May 1879, it was vehemently opposed by the monied men. . . . The struggle was severe, but the Granger party commanded so many rural votes, and the Sand Lot party so many in San Francisco (whose population is nearly a third of that of the entire State) that the Constitution was carried, though by a small majority, only 11,000 out of a total of 145,000 citizens voting. . . . The next thing was to choose a legislature to carry out the Constitution. Had the same influences prevailed in this election as prevailed in that of the Constitutional Convention, the results might have been serious. But fortunately there was a slight reaction. . . . A series of statutes was passed which gave effect to the provisions of the Constitution in a form perhaps as little harmful as could be contrived, and certainly less harmful than had been feared when the Constitution was put to the vote. Many bad bills, particularly those aimed at the Chinese, were defeated, and one may say generally that the expectations of the Sand Lot men were grievously disappointed. While all this was passing, Kearney had more and more declined in fame and power. He did not sit either in the Constitutional Convention or in the legislature of 1880. The mob had tired of his harangues, especially as little seemed to come of them, and as the candidates of the W. P. C. had behaved no better in office than those of the old parties. He had quarreled with the Chronicle. He was, moreover, quite unfitted by knowledge or training to argue the legal, economical, and political questions involved in the new Constitution so that the prominence of these questions threw him into the background. . . . Since 1880 he has played no part in Californian politics."—J. Bryce, *The American Commonwealth*, ch. 90 (v. 2), and app. to v. 1 (containing the text of the *Const. of Cal.*).

CALPURNIAN LAW, The.—"In this year, B. C. 149, the tribune L. Calpurnius Piso Frugi, who was one of the Roman writers of annals, proposed and carried a Lex Calpurnia, which made a great change in the Roman criminal procedure. Before this time and to the third Punic war, when a magistratus had misconducted himself in his foreign administration by oppressive acts and spoliation, there were several ways of inquiring into his offence. . . . But these modes of procedure were insufficient to protect the subjects of Rome against bad magistratus. . . . The remedy for these evils was the establishment of a court under the name of *Quaestio Perpetua de pecuniis repetundis*, the first regular criminal court that existed at Rome. Courts similarly constituted were afterwards established for the trial of persons charged with other offences. The Lex Calpurnia defined the offence of *Repetundæ*, as it was briefly named, to be the taking of money by irregular means for the use of a governor. The name *Repetundæ* was given to this offence, because the object of the procedure was to compel the governor to make restitution. . . . The court consisted of a presiding judge . . . and of a body of judices or jurymen annually appointed. The number of this body of judices is not known, but they were all senators. The judge and a jury taken from the body of the judices tried all the cases which came before them during one year; and hence came the name *Quaestio Perpetua* or standing court, in opposition to the extraordinary commissions which had hitherto been appointed as the occasion arose. We do not know that the Lex Calpurnia contained any penalties. As far as the evidence shows, it simply enabled the complainants to obtain satisfaction."—G. Long, *Decline of the Roman Republic*, ch. 2.

CAMBORICUM.—A Roman town in Britain.—"Camboricum was without doubt a very important town, which commanded the southern fens. It had three forts or citadels, the principal of which occupied the district called the Castle-end, in the modern town of Cambridge, and appears to have had a bridge over the Cam, or Granta; of the others, one stood below the town, at Chesterton, and the other above it, at Granchester. Numerous roads branched off from this town.

... Bede calls the representative of Camboricum, in his time, a 'little deserted city,' and tells us how, when the nuns of Ely wanted a coffin for their saintly abbeſs, Etheldreda, they found a beautiful ſculptured ſarcophagus of white marble outside the city walls of the Roman town.—T. Wright, *Celt, Roman and Saxon*, ch. 5.

CAMORRA, OR CAMORRISTI, The.—"Beſides the regular authorities known to and avowed by the law . . . there exiſted under the Bourbon rule at Naples [overthrown by Garibaldi in 1860] a ſelf-constituted authority more terrible than either. It was not eaſy to obtain exact proof of the operation of this authority, for it was impatient of queſtion, its vengeance was prompt, and the inſtrument of that vengeance was the knife. In ſpeaking of it as one authority it is poſſible to err, for different forms or branches of this ſecret inſtitution at times

revealed their exiſtence by the orders which they iſſued. This ſecret influence was that of the Camorra, or Camorristi, a ſort of combination of the violence of the middle ages, of the trades union tyranny of Sheffield, and of the blackmail levy of the borders. The Camorristi were a body of unknown individuals who ſubſiſted on the public, eſpecially on the ſmaller tradespeople. A man effected a ſale of his ware; as the customer left his ſhop a man of the people would enter and demand the tax on the ſale for the Camorra. None could eſcape from the odious tyranny. It was impalpable to the police. It did not confine itſelf to the induſtry of illicit taxation. It iſſued its orders. When the Italian Parliament impoſed ſtamp duties, that ſenſibly increased the coſt of litigation, that indiſpenſable luxury of the Neapolitans, the advocates received letters warning them to ceaſe all practice in the courts ſo long as theſe ſtamp duties were enforced. 'Otherwiſe,' continued the mandate, 'we ſhall take an early opportunity of arranging your affairs.' Signed by 'the Camorra of the avvocati.' The arrangement hinted at was to be made by the knife. . . . The Italian government, much to its credit, made a great onſlaught on the Camorristi. Many were arreſted, impriſoned or exiled, ſome even killed one another in priſon. But the total eradication of ſo terrible a ſocial vice muſt be [published in 1867] a work of great difficulty, perseverance and time."—*The Trinity of Italy; by an English Civilian*, p. 70.

CAMP OF REFUGE AT ELY. See ENGLAND: A. D. 1069-1071.

CAMPAGNA, OR CAMPANIA.—"The name of Campania," ſays Pelligrini, 'which was firſt applied to the territory of Capua alone, extended itſelf by ſucceſſive re-arrangements of the Italian provinces over a great part of Central Italy, and then gradually ſhrank back again into its birth-place, and at laſt became reſtricted to the limits of one city only, Naples, and that one of the leaſt importance in Italy. What naturally followed was the total diſuſe of the name.' . . . The term Campania, therefore, became obſolete except in the writings of a few mediæval authors, whoſe ſtatements created ſome confuſion by their ignorance of the different ſenſes in which it had at different times been uſed. An impreſſion ſeems, however, to have prevailed that the diſtrict of Capua had been ſo named on account of its flat and fertile nature, and hence every ſimilar tract of plain country came to be called a campagna in the Italian language. The exact time when the name, which had thus become a mere appellative, was applied to the Roman Campagna is not accurately aſcertained. . . . It will be ſeen that the term Roman Campagna is not a geographical definition of any diſtrict or province with clearly fixed limits, but that it is a name looſely employed in ſpeaking of the tract which lies round the city of Rome."—R. Burn, *Rome and the Campagna* ch. 14, note at end.

CAMPUS MARTIUS AT ROME, The. —“The history of the Campus Martius presents us with a series of striking contrasts. It has been covered in successive ages, first by the cornfields of the Tarquinian dynasty, then by the parade ground of the great military republic, next by a forest of marble colonnades and porticoes, and, lastly, by a confused mass of mean and filthy streets, clustering round vast mansions, and innumerable churches of every size and description. . . . During the time of the Republic, the whole Campus seems to have been considered state property and was used as a military and athletic exercise ground and a place of meeting for the comitia centuriata.”—R. Burn, *Rome and the Campagna*, ch. 13, pt. 1. —“We have hitherto employed this name to designate the whole of the meadow land bounded by the Tiber on one side, and on the other by the Collis Hortulorum, the Quirinal and the Capitoline. . . . But the Campus Martius, strictly speaking, was that portion only of the flat ground

which lies in the angle formed by the bend of the stream. According to the narrative of Livy, it was the property of the Tarquins, and upon their expulsion was confiscated, and then consecrated to Mars; but Dionysius asserts that it had been previously set apart to the god and sacrilegiously appropriated by the tyrant. . . . During the republic the Campus Martius was employed specially for two purposes. (1.) As a place for holding the constitutional assemblies (comitia) especially the Comitia Centuriata, and also for ordinary public meetings (conciones). (2.) For gymnastic and warlike sports. For seven centuries it remained almost entirely open. . . . In the Comitia, the citizens, when their votes were taken, passed into enclosures termed septa, or ovilia, which were, for a long period, temporary wooden erections.”—W. Ramsay, *Manual of Roman Antiq.*, ch. 1.

CANAAN. — CANAANITES. — “Canaan signifies ‘the lowlands,’ and was primarily the name of the coast on which the great cities of Phœnicia were built. As, however, the inland parts of the country were inhabited by a kindred population, the name came to be extended to designate the whole of Palestine, just as Palestine itself meant originally only the small territory of the Philistines.”—A. H. Sayce, *Fresh Light from the Ancient Monuments*, ch. 2.—See PHŒNICIANS: ORIGIN AND EARLY HISTORY; also, JEWS: THE EARLY HEBREW HISTORY, and HAMITES.

CANADA.

(NEW FRANCE.)

Names.—“The year after the failure of Verazano's last enterprise, 1525, Stefano Gomez sailed from Spain for Cuba and Florida; thence he steered northward in search of the long hoped-for passage to India, till he reached Cape Race, on the southeastern extremity of Newfoundland. The further details of his voyage remain unknown, but there is reason to suppose that he entered the Gulf of St. Lawrence and traded upon its shores. An ancient Castilian tradition existed that the Spaniards visited these coasts before the French, and having perceived no appearance of mines or riches, they exclaimed frequently ‘Aca nada’ [signifying ‘here is nothing’]; the natives caught up the sound, and when other Europeans arrived, repeated it to them. The strangers concluded that these words were a designation, and from that time this magnificent country bore the name of Canada. . . . Father Hennepin asserts that the Spaniards were the first discoverers of Canada, and that, finding nothing there to gratify their extensive desires for gold, they bestowed upon it the appellation of Capo di Nada, ‘Cape Nothing,’ whence by corruption its present name. . . . La Potherie gives the same derivation. . . . This derivation would reconcile the different assertions of the early discoverers, some of whom give the name of Canada to the whole valley of the St. Lawrence; others, equally worthy of credit, confine it to a small district in the neighbourhood of Stadacona (now Quebec) . . . Duponceau, in

the Transactions of the [American] Philosophical Society, of Philadelphia, founds his conjecture of the Indian origin of the name of Canada upon the fact that, in the translation of the Gospel of St. Matthew into the Mohawk tongue, made by Brandt, the Indian chief, the word Canada is always used to signify a village. The mistake of the early discoverers, in taking the name of a part for that of the whole, is very pardonable in persons ignorant of the Indian language. . . . The natural conclusion . . . is, that the word Canada was a mere local appellation, without reference to the country; that each tribe had their own Canada, or collection of huts, which shifted its position according to their migrations.”—E. Warburton, *The Conquest of Canada*, v. 1, ch. 1, and foot-note.—“Canada was the name which Cartier found attached to the land and there is no evidence that he attempted to displace it. . . . Nor did Roberval attempt to name the country, while the commission given him by the king does not associate the name of Francis or any new name therewith. . . . There seems to have been a belief in New England, at a later day, that Canada was derived from William and Emery de Caen (Cane, as the English spelled it), who were in New France in 1621, and later. Cf. Morton's ‘New English Canaan,’ Adam's edition, p. 235, and Josselyn's ‘Rarities,’ p. 5; also, J. Reade, in his history of geographical names in Canada, printed in New Dominion Monthly, xi. 341.”—B. F. De Costa, *Jacques Cartier and*

his Successors (Narrative and Crit. Hist. of Am., v. 4, ch. 2), and Editor's foot-note.—"Cartier calls the St. Lawrence the 'River of Hochelaga,' or 'the great river of Canada.' He confines the name of Canada to a district extending from the Isle aux Coudres in the St. Lawrence to a point at some distance above the site of Quebec. The country below, he adds, was called by the Indians Saguenay, and that above, Hochelaga. In the map of Gerard Mercator (1589) the name Canada is given to a town, with an adjacent district, on the river Stadin (St. Charles). Lescarbot, a later writer, insists that the country on both sides of the St. Lawrence, from Hochelaga to its mouth, bore the name of Canada. In the second map of Ortelius, published about the year 1572, New France, Nova Francia is thus divided:—"Canada," a district on the St. Lawrence above the River Saguenay; 'Chilaga' (Hochelaga), the angle between the Ottawa and the St. Lawrence; 'Saguenai,' a district below the river of that name; 'Moscosa,' south of the St. Lawrence and east of the River Richelieu; 'Avacal,' west and south of Moscosa; 'Norumbega,' Maine and New Brunswick; 'Apalachen,' Virginia, Pennsylvania, etc.; 'Terra Corterealis,' Labrador; 'Florida,' Mississippi, Alabama, Florida. Mercator confines the name of New France to districts bordering on the St. Lawrence. Others give it a much broader application. The use of this name, or the nearly allied names of Francisca and La Franciscane, dates back, to say the least, as far as 1525, and the Dutch geographers are especially free in their use of it, out of spite to the Spaniards. The derivation of the name of Canada has been a point of discussion. It is, without doubt, not Spanish, but Indian. . . . Lescarbot affirms that Canada is simply an Indian proper name, of which it is vain to seek a meaning. Belleforest also calls it an Indian word, but translates it 'Terre,' as does also Thevet."—F. Parkman, *Pioneers of France in the New World: Champlain, ch. 1, foot-note.*

A. D. 1603-1605.—The Beginning of Champlain's Career in the New World.—Colonization at Port Royal.—Exploration of the New England coast.—In Pontgravé's expedition of 1603 to New France [see AMERICA: A. D. 1541-1603], "Samuel de Champlain, a captain in the navy, accepted a command . . . at the request of De Chatte [for De Chastes]; he was a native of Saintonge, and had lately returned to France from the West Indies, where he had gained a

high name for boldness and skill. Under the direction of this wise and energetic man the first successful efforts were made to found a permanent settlement in the magnificent province of Canada, and the stain of the errors and disasters of more than seventy years was at length wiped away. Pontgravé and Champlain sailed for the St. Lawrence in 1603," explored it as far as the rapids of St. Louis, and then returned to France. They found that the patron of their undertaking, De Chastes, was dead. "Pierre du Guast, Sieur de Monts, had succeeded to the powers and privileges of the deceased, with even a more extensive commission. De Monts was a Calvinist, and had obtained from the king the freedom of religious faith for himself and his followers in America, but under the engagement that the Roman Catholic worship should be established among the natives. . . . The trading company established by De Chatte was continued and increased by his successor. With this additional aid De Monts was enabled to fit out a more complete armament than had ever hitherto been engaged in Canadian commerce. He sailed from Havre on the 7th of March, 1604, with four vessels. Of these, two under his immediate command were destined for Acadia. Champlain, Poutrincourt, and many other volunteers, embarked their fortunes with him, purposing to cast their future lot in the New World. A third vessel was dispatched under Pontgravé to the Strait of Canso, to protect the exclusive trading privileges of the company. The fourth steered for Tadoussac, to barter for the rich furs brought by the Indian hunters from the dreary wilds of the Saguenay. On the 6th of May De Monts reached a harbor on the coast of Acadia," but, for some reason not to be understood, his projected colony was quartered on the little islet of St. Croix, near the mouth of the river of that name, which became subsequently the boundary between Maine and New Brunswick. Meantime, the fine harbor, now Annapolis, then named Port Royal, had been discovered, and was granted, with a large surrounding territory, by De Monts to De Poutrincourt, who proposed to settle upon it as its feudal proprietor and lord. The colony at St. Croix having been housed and put in order, De Poutrincourt sailed for France, intending to bring his family and establish himself at Port Royal. De Monts, Champlain, and those who remained, suffered a winter of terrible hardships, and thirty-five died before spring. De Monts now resolved to seek a better site for his infant settlement, and, finding no other situation so good he resumed possession of that most desirable Port Royal which he had granted away to Poutrincourt and removed his colony thither. Champlain, meanwhile, in the summer of 1605, had explored the coast southward far down the future home of the English Puritans, looking into Massachusetts Bay, taking shelter in Plymouth harbor and naming it Port St. Louis, doubling Cape Cod (which he called Cap Blanc), turning back at Nausett Harbor, and gaining on the whole a remarkable knowledge of the country and its coast. Soon after Champlain's return from this coasting voyage, De Monts was called home to France, by news of machinations that were threatening to extinguish his patent, and Pontgravé was left in command of the colony at Port Royal.—E. Warburton, *The Conquest of Canada, v. 1, ch. 3.*—In

De Monts' petition to the king for leave to colonize Acadia that region was defined "as extending from the 40th to the 46th degree of north latitude, or from Philadelphia to beyond Montreal."—F. Parkman, *Pioneers of France in the New World: Champlain*, ch. 3.

A. D. 1606-1608.—The fortunes of the Acadian colony.—"De Monts found his pathway in France surrounded with difficulties. The Rochelle merchants who were partners in the enterprise desired a return for their investments. The Baron de Poutrincourt, who was still possessed with the desire to make the New World his home, proved of assistance to De Monts. De Poutrincourt returned to Acadia and encouraged the colonists, who were on the verge of deserting Port Royal. With De Poutrincourt emigrated at this time a Parisian advocate, named Mark Lescarbot, who was of great service to the colony. During the absence of De Poutrincourt on an exploring expedition down the coast, Lescarbot drained and repaired the colonists' fort, and made a number of administrative changes, much improving the condition of the settlers. The following winter was one of comfort, indeed of enjoyment. . . . In May, however, the sad news reached the colony that the company of the merchants on whom it depended had been broken up. Their dependence being gone, on the 30th of July most of the colonists left Acadia for France in vessels sent out for them. For two years the empty buildings of Port Royal stood, a melancholy sight, with not a white person in them, but under the safe protection of Memberton, the Micmak chief, who proved a trusty friend to the French. The opposition to the company of Rochelle arose from various causes. In addition to its financial difficulties the fact of De Monts being a Protestant was seized on as the reason why nothing was being done in the colony to christianize the Indians. Accordingly when De Monts, fired with a new scheme for exploring the northwest passage, turned over the management of Acadian affairs to De Poutrincourt, who was a sincere Catholic, some of the difficulties disappeared. It was not, however, till two years later that arrangements were made for a new Acadian expedition."—G. Bryce, *Short Hist. of the Canadian People*, ch. 4, sect. 1.

A. D. 1608-1611.—Champlain's third and fourth expeditions.—His settlement at Quebec, discovery of Lake Champlain, and first wars with the Iroquois.—"De Monts in no way lost heart, and he resolved to continue in the career of exploration for settlement. A new expedition was determined on, and De Monts selected the Saint Lawrence as the spot where the effort should be made. Champlain counselled the change. In Nova Scotia and on the coast of New Brunswick and Maine he had been struck by the number of ports affording protection to vessels from sea, and by the small number of Indians whom he had met. In Nova Scotia he would be exposed to rival attempts at settlement, and at the same time he could not see the possibility of obtaining Indian allies. In Canada the full control would remain with those who first made a settlement on the Saint Lawrence,

and Champlain counted the native tribes as powerful instruments in carrying out his policy. We have the key here to his conduct in assisting the Hurons in their wars. . . . In 1608 Champlain started for the St. Lawrence. Pontgravé was with the expedition. A settlement was made at Quebec, as the most suitable place. Some ground was cleared, buildings were commenced, when a conspiracy was discovered. The ringleader was hanged and three of those actively implicated were sent back to France with Pontgravé on his return in the autumn. Matters now went peaceably on. The summer was passed in completing the 'Abitation de Quebec,' of which Champlain has left us a sketch. It was situated in the present Lower Town on the river bank, in the corner where Notre Dame Street meets Sous le Fort Street. It was here Champlain laid the foundation for the future city. Winter came, the scurvy carrying off twenty of their number. . . . In June, Des Marais, Pontgravé's son-in-law, arrived, telling him that Pontgravé was at Tadousac. Champlain proceeded thither. The question had then to be discussed, what policy should be followed with the Indians? Should they be aided by what force Champlain could command, in the expedition which they had resolved to make against the Iroquois? It is plain that no advance in discovery could have been made without their assistance, and that this assistance could only have been obtained by rendering them service. . . . With the view of making explorations beyond the points then known by Europeans, Champlain in the middle of June ascended the St. Lawrence. About a league and a half west of the river Saint Anne, they were joined by a party of Algonquins who were to form a part of the expedition. Champlain tells us of their mortal feud with the Iroquois, a proof that in no way he created it. They all returned to Quebec, where there was festivity for some days. It was brought to a close and the war parties started; Champlain with nine men, Des Marais and a pilot, joined it [them?]. With his Indian allies he ascended the Richelieu and reached Lake Champlain, the first white man who saw its waters: subsequently for 165 years to be the scene of contest between the Indian and white man, the French and English, the revolted Colonies and the Mother Country. . . . The advance up Lake Champlain was made only by night. They reached Crown Point. They were then in the Iroquois domain; very shortly they knew of the presence of the enemy." On the 30th of July the invaders fought a battle with the Iroquois, who fled in terror before the arquebuse of Champlain, which killed two of their chiefs and wounded a third. Soon after his return to Quebec from this expedition—the beginning of the long war of the French with the Iroquois—Champlain was summoned to France. The patent of De Monts had been revoked and he could not obtain its renewal. "Nevertheless, De Monts, with his associates decided to continue their efforts, and, in March, 1610, Champlain again started for Canada." After reaching Quebec his stay this time was short. He joined his Indian allies in another expedition of war, and helped them to win another victory over the Iroquois, at a place on the Richelieu, one league above Sorel. On returning he got news of the assassination of

Henry IV. and started at once for France. The death of Henry IV. exercised great influence on the fortunes of Canada. He had personally taken interest in Champlain's voyages, and his energetic mind was well qualified to direct the fortunes of a growing colony. Louis XIII. was not then ten years old. Mary of Medecis was under the control of her favourites, Leonora Galigai, and her husband, Concino Concini. Richelieu had not then appeared on the scene. . . . The Jesuits were becoming all-powerful at Court. . . . France was unsettled and disordered. The Protestants, not without provocation, were acting with passion and without judgment. The assassination of the King had alarmed them. The whole kingdom was threatened with convulsion and anarchy, and Canada was to pass out of the notice of those in power: and, in the sense of giving aid, half a century was to elapse before the French Government could comprehend the duty of taking part in the defence of the country, and of protecting the persons of those living in New France. The ground was to be regarded simply as a field for the active trader, side by side with the devoted missionary. Thus the Government fell virtually under the control of the Jesuits, who, impatient of contradiction, aimed only at the establishment of their authority, which was to bring the colony to the verge of destruction." Champlain returned to his colony in the spring of 1611, facing its prospects with such courage as he found in his own stout heart.—W. Kingsford, *Hist. of Canada*, bk. 1, ch. 3-4 (v. 1).

A. D. 1610-1613.—The Acadian colony revived, but destroyed by the English of Virginia.—Port Royal was left uninhabited till 1610, when Poutrincourt returned at the instance of the king to make the new settlement a central station for the conversion of the Indians,—a work which made some Jesuit missionaries prominent in the history of the New World. His son followed in 1611, with fathers Pierre Biard, and Enemond Masse. Madame la Marquise de Guercheville, a pious Catholic, to whom De Monts had ceded his title to Acadia, and to whom afterwards the French king granted the whole territory now covered by the United States, was the chief patroness of these voyages. Desiring to make another settlement, she despatched a vessel in 1613 with two more Jesuits, father Quentin and Gilbert Du Thet, and forty-eight men under La Saussaye. "When they arrived at Port Royal, they only found five persons—fathers Biard and Masse, their servant, the apothecary Hébert, and another. All the rest were absent, either hunting or trading. They showed the Queen's letter to Hébert, who represented Biencourt in his absence, and taking the two Jesuits, with their servant and luggage aboard, again set sail. It was their intention to establish the colony at Pentagoet, which father Biard had visited the year previous, but when off Grand Manan a thick fog came on, which lasted for two days, and when it became clear, they put into a harbor on the eastern side of Mount Desert Island, in Maine. The harbor was deep, secure and commodious, and they judged this would be a favorable site for the colony, and named the place St. Sauveur. . . . La Saussaye was advised by the principal colon-

ists to erect a sufficient fortification before commencing to cultivate the soil, but he disregarded this advice, and nothing was completed in the way of defence, except the raising of a small palisaded structure, when a storm burst upon the colony, which was little expected by its founders. In 1607 a company of London merchants had founded a colony on the James River, in Virginia, where, after suffering greatly from the insalubrity of the climate and want of provisions, they had attained a considerable degree of property. In 1613 they sent a fleet of eleven vessels to fish on the coast of Acadia, convoyed by an armed vessel under the command of Captain Samuel Argal, who had been connected with the colony since 1609. Argal was one of those adventurers formed in the school of Drake, who made a trade of piracy, but confined themselves to the robbery of those who were so unfortunate as not to be their own countrymen. . . . When Argal arrived at Mount Desert, he was told by the Indians that the French were there in the harbor with a vessel. Learning that they were not very numerous, he at once resolved to attack them. All the French were ashore when Argal approached, except ten men, most of whom were unacquainted with the working of a ship. Argal attacked the French with musketry, and at the second discharge Gilbert Du Thet fell back, mortally wounded; four others were severely injured, and two young men, named Lemoine and Neveau, jumped overboard and were drowned. Having taken possession of the vessel, Argal went ashore and informed La Saussaye that the place where they were was English territory, and included in the charter of Virginia, and that they must remove; but, if they could prove to him that they were there under a commission from the crown of France, he would treat them tenderly. He then asked La Saussaye to show him his commission; but, as Argal, with unparalleled indecency, had abstracted it from his chest while the vessel was being plundered by his men, the unhappy governor was of course unable to produce it. Argal then assumed a very lofty tone. . . . When Argal arrived in Virginia, he found that his perfidious theft of the French governor's commission was likely to cause his prisoners to be treated as pirates. They were put into prison and in a fair way of being executed, in spite of Argal's remonstrances, until struck with shame and remorse, he produced the commission which he had so dishonestly filched from them, and the prisoners were set free. But the production of this document, while it saved the lives of one set of Frenchmen, brought ruin upon all the others who remained in Acadia. The Virginia colonists . . . resolved to send Argal to destroy all the French settlements in Acadia, and erase all traces of their power. . . . The only excuse offered for this piratical outrage of Argal—which was committed during a period of profound peace—was the claim which was made by England to the whole continent of North America, founded on the discoveries of the Cabots more than a century before. That claim might, perhaps, have been of some value if followed by immediate occupancy, as was the case with the Spaniards in the South, but that not having been done, and the French colony being the oldest, it was entitled to, at least, as much consideration as that of Virginia. Singularly enough, this act

produced no remonstrance from France."—J. Hamay, *Hist. of Acadia*, ch. 5.

A. D. 1611-1616.—The founding of Montreal. —Champlain's invasion of the Iroquois in New York.—"In 1611 Champlain again returned to America . . . and on the 28th of May proceeded in search of his allies, whom he was to meet by appointment. Not finding them he employed his time in choosing a site for a new settlement, higher up the river than Quebec. After a careful survey, he fixed upon an eligible spot in the vicinity of Mont Royal. His choice has been amply justified by the great prosperity to which this place, under the name of Montreal, has subsequently risen. Having cleared a considerable space of ground, he fenced it in by an earthen ditch and planted grain in the enclosure. At length, on the 13th of June, three weeks after the time appointed, a party of his Indian friends appeared. . . . As an evidence of their good will they imparted much valuable information respecting the geography of this continent, with which they seemed to be tolerably well acquainted as far south as the Gulf of Mexico. They readily agreed to his proposal to return shortly with 40 or 50 of his people to prosecute discoveries and form settlements in their country if he thought proper. They even made a request that a French youth should accompany them, and make observations upon their territory and tribe. Champlain again returned to France, with a view of making arrangements for more extensive operations; but this object was now of very difficult accomplishment. De Monts, who had been appointed governor of Saintonge, was no longer inclined to take the lead in measures of this kind, and excused himself from going to court by stating the urgency of his own affairs. He therefore committed the whole conduct of the settlement to Champlain, advising him, at the same time, to seek some powerful protector, whose influence would overcome any opposition which might be made to his plans. The latter was so fortunate as to win over, almost immediately, the Count de Soissons to aid him in his designs. This nobleman obtained the title of lieutenant-general of New France; and, by a formal agreement, transferred to Champlain all the functions of that high office. The Count died soon after, but Champlain found a still more influential friend in the Prince of Conde, who succeeded to all the privileges of the deceased, and transferred them to him in a manner equally ample. These privileges, including a monopoly of the fur trade, gave great dissatisfaction to the merchants; but Champlain endeavored to remove their principal objection, by permitting as many of them as chose to accompany him to the New World, and to engage in this traffic. In consequence of this permission, three merchants from Normandy, one from Rochelle, and one from St. Malo, accompanied him. They were allowed the privileges of a free trade on contributing six men each to assist in projects of discovery, and giving one-twentieth of their profits towards defraying the expenses of the settlement. In the beginning of March [1613] the expedition sailed from Harfleur, and on the 7th of May arrived at Quebec. Champlain now engaged in a new project." His new project was a voyage of exploration up the Ottawa River, which he accomplished with great

difficulty, through the aid of his Indian allies, but from which he returned disappointed in the hope he had entertained of discovering the northern sea and a way to India thereby. The next summer found Champlain again in France, where "matters still continued favorable for the colony. The Prince of Conde retained his influence at Court, and no difficulty was consequently found in equipping a small fleet, to carry out settlers and supplies from Rouen and St. Malo. On board of this fleet came four fathers of the order of the Recollets, whose benevolence induced them to desire the conversion of the Indians to Christianity. These were the first priests who settled in Canada. Champlain arrived safely, on the 25th of May, at Tadoussac, whence he immediately pushed forward to Quebec, and subsequently to the usual place of Indian rendezvous, at the Lachine Rapids. Here he found his Algonquin and Huron allies full of projects of war against the Iroquois, whom they now proposed to assail among the lakes to the westward, with a force of 2,000 fighting men."—J. MacMullen, *Hist. of Canada*, ch. 1.—"Champlain found the Hurons and their allies preparing for an expedition against their ancient enemies, the Iroquois. Anxious to reconnoitre the hostile territory, and also to secure the friendship of the Canadian savages, the gallant Frenchman resolved to accompany their warriors. After visiting the tribes at the head waters of the Ottawa, and discovering Lake Huron [at Georgian Bay], which, because of its 'great extent,' he named 'La Mer Douce,' Champlain, attended by an armed party of ten Frenchmen, accordingly set out toward the south, with his Indian allies. Enraptured with the 'very beautiful and pleasant country' through which they passed, and amusing themselves with fishing and hunting, as they descended the chain of 'Shallow Lakes,' which discharge their waters through the River Trent, the expedition reached the banks of Lake Ontario. Crossing the end of the lake, 'at the outlet of the great River of Saint Lawrence,' and passing by many beautiful islands on the way, the invaders followed the eastern shore of Ontario for fourteen leagues, toward their enemy's country. . . . Leaving the shores of the lake, the invaders continued their route inland to the southward, for 25 or 30 leagues." After a journey of five days, "the expedition arrived before the fortified village of the Iroquois, on the northern bank of the Onondaga Lake, near the site of the present town of Liverpool. The village was inclosed by four rows of palisades, made of large pieces of timber closely interlaced. The stockade was 30 feet high, with galleries running around like a parapet." In the siege which followed the Iroquois were dismayed by the firearms of Champlain and his men, and by the operation of a moveable tower with which he advanced to their stockade and set fire to it. But his Indian allies proved incapable of acting in any rational or efficient way, or to submit to the least direction, and the attack was abortive. After a few days the invading force retreated, carrying Champlain with them and forcing him to remain in the Huron country until the following spring (1616), when he made his way back to Montreal.—J. R. Brodhead, *Hist. of the State of New York*, v. 1, ch. 3.—The above account, which fixes on Onondaga Lake the site of the Iroquois fort to which Champlain penetrated, does not

agree with the views of Parkman, O'Callaghan, and some other historians, who trace Champlain's route farther westward in New York; but it accepts the conclusions reached by O. H. Marshall, J. V. H. Clark, and other careful students of the question. Mr. MacMullen, in the "History of Canada" quoted above, finds an extraordinary route for the expedition via Lakes Huron and St. Clair, to the vicinity of Detroit.—J. V. H. Clark, *Hist. of Onondaga*.

A. D. 1616-1628.—Champlain and the fur traders.—The first Jesuit mission.—Creation of the Company of the Hundred Associates.—“The exploration in the distant Indian territories which we have just described in the preceding pages was the last made by Champlain. He had plans for the survey of other regions yet unexplored, but the favorable opportunity did not occur. Henceforth he directed his attention more exclusively than he had hitherto done to the enlargement and strengthening of his colonial plantation, without such success, we regret to say, as his zeal, devotion and labors fitly deserved. The obstacles that lay in his way were insurmountable. The establishment or factory, we can hardly call it a plantation, at Quebec, was the creature of a company of merchants. They had invested considerable sums in shipping, buildings, and in the employment of men, in order to carry on a trade in furs and peltry with the Indians, and they naturally desired remunerative returns. This was the limit of their purpose in making the investment. . . . Under these circumstances, Champlain struggled on for years against a current which he could barely direct, but by no means control. . . . He succeeded at length in extorting from the company a promise to enlarge the establishment to 80 persons, with suitable equipments, farming implements, all kinds of seeds, and domestic animals, including cattle and sheep. But when the time came, this promise was not fulfilled. Differences, bickerings and feuds sprang up in the company. Some wanted one thing, and some wanted another. The Catholics wished to extend the faith of their church into the wilds of Canada, while the Huguenots desired to prevent it, or at least not to promote it by their own contributions. The company, inspired by avarice and a desire to restrict the establishment to a mere trading post, raised an issue to discredit Champlain. It was gravely proposed that he should devote himself exclusively to exploration, and that the government and trade should henceforth be under the direction and control of Pont Gravé. But Champlain . . . obtained a decree ordering that he should have the command at Quebec, and at all other settlements in New France, and that the company should abstain from any interference with him in the discharge of the duties of his office.” In 1620 the Prince de Condé sold his viceroyalty to the Duke de Montmorency, then high-admiral of France, who commissioned Champlain anew, as his lieutenant, and supported him vigorously. Champlain had made voyages to Canada in 1617 and 1618, and now, in 1620, he proceeded to his post again. At Quebec he began immediately the building of a fort, which he called fort St. Louis.

The company of associates opposed this work, and so provoked the Duke of Montmorency by their conduct that “in the spring of 1621, he summarily dissolved the association of merchants, which he denominated the ‘Company of Rouen and St. Malo,’ and established another in its place. He continued Champlain in the office of lieutenant, but committed all matters relating to trade to William de Caen, a merchant of high standing, and to Émeric de Caen, the nephew of the former, a good naval captain.” In the course of the following year, however, the new and the old trading companies were consolidated in one. “Champlain remained at Quebec four years before again returning to France. His time was divided between many local enterprises of great importance. His special attention was given to advancing the work on the unfinished fort, in order to provide against incursions of the hostile Iroquois, who at one time approached the very walls of Quebec, and attacked unsuccessfully the guarded house of the Recollets on the St. Charles.” In the summer of 1624 Champlain returned again to France, where the Duke de Montmorency was just selling, or had sold, his viceroyalty to the Duke de Ventadour. “This nobleman, of a deeply religious cast of mind, had taken holy orders, and his chief purpose in obtaining the viceroyalty was to encourage the planting of Catholic missions in New France. As his spiritual directors were Jesuits, he naturally committed the work to them. Three fathers and two lay brothers of this order were sent to Canada in 1625, and others subsequently joined them. . . . Champlain was reappointed lieutenant, but remained in France two years.” Returning to Quebec in July, 1626, he found, as usual, that everything but trade had suffered neglect in his absence. Nor was he able, during the following year, to improve much the prospects of the colony. As a colony, “it had never prospered. The average number composing it had not exceeded about 50 persons. At this time it may have been somewhat more, but did not reach a hundred. A single family only appears to have subsisted by the cultivation of the soil. The rest were sustained by supplies sent from France. . . . The company as a mere trading association, was doubtless successful. . . . The large dividends that they were able to make, intimated by Champlain to be not far from forty per centum yearly, were, of course, highly satisfactory to the company. . . . Nearly twenty years had elapsed since the founding of Quebec, and it still possessed only the character of a trading post, and not that of a colonial plantation. This progress was satisfactory neither to Champlain, to the Viceroy, nor to the Council of State. In the view of these several interested parties, the time had come for a radical change in the organization of the company. Cardinal de Richelieu had risen by his extraordinary ability as a statesman, a short time anterior to this, into supreme authority. . . . He lost no time in organizing measures. . . . The company of merchants whose finances had been so skilfully managed by the Caens was by him at once dissolved. A new one was formed, denominated ‘La Compagnie de la Nouvelle-France,’ consisting of a hundred or more members, and commonly known as the Company of the Hundred Associates. It was under the control and management of Richelieu himself.

Its members were largely gentlemen in official positions. . . . Its authority extended over the whole domain of New France and Florida. . . . It entered into an obligation . . . within the space of 15 years to transport 4,000 colonists to New France. . . . The organization of the company . . . was ratified by the Council of State on the 6th of May, 1628."—E. F. Slafter, *Memoir of Champlain* (*Voyages: Prince Soc.*, 1880, v. 1), ch. 9.

A. D. 1628-1635.—Conquest and brief occupation by the English.—Restoration to France.

—"The first care of the new Company was to succor Quebec, whose inmates were on the verge of starvation. Four armed vessels, with a fleet of transports commanded by Roquemont, one of the associates, sailed from Dieppe with colonists and supplies in April, 1628; but nearly at the same time another squadron, destined also for Quebec, was sailing from an English port. War had at length broken out in France. The Huguenot revolt had come to a head. Rochelle was in arms against the king; and Richelieu, with his royal ward, was beleaguering it with the whole strength of the kingdom. Charles I. of England, urged by the heated passions of Buckingham, had declared himself for the rebels, and sent a fleet to their aid. . . . The attempts of Sir William Alexander to colonize Acadia had of late turned attention in England towards the New World; and, on the breaking out of the war, an expedition was set on foot, under the auspices of that singular personage, to seize on the French possessions in North America. It was a private enterprise, undertaken by London merchants, prominent among whom was Gervase Kirke, an Englishman of Derbyshire, who had long lived at Dieppe, and had there married a Frenchwoman. Gervase Kirke and his associates fitted out three small armed ships, commanded respectively by his sons David, Lewis and Thomas. Letters of marque were obtained from the king, and the adventurers were authorized to drive out the French from Acadia and Canada. Many Huguenot refugees were among the crews. Having been expelled from New France as settlers, the persecuted sect were returning as enemies." The Kirkes reached the St. Lawrence in advance of Roquemont's supply ships, intercepted the latter and captured or sank the whole. They then sailed back to England with their spoils, and it was not until the following summer that they returned to complete their conquest. Meantime, the small garrison and population at Quebec were reduced to starvation, and were subsisting on acorns and roots when, in July 1629, Admiral David Kirke, with his three ships, appeared before the place. Champlain could do nothing but arrange a dignified surrender. For three years following, Quebec and New France remained under the control of the English. They were then restored, under a treaty stipulation to France. "It long remained a mystery why Charles consented to a stipulation which pledged him to resign so important a conquest. The mystery is explained by the recent discovery of a letter from the king to Sir Isaac Wake, his ambassador at Paris. The promised dowry of Queen Henrietta Maria, amounting to 800,000 crowns, had been but half paid by the French government, and Charles, then at issue with his

Parliament and in desperate need of money, instructs his ambassador that, when he receives the balance due, and not before, he is to give up to the French both Quebec and Port Royal, which had also been captured by Kirke. The letter was accompanied by 'solemn instruments under our hand and seal' to make good the transfer on fulfilment of the condition. It was for a sum equal to about \$240,000 that Charles entailed on Great Britain and her colonies a century of bloody wars. The Kirkes and their associates, who had made the conquest at their own cost, under the royal authority, were never reimbursed, though David Kirke received the honor of knighthood, which cost the king nothing,"—and also the grant of Newfoundland. On the 5th of July, 1632, Quebec was delivered up by Thomas Kirke to Émery de Caen, commissioned by the French king to reclaim the place. The latter held command for one year, with a monopoly of the fur trade; then Champlain resumed the government, on behalf of the Hundred Associates, continuing in it until his death, which occurred on Christmas Day, 1635.—F. Parkman, *Pioneers of France in the New World: Champlain*, ch. 16-17.

A. D. 1634-1652.—The Jesuit missions and their fate.—The first of the Jesuit missionaries came to Quebec in 1625, as stated above, but it was not until nearly seven years later that they made their way into the heart of the Indian country and began there their devoted work. "The Father Superior of the Mission was Paul le Jeune, a man devoted in every fibre of mind and heart to the work on which he had come. He utterly scorned difficulty and pain. He had received the order to depart for Canada 'with inexpressible joy at the prospect of a living or dying martyrdom.' Among his companions was Jean de Brébœuf, a man noble in birth and aspect, of strong intellect and will, of zeal which knew no limit, and recognized no obstacle in the path of duty. . . . Far in the west, beside a great lake of which the Jesuits had vaguely heard, dwelt the Hurons, a powerful nation with many kindred tribes over which they exercised influence. The Jesuits resolved to found a mission among the Hurons. Once in every year a fleet of canoes came down the great river, bearing six or seven hundred Huron warriors, who visited Quebec to dispose of their furs, to gamble and to steal. Brébœuf and two companions took passage [1634] with the returning fleet, and set out for the dreary scene of their new apostolate. . . . The Hurons received with hospitable welcome the black-robed strangers. The priests were able to repay the kindness with services of high value. They taught more effective methods of fortifying the town in which they lived. They promised the help of a few French musketeers against an impending attack by the Iroquois. They cured diseases; they bound up wounds. They gave simple instruction to the young, and gained the hearts of their pupils by gifts of beads and raisins. The elders of the people came to have the faith explained to them: they readily owned that it was a good faith for the French, but they could

not be persuaded that it was suitable for the red man. The fathers laboured in hope and the savages learned to love them. . . . Some of their methods of conversion were exceedingly rude. A letter from Father Garnier has been preserved in which pictures are ordered from France for the spiritual improvement of the Indians. Many representations of souls in perdition are required, with appropriate accompaniment of flames, and triumphant demons tearing them with pincers. One picture of saved souls would suffice, and 'a picture of Christ without a beard.' They were consumed by a zeal for the baptism of little children. At the outset the Indians welcomed this ceremonial, believing that it was a charm to avert sickness and death. But when epidemics wasted them they charged the calamity against the mysterious operations of the fathers, and refused now to permit baptism. The fathers recognized the hand of Satan in this prohibition, and refused to submit to it. They baptized by stealth. . . . In time, the patient, self-denying labour of the fathers might have won those discouraging savages to the cross; but a fatal interruption was at hand. A powerful and relentless enemy, bent on extermination, was about to sweep over the Huron territory, involving the savages and their teachers in one common ruin. Thirty-two years had passed since those illjudged expeditions in which Champlain had given help to the Hurons against the Iroquois. The unforgiving savages had never forgotten the wrong. . . . The Iroquois [1648-1649] attacked in overwhelming force the towns of their Huron enemies; forced the inadequate defences; burned the palisades and wooden huts; slaughtered with indescribable tortures the wretched inhabitants. In one of these towns they found Brébœuf and one of his companions. They bound the illfated missionaries to stakes; they hung around their necks collars of red-hot iron; they poured boiling water on their heads; they cut stripes of flesh from their quivering limbs and ate them in their sight. To the last Brébœuf cheered with hopes of heaven the native converts who shared his agony. And thus was gained the crown of martyrdom for which in the fervour of their enthusiasm, these good men had long yearned. In a few years the Huron nation was extinct; famine and small-pox swept off those whom the Iroquois spared. The Huron mission was closed by the extirpation of the race for whom it was founded. Many of the missionaries perished; some returned to France. Their labour seemed to have been in vain; their years of toil and suffering left no trace."—R. Mackenzie, *America: A History*, pp. 326-332.—"With the fall of the Hurons, fell the best hope of the Canadian mission. They, and the stable and populous communities around them, had been the rude material from which the Jesuit would have formed his Christian empire in the wilderness; but, one by one, these kindred peoples were uprooted and swept away, while the neighboring Algonquins, to whom they had been a bulwark, were involved with them in a common ruin. . . . In a measure, the occupation of the Jesuits was gone. Some of them went home, 'well resolved,' writes the Father Superior, 'to return to the combat at the first sound of the trumpet'; while of those who remained, about twenty in number, several soon fell victims to famine, hardship and the Iroquois. A few

years more, and Canada ceased to be a mission. political and commercial interests gradually became ascendant, and the story of Jesuit propaganda was interwoven with her civil and military annals."—F. Parkman, *The Jesuits in N. Am.*, ch. 34.

A. D. 1634-1673.—Nicolet.—Marquette.—Joliet.—Pioneer exploration in the West and discovery of the Mississippi.—When Champlain gave up his work, the map of New France was blank beyond Lake Ontario and Georgian Bay. The first of the French explorers who widened it far westward was a Norman named Jean Nicolet, who came to America in 1618, and who was trained for many years in Champlain's service. "After dwelling some time among the Nipissings, he visited the Far West; seemingly between the years 1634 and 1640. In a birch-bark canoe, the brave Norman voyageur crossed or coasted Lake Huron, entered the St. Mary's River, and, first of white men, stood at the strait now called Sault Ste Marie. He does not seem to have known of Lake Superior, but returned down the St. Mary's River, passed from Lake Huron through the western detour to Michilimackinac, and entered another fresh-water sea, Michigannon or Michigan, also afterwards known as the Lake of the Illinois, Lake St. Joseph, Lake Dauphin, or even Algonquin Lake. Here he visited the Menomonee tribe of Indians, and after them the Winnibagoes. . . . The fierce wrath of the Iroquois had driven numbers of the Hurons, Ottawas, and several minor Algonquin tribes westward. The Iroquois, like a wedge, had split the northern tribes into east and west. Sault Ste Marie became a central point for the refugees. . . . Another gathering place for the fugitives had been found very near the south-west corner of this great lake. This was La Pointe, one of the Apostle Islands, near the present town of Ashland in Wisconsin. The Jesuits took up these two points as mission centres. . . . In 1669 the Fathers Dablon and Marquette, with their men, had erected a palisaded fort, enclosing a chapel and house, at Sault Ste Marie. In the same year Father Allouez had begun a mission at Green Bay. In 1670 an intrepid explorer, St. Luson, under orders from Intendant Talon, came west searching for copper-mines. He was accompanied by the afterwards well-known Joliet. When this party arrived at Sault Ste Marie, the Indians were gathered together in great numbers, and with imposing ceremonies St. Luson took possession of 'Sainte Marie du Saut, as also of Lakes Huron and Superior, the island of Manetoulin, and all countries, rivers, lakes, and streams contiguous and adjacent thereunto.' . . . It was undoubtedly the pressing desire of the Jesuit fathers to visit the country of the Illinois and their great river that led to the discovery of the 'Father of Waters.' Father Allouez indeed had already ascended the Fox River from Lake Michigan, and seen the marshy lake which is the head of a tributary of the Mississippi. At last on June 4th, 1672, the French minister, Colbert, wrote to Talon: 'As after the increase of the colony there is nothing more important for the colony than the discovery

of a passage to the South Sea, his Majesty wishes you to give it your attention.' This message to the Intendant came as he was leaving for France, and he recommended the scheme and the explorer he had in view for carrying it out to the notice of the Governor, Frontenac, who had just arrived. Governor Frontenac approved and the explorer started. The man chosen for the enterprise was Louis Joliet, who had already been at Sault Ste Marie. He was of humble birth, and was a native of New France. . . . The French Canadian explorer was acceptable to the missionaries, and immediately journeyed west to meet Marquette, who was to accompany him. . . . M. Joliet met the priest Marquette at St. Ignace Mission, Michilimackinac. Jacques Marquette, of whom we have already heard, was born in 1637 at Laon, Champagne, in France. He sprang of an ancient and distinguished family. . . . On May 17th, 1673, with deepest religious emotion, the trader and missionary launched forth on Lake Michigan their two canoes, containing seven Frenchmen in all, to make the greatest discovery of the time. They hastened to Green Bay, followed the course of Father Allouez up the Fox River, and reached the tribe of the Mascoutins or Fire Nation on this river. These were new Indians to the explorers. They were peaceful, and helped the voyagers on their way. With guides furnished, the two canoes were transported for 2,700 paces, and the head waters of the Wisconsin were reached. After an easy descent of 30 or 40 leagues, on June 17th, 1673, the feat was accomplished, the Mississippi was discovered by white men, and the canoes shot out upon its surface in latitude 43°. Sailing down the great river for a month, the party reached the village of Akansea, on the Arkansas River, in latitude 34°, and on July 17th began their return journey. It is but just to say that some of the Recollet fathers, between whom and the Jesuits jealousy existed, have disputed the fact of Joliet and Marquette ever reaching this point. The evidence here seems entirely in favour of the explorers. On their return journey the party turned from the Mississippi into a tributary river in latitude 38°. This was the Illinois. Ascending this, the Indian town of Kaskaskia was reached, and here for a time Father Marquette remained. Joliet and his party passed on," arriving at Montreal in due time, but losing all their papers in the rapids of the St. Lawrence. Father Marquette established a mission among the Illinois Indians, but his labors were cut short. He died while on a journey to Green Bay, May 18, 1675. "High encomiums of Father Marquette fill—and deservedly so—the 'Jesuit Relations.' We have his autograph map of the Mississippi. This great stream he desired to call 'Conception River,' but the name, like those of 'Colbert' and 'Buade' [the family name of Count Frontenac], which were both bestowed upon it, have failed to take the place of the musical Indian name."—G. Bryce, *Short Hist. of the Canadian People*, ch. 5, sect. 3.

A. D. 1637-1657.—The Sulpician settlement of Montreal and religious activity at Quebec.

—Champlain was succeeded as governor of New France by M. de Châteaufort, of whose brief administration little is known, and the latter was followed by M. de Montmagny, out of the translation of whose name the Indians formed the title Onontio, signifying "Great Mountain," which they afterwards applied to all the French governors. Montmagny entered with zeal into the plans of Champlain, "but difficulties accumulated on all sides. Men and money were wanting, trade languished, and the Associated Company in France were daily becoming indifferent to the success of the colony. Some few merchants and inhabitants of the outposts, indeed, were enriched by the profitable dealings of the fur-trade, but their suddenly-acquired wealth excited the jealousy rather than increased the general prosperity of the settlers. The work of religious institutions was alone pursued with vigor and success in those times of failure and discouragement. At Sillery, one league from Quebec, an establishment was founded for the instruction of the savages and the diffusion of Christian light [1637]. The Hotel Dieu owed its existence to the Duchesse d'Aiguillon two years afterward, and the convent of the Ursulines was founded by the pious and high-born Madame de la Peltrie. The partial success and subsequent failure of Champlain and his Indian allies in their encounters with the Iroquois had emboldened these brave and politic savages. They now captured several canoes belonging to the Hurons, laden with furs, which that friendly people were conveying to Quebec. Montmagny's military force was too small to allow of his avenging this insult; he, however, zealously promoted an enterprise to build a fort and effect a settlement on the island of Montreal, which he fondly hoped would curb the audacity of his savage foes. The Associated Company would render no aid whatever to this important plan, but the religious zeal of the Abbé Olivier overcame all difficulties. He obtained a grant of Montreal from the king, and dispatched the Sieur de Maisonneuve and others to take possession. On the 17th of May, 1641, the place destined for the settlement was consecrated by the superior of the Jesuits. At the same time the governor erected a fort at the entrance of the River Richelieu," which so far checked the Iroquois that they entered into a treaty of peace and respected it for a brief period.—E. Warburton, *The Conquest of Canada*, v. 1, ch. 12.—The settlement of Montreal was undertaken by an association of thirty-five rich and influential persons in France, among whom was the Duke de Liancourt de la Roche Guyon. "This company obtained a concession of the island in 1640, and a member of the association arrived at Quebec from France with several immigrating families, some soldiers, and an armament valued at 25,000 piastres." In 1642 "a reinforcement of colonists arrived, led by M. d'Ailleboust de Musseau. During the following year, a second party came. At this time the European population resident in Canada did not exceed 200 souls. The immigrants who now entered it had been selected with the utmost care."—A. Bell, *Hist. of Canada*, bk. 3, ch. 1 (v. 1).—In 1657 the seigniority of Montreal was ceded to the Seminary of St. Sulpice in Paris, where the reins of its government

were held until 1692.—Father Charlevoix, *Hist. of New France*, trans. by Shea, v. 3, p. 23.

A. D. 1640-1700.—The wars with the Iroquois.—“From about the year 1640 to the year 1700, a constant warfare was maintained between the Iroquois and the French, interrupted occasionally by negotiations and brief intervals of peace. As the former possessed both banks of the St. Lawrence, and the circuits of lakes Erie and Ontario, they intercepted the fur trade, which the French were anxious to maintain with the western nations. . . . The war parties of the League ranged through these territories so constantly that it was impossible for the French to pass in safety through the lakes, or even up the St. Lawrence above Montreal. . . . So great was the fear of these sudden attacks, that both the traders and the missionaries were obliged to ascend the Ottawa river to near its source, and from thence to cross over to the Sault St. Marie, and the shores of Lake Superior. . . . To retaliate for these frequent inroads, and to prevent their recurrence, the country of the Iroquois was often invaded by the French. . . . In 1665, M. Courcelles, governor of Canada, led a strong party into the country of the Mohawks; but the hardships they encountered rendered it necessary for them to return without accomplishing their purpose. The next year, M. de Tracy, Viceroy of New France, with 1,200 French and 600 Indians, renewed the invasion with better success. He captured Te-ä-ton-ta-lô-ga, one of the principal villages of the Mohawks, situated at the mouth of the Schoharie Creek; but after destroying the town, and the stores of corn, which they found in caches, they were obliged to retire without meeting an opposing force. Again, in 1684, M. De La Barre, then governor of Canada, entered the country of the Onondagas, with about 1,800 men. Having reached Hungry Bay, on the east shore of lake Ontario, a conference was had with a delegation of Iroquois chiefs. . . . A species of armistice was finally agreed upon, and thus the expedition ended. A more successful enterprise was projected and carried into execution in 1687 by M. De Nonville, then governor of Canada. Having raised a force of 2,000 French and 600 Indians, he embarked them in a fleet of 200 bateau, and as many birch bark canoes. After coasting lake Ontario from Kingston to Irondequoit bay, in the territory of the Senecas, he landed at the head of this bay, and found himself within a few miles of the principal villages of the Senecas, which were then in the counties of Ontario and Monroe.” After one battle with about 500 of the Senecas, the latter retreated into the interior, and the French destroyed four of their villages, together with the surrounding fields of growing corn. “To retaliate for this invasion, a formidable party of the Iroquois, in the fall of the same year, made a sudden descent upon Fort Chambly, on the Sorel River, near Montreal. Unable to capture the fort, which was resolutely defended by the garrison, they ravaged the settlements adjacent, and returned with a number of captives. About the same time, a party of 800 attacked Frontenac, on the site of Kingston, and destroyed and laid waste the plantations and establishments of the French without the fortification. In July of the ensuing year the French were made to feel

still more sensibly the power of their revenge. A band of 1,200 warriors, animated with the fiercest resentment, made a descent upon the island of Montreal. . . . All that were without the fortifications fell under the rifle or the relentless tomahawk. Their houses were burned, their plantations ravaged, and the whole island covered with desolation. About 1,000 of the French, according to some writers, perished in this invasion, or were carried into captivity. . . . Overwhelmed by this sudden disaster, the French destroyed their forts at Niagara and Frontenac, and thus yielded the whole country west of Montreal to the possession of the Iroquois. At this critical period Count Frontenac again became governor of Canada, and during the short residue of his life devoted himself, with untiring energy, to restore its declining prosperity.”—L. H. Morgan, *League of the Iroquois*, bk. 1, ch. 1.

A. D. 1660-1688.—French encroachments and English concessions in Newfoundland. See NEWFOUNDLAND: A. D. 1660-1688.

A. D. 1663-1674.—Erected by Colbert into a Royal Province.—Brief career of the French West India Company.—“In 1663 the proceedings of the company [of the hundred associates] became so obnoxious that the king of France decided upon the immediate resumption of his rights, and the erecting of Canada into a royal government: Monsieur de Mézy was appointed governor, and proceeded from France to Quebec with 400 regular troops, and 100 families as settlers, with cattle, horses and implements of agriculture. Under the royal jurisdiction, the governor, a king’s commissioner, an apostolical vicar, and four other gentlemen, were formed into a sovereign council, to whom were confided the powers of cognizance in all causes, civil and criminal, to judge in the last resort according to the laws and ordinances of France, and the practice of the Parliament of Paris, reserving the general legislative powers of the Crown, to be applied according to circumstances. This Council was further invested with the regulation of commerce, the expenditure of the public monies, and the establishment of inferior courts at Three Rivers and Montreal. This change of Canada from an ecclesiastical mission to a secular government was owing to the great Colbert, who was animated by the example of Great Britain, to improve the navigation and commerce of his country by colonial establishments. The enlightened policy of this renowned financial minister of Louis XIV. was followed by the success which it deserved. To a regulated civil government was added increased military protection against the Iroquois Indians; the emigration of French settlers to New France was promoted by every possible means, and a martial spirit was imparted to the population, by the location in the colony of the disbanded soldiers of the Carignan regiment . . . and other troops, whose officers became the principal Seigneurs of the colony, on condition of making cessions of land under the feudal tenure, as it still exists, to the soldiers and other inhabitants.” The ambitious projects of Louis XIV. soon led, however, to a new measure

which proved less satisfactory in its working. "The French West India Company was remodelled [1664], and Canada added to their possessions, subordinate to the crown of France, with powers controlled by his Majesty's governors and Intendants in the different colonies." The domain of the company embraced all the possessions of France in the New World and its islands and on the African coast. "The company was to enjoy a monopoly of the territories and the trade of the colonies thus conceded for 40 years; it was not only to enjoy the exclusive navigation, but his Majesty conferred a bounty of 30 livres on every ton of goods exported to France. . . . The company was not only endowed as Seigneur with all unconceded lands, but invested with the right of extinguishing the titles of seigniories granted or sold by previous companies, on condition of reimbursing the grantees and purchasers for their costs and improvements." The West India Company's management soon showed evil effects, and came to an end after ten years of unsatisfactory trial. "Monsieur De Talon, the Intendant, a man of profound views, . . . perceived that it was the natural interest of the Company to discourage colonization. He represented to the minister Colbert the absolute necessity of the total resumption of the rights of the crown; drew his attention to the means of obtaining abundance of warlike instruments and naval stores within the colony . . . and, in fact, at last prevailed; so that, in 1674, the king of France resumed his rights to all the territories conceded to the West India Company, assumed their debts and the current value of their stock, and appointed a governor, council and judges for the direction of the Canadian colonies. . . . From this period (1674), when the population, embracing converted Indians, did not exceed 8,000, the French settlement in Canada rapidly progressed, and as it rose in power, and assumed offensive operations on the New England frontier, the jealousy of the British colonies became roused, and both parties, aided alternately by the Indians, carried on a destructive and harassing border warfare."—R. M. Martin, *Hist. of Upper and Lower Canada*, ch. 1.

ALSO IN: A. Bell, *Hist. of Canada*, bk. 3, ch. 3 (v. 1).—F. Parkman, *The Old Regime in Canada*, ch. 10-17.

A. D. 1669-1687.—La Salle and the acquisition of Louisiana.—"Second only to Champlain among the heroes of Canadian history stands Robert Cavelier de la Salle—a man of iron if ever there was one—a man austere and cold in manner, and endowed with such indomitable pluck and perseverance as have never been surpassed in this world. He did more than any other man to extend the dominion of France in the New World. As Champlain had founded the colony of Canada and opened the way to the great lakes, so La Salle completed the discovery of the Mississippi, and added to the French possessions the vast province of Louisiana. . . . In 1669 La Salle made his first journey to the west, hoping to find a northwest passage to China, but very little is known about this expedition, except that the Ohio River was discovered, and perhaps also the Illinois. La Salle's feudal domain of St. Sulpice, some eight miles from Montreal, bears to-day the name of La Chine, or China, which is said to have been applied to it in derision of this fruitless expedition. In 1673 the priest

Marquette and the fur-trader Joliet actually reached the Mississippi by way of the Wisconsin, and sailed down the great river as far as the mouth of the Arkansas; and now the life-work of La Salle began in earnest. He formed a grand project for exploring the Mississippi to its mouth, and determining whether it flowed into the Gulf of California or the Gulf of Mexico. The advance of Spain on the side of Mexico was to be checked forever, the English were to be confined to the east of the Alleghanies, and such military posts were to be established as would effectually confirm the authority of Louis XIV. throughout the centre of this continent. La Salle had but little ready money, and was surrounded by rivals and enemies; but he had a powerful friend in Count Frontenac, the Viceroy of Canada. . . . At length, after surmounting innumerable difficulties, a vessel [the Griffon or Griffin] was built and launched on the Niagara River [1679], a small party of 30 or 40 men were gathered together, and La Salle, having just recovered from a treacherous dose of poison, embarked on his great enterprise. His departure was clouded by the news that his impatient creditors had laid hands upon his Canadian estates; but, nothing daunted, he pushed on through Lakes Erie and Huron, and after many disasters reached the southern extremity of Lake Michigan. The vessel was now sent back, with half the party, to Niagara, carrying furs to appease the creditors and purchase additional supplies for the remainder of the journey, while La Salle with his diminished company pushed on to the Illinois, where a fort was built, and appropriately named Fort Crève-cœur, or, as we might translate it, the 'fort of the breaking heart.' Here, amid perils of famine, mutiny, and Indian attack, and exposed to death from the wintry cold, they waited until it became evident to all that their vessel must have perished. She never was heard from again, and most likely had foundered on her perilous voyage. To add to the trouble, La Salle was again poisoned; but his iron constitution, aided by some lucky antidote, again carried him safely through the ordeal, and about the 1st of March, 1680, he started on foot for Montreal. Leaving Fort Crève-cœur and its tiny garrison under command of his faithful lieutenant, Tonty, he set out with four Frenchmen and one Mohegan guide. . . . They made their way for a thousand miles across Michigan and Western Canada to Niagara, and so on to Montreal. . . . At Niagara La Salle learned that a ship from France, freighted for him with a cargo worth more than 20,000 livres, had been wrecked in the Gulf of St. Lawrence, and nothing had been saved. In spite of this dreadful blow he contrived to get together supplies and reinforcements at Montreal, and had returned to Fort Frontenac, at the lower end of Lake Ontario, when still more woful tidings were received. Here, toward the end of July, a message came from the fortress so well named Crève-cœur. The garrison had mutinied and destroyed the fort, and made their way back through Michigan." The indomitable La Salle promptly hunted down the deserters, and sent them in chains to Quebec. He then "proceeded again to the Illinois to reconstruct his fort, and rescue, if possible, his lieutenant Tonty and the few faithful followers who had survived the mutiny. This little party, abandoned in the wilderness, had found shelter among the Illinois Indians; but during the sum-

mer of 1680 the great village or town of the Illinois was destroyed by the Iroquois, and the hard-pressed Frenchmen retreated up the western shore of Lake Michigan to Green Bay. On arriving at the Illinois, therefore, La Salle found nothing but the terrible traces of fire and massacre and cannibal orgies; but he spent the following winter to good purpose in securing the friendship of the western Indians, and in making an alliance with them against the Iroquois. Then, in May, 1681, he set out again for Canada, to look after his creditors and obtain new resources. On the way home, at the outlet of Lake Michigan, he met his friend Tonty, and together they paddled their canoes a thousand miles and came to Fort Frontenac. So, after all this hardship and disaster, the work was to be begun anew; and the enemies of the great explorer were exulting in what they imagined must be his despair. But that was a word of which La Salle knew not the meaning, and now his fortunes began to change. In Mr. Parkman's words, 'Fate at length seemed tired of the conflict with so stubborn an adversary.' At this third venture everything went smoothly. The little fleet passed up the great lakes, from the outlet of Ontario to the head of Michigan, and gained the Chicago River. Crossing the narrow portage, they descended the Illinois and the Mississippi, till they came out upon the Gulf of Mexico; and on the 9th of April, 1682, the fleurs-de-lis were planted at the mouth of the great river, and all the country drained by its tributaries, from the Alleghanies to the Rocky Mountains, was formally declared to be the property of the king of France, and named after him Louisiana. Returning up the river after his triumph, La Salle founded a station or small colony on the Illinois, which he called St. Louis, and leaving Tonty in command, kept on to Canada, and crossed to France for means to circumvent his enemies and complete his far-reaching schemes. A colony was to be founded at the mouth of the Mississippi, and military stations were to connect this with the French settlements in Canada. At the French court La Salle was treated like a hero, and a fine expedition was soon fitted out, but everything was ruined by jealousy and ill-will between La Salle and the naval commander, Beaujeu. The fleet sailed beyond the mouth of the Mississippi, the colony was thrown upon the coast of Texas, some of the vessels were wrecked, and Beaujeu — though apparently without sinister design — sailed away with the rest, and two years of terrible suffering followed. At last, in March, 1687, La Salle started to find the Mississippi, hoping to ascend it to Tonty's fort on the Illinois, and obtain relief for his followers. But he had scarcely set out on this desperate enterprise when two or three mutinous wretches of his party laid an ambush for him in the forest, and shot him dead. Thus, at the early age of forty-three, perished this extraordinary man, with his life-work but half accomplished. Yet his labors had done much towards building up the imposing dominion with which New France confronted New England in the following century."

A. D. 1689-1690.—The first Inter-Colonial War (King William's War): The Schenectady Massacre.—Montreal threatened, Quebec attacked, and Port Royal taken by the English. —The Revolution of 1688, in England, which drove James II. from the throne, and called to it his daughter Mary with her able husband, William of Orange, produced war between England and France (see FRANCE: A. D. 1689-1690). The French and English colonies in America were soon involved in the contest, and so far as it troubled American history, it bears in New England annals the name of King William's War. "If the issue had depended on the condition of the colonies, it could hardly have seemed doubtful. The French census for the North American continent, in 1688, showed but 11,249 persons, scarcely a tenth part of the English population on its frontiers; about a twentieth part of English North America. West of Montreal, the principal French posts, and those but inconsiderable ones, were at Frontenac, at Mackinaw, and on the Illinois. At Niagara, there was a wavering purpose of maintaining a post, but no permanent occupation. So weak were the garrisons that English traders, with an escort of Indians, had ventured even to Mackinaw. . . . France, bounding its territory next New England by the Kennebec, claimed the whole eastern coast, Nova Scotia, Cape Breton, Newfoundland, Labrador, and Hudson's Bay; and to assert and defend this boundless region, Acadia and its dependencies counted but 900 French inhabitants. The missionaries, swaying the minds of the Abenakis, were the sole source of hope. On the declaration of war by France against England, Count Frontenac, once more governor of Canada, was charged to recover Hudson's Bay; to protect Acadia; and, by a descent from Canada, to assist a fleet from France in making conquest of New York. Of that province De Callieres was, in advance, appointed governor; the English Catholics were to be permitted to remain,—other inhabitants to be sent into Pennsylvania or New England. . . . In the east, blood was first shed at Cocheco, where, thirteen years before, an unsuspecting party of 350 Indians had been taken prisoners and shipped for Boston, to be sold into foreign slavery. The memory of the treachery was indelible, and the Indian emissaries of Castin easily excited the tribe of Penacook to revenge. On the evening of the 27th of June [1689] two squaws repaired to the house of Richard Waldron, and the octogenarian magistrate bade them lodge on the floor. At night, they rise, unbar the gates, and summon their companions," who tortured the aged Waldron until he died. "The Indians, burning his house and others that stood near it, having killed three-and-twenty, returned to the wilderness with 29 captives." In August, the stockade at Pemaquid was taken by 100 Indians from the French mission on the Penobscot. "Other inroads were made by the Penobscot and St. John Indians, so that the settlements east of Falmouth were deserted. In September, commissioners from New England held a conference with the Mohawks at Albany, soliciting an alliance. 'We have burned Montreal,' said they; 'we are the allies of the English; we will

keep the chain unbroken.' But they refused to invade the Abenakis. . . . Frontenac . . . now used every effort to win the Five Nations [the Iroquois] to neutrality or to friendship. To recover esteem in their eyes; to secure to Durantay, the commander at Mackinaw, the means of treating with the Hurons and the Ottawas; it was resolved by Frontenac to make a triple descent into the English provinces. From Montreal, a party of 110, composed of French and of the Christian Iroquois,—having De Mantet and Sainte Helene as leaders . . . —for two and twenty days waded through snows and morasses, through forests and across rivers, to Schenectady. The village had given itself calmly to slumber: through open and unguarded gates the invaders entered silently [Feb. 8, 1690], and having, just before midnight, reached its heart, the war-whoop was raised (dreadful sound to the mothers of that place and their children!), and the dwellings set on fire. Of the inhabitants, some, half clad, fled through the snows to Albany; 60 were massacred, of whom 17 were children and 10 were Africans. . . . The party from Three Rivers, led by Hertel, and consisting of but 52 persons . . . surprised the settlement at Salmon Falls, on the Piscataqua, and, after a bloody engagement, burned houses, barns, and cattle in the stalls, and took 54 prisoners, chiefly women and children. . . . Returning from this expedition, Hertel met the war party, under Portneuf, from Quebec, and, with them and a reinforcement from Castin, made a successful attack on the fort and settlement in Casco Bay. Meantime, danger taught the colonies the necessity of union, and, on the 1st day of May, 1690, New York beheld the momentous example of an American congress [see UNITED STATES OF AM.: A. D. 1690]. . . . At that congress it was resolved to attempt the conquest of Canada by marching an army, by way of Lake Champlain, against Montreal, while Massachusetts should, with a fleet, attack Quebec."—G. Bancroft, *Hist. of the U. S.*, ch. 21 (p. 3), (pt. 3, ch. 11, v. 2, in the "Author's last Revision").—Before the end of the month in which the congress was held, Port Royal and the whole of Acadia had already been conquered, having surrendered to an expedition sent out by Massachusetts, in eight small vessels, under Sir William Phips. The larger fleet (consisting of 32 ships and carrying 2,000 men) directed against Quebec, sailed in August from Nastasket, and was, likewise, commanded by Phips. "The plan of the campaign contemplated a diversion to be made by an assault on Montreal, by a force composed of English from Connecticut and New York, and of Iroquois Indians, at the same time with the attack on Quebec by the fleet. And a second expedition into Maine under Captain Church was to threaten the Eastern tribes whose incursions had, during the last summer, been so disastrous. . . . As is so apt to happen when a plan involves the simultaneous action of distant parties, the condition of success failed. The movement of Church, who had with him but 300 men, proved ineffective as to any contribution to the descent upon Canada. . . . It was not till after a voyage of more than six weeks that the fleet from Boston cast anchor within the mouth of the river St. Lawrence, and meanwhile the overland expedition against Montreal had miscarried. The commanders respectively of the Connecticut and the New York troops

had disagreed, and could not act effectively together. . . . The supply, both of boats and of provisions, was found to be insufficient. The disastrous result was that a retreat was ordered, without so much as an embarkation of the troops on Lake Champlain. Frontenac was at Montreal, whither he had gone to superintend the defence, when the intelligence, so unexpected, reached him from Quebec; and presently after came the tidings of Phips's fleet being in the St. Lawrence. Nothing could have been more opportune than this coincidence, which gave the Governor liberty to hasten down to direct his little force of 200 soldiers at the capital. The French historian says that, if he had been three days later, or if the English fleet had not been delayed by contrary winds, or had had better pilots in the river, where it was nearly a fortnight more in making its slow way, Frontenac would have come down from the upper country only to find the English commander in his citadel. As it was, there ensued a crushing mortification and sorrow to Massachusetts. New France was made much more formidable than ever."—The fleet arrived before Quebec Oct. 6, and retreated on the 11th, after considerable cannonading and an assault which the French repelled. It suffered storms and disasters on the return voyage, and lost altogether some 200 men.—J. G. Palfrey, *Hist. of New Eng.*, bk. 4, ch. 2 (p. 4).

A. D. 1692-1697.—The first Inter-Colonial War (King William's War): Abortive plans of invasion on both sides.—French recovery of Acadia.—"The defeat of the expedition of 1690 was probably attributable to the want of concert on the part of the troops from Connecticut and New York and those from Massachusetts, and the failure of the supplies which were sought from England. . . . But there was mismanagement on all hands in the conduct of the expedition; and it seems to have been predestinated that New England should not be delivered from the presence of the French at the north, until time had wrought the necessary changes which were to render the conquest of that country available for the promotion of still more important ends. Hence a new expedition, projected two years later, and resolved to be prosecuted in the following year [1693], was attended with the like circumstances of mortification and defeat. England herself participated in this enterprise, and . . . the government was informed that it had 'pleased the king, out of his great goodness and disposition for the welfare of all his subjects, to send a considerable strength of ships and men into the West Indies, and to direct Sir Francis Wheeler, the admiral, to sail to New England from the Caribbee Islands, so as to be there by the last of May or the middle of June at furthest, with a strength sufficient to overcome the enemy, if joined and seconded by the forces of New England.' . . . Unfortunately for the success of these plans, the letter, which should have reached Boston by the first of April, did not arrive until July; and the mortality which prevailed in the

fleet during its stay in the West Indies was so great that, when the commander-in-chief, Sir Francis Wheeler, anchored off Nantasket,—bringing himself the news of the projected invasion,—he had lost 1,300 out of 2,100 sailors, and 1,800 out of 2,400 soldiers. All thoughts of reducing Canada were therefore abandoned; but a plan for another year was settled with the governor, the details of which were that 2,000 land forces should be sent from England to Canseau by the first of June, to be joined by 2,000 from the colonies, and that the whole force should go up the St. Lawrence, divide and simultaneously attack Montreal and Quebec. Changes in the government of the province, however, and other causes, prevented the execution of this plan, whose success was problematical even if it had been attempted. But if the plans of the English for the reduction of Canada were doomed to disappointment, the plans of the French for the recovery of Acadia were more successful. For the first year after the conquest of that country, indeed, the French were as little concerned to regain, as the English were to retain, the possession of its territory; nor was Massachusetts able to bear the charge of a sufficient military force to keep its inhabitants in subjection, though she issued commissions to judges and other officers, and required the administration of the oath of fidelity. In the course of that year [1691], authority was given to Mr. John Nelson, of Boston, who had taken an active part in the overthrow of Andros, and who was bound thither on a trading voyage, to be commander-in-chief of Acadia; but as he neared the mouth of the St. John's, he was taken by Monsieur Villebon, who, under a commission from the French king, had touched at Port Royal, and ordered the English flag to be struck, and the French flag to be raised in its place. The next year an attempt was made to dislodge Villebon, but without success. . . . In the summer of 1696, Pemaquid was taken by the French, under D'Iberville and Castine, and the frontier of the dominion of France was extended into Maine; and by the treaty of the following year Acadia was ceded to France, and the English relinquished their claims to the country. The last year of King William's War, as it was long termed in New England, was a year of especial alarm to the province [Massachusetts] and rumors were rife that the French were on the eve of fitting out a formidable fleet for the invasion of the colonies and the conquest of New York." According to the plan of the French undertaking, a powerful fleet from France was to be joined by a force of 1,500 men, raised by Count Frontenac, in Canada, and make, first, a conquest of Boston. "When that town was taken, they were to range the coast to Piscataqua, destroying the settlements as far back into the country as possible. Should there be time for further acquisitions, they were next to go to New York, and upon its reduction the Canadian troops were to march overland to Quebec, laying waste the country as they proceeded." This project was frustrated by happenings much the same in kind as those which thwarted the designs of the English against Quebec. The fleet was delayed by contrary winds, and by certain bootless undertakings in Newfoundland, until the season was too far advanced for the enterprise contemplated. "The peace of Ryswick, which

soon followed, led to a temporary suspension of hostilities. France, anxious to secure as large a share of territory in America as possible, retained the whole coast and adjacent islands from Maine to Labrador and Hudson's Bay, with Canada, and the Valley of the Mississippi. The possessions of England were southward from the St. Croix. But the bounds between the nations were imperfectly defined, and were, for a long time, a subject of dispute and negotiation."—J. S. Barry, *Hist. of Mass.*, v. 2, ch. 4.

A. D. 1696.—Frontenac's expedition against the Iroquois.—"The war with the 'Bastonnais' or 'Bostonnais,' as he called the New Englanders, did not divert Frontenac's attention from 'the grand castigation which at last he was planning for the Iroquois. He had succeeded, in 1694, in inducing them to meet him in general council at Quebec, and had framed the conditions of a truce; but the English at Albany intrigued to prevent the fulfilment, and war was again imminent. Both sides were endeavoring to secure the alliance of the tribes of the upper lakes. These wavered, and Frontenac saw the peril and the remedy. His recourse was to attack the Iroquois in their villages at once, and conquer on the Mohawk the peace he needed at Michilimackinac. It was Frontenac's last campaign. Early in July [1696] he left Montreal with 2,200 men. He went by way of Fort Frontenac, crossed Lake Ontario, landed at Oswego, and struggled up its stream, and at last set sails to his canoes on Lake Onondaga. Then his force marched again, and Frontenac, enfeebled by his years, was borne along in an arm-chair. Eight or nine miles and a day's work brought them to the Onondaga village; but its inhabitants had burned it and fled. Vaudreuil was sent with a detachment which destroyed the town of the Oneidas. After committing all the devastation of crops that he could, in hopes that famine would help him, Frontenac began his homeward march before the English at Albany were aroused at all. The effect was what Frontenac wished. The Iroquois ceased their negotiations with the western tribes, and sued for peace."—G. Stewart, Jr., *Frontenac and his Times (Narrative and Critical Hist. of Am.*, v. 4, ch. 7).

A. D. 1698-1710.—Colonization of Louisiana and the organization of its separate government. See LOUISIANA: A. D. 1698-1712.

A. D. 1700-1735.—The spread of French occupation in the Mississippi Valley and on the Lakes.—"From the time of La Salle's visit in 1679, we can trace a continuous French occupation of Illinois. . . . He planted his citadel of St. Louis on the summit of 'Starved Rock,' proposing to make that the centre of his colony. . . . At first his colony was exceedingly feeble, but it was never discontinued. 'Joutel found a garrison at Fort St. Louis . . . in 1687, and in 1689 La Fontan bears testimony that it still continued. In 1696 a public document proves its existence; and when Tonty, in 1700, again descended the Mississippi, he was attended by twenty Canadians, residents on the Illinois.'

Even while the wars named after King William and Queen Anne were going on, the French settlements were growing in numbers and increasing in size; those wars over, they made still more rapid progress. Missions grew into settlements and parishes. Old Kaskaskia was begun in what La Salle called the 'terrestrial paradise' before the close of the seventeenth century. The Wabash Valley was occupied about 1700, the first settlers entering it by the portage leading from the Kankakee. Later the voyageurs found a shorter route to the fertile valley. . . . The French located their principal missions and posts with admirable judgment. There is not one of them in which we cannot see the wisdom of the priest, of the soldier, and the trader combined. The triple alliance worked for an immediate end, but the sites that they chose are as important to-day as they were when they chose them. . . . La Salle's colony of St. Louis was planted in one of the gardens of the world, in the midst of a numerous Indian population, on the great line of travel between Lake Michigan and the Mississippi River. Kaskaskia and the neighboring settlements held the centre of the long line extending from Canada to Louisiana. The Wabash colony commanded that valley and the Lower Ohio. Detroit was a position so important that, securely held by the French, it practically banished from the English mind for fifty years the thought of acquiring the Northwest. . . . Then how unerringly were the French guided to the carrying places between the Northern and the Southern waters, viz., Green Bay, Fox River, and the Wisconsin; the Chicago River and the Illinois; the St. Joseph and the Kankakee; the St. Joseph and the Wabash; the Maumee and the Wabash; and, later, on the eve of the war that gave New France to England, the Chautauqua and French Creek routes from Lake Erie to the Ohio. . . . In due time the French began to establish themselves on the Northern frontier of the British colonies. They built Fort Niagara in 1726, four years after the English built Fort Oswego. Following the early footsteps of Champlain, they ascended to the head of the lake that bears his name, where they fortified Crown Point in 1727, and Ticonderoga in 1731. Presque Isle, the present site of the city of Erie, was occupied about the time that Vincennes was founded in the Wabash Valley [1735]. Finally, just on the eve of the last struggle between England and France, the French pressed into the valleys of the Alleghany and the Ohio, at the same time that the English also began to enter them."—B. A. Hinsdale, *The Old Northwest*, ch. 4.

A. D. 1702-1710.—The Second Inter-Colonial War (Queen Anne's War): Border ravages in New England and Acadia.—English Conquest of Acadia. See NEW ENGLAND: A. D. 1702-1710.

A. D. 1711-1713.—The Second Inter-Colonial War.—Walker's Expedition against Quebec.—Massacre of Fox Indians.—The Peace of Utrecht.—After the reduction of Port Royal, which was practically the conquest of Acadia, Colonel Nicholson, who bore the honors of that achievement, repaired to England and prevailed with the government to fit out an adequate expedition for the Conquest of Canada. "The fleet, consisting of 15 ships of war and 40 transports, was placed under the command of

Sir Hovenden Walker; seven veteran regiments from Marlborough's army, with a battalion of marines, were intrusted to Mrs. Masham's second brother, whom the queen had pensioned and made a brigadier-general, whom his bottle companions called honest Jack Hill. . . . From June 25th to the 30th day of July 1711, the fleet lay at Boston, taking in supplies and the colonial forces. At the same time, an army of men from Connecticut, New Jersey, and New York, Palatine emigrants, and about 600 Iroquois, assembling at Albany, prepared to burst upon Montreal; while in Wisconsin the English had allies in the Foxes, who were always wishing to expel the French from Michigan. In Quebec, measures of defence began by a renewal of friendship with the Indians. To deputies from the Onondagas and Senecas, the governor spoke of the fidelity with which the French had kept their treaty; and he reminded them of their promise to remain quiet upon their mats. A war festival was next held, at which were present all the savages domiciliated near the French settlements, and all the delegates of their allies who had come down to Montreal. In the presence of 700 or 800 warriors, the war song was sung and the hatchet uplifted. The savages of the remote west were wavering, till twenty Hurons from Detroit took up the hatchet, and swayed all the rest by their example. By the influence of the Jesuits over the natives, an alliance extending to the Ojibways constituted the defence of Montreal. Descending to Quebec, Vaudreuil found Abenaki volunteers assembling for his protection. Measures for resistance had been adopted with heartiness; the fortifications were strengthened; Beaufort was garrisoned; and the people were resolute and confiding; even women were ready to labor for the common defence. Toward the last of August, it was said that peasants at Matanes had descried 90 or 96 vessels with the English flag. Yet September came, and still from the heights of Cape Diamond no eye caught one sail of the expected enemy. The English squadron, leaving Boston on the 30th of July [1711], after loitering near the bay of Gaspé, at last began to ascend the St. Lawrence, while Sir Hovenden Walker puzzled himself with contriving how he would secure his vessels during the winter at Quebec." At the same time, the present and actual difficulties of the expedition were so heedlessly and ignorantly dealt with that eight ships of the fleet were wrecked among the rocks and shoals near the Egg Islands, and 884 men were drowned. The enterprise was then abandoned. "'Had we arrived safe at Quebec,' wrote the admiral, 'ten or twelve thousand men must have been left to perish of cold and hunger: by the loss of a part, Providence saved all the rest.' Such was the issue of hostilities in the north-east. Their total failure left the expedition from Albany no option but to return, and Montreal was unmolested. Detroit, in 1712, almost fell before the valor of a party of the Ottagamies, or Foxes. . . . Resolving to burn Detroit, they pitched their lodgings near the fort, which Du Buisson, with but twenty Frenchmen, defended. Aware of their intention, he summoned his Indian allies from the chase; and, about the middle of May, Ottawas and Hurons and Pottawottamies, with one branch of the Sacs, Illinois, Menomonies, and even Osages and Missouris, each nation with its own ensign, came to his re-

lief. So wide was the influence of the missionaries in the West. . . . The warriors of the Fox nation, far from destroying Detroit, were themselves besieged, and at last were compelled to surrender at discretion. Those who bore arms were ruthlessly murdered; the rest distributed among the confederates, to be enslaved or massacred at the will of their masters. Cherished as the loveliest spot in Canada, the possession of Detroit secured for Quebec a great highway to the upper Indian tribes and to the Mississippi. . . . In the meantime, the preliminaries of a treaty had been signed between France and England; and the war . . . was suspended by negotiations that were soon followed by the uncertain peace of Utrecht [April 11, 1713]. . . . England, by the peace of Utrecht, obtained from France large concessions of territory in America. The assembly of New York had addressed the queen against French settlements in the West; William Penn advised to establish the St. Lawrence as the boundary on the north, and to include in our colonies the valley of the Mississippi. 'It will make a glorious country'; such were his prophetic words. . . . The colony of Louisiana excited in Saint-John 'apprehensions of the future undertakings of the French in North America.' The occupation of the Mississippi valley had been proposed to Queen Anne; yet, at the peace, that immense region remained to France. But England obtained the bay of Hudson and its borders; Newfoundland, subject to the rights of France in its fisheries; and all Nova Scotia, or Acadia, according to its ancient boundaries. It was agreed that 'France should never molest the Five Nations subject to the dominion of Great Britain.' But Louisiana, according to French ideas, included both banks of the Mississippi. Did the treaty of Utrecht assent to such an extension of French territory? And what were the ancient limits of Acadia? Did it include all that is now New Brunswick? or had France still a large territory on the Atlantic between Acadia and Maine? And what were the bounds of the territory of the Five Nations, which the treaty appeared to recognize as a part of the English dominions? These were questions which were never to be adjusted amicably."—G. Bancroft, *Hist. of the U. S. (Author's Last Revision)*, pt. 3, ch. 12 (v. 2).—With reference to the destruction of the Fox Indians at Detroit, a recent writer says: "The French official reports pretend that the Wisconsin Indians, being in secret alliance with the Iroquois and the English, had come to Detroit with the express purpose of besieging the fort and reducing it to ruins; and their statement has heretofore been unsuspectingly accepted by all historians. But there is little doubt that the charge is a shameful falsehood. The Fox Indians had rendered themselves very obnoxious to the French. Firmly lodged on the Fox River, they controlled the chief highway to the West; a haughty, independent and intractable people, they could not be cajoled into vassalage. It was necessary for the success of the French policy to get them out of the way. They were enticed to Detroit in order that they might be slaughtered."—S. S. Hebbard, *Hist. of Wis. under the dominion of France*, ch. 5-6.

A. D. 1750-1753.—Boundaries disputes with England.—Futile negotiations at Paris.—"For the past three years [1750-1753] the commissioners appointed under the treaty of Aix-la-Chapelle to settle the question of boundaries between France and England in America had been in session at Paris, waging interminable war on paper; La Galissonière and Silhouette for France, Shirley and Mildmay for England. By the treaty of Utrecht, Acadia belonged to England; but what was Acadia? According to the English commissioners, it comprised not only the peninsula called Nova Scotia, but all the immense tract of land between the River St. Lawrence on the north, the Gulf of the same name on the east, the Atlantic on the south, and New England on the west. The French commissioners, on their part, maintained that the name Acadia belonged of right only to about a twentieth part of this territory, and that it did not even cover the whole of the Acadian peninsula, but only its southern coast, with an adjoining belt of barren wilderness. When the French owned Acadia, they gave it boundaries as comprehensive as those claimed for it by the English commissioners; now that it belonged to a rival, they cut it down to a paring of its former self. . . . Four censuses of Acadia while it belonged to the French had recognized the mainland as included in it; and so do also the early French maps. Its prodigious shrinkage was simply the consequence of its possession by an alien. Other questions of limits, more important and equally perilous, called loudly for solution. What line should separate Canada and her western dependencies from the British colonies? Various principles of demarcation were suggested, of which the most prominent was a geographical one. All countries watered by streams falling into the St. Lawrence, the Great Lakes, and the Mississippi were to belong to her. This would have planted her in the heart of New York and along the crests of the Alleghanies, giving her all the interior of the continent, and leaving nothing to England but a strip of sea-coast. Yet in view of what France had achieved; of the patient gallantry of her explorers, the zeal of her missionaries, the adventurous hardihood of her bushrangers, revealing to civilized mankind the existence of this wilderness world, while her rivals plodded at their workshops, their farms, or their fisheries,—in view of all this, her pretensions were moderate and reasonable compared with those of England. The treaty of Utrecht had declared the Iroquois, or Five Nations, to be British subjects; therefore it was insisted that all countries conquered by them belonged to the British Crown. But what was an Iroquois conquest? The Iroquois rarely occupied the countries they overran. . . . But the range of their war-parties was prodigious; and the English laid claim to every mountain, forest or prairie where

an Iroquois had taken a scalp. This would give them not only the country between the Alleghenies and the Mississippi, but also that between Lake Huron and the Ottawa, thus reducing Canada to the patch on the American map now represented by the province of Quebec,—or rather by a part of it, since the extension of Acadia to the St. Lawrence would cut off the present counties of Gaspé, Rimouski and Bonaventure. Indeed, among the advocates of British claims there were those who denied that France had any rights whatever on the south side of the St. Lawrence. Such being the attitude of the two contestants, it was plain there was no resort but the last argument of kings. Peace must be won with the sword.”—F. Parkman, *Montcalm and Wolfe*, ch. 5 (v. 1).

A. D. 1755 (April).—Plans of the English against the French.—“While the negotiations [between England and France, at Paris] were pending, Braddock arrived in the Chesapeake. In March [1755] he reached Williamsburgh, and visited Annapolis; on the 14th of April, he, with Commodore Keppel, held a congress at Alexandria. There were present, of the American governors, Shirley, next to Braddock in military rank; Delancey, of New York; Morris, of Pennsylvania; Sharpe, of Maryland; and Dinwiddie, of Virginia. . . . Between England and France peace existed under ratified treaties; it was proposed not to invade Canada, but to repel encroachments on the frontier. For this end, four expeditions were concerted by Braddock at Alexandria. Lawrence, the lieutenant-governor of Nova Scotia, was to reduce that province according to the English interpretation of its boundaries; Johnson [afterwards Sir William Johnson, of New York] from his long acquaintance with the Six Nations, was selected to enroll Mohawk warriors in British pay and lead them with provincial militia against Crown Point; Shirley proposed to drive the French from Niagara; the commander-in-chief was to recover the Ohio valley.”—G. Bancroft, *Hist. of the U. S.* (Author's last revision), v. 2, pp. 416-419.

A. D. 1755 (June).—French disaster at Sea.—Frustrated attempt against Nova Scotia.—The arrival of Dieskau at Quebec.—“In 1754, France fully awakened to the fact that England not only intended to maintain her position in the wilds of America, but likewise by sea. She equipped an armament under the command of admirals Macnamara and Bois de la Mothe, of 18 ships of the line and 9 frigates, having on board, ostensibly for Canada, eleven battalions of troops under General Dieskau, an ‘élève’ of Marshal Saxe. England, apprised of this force being sent, despatched Vice-Admiral Boscawen with 11 ships of the line and one frigate to intercept it en route. Both sailed about the same time, the 22d of April, 1755. The French ambassador at London being duly notified, replied: ‘That his royal master would consider the first gun fired at sea in a hostile manner to be a declaration of war.’ The esoteric instructions of the French fleet were to rendezvous at Chebuctou Harbour, destroy Halifax, and then proceed to Annapolis for the same purpose. While the instructions

were of necessity secret, it was well known in Acadia that an attempt would be made by France to recover possession of the province. It was this fleet, so eagerly expected by the Acadians, that gave rise to the insolent manner in which they addressed the Council at Halifax, and which led to an immediate removal of their arms and subsequent dispersal. Owing to misadventure, some of the French fleet under Macnamara had to put back to Brest; the remainder met the English off the coast of Newfoundland [June 8] in a dense fog; avoiding an engagement, several of them escaped by taking the northern route via Belleisle . . . successfully reaching their ‘harbour of refuge,’ Louisbourg. The ‘Lys’ and the ‘Alcyde’ were sufficiently unfortunate to be compelled to face the guns of the English frigates ‘Dunkirk’ and ‘Defiance,’ and after five hours close engagement the ‘Lys’ struck its colors . . . followed by the ‘Alcyde,’ when Hocquart in command became Boscawen’s prisoner by sea for the third time, together with £76,000 sterling in money, eight companies of soldiers and several officers and engineers. The unexpected rencontre with Boscawen’s fleet, the loss of two of their vessels, and the knowledge that the garrison at Halifax was considerably reinforced by the forces brought out by Boscawen, caused the abandonment of all attempts to recover Acadia. Dieskau, after landing a few regiments at Louisbourg, proceeded to Quebec.”—G. E. Hart, *The Fall of New France*, pp. 51-54.

A. D. 1755 (July).—Defeat of Braddock’s Expedition against Fort Duquesne. See OHIO (VALLEY): A. D. 1755.

A. D. 1755 (August—October): The abortive expedition against Niagara.—According to the English plan of campaign, concerted with Braddock at Alexandria, Governor Shirley was to lead an army for the conquest of Niagara; but his march westward ended at Oswego. “Colonel Philip Schuyler led the first regiment of the expedition. Boats were built at Oswego to convey 600 men by lake. Shirley followed by way of the Mohawk, and reached Oswego August 21. He was delayed from various causes, and in October a council of war decided that the attack on Niagara should be postponed for a year. Shirley was to have met Braddock in victory at Niagara. Both branches of the plan had been shattered. The great western scheme sank to a mere strengthening of the defences of Oswego. Colonel Mercer was left in command of a garrison of 700 men, with instructions to build two new forts, and General Shirley took the remainder of his force back to Albany. The pitiful failure led to recriminations relative to the causes of the fatal delays.”—E. H. Roberts, *New York*, v. 1, ch. 20.

Also in: R. Hildreth, *Hist. of the U. S.*, ch. 26 (v. 2).

A. D. 1755 (September).—The Battle of Lake George and defeat of Dieskau.—“The expedition against Crown Point on Lake Champlain, had been intrusted to General William Johnson. His troops were drawn principally from Massachusetts and Connecticut; a regiment from New Hampshire joined them at Albany. At the head of boat navigation on the Hudson, a fort was built which, in honor of their com-

mander, whom they revered as 'a brave and virtuous man,' the soldiers named Fort Lyman. But when Johnson assumed the command he ungenerously changed the name to Fort Edward. Leaving a garrison in this fort, Johnson moved with about 5,000 men to the head of Lake George, and there formed a camp, intending to descend into Lake Champlain. Hendrick, the celebrated Mohawk chief, with his warriors, were among these troops. Israel Putnam, too, was there, as a captain, and John Stark as a lieutenant, each taking lessons in warfare. The French were not idle; the district of Montreal made the most strenuous exertions to meet the invading foe. All the men who were able to bear arms were called into active service; so that, to gather in the harvest, their places were supplied by men from other districts. The energetic Baron Dieskau resolved, by a bold attack, to terrify the invaders. Taking with him 200 regulars, and about 1,200 Canadians and Indians, he set out to capture Fort Edward; but, as he drew near, the Indians heard that it was defended by cannon, which they greatly dreaded, and they refused to advance. He now changed his plan, and resolved to attack Johnson's camp, which was supposed to be without cannon. Meantime scouts had reported to Johnson that they had seen roads made through the woods in the direction of Fort Edward. Not knowing the movements of Dieskau, a detachment of 1,000 men, under Colonel Ephraim Williams, of Massachusetts, and 200 Mohawks, under Hendrick, marched to relieve that post. The French had information of their approach and placed themselves in ambush. They were concealed among the thick bushes of a swamp, on the one side, and rocks and trees on the other. The English recklessly marched into the defile. They were vigorously attacked [Sept. 5] and thrown into confusion. Hendrick was almost instantly killed, and in a short time Williams fell also. The detachment commenced to retreat, occasionally halting to check their pursuers. The firing was heard in the camp; as the sound drew nearer and nearer, it was evident the detachment was retreating. The drums beat to arms, trees were hastily felled and thrown together to form a breastwork, upon which were placed a few cannon, just arrived from the Hudson. Scarcely were these preparations made when the panting fugitives appeared in sight, hotly pursued by the French and Indians. Intending to enter the camp with the fugitives, Dieskau urged forward his men with the greatest impetuosity. The moment the fugitives were past the muzzles of the cannon they opened with a tremendous shower of grape, which scattered the terrified Indians and checked the Canadians, but the regulars pushed on. A determined contest ensued, which lasted five hours, until the regulars were nearly all slain, while the Indians and Canadians did but little execution; they remained at a respectful distance among the trees. At length the enemy began to retreat, and the Americans leaped over the breastworks and pursued them with great vigor. That same evening, after the pursuit had ceased, as the French were retreating, they were suddenly attacked with great spirit by the New Hampshire regiment, which was on its way from Fort Edward. They were so panic stricken by this new assault that they abandoned everything and fled for their lives. Dieskau had been wounded

once or twice at the commencement of the battle, but he never left his post. . . . He was taken prisoner, kindly treated, and sent to England, where he died. Johnson was slightly wounded at the commencement of the battle, and prudently retired from danger. To General Lyman belongs the honor of the victory, yet Johnson, in his report of the battle, did not even mention his name. Johnson, for his exertions on that day, was made a baronet, and received from royal favor a gift of \$25,000. He had friends at court, but Lyman was unknown. Col. Ephraim Williams, who fell in this battle, while passing through Albany, had taken the precaution to make his will, in which he bequeathed property to found a free school in western Massachusetts. That school has since grown into Williams College.—J. H. Patton, *Concise Hist. of the Am. People*, v. 1, ch. 22.

A. D. 1756.—Formal declarations of war—the "Seven Years War" of Europe, called the "French and Indian War" in British America.—Montcalm sent from France.—"On the 18th of May, 1756, England, after a year of open hostility, at length declared war. She had attacked France by land and sea, turned loose her ships to prey on French commerce, and brought some 300 prizes into her ports. It was the act of a weak government, supplying by spasms of violence what it lacked in considerate resolution. France, no match for her amphibious enemy in the game of marine depredation, cried out in horror; and to emphasize her complaints and signalize a pretended good faith which her acts had belied, ostentatiously released a British frigate captured by her cruisers. She in her turn declared war on the 9th of June; and now began the most terrible conflict of the 18th century; one that convulsed Europe and shook America, India, the coasts of Africa, and the islands of the sea [see ENGLAND: A. D. 1754-1755, and after; also GERMANY: A. D. 1755-1756, and after]. . . . Henceforth France was to turn her strength against her European foes; and the American war, the occasion of the universal outbreak, was to hold in her eyes a second place. . . . Still, something must be done for the American war; at least there must be a new general to replace Dieskau. None of the court favorites wanted a command in the backwoods, and the minister of war was free to choose whom he would. His choice fell on Louis Joseph, Marquis de Montcalm-Gozon de Saint V6ran. . . . The Chevalier de L6vis, afterwards Marshal of France, was named as his second in command. . . . The troops destined for Canada were only two battalions, one belonging to the regiment of La Sarre, and the other to that of Royal Roussillon. Louis XV. and Pompadour sent 100,000 men to fight the battles of Austria, and could spare but 1,200 to reinforce New France." Montcalm, who reached Quebec in May, was placed in difficult relations with the governor-general, Vaudreuil, by the fact that the latter held command of the colonial troops. The forces in New France, were of three kinds,—"the 'troupes de terre,' troops of the line, or regulars from France; the 'troupes

de la marine,' or colony regulars; and lastly the militia. The first consisted of the four battalions that had come over with Dieskau and the two that had come with Montcalm, comprising in all a little less than 3,000 men. Besides these, the battalions of Artois and Bourgogne, to the number of 1,100 men, were in garrison at Louisbourg." This constituted Montcalm's command. The colony regulars and the militia remained subject to the orders of the governor, who manifested an early jealousy of Montcalm. The former troops numbered less than 2,000 men. "All the effective male population of Canada, from 15 years to 60, was enrolled in the militia. . . . In 1750 the militia of all ranks counted about 13,000; and eight years later the number had increased to about 15,000. Until the last two years of the war, those employed in actual warfare were but few. . . . To the white fighting force of the colony are to be added the red men. . . . The military situation was somewhat perplexing. Iroquois spies had brought reports of great preparations on the part of the English. As neither party dared offend these wavering tribes, their warriors could pass with impunity from one to the other, and were paid by each for bringing information, not always trustworthy. They declared that the English were gathering in force to renew the attempt made by Johnson the year before against Crown Point and Ticonderoga, as well as that made by Shirley against Forts Frontenac and Niagara. Vaudreuil had spared no effort to meet the double danger. Lotbinière, a Canadian engineer, had been busied during the winter in fortifying Ticonderoga, while Pouchot, a captain in the battalion of Béarn, had rebuilt Niagara, and two French engineers were at work in strengthening the defences of Frontenac. . . . Indians presently brought word that 10,000 English were coming to attack Ticonderoga." Both Montcalm and Lévis, with troops, "hastened to the supposed scene of danger . . . and reached Ticonderoga at the end of June. They found the fort . . . advanced towards completion. It stood on the crown of the promontory. . . . The rampart consisted of two parallel walls ten feet apart, built of the trunks of trees, and held together by transverse logs dovetailed at both ends, the space between being filled with earth and gravel well packed. Such was the first Fort Ticonderoga, or Carillon,—a structure quite distinct from the later fort of which the ruins still stand on the same spot. . . . Ticonderoga was now the most advanced position of the French, and Crown Point, which had before held that perilous honor, was in the second line. . . . The danger from the English proved to be still remote. . . . Meanwhile, at the head of Lake George, the raw bands of ever-active New England, were mustering for the fray."—F. Parkman, *Montcalm and Wolfe*, v. 1, ch. 11.

ALSO IN: W. Kingsford, *Hist. of Canada*, bk. 11, ch. 9 (v. 3).

A. D. 1756-1757.—French successes.—Capture of Oswego and Fort William Henry.—Bloody work of the savage allies.—On the death of Braddock, Gov. Shirley became commander-in-chief of the British forces in America, "a position for which he was not adapted by military knowledge. . . . His military schemes for the season of 1756 were grand in conception and theory, but disastrous failures in practice.

Ten thousand men were to advance against Crown Point—6,000 for service on Lake Ontario, 3,000 for an attack on Fort Duquesne, and 2,000 to advance up the river Kennebec, destroy the settlement adjoining the Chaudière and descending the mouth of that river within three miles of Quebec, keep all that part of Canada in alarm. While each of these armies was being put into motion, the season had become too far advanced for action at any one point. Moreover, the British Government, dissatisfied with a Provincial officer being at the head of its army in America, determined upon sending out General Lord Loudoun. While Shirley was preparing, Montcalm advanced against the three forts at Oswego, the terror of the French in the Iroquois country and which it had been their desire to destroy for many years back; they likewise commanded the entrance to Lake Ontario. The English had a garrison of 1,800 men in these divided between Fort Ontario . . . Fort Oswego . . . and Fort George, or Rascal . . . about a mile distant from each other." Montcalm took all three of the forts without much difficulty, and demolished them. "Shirley was much blamed for this defeat and the failure of his projects, and lost both his government and command, being succeeded by John Campbell, fourth Earl of Loudoun, Baron Mauchlaw, one of the sixteen peers of Scotland, with General Abercromby as second in command—both notorious for previous incompetency. . . . They were sent out with considerable reinforcements, and had transferred to them by Shirley 16,000 men in the field, of whom 6,000 were regulars; but, with that masterly inactivity and indecision for which Loudoun was most renowned, no further movement was made this year. The year 1757 was not distinguished by any military movements of much moment." An intended attack on Louisbourg was postponed because of news that a powerful French fleet held possession of its harbor and that the garrison was very strong. "Montcalm, finding himself free from attack, penetrated with his army of 7,606 men to Fort William Henry, at the head of Lake George. Included were 2,000 Indians. The fort was garrisoned by 2,264 regulars under Colonel Munroe of the 35th Regiment, and in the neighborhood there was an additional force of 4,600 men under General Webb. On the 3d of August the fort was invested and, after a summons to surrender was rejected, the attack was begun and continued with undiminished fervor until the 9th at noon, when a capitulation was signed. General Webb did not join Munroe, as he was instructed to do by Abercromby's plans, some cowardice being attributed to him by contemporary writers. An incident of the war which has given rise to a great deal of controversy and ill-feeling up to the present moment, was the so-called massacre at Fort William Henry, the outcome of the numerous horde of savages the French allies had in the engagement. . . . On the morning following the surrender, the garrison was to march out under a proper escort to protect them from injury at the hands of the Indians. The evacuation had barely commenced, when a repetition of the looting of the day previous, which ensued immediately after the capitulation had been signed, was attempted. An effort being made by the escort to stop it, some drunken Indians

attacked the defile, which resulted in the murdering and scalping of some 60 or 70 of the prisoners; maltreating and robbing a large number of others. Upon a careful investigation of the contemporary authorities, no blame whatever can be attached to the good fame of the brave and humane Montcalm or De Lévis. . . . Fort George, or William Henry, as it was indifferently called, like its compeer Fort Oswego, was razed to the ground and the army retreated into their winter quarters at Montreal. The termination of the year left the French masters of Lakes Champlain and George, together with the chain of great lakes connecting the St. Lawrence with the Mississippi; also the undisturbed possession of all the country in dispute west of the Allegheny Mountains."—G. E. Hart, *The Fall of New France*, pp. 70-79.

ALSO IN: E. Warburton, *Conquest of Canada*, v. 2, ch. 2-3.

A. D. 1758.—The loss of Louisbourg and Fort Du Quesne.—Bloody defeat of the English at Ticonderoga.—"The affairs of Great Britain in North America were a more gloomy aspect, at the close of the campaign of 1757, than at any former period. By the acquisition of fort William Henry, the French had obtained complete possession of the lakes Champlain, and George. By the destruction of Oswego, they had acquired the dominion of those lakes which connect the St. Lawrence with the waters of the Mississippi, and unite Canada to Louisiana. By means of fort Du Quesne, they maintained their ascendancy over the Indians, and held undisturbed possession of the country west of the Allegheny mountains; while the English settlers were driven to the blue ridge. The great object of the war in that quarter was gained, and France held the country for which hostilities had been commenced. . . . But this inglorious scene was about to be succeeded by one of unrivalled brilliancy. . . . The brightest era of British history was to commence. . . . The public voice had, at length, made its way to the throne, and had forced, on the unwilling monarch, a minister who has been justly deemed one of the greatest men of the age in which he lived. . . . In the summer of 1757, an administration was formed, which conciliated the great contending interests in parliament; and Mr. Pitt was placed at its head. . . . Possessing the public confidence without limitation, he commanded all the resources of the nation, and drew liberally from the public purse. . . . In no part of his majesty's dominions was the new administration more popular than in his American colonies. . . . The circular letter of Mr. Pitt assured the several governors that, to repair the losses and disappointments of the last inactive campaign, the cabinet was determined to send a formidable force, to operate by sea and land, against the French in America; and he called upon them to raise as large bodies of men, within their respective governments, as the number of inhabitants might allow. . . . The legislature of Massachusetts agreed to furnish 7,000 men; Connecticut 5,000; and New Hampshire 3,000. . . . Three expeditions were proposed. The first was against Louisbourg; the second against Ticonderoga and Crown Point; and the third against fort Du Quesne. The army destined against Louisbourg, consisting of 14,000 men, was commanded by major general Amherst. [The expe-

dition was successful and Louisbourg fell, July 26, 1758.—See CAPE BRETON ISLAND: A. D. 1758-1760.] . . . The expedition against Ticonderoga and Crown Point was conducted by general Abercrombie in person. His army, consisting of near 16,000 effectives, of whom 9,000 were provincials, was attended by a formidable train of artillery, and possessed every requisite to ensure success. On the 5th of July he embarked on lake George, and reached the landing place early the next morning. A disembarkation being effected without opposition, the troops were immediately formed in four columns, the British in the centre, and the provincials on the flanks; in which order they marched towards the advanced guard of the French, composed of one battalion posted in a log camp, which, on the approach of the English, made a precipitate retreat. Abercrombie continued his march towards Ticonderoga, with the intention of investing that place; but, the woods being thick, and the guides unskilful, his columns were thrown into confusion, and, in some measure, entangled with each other. In this situation lord Howe, at the head of the right centre column, fell in with a part of the advanced guard of the French; which, in retreating from lake George, was likewise lost in the wood. He immediately attacked and dispersed them; killing several, and taking 148 prisoners, among whom were five officers. This small advantage was purchased at a dear rate. Though only two officers, on the side of the British, were killed, one of these was lord Howe himself, who fell on the first fire. This gallant young nobleman had endeared himself to the whole army. . . . Without farther opposition, the English army took possession of the post at the Saw Mills, within two miles of Ticonderoga. This fortress [called Carillon by the French], which commands the communication between the two lakes, is encompassed on three sides by water, and secured in front by a morass. The ordinary garrison amounting to 4,000 men, was stationed under the cannon of the place, and covered by a breast-work, the approach to which had been rendered extremely difficult by trees felled in front, with their branches outward, many of which were sharpened so as to answer the purpose of chevaux-de-frize. This body of troops was rendered still more formidable by its general than by its position. It was commanded by the marquis de Montcalm. Having learned from his prisoners the strength of the army under the walls of Ticonderoga, and that a reinforcement of 3,000 men was daily expected, general Abercrombie thought it advisable to storm the place before this reinforcement should arrive. The troops marched to the assault with great intrepidity; but their utmost efforts could make no impression on the works. . . . After a contest of near four hours, and several repeated attacks, general Abercrombie ordered a retreat. The army retired to the camp from which it had marched in the morning; and, the next day, resumed its former position on the south side of lake George. In this rash attempt, the killed and wounded of the English amounted to near 2,000 men, of whom not quite 400 were provincials. The French were covered during the whole action, and their loss was inconsiderable. Entirely disconcerted by this unexpected and bloody repulse, general Abercrombie relinquished his designs against Ticonderoga

and Crown Point. Searching however for the means of repairing the misfortune, if not the disgrace, sustained by his arms, he readily acceded to a proposition made by colonel Bradstreet, for an expedition against fort Frontignac. This fortress stands on the north side of Ontario. . . . Colonel Bradstreet embarked on the Ontario at Oswego, and on the 25th of August, landed within one mile of the fort. In two days, his batteries were opened at so short a distance that almost every shell took effect; and the governor, finding the place absolutely untenable, surrendered at discretion. . . . After destroying the fort and vessels, and such stores as could not be brought off, colonel Bradstreet returned to the army which undertook nothing farther during the campaign. The demolition of fort Frontignac and of the stores which had been collected there, contributed materially to the success of the expedition against fort Du Quêne. The conduct of this enterprise had been entrusted to general Forbes, who marched from Philadelphia, about the beginning of July, at the head of the main body of the army, destined for this service, in order to join colonel Bouquet at Raystown. So much time was employed in preparing to move from this place, that the Virginia regulars, commanded by colonel Washington, were not ordered to join the British troops until the month of September. . . . Early in October general Forbes moved from Raystown; but the obstructions to his march were so great that he did not reach fort Du Quêne until late in November. The garrison, being deserted by the Indians, and too weak to maintain the place against the formidable army which was approaching, abandoned the fort the evening before the arrival of the British, and escaped down the Ohio in boats. The English placed a garrison in it, and changed its name to Pittsburg, in compliment to their popular minister. The acquisition of this post was of great importance to Pennsylvania, Maryland, and Virginia.—J. Marshall, *Life of Washington*, v. 1, ch. 13.

A. D. 1759. June—September.—The Fall of Quebec.—“Wolfe’s name stood high in the esteem of all who were qualified to judge, but, at the same time, it stood low in the column of colonels in the Army List. The great minister [Pitt] thought that the former counterbalanced the latter. . . . One of the last gazettes in the year 1758 announced the promotion of Colonel James Wolfe to the rank of major-general, and his appointment to the chief command of the expedition against Quebec. About the middle of February, 1759, the squadron sailed from England to Louisbourg, where the whole of the British force destined for the River St. Lawrence was ordered to assemble. . . . Twenty-two ships of the line, five frigates, and nineteen smaller vessels of war, with a crowd of transports, were mustered under the orders of the admiral [Saunders], and a detachment of artillery and engineers, and ten battalions of infantry, with six companies of Rangers, formed Wolfe’s command; the right flank companies of the three regiments which still garrisoned Louisbourg soon after joined the

army, and were formed into a corps called the Louisbourg Grenadiers. The total of the land forces embarked were somewhat under 8,000.”—E. Warburton, *Conquest of Canada*, v. 2, ch. 9.—“Wolfe, with his 8,000 men, ascended the St. Lawrence in the fleet in the month of June. With him came Brigadiers Monckton, Townshend and Murray, youthful and brave like himself, and, like himself, already schooled to arms. . . . The Grenadiers of the army were commanded by Colonel Guy Carleton, and part of the light infantry by Lieutenant-Colonel William Howe, both destined to celebrity in after years, in the annals of the American revolution. Colonel Howe was brother of the gallant Lord Howe, whose fall in the preceding year was so generally lamented. Among the officers of the fleet was Jervis, the future admiral, and ultimately Earl St. Vincent; and the master of one of the ships was James Cook, afterwards renowned as a discoverer. About the end of June, the troops debarked on the large, populous, and well-cultivated Isle of Orleans, a little below Quebec, and encamped in its fertile fields. Quebec, the citadel of Canada, was strong by nature. It was built round the point of a rocky promontory, and flanked by precipices. . . . The place was tolerably fortified, but art had not yet rendered it, as at the present day, impregnable. Montcalm commanded the post. His troops were more numerous than the assailants; but the greater part of them were Canadians, many of them inhabitants of Quebec; and he had a host of savages. His forces were drawn out along the northern shore below the city, from the River St. Charles to the Falls of Montmorency, and their position was secured by deep intrenchments. . . . After much resistance, Wolfe established batteries at the west point of the Isle of Orleans, and at Point Levi, on the right (or south) bank of the St. Lawrence, within cannon range of the city. . . . Many houses were set on fire in the upper town, the lower town was reduced to rubbish; the main fort, however, remained unharmed. Anxious for a decisive action, Wolfe, on the 9th of July, crossed over in boats from the Isle of Orleans to the north bank of the St. Lawrence, and encamped below the Montmorency. It was an ill-judged position. . . . On the 18th of July, Wolfe made a reconnoitering expedition up the river, with two armed sloops, and two transports with troops. He passed Quebec unharmed and carefully noted the shores above it. Rugged cliffs rose almost from the water’s edge. . . . He returned to Montmorency disappointed, and resolved to attack Montcalm in his camp, however difficult to be approached, and however strongly posted. Townshend and Murray, with their brigades, were to cross the Montmorency at low tide, below the falls, and storm the redoubt thrown up in front of the ford. Monckton, at the same time, was to cross, with part of his brigade in boats from Point Levi. . . . As usual in complicated orders, part were misunderstood, or neglected, and confusion was the consequence.” The assault was repelled and Wolfe fell back across the river, having lost four hundred men, with two vessels, which ran aground and were burned. He felt the failure deeply, and his chagrin was increased by news of the successes of his coadjutors at Ticonderoga and Niagara. “The difficulties multiplying around him, and the delay of

General Amherst in hastening to his aid, preyed incessantly on his spirits. . . . The agitation of his mind, and his acute sensibility, brought on a fever, which for some time incapacitated him from taking the field. In the midst of his illness he called a council of war, in which the whole plan of operations was altered. It was determined to convey troops above the town, and endeavor to make a diversion in that direction, or draw Montcalm into the open field. . . . The brief Canadian summer was over; they were in the month of September. The camp at Montmorency was broken up. The troops were transported to Point Levi, leaving a sufficient number to man the batteries on the Isle of Orleans. On the 5th and 6th of September the embarkation took place above Point Levi, in transports which had been sent for the purpose. Montcalm detached De Bougainville with 1,500 men to keep along the north shore above the town, watch the movements of the squadron, and prevent a landing. To deceive him, Admiral Holmes moved with the ships of war three leagues beyond the place where the landing was to be attempted. He was to drop down, however, in the night, and protect the landing. . . . The descent was made in flat-bottomed boats, past midnight, on the 13th of September. They dropped down silently, with the swift current. 'Qui va la?' (who goes there?) cried a sentinel from the shore. 'La France,' replied a captain in the first boat, who understood the French language. 'A quel regiment?' was the demand. 'De la Reine' (the queen's) replied the captain, knowing that regiment was in De Bougainville's detachment. Fortunately, a convoy of provisions was expected down from De Bougainville's, which the sentinel supposed this to be. 'Passe,' cried he, and the boats glided on without further challenge. The landing took place in a cove near Cape Diamond, which still bears Wolfe's name. He had marked it in reconnoitering, and saw that a cragged path straggled up from it to the Heights of Abraham, which might be climbed, though with difficulty, and that it appeared to be slightly guarded at top. Wolfe was among the first that landed and ascended up the steep and narrow path, where not more than two could go abreast, and which had been broken up by cross ditches. Colonel Howe, at the same time, with the light infantry and Highlanders, scrambled up the woody precipices, helping themselves by the roots and branches, and putting to flight a sergeant's guard posted at the summit. Wolfe drew up the men in order as they mounted; and by the break of day found himself in possession of the fateful Plains of Abraham. Montcalm was thunderstruck when word was brought to him in his camp that the English were on the heights threatening the weakest part of the town. Abandoning his intrenchments, he hastened across the river St. Charles and ascended the heights, which slope up gradually from its banks. His force was equal in number to that of the English, but a great part was made up of colony troops and savages. When he saw the formidable host of regulars he had to contend with, he sent off swift messengers to summon De Bougainville with his detachment to his aid; and De Vaudreil to reinforce him with 1,500 men from the camp. In the meantime he prepared to flank the left of the English line and force them to the opposite precipices." In the

memorable battle which ensued, Wolfe, who led the English line, received, first, a musket ball in his wrist, and soon afterward was struck by a second in the breast. He was borne mortally wounded to the rear, and lived just long enough to hear a cry from those around him that the enemy ran. Giving a quick order for Webb's regiment to be hurried down to the Charles River bridge and there obstruct the French retreat, he turned upon his side, saying, "Now, God be praised, I will die in peace," and expired. In the meantime the French commander, Montcalm, had received his death-wound, while striving to rally his flying troops. The victory of the English was complete, and they hastened to fortify their position on the Plains of Abraham, preparing to attack the citadel. But, Montcalm dying of his wound the following morning, no further defence of the place was undertaken. It was surrendered on the 17th of September to General Townshend, who had succeeded to the command.—W. Irving, *Life of Washington*, v. 1, ch. 25.

A. D. 1759 (July—August).—The fall of Niagara, Ticonderoga and Crown Point.—"For the campaign of 1759 the British Parliament voted liberal supplies of men and money, and the American colonies, encouraged by the successes of the preceding year, raised large numbers of troops. Amherst superseded Abercrombie as commander-in-chief. The plan for the year embraced three expeditions: Fort Niagara was to be attacked by Prideaux, assisted by Sir William Johnson; Amherst was to march his force against Ticonderoga and Crown Point; and Quebec was to be assailed by an army under Wolfe and a fleet under Saunders. Prideaux and Amherst, after the capture of the forts, were to descend the St. Lawrence, take Montreal, and join the army before Quebec. . . . Vaudreuil, the Governor, having received warning from France of the intentions of the English, sent a small force to Niagara under the engineer Pouchot, not expecting to be able to hold the post, and not wishing to sacrifice many men, or to spare the troops from the more important points. Pouchot repaired the defences, and when the alarm was given that the English were near, sent for men from Presqu' Isle, Venango, and Detroit. Prideaux, in command of two British regiments, a battalion of Royal Americans, two battalions from New York, and a train of artillery, was joined by Johnson with a detachment of Indians. They began their march from Schenectady on the 20th of May, and, after a difficult journey, reached Oswego, where a detachment under Colonel Haldimand was left to take possession and form a post, and the remainder of the forces embarked on Lake Ontario, and on the 1st of July landed without opposition about six miles east of the mouth of the Niagara. . . . Prideaux began his trenches on the 10th, and on the 11th a sally was made from the fort; but the English placed themselves in line of battle, and the French were obliged to retire. Prideaux was steadily advancing the work . . . when, on the 19th, he was killed by the bursting of a shell from a Coehorn mortar in one of the trenches, where he had gone to issue

orders. Amherst appointed General Gage to succeed him, but before the arrival of Gage the command devolved upon General Johnson, who carried on the siege according to the plans of Prideaux." On the 24th a considerable force of French and Indians, about 1,600 strong, sent to the relief of the beleaguered fort, was intercepted and routed, most of the French officers and men being slain or captured. This took from Pouchot his last hope, and he surrendered the following day. "As the stations beyond Niagara were now completely cut off from communication with the east, and had given up a large part of their men to join D'Aubry [in the attempt to relieve Niagara], they were no longer capable of resistance. Presqu' Isle, Venango, and Le Boeuf were easily taken by Colonel Bouquet, who had been sent to summon them to surrender." The detachment left at Oswego, in charge of stores, was attacked by a body of French and Indians from La Presentation (Ogdensburg), but the attack failed. "For the reduction of the forts at Ticonderoga and Crown Point, Amherst had somewhat more than 11,000 men. He began preparations early in May at Albany, preparing boats, gathering stores, and disciplining the new recruits." In June he reached Lake George with his army, but it was not until late in July that "the army moved down the lake in four columns, in a fleet of whale-boats, bateaux, and artillery rafts, very much as Abercromby's men had gone to their defeat the year before, and left the boats nearly opposite the former landing-place. The vanguard, pushing on rapidly over the road to the falls, met a detachment of French and Indians, whom they overpowered and scattered after a slight skirmish, and the main body pressed on and took a position at the saw mills. From prisoners it was learned that Bourlamaque commanded at Ticonderoga with 3,400 men. Montcalm was at Quebec." The French withdrew from their outer lines into the fort, and made a show of resistance for several days while they evacuated the place. An explosion, during the night of the 25th of July, "and the light of the burning works, assured the English of the retreat of the French, of which they had already heard from a deserter, and Colonel Haviland pursued them down the lake with a few troops, and took sixteen prisoners and some boats laden with powder. . . . After the flames were extinguished, Amherst, who had lost about 75 men, went to work to repair the fortifications and complete the road from the lake. Some sunken French boats were raised, and a brig was built. Amherst was slowly preparing to attack Crown Point, and sent Rogers with his rangers to reconnoitre. But on the first of August they learned that the French had abandoned that fort also; and on the 16th that Bourlamaque's men were encamped on the Isle aux Noix, at the northern extremity of Lake Champlain, commanding the entrance to the Richelieu. They had been joined by some small detachments, and numbered about 3,500 men. Amherst spent his time in fortifying Crown Point, and building boats and rafts," until "it was too late to descend to Montreal and go to the help of Wolfe; the time for that had been passed in elaborate and useless preparations."—R. Johnson, *Hist. of the French War*, ch. 18.

A. D. 1760.—The completion of the English conquest.—The end of "New France."—"Notwithstanding the successes of 1759, Canada was not yet completely conquered. If Amherst had moved on faster and taken Montreal, the work would have been finished; but his failure to do so gave the French forces an opportunity to rally, and the indefatigable De Levis, who had succeeded Montcalm, gathered what remained of the army at Montreal, and made preparations for attempting the recovery of Quebec. . . . After several fruitless attacks had been made on the British outposts during the winter, De Levis refitted all the vessels yet remaining early in the spring and gathered the stores still left at the forts on the Richelieu. On the 17th of April, he left Montreal with all his force and descended the river, gathering up the detached troops on the way; the whole amounting to more than 10,000 men. Quebec had been left in charge of Murray, with 7,000 men, a supply of heavy artillery, and stores of ammunition and provisions; but the number of men had been much reduced by sickness and by hardship encountered in bringing fuel to the city from forests, some as far as ten miles away. Their position, however, had been very much strengthened. . . . De Levis encamped at St. Foy, and on the 27th advanced to within three miles of the city."—R. Johnson, *Hist. of the French War*, ch. 21.—"On the 28th of April, Murray, marching out from the city, left the advantageous ground which he first occupied, and hazarded an attack near Sillery Wood. The advance-guard, under Bourlamaque, returned it with ardor. In danger of being surrounded, Murray was obliged to fly, leaving 'his very fine train of artillery,' and losing 1,000 men. The French appear to have lost about 300, though Murray's report increased it more than eightfold. During the next two days, Levis [Lévis] opened trenches against the town; but the frost delayed the works. The English garrison, reduced to 2,200 effective men, labored with alacrity; women, and even cripples were set to light work. In the French army, not a word would be listened to of the possibility of failure. But Pitt had foreseen and prepared for all. A fleet at his bidding went to relieve the city; and to his wife he was able to write in June: 'Join, my love, with me, in most humble and grateful thanks to the Almighty. Swanton arrived at Quebec in the Vanguard on the 15th of May, and destroyed all the French shipping, six or seven in number. The siege was raised on the 17th, with every happy circumstance. The enemy left their camp standing; abandoned 40 pieces of cannon. Happy, happy day! My joy and hurry are inexpressible. When the spring opened, Amherst had no difficulties to encounter in taking possession of Canada but such as he himself should create. A country suffering from a four years' scarcity, a disheartened peasantry, five or six battalions, wasted by incredible services and not recruited from France, offered no opposition. Amherst led the main army of 10,000 men by way of Oswego; though the labor of getting there was greater than that of proceeding directly upon Montreal. He descended the St. Lawrence cautiously, taking possession of the feeble works at Ogdensburg. Treating the helpless Canadians with humanity, and with no loss of lives except in passing the rapids, on the 7th of September, 1760,

he met before Montreal the army of Murray. The next day Haviland arrived with forces from Crown Point; and, in the view of the three armies, the flag of St. George was raised in triumph over the gate of Montreal. . . . The capitulation [signed by the Marquis de Vaudreuil, governor, against the protest of Lévis] included all Canada, which was said to extend to the crest of land dividing branches of Lakes Erie and Michigan from those of the Miami, the Wabash, and the Illinois rivers. Property and religion were cared for in the terms of surrender; but for civil liberty no stipulation was thought of. . . . On the fifth day after the capitulation, Rogers departed with 200 rangers to carry English banners to the upper posts. . . . The Indians on the lakes were at peace, united under Pontiac, the great chief of the Ottawas, happy in a country fruitful of corn and abounding in game. The Americans were met at the mouth of a river by a deputation of Ottawas. 'Pontiac,' said they, 'is the chief and lord of the country you are in; wait till he can see you.' When Pontiac and Rogers met, the savage chieftain asked: 'How have you dared to enter my country without my leave?' 'I come,' replied the English agent, 'with no design against the Indians, but to remove the French.' Pontiac, after some delay, smoked the calumet with Rogers and consented to his mission. The latter then proceeded to take possession of Detroit. In the following spring he went on to the French posts in the northwest.—G. Bancroft, *Hist. of the U. S. (Author's last revision)*, v. 2, pp. 522-524.

A. D. 1763.—Ceded to England by the Treaty of Paris. See SEVEN YEARS WAR.

A. D. 1763-1774.—The Province of Quebec created.—Eleven years of military rule.—The Quebec Act of 1774.—Extension of Quebec Province to the Ohio and the Mississippi.—“For three years after the conquest, the government of Canada was entrusted to military chiefs, stationed at Quebec, Montreal and Three Rivers, the headquarters of the three departments into which General Amherst divided the country. Military councils were established to administer law, though, as a rule, the people did not resort to such tribunals, but settled their difficulties among themselves. In 1763, the king, George III., issued a proclamation establishing four new governments, of which Quebec was one. Labrador, from St. John's River to Hudson's Bay, Anticosti, and the Magdalen Islands, were placed under the jurisdiction of Newfoundland, and the islands of St. John (or Prince Edward Island, as it was afterwards called), and Cape Breton (Île Royale) with the smaller islands adjacent thereto, were added to the government of Nova Scotia. Express power was given to the governors, in the letters-patent by which these governments were constituted, to summon general assemblies, with the advice and consent of His Majesty's Council, 'in such manner and form as was usual in those colonies and provinces which were under the King's immediate government.' . . . No assembly, however, ever met, as the French-Canadian population were unwilling to take the test oath, and the government of the province was carried on solely by the governor general, with the assistance of an executive council, composed

in the first instance of the two lieutenant-governors of Montreal and Three Rivers, the chief justice, the surveyor general of customs, and eight others chosen from the leading residents in the colony. From 1763 to 1774 the province remained in a very unsettled state, chiefly on account of the uncertainty that prevailed as to the laws actually in force. . . . The province of Quebec remained for eleven years under the system of government established by the proclamation of 1763. In 1774, Parliament intervened for the first time in Canadian affairs and made important constitutional changes. The previous constitution had been created by letters-patent under the great seal of Great Britain, in the exercise of an unquestionable and undisputed prerogative of the Crown. The colonial institutions of the old possessions of Great Britain, now known as the United States of America, had their origin in the same way. But in 1774, a system of government was granted to Canada by the express authority of Parliament. This constitution was known as the Quebec Act, and greatly extended the boundaries of the province of Quebec, as defined in the proclamation of 1763. On one side, the province extended to the frontiers of New England, Pennsylvania, New York province, the Ohio, and the left bank of the Mississippi; on the other, to the Hudson's Bay Territory. Labrador, and the islands annexed to Newfoundland by the proclamation of 1763, were made part of the province of Quebec. . . . The Act of 1774 was exceedingly unpopular in England and in the English-speaking colonies, then at the commencement of the Revolution. Parliament, however, appears to have been influenced by a desire to adjust the government of the province so as to conciliate the majority of the people. . . . The new constitution came into force in October, 1774. The Act sets forth among the reasons for legislation that the provisions made by the proclamation of 1763 were 'inapplicable to the state and circumstances of the said province, the inhabitants whereof amounted at the conquest, to above 65,000 persons professing the religion of the Church of Rome, and enjoying an established form of constitution and system of laws, by which their persons and property had been protected, governed, and ordered for a long series of years, from the first establishment of the province.' Consequently, it is provided that Roman Catholics should be no longer obliged to take the test oath, but only the oath of allegiance. The government of the province was entrusted to a governor and a legislative council, appointed by the Crown, inasmuch as it was 'inexpedient to call an assembly.' This council was to comprise not more than twenty-three, and not less than seventeen members, and had the power, with the consent of the governor or commander-in-chief for the time being, to make ordinances for the peace, welfare, and good government of the province. They had no authority, however, to lay on any taxes or duties except such as the inhabitants of any town or district might be authorized to assess or levy within its precincts for roads and ordinary local services. No ordinance could be passed, except by a majority of the council, and every one had to be transmitted within six months after its enactment to His Majesty for approval or disallowance. It was also enacted that in all matters of controversy, relative to property and civil rights,

recourse should be had to the French civil procedure, whilst the criminal law of England should obtain to the exclusion of every other criminal code which might have prevailed before 1764.

... Roman Catholics were permitted to observe their religion with perfect freedom, and their clergy were to enjoy their 'accustomed dues and rights' with respect to such persons as professed that creed. Consequently, the Roman Catholic population of Canada were relieved of their disabilities many years before people of the same belief in Great Britain and Ireland received similar privileges. The new constitution was inaugurated by Major General Carleton, afterwards Lord Dorchester, who nominated a legislative council of twenty-three members, of whom eight were Roman Catholics."—J. G. Bourinot, *Manual of Const. Hist. of Canada*, ch. 2-3.

A. D. 1775-1776.—Invasion by the revolting American colonists.—Loss and recovery of Montreal.—Successful defence of Quebec.—At the beginning of the revolt of the thirteen colonies which subsequently formed, by their separation from Great Britain, the United States of America, it was believed among them that Canada would join their movement if the British troops which occupied the country were driven out. Acting on this belief, the Continental Congress at Philadelphia, in June, 1775, adopted a resolution instructing General Schuyler to repair without delay to Ticonderoga (which had been surprised and taken a few weeks before by Ethan Allen and his "Green Mountain Boys"), and "if he found it practicable, and it would not be disagreeable to the Canadians, immediately to take possession of St. John's and Montreal, and pursue any other measures in Canada which might have a tendency to promote the peace and security of these colonies." General Schuyler found it difficult to gather troops and supplies for the projected expedition, and it was the middle of August before he was prepared to move. His chief subordinate officer was Gen. Richard Montgomery, an Irishman, formerly in the British service, but settled latterly in New York; and he was to be supported by a cooperative movement planned and led by Benedict Arnold. "General Montgomery, with 3,000 men, would go down Lake Champlain and attack Montreal; while General Arnold, with 1,200, was to seek the headwaters of Kennebec River, cross the height of land, and descend the Chaudiere to the very gates of Quebec. The brave General Carleton, who had been with Wolfe at Quebec, was now in command of the forces of Canada—if 500 British regulars and a few hundred militia might be so denominated. No doubt Governor Carleton with his small army undertook too much. He sought to defend the way to Montreal by holding Fort St. John, and that to Quebec by defending Chambly. Both these places fell before the Americans. General Montgomery pushed on down the River Richelieu and occupied Sorel, throwing forces across the St. Lawrence, and erected batteries on both sides to prevent intercourse between Montreal and Quebec. Montreal, now defenceless, was compelled to surrender on the 13th of November, and 11 British vessels were given up to the enemy.

It was really a dark hour for Canada. General Carleton has been severely criticized for dividing his forces. The truth is, the attack was so unexpected, and so soon after the outbreak of the rebellion, that no plan of defence for Canada had been laid. ... General Carleton escaped from Montreal, and, in a boat, passed the Sorel batteries with muffled oars under cover of night. The general had but reached Quebec in time. The expedition of Arnold had already gained the St. Lawrence on the side opposite the 'Ancient Capital.' The energy displayed by Arnold's men was remarkable. The Kennebec is a series of rapids. Its swift current hurries over dangerous rocks at every turn. The highlands when reached consist of swamps and rocky ridges covered with forest. The Chaudiere proved worse than the Kennebec, and, the current being with the boats, dashed them to pieces on the rocks. Arnold's men, on their six weeks' march, had run short of food, and were compelled to eat the dogs which had accompanied them. Not much more than half of Arnold's army reached the St. Lawrence. Arnold's force crossed the St. Lawrence, landed at Wolfe's Cove, and built huts for themselves on the Plains of Abraham. On the 5th of December Montgomery joined the Kennebec men before Quebec. The united force was of some 3,000 men, supported by about a dozen light guns. Carleton had, for the defence of Quebec, only one company of regulars and a few seamen and marines of a sloop of war at Quebec. The popularity of the governor was such that he easily prevailed upon the citizens, both French and English, to enroll themselves in companies for the defence of their homes. He was able to count upon about 1,600 bayonets. The defences of Quebec were, however, too strong for the Americans. On the night of December 31st, a desperate effort was made to take the city by escalade. Four attacks were made simultaneously. Arnold sought to enter by the St. Charles, on the north side of Quebec, and Montgomery by the south, between Cape Diamond and the St. Lawrence. Two feints were to be made on the side towards the Plains of Abraham. The hope of the commanders was to have forced the gates from the lower to the upper town in both cases. Arnold failed to reach the lower town, and in a sortie the defenders cut off nearly the whole of his column. He escaped wounded. Montgomery was killed at the second entrenchment of the lower town, and his troops retired in confusion. The American generals have been criticized by experts for not making their chief attack on the wall facing on the Plains of Abraham. ... General Arnold remained before Quebec, though his troops had become reduced to 800 men. General Carleton pursued a policy of acting strictly on the defensive. If he retained Quebec it would be his greatest success. General Arnold sought to gain the sympathy of the French Canadian seigniors and people, but without any success. Three thousand troops, however, came to reinforce Arnold early in the year, and 4,000 occupied Montreal, St. John's, and Chambly. But on the 6th of May relief came from England; men of war and transports, with three brigades of infantry besides artillery, stores, and ammunition. The Americans withdrew to Sorel. The British troops followed them, and a brigade encamped at Three Rivers. The Americans at-

tempted to surprise the force at Three Rivers, but were repulsed with heavy loss. The Americans now fell back from Montreal, deserted all the posts down to Lake Champlain, and Governor Carleton had the pleasure of occupying Isle-aux-Noix as the outpost, leaving Canada as it had been before the first attack in the year before."—G. Bryce, *Short Hist. of the Canadian People*, ch. 6, sect. 3.

A. D. 1791.—The Constitutional Act.—Division of the province into Upper and Lower Canada.—"In 1791 a bill was introduced by Pitt dividing the Province into Upper and Lower Canada, the line of division being so drawn as to give a great majority to the British element in Upper Canada and a great majority to the French settlers in Lower Canada. The measure was strongly opposed by Fox, who urged that the separation of the English and French inhabitants was most undesirable. . . . The act was passed, and is known as the Constitutional Act of 1791. . . . In each province the legislature was to consist of the Governor, a Legislative Council and a Legislative Assembly. The Governor had power to give or withhold the royal assent to bills, or to reserve them for consideration by the Crown. He could summon, prorogue, or dissolve the legislature, but was required to convene the legislature at least once a year. The Legislative Council in Upper Canada consisted of not less than 7, and in Lower Canada of not less than 15 members, chosen by the King for life, the Speaker being appointed by the Governor-General. The Legislative Assembly was in counties elected by 40s. freeholders, and in towns by owners of houses of £5 yearly value and by resident inhabitants paying £10 yearly rent. The number and limits of electoral districts were fixed by the Governor-General. Lower Canada had 50 members, Upper Canada 16 members, assigned to their respective legislatures. The new Constitution did not prove a success. Serious differences arose between the Legislative Council and the Legislative Assembly in regard to the control of the revenue and supplies, differences which were aggravated by the conflict that still went on between the French and English races. . . . The discontent resulted in the rebellion of 1837-8."—J. E. C. Munro, *The Constitution of Canada*, ch. 2.

A. D. 1820-1837.—The Family Compact.—

"The Family Compact manifestly grew out of the principles of the U. E. Loyalists. It was the union of the leaders of the loyalists with others of kindred spirit, to rule Upper Canada, heedless of the rights or wishes of its people. We have admired the patriotic, heroic and sentimental side of U. E. loyalism; but plainly, as related to civil government, its political doctrines and practices were tyrannical. Its prominent members belonged to the class which in the American colonies, in the persons of Governors Bernard and Hutchinson, and many others of high office and standing, had plotted to destroy the liberties of the people and had hastened the American revolution. . . . By the years 1818 or 1820 a junto or cabal had been formed, definite in its aims and firmly combined together, known as the Family Compact, not to its best leaders seeming an embodiment of selfishness, but rather set for patriotic defence and hallowed with the name of religion."—G. Bryce, *Short Hist. of the Canadian People*, ch. 10, sect. 2.—"Upper Canada . . . has long been entirely governed by a party commonly designated throughout the Province as the 'Family Compact,' a name not much more appropriate than party designations usually are, inasmuch as there is, in truth, very little of family connection among the persons thus united. For a long time this body of men, receiving at times accessions to its members, possessed almost all the highest public offices, by means of which, and of its influence in the Executive Council, it wielded all the powers of government; it maintained influence in the legislature by means of its predominance in the Legislative Council; and it disposed of a large number of petty posts which are in the patronage of the Government all over the Province. Successive Governors, as they came in their turn, are said to have either submitted quietly to its influence, or, after a short and unavailing struggle, to have yielded to this well-organized party the real conduct of affairs. The bench, the magistracy, the high offices of the Episcopal Church, and a great part of the legal profession, are filled by the adherents of this party: by grant or purchase, they have acquired nearly the whole of the waste lands of the Province; they are all powerful in the chartered banks, and, till lately, shared among themselves almost exclusively all offices of trust and profit. The bulk of this party consists, for the most part, of native-born inhabitants of the colony, or of emigrants who settled in it before the last war with the United States; the principal members of it belong to the church of England, and the maintenance of the claims of that church has always been one of its distinguishing characteristics."—Earl of Durham, *Rept. on the Affairs of British N. Am.*, p. 105.—"The influences which produced the Family Compact were not confined to Upper Canada. In the Lower Province, as well as in Nova Scotia and New Brunswick, similar causes led to similar results, and the term Family Compact has at one

time or another been a familiar one in all the British North American colonies. . . . The designation Family Compact, however, did not owe its origin to any combination of North American colonists, but was borrowed from the diplomatic history of Europe."—J. C. Dent, *The Story of the Upper Canadian Rebellion*, ch. 3.

A. D. 1837.—The Causes of discontent which produced rebellion.—"It was in Lower Canada that the greatest difficulties arose. A constant antagonism grew up between the majority of the legislative council, who were nominees of the Crown, and the majority of the representative assembly, who were elected by the population of the province [see above: A. D. 1791]. The home Government encouraged and indeed kept up that most odious and dangerous of all instruments for the supposed management of a colony—a 'British party' devoted to the so-called interests of the mother country, and obedient to the word of command from their masters and patrons at home. The majority in the legislative council constantly thwarted the resolutions of the vast majority of the popular assembly. Disputes arose as to the voting of supplies. The Government retained in their service officials whom the representative assembly had condemned, and insisted on the right to pay them their salaries out of certain funds of the colony. The representative assembly took to stopping the supplies, and the Government claimed the right to counteract this measure by appropriating to the purpose such public moneys as happened to be within their reach at the time. The colony—for indeed on these subjects the population of Lower Canada, right or wrong, was so near to being of one mind that we may take the declarations of public meetings as representing the colony—demanded that the legislative council should be made elective, and that the colonial government should not be allowed to dispose of the moneys of the colony at their pleasure. The House of Commons and the Government here replied by refusing to listen to the proposal. . . . It is not necessary to suppose that in all these disputes the popular majority were in the right and the officials in the wrong. No one can doubt that there was much bitterness of feeling arising out of the mere differences of race. . . . At last the representative assembly refused to vote any further supplies or to carry on any further business. They formulated their grievances against the home Government. Their complaints were of arbitrary conduct on the part of the governors; intolerable composition of the legislative council, which they insisted ought to be elective; illegal appropriation of the public money, and violent prorogation of the provincial parliament. One of the leading men in the movement which afterwards became rebellion in Lower Canada was Mr. Louis Joseph Papineau. This man had risen to high position by his talents, his energy, and his undoubtedly honourable character. He had represented Montreal in the representative Assembly of Lower Canada, and he afterwards became Speaker of the House. He made himself leader of the movement to protest against the policy of the governors, and that of the Government by whom they were sustained. He held a series of meetings, at some of which undoubtedly rather strong language was used. . . . Lord Gosford, the governor, began by dismissing several militia officers who had taken part in some of these

demonstrations; Mr. Papineau himself was an officer of this force. Then the governor issued warrants for the apprehension of many members of the popular Assembly on the charge of high treason. Some of these at once left the country; others against whom warrants were issued were arrested, and a sudden resistance was made by their friends and supporters. Then, in a manner familiar to all who have read anything of the history of revolutionary movements, the resistance to a capture of prisoners suddenly transformed itself into open rebellion."—J. McCarthy, *Hist. of our own Times*, v. 1, ch. 3.—Among the grievances which gave rise to discontent in both Upper and Lower Canada, "first of all there was the chronic grievance of the Clergy Reserves [which were public lands set apart by the Act of 1791 for the support of the Protestant Clergy], common both to British and French, to Upper and to Lower Canada. In Upper Canada these reserves amounted to 2,500,000 acres, being one-seventh of the lands in the Province. Three objections were made against continuing these Reserves for the purpose for which they had been set apart. The first objection arose from the way in which the Executive Council wished to apply the revenues accruing from these lands. According to the Act they were to be applied for 'maintaining the Protestant religion in Canada'; and the Executive Council interpreted this as meaning too exclusively the Church of England, which was established by law in the mother-country. But the objectors claimed a right for all Protestant denominations to share in the Reserves. The second objection was that the amount of these lands was too large for the purpose in view: and the third referred to the way in which the Reserves were selected. These 2,500,000 acres did not lie in a block, but, when the early surveys were made, every seventh lot was reserved; and as these lots were not cleared for years the people complained that they were not utilized, and so became inconvenient barriers to uniform civilization. With the Roman Catholics, both priests and people, the Clergy Reserves were naturally unpopular. . . . An additional source of complaint was found in the fact that the government of Upper and Lower Canada had found its way into the hands of a few powerful families banded together by a Family Compact [see above: A. D. 1820-1837]. . . . But the Constitutional difficulty was, after all, the great one, and it lay at the bottom of the whole dispute. . . . Altogether the issues were very complicated in the St. Lawrence Valley Provinces and the Maritime Provinces . . . and so it is not to be wondered at that some should interpret the rebellion as a class, and perhaps semi-religious, contest rather than a race-conflict. The constitutional dead-lock, however, was tolerably clear to those who looked beneath the surface. . . . The main desire of all was to be freed of the burden of Executive Councils, nominated at home and kept in office with or without the wish of the people. In Upper Canada, William Lyon Mackenzie, and in Lower Canada, Louis Papineau and Dr. Wolfred Nelson, agitated for independence."—W. P. Greswell, *Hist. of the Dominion of Canada*, ch. 16.

ALSO IN: J. McMullen, *Hist. of Canada*, ch. 19-20.—Earl of Durham, *Rept. and Dispatches*.—Sir F. B. Head, *Narrative*.—*Rept. of Comrs. appointed to inquire into the grievances complained of in Lower Canada* [House of Commons, Feb. 20, 1837].

A. D. 1837-1838.—The rebellion under Papineau and Mackenzie, and its suppression.—The Burning of the Caroline.—"Immediately on the breaking out of the rebellion, the constitution of Lower Canada was suspended: the revolt was put down at once, and with little difficulty. Though the outbreak in Upper Canada showed that a comparatively small portion of the population was disaffected to the government, there were some sharp skirmishes before the smouldering fire was completely trodden out. . . . On the night of the 4th of December, 1837, when all Toronto was asleep, except the policemen who stood sentries over the arms in the city hall, and a few gentlemen who sat up to watch out the night with the Adjutant-General of Militia in the Parliament House, the alarm came that the rebels were upon the city. They were under the command of a newspaper editor named Mackenzie, whose grotesque figure was until lately [this was published in 1865] familiar to the frequenters of the Canadian House of Assembly. Rumours had been rife for some days past of arming and drilling among the disaffected in the Home and London districts. . . . The alarm threw Toronto into commotion. . . . The volunteers were formed in the market square during the night and well armed. In point of discipline, even in the first instance, they were not wholly deficient, many of them being retired officers and discharged men from both the naval and military services. . . . Towards morning news came of a smart skirmish which had occurred during the night, in which a party of the rebels were driven back and their leader killed. During the succeeding day and night, loyal yeomen kept pouring in to act in defence of the crown. Sir Allan, then Colonel, Macnab, the Speaker of the House of Assembly . . . raised a body of his friends and adherents in the course of the night and following day, and, seizing a vessel in the harbour at Hamilton, hurried to Toronto. . . . The rebels were defeated and dispersed next day, at a place some two miles from Toronto. In this action, the Speaker took the command of the Volunteers, which he kept during the subsequent campaign on the Niagara frontier, and till all danger was over. . . . Mackenzie soon rallied his scattered adherents, and seized Navy Island, just above Niagara Falls, where he was joined by large numbers of American 'sympathizers,' who came to the spot on the chance of a quarrel with the English. On receipt of this intelligence, the Speaker hastened from the neighbourhood of Brantford (where he had just dispersed a band of insurgents under the command of a doctor named Duncombe) to reinforce Colonel Cameron, formerly of the 79th, who had taken up a position at Chippewa. Navy Island, an eyott some quarter of a mile in length, lies in the Niagara River within musket-shot of the Canadian bank. The current runs past the island on both sides with great velocity, and, immediately below it, hurries over the two miles of rocks and rapids that precede its tremendous leap. The rebels threw up works on the side facing the Canadians. They drew their supplies from Fort Schlosser, an American work nearly opposite the village of Chippewa." A small steamboat, named the Caroline, had been secured by the insurgents and was plying between Fort Schlosser and Navy Island. She "had brought over several

field-pieces and other military stores; it therefore became necessary to decide whether it was not expedient for the safety of Canada to destroy her. Great Britain was not at war with the United States, and to cut out an American steamer from an American port was to incur a heavy responsibility. Nevertheless Colonel Macnab determined to assume it." A party sent over in boats at night to Fort Schlosser surprised the Caroline at her wharf, fired her and sent her adrift in the river, to be carried over the Falls. —Viscount Bury, *Exodus of the Western Nations*, v. 2, ch. 12.—"On all sides the insurgents were crushed, jails were filled with their leaders, and 180 were sentenced to be hanged. Some of them were executed and some were banished to Van Dieman's Land, while others were pardoned on account of their youth. But there was a great revulsion of feeling in England, and after a few years, pardons were extended to almost all. Even Papineau and Mackenzie, the leaders of the rebellion, were allowed to come back, and, strange to say, both were elected to seats in the Canadian Assembly."—W. P. Greswell, *Hist. of the Dominion of Canada*, ch. 16, sect. 15.—On the American border the Canadian rebellion of 1837-38 was very commonly called "the Patriot War."

A. D. 1840-1841.—International Imbroglío consequent on the burning of the Caroline.—The McLeod Case.—The burning of the steamer Caroline (see, above, A. D. 1837-1838) gave rise to a serious question between Great Britain and the United States. "In the fray which occurred, an American named Duffree was killed. The British government avowed this invasion to be a public act and a necessary measure of self-defence; but it was a question when Mr. Van Buren [President of the United States] went out of office whether this avowal had been made in an authentic manner. . . . In November, 1840, one Alexander McLeod came from Canada to New York, where he boasted that he was the slayer of Duffree, and thereupon was at once arrested on a charge of murder and thrown into prison. This aroused great anger in England, and the conviction of McLeod was all that was needed to cause immediate war. . . . Our [the American] government was, of course, greatly hampered in action . . . by the fact that McLeod was within the jurisdiction and in the power of the New York courts, and wholly out reach of those of the United States. . . . Mr. Webster [who became Secretary of State under President Taylor] . . . was hardly in office before he received a demand from Mr. Fox for the release of McLeod, in which full avowal was made that the burning of the Caroline was a public act. Mr. Webster determined that . . . the only way to dispose of McLeod was to get him out of prison, separate him, diplomatically speaking, from the affair of the Caroline, and then take that up as a distinct matter for negotiation with the British government. . . . His first step was to instruct the Attorney-General to proceed to Lockport, where McLeod was imprisoned, and communicate with the counsel for the defence, furnishing them with authentic information that the destruction of the Caroline was a public act, and that therefore McLeod could not be held responsible. . . . This threw

the responsibility for McLeod, and for consequent peace or war, where it belonged, on the New York authorities, who seemed, however, but little inclined to assist the general government. McLeod came before the Supreme Court of New York in July, on a writ of habeas corpus, but they refused to release him on the grounds set forth in Mr. Webster's instructions to the Attorney-General, and he was remanded for trial in October, which was highly embarrassing to our government, as it kept this dangerous affair open." But when McLeod came to trial in October, 1841, it appeared that he was a mere braggart who had not even been present when Durfree was killed. His acquittal happily ended the case, and smoothed the way to the negotiation of the Ashburton treaty, which opened at Washington soon afterwards and which settled all questions between England and the United States.—H. C. Lodge, *Daniel Webster*, ch. 8.

A. D. 1840-1867.—Reunion of the provinces.
—**The opposition of races.—Clear Grits and Conservatives.**—"The reunion of the two Provinces had been projected before: it was greatly desired by the British of the Lower Province; and in 1822 a bill for the purpose had actually been brought into the Imperial Parliament, but the French being bitterly opposed to it, the Bill had been dropped. The French were as much opposed to reunion as ever, clearly seeing, what the author of the policy [Lord Durham] had avowed, that the measure was directed against their nationality. But since the Rebellion they were prostrate. Their Constitution had been superseded by a Provisional Council sitting under the protection of Imperial bayonets, and this Council consented to the union. The two Provinces were now [July, 1840] placed under a Governor-General with a single legislature, consisting, like the legislatures of the two Provinces before, of an Upper House nominated by the Crown and a Lower House elected by the people. Each province was to have the same number of representatives, although the population of the French Province was at that time much larger than that of the British Province. The French language was proscribed in official proceedings. French nationality was thus sent, constitutionally, under the yoke. But to leave it its votes, necessary and right as that might be, was to leave it the only weapon which puts the weak on a level with the strong, and even gives them the advantage, since the weak are the most likely to hold together and to submit to the discipline of organised party. . . . The French . . . 'had the wisdom,' as their manual of history . . . complacently observes, 'to remain united among themselves, and by that union were able to exercise a happy influence on the Legislature and the Government.' Instead of being politically suppressed, they soon, thanks to their compactness as an interest and their docile obedience to their leaders, became politically dominant. The British factions began to bid against each other for their support, and were presently at their feet. . . . The statute proscribing the use of the French language in official proceedings was repealed, and the Canadian Legislature was made bi-lingual. The Premiership was divided between the English and the French leader, and the Ministries were designated by the double

name—"the Lafontaine-Baldwin," or "the Macdonald-Taché." The French got their full share of seats in the Cabinet and of patronage; of public funds they got more than their full share, especially as being small consumers of imported goods they contributed far less than their quota to the public revenue. By their aid the Roman Catholics of the Upper Province obtained the privilege of Separate Schools in contravention of the principle of religious equality and severance of the Church from the State. In time it was recognized as a rule that a Ministry to retain power must have a majority from each section of the Province. This practically almost reduced the Union to a federation, under which French nationality was more securely entrenched than ever. Gradually the French and their clergy became, as they have ever since been, the basis of what styles itself a Conservative party, playing for French support, by defending clerical privilege, by protecting French nationality, and, not least, by allowing the French Province to dip her hand deep in the common treasury. On the other hand, a secession of thorough-going Reformers from the Moderates . . . gave birth to the party of the 'Clear Grits,' the leader of which was Mr. George Brown, a Scotch Presbyterian, and which having first insisted on the secularization of the Clergy Reserves, became, when that question was out of the way, a party of general opposition to French and Roman Catholic influence. . . . A change had thus come over the character and relations of parties. French Canada, so lately the seat of disaffection, became the basis of the Conservative party. British Canada became the stronghold of the Liberals. . . . A period of tricky combinations, perfidious alliances, and selfish intrigues now commenced, and a series of weak and ephemeral governments was its fruit."—Goldwin Smith, *Canada and the Canadian Question*, ch. 7.

A. D. 1866-1871.—Fenian invasions.—The Fenian movement (see IRELAND: A. D. 1858-1867) had its most serious outcome in an attempted invasion of Canada from the United States, which took place in 1866. "Canadian volunteers were under arms all day on the 17th of March, 1866, expecting a Fenian invasion, but it was not made: in April an insignificant attack was made upon New Brunswick. About 900 men, under Col. O'Neil, crossed from Buffalo to Fort Erie on the night of May 31st. Moving westward, this body aimed at destroying the Welland Canal, when they were met by the Queen's Own Volunteer Regiment of Toronto, and the 13th battalion of Hamilton Militia, near the village of Ridgeway. Here, after a conflict of two hours, in which for a time the Volunteers drove the enemy before them, the Canadian

forces retired to Ridgeway, and thence to Port Colborne, with a loss of nine killed and 30 wounded. Col. Peacock, in charge of a body of regulars, was marching to meet the volunteers, so that O'Neil was compelled to flee to Fort Erie, and, crossing to the United States with his men, was arrested, but afterwards liberated. The day after the skirmish the regulars and volunteers encamped at Fort Erie, and the danger on the Niagara Frontier was past. A Fenian expedition threatened Prescott, aiming at reaching the capital at Ottawa, and another band of marauders crossed the border from St. Albans, Vermont, but both were easily driven back. The Fenian troubles roused strong feeling in Canada against the American authorities. . . . A Fenian attack was led by Col. O'Neil on the Lower Canadian frontier, in 1870, but it was easily met, and the United States authorities were moved to arrest the repulsed fugitives. A foolish movement was again made in 1871 by the same leader, through Minnesota, against Manitoba. Through the prompt action of the friendly American commander at Fort Pembina, the United States troops followed the Fenians across the border, arrested their leader, and, though he was liberated after a trial at St. Paul, Minnesota, the expedition ended as a miserable and laughable failure. These movements of the Fenian Society, though trifling in effect, yet involved Canada in a considerable expense from the maintenance of bodies of the Active Militia at different points along the frontier. The training of a useful force of citizen soldiery however resulted."—G. Bryce, *Short Hist. of the Canadian People*, pp. 468-470.

A. D. 1867.—Federation of the provinces of British North America in the Dominion of Canada.—The constitution of the Dominion.—"The Union between Upper and Lower Canada lasted until 1867, when the provinces of British North America were brought more closely together in a federation and entered on a new era in their constitutional history. For many years previous to 1865, the administration of government in Canada had become surrounded with political difficulties of a very perplexing character. . . . Parties at last were so equally balanced on account of the antagonism between the two sections, that the vote of one member might decide the fate of an administration, and the course of legislation for a year or a series of years. From the 21st of May, 1862, to the end of June, 1864, there were no less than five different ministries in charge of the public business. Legislation, in fact, was at last practically at a dead-lock. . . . It was at this critical juncture of affairs that the leaders of the government and opposition, in the session of 1864, came to a mutual understanding, after the most mature consideration of the whole question. A coalition government was formed on the basis of a federal union of all the British American provinces, or of the two Canadas, in case of the failure of the larger scheme. . . . It was a happy coincidence that the legislatures of the lower provinces were about considering a maritime union at the time the leading statesmen of Canada had combined to mature a plan of settling their political difficulties. The Canadian

ministry at once availed themselves of this fact to meet the maritime delegates at their convention in Charlottetown, and the result was the decision to consider the question of the larger union at Quebec. Accordingly, on the 10th of October, 1864, delegates from all the British North American provinces assembled in conference, in 'the ancient capital,' and after very ample deliberations during eighteen days, agreed to 72 resolutions, which form the basis of the Act of Union. These resolutions were formally submitted to the legislature of Canada in January, 1865, and after an elaborate debate, which extended from the 3d of February to the 14th of March, both houses agreed by very large majorities to an address to her Majesty praying her to submit a measure to the Imperial Parliament 'for the purpose of uniting the provinces in accordance with the provisions of the Quebec resolutions.' Some time, however, had to elapse before the Union could be consummated, in consequence of the strong opposition that very soon exhibited itself in the maritime provinces, more especially to the financial terms of the scheme." Certain modifications of the terms of the Quebec resolutions were accordingly made, and "the provinces of Canada, Nova Scotia, and New Brunswick, being at last in full accord, through the action of their respective legislatures, the plan of union was submitted on the 12th of February, 1867, to the Imperial Parliament, where it met with the warm support of the statesmen of all parties, and passed without amendment in the course of a few weeks, the royal assent being given on the 29th of March. The new constitution came into force on the First of July [annually celebrated since, as 'Dominion Day'] 1867, and the first parliament of the united provinces met on November of the same year. . . . The confederation, as inaugurated in 1867, consisted only of the four provinces of Ontario [Upper Canada], Quebec [Lower Canada], Nova Scotia, and New Brunswick. By the 146th section of the Act of Union, provision was made for the admission of other colonies on addresses from the parliament of Canada, and from the respective legislatures of Newfoundland, Prince Edward Island, and British Columbia. Rupert's Land and the North-west Territory might also at any time be admitted into the Union on the address of the Canadian Parliament. . . . The title of Dominion did not appear in the Quebec resolutions. The 71st Res. is to the effect that 'Her Majesty be solicited to determine the rank and name of the federated Provinces.' The name ['The Dominion of Canada'] was arranged at the conference held in London in 1866, when the union bill was finally drafted."—J. G. Bourinot, *Manual of Const. Hist. of Canada*, ch. 6-7 (*with foot-note*).—"The Federal Constitution of the Dominion of Canada is contained in the British North America Act, 1867, a statute of the British Parliament (30 Vict., c. 3). I note a few of the many points in which it deserves to be compared with that of the United States. The Federal or Dominion Government is conducted on the so-called 'Cabinet system' of England, i. e., the Ministry sit in Parliament, and hold office at the pleasure of the House of Commons. The Governor-General [appointed by the Crown] is in the position of an irresponsible and permanent executive similar to that of the Crown of Great Britain, acting on the advice

of responsible ministers. He can dissolve Parliament. The Upper House or Senate, is composed of 78 persons, nominated for life by the Governor-General, i. e., the Ministry. The House of Commons has at present 210 members, who are elected for five years. Both senators and members receive salaries. The Senate has very little power or influence. The Governor-General has a veto but rarely exercises it, and may reserve a bill for the Queen's pleasure. The judges, not only of the Federal or Dominion Courts, but also of the provinces, are appointed by the Crown, i. e., by the Dominion Ministry, and hold for good behaviour. Each of the Provinces, at present [1888] seven in number, has a legislature of its own, which, however, consists in Ontario, British Columbia, and Manitoba, of one House only, and a Lieutenant-Governor, with a right of veto on the acts of the legislature, which he seldom exercises. Members of the Dominion Parliament cannot sit in a Provincial legislature. The Governor-General has a right of disallowing acts of a Provincial legislature, and sometimes exerts it, especially when a legislature is deemed to have exceeded its constitutional competence. In each of the Provinces there is a responsible Ministry, working on the Cabinet system of England. The distribution of matters within the competence of the Dominion Parliament and of the Provincial legislatures respectively, bears a general resemblance to that existing in the United States; but there is this remarkable distinction, that whereas in the United States, Congress has only the powers actually granted to it, the State legislatures retaining all such powers as have not been taken from them, the Dominion Parliament has a general power of legislation, restricted only by the grant of certain specific and exclusive powers to the Provincial legislatures. Criminal law is reserved for the Dominion Parliament; and no Province has the right to maintain a military force. Questions as to the constitutionality of a statute, whether of the Dominion Parliament or of a Provincial legislature, come before the courts in the ordinary way, and if appealed, before the Judicial Committee of the Privy Council in England. The Constitution of the Dominion was never submitted to a popular vote, and can be altered only by the British Parliament, except as regards certain points left to its own legislature. . . . There exists no power of amending the Provincial constitutions by popular vote similar to that which the peoples of the several States exercise in the United States."—J. Bryce, *The American Commonwealth*, v. 1, app., note (B) to ch. 30.—See CONSTITUTION OF CANADA.

ALSO IN: J. E. C. Munro, *The Const. of Canada (with text of Act in app.)*—Part. *Debate on Confederation*, 3d Sess., 8th Prov. Parl. of Canada.—W. Houston, *Docs. Illustrative of the Canadian Const.*, pp. 186-224.

A. D. 1869-1873.—Acquisition of the Hudson's Bay Territory.—Admission of Manitoba, British Columbia and Prince Edward's Island to the Dominion.—In 1869 . . . the Dominion was enlarged by the acquisition of the famous Hudson's Bay Territory. When the charter of the Hudson's Bay Company expired in 1869, Lord Granville, then Colonial Secretary, proposed that the chief part of the Company's territories should be transferred to the Dominion for £300,000; and the proposition was agreed to

on both sides. The Hudson's Bay Charter dated from the reign of Charles II. The region to which it referred carries some of its history imprinted in its names. Prince Rupert was at the head of the association incorporated by the Charter into the Hudson's Bay Company. The name of Rupert's Land perpetuates his memory.

. . . The Hudson's Bay Company obtained from King Charles, by virtue of the Charter in 1670, the sole and absolute government of the vast watershed of Hudson's Bay, the Rupert's Land of the Charter, on condition of paying yearly to the King and his successors 'two elks and two black beavers,' 'whenever and as often as we, our heirs and successors, shall happen to enter into the said countries, territories and regions.' The Hudson's Bay Company was opposed by the North West Fur Company in 1783, which fought them for a long time with Indians and law, with the tomahawk of the red man and the legal judgment of a Romilly or a Keating. In 1812 Lord Selkirk founded the Red River Company. This interloper on the battle field was harassed by the North West Company, and it was not until 1821, when the Hudson's Bay and North West Companies—impoverished by their long warfare—amalgamated their interests, that the Red River settlers were able to reap their harvests in peace, disturbed only by occasional plagues of locusts and blackbirds. In 1835, on Lord Selkirk's death, the Hudson's Bay Company bought the settlement from his executors. It had been under their sway before that, having been committed to their care by Lord Selkirk during his lifetime. The privilege of exclusive trading east of the Rocky Mountains was conferred by Royal license for twenty-one years in May 1838, and some ten years later the Company received a grant of Vancouver's Island for the term of ten years from 1849 to 1859. The Hudson's Bay Company were always careful to foster the idea that their territory was chiefly wilderness, and discountenanced the reports of its fertility and fitness for colonisation which were from time to time brought to the ears of the English Government. In 1857, at the instance of Mr. Labouchere, a Select Committee of the House of Commons was appointed to enquire into the state of the British possessions under the Company's administration. Various Government expeditions, and the publication of many Blue Books, enlightened the public mind as to the real nature of those tracts of land which the council from the Fenchurch Street house declared to be so desolate. . . . During the sittings of the Committee there was cited in evidence a petition from 575 Red River settlers to the Legislative Assembly of Canada demanding British protection. This appeal was a proceeding curiously at variance with the later action of the settlement. When in 1869 the chief part of the territories was transferred to Canada, on the proposition of Earl Granville, the Red River country rose in rebellion, and refused to receive the new Governor. Louis Riel, the insurgent chief, seized on Fort Garry and the Company's treasury, and proclaimed the independence of the settlement. Sir Garnet, then Colonel, Wolseley, was sent in command of an expedition which reached Fort Garry on August 23, when the insurgents submitted without resistance, and the district received the name of Manitoba."—J. McCarthy, *Hist. of our own Times*, ch. 55 (v. 4).—Manitoba

and the Northwest Territories were admitted to the Dominion Confederation May 12, 1870; British Columbia, July 20, 1871; Prince Edward Island, July 1, 1873.—J. McCoun, *Manitoba and the Great North West*.

CANARY ISLANDS, Discovery of the.—The first great step in African exploration "was the discovery of the Canary Islands. These were the 'Elysian fields' and 'Fortunate islands' of antiquity. Perhaps there is no country in the world that has been so many times discovered, conquered, and invaded, or so much fabled about, as these islands. There is scarcely a nation upon earth of any maritime repute that has not had to do with them. Phœnicians, Carthaginians, Romans, Moors, Genoese, Normans, Portuguese, and Spaniards of every province (Aragonese, Castilians, Gallicians, Biscayans, Andalusians) have all made their appearance in these islands. The Carthaginians are said to have discovered them, and to have reserved them as an asylum in case of extreme danger to the state. Sertorius, the Roman general who partook the fallen fortunes of Marius is said to have meditated retreat to these 'islands of the blessed,' and by some writers is supposed to have gone there. Juba, the Mauritanian prince, son of the Juba celebrated by Sallust, sent ships to examine them, and has left a description of them. Then came the death of empires, and darkness fell upon the human race, at least upon the records of their history. When the world revived, and especially when the use of the loadstone began to be known among mariners, the Canary Islands were again discovered. Petrarch is referred to by Viera to prove that the Genoese sent out an expedition to these islands. Las Casas mentions that an English or French vessel bound from France or England to Spain was driven by contrary winds to the Canary Islands, and on its return spread abroad in France an account of the voyage."—A. Helps, *Spanish Conquest*, bk. 1, ch. 1.

CANON LAW.—"The Canon Law in its widest sense consists of Holy Scripture, the customary laws and usages of the Church, and of constitutions comprising the decrees and decretals of the Popes, the canons of councils, and, to a limited extent, the writings of the Fathers."—J. Dodd, *A History of Canon Law*, p. 161.—In a more restricted sense it is described by Blackstone as being "a body of Roman ecclesiastical law, relative to such matters as that church either has, or pretends to have, the proper jurisdiction over. This is compiled from the opinions of the ancient Latin fathers, the decrees of general councils, and the decretal epistles and bulls of the Holy See."

CANOPUS, Decree of.—An important inscribed stone found in 1865 at San, or Tanis, in Egypt, which is a monument of the reign of Ptolemy Euergetes, who ascended the throne in 246 B. C. It gives "in hieroglyphics and Greek (the demotic version is on the edge) a decree of the priests assembled at Canopus for their yearly salutation of the king. When they were so assembled, in his ninth year, his infant daughter Berenice, fell sick and died, and there was great lamentation over her. The decree first recounts the generous conduct and prowess of the king, who had conquered all his enemies abroad, and had brought back from Persia all the statues of the gods carried off in old time from Egypt by foreign kings. He had also, in a great threatening of famine, when the Nile had failed to rise to its full amount, imported vast quantities of corn from Cyprus, Phœnicia, &c., and fed his people. Consequently divine honours are to be paid to him and his queen as 'Benefactor-Gods' in all the temples of Egypt, and feasts are to be held in their honour. . . . This great inscription, far more perfect and considerably older than the Rosetta Stone, can now be cited as the clearest proof of Champollion's reading of the hieroglyphics."—J. P. Mahaffy, *Story of Alexander's Empire*, ch. 15, note.

CANOSSA, Henry IV. at.—In the conflict which arose between the German Emperor, Henry IV. (then crowned only as King of the Romans) and Pope Gregory VII. (the inflexible Hildebrand), the former was placed at a great disadvantage by revolts and discontents in his own Germanic dominions. When, therefore, on the 22d of February, A. D. 1076, the audacious pontiff pronounced against the king his tremendous sentence, not only of excommunication, but of deposition, releasing all Christians from

allegiance to him, he addressed a large party, both in Germany and Italy, who were more than willing to accept an excuse for depriving Henry of his crown. This party controlled a diet held at Tribur, in October, which declared that his forfeiture of the throne would be made irrevocable if he did not procure from the pope a release from his excommunication before the coming anniversary of its pronouncement, in February. A diet to be held then at Augsburg, under the presidency of the pope, would determine the affairs of the Empire. With characteristic energy, Henry resolved to make his way to the pope, in person, and to become reconciled with him, before the Augsburg meeting. Accompanied by the queen, her child, and a few attendants, he crossed the Alps, with great hardship and danger, in the midst of an uncommonly cold and snowy winter. Meantime, the pope had started upon his journey to Augsburg. Hearing on the way of Henry's movement to meet him, not desiring the encounter, and distrusting, moreover, the intentions of his enemy, he took refuge in the strong fortress of Canossa, high up in the rocky recesses of the Apennines. To that mountain retreat the desperate king pressed his way. "It was January 21, 1077, when Henry arrived at Canossa; the cold was severe and the snow lay deep. He was lodged at the foot of the castle-steep, and had an interview with the countess Matilda [mistress of the castle, and devoted friend of the pope], Hugh, abbot of Clugny, and others, in the Chapel of St. Nicolas, of which no traces now remain. Three days were spent in debating terms of reconciliation; Matilda and Hugh interceded with the pope on the king's behalf, but Gregory was inexorable; unless Henry surrendered the crown into the pope's hands the ban should not be taken off. Henry could not stoop so low as this, but he made up his mind to play the part of a penitent suppliant. Early on the morning of January 25 he mounted the winding, rocky path, until he reached the uppermost of the three walls, the one which enclosed the castle yard. And here, before the gateway which still exists, and perpetuates in its name, 'Porta di penitenza,' the memory of this strange event, the king, barefoot, and clad in a coarse woolen shirt, stood knocking for admittance. But he knocked in vain: from morning till evening the heir of the Roman Empire stood shivering outside the fast-closed door. Two more days he climbed the rugged path and stood weeping and imploring to be admitted." At last, the iron-willed pontiff consented to a parley, and an agreement was brought about by which Henry was released from excommunication, but the question of his crown was left for future settlement. In the end he gained nothing by his extraordinary abasement of himself. Many of his supporters were alienated by it; a rival king was elected. Gathering all his energies, Henry then stood his ground and made a fight in which even Gregory fled before him; but it was all to no avail. The triumph remained with the priests.—W. R. W. Stephens, *Hildebrand and His Times*, ch. 11-15.

A. D. 1720-1745.—The fortification of Louisbourg.—After the surrender of Placentia or Plaisance, in Newfoundland, to England, under the treaty of Utrecht (see NEWFOUNDLAND: A. D. 1713), the French government determined to fortify strongly some suitable harbor on the island of Cape Breton for a naval station, and especially for the protection of the fisheries of France on the neighboring coasts. The harbor known previously as Havre à l'Anglois was chosen for the purpose. "When the French

government decided in favour of Havre à l'Anglois its name was changed to Louisbourg, in honour of the king; and, to mark the value set upon Cape Breton it was called Isle Royale, which it retained until its final conquest in 1758, when its ancient name was resumed." In 1720 the fortifications were commenced, and the work of their construction was prosecuted with energy and with unstinted liberality for more than twenty years. "Even the English colonies contributed a great proportion of the materials used in their construction. When Messrs. Newton and Bradstreet, who were sent to confer with M. de St. Ovide [to remonstrate against the supplying of arms to the Indians in Nova Scotia] . . . returned to Annapolis, they reported that during their short stay at Louisbourg, in 1725, fourteen colonial vessels, belonging chiefly to New England, arrived there with cargoes of boards, timber and bricks. . . . Louisbourg [described, with a plan, in the work here quoted] . . . had, between the years 1720 and 1745, cost the French nation the enormous sum of 30,000,000 livres, or £1,200,000 sterling; nevertheless, as Dussieux informs us, the fortifications were still unfinished, and likely to remain so, because the cost had far exceeded the estimates; and it was found such a large garrison would be required for their defence that the government had abandoned the idea of completing them according to the original design."—R. Brown, *Hist. of the Island of Cape Breton*, letters 9-11.—"The fort was built of stone, with walls more than 30 feet high, and a ditch 80 feet wide, over which was a communication with the town by a drawbridge. It had six bastions and three batteries, with platforms for 148 cannon and six mortars. On an islet, which was flanked on one side by a shoal, a battery of 30 guns, 28 pounders, defended the entrance of the harbor, which was about 400 yards wide, and was also commanded from within by the Grand or Royal Battery, mounting as many guns, of the calibre of 42 pounds. The fort . . . was a safe rendezvous and refuge for French fleets and privateers, sailing in the Western Hemisphere. It commanded the maritime way into Canada, and it watched the English settlements all along the coast. It was a standing threat to the great business of New England seamen, which was the fishery on the banks."—J. G. Palfrey, *Hist. of N. Eng.*, bk. 5, ch. 9 (v. 5).—"So great was its strength that it was called the Dunkirk of America. It had nunneries and palaces, terraces and gardens. That such a city rose upon a low and desolate island in the infancy of American colonization appears incredible; explanation is alone found in the fishing enthusiasm of the period."—C. B. Elliott, *The U. S. and the N. E. Fisheries*, p. 18.

A. D. 1758-1760.—The final capture and destruction of Louisbourg, by the English.—"In May, 1758 [during the Seven Years War, see CANADA: A. D. 1750-1753 and after], a

powerful fleet, under command of Admiral Boscawen, arrived at Halifax for the purpose of recapturing a place [Louisbourg] which ought never to have been given up. The fleet consisted of 23 ships of the line and 18 frigates, besides transports, and when it left Halifax it numbered 157 vessels. With it was a land force, under Jeffery Amherst, of upward of 12,000 men. The French forces at Louisbourg were much inferior, and consisted of only 8 ships of the line and 3 frigates, and of about 4,000 soldiers. The English fleet set sail from Halifax on the 28th of May, and on the 8th of June a landing was effected in Gabarus Bay. The next day the attack began, and after a sharp conflict the French abandoned and destroyed two important batteries. The siege was then pushed by regular approaches; but it was not until the 26th of July that the garrison capitulated. By the terms of surrender the whole garrison were to become prisoners of war and to be sent to England, and the English acquired 218 cannon and 18 mortars, beside great quantities of ammunition and military stores. All the vessels of war had been captured or destroyed; but their crews, to the number of upward of 2,600 men, were included in the capitulation. Two years later, at the beginning of 1760, orders were sent from England to demolish the fortress, render the harbor impracticable, and transport the garrison and stores to Halifax. These orders were carried out so effectually that few traces of its fortifications remain, and the place is inhabited only by fishermen."—C. C. Smith, *The Wars on the Seaboard (Narrative and Critical Hist. of Am., v. 5, ch. 7)*.

CAPITOLINE HILL AT ROME.—The Capitol.—"In prehistoric times this hill was called the Mons Saturnius, see Varro, *Lin. Lat.*,

v. 41; its name being connected with that legendary 'golden age' when Saturn himself reigned in Italy. . . . This hill, which, like the other hills of Rome, has had its contour much altered by cutting away and levelling, consists of a mass of tufa rock harder in structure than that of the Palatine hill. It appears once to have been surrounded by cliffs, very steep at most places, and had only approaches on one side—that towards the Forum. . . . The top of the hill is shaped into two peaks of about equal height, one of which was known as the Capitolium, and the other as the Arx, or Citadel. . . . The Capitolium was also in early time known as the 'Mons Tarpeius,' so called from the familiar legend of the treachery of Tarpeia. . . . In later times the name 'rupes Tarpeia' was applied, not to the whole peak, but to a part of its cliff which faced towards the 'Vicus Jugarius' and the 'Forum Magnum.' The identification of that part of the Tarpeian rock, which was used for the execution of criminals, according to a very primitive custom, is now almost impossible. At one place the cliff of the Capitolium is quite perpendicular, and has been cut very carefully into an upright even surface; a deep groove, about a foot wide, runs up the face of this cutting, and there are many rock-cut chambers excavated in this part of the cliff, some openings into which appear in the face of the rock. This is popularly though erroneously known as the Tarpeian rock. . . . The perpendicular cliff was once very much higher than it is at present, as there is a great accumulation of rubbish at its foot. . . . That this cliff cannot be the Tarpeian rock where criminals were executed is shown by Dionysius (viii. 78, and vii. 35), who expressly says that this took place in the sight of people in the Forum Magnum, so that the popular Rupes Tarpeia is on the wrong side of the hill."—J. H. Middleton, *Ancient Rome in 1885*, ch. 7.—See, also, SEVEN HILLS OF ROME, and GENS, ROMAN.

CAPITULARIES.—"It is commonly supposed that the term capitularies applies only to the laws of Charlemagne; this is a mistake. The word 'capitula,' 'little chapters,' equally applies to all the laws of the Frank kings. . . . Charlemagne, in his capitularies, did anything but legislate. Capitularies are, properly speaking, the whole acts of his government, public acts of all kinds by which he manifested his authority."—F. Guizot, *Hist. of Civilization*, lect. 21.

CAPTIVITY OF THE JEWS, The. See JEWS: B. C. 604–536.

CAPUA.—Capua, originally an Etruscan city, called Vulturum, was taken by the Samnites, B. C. 424, and was afterwards a city in which Etruscan and neighboring Greek influences were mixed in their effect on a barbarous new population. "Capua became by its commerce and agriculture the second city in Italy in point of size—the first in point of wealth and luxury. The deep demoralization in which, according to the accounts of the ancients, that city surpassed all others in Italy, is especially reflected in the mercenary recruiting and in the gladiatorial sports, both of which pre-eminently flourished in Capua. Nowhere did recruiting officers find so numerous a concourse as in this metropolis of demoralized civilization. . . . The gladiatorial sports . . . if they did not originate, were at any rate carried to perfection in Capua. There, sets of gladiators made their appearance even during banquets."—T. Mommsen, *Hist. of Rome*, bk. 2, ch. 5.

CAPUCHINS, The.—"The Capuchins were only a branch of the great Franciscan order, and their mode of life a modification of its Rule. Among the Franciscans the severity of their Rule had early become a subject of discussion, which finally led to a secession of some of the members, of whom Matteo de' Bassi, of the convent of Montefalcone was the leading spirit. These were the rigorists who desired to restore the primitive austerities of the Order. They began by a change of dress, adding to the usual monastic habit a 'cappuccio,' or pointed hood, which Matteo claimed was of the same pattern as that worn by St. Francis. By the bull 'Religionis zelus' (1528), Matteo obtained from Pope Clement VII. leave for himself and his companions to wear this peculiar dress; to allow their beards to grow; to live in hermitages, according to the rule of St. Francis, and to devote themselves chiefly to the reclaiming of great sinners. Paul III. afterwards gave them permission to settle wherever they liked. Consistently with the austerity of their professions, their churches were unadorned, and their convents built in the simplest style. They became very serviceable to the Church, and their fearlessness and assiduity in waiting upon the sick during the plague, which ravaged the whole of Italy, made them extremely popular."—J. Alzog, *Manual of Universal Church Hist.*, v. 3, p. 455.

CARAVELS.—GALEONS, Etc.—"The term caravel was originally given to ships navigated wholly by sails as distinguished from the galley propelled by oars. It has been applied to a great variety of vessels of different size and construction. The caravels of the New World discoverers may be generally described as long narrow boats of from 20 to 100 tons burden, with three or four masts of about equal height carrying sometimes square and sometimes lateen sails, the fourth mast set at the heel of the bowsprit carrying square sails. They were usually half-decked, and adorned with the lofty forecstee and loftier poop of the day. The latter constituted over that part of the vessel a double or treble deck, which was pierced for cannon. . . . The galera was a vessel of low bulwarks, navigated by sails and oars, usually twenty or thirty oars on either side, four or five oarsmen to a bench. . . . The galeaza was the largest class of galera, or craft propelled wholly or in part by oars. . . . A galeota was a small galera, having only 16 or 20 oarsmen on a side, and two masts. The galeon was a large armed merchant vessel with high bulwarks, three or four decks, with two or three masts, square rigged, spreading courses and top-sails, and sometimes top-gallant sails. . . . Those which lay between Acapulco and Manila were from 1,200 to 2,000 tons burden. A galeoncillo was a small galeon. The carac was a large carrying vessel, the one intended for Columbus' second voyage being 1,250 toneles or 1,500 tons. A nao, or navio, was a large ship with high bulwarks and three masts. A nave was a vessel with deck and sails, the former distinguishing it from the barca, and the absence of oars from a galera. The bergantin, or brig, had low bulwarks. . . . The name brigantine was applied in America also to an open flat-bottomed boat, which usually carried one sail and from 8 to 16 men."—H. H. CARHAM, Battle of.—Fought and won by an army of Scots, under King Malcolm, invading the then English earldom of Bernicia, A. D. 1018, and securing the annexation of Lothian to the Scottish kingdom. The battlefield was near that on which Flodden was afterwards fought.—E. A. Freeman, *Norman Conquest*, ch. 6, sect. 2.

CARIANS, The.—"The Carians may be called the doubles of the Leleges. They are termed the 'speakers of a barbarous tongue,' and yet, on the other hand, Apollo is said to have spoken Carian. As a people of pirates clad in bronze they once upon a time had their day in the Archipelago, and, like the Normans of the Middle Ages, swooped down from the sea to desolate the coasts; but their real home was in Asia Minor, where their settlements lay between those of Phrygians and Pisidians, and community of religion united them with the Lydians and Mysians."—E. Curtius, *Hist. of Greece*, bk. 1, ch. 2.—The country of the Carians was the mountainous district in the southwestern angle of Asia Minor, the coast of which is indented with gulfs and frayed with long-projecting rocky promontories. The island of Rhodes lies close to it on the south. The Carians were subjugated by the Lydian King Croesus, and afterwards passed under the Persian yoke. The Persians permitted the establishment of a vassal kingdom, under a dynasty which fixed its capital at Halicarnassus, and made that city one of the splendid Asiatic outposts of Greek art and civilization, though always faithfully Persian in its politics. It was to the memory of one of the Carian kings at Halicarnassus, Mausolus, that the famous sepulchral monument, which gave its name to all similar edifices, and which the ancients counted among the seven wonders of the world, was erected by his widow. Halicarnassus offered an obstinate resistance to Alexander the Great and was destroyed by that ruthless conqueror after it had succumbed to his siege. Subsequently rebuilt, it never gained importance again. The Turkish town of Budrum now occupies the site.—C. T. Newton, *Travels and Discoveries in the Levant*, v. 2.—See, also, **HAMITES AND DORIANS AND IONIANS**.

CARMANIANS, The.—"The Germanians of Herodotus are the Carmanians of the later Greeks, who also passed with them as a separate nation, though closely allied to the Persians and Medes. They wandered to and fro to the east of Persia in the district now called Kirman."—M. Duncker, *Hist. of Antiquity*, v. 5, bk. 8, ch. 3.

CARMATHIANS, The.—"In the 277th year of the Hegira [A. D. 890], and in the neighbourhood of Cufa, an Arabian preacher of the name of Carmath assumed the lofty and incomprehensible style of the Guide, the Director, the Demonstration, the Word, the Holy Ghost, the Camel, the Herald of the Messiah, who had conversed with him in a human shape, and the representative of Mohammed the son of Ali, of St. John the Baptist, and of the Angel Gabriel." Carmath was one of the eastern proselytes of the sect of the Ishmaileans or Ishmailites—the same from which sprang the terrible secret order of the Assassins. He founded another branch of the Ishmaileans, which, taking his name, were called the Carmathians. The sect made rapid gains among the Bedouins and were soon a formidable and uncontrollable body. "After a bloody conflict they prevailed in the province of Bahrein, along the Persian Gulf. Far and wide the tribes of the desert were subject to the sceptre, or rather to the sword, of Abu Said and his son Abu Taher; and these rebellious imams could muster in the field 107,000 fanatics. . . . The cities of Racca and Baalbec, of Cufa and Bassorah, were taken and pillaged; Bagdad was filled with consternation; and the caliph trembled behind the veils of his palace. . . . The rapine of the Carmathians was sanctified by their aversion to the worship of Mecca. They robbed a caravan of pilgrims, and 20,000 devout Moslems were abandoned on the burning sands to a death of hunger and thirst. Another year [A. D. 929] they suffered the pilgrims to proceed without interruption; but, in the festival of devotion, Abu Taher stormed the holy city and trampled on the most venerable relics of the Mahometan faith. Thirty thousand citizens and strangers were put to the sword; the sacred precincts were polluted by the burial of 3,000 dead bodies; the well of Zemzen overflowed with blood; the golden spout was forced from its place; the veil of the Caaba was divided among these impious sectaries; and the black stone, the first monument of the nation, was borne away in triumph to their capital. After this deed of sacrilege and cruelty they continued to infest the

confines of Irak, Syria and Egypt; but the vital principle of enthusiasm had withered at the root.

. . . It is needless to enquire into what factions they were broken, or by whose swords they were finally extirpated. The sect of the Carmathians may be considered as the second visible cause of the decline and fall of the empire of the caliphs."

—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 52, and note by Dr. Smith.—See, also, ASSASSINS.

CARMELITE FRIARS.—"About the middle of the [12th] century, one Berthold, a Calabrian, with a few companions, migrated to Mount Carmel [Palestine], and in the place where the prophet Elias of old is said to have hid himself, built a humble cottage with a chapel, in which he and his associates led a laborious and solitary life. As others continued to unite themselves with these residents on Mount Carmel, Albert the patriarch of Jerusalem, near the commencement of the next century, prescribed for them a rule of life; which the pontiffs afterwards sanctioned by their authority, and also changed in various respects, and when it was found too rigorous and burdensome, mitigated considerably. Such was the origin of the celebrated order of Carmelites, or as it is commonly called the order of St. Mary of Mount Carmel [and known in England as the White Friars]; which subsequently passed from Syria into Europe, and became one of the principal mendicant orders. The Carmelites themselves reject with disdain this account of their origin, and most strenuously contend that the holy prophet Elias of the Old Testament, was the parent and founder of their society. But they were able to persuade very few, (or rather none out of their society), that their origin was so ancient and illustrious."—J. CAROLINE ISLANDS.—An extensive group of small islands in the Pacific, lying south-eastwardly from the Philippines, were first called the New Philippines, but afterwards named the Carolines, in honor of Charles II. of Spain. The islets are some 500 in number, but their total population is only 20,000 or 30,000, mostly contained in the three larger islands, Ruk, or Rouk, Ponape, and Yap, or Guap. That some of them were once inhabited by a race capable of great works is shown by the existence of ruins, constructed of enormous basalt blocks. The existing natives are Polynesian. The Carolines were discovered by the Portuguese, in 1527. Their possession was long in dispute between Spain and Germany, but settled, by papal arbitration, in favor of the former, in 1885.

CARROCCIO, The.—“The militia of every city [in Lombardy, or northern Italy, eleventh and twelfth centuries] was divided into separate bodies, according to local partitions, each led by a Gonfaloniere, or standard-bearer. They fought on foot, and assembled round the carroccio, a heavy car drawn by oxen, and covered with the flags and armorial bearings of the city. A high pole rose in the middle of this car, bearing the colours and a Christ, which seemed to bless the army, with both arms extended. A priest said daily mass at an altar placed in the front of the car. The trumpeters of the community, seated on the back part, sounded the charge and the retreat. It was Heribert, archbishop of Milan, contemporary of Conrad the Salic, who invented

this car in imitation of the ark of alliance, and caused it to be adopted at Milan. All the free cities of Italy followed the example: this sacred car, intrusted to the guardianship of the militia, gave them weight and confidence.”—J. C. L. de Sismondi, *Hist. of the Italian Republics*, ch. 1.

CARTHAGE, The founding of.—Ethbaal, or Ithobaal, a priest of Astarte, acquired possession of the throne of Tyre B. C. 917, deposing and putting to death the legitimate prince, a descendant of Hiram, Solomon's ally and friend. The Jezebel of Jewish history, who married Ahab, king of Israel, was the daughter of this king Ethbaal. “Ethbaal was succeeded by his son Balezor (885-877 B. C.). After eight years Balezor left two sons, Muttun and Sicharbaal, both under age. . . . Muttun died in the year 853 B. C. and again left a son nine years old, Pygmalion, and a daughter, Elissa, a few years older, whom he had married to his brother Sicharbaal, the priest of the temple of Melkarth. Muttun had intended that Elissa and Pygmalion should reign together, and thus the power really passed into the hands of Sicharbaal, the husband of Elissa. When Pygmalion reached his sixteenth year the people transferred to him the sovereignty of Tyre, and he put Sicharbaal, his uncle, to death . . . (846 B. C.). Elissa [or Dido, as she was also called] fled from Tyre before her brother, as we are told, with others who would not submit to the tyranny of Pygmalion. The exiles . . . are said . . . to have landed on the coast of Africa, in the neighbourhood of Ithyke, the old colony of the Phenicians, and there to have bought as much land of the Libyans as could be covered by the skin of an ox. By dividing this into very thin strips they obtained a piece of land sufficient to enable them to build a fortress. This new dwelling-place, or the city which grew up round this fortress, the wanderers called, in reference to their old home, Karta (Karta hadasha), i. e., ‘the new city,’ the Karchedon of the Greeks, the Carthage of the Romans. The legend of the purchase of the soil may have arisen from the fact that the settlers for a long time paid tribute to the ancient population, the Maxyans, for their soil.”—M. Duncker, *Hist. of Antiquity*, bk. 3, ch. 11.

ALSO IN: J. Kenrick, *Phœnicia: Hist.*, ch. 1. **Divisions, Size and Population.**—“The city proper, at the time at which it is best known to us, the period of the Punic wars, consisted of the Byrsa or Citadel quarter, a Greek word corrupted from the Canaanitish Bozra, or Bostra, that is, a fort, and of the Cothon or harbour quarter, so important in the history of the final siege. To the north and west of these, and occupying all the vast space between them and the isthmus behind, were the Megara (Hebrew, Magurim), that is, the suburbs and gardens of Carthage, which, with the city proper, covered an area of 23 miles in circumference. Its population must have been fully proportioned to its size. Just before the third Punic war, when its strength had been drained . . . it contained 700,000 inhabitants.”—R. B. Smith, *Carthage and the Carthaginians*, ch. 1.

Carthaginian Commerce. See **TRADE, ANCIENT.**

The Dominion of.—"All our positive information, scanty as it is, about Carthage and her institutions, relates to the fourth, third, or second centuries B. C.; yet it may be held to justify presumptive conclusions as to the fifth century B. C., especially in reference to the general system pursued. The maximum of her power was attained before her first war with Rome, which began in 264 B. C.; the first and second Punic wars both of them greatly reduced her strength and dominion. Yet in spite of such reduction we learn that about 150 B. C. shortly before the third Punic war, which ended in the capture and depopulation of the city, not less than 700,000 souls were computed in it, as occupants of a fortified circumference of above twenty miles, covering a peninsula with its isthmus. Upon this isthmus its citadel Byrsa was situated, surrounded by a triple wall of its own, and crowned at its summit by a magnificent temple of Æsculapius. The numerous population is the more remarkable, since Utica (a considerable city, colonized from Phœnicia more anciently than even Carthage itself, and always independent of the Carthaginians, though in the condition of an inferior and discontented ally) was within the distance of seven miles from Carthage on the one side, and Tunis seemingly not much further off on the other. Even at that time, too, the Carthaginians are said to have possessed 300 tributary cities in Libya. Yet this was but a small fraction of the prodigious empire which had belonged to them certainly in the fourth century B. C. and in all probability also between 480-410 B. C. That empire extended eastward as far as the Altars of the Philæni, near the Great Syrtis,—westward, all along the coast to the Pillars of Herakles and the western coast of Morocco. The line of coast southeast of Carthage, as far as the bay called the Lesser Syrtis, was proverbial (under the name of Byzacium and the Emporia) for its fertility. Along this extensive line were distributed indigenous Libyan tribes, living by agriculture; and a mixed population called Liby-Phœnician. . . . Of the Liby-Phœnician towns the number is not known to us, but it must have been prodigiously great. . . . A few of the towns along the coast,—Hippo, Utica, Adrumetum, Thapsus, Leptis, &c.—were colonies from Tyre, like Carthage itself. . . . Yet the Carthaginians contrived in time to render every town tributary, with the exception of Utica. . . . At one time, immediately after the first Punic war, they took from the rural cultivators as much as one-half of their produce, and doubled at one stroke the tribute levied upon the towns. . . . The native Carthaginians, though encouraged by honorary marks to undertake . . . military service were generally averse to it, and sparingly employed. . . . A chosen division of 2,500 citizens, men of wealth and family, formed what was called the Sacred Band of Carthage distinguished for their bravery in the field as well as for the splendour of their arms, and the gold and silver plate which formed part of their baggage. We shall find these citizen troops occasionally employed on service in Sicily: but most part of the Carthaginian army consists of Gauls, Iberians, Libyans, &c., a mingled host got together for the occasion, discordant in language as well as in

customs."—G. Grote, *Hist. of Greece*, pt. 2, ch. 81.

B. C. 264-241.—The first war with Rome.—Expulsion from Sicily.—Loss of maritime supremacy. See **PUNIC WAR, THE FIRST**.

B. C. 241-238.—Revolt of the mercenaries.—At the close of the First Punic War, the veteran army of mercenaries with which Hamilcar Barca had maintained himself so long in Sicily—a motley gathering of Greeks, Ligurians, Gauls, Iberians, Libyans and others—was sent over to Carthage for the long arrears of pay due them and for their discharge. The party in power in Carthage, being both incapable and mean, and being also embarrassed by an empty treasury, exasperated this dangerous body of men by delays and by attempts at bargaining with them for a reduction of their claims, until a general mutiny was provoked. The mercenaries, 20,000 strong, with Spendius, a runaway Campanian slave, Matho, an African, and Autaritus, a Gaul, for their leaders, marched from the town of Sicca, where they were quartered, and camped near Tunis, threatening Carthage. The government became panic-stricken and took no measures which did not embolden the mutineers and increase their demands. All the oppressed African peoples in the Carthaginian domain rose to join the revolt, and poured into the hands of the mercenaries the tribute money which Carthage would have wrung from them. The latter was soon brought to a state of sore distress, without an army, without ships, and with its supplies of food mostly cut off. The neighboring cities of Utica and Hippo Zarytus were besieged. At length the Carthaginian government, controlled by a party hostile to Hamilcar, was obliged to call him to the command, but associated with him Hanno, his bitterest personal enemy and the most incompetent leader of the ruling faction. Hamilcar succeeded, after a desperate and long struggle, in destroying the mutineers to almost the last man, and in saving Carthage. But the war, which lasted more than three years (B. C. 241-238), was merciless and horrible beyond description. It was known to the ancients as the "Truceless War" and the "Inexpiable War." The scenes and circumstances of it have been extraordinarily pictured in Flaubert's "Salammbô," which is one of the most revolting but most powerful of historical romances.—R. B. Smith, *Carthage and the Carthaginians*, ch. 8.

B. C. 237-202.—Hamilcar in Spain.—The second war with Rome.—Hannibal in Italy and Sicily.—Scipio in Africa.—The great defeat at Zama.—Loss of naval dominion and of Spain. See **PUNIC WAR, THE SECOND**.

B. C. 146.—Destruction by Scipio.—Carthage existed by Roman sufferance for fifty years after the ending of the Second Punic War, and even recovered some considerable prosperity

in trade, though Rome took care that her chances for recovery should be slight. When Hannibal gave signs of being able to reform the government of the city and to distinguish himself in statesmanship as he had immortalized himself in war, Rome demanded him, and he escaped her chains only by flight. When, even without Hannibal, Carthage slowly repaired the broken fortunes of her merchants, there was an enemy at her door always ready, at the bidding of Rome, to plunder them afresh. This was Massinissa, the Numidian prince, client and obedient servant of the Roman state. Again and again the helpless Carthaginians appealed to Rome to protect them from his depredations, and finally they ventured to attempt the protection of themselves. Then the patient perfidy of Roman statecraft grasped its reward. It had waited many years for the provocations of Massinissa to work their effect; the maddened Carthaginians had broken, at last, the hard letter of the treaty of 201 by assailing the friend and ally of Rome. The pretext sufficed for a new declaration of war, with the fixed purpose of pressing it to the last extreme. Old Cato, who had been crying in the ears of the Senate, "Carthago delenda est," should have his will. The doomed Carthaginians were kept in ignorance of the fate decreed, until they had been foully tricked into the surrender of their arms and the whole armament of their city. But when they knew the dreadful truth, they threw off all cowardice and rose to such a majesty of spirit as had never been exhibited in their history before. Without weapons, or engines or ships, until they made them anew, they shut their gates and kept the Roman armies out for more than two years. It was another Scipio, adopted grandson and namesake of the conqueror of Hannibal, who finally entered Carthage (B. C. 146), fought his way to its citadel, street by street, and, against his own wish, by command of the implacable senate at Rome, levelled its last building to the earth, after sending the inhabitants who survived to be sold as slaves.—R. B. Smith, *Carthage and the Carthaginians*, ch. 20.

ALSO IN: H. G. Liddell, *Hist. of Rome*, ch. 46.

B. C. 44.—Restoration by Cæsar.—"A settlement named Junonia, had been made at Carthage by C. Gracchus [which furnished his enemies one of their weapons against him, because, they said, he had drawn on himself the curse of Scipio] and it appears that the city of Gracchus still existed. Cæsar restored the old name, and, as Strabo says, rebuilt the place: many Romans who preferred Carthage to Rome were sent there, and some soldiers; and it is now, adds Strabo [reign of Augustus] more populous than any town in Libya."—G. Long, *Decline of the Roman Republic*, v. 5, ch. 32.

2d-4th Centuries.—The Christian Church. See CHRISTIANITY: A. D. 100-312.

A. D. 439.—Taken by the Vandals.—Carthage was surprised and captured by the Vandals on the 9th of Oct., A. D. 439,—nine years after the conquest and destruction of the African provinces by Genseric began;—585 years after the ancient Carthage was destroyed by Scipio. "A new city had risen from its ruins, with the title of a colony; and though Carthage might yield to the royal prerogatives of Constantinople, and perhaps to the trade of Alexandria or the splendour of Antioch, she still

maintained the second rank in the West—as the Rome (if we may use the style of contemporaries) of the African world. . . . The buildings of Carthage were uniform and magnificent. A shady grove was planted in the midst of the capital; the new port, a secure and capacious harbour, was subservient to the commercial industry of citizens and strangers; and the splendid games of the circus and theatre were exhibited almost in the presence of the barbarians. The reputation of the Carthaginians was not equal to that of their country, and the reproach of Punic faith still adhered to their subtle and faithless character. The habits of trade and the abuse of luxury had corrupted their manners. . . . The King of the Vandals severely reformed the vices of a voluptuous people. . . . The lands of the proconsular province, which formed the immediate district of Carthage, were accurately measured and divided among the barbarians."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 33.—See, also, VANDALS: A. D. 429-439.

A. D. 533.—Taken by Belisarius. See VANDALS. A. D. 533-534.

A. D. 534-558.—The Province of Africa after Justinian's conquest.—"Successive inroads [of the Moorish tribes] had reduced the province of Africa to one-third of the measure of Italy; yet the Roman emperors continued to reign above a century over Carthage and the fruitful coast of the Mediterranean. But the victories and the losses of Justinian were alike pernicious to mankind; and such was the desolation of Africa that a stranger might wander whole days without meeting the face either of a friend or an enemy. The nation of the Vandals had disappeared. . . . Their numbers were infinitely surpassed by the number of the Moorish families extirpated in a relentless war; and the same destruction was retaliated on the Romans and their allies, who perished by the climate, their mutual quarrels, and the rage of the barbarians. When Procopius first landed [with Belisarius, A. D. 533] he admired the populousness of the cities and country, strenuously exercised in the labours of commerce and agriculture. In less than twenty years that busy scene was converted into a silent solitude; the wealthy citizens escaped to Sicily and Constantinople; and the secret historian has confidently affirmed that five millions of Africans were consumed by the wars and government of the Emperor Justinian."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 43.

A. D. 698.—Destruction by the Arabs.—"In the 77th year of the Hegira [A. D. 698] . . . Abd'almalec [the Caliph] sent Hossan Ibn Anno'man, at the head of 40,000 choice troops, to carry out the scheme of African conquest [which had languished for some years, during the civil wars among the Moslems]. That general pressed forward at once with his troops against the city of Carthage, which, though declined from its ancient might and glory, was still an important seaport, fortified with lofty walls, haughty towers and powerful bulwarks, and had a numerous garrison of Greeks and other Christians. Hossan proceeded according to the old Arab mode; beleaguering and reducing it by a long siege; he then assailed it by storm, scaled its lofty walls with ladders, and made himself master of the place. Many of the inhabitants fell by the edge

of the sword; many escaped by sea to Sicily and Spain. The walls were then demolished; the city was given up to be plundered by the soldiery, the meanest of whom was enriched by booty. . . . The triumph of the Moslem host was suddenly interrupted. While they were revelling in the ravaged palaces of Carthage, a fleet appeared before the port; snapped the strong chain which guarded the entrance, and sailed into the harbor. It was a combined force of ships and troops from Constantinople and Sicily; reinforced by Goths from Spain; all under the command of the prefect John, a patrician general of great valor and experience. Hossan felt himself unable to cope with such a force; he withdrew, however in good order, and conducted his troops laden with spoils to Tripoli and Caerwan, and, having strongly posted them, he awaited reinforcements from the Caliph. These arrived in course of time by sea and land. Hossan again took the field; encountered the prefect John, not far from Utica, defeated him in a pitched battle and drove him to embark the wrecks of his army and make all sail for Constantinople. Carthage was again assailed by the victors, and now its desolation was complete, for the vengeance of the Moslems gave that majestic city to the flames. A heap of ruins and the remains of a noble aqueduct are all the relics of a metropolis that once valiantly contended for dominion with Rome."—W. Irving, *Mahomet and his Successors*, v. 2, ch. 54.

CARTHAGENA (S. Am.): A. D. 1697.—Taken and sacked by the French.—One of the last enterprises of the French in the war which was closed by the Peace of Ryswick—undertaken, in fact, while the negotiations at Ryswick were in progress—was the storming and sacking of Carthagena by a privateer squadron, from Brest, commanded by rear-admiral Pointis, April, 1697. "The inhabitants were allowed to carry away their effects; but all the gold, silver, and precious stones were the prey of the conqueror. Pointis . . . reëntered Brest safe and sound, bringing back to his ship-owners more than ten millions. The officers of the squadron and the privateers had well provided for themselves besides, and the Spaniards had probably lost more than twenty millions."—H. Martin, *Hist. of France: Age of Louis XIV.* (tr. by M. L. Booth), v. 2, ch. 2.

CARTHUSIAN ORDER.—La Grande Chartreuse.—"St. Bruno, once a canon of St. Cunibert's, at Cologne, and afterward chancellor of the metropolitan church of Rheims, followed by six companions, founded a monastery near Grenoble, amid the bleak and rugged mountains of the desert of Chartreuse (A. D. 1084). The rule given by St. Bruno to his disciples was founded upon that of St. Benedict, but with such modifications as almost to make of it a new and particular one. The Carthusians were very nearly akin to the monks of Vallis-Umbrosa and Camaldoli; they led the same kind of life—the eremitical joined to the cenobitic. Each religious had his own cell, where he spent the week in solitude, and met the community only on Sunday. . . . Never, perhaps, had the monastic life surrounded itself with such rigors and holy austerities. . . . The religious were bound to a life-long silence, having renounced the world to hold converse with Heaven alone. Like the solitaries of Thebais they never eat meat, and their dress, as an additional penance, consisted only of a sack-cloth garment. Manual labors, broken only by the exercise of common prayer; a board on the bare earth for a couch; a narrow cell, where the religious twice a day receives his slight allowance of boiled herbs;—such is the life of pious austerities of which the world knows not the heavenly sweetness. For 800 years has this order continued to edify and to serve the Church by the practice of the most sublime virtue; and its very rigor seems to hold out a mysterious attraction to pious souls. A congregation of women has embraced the primitive rule."—J. E. Darras, *Hist. of the Catholic Church*, v. 3, ch. 4, par. 26, and ch. 10, par. 11.—From the account of a visit to the Grande Chartreuse, the parent monastery, near Grenoble, made in 1667, by Dom Claude Lancelot, of Port Royal, the following is taken: "All I had heard of this astonishing seclusion falls infinitely short of the reality. No adequate description can be given of the awful magnificence of this dreary solitude. . . . The desert of the Chartreuse is wholly inaccessible but by one exceedingly narrow defile. This pass, which is only a few feet wide, is indeed truly tremendous. It winds between stupendous granite rocks, which overhang above. . . . The monastery itself is as striking as the approach. . . . On the west . . . there is a little space which . . . is occupied by a dark grove of pine trees; on every other side the rocks, which are as steep as so many walls, are not more than ten yards from the convent. By this means a dim and gloomy twilight perpetually reigns within."—M. A. Schimmelpenninck, *A tour to Alet and La Grande Chartreuse*, v. 1, pp. 6–13.

CARTOUCHE.—"It is impossible to travel in Upper Egypt without knowing what is meant by a cartouche. A cartouche is that elongated oval terminated by a straight line which is to be seen on every wall of the Egyptian temples, and of which other monuments also afford us numerous examples. The cartouche always contains the name of a king or of a queen, or in

some cases the names of royal princesses. To designate a king there are most frequently two cartouches side by side. The first is called the prenommen, the second the nomen."—A. Mariette, *Monuments of Upper Egypt*, p. 43.

CASTALIAN SPRING.—A spring which issued from between two peaks or cliffs of Mount Parnassus and flowed downward in a cool stream past the temple of Apollo at Delphi.

CASTE SYSTEM OF INDIA, The.—"The caste system of India is not based upon an exclusive descent as involving a difference of rank and culture, but upon an exclusive descent as involving purity of blood. In the old materialistic religion which prevailed so largely in the ancient world, and was closely associated with sexual ideas, the maintenance of purity of blood was regarded as a sacred duty. The individual had no existence independent of the family. Male or female, the individual was but a link in the life of the family; and any intermixture would be followed by the separation of the impure branch from the parent stem. In a word, caste was the religion of the sexes, and as such exists in India to this day. . . . The Hindus are divided into an infinite number of castes, according to their hereditary trades and professions; but in the present day they are nearly all comprehended in four great castes, namely, the Brahmans, or priests; the Kshatriyas, or soldiers; the Vaisyas, or merchants; and the Sudras, or servile class. The Brahmans are the mouth of Brahma; the Kshatriyas are his arms; the Vaisyas are his thighs; and the Sudras are his feet. The three first castes of priests, soldiers, and merchants, are distinguished from the fourth caste of Sudras by the thread, or paita, which is worn depending from the left shoulder and resting on the right side below the loins. The investiture usually takes place between the eighth and twelfth year, and is known as the second birth, and those who are invested are termed the 'twice born.' It is difficult to say whether the thread indicates a separation between the conquerors and the conquered; or whether it originated in a religious investiture from which the Sudras were excluded."—J. T. Wheeler, *Hist. of India*, v. 3, pp. 114 and 64.—"Among the delusions about modern India which it seems impossible to kill, the belief still survives that, although there have been many changes in the system of caste, it remains true that the Hindu population is divided into the four great classes described by Manu: Brahmans, Kshatriyas, Vaisyas, and Sudras. In India itself this notion is fostered by the more learned among the Brahmans, who love to make themselves and others believe in the continuous existence of a divinely constituted organization.

To what extent the religious and social systems shadowed forth in the ancient Brahmanical literature had an actual existence it is difficult to say, but it is certain that little remains of them now. The Brahmins maintain their exceptional position; but no one can discern the other great castes which Manu described. Excluding the Brahmins, caste means for the most part hereditary occupation, but it also often signifies a common origin of tribe or race. India, in the words of Sir Henry Maine, is divided into a vast number of independent, self-acting, organised social groups—trading, manufacturing, cultivating. 'In the enormous majority of instances, caste is only the name for a number of practices which are followed by each one of a multitude of groups of men, whether such a group be ancient and natural or modern and artificial. As a rule, every trade, every profession, every guild, every tribe, every class, is also a caste; and the members of a caste not only have their special objects of worship, selected from the Hindu Pantheon, or adopted into it, but they exclusively eat together, and exclusively intermarry.' Mr. Kitts, in his interesting 'Compendium of the Castes and Tribes of India,' compiled from the Indian Census reports of 1881, enumerates 1929 different castes. Forty-seven of these have each more than 1,000,000 members; twenty-one have 2,000,000 and upwards. The Brahmins, Kunbis (agriculturists), and Chumars (workers in leather), are the only three castes each of which has more than 10,000,000; nearly 15 per cent. of the inhabitants of India are included in these three castes. The distinctions and subdivisions of caste are innumerable, and even the Brahmins, who have this in common, that they are revered by the members of all other castes, are as much divided among themselves as the rest. There are nearly 14,000,000 Brahmins; according to Mr. Sherring, in his work on 'Hindu Tribes and Castes,' there are more than 1,800 Brahmanical subdivisions; and it constantly happens that to a Brahmin of some particular class or district the pollution of eating with other Brahmins would be ruinous. . . . The Brahmins have become so numerous that only a small proportion can be employed in sacerdotal functions, and the charity which it is a duty to bestow upon them could not, however profuse, be sufficient for their support. They are found in almost every occupation. They are soldiers, cultivators, traders, and servants; they were very numerous in the old Sepoy army, and the name of one of their subdivisions, 'Pande,' became the generic term by which the mutineers of 1857 were commonly known by the English in India. . . . Mr. Ibbetson, in his report on the census in the Punjab, shows how completely it is true that caste is a social and not a religious institution. Conversion to Mohammedanism, for instance, does not necessarily affect the caste of the convert."—Sir J. Strachey, *India*, *lect.* 8.

CASTLE ST. ANGELO.—The Mausoleum of Hadrian, begun by the emperor Hadrian, A. D. 135, and probably completed by Antoninus Pius, "owes its preservation entirely to the peculiar fitness of its site and shape for the purposes of a fortress, which it has served since the time of Belisarius. . . . After the burial of Marcus Aurelius, the tomb was closed until the sack of Rome by Alaric in 410 A. D., when his barbarian soldiers probably broke it open in search of treasure, and scattered the ashes of the Antonines to the winds. From this time, for a hundred years, the tomb was turned into a fortress, the possession of which became the object of many struggles in the wars of the Goths under Vitiges (537 A. D.) and Totilas (killed 552). From the end of the sixth century, when Gregory the Great saw on its summit a vision of St. Michael sheathing his sword, in token that the prayers of the Romans for preservation from the plague were heard, the Mausoleum of Hadrian was considered as a consecrated building, under the name of 'S. Angelus inter Nubes,' 'Usque ad Cœlos,' or 'Inter Cœlos,' until it was seized in 923 A. D. by Alberic, Count of Tusculum, and the infamous Marozia, and again became the scene of the fierce struggles between Popes, Emperors, and reckless adventurers which marked those miserable times. The last injuries appear to have been inflicted upon the building in the contest between the French Pope Clemens VII. and the Italian Pope Urban VIII. [see PAPACY: A. D. 1377-1417]. The exterior was then finally dismantled and stripped. Partial additions and restorations soon began to take place. Boniface IX., in the beginning of the fifteenth century, erected

new battlements and fortifications on and around the building; and since his time it has remained in the possession of the Papal government. The strange medley of Papal reception rooms, dungeons and military magazines which now encumbers the top, was chiefly built by Paul III. The corridor connecting it with the Vatican dates from the time of Alexander Borgia (1494 A. D.), and the bronze statue of St. Michael on the summit, which replaced an older marble statue, from the reign of Benedict XIV."—R. Burn, *Rome and the Campagna*, ch. 11.

CASTOR WARE.—"Durobrivian or Castor ware, as it is variously called, is the production of the extensive Romano-British potteries on the River Nen in Northamptonshire and Huntingdonshire, which, with settlements, are computed to have covered a district of some twenty square miles in extent. . . . There are several varieties . . . and two especially have been remarked; the first, blue, or slate-coloured, the other reddish-brown, or of a dark copper colour."—L. Jewett, *Grave Mounds*, p. 152.

CASTRA, Roman.—"When a Roman army was in the field it never halted, even for a single night, without throwing up an entrenchment capable of containing the whole of the troops and their baggage. This field-work was termed *Castra*. . . . The form of the camp was a square, each side of which was 2,017 Roman feet in length. The defences consisted of a ditch, (*fossa*), the earth dug out, being thrown inwards so as to form a rampart, (*agger*), upon the summit of which a palisade (*vallum*) was erected of wooden stakes, (*valli*—sudes), a certain number of which were carried by each soldier, along with his entrenching tools."—W. CATACOMBS OF ROME, The.—"The Roman Catacombs—a name consecrated by long usage, but having no etymological meaning, and not a very determinate geographical one—are a vast labyrinth of galleries excavated in the bowels of the earth in the hills around the Eternal City; not in the hills on which the city itself was built, but in those beyond the walls. Their extent is enormous, not as to the amount of superficial soil which they underlie, for they rarely, if ever, pass beyond the third milestone from the city, but in the actual length of their galleries; for these are often excavated on various levels, or *piani*, three, four, or even five, one above the other, and they cross and recross one another, some times at short intervals, on each of these levels; so that, on the whole, there are certainly not less than 350 miles of them; that is to say, if stretched out in one continuous line, they would extend the whole length of Italy

itself. The galleries are from two to four feet in width, and vary in height according to the nature of the rock in which they are dug. The walls on both sides are pierced with horizontal niches, like shelves in a book-case, or berths in a steamer, and every niche once contained one or more dead bodies. At various intervals this succession of shelves is interrupted for a moment, that room may be made for a doorway opening into a small chamber; and the walls of these chambers are generally pierced with graves in the same way as the galleries. These vast excavations once formed the ancient Christian cemeteries of Rome; they were begun in apostolic times, and continued to be used as burial-places of the faithful until the capture of the city by Alaric in the year 410. In the third century, the Roman Church numbered twenty-five or twenty-six of them, corresponding to the number of her titles or parishes within the city; and besides these, there are about twenty others, of smaller dimensions, isolated monuments of special martyrs, or belonging to this or that private family. Originally they all belonged to private families or individuals, the villas or gardens in which they were dug being the property of wealthy citizens who had embraced the faith of Christ, and devoted of their substance to His service. Hence their most ancient titles were taken merely from the names of their lawful owners, many of which still survive. . . . It has always been agreed among men of learning who have had an opportunity of examining these excavations, that they were used exclusively by the Christians as places of burial and of holding religious assemblies. Modern research has placed it beyond a doubt, that they were also originally designed for this purpose and for no other."—J. S. Northcote and W. R. Brownlow, *Roma Sotterranea*, bk. 1, ch. 1.

ALSO IN: A. P. Stanley, *Christian Institutions*, ch. 13.

CATALAN GRAND COMPANY, The.—The Catalan Grand Company was a formidable body of military adventurers—mercenary soldiers—formed in Sicily during the twenty years of war that followed the Sicilian Vespers. "High pay and great license drew the best sinews in Catalonia and Aragon into the mercenary battalions of Sicily and induced them to submit to the severest discipline." The conclusion of peace in 1302 threw this trained army out of employment, and the greater part of its members were enlisted in the service of Andronicus II., of the restored Greek empire at Constantinople. They were under the command of one Roger de Flor, who had been a Templar, degraded from his knighthood for desertion, and afterwards a pirate; but whose military talents were undoubted. The Grand Company soon quarrelled with the Greek emperor; its leader was assassinated, and open war declared. The Greek army was terribly defeated in a battle at Apros, A. D. 1307, and the Catalans plundered Thrace for two years without resistance. Gallipoli, their headquarters, to which they brought their captives, became one of the great slave marts of Europe. In 1310 they marched into the heart of Greece, and were engaged in the service of Walter de Brienne, Duke of Athens. He, too, found them dangerous servants. Quarrels were followed by war; the Duke perished in a battle (A. D. 1311) with his Catalan

mercenaries on the banks of the Cephissus; his dukedom, embracing Attica and Beotia, was the prize of their victory. The widows and daughters of the Greek nobles who had fallen were forced to marry the officers of the Catalans, who thus settled themselves in family as well as estate. They elected a Duke of Athens; but proceeded afterwards to make the duchy an appanage of the House of Aragon. The title was held by sons of the Aragonese kings of Sicily until 1377, when it passed to Alphonso V., king of Aragon, and was retained by the kings of Spain after the union of the crowns of Aragon and Castile. The titular dukes were represented at Athens by regents. "During the period the duchy of Athens was possessed by the Sicilian branch of the house of Aragon, the Catalans were incessantly engaged in wars with all their neighbours." But, gradually, their military vigor and discipline were lost, and their name and power in Greece disappeared about 1386, when Athens and most of the territory of its duchy was conquered by Nero Acciainoli, a rich and powerful Florentine, who had become governor of Corinth, but acted as an independent prince, and who founded a new ducal family.—G. Finlay, *Hist. of the Byzantine and Greek Empires*, bk. 4, ch. 2, sect. 2.

CATERANS.—"In 1384 an act was passed [by the Scotch parliament] for the suppression of masterful plunderers, who get in the statute their Highland name of 'cateran.' . . . This is the first of a long succession of penal and denuncia-

tory laws against the Highlanders."—J. H. Burton, *Hist. of Scotland*, c. 3, ch. 27.

CATHARISTS, OR PATARENES.—"Among all the sects of the Middle Ages, very far the most important in numbers and in radical antagonism to the Church, were the Cathari, or the Pure, as with characteristic sectarian assumption they styled themselves. Albigenses they were called in Languedoc; Patarenes in North Italy; Good Men by themselves. Stretching through central Europe to Thrace and Bulgaria, they joined hands with the Paulicians of the East and shared their errors. Whether these Cathari stood in lineal historical descent from the old Manichæans, or had generated a dualistic scheme of their own, is a question hard to answer, and which has been answered in very different ways. This much, however, is certain, that in all essentials they agreed with them."—R. C. Trench, *Lects. on Mediæval Church Hist.*, lect. 15.—"In Italy, men supposed to hold the same belief [as that of the Paulicians, Albigenses, etc.] went by the name of the Paterini, a word of uncertain derivation, perhaps arising from their willingness meekly to submit to all sufferings for Christ's sake (pati), perhaps from a quarter in the city of Milan named 'Pataria'; and more lately by that of Cathari (the Pure, Puritans), which was soon corrupted into Gazari, whence the German 'Ketzer,' the general word for a heretic."—L. Mariotti, *Frà Dolcino and his Times*, ch. 1.—See, also, PAULICIANS, and ALBIGENSES.

CATRAIL, The.—An ancient rampart, the remains of which are found in southern Scotland, running from the south-east corner of Peeblesshire to the south side of Liddesdale. It is supposed to have marked the boundary between the old Anglian kingdom of Bernicia and the territory of the British kings of Alcluith (Dumbarton).—W. F. Skene, *Celtic Scotland*, v. 1.

CATTANI.—VASSALI.—MASNADA.—SERVI.—The feudal barons of northern Italy were called Cattani. In the Florentine territory, "many of these Cattani, after having been subdued and made citizens of Florence, still maintained their feudal following, and were usually attended by troops of retainers, half slaves, half freedmen, called 'Uomini di MASNADA,' who held certain possessions of them by the tenure of military service, took oaths of fidelity, and appear to have included every rank of person in the different Italian states according to the quality of the chief; but without any degradation of character being attached to such employment. . . . Some slight, perhaps unnecessary distinction is made between the 'Vassi,' who are supposed to have been vassals of the crown, and the 'Vassali,' who were the vassals of great lords. The 'Vavasours' were the vassals of great vassals. . . . Besides these military Villains, who were also called 'Fedeli,' there were two other kinds of slaves amongst the early Italians, namely prisoners of war and the labourers attached to the soil, who were considered as cattle in every respect except that of their superior utility and value. The former species of slavery disappeared much earlier than the latter."—H. E. Napier, *Florentine History*, v. 1, p. 624.

CAUCASUS, The Races of the.—"One of the most remarkable characteristics of the Caucasus is that, while it has acted as a barrier between the north and the south, stopping and turning aside the movements of population, it has also preserved within its sheltered recesses fragments of the different peoples who from time to time have passed by it, or who have been driven by conquest into it from the lower country. Thus it is a kind of ethnological museum, where specimens may be found of countless races and languages, some of which probably belong to the early ages of the world; races that seem to have little affinity with their present neighbours, and of whose history we know nothing except what comparative philology can reveal. Even before the Christian era it was famous for the variety of its peoples. . . . No more inappropriate ethnological name was ever propounded than that of Caucasian for a fancied division of the human family, the cream of mankind, from which the civilized peoples of Europe are supposed to have sprung. For the Caucasus is to-day, as it was in Strabo's time,

full of races differing in religion, language, aspect, manners, character."—J. Bryce, *Transcaucasia and Ararat*, ch. 2.

The Circassians.—The Russian Conquest.—"The Caucasus has always possessed a certain fascination not for the Russians only, but also for western nations, and is peculiarly rich in historical traditions, and in memories of ancient times and ancient nations. Here, to the rocks of Elbruz, Prometheus lay chained; and to Colchis, where the Phasis flowed towards the sea, through ever green woods, came the Argonauts. The present Kutais is the old capital of King *Æetes*, near which, in the sacred grove of *Ares*, hung the golden fleece. The gold mines which the Russians discovered in 1864 were apparently known to the Greeks, whose colony, *Dioscurias*, was an assemblage of 300 diverse nationalities. . . . Here on the coasts of the stormy and dangerous Black Sea arose the famous Pontine kingdom [see **MITHRIDATIC WARS**] which in spite of its valiant resistance under Mithridates, fell a victim to Roman aggression. Along the rivers Kura and Rion ran the old commercial road from Europe to Asia, which enriched the Venetians and the Genoese in the middle ages. Up to recent times this trade consisted not only of all sorts of other merchandise, but of slaves; numberless girls and women were conveyed to Turkish harems and there exercised an important influence on the character of the Tartar and Mongol races. In the middle ages the Caucasus was the route by which the wild Asiatic hordes, the Goths, Khasars, Huns, Avars, Mongols, Tartars, and Arabs crossed from Asia into Europe; and consequently its secluded valleys contain a population composed of more different and distinct races than any other district in the world. . . . It was in the 16th century, under Ivan the Terrible, that Russia first turned her attention to the conquest of the Caucasus; but it was not till 1859 that the defeat and capture of the famous Schamyl brought about the final subjugation of the country. . . . In 1785 [after the partial conquest of 1784—see **TURKS**: A. D. 1776-1792] the mountaineers had been incited to take arms by a so-called prophet Scheick Mansur, but he was seized and banished to Solovetsk, on the White Sea. In 1820 a Mollah, Kasi by name, made his appearance in Daghestan, and began to preach the '*Kasawat*,' that is, holy war against the Russians. To him succeeded another equally fanatical adventurer, Hamset Beg. The work which they had begun was carried on by Schamyl, who far surpassed his predecessors in all the qualities which make up a successful guerilla chief, and who maintained the unequal conflict against the enemies of his country for 25 years with singular good fortune, undaunted courage, untiring energy, and conspicuous ability. He was of the tribe of the Lesghians in Daghestan, and was born in 1796, in the village of Gimri, of poor shepherd parents. In spite of his humble origin he raised himself to the rank of an Imaum, surrounded himself with a strong body-guard of devoted adherents, whom he named Murides, and succeeded in fanning to a flame the patriotic ardour of his fellow-countrymen. The capture of the mountain fastness of Achulgo in 1839 seemed to be the death-blow of Schamyl's cause, for it brought about the loss of the whole of Daghestan, the very focus of the

Murides' activity. Schamyl barely escaped being made a prisoner, and was forced to yield up his son, Djammel-Edden, only nine years of age as a hostage. The boy was sent to St. Petersburg and placed in a cadet corps, which he left at the conclusion of his military education somewhere about 1850 and returned to his native country in 1854 where he died a few years later. In 1840 the Tchetchens, who had previously been pacified, rose in arms once more, and Daghestan and other parts of the country followed their example. The country of the Tchetchens was a specially favourable theatre for the conflict with the Russians; its long mountain chains, rocky fastnesses, impenetrable forests, and wild precipices and gorges rendered ambushes and surprises of constant and, to the Russians, fatal occurrence. During the earlier stages of the war, Russia had ransomed the officers taken prisoners by the mountaineers, but, subsequently, no quarter was given on either side. At last, by means of a great concentration of troops on all the threatened points, by fortifying the chief central stations, and by forming broad military roads throughout the district, the Russians succeeded in breaking down Schamyl's resistance. He now suffered one reverse after another. His chief fastnesses, Dargo, Weden, and Guni, were successively stormed and destroyed; and, finally, he himself and his family were taken prisoners. He was astonished and, it is said, not altogether gratified to find that a violent death was not to close his romantic career. He and his family were at first interned at Kaluga in Russia, both a house and a considerable sum of money for his maintenance being assigned to him. But after a few years he was allowed to remove to Mecca, where he died. His sons and grandsons, who have entirely adopted the manners of the Russians, are officers in the Circassian guard. In 1864 the pacification of the whole country was accomplished, and a few years later the abolition of serfdom was proclaimed at Tiflis. After the subjugation of the various mountain tribes, the Circassians had the choice given them by the Government of settling on the low country along the Kuban, or of emigrating to Turkey. The latter course was chosen by the bulk of the nation, urged, thereto, in great measure, by envoys from Turkey. As many as 400,000 are said to have come to the ports, where the Sultan had promised to send vessels to receive them; but delays took place, and a large number died of want and disease. Those who reached Turkey were settled on the west coasts of the Black Sea, in Bulgaria and near Varna, and proved themselves most troublesome and unruly subjects. Most of those who at first remained in Circassia followed their fellow-countrymen in 1874."—H. M. Chester, *Russia*, ch. 18.

CAUCASUS, The Indian.—"The real Caucasus was the most lofty range of mountains known to the Greeks before [Alexander's conquests], and they were generally regarded as the highest mountains in the world. Hence when the army of Alexander came in sight of the vast mountain barrier [of the Hindoo Koosh] that rose before them as they advanced northward from Arachosia, they seem to have at once concluded that

this could be no other than the Caucasus." Hence the name Caucasus given by the Greeks to those mountains; "for the name of Hindoo Koosh, by which they are still known, is nothing more than a corruption of the Indian Caucasus."—E. H. Bunbury, *Hist. of Ancient Geog.*, ch. 12, note Q.

CELEBES.—The extraordinary conformation of the island of Celebes (situated east of Borneo) gives it a coast line of no less than 3,500 miles, though its area is but 75,000 square miles. In other words, "although little over one-third the size of France, it has a seaboard equal in extent to that of France and the Iberian Peninsula taken together. . . . Were it as densely peopled as Java, it would have a population of some thirty millions, whereas, according to the approximate estimates, the actual population is little over three-quarters of a million. But, although nominally under the Dutch rule, most of the interior is still occupied by Alfurus, that is, wild tribes for the most part living in isolated and hostile groups. Nor was the Dutch occupation effected without many sanguinary struggles, not always to the advantage of the invaders. The Europeans appeared first as guests, and the early conflicts were connected with questions of trade rights. Then the Dutch presented themselves as rivals of the Portuguese in 1660, when they seized the fort of Macassar, long their only possession on the coast. Later they concluded a treaty of alliance and a protectorate with several petty states in the south-western peninsula, and since that time they have omitted no occasion of strengthening their position in the island. Yet in most of the inland states they are still unrepresented by any officials, and even the coast districts are visited only at long intervals. Celebes has not yet been completely explored, and some parts are known only in a general way. . . . The native populations are usually classed as Malays and Alfurus, the inland wild tribes . . . [being] indiscriminately grouped as Alfurus."—E. Reclus, *The Earth and its Inhabitants: Oceania*, ch. 3.

CELTIBERIANS, The.—"The appellation Celtiberians indicates that in the north-eastern part of the peninsula [Spain] there was a mixture of Celts and Iberians."—W. Ihne, *Hist. of Rome*, bk. 5, ch. 6, note.—See NUMANTIAN WAR.

CELTS, The.—"The Celts form a branch of the great family of nations which has been variously called Aryan, Indo-European, Indo-Germanic, Indo-Celtic and Japhetic. . . . The Celts of antiquity who appeared first and oftenest in history were those of Gallia, which, having been made by the French into Gaule, we term Gaul. . . . The Celtic family, so far back as we can trace it into the darkness of antiquity, consisted of two groups or branches, with linguistic features of their own which marked them off from one another. To the one belonged the ancestors of the people who speak Gaelic in Ireland, the Isle of Man and the Highlands of the North. . . . The national name which the members of

this group have always given themselves, so far as one knows, is that of Gaidhel, pronounced and spelt in English Gael, but formerly written by themselves Goidel. . . . The other group is represented in point of speech by the people of Wales and the Bretons. . . . The national name of those speaking these dialects was that of Briton; but, since that word has now no precise meaning, we take the Welsh form of it, which is Brython, and call this group Brythons and Brythonic, whenever it is needful to be exact. The ancient Gauls must also be classified with them."—J. Rhys, *Celtic Britain*, ch. 1.—See, also, ARYANS, and APPENDIX A, vol. 5.

Origin and first meaning of the name.—"Who were the Keltæ of Spain? the population whose name occurs in the word Celtici and Celtiberi, Keltic Iberians or Iberian Kelts? . . . I think, that though used to denominate the tribe and nations allied to the Gauls, it [the word Celt or Kelt] was, originally, no Gallic word—as little native as Welsh is British. . . . I think, in short, that it was a word belonging to the Iberian language, applied, until the time of Cæsar at least, to Iberic populations. . . . In other words, the Iberian name for an Iberian population was first adopted by the Greeks as the name for all the inhabitants of south-western Gaul, and it was then extended by the Romans so as to include all the populations of Gallia except the Belgæ and Aquitanians."—R. G. Latham, *Ethnology of Europe*, ch. 2.

CELTS.—A name given among archaeologists to certain prehistoric implements, both stone and bronze, of the wedge, chisel, and axe kind. It has evidently no connection with the word Celt used ethnologically.

CENOMANIANS, The. See INSUBRIANS.

CENSORS, The Roman.—The original business of the Roman censors was to register the citizens and their property. They "made out the returns of the free population; but they did more; they divided it according to its civil distinctions, and drew up a list of the senators, a list of the equites, a list of the members of the several tribes, or of those citizens who enjoyed the right of voting, and a list of the ærarians, consisting of those freedmen, naturalized strangers, and others, who, being enrolled in no tribe, possessed no vote in the comitia, but still enjoyed all the private rights of Roman citizens. Now the lists thus drawn up by the censors were regarded as legal evidence of a man's condition. . . . From thence the transition was easy, according to Roman notions, to the decision of questions of right; such as whether a citizen was really worthy of retaining his rank. . . . If a man behaved tyrannically to his wife or children, if he was guilty of excessive cruelty even to his slaves, if he neglected his land, if he indulged in habits of extravagant expense, or followed any calling which was regarded as degrading, the offence was justly noted by the censors, and the offender was struck off from the list of senators, if his rank was so high; or, if he were an ordinary citizen, he was expelled from his tribe, and reduced to the class of the ærarians."—T. Arnold, *Hist. of Rome*, ch. 17.—See, also, LUSTRUM.

A. D. 1821-1871.—**Separation from Spain, and Independence.**—**Attempted federation and its failures.**—**Wars and revolutions of the five Republics.**—"The central part of the American continent, extending from the southern boundary of Mexico to the Isthmus of Panama, consisted in the old colonial times of several Intendancies, all of which were united in the Captaincy-General of Guatemala. Like the West Indian Islands, it was a neglected part of the Spanish Empire. . . . Central America has no history up to the epoch of independence. . . . It was not until the success of the Revolution had become certain on both sides of them, both in Mexico and New Granada, that the Intendancies which made up the Captaincy-General of Guatemala declared themselves also independent of Spain. The cry of liberty had indeed been raised in Costa Rica in 1813, and in Nicaragua in 1815; but the Revolution was postponed for six years longer. Guatemala, the seat of government, published its declaration in September, 1821, and its example was speedily followed by San Salvador and Honduras. Nicaragua, on proclaiming its independence, together with one of the departments of Guatemala, declared its adhesion to what was known in Mexico as the plan of Iguala [see **MEXICO**: A. D. 1820-1826]. As there were no Spanish troops in Central America, the recalcitrant Spanish official party could make no resistance to the popular movement; and many of them crossed the sea to Cuba or returned to Spain. . . . The Revolution of Central America thus stands alone in the history of independence, as having been accomplished without the shedding of blood." During the brief empire of Iturbide in Mexico [see as above] the Central American states were annexed to it, though with strong resistance on the part of all except Guatemala. "On the proclamation of the Federal Republic in Mexico [1824], the whole of Central America, except the district of Chiapas, withdrew from the alliance, and drove out the Mexican officials as only a year before they had driven out the Spanish officials. The people now had to face the task of forming a government for themselves: and . . . they now resolved on combining in a federation, in imitation of the great United States of North America. Perhaps no states were ever less suited to form a federal union. The petty territories of Central America lie on two oceans, are divided by lofty mountains, and have scarcely any communication with each other: and the citizens of each have scarcely any common interest. A Central American federation, however, was an imposing idea, and the people clung to it with great pertinacity. The first effort for federation was made under the direction of General Filisola. All the Intendancies combined in one sovereign state; first under the name of the 'United Provinces,' afterwards (November 22, 1823) under that of the 'Federal Republic' of Central America. . . . A constitution of the most liberal kind was voted. This constitution is remarkable for having been the

first which abolished slavery at once and absolutely and declared the slave trade to be piracy. . . . The clerical and oligarchic party set their faces stubbornly against the execution of the constitution, and began the revolt at Leon in Nicaragua. The union broke down in 1826, and though Morazan [of Honduras] reconstituted it in 1829, its history is a record of continual rebellion and reaction on the part of the Guatemalteco oligarchy. Of all South American conservative parties this oligarchy was perhaps the most despicable. They sank to their lowest when they raised the Spanish flag in 1832. But in doing this they went too far. Morazan's successes date from this time, and having beaten the Guatemaltecos, he transferred the Federal government in 1834 to San Salvador. But the Federal Republic of Central America dragged on a precarious existence until 1838, when it was overthrown by the revolt of Carrera in Guatemala. From the first the influence of the Federalists in the capital began to decay, and it was soon apparent that they had little power except in Honduras, San Salvador and Nicaragua. The Costa Ricans, a thriving commercial community, but of no great political importance, and separated by mountainous wastes from all the rest, soon ceased to take any part in public business. A second Federal Republic, excluding Costa Rica, was agreed to in 1842; but it fared no better than the first. The chief representative of the Federalist principle in Central America was Morazan, of Honduras, from whose government Carrera had revolted in 1838. On the failure of the Federation Morazan had fled to Chile, and on his return to Costa Rica he was shot at San José by the Carrerists. This was a great blow to the Liberals, and it was not until 1847 that a third Federation, consisting of Honduras, San Salvador, and Nicaragua, was organized. For some years Honduras, at the head of these states, carried on a war against Guatemala to compel it to join the union. Guatemala was far more than their match: San Salvador and Nicaragua soon failed in the struggle, and left Honduras to carry on the war alone. Under General Carrera Guatemala completely defeated its rival; and to his successes are due the revival of the Conservative or Clerical party all over Central America. . . . The government of each state became weaker and weaker: revolutions were everywhere frequent: and ultimately . . . the whole country was near falling into the hands of a North American adventurer [see **NICARAGUA**: A. D. 1855-1860]. In former times the English government had maintained some connection with the country [originating with the buccanniers and made important by the mahogany-cutting] through the independent Indians of the Mosquito coast, over whom, for the purposes of their trade with Jamaica, it had maintained a protectorate: and even a small English commercial colony, called Greytown, had been founded on this coast at the mouth of the river San Juan. Towards the close of Carrera's ascendancy this coast was resigned to Nicaragua, and the Bay Islands, which lie off the coast, to Honduras: and England thus retained nothing in the country but the old settlement of British Honduras, with its capital, Belize. After Carrera's death in 1865, the Liberal party began to reassert itself: and in 1871 there was a Liberal revolution in Guatemala itself."—E. J. Payne, *Hist. of European Colonies*, 21.

A. D. 1871-1885.—Ascendancy of Barrios in Guatemala.—His efforts to reestablish a Central American Union.—The revolution of 1871, in Guatemala, established a government under the control of the Liberals, with Miguel Garcia Granados as provisional president. "The new administration had hardly initiated reforms when an insurrection broke out in Santa Rosa, promoted by the priests and their aristocratic allies. It does not appear that Garcia Granados had at first intended open hostility to the religious orders. . . . The priests would not rest contented with the loss of their former high standing. . . . The new régime now resolved to cut loose [from] the ecclesiastical incubus, and to establish the supremacy of the civil authority in the state on a firm basis. Its first step was to carry out a decree . . . to expel the Society of Jesus forever from the republic. This was not effected without some scandal and disturbance from the zealous partisans of the order. Seventy-three Jesuits, most of whom were foreigners, were sent away on an American steamship, bound at Panama." The expelled Jesuits were allowed to land in Nicaragua, where they remained until 1881. They were then accused of instigating an insurrection, and were driven from that state. In Guatemala, the expulsion of the Jesuits was followed, in 1872-3, by the suppression of tithes, the extinction of religious communities of men, and the decreeing of freedom of worship, with toleration for all religious sects. The provisional president was succeeded in June, 1873, by Justo Rufino Barrios, elected by popular vote. Barrios, who had been the leading spirit of the revolution, was a resolute and energetic man. His government was vigorously, often violently, maintained, during a presidency of twelve years. Among his early acts was one which finished the dissolution of the religious houses, by opening the convents of women, and making a public allowance of money to the departing nuns. The chief aim of Barrios, throughout his career, was to bring about the long-sought union of Central American states. To that end, he seems to have assiduously interfered in the politics of the neighboring republics. By force of arms, he established a government in Salvador that was favorable to his views, and he accomplished the same in Honduras by promoting a revolution. In Nicaragua and Costa Rica he had less success. In 1879 a new constitution was adopted in Guatemala, and Barrios was elected under it, in 1880, for a further term of six years. The country enjoyed a time of great prosperity, and Barrios, after visiting Europe and the United States, proposed, in 1882, to resign. He was persuaded, however, to remain in office, and his efforts for the union of states were resumed. They encountered so much opposition that he lost patience, and rashly undertook, in 1885, to accomplish the unification of Central America by force. By a decree issued on the 28th of February in that year, he proclaimed the consolidation of the five states into one republic. The government of Honduras assented; the other three states formed an alliance to resist. Barrios marched an army into Salvador, and lost his life in the fighting that ensued.—H. H. Bancroft, *History of the Pacific States*, v. 3, ch. 20-21.

A. D. 1886-1894.—Continued struggling for Union, and continued revolutionary Con-

licts.—Not long after the fall of Barrios, the government of Salvador itself proposed a congress to arrange terms of union; but the proposition failed. Nicaragua, always looking forward to the probable construction of an isthmian canal within her border, and ambitious to enjoy the great possession alone, continued aloof. Costa Rica, having some share in the same ambition, did likewise. Yet the unionists, who seem to have been always numerous, kept the project alive, and were able, in April, 1887, to bring about a preliminary treaty between the five republics, "to establish an intimate relationship between them, and, by making the continuance of peace certain, to provide for their future final fusion in one country." In the next year, President Soto, of Costa Rica, urged the assembling of a diet, to establish the union, pending which Costa Rican citizenship was extended to the citizens of the other republics. The diet met in September of that year, but the desired union was not achieved. In November, 1889, the three states of Honduras, Guatemala, and Salvador took another step, joining in a treaty which contemplated a provisional confederation for ten years, after which, if it proved satisfactory, a more perfect and permanent union should be formed; but Nicaragua and Costa Rica would not take part. In Salvador, moreover, the anti-unionists rallied, and a conflict occurred (1890) in which the government was overthrown, the president killed, and the opponents of union established a provisional government, with Gen. Ezeta at its head. Then the president of Guatemala, Manuel Barillas, who had succeeded Barrios, interfered, and Guatemala and Salvador went fiercely to war. The Salvadorians had the best of it in most of the fighting, and Barillas was hard pressed by revolutionists at home; but he kept his power in Guatemala, though he did not succeed in suppressing Ezeta and his party in Salvador. One incident connected with these events caused excitement and controversy in the United States. A Guatemalan exile, Barrundia, took passage from Mexico, on a Pacific Mail steamer, for Salvador, to enlist in the war. The steamer touched at a port in Guatemala, where the authorities undertook to arrest him. The captain refused to give his passenger up; but neither the United States minister nor naval officers present in the port could find authority to sustain the captain's refusal, and the latter was forced to yield. Barrundia resisted the arrest, and was shot. While the opponents of union triumphed in Salvador, they failed in a desperate attempt at revolution in Honduras. President Bogran, in that state, maintained his authority, and was succeeded at the close of his constitutional term, in 1892, by General Leiva. In 1894, the government of Leiva was overthrown by insurgent Liberals, and Policarpo Bonilla made president, under a new constitution. Meantime, affairs in Nicaragua and Salvador were equally tempestuous. President Sacaza, in the former, was compelled to resign, in 1893. Whether the adoption of a new constitution, in 1894, and the expulsion of a number of Jesuits and nuns, will calm the disorder, remains to be seen. In Salvador, Ezeta was driven from the presidency in 1894, and a provisional government set up. In Costa Rica, during 1892-3, there were conflicts between the president and the legislature, but no revolution occurred. In

Guatemala, President Barillas was succeeded in 1892 by Gen. José Barrios, son of the former president.

CEPHISSUS, Battle of the (A. D. 1311). See **CATALAN GRAND COMPANY.**

CERAM. See **MALAY ARCHIPELAGO: DUTCH EAST INDIES.**

CERAMICUS OF ATHENS.—The Ceramicus was originally the most important of the suburban districts of Athens and derived its name from the potters. "It is probable that about the time of Pisistratus the market of the ancient suburb called the Ceramicus (for every Attic district possessed its own market) was constituted the central market of the city. . . . They [the Pisistratidæ] connected Athens in all directions by roadways with the country districts: these roads were accurately measured, and all met on the Ceramicus, in the centre of which an altar was erected to the Twelve Gods. From this centre of town and country were calculated the distances to the different country districts, to the ports, and to the most important sanctuaries of the common fatherland. . . . [In the next century—in the age of Pericles—the population had extended to the north and west and] part of the ancient potters' district or Ceramicus had long become a quarter of the city [the Inner Ceramicus]; the other part remained suburb [the Outer Ceramicus]. Between the two lay the double gate or Dipylum, the broadest and most splendid gate of the city. . . . Here the broad carriage-road which, avoiding all heights, ascended from the market-place of Hippodamus directly to the city-market of the Ceramicus, entered the city; from here straight to the west led the road to Eleusis, the sacred course of the festive processions. . . . From this road again, immediately outside the gate, branched off that which led to the Academy. . . . The high roads in the vicinity of the city gates were everywhere bordered with numerous and handsome sepulchral monuments, in particular the road leading through the outer Ceramicus. Here lay the public burial-ground for the citizens who had fallen in war; the vast space was divided into fields, corresponding to the different battle-fields at home and abroad."—E. Curtius, *Hist. of Greece*, bk. 2, ch. 2, and bk. 3, ch. 3.

CEYLON.—The name Ceylon is derived by a series of corruptions from the Sanskrit name *Sinhala*, given to the ancient people. The Greek name of the island was *Taprobane*. The Sinhalese, who form the most of the population, came originally from India. Buddhism was introduced at an early day (see **INDIA: B. C. 312—**), and is still the religion of the Sinhalese. The wilder parts of the island are occupied by a people called the *Veddahs*, who are probably the remnants of an aboriginal race. Arabs and Chinese form a considerable element of the coast population. The Portuguese established themselves in the island in the 16th century, but were driven out by the Dutch between 1638 and 1658. Ceylon was ceded to England in 1796, and the cession confirmed in 1802.—See **FRANCE: A. D. 1801-1802.**—C. P. Lucas, *A Hist. Geog. of the British Colonies*, v. 1, sect. 2.

CHALCEDON, The Council of. See **NESTORIAN AND MONOPHYSITE CONTROVERSY.**

CHALCIS AND ERETRIA.—"The most dangerous rivals of Ionia were the towns of Eubœa, among which, in the first instance, Cyme, situated in an excellent bay of the east coast, in a district abounding in wine, and afterwards the two sister-towns on the Euripus, Chalcis and Eretria, distinguished themselves by larger measures of colonization. While Eretria, the 'city of rowers,' rose to prosperity especially by means of purple-fisheries and a ferry-navigation conducted on a constantly increasing scale, Chalcis, the 'bronze city,' on the double sea of the Boeotian sound, contrived to raise and employ for herself the most important of the many treasures of the island—the copper. . . . Chalcis became the . . . Greek Sidon. Next to Cyprus there were no richer stores of copper in the Greek world than on Eubœa."—E. Curtius, *Hist. of Greece*, bk. 2, ch. 3.—The Chalcidians were enterprising colonists, particularly in Thrace, in the Macedonian peninsula, . . . and in southern Italy and Sicily. It was the abundant wealth of

Thrace in metallic ores which drew the Chalcidians to it. About 700 B. C. a border feud between Chalcis and Eretria, concerning certain "Lelantian fields" which lay between them, grew to such proportions and so many other states came to take part in it, that, "according to Thucydides no war of more universal importance for the whole nation was fought between the fall of Troya and the Persian war."—The same, *v.* 1, *bk.* 2, *ch.* 1.—Chalcis was subdued by the Athenians in B. C. 506. See ATHENS: B. C. 509-506; also KLERUCHS, and EUBŒA.

CHALONS, Battles at (A. D. 271).—Among the many pretenders to the Roman imperial throne—"the thirty tyrants," as they were called—of the distracted reign of Gallienus, was Tetricus, who had been governor of Aquitaine. The dangerous honor was forced upon him, by a demoralized army, and he reigned against his will for several years over Gaul, Spain and Britain. At length, when the iron-handed Aurelian had taken the reins of government at Rome, Tetricus secretly plotted with him for deliverance from his own uncoveted greatness. Aurelian invaded Gaul and Tetricus led an army against him, only to betray it, in a great battle at Chalons (271), where the rebels were cut to pieces.—E. Gibbon, *Decline and Fall of the Roman Empire*, *ch.* 11.

CHAMBERSBURG, Burning of. See UNITED STATES OF AM.: A. D. 1864 (JULY: VIRGINIA—MARYLAND).

CHAMPAGNE: Origin of the county.—In the middle years of the revolt that dethroned the Carolingians and raised the Capetians to a throne which they made the throne of a kingdom of France, Count Herbert of Vermandois allied himself with the party of the latter, and began operations for the expanding of his domain. "The Champaign of Rheims, the 'Campania Remensis'—a most appropriate descriptive denomination of the region—an extension of the plains of Flanders—but not yet employed politically as designating a province—was protected against Count Herbert on the Vermandois border by the Castrum Theodorici—Château Thierry. . . . Herbert's profuse promises induced the commander to betray his duty. . . . Herbert, through this occupation of Château Thierry,

obtained the city of Troyes and all the 'Campania Remensis,' which, under his potent sway, was speedily developed into the magnificent County of Champagne. Herbert and his lineage held Champagne during three generations, until some time after the accession of the Capets, when the Grand Fief passed from the House of Vermandois to the House of Blois."—Sir F. Palgrave, *Hist. of Normandy and Eng.*, *v.* 2, *p.* 192.

A. D. 1814.—Macdonough's naval victory. See UNITED STATES OF AM.: A. D. 1814 (SEPTEMBER).

CHAMPS DE MARS.—CHAMPS DE MAI.—When the Merovingian kings of the Franks summoned their captains to gather for the planning and preparing of campaigns, the assemblies were called at first the Champs de Mars, because the meeting was in earliest spring—in March. "But as the Franks, from serving on foot, became cavaliers under the second [the Carolingian] race, the time was changed to May, for the sake of forage, and the assemblies were called Champs de Mai."—E. E. Crowe, *Hist. of France*, *ch.* 1.—See, also, MALLUM, and PARLIAMENT OF PARIS.

CHANCAS, The. See PERU: THE ABORIGINAL INHABITANTS.

CHANCELLOR, The.—"The name [of the Chancellor], derived probably from the cancelli or screen behind which the secretarial work of the royal household was carried on, claims a considerable antiquity; and the offices which it denotes are various in proportion. The chancellor of the Karolingian sovereigns, succeeding to the place of the more ancient referendarius, is simply the royal notary; the archi-cancellarius is the chief of a large body of such officers associated under the name of the chancery, and is the keeper of the royal seal. It is from this minister that the English chancellor derives his name and function. Edward the Confessor, the first of our sovereigns who had a seal, is also the first who had a chancellor; from the reign of the Conqueror the office has descended in regular succession. It seems to have been to a comparatively late period, generally if not always, at least in England, held by an ecclesiastic who was a member of the royal household and on a footing with the great dignitaries. The chancellor was the most dignified of the royal chaplains, if not the head of that body. The whole secretarial work of the household and court fell on the chancellor and the chaplains. . . . The chancellor was, in a manner, the secretary of state for all departments."—W. Stubbs, *Const. Hist. of Eng.*, *ch.* 11, *sect.* 121.—"In the reign of Edward I. we begin to perceive signs of the rise of the extraordinary or equitable jurisdiction of the Chancellor. The numerous petitions addressed to the King and

his Council, seeking the interposition of the royal grace and favour either to mitigate the harshness of the Common Law or supply its deficiencies, had been in the special care of the Chancellor, who examined and reported upon them to the King. . . . At length, in 1348, by a writ or ordinance of the 22d year of Edward III. all such matters as were 'of Grace' were directed to be dispatched by the Chancellor or by the Keeper of the Privy Seal. This was a great step in the recognition of the equitable jurisdiction of the Court of Chancery, as distinct from the legal jurisdiction of the Chancellor and of the Courts of Common Law; although it was not until the following reign that it can be said to have been permanently established."—T. P. Taswell-Langmead, *Eng. Const. Hist.*, pp. 173-174.—"The Lord Chancellor is a Privy Councillor by his office; a Cabinet Minister; and, according to Lord Chancellor Ellesmere, prolocutor [chairman, or Speaker] of the House of Lords by prescription."—A. C. Ewald, *The Crown and its Advisers*, *loc. cit.* 2.

CHANTRY PRIESTS.—"With the more wealthy and devout [in the 14th, 15th and 16th centuries] it was the practice to erect little chapels, which were either added to churches or enclosed by screens within them, where chantry priests might celebrate mass for the good of their souls in perpetuity. . . . Large sums of money were . . . devoted to the maintenance of chantry priests, whose duty it was to say mass for the repose of the testator's soul. . . . The character and conduct of the chantry priests must have become somewhat of a lax order in the 16th century."—R. R. Sharpe, *Int. to "Calendar of Wills in the Court of Husting, London," v. 2, p. viii.*

CHASIDIM, OR CHASIDEES, OR ASSIDEANS, The.—A name, signifying the godly or pious, assumed by a party among the Jews, in the second century B. C., who resisted the Grecianizing tendencies of the time under the influence of the Græco-Syrian domination, and who were the nucleus of the Maccabean revolt. The later school of the Pharisees is represented by Ewald (*Hist. of Israel*, bk. 5, sect. 2) to have been the product of a narrowing transformation of the school of the Chasidim; while the Essenes, in his view, were a purer residue of the Chasidim "who strove after piety, yet would not join the Pharisees"; who abandoned "society as worldly and incurably corrupt," and in whom "the conscience of the nation, as it were, withdrew into the wilderness."—H. Ewald, *Hist. of Israel*, bk. 5, sect. 2.—A modern sect, borrowing the name, founded by one Israel Baal Schem, who first appeared in Podolia, in 1740, is said to embrace most of the Jews in Galicia, Hungary, Southern Russia, and Wallachia.—H. C. Adams, *Hist. of the Jews*, p. 333.

CHASUARI, The. See FRANKS: ORIGIN, ETC.

CHÂTEAU CAMBRESIS, Treaty of (1559). See FRANCE: A. D. 1547-1559.

CHÂTEAU GAILLARD.—This was the name given to a famous castle, built by Richard Cœur de Lion in Normandy, and designed to be the key to the defences of that important duchy. "As a monument of warlike skill, his 'Saucy Castle,' Château Gaillard, stands first among the fortresses of the Middle Ages. Richard fixed its site where the Seine bends suddenly at Gailon in a great semicircle to the north, and where the Valley of Les Andelys breaks the line of the chalk cliffs along its bank. The castle formed part of an intrenched camp which Richard designed to cover his Norman capital. . . . The easy reduction of Normandy on the fall of Château Gaillard at a later time [when it was taken by Philip Augustus, of France] proved Richard's foresight."—J. R. Green, *Short Hist. of the English People*, ch. 2, sect. 9.

CHATTI, OR CATTI, The.—"Beyond [the Mattiaci] are the Chatti, whose settlements begin at the Hercynian forest, where the country is not so open and marshy as in the other cantons into which Germany stretches. They are found where there are hills, and with them grow less frequent, for the Hercynian forest keeps close till it has seen the last of its native Chatti. Hardy frames, close-knit limbs, fierce countenances, and a peculiarly vigorous courage, mark the tribe. For Germans, they have much intelligence and sagacity. . . . Other tribes you see going to battle, the Chatti to a campaign."—"The settlements of the Chatti, one of the chief German tribes, apparently coincide with portions of Westphalia, Nassau, Hesse-Darmstadt and Hesse-Cassel. Dr. Latham assumes the Chatti of Tacitus to be the Suevi of Cæsar. The fact that the name Chatti does not occur in Cæsar renders this hypothesis by no means improbable."—Tacitus, *Germany, trans. by Church and Brodribb, and note.*—See, also, SUEVI.

CHAUCER, and his times. See ENGLAND: A. D. 1350-1400.

CHAUCI AND CHERUSCI, The.—"The tribe of the Chauci . . . beginning at the Frisian settlements and occupying a part of the coast, stretches along the frontier of all the tribes which I have enumerated, till it reaches with a bend as far as the Chatti. This vast extent of country is not merely possessed but densely peopled by the Chauci, the noblest of the German races, a nation who would maintain their greatness by righteous dealing. Without ambition, without lawless violence, . . . the crowning proof of their valour and their strength is, that they keep up their superiority without harm to others. . . . Dwelling on one side of the Chauci and Chatti, the Cherusci long cherished, unassailed, an excessive and enervating love of peace. This was more pleasant than safe, . . . and so the Cherusci, ever reputed good and just, are now called cowards and fools, while in the case of the victorious Chatti success has been identified with prudence. The downfall of the Cherusci brought with it also that of the Fosi, a neighbouring tribe."—"The settlements of the Chauci . . . must have included almost the entire country between the Ems and the Weser—that is, Oldenburg and part of Hanover—and have taken in portions of Westphalia about Munster and Paderborn. The Cherusci . . . appear to have occupied Brunswick and the south part of Hanover. Arminius who destroyed the Roman army under Varus, was a Cheruscan chief. . . . The Fosi . . . must have occupied part of Hanover."—Tacitus, *Minor Works, trans.*

by Church and Brodribb: The Germania, with Geog. notes.—Bishop Stubbs conjectures that the Chauci, Cherusci, and some other tribes may have been afterwards comprehended under the general name "Saxon." See SAXONS.

A. D. 988.—Taken by the Russians.—"A thousand years after the rest of the Greek nation was sunk in irremediable slavery, Cherson remained free. Such a phenomenon as the existence of manly feeling in one city, when mankind everywhere else slept contented in a state of political degradation, deserved attentive consideration. . . . Cherson retained its position as an independent State until the reign of Theophilus [Byzantine emperor A. D. 829-842], who compelled it to receive a governor from Constantinople; but, even under the Byzantine government, it continued to defend its municipal institutions, and, instead of slavishly soliciting the imperial favour, and adopting Byzantine manners, it boasted of its constitution and self government. But it gradually lost its former wealth and extensive trade, and when Vladimir, the sovereign of Russia, attacked it in 988, it was betrayed into his hands by a priest, who informed him how to cut off the water. . . . Vladimir obtained the hand of Anne, the sister of the emperors Basil II. and Constantine VIII., and was baptised and married in the church of the Panaghia at Cherson. To soothe the vanity of the Empire, he pretended to retain possession of his conquest as the dowry of his wife. Many of the priests who converted the Russians to Christianity, and many of the artists who adorned the earliest Russian churches with paintings and mosaics, were natives of Cherson."—G. Finlay, *Hist. of the Byzantine Empire from 716 to 1057.*

CHESS, Origin of the game of.—“If we wished to know, for instance, who has taught us the game of chess, the name of chess would tell us better than anything else that it came to the West from Persia. In spite of all that has been written to the contrary, chess was originally the game of Kings, the game of Shahs. This word Shah became in Old French *eschac*, It. *scacco*, Germ. *Schach*; while the Old French *eschecs* was further corrupted into chess. The more original form *chec* has likewise been preserved, though we little think of it when we draw a cheque, or when we suffer a check, or when we speak of the Chancellor of the Exchequer. The great object of the chess-player is to protect the king, and when the king is in danger, the opponent is obliged to say ‘check,’ i. e., Shah, the king. . . . After this the various meanings of check, cheque, or exchequer become easily intelligible, though it is quite true that if similar changes of meaning, which in our case we can watch by the light of history, had taken place in the dimness of prehistoric ages, it would be difficult to convince the sceptic that exchequer, or scaccarium, the name of the chess-board was afterwards used for the checkered cloth on which accounts were calculated by means of counters, and that a checkered career was a life with many cross-lines.”—F. Max Müller, *Biog. of Words*, ch. 4.

A. D. 1871.—The great Fire.—“The greatest event in the history of Chicago was the Great Fire, as it is termed, which broke out on the evening of Oct. 8, 1871. Chicago was at that time [except in the business centre] a city of wood. For a long time prior to the evening referred to there had been blowing a hot wind from the southwest, which had dried everything to the inflammability of tinder, and it was upon a mass of sun and wind-dried wooden structures that the fire began its work. It is supposed to have originated from the accidental upsetting of a kerosene lamp in a cow barn [Mrs. O’Leary’s]

on De Koven Street, near the corner of Jefferson, on the west side of the river. This region was composed largely of shanties, and the fire spread rapidly, very soon crossing the river to the South Side, and fastening on that portion of the city which contained nearly all the leading business houses, and which was built up very largely with stone and brick. But it seemed to enkindle as if it were tinder. Some buildings were blown up with gunpowder, which, in connection with the strong southwest gale, prevented the extension of the flames to the south. The fire swept on Monday steadily to the north, including everything from the lake to the South Branch, and then crossed to the North Side, and, taking in everything from the lake to the North Branch, it burned northward for a distance of three miles, where it died out at the city limits, when there was nothing more to burn. In the midst of this broad area of devastation, on the north side of Washington Square, between Clark Street and Dearborn Avenue, the well-known Ogden house stands amid trees of the ancient forest and surrounded by extensive grounds, the solitary relic of that section of the city before the fiery flood. The total area of the land burned over was 2,100 acres. Nearly 20,000 buildings were consumed; 100,000 people were rendered homeless; 200 lives were lost, and the grand total of values destroyed is estimated at \$200,000,000. Of this vast sum, nearly one-half was covered by insurance, but under the tremendous losses many of the insurance companies were forced to the wall, and went into liquidation, and the victims of the conflagration recovered only about one-fifth of their aggregate losses. Among the buildings which were burned were the court-house, custom-house and post office, chamber of commerce, three railway depots, nine daily newspaper offices, thirty-two hotels, ten theatres and halls, eight public schools and some branch school buildings, forty-one churches, five elevators, and all the national banks. If the Great Fire was an event without parallel in its dimensions and the magnitude of its dire results, the charity which followed it was equally unrivalled in its extent. . . . All the civilized world appeared to instantly appreciate the calamity. Food, clothing, supplies of every kind, money, messages of affection, sympathy, etc., began pouring in at once in a stream that appeared endless and bottomless. In all, the amount contributed reached over \$7,000,000. . . . It was believed by many that the fire had forever blotted out Chicago from the list of great American cities, but the spirit of her people was undaunted by calamity, and, encouraged by the generous sympathy and help from all quarters, they set to work at once to repair their almost ruined fortunes. . . . Rebuilding was at once commenced, and, within a year after the fire, more than \$40,000,000 were expended in improvements. The city came up from its ruins far more palatial, splendid, strong and imperishable than before. In one sense the fire was a benefit. Its consequence was a class of structures far better, in every essential respect, than before the conflagration. Fire-proof buildings became the rule, the limits of wood were carefully restricted, and the value of the reconstructed portion immeasurably exceeded that of the city which had been destroyed.”

—*Marquis’ Handbook of Chicago*, p. 22. —“Thousands of people on the North Side fled far out on the prairie, but other thousands, less fortunate, were

hemmed in before they could reach the country, and were driven to the Sands, a group of beach-hillocks fronting on Lake Michigan. These had been covered with rescued merchandise and furniture. The flames fell fiercely upon the heaps of goods, and the miserable refugees were driven into the black waves, where they stood neck-deep in chilling water, scourged by sheets of sparks and blowing sand. A great number of horses had been collected here, and they too dashed into the sea, where scores of them were drowned. Toward evening the Mayor sent a fleet of tow-boats which took off the fugitives at the Sands. When the next day [Tuesday, October 10] dawned, the prairie was covered with the calcined ruins of more than 17,000 buildings. . . . This was the greatest and most disastrous conflagration on record. The burning of Moscow, in 1812, caused a loss amounting to £30,000,000; but the loss at Chicago was in excess of this amount. The Great Fire of London, in 1666, devastated a tract of 436 acres, and destroyed 13,000 buildings; but that of Chicago swept over 1,900 acres, and burned more than 17,000 buildings."—M. F. Sweetser, *Chicago* ("Cities of the World," v. 1). — The following is the statement of area burned over, and of property destroyed, made by the Chicago Relief and Aid Society, and which is probably authoritative: "The total area burned over in the city, including streets, was 2,124 acres, or nearly three and one-third square miles. This area contained about 73 miles of streets, 18,000 buildings, and the homes of 100,000 people."—A. T. Andreas, *Hist. of Chicago*, v. 2, p. 760.

A. D. 1886-1887.—The Haymarket Conspiracy.—Crime of the Anarchists.—Their trial and execution.—"In February, 1886, Messrs. McCormick, large agricultural-machine makers of Chicago, refusing to yield to the dictation of their workmen, who required them to discharge some non-Union hands they had taken on, announced a 'lock-out,' and prepared to resume business as soon as possible with a new staff. Spies, Lingg, and other German Anarchists saw their opportunity. They persuaded the ousted workmen to prevent the 'scabs,'—anglicé, 'blacklegs,'—from entering the works on the day of their reopening. Revolvers, rifles, and bombs were readily found, the latter being entrusted principally to the hands of professional 'Reds.' The most violent appeals were made to the members of Unions and the populace generally; but though a succession of riots were got up, they were easily quelled by the resolute action of the police, backed by the approval of the immense majority of the people of Chicago. Finally, a mass meeting in arms was called to take place on May 4th, 1886, at 7.30 p. m., in the Haymarket, a long and recently widened street of the town, for the express purpose of denouncing the police. But the intention of the Anarchists was not merely to denounce the police: this was the pretext only. The prisons were to be forced, the police-stations blown up, the public buildings attacked, and the onslaught on property and capital to be inaugurated by the devastation of one of the fairest cities of the Union. By 8 p. m. a mob of some three or four thousand persons had been collected, and were regaled by speeches that became more violent as the night wore on. At 10 p. m. the police

appeared in force. The crowd were commanded to disperse peaceably. A voice shouted: 'We are peaceable.' Captain Schaack says this was a signal. The words were hardly uttered when 'a spark flashed through the air. It looked like the lighted remnant of a cigar, but hissed like a miniature sky-rocket.' It was a bomb, and fell amid the ranks of the police. A terrific explosion followed, and immediately afterwards the mob opened fire upon the police. The latter, stunned for a moment, soon recovered themselves, returned the fire, charged the mob, and in a couple of minutes dispersed it in every direction. But eight of their comrades lay dead upon the pavement, and scores of others were weltering in their blood around the spot. Such was the Chicago outrage of May 4th, 1886."—*The Spectator*, Apr. 19, 1890 (reviewing Schaack's "Anarchy and Anarchists").—The Anarchists who were arrested and brought to trial for this crime were eight in number,—August Spies, Michael Schwab, Samuel Fielden, Albert R. Parsons, Adolph Fischer, George Engel, Louis Lingg, and Oscar W. Neebe. The trial began July 14, 1886. The evidence closed on the 10th of August; the argument of counsel consumed more than a week, and on the 20th of August the jury brought in a verdict which condemned Neebe to imprisonment for fifteen years, and all the other prisoners to death. Lingg committed suicide in prison; the sentences of Schwab and Fielden were commuted by the Governor to imprisonment for life; the remaining four were hanged on the 11th of November, 1887.—Judge Gary, *The Chicago Anarchists of 1886* (*Century Mag.*, April, 1893).

A. D. 1892-1893.—The World's Columbian Exposition.—"As a fitting mode of celebrating the four hundredth anniversary of the landing of Columbus on Oct. 12, 1492, it was proposed to have a universal exhibition in the United States. The idea was first taken up by citizens of New York, where subscriptions to the amount of \$5,000,000 were obtained from merchants and capitalists before application was made for the sanction and support of the Federal Government. When the matter came up in Congress the claims of Chicago were considered superior, and a bill was passed and approved on April 25, 1890, entitled 'An Act to provide for celebrating the four hundredth anniversary of the discovery of America by Christopher Columbus, by holding an international exhibition of arts, industries, manufactures, and the products of the soil, mine, and sea in the city of Chicago, in the State of Illinois.' The act provided for the appointment of commissioners who should organize the exposition. . . . When the organization was completed and the stipulated financial support from the citizens and municipality of Chicago assured, President Harrison, on Dec. 24, 1890, issued a proclamation inviting all the nations of the earth to participate in the World's Columbian Exposition. Since the time was too short to have the grounds and buildings completed for the summer of 1892, as was originally intended, the opening of the exposition was announced for May, 1893. When the work was fairly begun it was accelerated, as many as 10,000 workmen being employed at one time, in order to have the buildings ready to receive the

ated with imposing ceremonies on Oct. 12, 1892, in commemoration of the exact date of the discovery of America."—*Appleton's Annual Cyclopaedia*, 1891, p. 837.—On May 1, 1893, the Fair was opened with appropriate ceremonies by President Cleveland.

CHILE: The Araucanians.—"The land of Chili, from 30° south latitude, was and is still in part occupied by several tribes who speak the same language. They form the fourth and most southern group of the Andes people, and are called Araucanians. Like almost all American tribal names, the term Araucanian is indefinite; sometimes it is restricted to a single band, and sometimes so extended as to embrace a group of tribes. Some regard them as a separate family, calling them Chilians, while others, whom we follow, regard them as the southern members of the Andes group, and still others class them with the Pampas Indians. The name Araucanian is an improper one, introduced by the Spaniards, but it is so firmly fixed that it cannot be changed. The native names are Moluche (warriors) and Alapuche (natives). Originally they extended from Coquimbo to the Chonos Archipelago and from ocean to ocean, and even now they extend, though not very far, to the east of the Cordilleras. They are divided into four (or, if we include the Picunche, five) tribes, the names of which all end in 'tche' or 'che,' the word for man. Other minor divisions exist. The entire number of the Araucanians is computed at about 30,000 souls, but it is decreasing by sickness as well as by vice. They are owners of their land and have cattle in abundance, pay no taxes, and even their labor in the construction of highways is only light. They are warlike, brave, and still enjoy some of the blessings of the Inca civilization; only the real, western Araucanians in Chili have attained to a sedentary life. Long before the arrival of the Spaniards the government of the Araucanians offered a striking resemblance to the military aristocracy of the old world. All the rest that has been written of their high stage of

culture has proved to be an empty picture of fancy. They followed agriculture, built fixed houses, and made at least an attempt at a form of government, but they still remain, as a whole, cruel, plundering savages."—*The Standard Natural Hist. (J. S. Kingsley, ed.), v. 6, pp. 232-234*.—"The Araucanians inhabit the delightful region between the Andes and the sea, and between the rivers Bio-bio and Valdivia. They derive the appellation of Araucanians from the province of Arauco. . . . The political division of the Araucanian state is regulated with much intelligence. It is divided from north to south into four governments. . . . Each government is divided into five provinces, and each province into nine counties. The state consists of three orders of nobility, each being subordinate to the other, and all having their respective vassals. They are the Toquis, the Apo-Ulmenes, and the Ulmenes. The Toquis, or governors, are four in number. They are independent of each other, but confederated for the public welfare. The Arch-Ulmenes govern the provinces under their respective Toquis. The Ulmenes govern the counties. The upper ranks, generally, are likewise comprehended under the term Ulmenes."—R. G. Watson, *Spanish and Portuguese S. Am., v. 1, ch. 12*.

ALSO IN: J. I. Molina, *Geog., Natural and Civil Hist. of Chili, v. 2, bk. 2*.

A. D. 1450-1724.—**The Spanish conquest.—The Araucanian War of Independence.**—"In the year 1450 the Peruvian Inca, Yupanqui, desirous of extending his dominions towards the south, stationed himself with a powerful army at Atacama. Thence he dispatched a force of 10,000 men to Chili, under the command of Chinchiruca, who, overcoming almost incredible obstacles, marched through a sandy desert as far as Copiapo, a distance of 80 leagues. The Copiapins flew to arms, and prepared to resist this invasion. But Chinchiruca, true to the policy which the Incas always observed, stood upon the defensive, trusting to persuasion rather than to force for the accomplishment of his designs. . . . While he proffered peace, he warned them of the consequences of resisting the 'Children of the Sun.'" After wavering for a time, the Copiapins submitted themselves to the rule of the Incas. "The adjoining province of Coquimbo was easily subjugated, and steadily advancing, the Peruvians, some six years after their first entering the country, firmly established themselves in the valley of Chili, at a distance of more than 200 leagues from the frontier of Atacama. The 'Children of the Sun' had met thus far with little resistance, and, encouraged by success, they marched their victorious armies against the Purumancians, a warlike people living beyond the river Rapel." Here they were desperately resisted, in a battle which lasted three days, and from which both armies with drew, undefeated and unvictorious. On learning this result, the Inca Yupanqui ordered his generals to relinquish all attempts at further conquest, and to "seek, by the introduction of wise laws, and by instructing the people in agriculture and the arts, to establish themselves more firmly in the territory already acquired. To what extent the Peruvians were successful in the endeavor to ingraft their civilization, religion, and customs upon the Chilians, it is at this distant day impossible to determine, since the earliest

Historians differ widely on the subject. Certain it is, that on the arrival of the Spaniards the Incas, at least nominally, ruled the country, and received an annual tribute of gold from the people. In the year 1535, after the death of the unfortunate Inca Atahualpa, Diego Almagro, fired by the love of glory and the thirst for gold, yielded to the solicitations of Francisco Pizarro, the conqueror of Peru, and set out for the subjection of Chili, which, as yet, had not been visited by any European. His army consisted of 570 Spaniards, well equipped, and 15,000 Peruvian auxiliaries. Regardless of difficulties and dangers this impetuous soldier selected the near route that lay along the summits of the Andes, in preference to the more circuitous road passing through the desert of Atacama. Upon the horrors of this march, of which so thrilling an account is given by Prescott in the 'Conquest of Peru,' it is unnecessary for us to dwell; suffice it to state that, on reaching Copiapo no less than one-fourth of his Spanish troops, and two-thirds of his Indian auxiliaries, had perished from the effects of cold, fatigue and starvation. . . . Everywhere the Spaniards met with a friendly reception from the natives, who regarded them as a superior race of beings, and the after conquest of the country would probably have been attended with no difficulty had a conciliatory policy been adopted; but this naturally inoffensive people, aroused by acts of the most barbarous cruelty, soon flew to arms. Despite the opposition of the natives, who were now rising in every direction to oppose his march, Almagro kept on, overcoming every obstacle, until he reached the river Cachapual, the northern boundary of the Purumancian territory." Here he met with so stubborn and effective a resistance that he abandoned his expedition and returned to Peru, where, soon after, he lost his life [see PERU: A. D. 1533-1548] in a contest with the Pizarros. "Pizarro, ever desirous of conquering Chili, in 1540 dispatched Pedro Valdivia for that purpose, with some 200 Spanish soldiers and a large body of Peruvians." The invasion of Valdivia was opposed from the moment he entered the country; but he pushed on until he reached the river Mapocho, and "encamped upon the site of the present capital of Chili. Valdivia, finding the location pleasant, and the surrounding plain fertile, here founded a city on the 24th of February, 1541. To this first European settlement in Chili he gave the name of Santiago, in honor of the patron saint of Spain. He laid out the town in Spanish style; and as a place of refuge in case of attack, erected a fort upon a steep rocky hill, rising some 200 feet above the plain." The Mapochins soon attacked the infant town, drove its people to the fort and burned their settlement; but were finally repulsed with dreadful slaughter. "On the arrival of a second army from Peru, Valdivia, whose ambition had always been to conquer the southern provinces of Chili, advanced into the country of the Purumancians. Here history is probably defective, as we have no account of any battles fought with these brave people. . . . We simply learn that the Spanish leader eventually gained their good-will, and established with them an alliance both offensive and defensive. . . . In the following year (1546) the Spanish forces crossed the river Maule, the southern boundary of the Purumancians, and advanced

toward the Itata. While encamped near the latter river, they were attacked at dead of night by a body of Araucanians. So unexpected was the approach of this new enemy, that many of the horses were captured, and the army with difficulty escaped total destruction. After this terrible defeat, Valdivia finding himself unable to proceed, returned to Santiago." Soon afterwards he went to Peru for reinforcements and was absent two years; but came back, at the end of that time, with a large band of followers, and marched to the South. "Reaching the bay of Talcahuano without having met with any opposition, on the 5th of October, 1550, he founded the city of Concepcion on a site at present known as Penco." The Araucanians, advancing boldly upon the Spaniards at Concepcion, were defeated in a furious battle which cost the invaders many lives. Three years later, in December, 1553, the Araucanians had their revenge, routing the Spaniards utterly and pursuing them so furiously that only two of their whole army escaped. Valdivia was among the prisoners taken and was slain. Again and again, under the lead of a youthful hero, Lautaro, and a vigorous toqui, or chief, named Caupolican, the Araucanians assailed the invaders of their country with success; but the latter increased in numbers and gained ground, at last, for a time, building towns and extending settlements in the Araucanian territory. The indomitable people were not broken in spirit, however; and in 1598, by an universal and simultaneous rising, they expelled the Spaniards from almost every settlement they had made. "In 1602 . . . of the numerous Spanish forts and settlements south of the Bio-Bio, Nacimiento and Arauco only had not fallen. Valdivia and Osorno were afterward rebuilt. About the same time a fort was erected at Boroa. This fort was soon after abandoned. Valdivia, Osorno, Nacimiento, and Arauco still remain. But of all the 'cities of the plain' lying within the boundaries of the haughty Araucanians, not one ever rose from its ashes; their names exist only in history; and the sites where they once flourished are now marked by ill-defined and grass-grown ruins. From the period of their fall dates the independence of the Araucanian nation; for though a hundred years more were wasted in the vain attempt to reconquer the heroic people . . . the Spaniards, weary of constant war, and disheartened by the loss of so much blood and treasure, were finally compelled to sue for peace; and in 1724 a treaty was ratified, acknowledging their freedom, and establishing the limits of their territory."—E. R. Smith, *The Araucanians*, ch. 11-14.

A. D. 1568.—The Audiencia established. See AUDIENCIAS.

A. D. 1810-1818.—The achievement of independence.—San Martin, the Liberator.—

"Chili first threw off the Spanish yoke in September, 1810 [on the pretext of fidelity to the Bourbon king dethroned by Napoleon], but the national independence was not fully established till April 1818. During the intermediate period, the dissensions of the different parties; their disputes as to the form of government and the law of election; with other distracting causes, arising out of the ambition of turbulent individuals, and the inexperience of the whole nation in political

affairs; so materially retarded the union of the country, that the Spaniards, by sending expeditions from Peru, were enabled, in 1814, to regain their lost authority in Chili. Meanwhile the Government of Buenos Ayres, the independence of which had been established in 1810 [see ARGENTINE REPUBLIC: A. D. 1806-1820], naturally dreaded that the Spaniards would not long be confined to the western side of the Andes; but would speedily make a descent upon the provinces of the River Plate, of which Buenos Ayres is the capital. In order to guard against this formidable danger, they bravely resolved themselves to become the invaders, and by great exertions equipped an army of 4,000 men. The command of this force was given to General Don José de San Martín, a native of the town of Yapeyu in Paraguay; a man greatly beloved by all ranks, and held in such high estimation by the people, that to his personal exertions the formation of this army is chiefly due. With these troops San Martín entered Chili by a pass over the Andes heretofore deemed inaccessible, and on the 12th of February, 1817, attacked and completely defeated the royal army at Chacabuco. The Chilians, thus freed from the immediate presence of the enemy, elected General O'Higgins [see PERU: A. D. 1550-1816] as Director; and he, in 1818, offered the Chilians a constitution, and nominated five senators to administer the affairs of the country. This meritorious officer, an Irishman by descent, though born in Chili, has ever since [1825] remained at the head of the government. It was originally proposed to elect General San Martín as Director; but this he steadily refused, proposing his companion in arms, O'Higgins, in his stead. The remnant of the Spanish army took refuge in Talcahuana, a fortified sea-port near Concepcion, on the southern frontier of Chili. Vigorous measures were taken to reduce this place, but, in the beginning of 1818, the Viceroy of Peru, by draining that province of its best troops, sent off a body of 5,000 men under General Osorio, who succeeded in joining the Spaniards shut up in Talcahuana. Thus reinforced, the Royal army, amounting in all to 8,000, drove back the Chilians, marched on the capital, and gained other considerable advantages; particularly in a night attack at Talca, on the 19th of March 1818, where the Royalists almost entirely dispersed the Patriot forces. San Martín, however, who, after the battle of Chacabuco, had been named Commander-in-chief of the united armies of Chili and Buenos Ayres, rallied his army and equipped it anew so quickly that, "on the 5th of April, only 17 days after his defeat, he engaged, and, after an obstinate and sanguinary conflict, completely routed the Spanish army on the plains of Maypo. From that day Chili may date her complete independence; for although a small portion of the Spanish troops endeavoured to make a stand at Concepcion, they were soon driven out and the country left in the free possession of the Patriots. Having now time to breathe, the Chilean Government, aided by that of Buenos Ayres, determined to attack the Royalists in their turn, by sending an armament against Peru [see PERU: A. D. 1820-1826]—a great and bold measure, originating with San Martín."—Capt. B. Hall, *Extracts from a Journal*, v. 1, ch. 1.

A. D. 1833-1884.—A successful oligarchy and its constitution.—The war with Peru and Bolivia.—"After the perfection of its national independence, the Chilean government soon passed into the permanent control of civilians, 'while the other governments of the west coast remained prizes for military chieftains.' Its present constitution was framed in 1833, and though it is only half a century old 'it is the oldest written national constitution in force in all the world except our own, unless the Magna Charta of England be included in the category.' The political history of Chile during the fifty years of its life has been that of a well ordered commonwealth, but one of a most unusual and interesting sort. Its government has never been forcibly overthrown, and only one serious attempt at revolution has been made. Chile is in name and in an important sense a republic, and yet its government is an oligarchy. Suffrage is restricted to those male citizens who are registered, who are twenty-five years old if unmarried and twenty-one if married, and who can read and write; and there is also a stringent property qualification. The consequence is that the privilege of voting is confined to an aristocracy: in 1876, the total number of ballots thrown for president was only 46,114 in a population of about two and a quarter millions. The president of Chile has immense powers of nomination and appointment, and when he is a man of vigorous will he tyrannically sways public policy, and can almost always dictate the name of his successor. The government has thus become practically vested in a comparatively small number of leading Chilean families. There is no such thing as 'public opinion' in the sense in which we use the phrase, and the newspapers, though ably conducted, do not attempt, as they do not desire, to change the existing order of things. 'History,' says Mr. Browne, 'does not furnish an example of a more powerful political "machine" under the title of republic; nor, I am bound to say, one which has been more ably directed so far as concerns the aggrandizement of the country, or more honestly administered so far as concerns pecuniary corruption.' The population of Chile doubled between 1843 and 1875; the quantity of land brought under tillage was quadrupled; . . . more than 1,000 miles of railroad were built; a foreign export trade of \$31,695,039 was reported in 1878; and two powerful iron-clads, which were destined to play a most important part in Chilean affairs, were built in England. Meanwhile, the constitution was officially interpreted so as to guarantee religious toleration, and the political power of the Roman Catholic priesthood diminished. Almost everything good, except home manufactures and popular education, flourished. The development of the nation in these years was on a wonderful scale for a South American state, and the contrast between Chile and Peru was peculiarly striking. . . . Early in 1879 began the great series of events which were to make the fortune of Chile. We use the word 'great,' in its low, superficial sense, and without the attribution of any moral significance to the adjective. The aggressor in

the war between Chile and Peru was inspired by the most purely selfish motives, and it remains to be seen whether the just gods will not win in the long run, even though the game of their antagonists be played with heavily plated iron-clads. . . . At the date last mentioned Chile was suffering, like many other nations, from a general depression in business pursuits. Its people were in no serious trouble, but as a government it was in a bad way. . . . The means to keep up a sinking fund for the foreign debt had failed, and the Chilean five per cents were quoted in London at sixty-four. 'A political cloud also was darkening again in the north, in the renewal of something like a confederation between Peru and Bolivia.' In this state of things the governing oligarchy of Chile decided, rather suddenly, Mr. Browne thinks, upon a scheme which was sure to result either in splendid prosperity or absolute ruin, and which contemplated nothing less than a war of conquest against Peru and Bolivia, with a view to seizing the most valuable territory of the former country. There is a certain strip of land bordering upon the Pacific and about 400 miles long, of which the northern three quarters belonged to Peru and Bolivia, the remaining one quarter to Chile. Upon this land a heavy rain never falls, and often years pass in which the soil does not feel a shower. . . . Its money value is immense. 'From this region the world derives almost its whole supply of nitrates—chiefly saltpetre—and of iodine; its mountains, also, are rich in metals, and great deposits of guano are found in the highlands bordering the sea. The nitrate-bearing country is a plain, from fifty to eighty miles wide, the nitrate lying in layers just below a thin sheet of impacted stones, gravel, and sand. The export of saltpetre from this region was valued in 1882 at nearly \$30,000,000, and the worth of the Peruvian section, which is much the largest and most productive, is estimated, for government purposes, at a capital of \$600,000,000. Chile was, naturally, well aware of the wealth which lay so close to her own doors, and to possess herself thereof, and thus to rehabilitate her national fortunes, she addressed herself to war. The occasion for war was easily found. Bolivia was first attacked, a difficulty which arose at her port of Antofagasta, with respect to her enforcement of a tax upon some nitrate works carried on by a Chilean company, affording a good pretext; and when Peru attempted intervention her envoy was confronted with Chile's knowledge of a secret treaty between Peru and Bolivia, and war was formally declared by Chile upon Peru, April 5, 1879. This war lasted, with some breathing spaces, for almost exactly five years. At the outset the two belligerent powers—Bolivia being soon practically out of the contest—seemed to be about equal in ships, soldiers, and resources; but the supremacy which Chile soon gained upon the seas substantially determined the war in her favor. Each nation owned two powerful iron-clads, and six months were employed in settling the question of naval superiority. . . . On the 21st of May, 1879, the Peruvian fleet attacked and almost destroyed the Chilean wooden frigates which were blockading Iquique; but in chasing a Chilean corvette the larger Peruvian iron-clad—the *Independencia*—ran too near the shore, and was fatally wrecked.

'So Peru lost one of her knights. The game she played with the other—the *Huascar*—was admirable, but a losing one;' and on the 8th of October of the same year the *Huascar* was attacked by the Chilean fleet, which included two iron-clads, and was finally captured 'after a desperate resistance.' . . . From this moment the Peruvian coast was at Chile's mercy: the Chilean arms prevailed in every pitched battle, at San Francisco [November 16, 1879], at Tacna [May 26, 1880], at Arica [June 7, 1880]; and finally, on the 17th of January, 1881, after a series of actions which resembled in some of their details the engagements that preceded our capture of the city of Mexico [ending in what is known as the Battle of Miraflores], the victorious army of Chile took possession of Lima, the capital of Peru. . . . The results of the war have thus far exceeded the wildest hopes of Chile. She has taken absolute possession of the whole nitrate region, has cut Bolivia off from the sea, and achieved the permanent dissolution of the Peru-Bolivian confederation. As a consequence, her foreign trade has doubled, the revenue of her government has been trebled, and the public debt greatly reduced. The Chilean bonds, which were sold at 64 in London in January, 1879, and fell to 60 in March of that year, at the announcement of the war, were quoted at 95 in January, 1884.—*The Growing Power of the Republic of Chile* (*Atlantic Monthly*, July, 1884).

A. D. 1885-1891.—The presidency and dictatorship of Balmaceda.—His conflict with the Congress.—Civil war.—"Save in the one struggle in which the parties resorted to arms, the political development of Chili was free from civil disturbances, and the ruling class was distinguished among the Spanish-American nations not only for wealth and education, but for its talent for government and love of constitutional liberty. The republic was called 'the England of South America,' and it was a common boast that in Chili a pronunciamiento or a revolution was impossible. The spirit of modern Liberalism became more prevalent. . . . As the Liberal party became all-powerful it split into factions, divided by questions of principle and by struggles for leadership and office. . . . The patronage of the Chilean President is enormous, embracing not only the general civil service, but local officials, except in the municipalities, and all appointments in the army and navy and in the telegraph and railroad services and the giving out of contracts. The President has always been able to select his successor, and has exercised this power, usually in harmony with the wishes of influential statesmen, sometimes calling a conference of party chiefs to decide on a candidate. In the course of time the more advanced wing of the Liberals grew more numerous than the Moderates. The most radical section had its nucleus in a Reform Club in Santiago, composed of young university men, of whom Balmaceda was the finest orator. Entering Congress in 1863, he took a leading part in

debates. . . . In 1885 he was the most popular man in the country; but his claim to the presidential succession was contested by various other aspirants—older politicians and leaders of factions striving for supremacy in Congress. He was elected by an overwhelming majority, and as President enjoyed an unexampled degree of popularity. For two or three years the politicians who had been his party associates worked in harmony with his ideas. . . . At the flood of the democratic tide he was the most popular man in South America. But when the old territorial families saw the seats in Congress and the posts in the civil service that had been their prerogative filled by new men, and fortunes made by upstarts where all chances had been at their disposal, then a reaction set in, corruption was scented, and Moderate Liberals, joining hands with the Nationalists and the reviving Conservative party, formed an opposition of respectable strength. In the earlier part of his administration Balmaceda had the co-operation of the Nationalists, who were represented in the Cabinet. In the last two years of his term, when the time drew near for selecting his successor, defection and revolt and the rivalries of aspirants for the succession threw the party into disorder and angered its hitherto unquestioned leader. . . . In January, 1890, the Opposition were strong enough to place their candidate in the chair when the House of Representatives organized. The ministry resigned, and a conflict between the executive and legislative branches of the Government was openly begun when the President appointed a Cabinet of his own selection. . . . This ministry had to face an overwhelming majority against the President, which treated him as a dictator and began to pass hostile laws and resolutions that were vetoed, and refused to consider the measures that he recommended. The ministers were cited before the Chambers and questioned about the manner of their appointment. They either declined to answer, or answered in a way that increased the animosity of Congress, which finally passed a vote of censure, in obedience to which, as was usual, the Cabinet resigned. Then Balmaceda appointed a ministry in open defiance of Congress, with Sanfuentes at its head, the man who was already spoken of as his selected candidate for the presidency. He prepared for the struggle that he invited by removing the chiefs of the administration of the departments and replacing them with men devoted to himself and his policy, and making changes in the police, the militia, and, to some extent, in the army and navy commands. The press denounced him as a dictator, and indignation meetings were held in every town. Balmaceda and his supporters pretended to be not only the champions of the people against the aristocracy, but of the principle of Chile for the Chileans.”—*Appleton's Annual Cyclop.*, 1891, pp. 123-124.—“The conflict between President Balmaceda and Congress ripened into revolution. On January 1, 1891, the Opposition members of the Senate and House of Deputies met, and signed an Act declaring that the President was unworthy of his post, and that he was no longer head of the State nor President of the Republic, as he had violated the Constitution. On January 7 the navy declared in favour of the Legislature, and against Balmaceda. The President denounced the navy as traitors, abolished all

the laws of the country, declared himself Dictator, and proclaimed martial law. It was a reign of terror. The Opposition recruited an army in the Island of Santa Maria under General Urrutia and Commander Canto. On February 14 a severe fight took place with the Government troops in Iquique, and the Congressional army took possession of Pisagua. In April, President Balmaceda . . . delivered a long message, denouncing the navy. . . . The contest continued, and April 7, Arica, in the province of Tarapaca, was taken by the revolutionists. Some naval fights occurred later, and the iron-clad Blanco Encalada was blown up by the Dictator's torpedo cruisers. Finally, on August 21, General Canto landed at Concon, ten miles north of Valparaiso. Balmaceda's forces attacked immediately and were routed, losing 3,500 killed and wounded. The Congress army lost 600. On the 28th a decisive battle was fought at Placilla, near Valparaiso. The Dictator had 12,000 troops, and the opposing army 10,000. Balmaceda's forces were completely routed after five hours' hard fighting, with a loss of 1,500 men. Santiago formally surrendered, and the triumph of the Congress party was complete. A Junta, headed by Señor Jorge Montt, took charge of affairs at Valparaiso August 30. Balmaceda, who had taken refuge at the Argentine Legation in Santiago, was not able to make his escape, and to avoid capture, trial, and punishment committed suicide, September 20, by shooting himself. On the 19th November Admiral Jorge Montt was chosen by the Electoral College, at Santiago, President of Chili, and on December 26 he was installed with great ceremony and general rejoicings.”—*Annual Register*, 1891, p. 420.

A. D. 1891-1892.—Difficulty with the United States.—Threatened War.—During the civil war which terminated, as told above, in the overthrow and suicide of the dictatorial usurper, Balmaceda, the triumph of the Congress party, and the election to the presidency of Admiral Jorge Montt, the representative of the United States, Minister Egan, showed marked favor to Balmaceda and his party, which irritated the Chileans, and produced among them a hostile feeling towards Americans and the American government. This was increased by the action of Mr. Egan, after the defeat of the Balmacedists, in sheltering a large number of refugees of that party within the walls of the American legation. The same was done by other foreign representatives, but to no such extent, except in the case of the Spanish legation. A telegram sent by Mr. Egan on the 8th of October to the State Department at Washington stated: “80 persons sought refuge in his legation after the overthrow of the Balmaceda government; about the same number in the Spanish legation, 8 in the Brazilian, 5 in the French, several in the Uruguayan, 2 in the German, and 1 in the English. Balmaceda sought refuge in the Argentine. All these have gone out except 15 in his own legation, 1 in the German and 5 in the Spanish.” Not venturing to violate the privileges of the American Minister's residence, the Chilean authorities placed it under police surveillance, and arrested a number of persons entering the premises. The Minister complained, and was supported in his complaints at Washington, causing further irritation in Chile. This was again greatly increased by his claim-

ing the right not only to shelter the refugees in his residence, but to protect them in their departure from the country. In that, too, he was sustained by his government, and the refugees were safely sent away. Meantime a more serious cause of quarrel between the two countries had arisen. A party of sailors on shore at Valparaíso, from the United States ship *Baltimore*, had been assailed by a mob, October 16, and two were killed, while eighteen were wounded. The United States demanded satisfaction, and much angry correspondence ensued, made particularly offensive on the Chilean side by an insulting circular which Señor Matta, the Chilean Foreign Minister, issued December 13, and which he caused to be published in the Chilean newspapers. "The note was to the last degree insulting, and would have justified a withdrawal of our minister and a severance of diplomatic relations. The attempt was made later to set up the claim that it was a 'domestic communication' which could not be the subject of diplomatic complaint. Mr. Blaine declined to accept the view that a nation is to take no notice of an insult not directly communicated, and refused to receive as a sufficient apology a statement that the Chilean government would strike out the offensive words. . . . In the elaborate review of the difficulty made in his message of January 25, 1892, President Harrison says: 'The communications of the Chilean government . . . have not at any time taken the form of a manly and satisfactory expression of regret, much less of apology.' This statement is accurate as to the attitude of Chile up to the end of Matta's administration. . . . When, in January, the Chilean foreign department passed into the hands of Señor Pereira, a change is instantly visible; on January 4th Señor Montt at Washington officially mentioned the occurrence which 'Chile has lamented and does so sincerely lament.' Four days later he announced that he had received special instructions to state 'that the Government of Chile has felt very sincere regret for the unfortunate events which occurred in Valparaíso on the 16th of October;' and he added that his Government 'sincerely deprecates the aforesaid disturbance.' Minister Montt had already suggested arbitration as a means of settling the dispute. . . . On January 16th the Chilean authorities notified Mr. Egan that they would withdraw any offensive passages in the Matta circular, and had instructed their Minister in Washington to express regret. The apology, thus expressed both in Washington and Santiago, was stiff and ungraceful, perhaps inadequate; but it was made in good faith. On January 20th, evidently feeling that all was now serene, the Chileans ventured, acting on a hint of Mr. Blaine's, to ask for Egan's withdrawal as a 'persona non grata.' What, therefore, must have been the dismay of the Chileans, on January 23d, to receive an official notice, which the newspapers dubbed an 'ultimatum,' containing the statement that the United States Government was not satisfied with the result of the judicial investigation at Valparaíso and still asked 'for a suitable apology;' that for the Matta note there must be still another 'suitable apology,' without which the United States would terminate diplomatic relations; and that the request for Mr. Egan's withdrawal could not at that time be considered. It was a bitter draught

for any government; but threats of war were resounding through the United States; American naval vessels were hurriedly being made ready; coal and supplies were going into the Pacific. There was power behind the note, and Chile prepared to bend to the storm. The 'ultimatum' appears to have reached the Chileans on Saturday, January 23d. On Monday, January 25th, they sent an answer which could not possibly be read as anything but a complete and abject apology on all the three points." But on the same day on which this answer was being forwarded, the President of the United States sent a warlike message to Congress. "It rehearsed the whole controversy at great length, submitted copious correspondence, and ended with the significant phrase: 'In my opinion I ought not to delay longer to bring these matters to the attention of Congress for such action as may be deemed appropriate.' . . . It is an unprofitable controversy as to whether the authorities in Washington knew that an answer was on its way: if they had read the correspondence they knew that an answer must come, and that the Chilean Ministry must have sent a peaceful answer. It is therefore difficult to understand the purpose of the President's message. . . . The effect . . . was to inflict an unnecessary humiliation on Chile. Spanish-Americans have good memories. Mexico still cherishes resentment for the war begun against her forty-five years ago; and forty-five years hence the Chileans are likely to remember the Balmaceda affair as Americans remembered the impressment of American seamen by Great Britain. We have the apology, but with it we have the ill-will."—A. B. Hart, *Practical Essays on American Government*, Essay 5.

CHILTERN HUNDREDS, Applying for the Stewardship of the.—A seat in the British House of Commons "cannot be resigned, nor can a man who has once formally taken his seat for one constituency throw it up and contest another. Either a disqualification must be incurred, or the House must declare the seat vacant." The necessary disqualification can be incurred by accepting an office of profit under the Crown,—within certain official categories. "Certain old offices of nominal value in the gift of the Treasury are now granted, as of course, to members who wish to resign their seats in order to be quit of Parliamentary duties or to contest another constituency. These offices are the Stewardship of the Chiltern Hundreds [Crown property in Buckinghamshire], of the manors of East Hendred, Northstead, or Hemp-holme, and the escheatorship of Munster. The office is resigned as soon as it has operated to vacate the seat."—Sir W. R. Anson, *Law and Custom of the Constitution*, 1, 81.

CHINA.

The Names of the Country.—"That spacious seat of ancient civilization which we call China has loomed always so large to western eyes. . . . that, at eras far apart, we find it to have been distinguished by different appellations according as it was regarded as the terminus of a southern sea route coasting the great peninsula and islands of Asia, or as that of a northern land route traversing the longitude of that continent. In the former aspect the name applied has nearly always been some form of the name Sin, Chin, Sinæ, China. In the latter point of view the region in question was known to the ancients as the land of the Seres; the middle ages as the Empire of Cathay. The name of China has been supposed, like many another word and name connected with trade and geography of the far east, to have come to us through the Malays, and to have been applied by them to the great eastern monarchy from the style of the dynasty of Thsin, which a little more than two centuries before our era enjoyed a brief but very vigorous existence. . . . There are reasons however for believing that the name of China must have been bestowed at a much earlier date, for it occurs in the laws of Manu, which assert the Chinas to have been degenerate Kshatriyas, and in the Mahabharat, compositions many centuries older than the imperial dynasty of Thsin. . . . This name may have yet possibly been connected with the Thsin, or some monarchy of like dynastic title; for that dynasty had reigned locally in Shensi from the 9th century before our era; and when, at a still earlier date, the empire was partitioned into many small kingdoms, we find among them the dynasties of the Tsin and the Ching. . . . Some at least of the circumstances which have been collected . . . render it the less improbable that the Sinim of the prophet Isaiah . . . should be truly interpreted as indicating the Chinese. The name of China in this form was late in reaching the Greeks and Romans, and to them it probably came through people of Arabian speech, as the Arabs, being without the sound of 'ch,' made the China of the Hindus and Malays into Sin, and perhaps sometimes into Thin. Hence the Thin of the author of the Periplus of the Erythraean Sea, who appears to be the first extant author to employ the name in this form; hence also the Sinæ and Thinæ of Ptolemy. . . . If we now turn to the Seres we find this name mentioned by classic authors much more frequently and at an earlier date by at least a century. The name is familiar enough to the Latin poets of the Augustan age, but always in a vague way. . . . The name of Seres is probably from its earliest use in the west identified with the name of the silkworm and its produce, and this association continued until the name ceased entirely to be used as a geographical expression. . . . It was in the days of the Mongols . . . that China first became really known to Europe, and that by a name which, though especially applied to the northern provinces, also came to bear a more general application, Cathay. This name, Klitai, is that by which China is styled to this day by all, or nearly all, the nations which know it from an inland point of view, including the Russians, the Persians, and the nations of Turkestan; and yet it originally belonged to a people who were not Chinese at

all. The Khitans were a people of Manchu race, who inhabited for centuries a country to the north-east of China." During a period between the 10th and 12th centuries, the Khitans acquired supremacy over their neighbours and established an empire which embraced Northern China and the adjoining regions of Tartary. "It must have been during this period, ending with the overthrow of the dynasty [called the Leao or Iron Dynasty] in 1123, and whilst this northern monarchy was the face which the Celestial Empire turned to Inner Asia, that the name of Khitan, Khitat, or Khitai, became indissolubly associated with China."—H. Yule, *Cathay and the Way Thither: Preliminary Essay*.—"The term 'China,' applied by Europeans to this region, is unknown to the natives, and the Tsin dynasty, whence probably the Hindu form China, has for nearly fifteen hundred years ceased to rule over the plains of the Hoang-ho and Yang-tze-kiang. Nor do they recognize the epithet 'Celestial,' attributed to their empire. . . . In ordinary language the usual expression is Chung-kwó; that is, 'Middle Kingdom,' or 'Central Empire,' in reference either to the preponderance gradually acquired by the central plains over the surrounding states, or to the idea common to so many peoples, that China was really the centre of the world. To the usual four points of the compass the Chinese add a fifth—the centre; that is, China. Since the Manchu conquest the official designation is Taising-kwó; that is, the 'Great and Pure Empire,' or, perhaps, Ta Tsing-kwó, the 'Empire of the Tsing, or Pure.' . . . The people themselves are the 'Children of Han,' or the 'Men of Tsang,' in allusion to two famous dynasties. They also call themselves Limin, an enigmatical term commonly rendered 'Black-haired Race.' But there is no precise natural term of general acceptance either for the country or the people."—E. Reclus, *The Earth and its Inhabitants*, v. 2, ch. 5.

China Proper and the Chinese Empire.—The Chinese Empire embraces Manchuria, Mongolia, Zungaria, Kashgaria (or Eastern Turkestan), and Tibet, as well as China, properly so called. Korea was one of the dependencies of the Empire until 1895, when it acquired independence, as a consequence of the war between China and Japan. In area, scarcely more than one third of the Empire is contained in China proper; but fully nine tenths of the vast population of the Empire is said to be dwelling on that one third of the Chinese domain. "The natural limits of China proper are sufficiently well defined. On the west the eastern extension of the Tibetan plateau, here separated by deep river valleys into divergent ranges, forms a clear frontier between the Chinese and the half-savage Lolo, Sifan, and other hill tribes. Northwards the Great Wall indicates throughout most of its course the parting-line between the arable lands and the steppe or desert. East and south-eastwards the Pacific Ocean washes the seaboard, which develops a semicircular coast-line over 2,000 miles in extent. Lastly, on the south, mountain ranges, plateaux, marshy tracts, difficult river gorges, separate China from the Trans-Gangetic peninsula. Here, however, the frontier-line is often purely conventional, and in this direction China merges more gradually than

elsewhere with the border-lands. It occupies in the extreme east of the continent a space of almost circular form, with one semicircle traced on the mainland, while the other is formed by the Pacific seaboard. . . . Within its natural limits China proper enjoys a fair degree of geographic unity. The mountain systems run mainly in the direction from west to east, thus everywhere opening easy routes from the coast inland. The plains on either side of the main ranges are also connected by means of frequent gaps and easy passes, so that the few isolated plateaux are nowhere extensive enough to prevent the fusion of the surrounding populations. The national unity has been promoted in a special manner by the disposition of the two great river systems. Both the Yellow and Blue Rivers [the Hoang-ho and Yang-tze] flow mainly parallel with the equator, and although their middle courses are widely deflected north and south, the intervening uplands are almost everywhere crossed by accessible routes. . . . The two great fluvial basins, comprising in Tibet, Kuku-nor, Mongolia, and China an area of over 1,360,000 square miles, may even be regarded as forming a common hydrographic system. The section of this vast area lying south of the Mongolian steppes and east of the Tibetan plateaux has naturally become the domain of a united agricultural nation." The lands south of the two great twin rivers "are less solidly united with the rest of the empire. Here the mountains are more elevated than in the heart of the country, and are grouped in a greater number of independent ridges, running, not west and east, but mainly south-west and north-east. Nor can the Si-kiang, the chief river of this region, be compared with the two main streams of China, either in extent or in the facilities afforded by its lateral valleys for free inland communication. Hence this portion of the empire constitutes a distinct territory, more nearly allied physically and ethnically with Further India than with China proper. The Southern Chinese differ widely from those of the central and northern regions, both in speech and customs, and have within the historic period frequently formed distinct political systems. In the eastern hemisphere China corresponds with West Europe in its climate, products, and historic development. The mass of the land doubtless lies much nearer to the equator, for its northern frontier at the eastern extremity of the Great Wall is crossed by the 40th parallel, like Mount Athos, Minorca, and South Spain, while the whole coast south of the Canton estuary lies within the tropics. But the isothermal lines, so to say, deflect China proper northwards, imparting to it a relatively cold climate. . . . The Chinese people constitute one of the most distinct varieties of mankind. They are commonly regarded as a branch of the so-called Mongol type, although presenting a marked contrast to the nomad tribes of this name. The very expression Mongol, to which a more precise meaning was formerly assigned, denotes at present little more than the relationship of contact or proximity between the East Asiatic nations. The Chinese are evidently a very mixed race, presenting a great variety of types in the vast region stretching from Canton to the Great Wall, from the Pacific seaboard to Tibet. But of these types the Mongol is perhaps the least

common amongst the 'Children of Han'. . . . The natives of the various provinces present the sharpest contrasts with each other. The true national link is their common culture rather than any common racial type. For the aboriginal elements have been diversely modified by mixture with Tibetans, Tartars, Mongols, Manchus, Burmese, Shans, Malays, besides the Si-fan, Miaotze, and other still half-savage hill tribes, which have no collective ethnical designation. For thousands of years the agricultural populations of diverse origin settled in the Hoang-ho and Yang-tze-kiang basins have had the same historic destinies, speak dialects of the same language, and have become one nation. . . . But the differences are still conspicuous in some of the southern provinces, notably in Fokien and Kwangtung."—E. Reclus, *The Earth and its Inhabitants*, 2, ch. 5.—See also MANCHURIA, MONGOLIA, ZUNGARIA, TURKISTAN, and TIBET.

The great basins of the Hoang-ho and the Yang-tze-Kiang.—"The region drained by the Hoang-ho, or Yellow River, comprises in Tibet and China proper a total area of some 600,000 square miles, or about three times the extent of France. Yet it ranks only as the second river basin of the empire. . . . The Wei is . . . its largest affluent, and even more important as a navigable highway. . . . Both rivers wash down large quantities of sedimentary matter, estimated in 1792 by Staunton at one-fiftieth of the whole volume for the united stream. . . . These deposits are one of the great sources of danger to the riverain populations. Natural embankments are thereby gradually formed along the course of the stream, whose bed is raised, and new channels formed during the floods, which often cause widespread ruin. Like the Nile, Po, and Mississippi, the Yellow River thus flows occasionally at a higher elevation than the surrounding plain, although not so high as has been represented by the terror-stricken fancy of the inhabitants. A vast system of embankments has been erected on both sides to keep the stream within its bed during the rising of its waters. . . . But this very system itself, maintained by the constant labor of 60,000 hands, has the inevitable result of increasing the . . . difference in level between the river, bed and the low-lying plains. . . . The higher the embankments are carried the more dangerous becomes the stream. In spite of all precautions, great disasters are occasionally caused by the bursting of the dykes, when the crops of whole provinces are swept away, and millions become a prey to famine and pestilence. For China the Hoang-ho still remains the Nih-ho, or 'Rebellious River,' as it is called by the old chroniclers. The riverain populations are always at the mercy of invading hosts, or even of predatory bands strong enough to seize and open the sluices. . . . Apart from the highlands and alluvial plains, most of the Hoang-ho basin is covered with hoang-tu, or 'yellow-earth,' which prevails throughout Pechili, Shansi, Kansu, half of Shensi, the northern division of Honan, and extensive tracts in Shantung. This formation, comprising a region larger than the whole of France, reaches in some places even to the banks of the Yang-tze, and stretches westwards to the Tibetan plateaux. In these regions everything is yellow—hills, fields, highways,

houses, the very torrents and streams charged with alluvia. Even the vegetation is often covered with a yellow veil, while every puff of wind raises clouds of fine dust. From these lands the emperor himself takes the title of Hoang-ti, or 'Yellow Lord,' equivalent to 'Master of the World.' According to Richthofen, the hoang-tu, regarded by him as a formation analogous to the loess of the Rhine and Danube basins, is nothing more than so much dust accumulated during the course of ages by the northern winds. . . . On the plateaux encircled by mountain barriers forming closed basins the yellow earth forms a uniform layer of unknown depth. But wherever the erosive action of running waters has had full play, enormous fissures with vertical walls have been opened in the argillaceous mass. . . . The erosions reveal in some places a thickness of at least 2,000 feet, offering a prodigious quantity of fertilizing soil, constantly washed down, and maintaining the productivity of the plains watered by the Hoang-ho. For this yellow earth is the richest soil in China, being far more fertile even than ordinary alluvium. It requires no manuring, and goes on producing heavy crops for ages. . . . Much ingenuity has been displayed in overcoming the difficulties offered to free communication by the perpendicular walls of the yellow lands. To pass from river basin to river basin advantage has been taken of every narrow fissure, deep cuttings have been made in many places, and fresh routes opened when these have been filled up by the landslips. Some of the most-frequented roads have been excavated to depths of from 40 to 100 feet and upwards, and the labor expended on all these works is at least equal to that lavished on the building of the Great Wall, or the construction of the Grand Canal. . . . The mountains whose lower slopes are covered by the yellow earth also contain some of the richest coal beds in the world. Anthracite and other varieties are found in all the provinces watered by tributaries of the Hoang-ho. . . . The Yang-tze-kiang basin comprises three-eighths of China proper, with a population estimated, before the late civil war, at no less than 200,000,000. Although not originally founded here, the State drew from this region the chief elements of strength, which enabled it to develop into the paramount power of East Asia. Of the two great Chinese rivers, the Yang-tze is by far the largest, and is hence commonly spoken of simply as the Ta-kiang, or 'Great River.' . . . It is certainly one of the very largest in the world. In the length of its course and the extent of its basin it is no doubt surpassed by three others in Asia alone—the Ob, Yenisei, and Lena. But in volume it far exceeds those Siberian streams, and, according to the careful measurements of Blakiston and Guppy, it is surpassed in this respect by three only in the whole world—the Amazons, Congo, and La Plata. . . . The Yang-tze has never caused such widespread ruin as that which has attended the shiftings of the Hoang-ho, nor is any river in the world more useful for navigation. If it does not yet number as many steamers as the Mississippi, or even the Volga, it is none the less crowded with flotillas of junks and river craft of every description, while its floating population is numbered by hundreds of thousands. . . . The Yang-tze has received from

the Mongolians the title of Dalai, or 'Sea,' and in the history of China it has played the same part as the ocean and great marine inlets elsewhere. It has afforded even greater facilities for travel, for the transport of goods, and for the mutual intercourse of the surrounding peoples. At the present day European influences are penetrating into the heart of the empire through the same channel, which for practical purposes may be regarded as a continuation of the seaboard, stretching some 2,400 miles inland. The total length of the navigable waters in its basin is equal to half the circumference of the globe. The head-streams of the Yang-tze are known to rise on the Tibetan plateaux far beyond the limits of China proper."—E. Reclus, *The Earth and its Inhabitants*, v. 2, ch. 5.

The Origin of the People and their early History.—"The origin of the Chinese race is shrouded in some obscurity. The first records we have of them represent them as a band of immigrants settling in the north-eastern provinces of the modern empire of China, and fighting their way amongst the aborigines, much as the Jews of old forced their way into Canaan against the various tribes which they found in possession of the land. It is probable that though they all entered China by the same route, they separated into bands almost on the threshold of the empire. One body, those who have left us the records of their history in the ancient Chinese books, apparently followed the course of the Yellow River, and, turning southward with it from its northernmost bend, settled themselves in the fertile districts of the modern provinces of Shansi and Honan. But as we find also that at about the same period a large settlement was made as far south as Annam, of which there is no mention in the books of the northern Chinese, we must assume that another body struck directly southward through the southern provinces of China to that country. The question then arises, where did these people come from? and the answer which recent research [see *BABYLONIA PRIMITIVE*] gives to this question is, from the south of the Caspian Sea. . . . In all probability, the outbreak in Susiana of, possibly, some political disturbance, in about the 24th or 23rd century B. C., drove the Chinese from the land of their adoption, and that they wandered eastward until they finally settled in China and the countries south of it. . . . It would appear also that the Chinese came into China possessed of the resources of Western Asian culture. They brought with them a knowledge of writing and astronomy, as well as of the arts which primarily minister to the wants and comfort of mankind. The invention of these civilising influences is traditionally attributed to the Emperor Hwang-te, who is said to have reigned from B. C. 2697-2597. But the name of this sovereign leads us to suppose that he never sat on the throne, in China. One of his names, we are told, was Nai, anciently Nak, and in the Chinese paleographical collection he is described by a character composed of a group of phonetics which read Nak-kon-ti. The resemblance between this name and that of Nak-hunte, who, according to the Susian texts, was the chief of the gods, is sufficiently striking, and many of the attributes belonging to him are such as to place him on an equality with the Susian deity. In exact accordance also with the system

of Babylonian chronology he established a cycle of twelve years, and fixed the length of the year at 360 days composed of twelve months, with an intercalary month to balance the surplus time. He further, we are told, built a Ling tai, or observatory, reminding us of the Babylonian Zigguratu, or house of observation, 'from which to watch the movements of the heavenly bodies.' The primitive Chinese, like the Babylonians, recognised five planets besides the sun and moon, and, with one exception, knew them by the same names. . . . The various phases of these planets were carefully watched, and portents were derived from every real and imaginary change in their relative positions and colours. A comparison between the astrological tablets translated by Professor Sayce and the astrological chapter (27th) in the *She ke*, the earliest of the *Dynastic Histories*, shows a remarkable parallelism, not only in the general style of the forecasts, but in particular portents which are so contrary to Chinese prejudices, as a nation, and the train of thought of the people that they would be at once put down as of foreign origin, even if they were not found in the Babylonian records. . . . In the reign of Chwan Hu (2513-2435 B. C.), we find according to the Chinese records, that the year, as among the Chaldeans, began with the third month of the solar year, and a comparison between the ancient names of the months given in the *Urh ya*, the oldest Chinese dictionary, with the Accadian equivalents, shows, in some instances, an exact identity. . . . These parallelisms, together with a host of others which might be produced, all point to the existence of an early relationship between Chinese and Mesopotamian culture; and, armed with the advantages thus possessed, the Chinese entered into the empire over which they were ultimately to overspread themselves. But they came among tribes who, though somewhat inferior to them in general civilisation, were by no means destitute of culture. . . . Among such people, and others of a lower civilisation, such as the Jungs of the west and the Teks, the ancestors of the Tekke Turcomans, in the north, the Chinese succeeded in establishing themselves. The Emperor Yaou (2356-2255 B. C.) divided his kingdom into twelve portions, presided over by as many Pastors, in exact imitation of the duodenary feudal system of Susa with their twelve Pastor Princes. To Yaou succeeded Shun, who carried on the work of his predecessor of consolidating the Chinese power with energy and success. In his reign the first mention is made of religious worship. . . . In Shun's reign occurred the great flood which inundated most of the provinces of the existing empire. The waters, we are told, rose to so great a height, that the people had to betake themselves to the mountains to escape death. The disaster arose, as many similar disasters, though of a less magnitude, have since arisen, in consequence of the Yellow River bursting its bounds, and the 'Great Yu' was appointed to lead the waters back to their channel. With unremitting energy he set about his task, and in nine years succeeded in bringing the river under control. . . . As a reward for the services he had rendered to the empire, he was invested with the principality of Hea, and after having occupied the throne conjointly with Shun for some years, he succeeded that sovereign on his death, in 2208 B. C. With Yu began the dynasty

of Hea, which gave place, in 1766 B. C., to the Shang Dynasty. The last sovereign of the Hea line, Kieh kwei, is said to have been a monster of iniquity, and to have suffered the just punishment for his crimes at the hands of T'ang, the prince of the State of Shang, who took his throne from him. In like manner, 640 years later, Woo Wang, the prince of Chow, overthrew Chow Sin, the last of the Shang Dynasty, and established himself as the chief of the sovereign state of the empire. By empire it must not be supposed that the empire, as it exists at present, is meant. The China of the Chow Dynasty lay between the 33rd and 38th parallels of latitude, and the 106th and 119th of longitude only, and extended over no more than portions of the provinces of Pih chih-li, Shanse, Shense, Honan, Keang-se, and Shan-tung. This territory was re-arranged by Woo Wang into the nine principalities established by Yu. . . . Woo is held up in Chinese history as one of the model monarchs of antiquity. . . . Under the next ruler, K'ang (B. C. 1078-1053), the empire was consolidated, and the feudal princes one and all acknowledged their allegiance to the ruling house of Chow. . . . From all accounts there speedily occurred a marked degeneracy in the characters of the Chow kings. . . . Already a spirit of lawlessness was spreading far and wide among the princes and nobles, and wars and rumours of wars were creating misery and unrest throughout the country. . . . The hand of every man was against his neighbour, and a constant state of internecine war succeeded the peace and prosperity which had existed under the rule of Woo-wang. . . . As time went on and the disorder increased, supernatural signs added their testimony to the impending crisis. The brazen vessels upon which Yu had engraved the nine divisions of the empire were observed to shake and totter as though foreshadowing the approaching change in the political position. Meanwhile Ts'in on the northwest, Ts'oo on the south, and Tsin on the north, having vanquished all the other states, engaged in the final struggle for the mastery over the confederate principalities. The ultimate victory rested with the state of Ts'in, and in 255 B. C., Chaou-seang Wang became the acknowledged ruler over the 'black-haired' people. Only four years were given him to reign supreme, and at the end of that time he was succeeded by his son, Heaou-wan Wang, who died almost immediately on ascending the throne. To him succeeded Chwang-seang Wang, who was followed in 246 B. C. by Che Hwang-te, the first Emperor of China. The abolition of feudalism, which was the first act of Che Hwang-te raised much discontent among those to whom the feudal system had brought power and emoluments, and the countenance which had been given to the system by Confucius and Mencius made it desirable—so thought the emperor—to demolish once for all their testimony in favour of that condition of affairs, which he had decreed should be among the things of the past. With this object he ordered that the whole existing literature, with the exception of books on medicine, agriculture, and divination should be burned. The decree was obeyed as faithfully as was possible in the case of so sweeping an ordinance, and for many years a night of ignorance rested on the country. The construction of one gigantic work—the Great Wall of China—has made

the name of this monarch as famous as the destruction of the books has made it infamous. Finding the Heung-nu Tartars were making dangerous inroads into the empire, he determined with characteristic thoroughness to build a huge barrier which should protect the northern frontier of the empire through all time. In 214 B. C. the work was begun under his personal supervision, and though every endeavor was made to hasten its completion he died (209) leaving it unfinished. His death was the signal for an outbreak among the dispossessed feudal princes, who, however, after some years of disorder, were again reduced to the rank of citizens by a successful leader, who adopted the title of Kaou-te, and named his dynasty that of Han (206). From that day to this, with occasional interregnums, the empire has been ruled on the lines laid down by Che Hwang-te. Dynasty has succeeded dynasty, but the political tradition has remained unchanged, and though Mongols and Manchoos have at different times wrested the throne from its legitimate heirs, they have been engulfed in the homogeneous mass inhabiting the empire, and instead of impressing their seal on the country have become but the reflection of the vanquished. The dynasties from the beginning of the earlier Han, founded, as stated above, by Kaou-te, are as follows:—The earlier Han Dynasty B. C. 206–A. D. 25; the late Han A. D. 25–220; the Wei 220–280; the western Tsin 265–317; the eastern Tsin 317–420; the Sung 420–479; the Ts'e 479–502; the Leang 502–557; the Ch'in 557–589. Simultaneously with these—the northern Wei A. D. 386–534; the western Wei 535–557; the eastern Wei 534–550; the northern Ts'e 550–577; the northern Chow 557–589. The Suy 589–618; the T'ang 618–907; the later Leang 907–923; the later T'ang 923–936; the later Tsin 936–947; the later Han 947–951; the later Chow 951–960; the Sung 960–1127; the southern Sung 1127–1280; the Yuen 1280–1368; the Ming 1368–1644; the Ts'ing 1644. Simultaneously with some of these—the Leaou 907–1125; the western Leaou 1125–1168; the Kin 1115–1280.”—R. K. Douglas, *China*, ch. 1.

The Religions of the People.—Confucianism.—Taoism.—Buddhism.—“The Chinese describe themselves as possessing three religions, or more accurately, three sects, namely Joo keaou, the sect of Scholars; Fuh keaou, the sect of Buddha; and Taou keaou, the sect of Taou. Both as regards age and origin, the sect of Scholars, or, as it is generally called, Confucianism, represents pre-eminently the religion of China. It has its root in the worship of Shang-te, a deity which is associated with the earliest traditions of the Chinese race. Hwang-te (2697 B. C.) erected a temple to his honour, and succeeding emperors worshipped before his shrine. . . . During the troublous times which followed after the reign of the few first sovereigns of the Chow Dynasty, the belief in a personal deity grew indistinct and dim, until, when Confucius [born B. C. 551] began his career, there appeared nothing strange in his atheistic doctrines. He never in any way denied the existence of Shang-te, but he ignored him. His concern was with man as a member of society, and the object of his teaching was to lead him into those paths of rectitude which might best contribute to his own happiness, and to the well-

being of that community of which he formed part. Man, he held, was born good, and was endowed with qualities which, when cultivated and improved by watchfulness and self-restraint, might enable him to acquire godlike wisdom and to become ‘the equal of Heaven.’ He divided mankind into four classes, viz., those who are born with the possession of knowledge; those who learn, and so readily get possession of knowledge; those who are dull and stupid, and yet succeed in learning; and, lastly, those who are dull and stupid, and yet do not learn. To all these, except those of the last class, the path to the climax reached by the ‘Sage’ is open. Man has only to watch, listen to, understand, and obey the moral sense implanted in him by Heaven, and the highest perfection is within his reach. . . . In this system there is no place for a personal God. The impersonal Heaven, according to Confucius, implants a pure nature in every being at his birth, but, having done this, there is no further supernatural interference with the thoughts and deeds of men. It is in the power of each one to perfect his nature, and there is no divine influence to restrain those who take the downward course. Man has his destiny in his own hands, to make or to mar. Neither had Confucius any inducement to offer to encourage men in the practice of virtue, except virtue’s self. He was a matter-of-fact, unimaginative man, who was quite content to occupy himself with the study of his fellow-men, and was disinclined to grope into the future or to peer upwards. No wonder that his system, as he enunciated it, proved a failure. Eagerly he sought in the execution of his official duties to effect the regeneration of the empire, but beyond the circle of his personal disciples he found few followers, and as soon as princes and statesmen had satisfied their curiosity about him they turned their backs on his precepts and would none of his reproofs. Succeeding ages, recognising the loftiness of his aims, eliminated all that was impracticable and unreal in his system, and held fast to that part of it that was true and good. They were content to accept the logic of events, and to throw overboard the ideal ‘sage,’ and to ignore the supposed potency of his influence; but they clung to the doctrines of filial piety, brotherly love, and virtuous living. It was admiration for the emphasis which he laid on these and other virtues which has drawn so many millions of men unto him; which has made his tomb at Keo-foo heen to be the Mecca of Confucianism, and has adorned every city of the empire with temples built in his honour. . . . Concurrently with the lapse of pure Confucianism, and the adoption of those principles which find their earliest expression in the pre-Confucian classics of China, there is observable a return to the worship of Shang-te. The most magnificent temple in the empire is the Temple of Heaven at Peking, where the highest object of Chinese worship is adored with the purest rites. . . . What is popularly known in Europe as Confucianism is, therefore, Confucianism with the distinctive opinions of Confucius omitted. . . . But this worship of Shang-te is confined only to the emperor. The people have no lot or heritage in the sacred acts of worship at the Altar of Heaven. . . . Side by side with the revival of the Joo keaou, under the influence of Confucius, grew up a system of a totally different nature,

and which, when divested of its esoteric doctrines, and reduced by the practically-minded Chinamen to a code of morals, was destined in future ages to become affiliated with the teachings of the Sage. This was Taoism, which was founded by Laou-tsze, who was a contemporary of Confucius. An air of mystery hangs over the history of Laou-tsze. Of his parentage we know nothing, and the historians, in their anxiety to conceal their ignorance of his earlier years, shelter themselves behind the legend that he was born an old man. . . . The primary meaning of Taou is 'The way,' 'The path,' but in Laou-tsze's philosophy it was more than the way, it was the way-goer as well. It was an eternal road; along it all beings and things walked; it was everything and nothing, and the cause and effect of all. All things originated from Taou, conformed to Taou, and to Taou at last returned. . . . 'If, then, we had to express the meaning of Taou, we should describe it as the Absolute; the totality of Being and Things; the phenomenal world and its order; and the ethical nature of the good man, and the principle of his action.' It was absorption into this 'Mother of all things' that Laou-tsze aimed at. And this end was to be attained to by self-emptiness, and by giving free scope to the uncontaminated nature which, like Confucius, he taught was given by Heaven to all men. . . . But these subtleties, like the more abstruse speculations of Confucius, were suited only to the taste of the schools. To the common people they were foolishness, and, before long, the philosophical doctrine of Laou-tsze of the identity of existence and non-existence, assumed in their eyes a warrant for the old Epicurean motto, 'Let us eat and drink, for to-morrow we die.' The pleasures of sense were substituted for the delights of virtue, and the next step was to desire prolongation of the time when those pleasures could be enjoyed. Legend said that Laou-tsze had secured to himself immunity from death by drinking the elixir of immortality, and to enjoy the same privilege became the all-absorbing object of his followers. The demand for elixirs and charms produced a supply, and Taoism quickly degenerated into a system of magic. . . . The teachings of Laou-tsze having familiarised the Chinese mind with philosophical doctrines, which, whatever were their direct source, bore a marked resemblance to the musings of Indian sages, served to prepare the way for the introduction of Buddhism. The exact date at which the Chinese first became acquainted with the doctrines of Buddha was, according to an author quoted in K'ang-he's Imperial Encyclopædia, the thirtieth year of the reign of She Hwang-te, i. e., B. C. 216. The story this writer tells of the difficulties which the first missionaries encountered is curious, and singularly suggestive of the narrative of St. Peter's imprisonment."—R. K. Douglas, *China*, ch. 17.—ALSO IN THE SAME, *Confucianism and Taoism*.—"Buddhism . . . penetrated to China along the fixed route from India to that country, round the north-west corner of the Himalayas and across Eastern Turkestan. Already in the 2nd year B. C., an embassy, perhaps sent by Huvishka [who reigned in Kabul and Kashmir] took Buddhist books to the then Emperor of China, A-ili; and the Emperor Ming-ti, 62 A. D., guided by a dream, is said to have sent to Tartary a

Central India and brought Buddhist books to China. From this time Buddhism rapidly spread there. . . . In the fourth century Buddhism became the state religion."—T. W. Rhys Davids, *Buddhism*, ch. 9.

A. D. 1205-1234.—Conquest by Jingis Khan and his son.—"The conquest of China was commenced by Chinghiz [or Jingis Khan], although it was not completed for several generations. Already in 1205 he had invaded Tangut, a kingdom occupying the extreme north-west of China, and extending beyond Chinese limits in the same direction, held by a dynasty of Tibetan race, which was or had been a vassal to the Kin. This invasion was repeated in succeeding years; and in 1211 his attacks extended to the Empire of the Kin itself. In 1214 he ravaged their provinces to the Yellow River, and in the following year took Chungtu or Peking. In 1219 he turned his arms against Western Asia; . . . but a lieutenant whom he had left behind him in the East continued to prosecute the subjection of Northern China. Chinghiz himself on his return from his western conquests renewed his attack on Tangut, and died on that enterprise, 18th August. Okkodai, the son and successor of Chinghiz, followed up the subjugation of China, extinguished the Kin finally in 1234 and consolidated with his Empire all the provinces north of the Great Kiang. The Southern provinces remained for the present subject to the Chinese dynasty of the Sung, reigning now at Kingssé or Hangcheu. This kingdom was known to the Tartars as Nangkiass, and also by the quasi-Chinese title of Mangi or Manzi, made so famous by Marco Polo and the travellers of the following age."—H. Yule, *Cathay and the Way Thither. Preliminary Essay*, sect. 91-92.—See, also, *MONGOLS: A. D. 1153-1227*.

A. D. 1259-1294.—The Empire of Kublai Khan.—Kublai, or Khubilai Khan, one of the grandsons of Jingis Khan, who reigned as the Great Khan or Supreme lord of the Mongols from 1259 until 1294, "was the sovereign of the largest empire that was ever controlled by one man. China, Corea, Thibet, Tung-King, Cochin China, a great portion of India beyond the Ganges, the Turkish and Siberian realms from the Eastern Sea to the Dnieper, obeyed his commands; and although the chief of the Hordes of Jagatai and Ogatai refused to acknowledge him, the Ilkhans of Persia . . . were his feudatories. . . . The Supreme Khan had immediate authority only in Mongolia and China. . . . The capital of the Khakan, after the accession of Khubilai, was a new city he built close to the ancient metropolis of the Liao and Kin dynasties."—H. H. Howorth, *Hist. of the Mongols*, v. 1, pp. 216-283.—"Khan-Bálig (Mong., 'The Khan's city'), the Cambalu of Marco, Peking . . . was captured by Chinghiz in 1215, and in 1264 Kublai made it his chief residence. In 1267 he built a new city, three 'li' to the north-east of the old one, to which was given the name of Ta-tu or 'Great Court,' called by the Mongols Daïdu, the Taydo of Odoric and Taidu of Polo, who gives a description of its dimensions, the number of its gates, etc., similar to that in the text. The

Chinese accounts give only eleven gates. This city was abandoned as a royal residence on the expulsion of the Mongol dynasty in 1368, but re-occupied in 1421 by the third Ming Emperor, who built the walls as they now exist, reducing their extent and the number of the gates to nine. This is what is commonly called the 'Tartar city' of the present day (called also by the Chinese Lau-Chhing or 'Old Town'), which therefore represents the Taydo of Odoric."—H. Yule, *Cathay and the Way Thither*, c. 1, p. 127, *foot-note*.

A. D. 1294-1882.—**Dissolution of the Empire of Kublai Khan.**—The Ming dynasty and its fall.—The enthronement of the present Manchu Tartar Dynasty, of the Tsings or Ch'ings.—The appearance of the Portuguese and the Jesuit Missionaries.—"The immediate successors of Kublai, brought up in the luxuries of the imperial palace, the most gorgeous at that time in the world, relied upon the prestige with which the glory of the late emperor invested them, and never dreamed that change could touch a dominion so vast and so solid. Some devoted themselves to elegant literature and the improvement of the people; later princes to the mysteries of Buddhism, which became, in some degree, the state religion; and as the cycle went round, the dregs of the dynasty abandoned themselves, as usual, to priests, women, and eunuchs. . . . The distant provinces threw off their subjection; robbers ravaged the land, and pirates the sea; a minority and a famine came at the same moment; and in less than ninety years after its commencement, the fall of the dynasty was only illumined by some few flashes of dying heroism, and every armed Tartar, who could obtain a horse to aid his flight, spurred back to his native deserts. Some of them, of the royal race, turning to the west, took refuge with the Manchows, and in process of time, marrying with the families of the chiefs, intermingled the blood of the two great tribes. The proximate cause of this catastrophe was a Chinese of low birth, who, in the midst of the troubles of the time, found means to raise himself by his genius from a servile station to the leadership of a body of the malcontents, and thence to step into the imperial throne. The new dynasty [the Ming] began their reign with great brilliance. The emperor carried the Tartar war into their own country, and at home made unrelenting war upon the abuses of his palace. He committed the mistake, however, of granting separate principalities to the members of his house, which in the next reign caused a civil war, and the usurpation of the throne by an uncle of the then emperor. The usurper found it necessary to transfer the capital to Peking, as a post of defence against the eastern Tartars, who now made their appearance again on this eventful stage. He was successful, however, in his wars in the desert, and he added Tonquin and Cochin China to the Chinese dominions. After him the fortunes of the dynasty began to wane. The government became weaker, the Tartars stronger, some princes attached themselves to literature, some to Buddhism or Taoism; Cochin China revolted, and was lost to the empire, Japan ravaged the coasts with her priva-

teers; famine came to add to the horrors of misrule."—Leitch Ritchie, *Hist. of the Oriental Nations*, bk. 7, ch. 1 (v. 2).—"From without, the Mings were constantly harassed by the encroachments of the Tartars; from within, the ceaseless intriguing of the eunuchs (resulting in one case in the temporary deposition of an Emperor) was a fertile cause of trouble. Towards the close of the 16th century the Portuguese appeared upon the scene, and from their 'concession' at Macao, some time the residence of Camoens, opened commercial relations between China and the West. They brought the Chinese, among other things, opium, which had previously been imported overland from India. They possibly taught them how to make gunpowder, to the invention of which the Chinese do not seem, upon striking a balance of evidence, to possess an independent claim. About the same time [1580] Rome contributed the first instalment of those wonderful Jesuit fathers, whose names may truly be said to have filled the empire 'with sounds that echo still,' the memory of their scientific labours and the benefits they thus conferred upon China having long survived the wreck and discredit of the faith to which they devoted their lives. And at this distance of time it does not appear to be a wild statement to assert that had the Jesuits, the Franciscans, and the Dominicans, been able to resist quarrelling among themselves, and had they rather united to persuade Papal infallibility to permit the incorporation of ancestor worship with the rites and ceremonies of the Romish church—China would at this moment be a Catholic country, and Buddhism, Taoism, and Confucianism would long since have receded into the past. Of all these Jesuit missionaries, the name of Matteo Ricci [who died in 1610] stands by common consent first upon the long list. . . . The overthrow of the Mings [A. D. 1644] was brought about by a combination of events, of the utmost importance to those who would understand the present position of the Tartars as rulers of China. A sudden rebellion had resulted in the capture of Peking by the insurgents, and in the suicide of the Emperor who was fated to be the last of his line. The Imperial Commander-in-chief, Wu San-kuei, at that time away on the frontiers of Manchuria, engaged in resisting the incursions of the Manchu Tartars, now for a long time in a state of ferment, immediately hurried back to the capital, but was totally defeated by the insurgent leader, and once more made his way, this time as a fugitive and a suppliant, towards the Tartar camp. Here he obtained promises of assistance, chiefly on condition that he would shave his head and grow a tail in accordance with Manchu custom, and again set off with his new auxiliaries towards Peking, being reinforced on the way by a body of Mongol volunteers. As things turned out Wu San-kuei arrived at Peking in advance of these allies, and actually succeeded, with the remnant of his own scattered forces, in routing the troops of the rebel leader before the Tartars and the Mongols came up. He then started in pursuit of the flying foe. Meanwhile the Tartar contingent arrived; and on entering the capital, the young Manchu prince in command was invited by the people of Peking to ascend the vacant throne. So that by the time Wu San-kuei reappeared he found a new dynasty [the Ch'ing or Fung dynasty of the present day] already

established, and his late Manchu ally at the head of affairs. His first intention had doubtless been to continue the Ming line of Emperors; but he seems to have readily fallen in with the arrangement already made, and to have tendered his formal allegiance on the four following conditions:—(1.) That no Chinese woman should be taken into the Imperial seraglio. (2.) That the first place at the great triennial examination for the highest literary degrees should never be given to a Tartar. (3.) That the people should adopt the national costume of the Tartars in their everyday life; but that they should be allowed to bury their corpses in the dress of the late dynasty. (4.) That this condition of costume should not apply to the women of China, who were not to be compelled either to wear the hair in a tail before marriage (as the Tartar girls do) or to abandon the custom of compressing their feet. The great Ming dynasty was now at an end, though not destined wholly to pass away. A large part of it may be said to remain in the literary monuments which were executed during its three centuries of existence. The dress of the period survives upon the modern Chinese stage; and when occasionally the present alien yoke is found to gall, seditious whispers of 'restoration' are not altogether unheard. . . . The age of the Ch'ings is the age in which we live; but it is not so familiar to some persons as it ought to be, that a Tartar, and not a Chinese sovereign, is now seated upon the throne of China. For some time after the accession of the first Manchu Emperor there was considerable friction between the two races, due, among other natural causes, to the enforced adoption of the peculiar coiffure in vogue among the Manchus—i. e., the tail, or plaited queue of hair, which now hangs down every Chinaman's back. This fashion was for a long time vigorously resisted by the inhabitants of southern China, though now regarded by all alike as one of the most sacred characteristics of the 'black-haired people.' . . . The subjugation of the empire by the Manchus was followed by a military occupation of the country, which has survived the original necessity, and is part of the system of government at the present day. Garrisons of Tartar troops were stationed at various important centres of population. . . . Those Tartar garrisons still occupy the same positions; and the descendants of the first battalions, with occasional reinforcements from Peking, live side by side and in perfect harmony with the strictly Chinese populations. These Bannermen, as they are called, may be known by their square, heavy faces, which contrast strongly with the sharper and more astute physiognomies of the Chinese. They speak the dialect of Peking, now recognised as the official language par excellence. They do not use their family or surnames—which belong rather to the clan than to the individual—but in order to conform to the requirements of Chinese life, the personal name is substituted. Their women do not compress their feet, and the female coiffure and dress are wholly Tartar in character. Intermarriage between the two races is not considered desirable, though instances are not unknown. In other respects, it is the old story of 'victa victrix'; the conquering Tartars have been themselves conquered by the people over whom they set themselves to rule. They have adopted the language, written and colloquial, of China. . . . Manchu, the language of

the conquerors, is still kept alive at the Court of Peking. By a State fiction, it is supposed to be the language of the sovereign. . . . Eight emperors of this line have already occupied the throne, and 'become guests on high'; the ninth is yet [in 1882] a boy less than ten years of age. Of these eight, the second in every way fills the largest space in Chinese history. K'ang Hsi (or Kang Hi) reigned for sixty-one years. . . . Under the third Manchu Emperor, Yung Cheng [A. D. 1723-1736], began that violent persecution of the Catholics which has continued almost to the present day. The various sects—Jesuits, Dominicans, Franciscans—had been unable to agree about the Chinese equivalent for God, and the matter had been finally referred to the Pope. Another difficulty had arisen as to the toleration of ancestral worship by Chinese converts professing the Catholic faith. . . . As the Pope refused to permit the embodiment of this ancient custom with the ceremonies of the Catholic church, the new religion ceased to advance, and by-and-by fell into disrepute."—H. A. Giles, *Historic China*, ch. 5-6.

A. D. 1839-1842.—The Opium War with England.—Treaty of Nanking.—Opening of the Five Ports.—"The first Chinese war [of England] was in one sense directly attributable to the altered position of the East India Company after 1833. [See INDIA: A. D. 1823-1833.] Up to that year trade between England and China had been conducted in both countries on principles of strict monopoly. The Chinese trade was secured to the East India Company, and the English trade was confined to a company of merchants specially nominated for the purpose by the Emperor. The change of thought which produced the destruction of monopolies in England did not penetrate to the conservative atmosphere of the Celestial Empire, and, while the trade in one country was thrown open to everyone, trade in the other was still exclusively confined to the merchants nominated by the Chinese Government. These merchants, Hong merchants as they were called, traded separately, but were mutually liable for the dues to the Chinese Government and for their debts to the foreigners. Such conditions neither promoted the growth of trade nor the solvency of the traders; and, out of the thirteen Hong merchants in 1837, three or four were avowedly insolvent. (State Papers, v. 27, p. 1310.) Such were the general conditions on which the trade was conducted. The most important article of trade was opium. The importation of opium into China had, indeed, been illegal since 1796. But the Chinese Government had made no stringent efforts to prohibit the trade, and a Select Committee of the House of Commons had declared that it was inadvisable to abandon an important source of revenue to the East India Company. (State Papers, v. 29, p. 1020.) The opium trade consequently thrived, and grew from 4,100 chests in 1796 to 30,000 chests in 1837, and the Chinese connived at or ignored the growing trade. (Ibid., p. 1019). . . . In 1837 the Chinese Government adopted a fresh policy. It decided on rigorously stopping the trade at which it had

previously tacitly connived. . . . Whether the Chinese Government was really shocked at the growing use of the drug and the consequences of its use, or whether it was alarmed at a drain of silver from China which disturbed what the political arithmeticians of England a hundred years before would have called the balance of trade, it undoubtedly determined to check the traffic by every means at its disposal. With this object it strengthened its force on the coast and sent Lin, a man of great energy, to Canton [March, 1839] with supreme authority. (State Papers, v. 29, p. 934, and Autobiography of Sir H. Taylor, v. 1, appx., p. 343.) Before Lin's arrival cargoes of opium had been seized by the Custom House authorities. On his arrival Lin required both the Hong merchants and the Chinese merchants to deliver up all the opium in their possession in order that it might be destroyed. (State Papers, v. 29, p. 936.) The interests of England in China were at that time entrusted to Charles Elliot. . . . But Elliot occupied a very difficult position in China. The Chinese placed on their communications to him the Chinese word 'Yu,' and wished him to place on his despatches to them the Chinese word 'Pin.' But Yu signifies a command, and Pin a humble address, and a British Plenipotentiary could not receive commands from, or humble himself before, Chinese officials. (State Papers, v. 29, pp. 881, 886, 888.) And hence the communications between him and the Chinese Government were unable to follow a direct course, but were frequently or usually sent through the Hong merchants. Such was the state of things in China when Lin, arriving in Canton, insisted on the surrender and destruction of all the opium there. Elliot was at Macao. He at once decided on returning to the post of difficulty and danger; and, though Canton was blockaded by Chinese forces and its river guarded by Chinese batteries, he made his way up in a boat of H. M. S. 'Larne,' and threw himself among his imprisoned countrymen. After his arrival he took the responsibility of demanding the surrender into his own hands, for the service of his Government, of all the British opium in China, and he surrendered the opium which he thus obtained, amounting to 20,283 chests, to the Chinese authorities, by whom it was destroyed. (Ibid., pp. 945, 967.) The imminent danger to the lives and properties of a large number of British subjects was undoubtedly removed by Elliot's action. Though some difficulty arose in connection with the surrender, Lin undertook gradually to relax the stringency of the measures which he had adopted (ibid., p. 977), and Elliot hoped that his own zealous efforts to carry out the arrangement which he had made would lead to the raising of the blockade. He was, however, soon undeceived. On the 4th of April Lin required him, in conjunction with the merchants, to enter into a bond under which all vessels hereafter engaged in the opium traffic would have been confiscated to the Chinese Government, and all persons connected with the trade would 'suffer death at the hands of the Celestial Court.' (Ibid., p. 989.) This bond Elliot steadily refused to sign (ibid., p. 992); and feeling that 'all sense of security was broken to pieces' (ibid., p. 978), he ordered all British subjects to leave Canton (ibid., p. 1004), he himself withdrew to the Portuguese settlement at Macao

(ibid., p. 1007), and he wrote to Auckland, the Governor-General of India, for armed assistance. (Ibid., p. 1009.) These grave events naturally created profound anxiety. A Select Committee of the House of Commons had formally declined to interfere with the trade. The opium monopoly at that time was worth some £1,000,000 or £1,500,000 a year to British India (ibid., p. 1020); and India, engaged in war with Afghanistan and already involved in a serious deficit, could not afford to part with so large an amount of its revenue (ibid., p. 1020). Nine-tenths of the British merchants in China were engaged in the illegal trade (ibid., p. 1030), while Elliot, in enforcing the surrender of the opium, had given the merchants bonds on the British Government for its value, and the 20,000 chests surrendered were supposed to be worth from 600 to 1,200 dollars a chest (ibid., p. 987), or say from £2,400,000 to £4,800,000. . . . As the summer advanced, moreover, a fresh outrage increased the intensity of the crisis. On the 7th July some British seamen landed near Hong Kong, and engaged in a serious riot. A native was unfortunately killed on the occasion, and though Elliot, at his own risk, gave the relations of the victim a large pecuniary compensation, and placed the men engaged in the riot on their trial, Lin was not satisfied. He moved down to the coast, cut off the supplies of British subjects, and threatened to stop the supplies to Macao if the Portuguese continued to assist the British. (Ibid., pp. 1037-1039.) The British were in consequence forced to leave Macao; and about the same time a small schooner, the 'Black Joke,' was attacked by the Chinese, and a British subject on board of her seriously wounded. Soon afterwards, however, the arrival of a ship of war, the 'Volage,' in Chinese waters enabled Elliot to assume a bolder front. He returned to Macao; he even attempted to procure supplies from the mainland. But, though he succeeded in purchasing food, 'the Mandarin runners approached and obliged the natives to take back their provisions,' and Elliot, exasperated at their conduct, fired on some war junks of the Chinese, which returned the fire. A week afterwards Elliot declared the port and river of Canton to be in a state of blockade. (Ibid., p. 1066.) The commencement of the blockade, however, did not lead to immediate war. On the contrary, the Chinese showed considerable desire to avert hostilities. They insisted, indeed, that some British sailor must be surrendered to them to suffer for the death of the Chinaman who had fallen in the riot of Hong Kong. But they showed so much anxiety to conclude an arrangement on this point that they endeavoured to induce Elliot to declare that a sailor who was accidentally drowned in Chinese waters, and whose body they had found, was the actual murderer. (State Papers, v. 30, p. 27.) And in the meanwhile the trade which Lin had intended to destroy went on at least as actively as ever. Lin's proceedings had, indeed, the effect of stimulating it to an unprecedented degree. The destruction of vast stores of opium led to a rise in the price of opium in China. The rise in price produced the natural consequence of an increased speculation; and, though British shipping was excluded from Chinese waters, and the contents of British vessels had to be transferred to American bottoms for conveyance into Chinese ports,

British trade had never been so large or so advantageous as in the period which succeeded Lin's arbitrary proceedings. Elliot was, of course, unable to prevent war either by the surrender of a British sailor to the Chinese, or by even assuming that a drowned man was the murderer; and war in consequence became daily more probable. In January, 1840, operations actually commenced. Elliot was instructed to make an armed demonstration on the northern coasts of China, to take possession of some island on the coast, and to obtain reparation and indemnity, if possible by a mere display of force, but otherwise to proceed with the squadron and thence send an ultimatum to Peking. In accordance with these orders the Island of Chusan was occupied in July, and the fleet was sent to the mouth of the Peiho with orders to transmit a letter to Peking. But the sea off the Peiho is shallow, the ships could not approach the coasts, and the Chinese naturally refused to yield to an empty demonstration. The expedition was forced to return to Chusan, where it found that the troops whom they had left behind were smitten by disease, that one out of every four men were dead, and that more than one-half of the survivors were invalided. Thus, throughout 1840, the Chinese war was only attended with disaster and distress. Things commenced a little more prosperously in 1841 by the capture of the Chinese position at the mouth of the Canton river. Elliot, after this success, was even able to conclude a preliminary treaty with the Chinese authorities. But this treaty did not prove satisfactory either to the British Government or to the Chinese. The British saw with dismay that the treaty made no mention of the trade in opium which had been the ostensible cause of the war. The Whig Government accordingly decided on superseding Elliot. He was recalled and replaced by Henry Pottinger. Before news of his recall reached him, however, the treaty which had led to his supersession had been disavowed by the Chinese authorities, and Elliot had commenced a fresh attack on the Chinese force which guarded the road to Canton. British sailors and British troops, under the command of Bremer and Gough, won a victory which placed Canton at their mercy. But Elliot, shrinking from exposing a great town to the horrors of an assault, stopped the advance of the troops and admitted the city to a ransom of £1,250,000. (Sir H. Taylor's *Autobiography*, v. 1, appx., pp. 353-363.) His moderation was naturally unacceptable to the troops and not entirely approved by the British Government. It constituted, however, Elliot's last action as agent in China. The subsequent operations were conducted under Pottinger's advice."—S. Walpole, *Hist. of Eng. from 1815*, Note, v. 5, pp. 287-291.—"Sir Henry Pottinger, who arrived as Plenipotentiary on the 10th of August, took the chief direction of the affairs. . . . To the end of 1841 there were various successes achieved by the land and naval forces, which gave the British possession of many large fortified towns, amongst which were Amoy, Ting-hai, Chin-hai, Ning-po, and Shang-hai. The Chinese were nevertheless persevering in their resistance, and in most cases evinced a bravery which showed how mistaken were the views which regarded the subjection of this extraordinary people as an easy task. . . . The British fleet on the 13th of

June [1842] entered the great river Kiang, and on the 6th of July advanced up the river, and cut off its communication with the Grand Canal, by which Nanking, the ancient capital of China, was supplied with grain. The point where the river intersects the canal is the city of Chin-Kiang-foo. . . . On the morning of the 21st the city was stormed by the British, in three brigades. The resistance of the Tartar troops was most desperate. Our troops fought under a burning sun, whose overpowering heat caused some to fall dead. The obstinate defence of the place prevented its being taken till six o'clock in the evening. When the streets were entered, the houses were found almost deserted. They were filled with ghastly corpses, many of the Tartar soldiers having destroyed their families and then committed suicide. The city, from the number of the dead, had become uninhabitable."—C. Knight, *Popular Hist. of Eng.*, v. 8, ch. 25.—"The destruction of life was appalling. . . . Every Manchu preferred resistance, death, suicide, or flight, to surrender. Out of a Manchu population of 4,000, it was estimated that not more than 500 survived, the greater part having perished by their own hands. . . . Within twenty-four hours after the troops landed, the city and suburbs of Chinkiang were a mass of ruin and destruction. . . . The total loss of the English was 37 killed and 131 wounded. . . . Some of the large ships were towed up to Nanking, and the whole fleet reached it August 9th, at which time preparations had been made for the assault. . . . Everything was ready for the assault by daylight of August 15th;" but on the night of the 14th the Chinese made overtures for the negotiation of peace, and the important Treaty of Nanking was soon afterwards concluded. Its terms were as follows: "1. Lasting peace between the two nations. 2. The ports of Canton, Amoy, Fuhchau, Ningpo, and Shanghai [known afterwards as the Treaty Ports] to be opened to British trade and residence, and trade conducted according to a well-understood tariff. 3. 'It being obviously necessary and desirable that British subjects should have some port whereat they may careen and refit their ships when required,' the island of Hongkong to be ceded to her Majesty. 4. Six millions of dollars to be paid as the value of the opium which was delivered up 'as a ransom for the lives of H. B. M. Superintendent and subjects,' in March, 1839. 5. Three millions of dollars to be paid for the debts due to British merchants. 6. Twelve millions to be paid for the expenses incurred in the expedition sent out 'to obtain redress for the violent and unjust proceedings of the Chinese high authorities.' 7. The entire amount of \$21,000,000 to be paid before December 31, 1845. 8. All prisoners of war to be immediately released by the Chinese. 9. The Emperor to grant full and entire amnesty to those of his subjects who had aided the British." Articles 10 to 13 related to the tariff of export and import dues that should be levied at the open ports; to future terms of official correspondence, etc. The Treaty was signed by the Commissioners on the 29th of August, 1842, and the Emperor's ratification was received September 15th.—S. W. Williams, *The Middle Kingdom*, ch. 22-23.

-7.—E. H. Parker, *Chinese Acc't of the Opium War*.

A. D. 1850-1864.—The Taiping Rebellion.—“The phrase ‘Taiping Rebellion’ is wholly of foreign manufacture; at Peking and everywhere among those loyal to the government the insurgents were styled ‘Chang-mao tseh,’ or ‘Long-haired rebels,’ while on their side, by a whimsical resemblance to English slang, the imperialists were dubbed ‘imps.’ When the chiefs assumed to be aiming at independence in 1850, in order to identify their followers with their cause they took the term ‘Ping Chao,’ or ‘Peace Dynasty,’ as the style of their sway, to distinguish it from the ‘Tsing Chao,’ or ‘Pure Dynasty’ of the Manchus. Each of them prefixed the adjective ‘Ta’ (or ‘Tai,’ in Cantonese), ‘Great,’ as is the Chinese custom with regard to dynasties and nations; thus the name Tai-ping became known to foreigners.”—S. W. Williams, *The Middle Kingdom*, ch. 24 (v. 2).—“This remarkable movement, which at one time excited much interest in Western lands, originated with a man named Hung Sew-tseuen [or Hung Siu-tseuen], son of a humble peasant residing in a village near Canton. On the occasion of one of his visits to the provincial city, probably in the year 1833, he appears to have seen a foreign Protestant missionary addressing the populace in the streets, assisted by a native interpreter. Either then or on the following day he received from some tract-distributor a book entitled ‘Good Words for Exhorting the Age,’ which consisted of essays and sermons by Leang A-fah, a well-known convert and evangelist. Taking the volume home with him, he looked it over with some interest, but carelessly laid it aside in his book-case. A few years afterward he attended for the second time the competitive literary examination with high hopes of honor and distinction, having already passed with much credit the lower examination in the district city. His ambitious venture, however, met with severe disappointment, and he returned to his friends sick in mind and body. During this state of mental depression and physical infirmity, which continued for some forty days, he had certain strange visions, in which he received commands from heaven to destroy the idols. These fancied revelations seem to have produced a deep impression on his mind, and led to a certain gravity of demeanor after his recovery and return to his quiet occupation as a student and village schoolmaster. When the English war broke out, and foreigners swept up Canton River with their wonderful fire-ships, . . . it is not surprising that Hung should have had his attention again attracted to the Christian publication which had lain so long neglected in his library. . . . The writings of Leang A-fah contained chapters from the Old and New Testament Scriptures, which he found to correspond in a striking manner with the preternatural sights and voices of that memorable period in his history [during his sickness, six years before]; and this strange coincidence convinced him of their truth, and of his being divinely appointed to restore the world, that is China, to the worship of the true God. Hung Sew-tseuen accepted his mission and began the work of propagating the faith he had espoused. Among his first converts was one Fung Yun-san, who became a most ardent missionary and disinterested preacher. These two leaders of the movement traveled far and near through the country, teaching the

people of all classes and forming a society of God-worshippers. All the converts renounced idolatry and gave up the worship of Confucius. Hung, at this time apparently a sincere and earnest seeker after truth, went to Canton and placed himself under the instructions of the Rev. Mr. Roberts, an American missionary, who for some cause fearing that his novitiate might be inspired by mercenary motives, denied him the rite of baptism. But, without being offended at this cold and suspicious treatment, he went home and taught his converts how to baptize themselves. The God-worshippers rapidly increased in numbers, and were known and feared as zealous iconoclasts. . . . For a year after Hung Sew-tseuen had rejoined the God-worshippers that society retained its exclusively religious nature, but in the autumn of 1850 it was brought into direct collision with the civil magistrates, when the movement assumed a political character of the highest aims.” It was soon a movement of declared rebellion, and allied with a rebel army of bandits and pirates which had taken arms against the government in south-eastern China.—L. N. Wheeler, *The Foreigner in China*, ch. 13.—“The Hakka schoolmaster proclaimed his ‘mission’ in 1850. A vast horde gathered to him. He nominated five ‘Wangs’ or soldier sub-kings from out of his clan, and commenced his northward movement from Wooswen in January, 1851. Through the rich prosperous provinces his desultory march, interspersed with frequent halts, spread destruction and desolation. The peaceful fled shudderingly before this wave of fierce, stalwart ruffianhood, with its tatterdemalian tawdriness, its flaunting banners, its rusty naked weapons. Everywhere it gathered in the local scoundrelism. The pirates came from the coast; the robbers from the interior mountains rallied to an enterprise that promised so well for their trade. In the perturbed state of the Chinese population the horde grew like an avalanche as it rolled along. The Heavenly King [as Hung now styled himself] met with no opposition to speak of, and in 1853 his promenade ended under the shadow of the Porcelain Tower, in the city of Nanking, the second metropolis of the Chinese Empire, where, till the rebellion and his life ended simultaneously, he lived a life of licentiousness, darkened further by the grossest cruelties. The rebellion had lasted nearly ten years when the fates brought it into collision with the armed civilization of the West. The Imperialist forces had made sluggishly some head against it. Nanking had been invested after a fashion for years on end. ‘The prospects of the Tai-pings,’ says Commander Brine, ‘in the early spring of 1860, had become very gloomy.’ The Imperialist generals had hemmed Tai-pingdom within certain limits in the lower valley of the Yantsze, and the movement languished further ‘from its destructive and exhausting nature, which for continued vitality constantly required new districts of country to exhaust and destroy.’ But in 1859 China and the West came into collision. . . . The rebellion had opportunity to recover lost ground. For the sixth time the ‘Faithful King’ relieved Nanking. The Imperialist generals fell back, and then the Tai-pings took the offensive, and as the result of sundry victories, the rebellion regained an active and flourishing condition. . . . Shanghai, one of

the treaty ports, was threatened."—A. Forbes, *Chinese Gordon*, ch. 2.—"Europe . . . has known evil days under the hands of fierce conquerors, plundering and destroying in religion's name; but its annals may be ransacked in vain, without finding any parallel to the miseries endured in those provinces of China over which 'The Heavenly King,' the Tai-ping prophet, extended his fell sway for ten sad years. Hung Sew-tsuen (better known in China by his assumed title, Tien Wang) . . . had read Christian tracts, had learnt from a Christian missionary; and when he announced publicly three years afterwards that part of his mission was to destroy the temples and images, and showed in the jargon of his pretended visions some traces of his New Testament study, the conclusion was instantly seized by the sanguine minds of a section set upon evangelizing the East, that their efforts had produced a true prophet, fit for the work. Wedded to this fancy, they rejected as the inventions of the enemies of missions the tales of Taiping cruelty which soon reached Europe: and long after the details of the impostor's life at Nankin, with its medley of visions, executions, edicts, and harem indulgence, became notorious to the world, prayers were offered for his success by devotees in Great Britain as bigoted to his cause as the bloodiest commander, or 'Wang,' whom he had raised from the ranks of his followers to carry out his 'exterminating decrees.' The Taiping cause was lost in China before it was wholly abandoned by these fanatics in England, and their belief in its excellence so powerfully reacted on our policy, that it might have preserved us from active intervention down to the present time, had not certain Imperialist successes elsewhere, the diminishing means of their wasted possessions, and the rashness of their own chiefs, brought the Taiping arms into direct collision with us. And with the occasion there was happily raised up the man whose prowess was to scatter their blood-cemented empire to pieces far more speedily than it had been built up."—C. C. Chesney, *Essays in Military Biography*, ch. 10.—"The Taiping rebellion was of so barbarous a nature that its suppression had become necessary in the interests of civilization. A force raised at the expense of the Shanghai merchants, and supported by the Chinese government, had been for some years struggling against its progress. This force, known as the 'Ever Victorious Army,' was commanded at first by Ward, an American, and, on his death, by Burgevine, also an American, who was summarily dismissed; for a short time the command was held by Holland, an English marine officer, but he was defeated at Taitsan 22 Feb., 1863. Li Hung Chang, governor-general of the Kiang provinces, then applied to the British commander-in-chief for the services of an English officer, and Gordon [Charles George, subsequently known as 'Chinese Gordon'] was authorised to accept the command. He arrived at Sung-Kiong and entered on his new duties as a mandarin and lieutenant-colonel in the Chinese service on 24 March 1863. His force was composed of some three to four thousand Chinese, officered by 150 Europeans of almost every nationality and often of doubtful character. By the indomitable will of its commander this heterogeneous body was moulded into a little army whose high-sounding title of

'ever-victorious' became a reality, and in less than two years, after 33 engagements, the power of the Taipings was completely broken and the rebellion stamped out. The theatre of operations was the district of Kiangsoo, lying between the Yang-tze-Kiang river in the north and the bay of Hang-chow in the south." Before the summer of 1863 was over, Gordon had raised the rebel siege of Chanzu, and taken from the Taipings the towns of Fushan, Taitsan, Quinsan, Kahpoo, Wokong, Patachiaow, Leeku, Wanti, and Fusaigwan. Finally, in December, the great city of Soo-chow was surrendered to him. Gordon was always in front of all his storming parties, "carrying no other weapon than a little cane. His men called it his 'magic wand,' regarding it as a charm that protected his life and led them on to victory. When Soo-chow fell Gordon had stipulated with the Governor-general Li for the lives of the Wangs (rebel leaders). They were treacherously murdered by Li's orders. Indignant at this perfidy, Gordon refused to serve any longer with Governor Li, and when on 1 Jan. 1864 money and rewards were heaped upon him by the Emperor, declined them all. . . . After some [two] months of inaction it became evident that if Gordon did not again take the field the Taipings would regain the rescued country," and he was prevailed upon to resume his campaign, which, although badly wounded in one of the battles, he brought to an end in the following April (1864), by the capture of Chan-chu-fu. "This victory not only ended the campaign but completely destroyed the rebellion, and the Chinese regular forces were enabled to occupy Nankin in the July following. The large money present offered to Gordon by the emperor was again declined, although he had spent his pay in promoting the efficiency of his force, so that he wrote home: 'I shall leave China as poor as when I entered it.'"—Col. R. H. Veitch, *Charles George Gordon (Dict. of Nat. Biog.)*

A. D. 1856-1860.—War with England and France.—Bombardment and capture of Canton.—The Allies in Pekin.—Their destruction of the Summer Palace.—Terms of peace.—The speech from the throne at the opening of the English Parliament, on February 3, 1857, "stated that acts of violence, insults to the British flag, and infractions of treaty rights, committed by the local authorities at Canton, and a pertinacious refusal of redress, had rendered it necessary for her Majesty's officers in China to have recourse to measures of force to obtain satisfaction. The alleged offences of the Chinese authorities at Canton had for their single victim the lorcha 'Arrow.' The lorcha 'Arrow' was a small boat built on the European model. The word 'Lorcha' is taken from the Portuguese settlement at Macao, at the mouth of the Canton river. It often occurs in treaties with the Chinese authorities. On October 8, 1856, a party of Chinese in charge of an officer boarded the 'Arrow,' in the Canton river. They took off twelve men on a charge of piracy, leaving two men in charge of the lorcha. The 'Arrow' was

declared by its owners to be a British vessel. Our consul at Canton, Mr. Parkes, demanded from Yeh, the Chinese Governor of Canton, the return of the men, basing his demand upon the Treaty of 1843, supplemental to the Treaty of 1842. This treaty did not give the Chinese authorities any right to seize Chinese offenders, or supposed offenders, on board an English vessel. It merely gave them a right to require the surrender of the offenders at the hands of the English. The Chinese Governor, Yeh, contended, however, that the *lorcha* was a Chinese pirate vessel, which had no right whatever to hoist the flag of England. It may be plainly stated at once that the 'Arrow' was not an English vessel, but only a Chinese vessel which had obtained by false pretences the temporary possession of a British flag. Mr. Consul Parkes, however, was fussy, and he demanded the instant restoration of the captured men, and he sent off to our Plenipotentiary at Hong Kong, Sir John Bowring, for authority and assistance in the business. Sir John Bowring . . . ordered the Chinese authorities to surrender all the men taken from the 'Arrow,' and he insisted that an apology should be offered for their arrest, and a formal pledge given that no such act should ever be committed again. If this were not done within forty-eight hours, naval operations were to be begun against the Chinese. The Chinese Governor, Yeh, sent back all the men, and undertook to promise that for the future great care should be taken that no British ships should be visited improperly by Chinese officers. But he could not offer an apology for the particular case of the 'Arrow,' for he still maintained, as was indeed the fact, that the 'Arrow' was a Chinese vessel, and that the English had nothing to do with her. Accordingly Sir John Bowring carried out his threat, and had Canton bombarded by the fleet which Admiral Sir Michael Seymour commanded. From October 23 to November 13 naval and military operations were kept up continuously. Commissioner Yeh retaliated by foolishly offering a reward for the head of every Englishman. This news from China created a considerable sensation in England. On February 24, 1857, Lord Derby brought forward in the House of Lords a motion, comprehensively condemning the whole of the proceedings of the British authorities in China. The debate would have been memorable if only for the powerful speech in which the venerable Lord Lyndhurst supported the motion, and exposed the utter illegality of the course pursued by Sir John Bowring. The House of Lords rejected the motion of Lord Derby by a majority of 146 to 110. On February 26 Mr. Cobden brought forward a similar motion in the House of Commons. . . . Mr. Cobden had probably never dreamed of the amount or the nature of the support his motion was destined to receive. The vote of censure was carried by 263 votes against 247—a majority of 16. Lord Palmerston announced two or three days after that the Government had resolved on a dissolution and an appeal to the country. Lord Palmerston understood his countrymen." In the ensuing elections his victory was complete. "Cobden, Bright, Milner Gibson, W. J. Fox, Layard, and many other leading opponents of the Chinese policy, were left without seats. Lord Palmerston came back to power with renewed and redoubled strength." He "had the satisfaction before he left office [in

1858] of being able to announce the capture of Canton. The operations against China had been virtually suspended . . . when the Indian Mutiny broke out. England had now got the co-operation of France. France had a complaint of long standing against China on account of the murder of some missionaries, for which redress had been asked in vain. There was, therefore, an allied attack made upon Canton [December, 1857], and of course the city was easily captured. Commissioner Yeh himself was taken prisoner, not until he had been sought for and hunted out in most ignominious fashion. He was found at last hidden away in some obscure part of a house. He was known by his enormous fatness. . . . He was put on board an English man-of-war, and afterwards sent to Calcutta, where he died early in the following year. Unless report greatly belied him he had been exceptionally cruel, even for a Chinese official. The English and French Envoys, Lord Elgin and Baron Gros, succeeded in making a treaty with China. By the conditions of the treaty, England and France were to have ministers at the Chinese Court, on certain special occasions at least, and China was to be represented in London and Paris; there was to be toleration of Christianity in China, and a certain freedom of access to Chinese rivers for English and French mercantile vessels, and to the interior of China for English and French subjects. China was to pay the expenses of the war. It was further agreed that the term 'barbarian' was no longer to be applied to Europeans in China. There was great congratulation in England over this treaty, and the prospect it afforded of a lasting peace with China. The peace thus procured lasted in fact exactly a year. . . . The treaty of Tien-tsin, which had been arranged by Lord Elgin and Baron Gros, contained a clause providing for the exchange of the ratifications at Peking within a year from the date of the signature, which took place in June 1858. Lord Elgin returned to England, and his brother, Mr. Frederick Bruce, was appointed in March 1859 Envoy Extraordinary and Minister Plenipotentiary to China. Mr. Bruce was directed to proceed by way of the Peiho to Tien-tsin, and thence to Peking to exchange the ratifications of the treaty. Lord Malmesbury, who was then Foreign Secretary . . . impressed upon Mr. Bruce that he was not to be put off from going to the capital. Instructions were sent out from England at the same time to Admiral Hope, the Naval Commander-in-Chief in China, to provide a sufficient force to accompany Mr. Bruce to the mouth of the Peiho. The Peiho river flows from the highlands on the west into the Gulf of Pecheli, at the north-east corner of the Chinese dominions. The capital of the Empire is about 100 miles inland from the mouth of the Peiho. It does not stand on that river, which flows past it at some distance westward, but it is connected with the river by means of a canal. The town of Tien-tsin stands on the Peiho near its junction with one of the many rivers that flow into it, and about forty miles from the mouth. The entrance to the Peiho was defended by the Taku forts. On June 20, 1859, Mr. Bruce and the French Envoy reached the mouth of the Peiho with Admiral Hope's fleet, some nineteen vessels in all, to escort them. They found the forts defended; some negotiations and inter-communications took place, and a Chinese official from Tien-tsin came

to Mr. Bruce and endeavoured to obtain some delay or compromise. Mr. Bruce became convinced that the condition of things predicted by Lord Malmesbury was coming about, and that the Chinese authorities were only trying to defeat his purpose. He called on Admiral Hope to clear a passage for the vessels. When the Admiral brought up his gunboats the forts opened fire. The Chinese artillerymen showed unexpected skill and precision. Four of the gunboats were almost immediately disabled. All the attacking vessels got aground. Admiral Hope attempted to storm the forts. The attempt was a complete failure. Admiral Hope himself was wounded; so was the commander of the French vessel which had contributed a contingent to the storming party. The attempt to force a passage of the river was given up and the mission to Peking was over for the present. It seems only fair to say that the Chinese at the mouth of the Peiho cannot be accused of perfidy. They had mounted the forts and barricaded the river openly and even ostentatiously. . . . It will be easily imagined that the news created a deep sensation in England. People in general made up their minds at once that the matter could not be allowed to rest there, and that the mission to Peking must be enforced. . . . Before the whole question came to be discussed in Parliament the Conservatives had gone out and the Liberals had come in. The English and French Governments determined that the men who had made the treaty of Tien-tsin — Lord Elgin and Baron Gros — should be sent back to insist on its reinforcement. Sir Hope Grant was appointed to the military command of our land forces, and General Cousin de Montauban, afterwards Count Palikao, commanded the soldiers of France. The Chinese, to do them justice, fought very bravely, but of course they had no chance whatever against such forces as those commanded by the English and French generals. The allies captured the Taku forts [August, 1860], occupied Tien-tsin, and marched on Peking. The Chinese Government endeavoured to negotiate for peace, and to interpose any manner of delay, diplomatic or otherwise, between the allies and their progress to the capital. Lord Elgin consented at last to enter into negotiations at Tungechow, a walled town ten or twelve miles nearer than Peking. Before the negotiations took place, Lord Elgin's secretaries, Mr. Parkes and Mr. Loch, some English officers, Mr. Bowlby, the correspondent of the 'Times,' and some members of the staff of Baron Gros, were treacherously seized by the Chinese while under a flag of truce and dragged off to various prisons. Mr. Parkes and Mr. Loch, with eleven of their companions, were afterwards released, after having been treated with much cruelty and indignity, but thirteen of the prisoners died of the horrible ill-treatment they received. Lord Elgin refused to negotiate until the prisoners had been returned, and the allied armies were actually at one of the great gates of Peking, and had their guns in position to blow the gate in, when the Chinese acceded to their terms. The gate was surrendered, the allies entered the city, and the English and French flags were hoisted side by side on the walls of Peking. It was only after entering the city that Lord Elgin learned of the murder of the captives. He then determined that the Summer Palace should be burnt down as a means of impressing the

mind of the Chinese authorities generally with some sense of the danger of treachery and foul play. Two days were occupied in the destruction of the palace. It covered an area of many miles. Gardens, temples, small lodges, and pagodas, groves, grottoes, lakes, bridges, terraces, artificial hills, diversified the vast space. All the artistic treasures, all the curiosities, archaeological and other, that Chinese wealth and Chinese taste, such as it was, could bring together, had been accumulated in this magnificent pleasure-house. The surrounding scenery was beautiful. The high mountains of Tartary ramparted one side of the enclosure. The buildings were set on fire; the whole place was given over to destruction. A monument was raised with an inscription in Chinese, setting forth that such was the reward of perfidy and cruelty. Very different opinions were held in England as to the destruction of the Imperial palace. To many it seemed an act of unintelligible and unpardonable vandalism. Lord Elgin explained, that if he did not demand the surrender of the actual perpetrators, it was because he knew full well that no difficulty would have been made about giving him a seeming satisfaction. The Chinese Government would have selected for vicarious punishment, in all probability, a crowd of mean and unfortunate wretches who had nothing to do with the murders. . . . It is somewhat singular that so many persons should have been roused to indignation by the destruction of a building who took with perfect composure the unjust invasion of a country. The allied powers now of course had it all their own way. England established her right to have an envoy in Peking, whether the Chinese liked it or not. China had to pay a war indemnity, and a large sum of money as compensation to the families of the murdered prisoners and to those who had suffered injuries, and to make an apology for the attack by the garrison of the Taku forts. Perhaps the most important gain to Europe from the war was the knowledge that Peking was not by any means so large a city as we had all imagined it to be, and that it was on the whole rather a crumbling and tumble-down sort of place."—J. McCarthy, *Short Hist. of our own Time*, ch. 12, 15, 17 (ch. 30 and 42, v. 3, of larger work).

A. D. 1857-1868.—Treaty with the United States.—The Burlingame Embassy and the Burlingame Treaties.—"The government of the United States viewed with anxiety the new breaking out of hostilities between Great Britain, supported by France as an ally, and China, in the year 1856. President Buchanan sent thither the Hon. William B. Reed to watch the course of events, and to act the part of a mediator and peacemaker when opportunity should offer. In this he was sustained by the influence of Russia. Mr. Reed arrived in Hong-Kong, on the fine war steamer *Minnesota*, November 7, 1857. He at once set himself to remove the difficulties between the English and Chinese, and save if possible the future effusion of blood. He endeavored in vain to persuade the proud and obstinate governor Yeh to yield, and save Canton from bombardment. He proceeded to the north,

and made on behalf of his government a treaty of peace with China which was signed June 18. The first article of the treaty contains a significant reference to the posture of the United States in relation to the war then in progress, as well as to any which might thereafter arise. The article says: 'There shall be, as there have always been, peace and friendship between the United States of America and the Ta-Tsing Empire, and between their people respectively. They shall not insult or oppress each other for any trifling cause, so as to produce an estrangement between them; and if any other nation should act unjustly or oppressively, the United States will exert their good offices, on being informed of the case, to bring about an amicable arrangement of the question, thus showing their friendly feelings.' A subsequent article of this treaty is to be interpreted by keeping in view the bitter root of the difficulties between Great Britain and China which led to the previous war of 1839 to '42, and to this war. After stating the ports where Americans shall be permitted to reside and their vessels to trade, it continues in the following language: 'But said vessels shall not carry on a clandestine and fraudulent trade at other ports of China not declared to be legal, or along the coasts thereof; and any vessel under the American flag violating this provision shall, with her cargo, be subject to confiscation to the Chinese government; and any citizen of the United States who shall trade in any contraband article of merchandise shall be subject to be dealt with by the Chinese government, without being entitled to any countenance or protection from that of the United States; and the United States will take measures to prevent their flag from being abused by the subjects of other nations as a cover for the violation of the laws of the empire.' . . . The development of the foreign trade with China during the brief time which has passed [1870] since the last war has been very great. . . . The American government has been represented most of the time by the Hon. Anson Burlingame, who has taken the lead, with remarkable ability and success, in establishing the policy of peaceful co-operation between the chief treaty-powers, in encouraging the Chinese to adopt a more wise and progressive policy in their intercourse with foreign nations and in the introduction of the improvements of the age. . . . Mr. Burlingame, who had been in China six years, determined [in 1867] to resign his post and return to America. The news of it excited much regret among both Chinese and foreign diplomats. The former endeavored in vain to dissuade him from his purpose. Failing to accomplish this, he was invited by Prince Kung to a farewell entertainment, at which were present many of the leading officers of the government. During it they expressed to him their gratitude for his offices to them as an intelligent and disinterested counselor and friend. And they seem to have conceived at this time the thought of putting the relations of the empire with foreign countries upon a more just and equal basis, by sending to them an imperial embassy of which he should be the head. They promptly consulted some of their more reliable friends among the foreign gentlemen at the capital, and in two days after they tendered to Mr. Burlingame, much to his surprise, the appointment of minister plenipotentiary of China to the Western powers. . . . Mr. Burlingame left the

Chinese capital on the 25th of November, 1867. The embassy consisted, besides the principal, of Chih-kang and Sun Chia-ku, a Manchu and a Chinese officer, each wearing the red ball on his cap which indicates an official of a rank next to the highest in the empire; J. McLeary Brown, formerly of the British legation, and M. Deschamps, as secretaries; Teh Ming and Fung I as Chinese attachés, and several other persons in subordinate positions. . . . It went to Shanghai, thence to San Francisco, where it was most cordially welcomed by both the American and Chinese mercantile communities. It reached Washington in May, 1868. The embassy was treated with much distinction at the American capital. No American statesman was so capable and disposed to enter cordially into its objects as the Secretary of State at that time, the Hon. William H. Seward, whose mind had long apprehended the great features of the policy which American and foreign nations should pursue in relation to the Chinese empire. On the 16th of July the Senate of the United States ratified a treaty which he had made in behalf of this country with the representative of the Chinese government. The treaty defines and fixes the principles of the intercourse of Western nations with China, of the importance of which I have already spoken. It secures the territorial integrity of the empire, and concedes to China the rights which the civilized nations of the world accord to each other as to eminent domain over land and waters, and jurisdiction over persons and property therein. It takes the first step toward the appointment of Chinese consuls in our seaports—a measure promotive of both Chinese and American interests. It secures exemption from all disability or persecution on account of religious faith in either country. It recognizes the right of voluntary emigration and makes penal the wrongs of the coolie traffic. It pledges privileges as to travel or residence in either country such as are enjoyed by the most favored nation. It grants to the Chinese permission to attend our schools and colleges, and allows us to freely establish and maintain schools in China. And while it acknowledges the right of the Chinese government to control its own whole interior arrangements, as to railroads, telegraphs and other internal improvements, it suggests the willingness of our government to afford aid toward their construction by designating and authorizing suitable engineers to perform the work, at the expense of the Chinese government. The treaty expressly leaves the question of naturalization in either country an open one. . . . It is not necessary to follow in detail the progress of this first imperial Chinese embassy. In England it was received at first very coldly, and it was some months before proper attention could be secured from the government to its objects. At length, however, on November 20, it was presented to the queen at Windsor Castle. . . . What heart is there that will not join in the cordial wish that the treaties made by the embassy with Great Britain, France, Prussia and other European powers may be the commencement of a new era in the diplomatic and national intercourse of China with those and all other lands of the West!"—W. Speer, *The Oldest and the Newest Empire*, ch. 14.

A. D. 1893.—The future of the Chinese.—A speculation.—"China is generally regarded as a stationary power which can fairly hold its own, though it has lost Annam to France, and the suzerainty of Upper Burmah to England, and the Amoor Valley to Russia, but which is not a serious competitor in the race for empire. There is a certain plausibility in this view. On the other hand, China has recovered Eastern Turkestan from Mahomedan rule and from a Russian protectorate, is dominating the Corea, and has stamped out a dangerous rebellion in Yunnan. No one can doubt that if China were to get for sovereign a man with the organising and aggressive genius of Peter the Great or Frederick the Second, it would be a very formidable neighbour to either British India or Russia. Neither is it easy to suppose that the improvements, now tentatively introduced into China, will not soon be taken up and pushed on a large scale, so that railways will be carried into the heart of Asia, and large armies drilled and furnished with arms of precision on the European model. In any such case the rights which China has reluctantly conceded or still claims over Annam and Tonquin, over Siam, over Upper Burmah, and over Nepal, may become matters of very serious discussion. At present the French settlements arrest the expansion of China in the direction most dangerous to the world. Unfortunately, the climate of Saigon is such as no European cares to settle in, and the war to secure Tonquin was so unpopular that it cost a French premier his tenure of office. . . . Whatever, however, be the fortune of China in this direction, it is scarcely doubtful that she will not only people up to the furthest boundary of her recognised territory, but gradually acquire new dominions. The history of our Straits Settlements will afford a familiar instance how the Chinese are spreading. They already form half the population predominating in Singapore and Perak, and the best observers are agreed that the Malay cannot hold his own against them. They are beginning to settle in Borneo and Sumatra, and they are supplanting the natives in some of the small islands of the Pacific, such as Hawaii. The climate of all these countries suits them, and they commend themselves to governments and em-

ployers by their power of steady industry; and they intermarry freely up to a safe point with the women of the country, getting all the advantages of alliance, yet not sacrificing their nationality. Several causes have retarded their spread hitherto: the regions enumerated have mostly been too insecure for an industrial people to flourish in, until the British or the Dutch established order; the government of China has hitherto discouraged emigration; English administrations have been obliged to be rather wary in their dealings with a people who showed at Sarawak and Penang that they were capable of combining for purposes of massacre; and the Chinese superstition about burial in the sacred soil of the Celestial Empire made the great majority of the emigrants birds of passage. All these causes are disappearing. . . . Europeans cannot flourish under the tropics, and will not work with the hand where an inferior race works. What we have to consider, therefore, is the probability that the natives who are giving way to the Chinese in the Malay Peninsula will be able to make head against them in Borneo or Sumatra. Borneo is nearly six times as big as Java, and if it were peopled like Java would support a population of nearly 100,000,000. . . . In the long run the Chinese, who out-number the Malays as sixteen to one, who are more decidedly industrial, and who organise where they can in a way that precludes competition, are tolerably certain to gain the upper hand. They may not destroy the early settlers, but they will reduce them to the position of the Hill tribes in India, or of the Ainos in Japan. Assume fifty years hence that China has taken its inevitable position as one of the great powers of the world, and that Borneo has a population of 10,000,000, predominantly Chinese, is it easy to suppose in such a case that the larger part of Borneo would still be a dependency of the Netherlands? or that the whole island would not have passed, by arms or diplomacy, into the possession of China? . . . There are those who believe that the Chinaman is likely to supersede the Spaniard and Indian alike in parts of South America."—C. H. Pearson, *National Life and Character*, pp. 45-51.

CHIOS.—The rocky island known anciently as Chios, called Scio in modern times, was one of the places which claimed Homer's birth. It is situated in the Ægean Sea, separated by a strait only five miles wide from the Asiatic coast. The wines of Chios were famous in antiquity and have a good reputation at the present day. The

island was an important member of the Ionian confederation, and afterwards subject to Athens, from which it revolted twice, suffering terrible barbarities in consequence. See ASIA MINOR: THE GREEK COLONIES.

CHITON, The.—"The chiton [of the ancient Greeks] was an oblong piece of cloth arranged round the body so that the arm was put through a hole in the closed side, the two ends of the open side being fastened over the opposite shoulder by means of a button or clasp. On this latter side, therefore, the chiton was completely open, at least as far as the thigh, underneath of which the two ends might be either pinned or stitched together. Round the hips the chiton was fastened with a ribbon or girdle, and the lower part could be shortened as much as required by pulling it through this girdle. . . . Frequently sleeves, either shorter and covering only the upper arm, or continued to the wrist were added to the chiton. . . . The short-sleeved chiton is frequently worn by women and children on monuments. Of the sleeveless chiton, worn by men over both shoulders, it is stated that it was the sign of a free citizen. Slaves and artisans are said to have worn a chiton with one hole for the left arm, the right arm and half the chest remaining quite uncovered. . . . It appears clearly that the whole chiton consists of one piece. Together with the open and half-open kinds of the chiton we also find the closed double chiton flowing down to the feet. It was a piece of cloth considerably longer than the human body, and closed on both sides, inside of which the person putting it on stood as in a cylinder."—E. Guhl and W. Koner, *Life of the Greeks and Romans*, pt. 1, sect. 41.—"The principal, or rather, the sole garment, of the Dorian maidens was the chiton, or himation made of woolen stuff, and without sleeves, but fastened on either shoulder by a large clasp, and gathered on the breast by a kind of brooch. This sleeveless robe, which seldom reached more than half way to the knee, was moreover left open up to a certain point on both sides, so that the skirts or wings, flying open as they walked, entirely exposed their limbs. . . . The married women, however, did not make their appearance in public 'en chemise,' but when going abroad donned a second garment which seems to have resembled pretty closely their husbands' himatia."—J. A. St. John, *The Hellenes*, bk. 3, ch. 6.

CHITTIM. See KITTIM.

CHIVALRY.—"The primitive sense of this well-known word, derived from the French Chevalier, signifies merely cavalry, or a body of soldiers serving on horseback; and has been used in that general acceptance by the best of our poets, ancient and modern, from Milton to Thomas Campbell. But the present article respects the peculiar meaning given to the word in modern Europe, as applied to the order of knighthood, established in almost all her kingdoms during the middle ages, and the laws, rules, and customs, by which it was governed. Those laws and customs have long been antiquated, but their effects may still be traced in European manners; and, excepting only the change which flowed from the introduction of the Christian religion, we know no cause which has produced such general and permanent difference betwixt the ancients and moderns, as that which has arisen out of the institution of chivalry.

. . . From the time that cavalry becomes used in war, the horseman who furnishes and supports a charger arises, in all countries, into a person of superior importance to the mere foot-soldier. . . . In various military nations, therefore, we find that horsemen are distinguished as an order in the state. . . . But, in the middle ages, the distinction ascribed to soldiers serving on horseback assumed a very peculiar and imposing character. They were not merely respected on account of their wealth or military skill, but were bound together by a union of a very peculiar character, which monarchs were ambitious to share with the poorest of their subjects, and governed by laws directed to enhance, into enthusiasm, the military spirit and the sense of personal honour associated with it. The aspirants to this dignity were not permitted to assume the sacred character of knighthood until after a long and severe probation, during which they practised, as acolytes, the virtues necessary to the order of Chivalry. Knighthood was the goal to which the ambition of every noble youth turned; and to support its honours, which (in theory at least) could only be conferred on the gallant, the modest, and the virtuous, it was necessary he should spend a certain time in a subordinate situation, attendant upon some knight of eminence, observing the conduct of his master, as what must in future be the model of his own, and practising the virtues of humility, modesty, and temperance, until called upon to display those of a higher order. . . . In the general and abstract definition of Chivalry, whether as comprising a body of men whose military service was on horseback, and who were invested with peculiar honours and privileges, or with reference to the mode and period in which these distinctions and privileges were conferred, there is nothing either original or exclusively proper to our Gothic ancestors. It was in the singular tenets of Chivalry,—in the exalted, enthusiastic, and almost sanctimonious, ideas connected with its duties,—in the singular balance which its institutions offered against the evils of the rude ages in which it arose, that we are to seek those peculiarities which render it so worthy of our attention. . . . The education of the future knight began at an early period. The care of the mother, after the first years of early youth were passed, was deemed too tender, and the indulgences of the paternal roof too effeminate, for the future aspirant to the honours of chivalry. . . . To counteract these habits of indulgence, the first step to the order of knighthood was the degree of Page. The young and noble stripling, generally about his twelfth year, was transferred from his father's house to that of some baron or gallant knight, sedulously chosen by the anxious parent as that which had the best reputation for good order and discipline. . . . When advancing age and experience in the use of arms had qualified the page for the hardships and dangers of actual war, he was removed, from the lowest to the second gradation of chivalry, and became an Escuyer, Esquire, or Squire. The derivation of this phrase has been much contested. It has been generally supposed to be derived from its becoming the official duty of the esquire to carry the shield (Escu) of the knight his master, until he was about to engage the enemy. Others have fetched the epithet (more remotely certainly) from Scuria, a stable,

the charger of the knight being under the especial care of the squire. Others, again, ascribe the derivation of the word to the right which the squire himself had to carry a shield, and to blazon it with armorial bearings. This, in later times, became almost the exclusive meaning attached to the appellative esquire; and, accordingly, if the phrase now means anything, it means a gentleman having a right to carry arms. There is reason, however, to think this is a secondary meaning of the word, for we do not find the word *Escuyer*, applied as a title of rank, until so late as the Ordinance of Blois, in 1579. . . . In actual war the page was not expected to render much service, but that of the squire was important and indispensable. Upon a march he bore the helmet and shield of the knight and led his horse of battle, a tall heavy animal fit to bear the weight of a man in armour, but which was led in hand in marching, while the knight rode an ambling hackney. The squire was also qualified to perform the part of an armourer, not only lacing his master's helmet and buckling his cuirass, but also closing with a hammer the rivets by which the various pieces were united to each other. . . . In the actual shock of battle, the esquire attended closely on the banner of his master, or on his person if he were only a knight bachelor, kept pace with him during the melee, and was at hand to remount him when his steed was slain, or relieve him when oppressed by numbers. If the knight made prisoners they were the charge of the esquire; if the esquire himself fortune to make one, the ransom belonged to his master. . . . A youth usually ceased to be a page at 14, or a little earlier, and could not regularly receive the honour of knighthood until he was one-and-twenty. . . . Knighthood was, in its origin, an order of a republican, or at least an oligarchic nature; arising . . . from the customs of the free tribes of Germany [see *COMITATUS*], and, in its essence, not requiring the sanction of a monarch. On the contrary, each knight could confer the order of knighthood upon whomsoever preparatory noviciate and probation had fitted to receive it. The highest potentates sought the accolade, or stroke which conferred the honour, at the hands of the worthiest knight whose achievements had dignified the period. . . . Though no positive regulation took place on the subject, ambition on the part of the aspirant, and pride and policy on that of the sovereign princes and nobles of high rank, gradually limited to the latter the power of conferring knighthood. . . . Knights were usually made either on the eve of battle, or when the victory had been obtained; or they were created during the pomp of some solemn warning or grand festival. . . . The spirit of chivalry sunk gradually under a combination of physical and moral causes; the first arising from the change gradually introduced into the art of war, and the last from the equally great alteration produced by time in the habits and modes of thinking in modern Europe. Chivalry began to dawn in the end of the 10th, and beginning of the 11th century. It blazed forth with high vigour during the crusades, which indeed may be considered as exploits of national knight-errantry, or general wars, undertaken on the very same principles which actuated the conduct of individual knights adventurers. But its most brilliant period was during the wars

between France and England, and it was unquestionably in those kingdoms that the habit of constant and honourable opposition, unembittered by rancour or personal hatred, gave the fairest opportunity for the exercise of the virtues required from him whom Chaucer terms 'a very perfect gentle knight.' Froissart frequently makes allusions to the generosity exercised by the French and English to their prisoners, and contrasts it with the dungeons to which captives taken in war were consigned both in Spain and Germany. Yet both these countries, and indeed every kingdom in Europe, partook of the spirit of chivalry in a greater or less degree; and even the Moors of Spain caught the emulation, and had their orders of Knighthood as well as the Christians. But even during this splendid period, various causes were silently operating the future extinction of the flame, which blazed thus wide and brightly. An important discovery, the invention of gunpowder, had taken place, and was beginning to be used in war, even when chivalry was in its highest glory. . . . Another change, of vital importance, arose from the institution of the bands of *gens-d'armes*, or men at arms in France, constituted . . . expressly as a sort of standing army. . . . A more fatal cause had, however, been for some time operating in England, as well as France, for the destruction of the system we are treating of. The wars of York and Lancaster in England, and those of the Huguenots and of the League, were of a nature so bitter and rancorous, as was utterly inconsistent with the courtesy, fair play, and gentleness, proper to chivalry. . . . The civil wars not only operated in debasing the spirit of chivalry, but in exhausting and destroying the particular class of society from which its votaries were drawn."—Sir W. Scott, *Essay on Chivalry*.

CHRISTIANITY.*

"Historical geography has of late years become an integral part of the historical science. Recent investigations have opened up the subject and a solid beginning has been made—but it is only a beginning. It is clearly recognized that the land itself as it appears at different periods is one of those invaluable original documents upon which history is built, and no stone is being left unturned to clear away mysteries and to bring to our aid a realism hitherto unknown to the science. . . . But the special branch of this vast and complicated theme of historical geography which interests us most and which I desire briefly to bring to your attention is that which deals with the Christian Church. . . . Our eyes first rest upon that little group at Jerusalem that made up the Pentecostal Church. Its spread was conditioned by the extent and character of the Roman Empire, by the municipal genius of that empire, its great highways by land and sea; conditioned by the commercial routes and the track of armies outside the bounds of civilization; conditioned by the spread of languages—Aramaic, Greek, and Latin,—and, most important of all, conditioned by the whereabouts of the seven million Jews massed in Syria, Babylonia, and Egypt, and scattered everywhere throughout the Empire and far beyond its boundaries."—H. W. Hulbert, *The Historical Geography of the Christian Church* (*Am. Soc. Church Hist.*, v. 3).—"When we turn from the Jewish 'dispersion' in the East to that in the West, we seem in quite a different atmosphere. Despite their intense nationalism, all unconsciously to themselves, their mental characteristics and tendencies were in the opposite direction from those of their brethren. With those of the East rested the future of Judaism; with them of the West, in a sense, that of the world. The one represented old Israel groping back into the darkness of the past; the other young Israel, stretching forth its hands to where the dawn of a new day was about to break. These Jews of the West are known by the term Hellenists. . . . The translation of the Old Testament into Greek may be regarded as the starting point of Hellenism. It rendered possible the hope that what in its original form

had been confined to the few, might become accessible to the world at large. . . . In the account of the truly representative gathering in Jerusalem on that ever-memorable Feast of Weeks, the division of the 'dispersion' into two grand sections—the Eastern or Trans-Euphratic, and the Western or Hellenist—seems clearly marked. In this arrangement the former would include 'the Parthians, Medes, Elamites, and dwellers in Mesopotamia,' Judea standing, so to speak, in the middle, while 'the Cretes and Arabians' would typically represent the farthest outrunners respectively of the Western and Eastern Diaspora. The former, as we know from the New Testament, commonly bore in Palestine the name of the 'dispersion of the Greeks,' and of 'Hellenists' or 'Grecians.' On the other hand, the Trans-Euphratic Jews, who 'inhabited Babylon and many of the other satrapies,' were included with the Palestinians and the Syrians under the term 'Hebrews,' from the common language which they spoke. But the difference between the 'Grecians' and the 'Hebrews' was far deeper than merely of language, and extended to the whole direction of thought."—A. Edersheim, *The Life and Times of Jesus the Messiah*, v. 1, bk. 1, ch. 2-3, and 1.—"Before Pentecost an assembly of the believers took place, at which the post vacated in the number of the apostles by the suicide of the traitor Judas of Kerioth, was filled up by the election of Matthias by lot. On this occasion the number of the assembled brethren amounted to about 120 men. . . . At the feast of Pentecost . . . a very considerable accession was made to the formerly moderate band of believers in Jerusalem . . .; about 3,000 souls received the word and were joined to the Church by baptism (Acts ii. 41). We must not, however, at once credit the Church in Jerusalem with this increase. For among the listeners to the apostolic discourse there were Israelitish guests and proselytes from near and distant countries (ii. 5, 9-11, 14), whence we may infer that of those newly converted many were not living in Jerusalem itself, but partly in Judea and Galilee, partly in countries beyond Palestine, who therefore returned home after the feast days were

ended. Some of these might, under certain circumstances, form the centre of a small Church in the dispersion, so that gradually Churches may have arisen to which also James may possibly have addressed his Epistle. . . . So abundantly did God bless with success the activity of the early apostles though limited to the nation of Israel and the land of Canaan, and their fidelity within a circumscribed sphere. Hence there existed at the end of the period of which we treat numerous Christian Churches in Jerusalem and the whole country of Judæa (comp. Gal. i. 23, etc.; Acts xi. 1), also on the coast (Acts ix. 32-35, etc.) in Samaria and Galilee, and finally in Syria, Phenicia, and Cyprus, (Acts ix. 2, 10, 25, xi. 19), some of which were directly, some indirectly, founded by the Twelve, and were, in any case, governed and guided by them. In the above named districts outside Palestine, it might not, indeed, have been easy to find a Christian Church consisting exclusively of believing Jews, for as a rule they consisted of believing Jews and individual Gentiles. On the other hand, we shall scarcely be wrong in regarding the Christian Churches within Palestine itself as composed entirely of believing Israelites. But even among these there were many distinctions, e. g., between Palestinians and Hellenists."—G. V. Lechler, *The Apostolic and Post-Apostolic Times*, v. 1, p. 30-35.—"We find the early [Jewish] Christians observing the national feasts and holidays (Acts ii. 1; xviii. 21; xx. 6, 16; Rom. xiv. 5). They take part in the worship of the temple and the synagogue; they pray at the customary hours (chaps. ii. 46; iii. 1; v. 42; x. 9). They observe the fasts, and undergo voluntary abstinence, binding themselves by special vows like all pious Jews (xiii. 2; xvii. 18; xxi. 23). They scrupulously avoid unlawful food, and all legal defilement (x. 14). They have their children circumcised (xv. 5; xvi. 3; Gal. v. 2). . . . This scrupulous piety won for them the esteem and admiration of the people (chap. v. 13)." At first their creed was "comprised in a single dogma: 'Jesus is the Messiah.' . . . Their preaching of the Gospel strictly followed the lines of Messianic tradition (i. 7; ii. 36; iii. 20). . . . But in reality all this formed only the outside of their life and creed. . . . Herein lies the profound significance of the miracle of Pentecost. That day was the birthday of the Church, not because of the marvelous success of Peter's preaching, but because the Christian principle, hitherto existing only objectively and externally in the person of Jesus, passed from that moment into the souls of His disciples. . . . And thus in the very midst of Judaism we see created and unfolded a form of religious life essentially different from it—the Christian life."—A. Sabatier, *The Apostle Paul*, pp. 35-36.—"By the two parables of the Mustard Seed and the Leaven, Christ marked out the two sides or aspects of His truth—its external growth from the least to the greatest, and its internal action on society at large—as setting up a ferment, and making a new lump out of the unknéaded mass of the old humanity. With these two symbols in view we may gauge what the gospel was designed to be and to do. It was to grow into a great outward society—the tree of the Church; but it was also to do a work on secular society as such, corresponding to the action of leaven on flour. The history of Christianity has been the carrying out

of these two distinct and contrasted conceptions; but how imperfectly, and under what drawbacks."—Rev. J. B. Heard, *Alexandrian and Carthaginian Theology Contrasted*, p. 186.—"The organic connection of Jewish Christians with the synagogue, which must, in accordance with the facts before us, be regarded as a rule, is certainly not to be taken as a mere incidental phenomenon, a customary habit or arbitrary accommodation, but as a moral fact resting upon an internal necessity, having its foundation in the love of Jewish Christians to their nation, and in the adhesion of their religious consciousness to the old covenant. To mistake this would be to underestimate the wide bearing of the fact. But lest we should over-estimate its importance, we must at once proceed to another consideration. Within Judaism we must distinguish not only the Rabbinical or Pharisaic tradition of the original canonical revelation, but also within the canon itself we have to distinguish the Levitical element from the prophetic, . . . taking the latter not in a close but a wide sense as the living spiritual development of the theocracy."—G. V. Lechler, *The Apostolic and Post-Apostolic Times*, v. 1, p. 54.—"Moreover the law had claims on a Hebrew of Palestine wholly independent of his religious obligations. To him it was a national institution, as well as a divine covenant. Under the Gospel he might consider his relations to it in this latter character altered, but as embodying the decrees and usages of his country it still demanded his allegiance. To be a good Christian he was not required to be a bad citizen. On these grounds the more enlightened members of the mother-church would justify their continued adhesion to the law. Nor is there any reason to suppose that St. Paul himself took a different view of their obligations."—J. B. Lightfoot, *Dissertations on the Apostolic Age*, p. 67.—"The term 'Jewish-Christianity' is applicable exclusively to those Christians who really retained, entirely or in the smallest part, the national and political forms of Judaism and insisted upon the observance of the Mosaic Law without modification as essential to Christianity, at least to the Christianity of the Jewish-born converts, or who indeed rejected these forms, but acknowledged the prerogative of the Jewish people also in Christianity."—A. Harnack, *Outlines of the History of Dogma*, p. 75.

A. D. 33-100.—The Rise of the Churches. —Jerusalem.—"After the miraculous healing of the cripple and the discourse of the Apostle Peter on that occasion, the historian goes on to say, 'Many of them which heard the word believed, and the number of the men was about 5,000' (iv. 4). It seems as if in consequence of this event, which made no little stir, a larger number joined themselves to the Church. Nor is it probable that this healing took place until a long time after the beginning of the Church. The miracle, with the effect which it had, serves as a resting place at which the result of the previous growth of the Church may be ascertained. And here the number again incidentally mentioned refers without doubt to the Church at Jerusalem."—G. V. Lechler, *The Apostolic and Post-Apostolic Times*, v. 1, p. 32.—The early history of the Churches "falls into three periods which mark three distinct stages in its progress: (1) The Extension of the Church to the Gentiles, (2) The Recognition of the

Liberty; (3) The Emancipation of the Jewish Churches. . . . And soon enough the pressure of events began to be felt. The dispersion was the link which connected the Hebrews of Palestine with the outer world. Led captive by the power of Greek philosophy at Athens and Tarsus and Alexandria, attracted by the fascinations of Oriental mysticism in Asia, swept along with the busy whirl of social life in the city and court of the Cæsars, these outlying members of the chosen race had inhaled a freer spirit and contracted wider interests than their fellow-countrymen at home. By a series of insensible gradations—proselytes of the covenant—proselytes of the gate—superstitious devotees who observed the rites without accepting the faith of the Mosaic dispensation—curious lookers-on who interested themselves in the Jewish ritual as they would in the worship of Isis or of Astarte—the most stubborn zealot of the law was linked to the idolatrous heathen whom he abhorred and who despised him in turn. Thus the train was unconsciously laid, when the spark fell from heaven and fired it. . . . Meanwhile at Jerusalem some years passed away before the barrier of Judaism was assailed. The Apostles still observed the Mosaic ritual; they still confined their preaching to Jews by birth, or Jews by adoption, the proselytes of the covenant. At length a breach was made, and the assailants as might be expected were Hellenists. The first step towards the creation of an organized ministry was also the first step towards the emancipation of the Church. The Jews of Judæa, 'Hebrews of the Hebrews' had ever regarded their Hellenist brethren with suspicion and distrust; and this estrangement reproduced itself in the Christian Church. The interests of the Hellenist widows had been neglected in the daily distribution of alms. Hence 'arose a murmuring of the Hellenists against the Hebrews' (Acts vi. 1), which was met by the appointment of seven persons specially charged with providing for the wants of these neglected poor. If the selection was made, as St. Luke's language seems to imply, not by the Hellenists themselves but by the Church at large (vi. 2), the concession when granted was carried out in a liberal spirit. All the names of the seven are Greek, pointing to a Hellenist rather than a Hebrew extraction, and one is especially described as a proselyte, being doubtless chosen to represent a hitherto small but growing section of the community. By this appointment the Hellenist members obtained a status in the Church; and the effects of this measure soon became visible. Two out of the seven stand prominently forward as the champions of emancipation, Stephen the preacher and martyr of liberty, and Philip the practical worker."—J. B. Lightfoot, *Dissertations on the Apostolic Age*, pp. 50-52. — "The Hellenist Stephen roused deep-stirring movements chiefly in Hellenist circles. . . . The persecution of the Jerusalem community—perhaps specially of its Hellenist part—which followed the stoning of Stephen, became a means of promoting the spread of the Christian faith to . . . Cyprus, at last so important a centre as Antioch, the imperial capital of the East. To the winning of the Jews to faith in Jesus there is already added the reception into the Christian community of the pious Gentile Cornelius, a proselyte of the gate. . . . Though this appears in tradition as an

individual case sanctioned by special Divine guidance, in the meantime Hellenist Christians had already begun to preach the Gospel to born Greeks, also at Antioch in Syria, and successfully (Acts xi. 19-26), Barnabas is sent thither from Jerusalem."—W. Moeller, *History of the Christian Church*, p. 53-54.—"Philip, driven from Jerusalem by the persecution, preached Christ to the Samaritans. . . . The Apostles who had remained at Jerusalem, hearing of the success of Philip's preaching, sent two of their number into this new and fruitful field of labor. . . . Peter and John return to Jerusalem while the Deacon Philip is called, by a new manifestation of the will of God, yet further to extend the field of Christian missions. It is not a Samaritan but a pagan, whom he next instructs in the truth. . . . He was an Ethiopian eunuch, a great dignitary of the court of Meroë, treasurer of the Queen. . . . This man, a pagan by birth, had taken a long journey to worship the true God in the temple of Jerusalem."—E. De Pressensé, *The Early Years of Christianity*, pp. 71-74.—"For the sake of the popular feeling Herod Agrippa laid hands on members of the community, and caused James the brother of John (the sons of Zebedee) to be put to death by the sword, in the year 44, for soon thereafter Herod Agrippa died. Peter also was taken prisoner, but miraculously escaped and provisionally left Jerusalem. From this time on James the brother of the Lord appears ever more and more as really bearing rank as head of the Jerusalem community, while Peter more and more devotes himself to the apostolic mission abroad, and indeed, more accurately, to the mission in Israel."—W. Moeller, *History of the Christian Church*, p. 55.—"The accounts which we have regarding the apostle Peter, represent him as preaching the gospel from the far east to distant parts of the west. . . . According to his own words, he founded churches in Pontus, Galatia, Cappadocia, Asia, and Bithynia, and according to the testimony of ancient historians of the Church in the east also; in Syria, Babylon, Mesopotamia, Chaldaea, Arabia, Phœnicia and Egypt, and in the west, at Rome, in Britain, Ireland, Helvetia and Spain."—J. E. T. Wiltsh, *Hand Book of the Geography and Statistics of The Church*, v. 1, pp. 19-20.—"Three and three only of the personal disciples and immediate followers of our Lord hold any prominent place in the Apostolic records—James, Peter, and John; the first the Lord's brother, the two latter the foremost members of the Twelve. Apart from an incidental reference to the death of James the son of Zebedee, which is dismissed in a single sentence, the rest of the Twelve are mentioned by name for the last time on the day of the Lord's Ascension. Thenceforward they disappear wholly from the canonical writings. And this silence also extends to the traditions of succeeding ages. We read indeed of St. Thomas in India, of St. Andrew in Scythia; but such scanty notices, even if we accept them as trustworthy, show only the more plainly how little the Church could tell of her earliest teachers. Doubtless they laboured zealously and effectively in the spread of the Gospel; but, so far as we know, they have left no impress of their individual mind and character on the Church at large. Occupying the foreground, and indeed covering the whole canvas of early ecclesiastical history,

appear four figures alone, St. Paul, and the three Apostles of the Circumcision."—J. B. Lightfoot, *Dissertations on the Apostolic Age*, p. 46.—"While Peter (as it appears) is occupied with the work of preaching to the Jews outside of Palestine, the community at Jerusalem, and indeed the Palestinian communities in general, stand under the leadership of the brother of the Lord, James, as their recognised head. They remain strictly in the life of the law, and still hold securely to the hope of the conversion of the whole of God's people (which Paul had for the present given up). The mission to the Gentiles is indeed recognised, but the manner of its conduct by Paul and the powerful increase of Pauline communities excite misgivings and dissensions. For in these mixed communities, in the presence of what is often a preponderating Gentile element, it becomes ever clearer in what direction the development is pressing; that, in fact, for the sake of the higher Christian communion the legal customs even of the Jewish Christians in these communities must inevitably be broken down, and general Christian freedom, on principle, from the commands of the law, gain recognition."—Dr. Wilhelm Moeller, *Hist. of the Christian Church*, p. 73.—"The fall of Jerusalem occurred in the Autumn of the year 70 [see JEWS: A. D. 66-70]. And soon the catastrophe came which solved the difficult problem. . . . Jerusalem was razed to the ground, and the Temple-worship ceased, never again to be revived. The Christians foreseeing the calamity had fled before the tempest. . . . Before the crisis came, they had been deprived of the counsel and guidance of the leading apostles. Peter had fallen a martyr at Rome; John had retired to Asia Minor; James, the Lord's brother, was slain not long before the great catastrophe. . . . He was succeeded by his cousin Symeon, the son of Clopas and nephew of Joseph. Under these circumstances the Church was reformed at Pella. Its history in the ages following is a hopeless blank."—J. B. Lightfoot, *Dissertations on the Apostolic Age*, p. 68.—"While Cæsarea succeeded Jerusalem as the political capital of Palestine, Antioch succeeded it as the centre of Christendom."—A. Plummer, *Church of the Early Fathers*, ch. 3.

Antioch.—"Under Macedonian rule the Greek intellect had become the leading intellectual power of the world. The great Greek-speaking towns of the East were alike the strongholds of intellectual power, the battlefields of opinion and systems, and the laboratories of scientific research, where discoveries were made and literary undertakings requiring the combination of forces were carried out. Such was Antioch on the Orontes, the meeting point of Syrian and Greek intellect; such, above all, was Alexandria."—J. J. von Döllinger, *Studies in European History*, p. 165.—"The chief line along which the new religion developed was that which led from Syrian Antioch through the Cilician Gates, across Lycaonia to Ephesus, Corinth, and Rome. One subsidiary line followed the land route by Philadelphia, Troas, Philippi, and the Egnatian Way to Brindisi and Rome; and another went north from the Gates by Tyana and Cæsarea of Cappadocia to Amisos in Pontus, the great harbour of the Black Sea, by which the trade of Central Asia was carried to Rome. The maintenance of close and constant communication between the scattered congregations must be

presupposed, as necessary to explain the growth of the Church and the attitude which the State assumed towards it. Such communication was, on the view advocated in the present work, maintained along the same lines on which the general development of the Empire took place; and politics, education and religion grew side by side."—W. M. Ramsay, *The Church in the Roman Empire*, p. 10.—"The incitement to the wider preaching of the Gospel in the Greek world starts from the Christian community at Antioch. For this purpose Barnabas receives Paul as a companion (Acts xiii., and xiv.) Saul, by birth a Jew of the tribe of Benjamin, born at Tarsus in Cilicia, educated as a Pharisee, and although indeed as a Hellenist, he had command of Greek and had come into contact with Greek culture and Greek life, yet had not actually passed through the discipline of Greek culture, was introduced by Gamaliel to the learned study of the law, and his whole soul was seized with fiery zeal for the Statutes of the fathers. . . . After [his conversion and] his stay in Damascus and in Arabia and the visit to Peter (and James) at Jerusalem, having gone to Syria and Cilicia, he was taken to Antioch by Barnabas."—W. Moeller, *History of the Christian Church*, p. 57.—"The strength and zeal of the Antioch Christian society are shown in the sending forth of Paul and Barnabas, with Mark, a cousin of Barnabas, for their companion for a part of the way, on a preaching tour in the eastern districts of Asia Minor. First they visited Cyprus, where Sergius Paulus, the proconsul, was converted. Thence they sailed to Attalia, on the southern coast of Pamphylia, and near Perga; from Perga they proceeded to Antioch in Pisidia, and from there eastward to Iconium, and as far as Lystra and Derbe in Lycaonia. Retracing their steps, they came back to Attalia, and sailed directly to Antioch. . . . This was the first incursion of Paul into the domain of heathenism."—G. P. Fisher, *History of the Christian Church*, p. 22.—"How then should Paul and Barnabas proceed? To leave Syria they must go first to Seleuceia, the harbour of Antioch, where they would find ships going south to the Syrian coast and Egypt, and west either by way of Cyprus or along the coast of Asia Minor. The western route led toward the Roman world, to which all Paul's subsequent history proves that he considered himself called by the Spirit. The Apostles embarked in a ship for Cyprus, which was very closely connected by commerce and general intercourse with the Syrian coast. After traversing the island from east to west, they must go onward. Ships going westward naturally went across the coast of Pamphylia, and the Apostles, after reaching Paphos, near the west end of Cyprus, sailed in one of these ships, and landed at Attalia in Pamphylia."—W. M. Ramsay, *The Church in the Roman Empire*, p. 60.—"The work starting from Antioch, by which access to the faith is opened to the Gentiles, the formation of (preponderatingly) Gentile Christian communities, now introduces into the original Christian development an important problem, which (about the year 52, probably not later), (Gal. ii.; Acts xv.) leads to discussions and explanations at the so-called Apostolic Council [at Jerusalem]. . . . For Paul, who has risen to perfect independence by the energy of his own peculiar stamp of gospel, there now begin the years of his powerful

activity, in which he not only again visits and extends his former missionary field in Asia Minor, but gains a firm footing in Macedonia (Philippi), Athens, and Achaia (Corinth); then on the so-called third missionary journey he exercises a comprehensive influence during a stay of nearly three years at Ephesus, and finally looks from Achaia towards the metropolis of the world."—W. Moeller, *Hist. of the Christian Church*, pp. 57-59.—"If the heathen whom he (Paul) had won to the faith and received into the Church were to be persuaded to adopt circumcision and the law before they could attain to full participation in the Christian salvation, his preaching had fallen short of his aim, it had been in vain, since it was very doubtful whether the Gentiles gained over to believe in the Messiah would submit to the condition. Paul could only look on those who made such a demand as false brethren, who having no claim to Christian brotherhood had forced themselves into the Church at Antioch in an unauthorized way (Gal. ii. 4), and was persuaded that neither the primitive Church as such, nor its rulers, shared this view. In order therefore to prevent the Gentile Christians from being disturbed on this point, he determined to go to Jerusalem and there to challenge a decision in the matter that should put an end to the strife (ii. 2). The Church at Antioch also recognized this necessity; hence followed the proceedings in Jerusalem [about A. D. 52], whither Paul and Barnabas repaired with other associates (Gal. ii. 1, Acts xv. 2 ff.). . . . It is certain that when Paul laid his (free) gospel before the authorities in Jerusalem, they added nothing to it (Gal. ii. 2-6), i. e., they did not require that the gospel he preached to the Gentiles should, besides the sole condition of faith which he laid down, impose Judaism upon them as a condition of participation in salvation. . . . Paul's stipulations with the authorities in Jerusalem respecting their future work were just as important for him as the recognition of his free gospel (Gal. ii. 7-10). They had for their basis a recognition on the part of the primitive apostles that he was entrusted with the gospel of the uncircumcision, to which they could add nothing (ii. 6), just as Peter (as admittedly the most prominent among the primitive apostles) was entrusted with that of the circumcision."—Bernhard Weiss, *A Manual of Introduction to the New Testament*, v. 1, pp. 172-175, 178.—"It seems clear that the first meetings of the Christians as a community apart—meetings that is of a private rather than a proselytising character—took place, as we see from Acts i. 13-15, in private apartments, the upper rooms or large guest-chambers in the houses of individual members. Such a room was doubtless provided by the liberality of Titus Justus (Acts xviii. 7), such a room again was the upper chamber in which St. Paul preached at Troas (Acts xx. 7, 8); in such assembled the converts saluted by the Apostle as the church which is in the house of Aquila and Prisca, of Nymphas and of Philemon. . . . The primitive Roman house had only one story, but as the cities grew to be more densely populated upper stories came into use, and it was the custom to place in these dining apartments, which were called *cenacula*. Such apartments would answer to the 'upper rooms' . . . associated with the early days of Christianity. . . . The Christian communities contained from an early period members of

wealth and social position, who could accommodate in their houses large gatherings of the faithful; and it is interesting to reflect that while some of the mansions of an ancient city might be witnessing in suppers of a Trimalchio or a Virro, scenes more revolting to modern taste than almost anything presented by the pagan world, others, perhaps in the same street, might be the seat of Christian worship or of the simple Christian meal."—G. B. Brown, *From Schola to Cathedral*, pp. 38-43.

Asia Minor and Greece.—"Our knowledge of the Apostle Paul's life is far from being complete. We have only a brief sketch of journeys and toils that extended over a period of thirty years. Large spaces are passed over in silence. For example, in the catalogue of his sufferings, incidentally given, he refers to the fact that he had been shipwrecked three times, and these disasters were all prior to the shipwreck on the Island of Malta described by Luke. Shortly after the conference at Jerusalem he started on his second missionary tour. He was accompanied by Silas, and was joined by Timothy at Lystra. He revisited his converts in Eastern Asia Minor, founded churches in Galatia and Phrygia, and from Troas, obedient to a heavenly summons, crossed over to Europe. Having planted at Philippi a church that remained remarkably devoted and loyal to him, he followed the great Roman road to Thessalonica, the most important city in Macedonia. Driven from there and from Berea, he proceeded to Athens [see **ATHENS**: A. D. 54 (?)]. In that renowned and cultivated city he discoursed on Mars Hill to auditors eager for new ideas in philosophy and religion, and in private debated with Stoics and Epicureans. At Corinth, which had risen from its ruins and was once more rich and prosperous, he remained for a year and a half. It was there, probably, that he wrote his two Epistles to the Thessalonian Christians. After a short stay at Ephesus he returned to Antioch by way of Cesarea and Jerusalem. It was not long before Paul—a second Alexander, but on a peaceful expedition—began his third great missionary journey. Taking the land route from Antioch, he traversed Asia Minor to Ephesus, a flourishing commercial mart, the capital of the Roman province of Asia. There, with occasional absences, he made his abode for upwards of two years. From Ephesus, probably, he wrote the Epistle to the Galatians. . . . From Ephesus Paul also wrote the First Epistle to the Corinthians. The Second Epistle to the Corinthians he probably wrote from Philippi. . . . Coming down through Greece, he remained there three months. There he composed his Epistle to the Romans. . . . The untiring Apostle now turned his face towards Jerusalem. He desired to be present at the festival of the Pentecost. In order to save time, he sailed past Ephesus, and at Miletus bade a tender farewell to the Ephesian elders. He had fulfilled his pledge given at the conference, and he now carried contributions from the Christians of Macedonia and Achaia for the poor at Jerusalem."—G. P. Fisher, *History of the Christian Church*, pp. 27-28.—"We may safely say that if Saul had been less of a Jew, Paul the Apostle would have been less bold and independent. His work would have been more superficial, and his mind less unfettered. God did not choose a heathen to be the apostle for the

heathen; for he might have been ensnared by the traditions of Judaism, by its priestly hierarchy and the splendours of its worship, as indeed it happened with the church of the second century. On the contrary God chose a Pharisee. But this Pharisee had the most complete experience of the emptiness of external ceremonies and the crushing yoke of the law. There was no fear that he would ever look back, that he would be tempted to set up again what the grace of God had justly overthrown (Gal. ii. 18). Judaism was wholly vanquished in his soul, for it was wholly displaced."—A. Sabatier, *The Apostle Paul*, p. 69.—"Notwithstanding the opposition he met from his countrymen, in spite of all the liberal and the awakened sympathies which he derived from his work, despite the necessity of contending daily and hourly for the freedom of the Gospel among the Gentiles, he never ceased to be a Jew. . . . The most ardent patriot could not enlarge with greater pride on the glories of the chosen race than he does in the Epistle to the Romans. His care for the poor in Judæa is a touching proof of the strength of this national feeling. His attendance at the great annual festivals in Jerusalem is still more significant. 'I must spend the coming feast at Jerusalem.' This language becomes the more striking when we remember that he was then intending to open out a new field of missionary labour in the far West, and was bidding perhaps his last farewell to the Holy City, the joy of the whole earth."—J. B. Lightfoot, *Biblical Essays*, pp. 209-210.—"The Macedonian Churches are honorably distinguished above all others by their fidelity to the Gospel and their affectionate regard for St. Paul himself. While the Church of Corinth disgraced herself by gross moral delinquencies, while the Galatians bartered the liberty of the Gospel for a narrow formalism, while the believers of Ephesus drifted into the wildest speculative errors, no such stain attaches to the brethren of Philippi and Thessalonica. It is to the Macedonian congregations that the Apostle ever turns for solace in the midst of his severest trials and sufferings. Time seems not to have chilled these feelings of mutual affection. The Epistle to the Philippians was written about ten years after the Thessalonian letters. It is the more surprising therefore that they should resemble each other so strongly in tone. In both alike St. Paul drops his official title at the outset, . . . and in both he adopts throughout the same tone of confidence and affection. In this interval of ten years we meet with one notice of the Macedonian Churches. It is conceived in terms of unmeasured praise. The Macedonians had been called upon to contribute to the wants of their poorer brethren in Judæa, who were suffering from famine. They had responded nobly to the call. Deep-sunk in poverty and sorely tried by persecution, they came forward with eager joy and poured out the riches of their liberality, straining their means to the utmost in order to relieve the sufferers. . . . We may imagine that the people still retained something of those simpler habits and that sturdier character, which triumphed over Greeks and Orientals in the days of Philip and Alexander, and thus in the early warfare of the Christian Church the Macedonian phalanx offered a successful resistance to the assaults of an enemy, before which the lax and enervated ranks of Asia and Achaia had yielded

ignominiously."—J. B. Lightfoot, *Biblical Essays*, pp. 249-250.—At Jerusalem, "the Apostle was rescued by a detachment of the Roman garrison from a mob of Jewish malignants, was held in custody for two years at Cæsarea, and was finally enabled to accomplish a long-cherished intention to go to Rome, by being conveyed there as a prisoner, he having made an appeal to Cæsar. After being wrecked on the Mediterranean and cast ashore on the Island of Malta, under the circumstances related in Luke's graphic and accurate description of the voyage, he went on his way in safety to the capital."—G. P. Fisher, *History of the Christian Church*, p. 29.—"Paul's apostolic career, as known to us, lasted . . . twenty-nine or thirty years; and it falls into three distinct periods which are summarized in the following chronological table: First Period—Essentially Missionary: 35 A. D., Conversion of Paul.—Journey to Arabia; 38, First visit to Jerusalem; 38-49, Mission in Syria and Cilicia—Tarsus and Antioch; 50-51, First missionary journey—Cyprus, Pamphylia and Galatia (Acts xiii., xiv.); 52, Conference at Jerusalem (Acts xv.; Gal. ii.); 52-55, Second missionary journey—Epistles to the Thessalonians (from Corinth). Second Period—The Great Conflicts, and the Great Epistles: 54, Return to Antioch—Controversy with Peter (Gal. ii. 12-22); 55-57, Mission to Ephesus and Asia; 56, Epistle to the Galatians; 57 or 58 (Passover), First Epistle to the Corinthians (Ephesus); 57 or 58 (Autumn), Second Epistle to the Corinthians (Macedonia); 58 (Winter), Epistle to the Romans. Third Period—The Captivity: 58 or 59 (Pentecost), Paul is arrested at Jerusalem; 58-60, or 59-61, Captivity at Cæsarea—Epistles to Philemon, Colossians and Ephesians; 60 or 61 (Autumn), Departure for Rome; 61 or 62 (Spring), Arrival of Paul in Rome; 62-63, Epistle to the Philippians; 63 or 64, End of the narrative of the Acts of the Apostles."—A. Sabatier, *The Apostle Paul*, pp. 21-22.—"The impression that we get from Acts is, that the evangelisation of Asia Minor originated from St. Paul; and that from his initiative the new religion gradually spread over the country through the action of many other missionaries (Acts xix. 10). Moreover, missionaries not trained by him, were at work in South Galatia and in Ephesus as early as 54-56 A. D. (Gal. v. 7-10; Acts xviii. 25). . . . The Christian Church in Asia Minor was always opposed to the primitive native character. It was Christianity, and not the Imperial government, which finally destroyed the native languages, and made Greek the universal language of Asia Minor. The new religion was strong in the towns before it had any hold of the country parts. The ruder and the less civilised any district was, the slower was Christianity in permeating it. Christianity in the early centuries was the religion of the more advanced, not of the 'barbarian' peoples; and in fact it seems to be nearly confined within the limits of the Roman world, and practically to take little thought of any people beyond, though in theory, 'Barbarian and Scythian' are included in it. . . . The First Epistle of John was in all probability 'addressed primarily to the circle of Asiatic Churches, of which Ephesus was the centre.'"—W. M. Ramsay, *The Church in the Roman Empire*, pp. 284, 44, 303.—"Unless we are prepared to reject without a hearing all the traditions of Christianity, we cannot refuse to believe that the latest years

of the Apostle St. John were spent in the Roman province of Asia and chiefly in Ephesus its capital. This tradition is singularly full, consistent and well-authenticated. Here he gathered disciples about him, organized churches, appointed bishops and presbyters. A whole chorus of voices unite in bearing testimony to its truth. One who passed his earlier life in these parts and had heard his aged master, a disciple of St. John himself, recount his personal reminiscences of the great Apostle; another, who held this very see of Ephesus, and writing less than a century after the Apostle's death was linked with the past by a chain of relatives all bishops in the Christian Church; a third who also flourished about the close of the century and numbered among his teachers an old man from this very district—are the principal, because the most distinct, witnesses to a fact which is implied in several other notices of earlier or contemporary writers. As to the time at which St. John left his original home and settled in this new abode no direct account is preserved; but a very probable conjecture may be hazarded. The impending fall of the Holy City was the signal for the dispersion of the followers of Christ. About this same time the three other great Apostles, St. Peter, St. Paul and St. James, died a martyr's death; and on St. John, the last surviving of the four great pillars of the Church, devolved the work of developing the theology of the Gospel and completing the organization of the Church. It was not unnatural that at such a crisis he should fix his residence in the centre of a large and growing Christian community, which had been planted by the Apostle of the Gentiles, and watered by the Apostle of the Circumcision. The missionary labours of St. Paul and St. Peter in Asia Minor were confirmed and extended by the prolonged residence of their younger contemporary. At all events such evidence as we possess is favourable to this view of the date of St. John's settlement at Ephesus. Assuming that the Apocalypse is the work of the beloved Apostle, and accepting the view which assigns it to the close of Nero's reign or thereabouts, we find him now for the first time in the immediate neighbourhood of Asia Minor and in direct communication with Ephesus and the neighbouring Churches. St. John however was not alone. Whether drawn thither by the attraction of his presence or acting in pursuance of some common agreement, the few surviving personal disciples of the Lord would seem to have chosen Asia Minor as their permanent abode, or at all events as their recognised headquarters. Here at least we meet with the friend of St. John's youth and perhaps his fellow-townsmen, Andrew of Bethsaida, who with him had first listened to John the Baptist, and with him also had been the earliest to recognise Jesus as the Christ. Here too we encounter Philip the Evangelist with his daughters, and perhaps also Philip of Bethsaida, the Apostle. Here also was settled the Apostle's namesake, John the Presbyter, also a personal disciple of Jesus, and one Aristion, not otherwise known to us, who likewise had heard the Lord. And possibly also other Apostles whose traditions Papias recorded [see J. B. Lightfoot, *Apostolic Fathers*, p. 527], Matthew and Thomas and James, may have had some connexion, temporary or permanent, with this district. Thus surrounded by the surviving disciples of the Lord, by bishops and presbyters of his own ap-

pointment, and by the pupils who gathered about him and looked to him for instruction, St. John was the focus of a large and active society of believers. In this respect he holds a unique position among the great teachers of the new faith. St. Peter and St. Paul converted disciples and organized congregations; St. John alone was the centre of a school. His life prolonged till the close of the century, when the Church was firmly rooted and widely extended, combined with his fixed abode in the centre of an established community to give a certain definiteness to his personal influence which would be wanting to the wider labours of these strictly missionary preachers. Hence the notices of St. John have a more solid basis and claim greater attention than stories relating to the other Apostles.—J. B. Lightfoot, *Biblical Essays*, pp. 51-53.—“In the parable of Jesus, of which we are speaking, it is said that ‘the earth bringeth forth fruit of herself;’—that is, to transfer the Greek term into English, ‘automatically.’ That epithet is chosen which denotes most precisely a self-acting, spontaneous energy, inherent in the seed which Jesus, through his discourses, his acts of mercy and power, and his patience unto death, was sowing in the world. This grand prophetic declaration, uttered in a figure so simple and beautiful, in the ears of a little company of Galileans, was to be wonderfully verified in the coming ages of Christian history.”—G. P. Fisher, *The Nature and Method of Revelation*, p. 47.

Alexandria.—“Plutarch looked upon it as the great mission of Alexander to transplant Grecian culture into distant countries, and to conciliate Greeks and barbarians, and to fuse them into one. He says of him, not without reason, that he was sent of God for this purpose; though the historian did not divine that this end itself was only subsidiary to, and the means of, one still higher—the making, viz., the united peoples of the East and West more accessible to the new creation which was to proceed from Christianity, and by the combination of the elements of Oriental and Hellenic culture the preparing for Christianity a material in which it might develop itself. If we overlook this ulterior end, and do not fix our regards on the higher quickening spirit destined to reanimate, for some new end, that combination which already bore within itself a germ of corruption, we might well doubt whether that union was really a gain to either party; whether, at least, it was not everywhere attended with a correspondent loss. For the fresh vigour which it infused into the old national spirit must have been constantly repressed by the violence which the foreign element did to it. To introduce into that combination a new living principle of development, and, without prejudice to their original essence, to unite peculiarities the most diverse into a whole in which each part should be a complement to the other, required something higher than any element of human culture. The true living communion between the East and the West, which should combine together the two peculiar principles that were equally necessary for a complete exhibition of the type of humanity, could first come only from Christianity. But still, as preparatory thereto, the influence which, for three centuries, went forth from Alexandria, that centre of the intercourse of the world, was of great importance.”—A. Neander, *General Hist. of the*

Christian Religion and Church, v. 1, introd. — "The Greek version [of the Old Testament, the Septuagint], like the Targum of the Palestinians, originated, no doubt, in the first place, in a felt national want on the part of the Hellenists, who as a body were ignorant of Hebrew. Hence we find notices of very early Greek versions of at least parts of the Pentateuch. But this, of course, could not suffice. On the other hand, there existed, as we may suppose, a natural curiosity on the part of the students, specially in Alexandria, which had so large a Jewish population, to know the sacred books on which the religion and history of Israel were founded. Even more than this, we must take into account the literary tastes of the first three Ptolemies (successors in Egypt of Alexander the Great), and the exceptional favour which the Jews for a time enjoyed." — A. Edersheim, *Life and Times of Jesus the Messiah*, v. 1, p. 24.

Rome.—"Alongside of the province of Asia Minor, Rome very early attains to an outstanding importance for young Christianity. If, as we have supposed, the community here which emancipated itself from the synagogue was mainly recruited from among the proselyte circles which had formed themselves around the Jewish synagogue, if Paul during the years of his captivity, and Peter also, influenced this preponderatingly Gentile-Christian community, we must, however, by no means undervalue for the Christian community the continuous influence of Judaism on the Roman world, an influence which was not lessened but rather increased by the destruction of Jerusalem. Many thousands of Jewish captives had arrived here and been sold as slaves—Rome was the greatest Jewish city in the Empire, . . . and in part it was an enlightened and liberal Judaism. Jewish Hellenism had already long availed itself of the weapons of Hellenic philosophy and science . . . in order to exalt the Jewish faith. . . . Under this stimulus there was . . . developed a proselytism which was indeed attracted by that monotheism and the belief in providence and prophecy and the moral ideas allied therewith, and which also had a strong tendency to Jewish customs and festivals—especially the keeping of the Sabbath—but which remained far from binding itself to a strictly legal way of life in circumcision, etc. We may suppose that Roman Christianity not only appeared in the character of such a proselytism, but also retained from it a certain Jewish colouring." — W. Moeller, *History of the Christian Church: A. D. 1-600*, pp. 83-84.—"The last notice of the Roman Church in the Apostolic writings seems to point to two separate communities, a Judaizing Church and a Pauline Church. The arrival of the Gentile Apostle in the metropolis, it would appear, was the signal for the separation of the Judaizers, who had hitherto associated with their Gentile brethren coldly and distrustfully. The presence of St. Paul must have vastly strengthened the numbers and influence of the more liberal and Catholic party; while the Judaizers provoked by rivalry redoubled their efforts, that in making converts to the Gospel they might also gain proselytes to the law." — J. B. Lightfoot, *Dissertations on the Apostolic Age*, p. 94.—"Historical information of any certainty on the latter period of Paul's life is entirely wanting. While the epistles require this unknown period, and a second captivity, as a basis for their apostolic

origin, on the other hand, the hypothesis of a second captivity scarcely finds any real foundations except in the three Pastoral letters." — A. Sabatier, *The Apostle Paul*, p. 269.—"It only remains for us, returning to the close of the apostle's life, to put together the slender indications that we have of its date. He embarked for Rome in the autumn of 60 (or 61) A. D.; but was compelled by shipwreck to winter in the island of Malta, and only reached the Eternal City in the spring of 61 (62). Luke adds that he remained there as a prisoner for two years, living in a private house under the guard of a soldier; then his narrative breaks off abruptly, and we are confronted with the unknown (Acts, xxviii. 30). Paul is supposed to have perished in the frightful persecution caused by the fire of Rome in July 64 A. D. All that is certain is that he died a martyr at Rome under Nero (Sabatier).

[The purpose of what follows in this article is to give a brief history of Christianity in some of its relations to general history by the method of this work, and in the light of some of the best thought of our time. The article as a combination of quotations from many authors attempts a presentation of historic facts, and also a positive and representative view, so far as this may be obtained under the guidance of ideas common to many of the books used. Some of these books have had more influence on the development of the article than others: entire harmony and a full presentation of any author's view would manifestly be impossible. Nevertheless, the reader may discover in the article principles and elements of unity derived from the literature and representing it. Unfortunately, one of the essential parts of such a history must be omitted—biography.]

A. D. 100-312.—The Period of Growth and Struggle.—"Christian belief, Christian morality, the Christian view of the world, of which the church as a religious society and institution is the focus, as fluid spiritual elements permeate humanity as it becomes Christian, far beyond the sphere of the church proper; while conversely the church is not assured against the possibility that spiritual elements originally alien to her may dominate and influence her in their turn. . . . In this living interaction the peculiar life of the church is unfolded, in accordance with its internal principles of formation, into an extraordinarily manifold and complicated object of historical examination. . . . For this purpose it is necessary to elucidate the general historical movement of the church by the relative separation of certain of its aspects, without loosening the bond of unity." — W. Moeller, *Hist. of the Christian Church: A. D. 1-600*, pp. 1-3.—"Such, in fact, has been the history of the Faith: a sad and yet a glorious succession of battles, often hardly fought, and sometimes indecisive, between the new life and the old life. . . . The Christian victory of common life was wrought out in silence and patience and nameless agonies. It was the victory of the soldiers and not of the captains of Christ's army. But in due time another conflict had to be sustained, not by the masses, but by great men, the consequence and the completion of that which had gone before. . . . The discipline of action precedes the effort of reason. . . . So it came to pass that the period during which this second conflict of the Faith was waged was, roughly speaking, from the middle of the second

to the middle of the third century."—B. F. Westcott, *Essays in the History of Religious Thought in the West*, pp. 194–197.—“Philosophy went on its way among the higher classes, but laid absolutely no hold on men at large. The reformation which it wrought in a few elect spirits failed utterly to spread downward to the mass of mankind. The poor were not touched by it; society was not helped by it; its noblest men, and they grew fewer and fewer, generation by generation, bewailed bitterly the universal indifference. The schools dwindled into a mere university system of culture; Christianity developed into a religion for the civilised world. . . . New ideas it had in abundance, but new ideas were not the secret of its power. The essential matter in the Gospel was that it was the history of a Life. It was a tale of fact that all could understand, that all could believe, that all could love. It differed fundamentally from Philosophy, because it appealed not to culture, but to life. . . . It was the spell of substantial facts, living facts, . . . the spell of a loyalty to a personal Lord; and those who have not mastered the difference between a philosopher's speculations about life, and the actual record of a life which, in all that makes life holy and beautiful, transcended the philosopher's most pure and lofty dreams, have not understood yet the rudiments of the reason why the Stoic could not, while Christianity could and did, regenerate society.”—J. B. Brown, *Stoics and Saints*, pp. 85–86.—The “period, from the accession of Marcus Aurelius (A. D. 161) to the accession of Valerian (A. D. 253) was for the Gentile world a period of unrest and exhaustion, of ferment and of indecision. The time of great hopes and creative minds was gone. The most conspicuous men were, with few exceptions, busied with the past. . . . Local beliefs had lost their power. Even old Rome ceased to exercise an unquestioned moral supremacy. Men strove to be cosmopolitan. They strove vaguely after a unity in which the scattered elements of ancient experience should be harmonized. The effect can be seen both in the policy of statesmen and in the speculations of philosophers, in Marcus Aurelius, or Alexander Severus, or Decius, no less than in Plotinus or Porphyry. As a necessary consequence, the teaching of the Bible accessible in Greek began to attract serious attention among the heathen. The assailants of Christianity, even if they affected contempt, shewed that they were deeply moved by its doctrines. The memorable saying of Numenius, ‘What is Plato but Moses speaking in the language of Athens?’ shews at once the feeling after spiritual sympathy which began to be entertained, and the want of spiritual insight in the representatives of Gentile thought.”—B. F. Westcott, *Essays in the History of Religious Thought in the West*, pp. 196–197.—“To our minds it appears that the preparation of philosophy for Christianity was complete. . . . The time was ripe for that movement of which Justin is the earliest [complete] representative.”—G. T. Purves, *The Testimony of Justin Martyr*, p. 135.—“The writing in defense of Christianity is called the apology, and the writer an apologist. . . . There were two classes of apologists, the Greek and the Latin, according to the territory which they occupied, and the language in which they wrote. But there were further differences. The Greeks belonged mostly to the second century, and their writings exhibited a

profound intimacy with the Greek philosophy. Some of them had studied in the Greek schools, and entered the church only in mature life. They endeavored to prove that Christianity was the blossom of all that was valuable in every system. They stood largely on the defensive. The Latins, on the other hand, were aggressive. They lived mostly in the third century. . . . The principal Greek apologists [were] Aristo, Quadratus, Aristides [A. D. 131], Justin [A. D. 160], Melito [A. D. 170], Miltiades, Irenaeus, Athenagoras [A. D. 178], Tatian, Clement of Alexandria [A. D. 200], Hippolytus, and Origen [A. D. 225].”—J. F. Hurst, *Short History of the Christian Church*, p. 33. Lightfoot assigns to about A. D. 150 (?) the author of the Epistle to Diognetus. “Times without number the defenders of Christianity appeal to the great and advantageous change wrought by the Gospel in all who embraced it. . . . ‘We who hated and destroyed one another, and on account of their different manners would not receive into our houses men of a different tribe, now, since the coming of Christ, live familiarly with them. We pray for our enemies, we endeavor to persuade those who hate us unjustly to live conformably to the beautiful precepts of Christ, to the end that they may become partakers with us of the same joyful hope of a reward from God, the Ruler of all.’ This distinction between Christians and heathen, this consciousness of a complete change in character and life, is nowhere more beautifully described than in the noble epistle . . . to Diognetus.”—Gerhard Uhlhorn, *The Conflict of Christianity with Heathenism*, p. 166.—“For Christians are not distinguished from the rest of mankind either in locality or in speech or in customs. For they dwell not somewhere in cities of their own, neither do they use some different language, nor practise an extraordinary kind of life. . . . But while they dwell in cities of Greeks and barbarians as the lot of each is cast, and follow the native customs in dress and food and the other arrangements of life, yet the constitution of their own citizenship, which they set forth, is marvellous, and confessedly contradicts expectation. They dwell in their own countries, but only as sojourners; they bear their share in all things as citizens, and they endure all hardships as strangers. Every foreign country is a fatherland to them, and every fatherland is foreign. . . . Their existence is on earth, but their citizenship is in heaven. They obey the established laws, and they surpass the laws in their own lives. They love all men and they are persecuted by all. . . . War is urged against them as aliens by the Jews, and persecution is carried on against them by the Greeks, and yet those that hate them cannot tell the reason of their hostility.”—J. B. Lightfoot, *Trans. of the Epistle to Diognetus (The Apostolic Fathers, pp. 505–506)*.—“These apologists rise against philosophy also, out of which they themselves had arisen, in the full consciousness of their faith open to all and not only to the cultured few, the certainty of which, based upon revelation, cannot be replaced by uncertain human wisdom, which, moreover, is self-contradictory in its most important representatives. On the other hand, they willingly recognise in the philosophy by means of which they had themselves been educated, certain elements of truth, which they partly derive from the seed-corns of truth, which the divine Logos had scattered among the heathen

also, partly externally from a dependence of Greek wisdom on the much older wisdom of the East, and therefore from the use of the Scriptures of the Old Testament. To the reproach that they had deserted the religion which had been handed down from their ancestors and thereby made sacred, they oppose the right of recognised truth, the right of freedom of conscience; religion becomes the peculiar affair of personal conviction, against which methods of force do not suffice: God is to be obeyed rather than man."—W. Moeller, *Hist. of the Christian Church*: A. D. 1-600, p. 179.—"Such a morality, as Roman greatness was passing away, took possession of the ground. Its beginnings were scarcely felt, scarcely known of, in the vast movement of affairs in the greatest of empires. By and by its presence, strangely austere, strangely gentle, strangely tender, strangely inflexible, began to be noticed. But its work was long only a work of indirect preparation. Those whom it charmed, those whom it opposed, those whom it tamed, knew not what was being done for the generations which were to follow."—R. W. Church, *The Gifts of Civilization*, p. 159.—"The more spiritual and profound historians of the Church recognize it as a manifestation of this divine life flowing into human history. But this is true of the organized church only with important qualifications. The life must manifest itself in an organization; but the organization is neither the only nor the complete exposition of the life. . . . The life which creates the organization penetrates and purifies also the family and the state, renovates individuals, and blooms and fructifies in Christian civilizations; and these are also historical manifestations."—S. Harris, *The Kingdom of Christ on Earth*, p. 87.—"It was the great formative period of the world's new life, and all streams tended to flow together. The influence of Greek thought on Roman law had led, under the circumstances of Roman commercial life, to the development of an ideal "jus gentium," a kind of natural law discovered by the reason. This conception transformed the Roman law and brought it into touch with the new sense of human relations. "It was by means of this higher conception of equity which resulted from the identification of the jus gentium with the jus naturale—that the alliance between law and philosophy was really made efficient."—W. C. Morey, *Outlines from Roman Law*, p. 114.—"There were three agencies whose influence in working simultaneously and successively at this identical task, the developing and importing of the jus gentium, was decisive of the ultimate result. These were the praetorian edict [which reached its climax under the Republic and was completed under Hadrian], Roman scientific jurisprudence [which developed its greatest ability about A. D. 200] and imperial legislation."—R. Sohm, *Institutes of Roman Law*, p. 46.—"The liberal policy of Rome gradually extended the privileges of her citizenship till it included all her subjects; and along with the 'Jus suffragii,' went of course the 'Jus honorum.' Even under Augustus we find a Spaniard consul at Rome; and under Galba an Egyptian is governor of Egypt. It is not long before even the emperor himself is supplied by the provinces. It is easy to comprehend therefore how the provincials forgot the fatherland of their birth for the fatherland of their citizenship. Once win the fran-

chise, and to great capacity was opened a great career. The Roman Empire came to be a homogeneous mass of privileged persons, largely using the same language, aiming at the same type of civilisation, equal among themselves, but all alike conscious of their superiority to the surrounding barbarians."—W. T. Arnold, *The Roman System of Provincial Administration*, p. 37.—"As far as she could, Rome destroyed the individual genius of nations; she seems to have rendered them unqualified for a national existence. When the public life of the Empire ceased, Italy, Gaul, and Spain were thus unable to become nations. Their great historical existence did not commence until after the arrival of the barbarians, and after several centuries of experiments amid violence and calamity. But how does it happen that the countries which Rome did not conquer, or did not long have under her sway, now hold such a prominent place in the world—that they exhibit so much originality and such complete confidence in their future? Is it only because, having existed a shorter time, they are entitled to a longer future? Or, perchance, did Rome leave behind her certain habits of mind, intellectual and moral qualities, which impede and limit activity?"—E. Lavisse, *Political Hist. of Europe*, p. 6.—Patriotism was a considerable part of both the ancient religion and the old morality. The empire weakened the former and deeply injured the latter by conquest of the individual states. It had little to offer in place of these except that anomaly, the worship of the emperor; and a law and justice administered by rulers who, to say the least, grew very rich. "The feeling of pride in Roman citizenship . . . became much weaker as the citizenship was widened. . . . Roman citizenship included an ever growing proportion of the population in every land round the Mediterranean, till at last it embraced the whole Roman world. . . . Christianity also created a religion for the Empire, transcending all distinctions of nationality. . . . The path of development for the Empire lay in accepting the religion offered it to complete its organisation. Down to the time of Hadrian there was a certain progress on the part of the Empire towards a recognition of this necessity."—W. M. Ramsay, *The Church in the Roman Empire*, pp. 373, 191-192.—The relations of the laws of the Empire to Christianity may be briefly stated, but there are differences of opinion which cannot be noted here: "A. D. 30 to 100, Christians treated as a sect of the Jews and sharing in the general toleration accorded to them. A. D. 100 to 250, Christians recognized, . . . and rendered liable to persecution: (1st) For treason and impiety. (2nd) As belonging to illegal associations, but at the same time protected in their capacity of members of Friendly or Burial Societies of a kind allowed by the law. A. D. 250 to 260, Christianity recognized as a formidable power by the State. Commencement of an open struggle between Christianity and the secular authority. . . . The cemeteries of the Christians now for the first time interfered with and become places of hiding and secret assembly. A. D. 260 to 300, Persecutions cease for a time, 40 years Peace for the Church. Time of much prosperity when, as Eusebius writes, 'great multitudes flocked to the religion of Christ.' A. D. 300 to 313, Last decisive struggle under Diocletian."—G. B. Brown, *From Schola to Cathedral*.—"The judges decided

simply in accordance with the laws, and, in the great majority of cases, did so coolly, calmly, without passion, as men who were simply discharging their duty. . . . Not the priests, but the Emperors led the attack. . . . It is true the Christians never rebelled against the State. They cannot be reproached with even the appearance of a revolutionary spirit. Despised, persecuted, abused, they still never revolted, but showed themselves everywhere obedient to the laws, and ready to pay to the Emperors the honor which was their due. Yet in one particular they could not obey, the worship of idols, the strewing of incense to the Cæsar-god. And in this one thing it was made evident that in Christianity lay the germ of a wholly new political and social order. This is the character of the conflict which we are now to review. It is a contest of the spirit of Antiquity against that of Christianity, of the ancient heathen order of the world against the new Christian order. Ten persecutions are commonly enumerated, viz., under Nero, Domitian, Trajan, Hadrian, Marcus Aurelius, Septimius Severus, Maximinus the Thracian, Decius, Valerian, and Diocletian. This traditional enumeration is, however, very superficial, and leaves entirely unrecognized the real course of the struggle. . . . Though times of relative tranquillity occurred, Christianity remained, notwithstanding, a prohibited religion. This being the case, the simple arrangement of the persecutions in a series makes the impression that they were all of the same character, while in fact the persecution under Nero was wholly different from that under Trajan and his successors, and this again varied essentially from those under Decius and Diocletian. The first persecution which was really general and systematically aimed at the suppression of the Church, was the Decian [see *ROME*: A. D. 192-284]. That under Trajan and his successors [see *ROME*: A. D. 96-138, 138-180, and 303-305] consisted merely of more or less frequent processes against individual Christians, in which the established methods of trial were employed, and the existing laws were more or less sharply used against them. Finally, the persecutions under Nero and Domitian [see *ROME*: A. D. 64-68, and 70-96] were mere outbreaks of personal cruelty and tyrannical caprice. . . . Christianity is the growing might; with the energy of youth it looks the future in the face, and there sees victory beckoning onward. And how changed are now its ideas of that triumph! The earlier period had no thought of any victory but that which Christ was to bring at his coming. . . . But in the time of Cyprian the hopes of the Christians are directed towards another victory: they begin to grasp the idea that Christianity will vanquish heathenism from within, and become the dominant religion in the Roman Empire. . . . It is true that the Christians were still greatly in the minority. It is generally assumed that they formed about one-twelfth of the whole population in the East, and in the West about one-fifteenth. Even this is perhaps too high an estimate. But there were two things which gave a great importance to this minority. First, that no single religion of the much divided Heathenism had so many adherents as the Christian. Over against the scattered forces of Heathenism, the Christians formed a close phalanx; the Church was a compact and strongly framed organization. Second, the Christians were massed in the towns,

while the rural population was almost exclusively devoted to Heathenism. There existed in Antioch, for instance, a Christian church of fifty thousand souls."—G. Uhlhorn, *The Conflict of Christianity with Heathenism*, bk. 2.—"The Encyclopedia of Missions" on the authority of the late Prof. R. D. Hitchcock states that there are on record "the names of churches existing at this period [at the close of the persecutions] in 525 cities: cities of Europe 188, of Asia 214, of Africa 123." (See Appendix D.) There were tendencies at work in many of these against that toward general catholic (universal) organization, but in suffering and sympathy the Christian Churches formed a vast body of believers. "Such a vast organisation of a perfectly new kind, with no analogy in previously existing institutions, was naturally slow in development. . . . The critical stage was passed when the destruction of Jerusalem annihilated all possibility of a localised centre for Christianity, and made it clear that the centralisation of the Church could reside only in an idea—viz., a process of intercommunication, union and brotherhood. It would be hardly possible to exaggerate the share which frequent intercourse from a very early stage between the separate congregations had in moulding the development of the Church. Most of the documents in the New Testament are products and monuments of this intercourse; all attest in numberless details the vivid interest which the scattered communities took in one another. From the first the Christian idea was to annihilate the separation due to space, and hold the most distant brother as near as the nearest. A clear consciousness of the importance of this idea first appears in the Pastoral Epistles, and is still stronger in writings of A. D. 80-100. . . . The close relations between different congregations is brought into strong relief by the circumstances disclosed in the letters of Ignatius: the welcome extended everywhere to him; the loving messages sent when he was writing to other churches; the deputations sent from churches off his road to meet him and convoy him; the rapidity with which news of his progress was sent round, so that deputations from Ephesus, Magnesia, and Tralles were ready to visit him in Smyrna; the news from Antioch which reached him in Troas, but which was unknown to him in Smyrna; the directions which he gave to call a council of the church in Smyrna, and send a messenger to congratulate the church in Antioch; the knowledge that his fate is known to and is engaging the efforts of the church in Rome."—W. M. Ramsay, *The Church in the Roman Empire*, pp. 364-366.—"The fellowship . . . thus strongly impressed by apostolic hands on the infant Church, is never wholly lost sight of throughout all the ages, and its permanent expression is found in the synod, whether œcumenic, provincial, or diocesan. This becomes fainter as we reach the age in which a presbyter, told off from the body to a distinct parish, attains gradual isolation from his brethren. But this comes some centuries later. . . . Everywhere, till that decline, the idea is that of a brotherhood or corporate office, a unity of function pervaded by an energy of brotherly love. . . . It is no mere confluence of units before distinct."—H. Hayman, *Diocesan Synods* (*Contemp. Rev.*, Oct., 1882).—"It is the age when the New Testament writings begin to come together to form a generally recognized canon.

The opposition too to the sovereign spirit of Montanist prophecy undoubtedly increased the need for it. . . . After the example of the Gnostics, a beginning is also made with exegetical explanation of New Testament writings; Melito with one on the Revelation of John, a certain Heraclitus with one on the Apostles. . . . Finally, in this same opposition to the heretics, it is sought to secure the agreement of the different churches with one another, and in this relation importance is gained by the idea of a universal (Catholic) Church. So-called catholic Epistles of men of repute in the church to different communities are highly regarded. As illustrations take those of Bishop Dionysius of Corinth to Lacedæmon, Athens, Crete, Paphlagonia, Pontus, Rome (Euseb. 4, 23).—W. Moeller, *Hist. of the Christian Church*, pp. 183-184.—“This period [100-312] may be divided into the Post-Apostolic Age which reaches down to the middle of the second century, and the Age of the Old Catholic Church which ends with the establishment of the Church under Constantine. . . . The point of transition from one Age to the other may be unhesitatingly set down at A. D. 170. The following are the most important data in regard thereto. The death about A. D. 165 of Justin Martyr, who marks the highest point reached in the Post-Apostolic Age and forms also the transition to the Old Catholic Age; and Irenæus, flourishing somewhere about A. D. 170, who was the real inaugurator of this latter age. Besides these we come upon the beginnings of the Trinitarian controversies about the year 170. Finally, the rejection of Montanism from the universal Catholic Church was effected about the year 170 by means of the synodal institution called into existence for that purpose.”—J. H. Kurtz, *Church History*, v. 1, p. 70.—“If every church must so live in the world as to be a part of its collective being, then it must always be construed in and through the place and time in which it lives.”—A. M. Fairbairn, *The Place of Christ in Modern Theology*.—“The Church of the first three centuries was never, except perhaps on the day of Pentecost, in an absolutely ideal condition. But yet during the ages of persecution, the Church as a whole was visibly an unworldly institution. It was a spiritual empire in recognized antagonism with the world-empire.”—F. W. Puller, *The Primitive Saints and The See of Rome*, p. 153.—All the greater forces of the age, political and legal, and commercial, aided those working within the church to create an organic unity. “Speaking with some qualifications, the patristic church was Greek, as the primitive church had been Jewish, and the mediæval church was to be Latin. Its unity, like that of the Greek nation, was federative; each church, like each of the Grecian states, was a little commonwealth. As the Greece which resisted the Persians was one, not by any imperial organization, but by common ideas and a common love of liberty, so the church of the fathers was one, not by any organic connection, but by common thoughts and sympathies, above all by a common loyalty to Christ. Naturally the questions which agitated such a church were those which concern the individual soul rather than society. Its members made much of personal beliefs and speculative opinions; and so long as the old free spirit lasted they allowed one another large freedom of thought, only requiring that common instinct of loyalty to

Christ. Happily for the world, that free spirit did not die out from the East for at least two centuries after Paul had proclaimed the individual relationship of the soul to God. . . . The genius of the Greek expressing itself in thought, of the Latin in ruling power, the Christianity which was to the former a body of truth, became to the latter a system of government.”—G. A. Jackson, *The Fathers of the Third Century*, pp. 154-156.—The Apostolic ideal was set forth, and within a few generations forgotten. The vision was only for a time and then vanished. “The kingdom of Christ, not being a kingdom of this world, is not limited by the restrictions which fetter other societies, political or religious. It is in the fullest sense free, comprehensive, universal. . . . It is most important that we should keep this ideal definitely in view, and I have therefore stated it as broadly as possible. Yet the broad statement, if allowed to stand alone, would suggest a false impression, or at least would convey only a half truth. It must be evident that no society of men could hold together without officers, without rules, without institutions of any kind; and the Church of Christ is not exempt from this universal law. The conception in short is strictly an ideal, which we must ever hold before our eyes. . . . Every member of the human family was potentially a member of the Church, and, as such, a priest of God. . . . It will hardly be denied, I think, by those who have studied the history of modern civilization with attention, that this conception of the Christian Church has been mainly instrumental in the emancipation of the degraded and oppressed, in the removal of artificial barriers between class and class, and in the diffusion of a general philanthropy untrammelled by the fetters of party or race; in short, that to it mainly must be attributed the most important advantages which constitute the superiority of modern societies over ancient. Consciously or unconsciously, the idea of an universal priesthood, of the religious equality of all men, which, though not untaught before, was first embodied in the Church of Christ, has worked and is working untold blessings in political institutions and in social life. But the careful student will also observe that this idea has hitherto been very imperfectly apprehended; that throughout the history of the Church it has been struggling for recognition, at most times discerned in some of its aspects but at all times wholly ignored in others; and that therefore the actual results are a very inadequate measure of its efficacy, if only it could assume due prominence and were allowed free scope in action. . . . It may be a general rule, it may be under ordinary circumstances a practically universal law, that the highest acts of congregational worship shall be performed through the principal officers of the congregation. But an emergency may arise when the spirit and not the letter must decide. The Christian ideal will then . . . interpret our duty. The higher ordinance of the universal priesthood will overrule all special limitations. The layman will assume functions which are otherwise restricted to the ordained minister.”—J. B. Lightfoot, *Dissertations on the Apostolic Age*, pp. 137-140, 237.—“No Church now existing is an exact counterpart of the Apostolic Church. . . . Allusions bear out the idea that the Church at Corinth was as yet almost structureless—little more than

an aggregate of individuals—with no bishop, presbyter or deacon.”—J. W. Cunningham, *The Growth of the Church in its Organization and Institutions*, pp. 73, 18.—“Some time before the middle of the second century heresy began sadly to distract the Christian community; and to avoid imminent danger of schism, it was deemed expedient in a few great towns to arm the chairman of the eldership with additional power. A modified form of prelacy was thus introduced.”—W. D. Killen, *The Old Catholic Church*, p. 51.—Respecting the rise of the Episcopate as a distinct office there is a difference of opinion among scholars,—some holding that it was expressly ordained by the Apostles, others that it arose quite independently of them; a third class think that it was developed gradually out of the eldership, but not without the sanction of one or more of the Apostles. “For the Church is a catholic society, that is, a society belonging to all nations and ages. As a catholic society it lacks the bonds of the life of a city or a nation—local contiguity, common language, common customs. We cannot then very well conceive how its corporate continuity could have been maintained otherwise than through some succession of persons such as, bearing the apostolic commission for ministry, should be in each generation the necessary centres of the Church’s life.”—C. Gore, *The Mission of the Church*, pp. 10, 11.—“Jewish presbyteries existed already in all the principal cities of the dispersion, and Christian presbyteries would early occupy a not less wide area. . . . The name of the presbyter then presents no difficulty. But what must be said of the term bishop? . . . But these notices, besides establishing the general prevalence of episcopacy, also throw considerable light on its origin. They indicate that the relation suggested by the history of the word ‘bishop’ and its transference from the lower to the higher office is the true solution, and that the episcopate was created out of the presbytery. . . . They seem to hint also that, so far as this development was affected at all by national temper and characteristics, it was slower where the prevailing influences were more purely Greek, as at Corinth and Philippi and Rome, and more rapid where an Oriental spirit predominated, as at Jerusalem and Antioch and Ephesus. Above all, they establish this result clearly, that its maturer forms are seen first in those regions where the latest surviving Apostles (more especially St. John) fixed their abode, and at a time when its prevalence cannot be dissociated from their influence or their sanction.”—J. B. Lightfoot, *Dissertations on the Apostolic Age*, pp. 151, 190, 191.—“Since then in the constitution of the church two elements met together—the aristocratic and the monarchical—it could not fail to be the case that a conflict would ensue between them. . . . These struggles between the presbyterial and episcopal systems belong among the most important phenomena connected with the process of the development of church life in the third century. Many presbyters made a capricious use of their power, hurtful to good discipline and order in the communities.”—A. Neander, *General History of the Christian Religion and Church*, v. 1, sect. 2.—“As a rule Christianity would get a footing first in the metropolis of its region. The lesser cities would be evangelized by missions sent from thence; and so the suffragan sees would look on themselves as daughters of the metropolitan see.

The metropolitan bishop is the natural center of unity for the bishops of the province. . . . The bishops of the metropolitan sees acquired certain rights which were delegated to them by their brother bishops. Moreover, among the most important churches a certain order of precedence grew up which corresponded with the civil dignity of the cities in which those churches existed; and finally the churches which were founded by the apostles were treated with peculiar reverence.”—F. W. Puller, *The Primitive Saints and the See of Rome*, pp. 11 and 18.—“The triumph of the episcopal system undoubtedly promoted unity, order, and tranquillity. But, on the other hand, it was unfavourable to the free development of the life of the church; and while the latter promoted the formation of a priesthood foreign to the essence of that development of the kingdom of God which the New Testament sets forth, on the other hand a revolution of sentiment which had already been prepared—an altered view of the idea of the priesthood—had no small influence on the development of the episcopal system. Thus does this change of the original constitution of the Christian communities stand intimately connected with another and still more radical change,—the formation of a sacerdotal caste in the Christian church. . . . Out of the husk of Judaism Christianity had evolved itself to freedom and independence,—had stripped off the forms in which it first sprang up, and within which the new spirit lay at first concealed, until by its own inherent power it broke through them. This development belonged more particularly to the Pauline position, from which proceeded the form of the church in the Gentile world. In the struggle with the Jewish elements which opposed the free development of Christianity, this principle had triumphantly made its way. In the churches of pagan Christians the new creation stood forth completely unfolded; but the Jewish principle, which had been vanquished, pressed in once more from another quarter. Humanity was as yet incapable of maintaining itself at the lofty position of pure spiritual religion. The Jewish position was better adapted to the mass, which needed first to be trained before it could apprehend Christianity in its purity,—needed to be disabused from paganism. Out of Christianity, now become independent, a principle once more sprang forth akin to the principles of the Old Testament,—a new outward shaping of the kingdom of God, a new discipline of the law which one day was to serve for the training of rude nations, a new tutorship for the spirit of humanity, until it should arrive at the maturity of the perfect manhood in Christ. This investiture of the Christian spirit in a form nearly akin to the position arrived at in the Old Testament, could not fail, after the fruitful principle had once made its appearance, to unfold itself more and more, and to bring to light one after another all the consequences which it involved; but there also began with it a reaction of the Christian consciousness as it yearned after freedom, which was continually bursting forth anew in an endless variety of appearances, until it attained its triumph at the Reformation.”—A. Neander, *General History of the Christian Religion and Church*, v. 1, sect. 2, B.—“Though the forms of [pagan] religion had broken away, the spirit of religion was still quick; it had even developed: the sense of sin, an almost new

phenomenon, began to invade Society and Philosophy; and along with this, an almost importunate craving after a revelation. The changed tone of philosophy, the spread of mysticism, the rapid growth of mystery-worship, the revived Platonism, are all articulate expressions of this need. The old Philosophy begins not only to preach but to pray: the new strives to catch the revealed voice of God in the oracles of less unfaithful days. . . . In the teeth of an organised and concentrated despotism a new society had grown up, self-supporting, self-regulated, self-governed, a State within the State. Calm and assured amid a world that hid its fears only in blind excitement, free amid the servile, sanguine amid the despairing, Christians lived with an object. United in loyal fellowship by sacred pledges more binding than the sacramentum of the soldier, welded together by a stringent discipline, led by trained and tried commanders, the Church had succeeded in attaining unity. It had proved itself able to command self-devotion even to the death. It had not feared to assimilate the choicest fruits of the choicest intellects of East and West. . . . Yet the centripetal forces were stronger; Tertullian had died an heresiarch, and Origen but narrowly and somewhat of grace escaped a like fate. If rent with schisms and threatened with disintegration, the Church was still an undivided whole."—G. H. Rendall, *The Emperor Julian, Paganism and Christianity*, pp. 21-22.—"The designation of the Universal Christian Church as Catholic dates from the time of Irenæus. . . . At the beginning of this age, the heretical as well as the non-heretical Ebionism may be regarded as virtually suppressed, although some scanty remnants of it might yet be found. The most brilliant period of Gnosticism, too, . . . was already passed. But in Manichæism there appeared, during the second half of the third century, a new peril of a no less threatening kind inspired by Parseeism and Buddhism. . . . With Marcus Aurelius, Paganism outside of Christianity as embodied in the Roman State, begins the war of extermination against the Church that was ever more and more extending her boundaries. Such manifestation of hostility, however, was not able to subdue the Church. . . . During the same time the episcopal and synodal-hierarchical organization of the church was more fully developed by the introduction of an order of Metropolitans, and then in the following period it reached its climax in the oligarchical Pentarchy of Patriarchs, and in the institution of Œcumenical Synods."—J. H. Kurtz, *Church History*, v. 1, pp. 72-73, to which the reader is also referred for all periods of church history. See, also, P. Schaff, *History of the Christian Church*; and, for biography, W. Smith and H. Wace, *A Dictionary of Christian Biography*.—"Missionary effort in this period was mainly directed to the conversion of the heathen. On the ruins of Jerusalem, Hadrian's colony of Ælia Capitolina was planted; so that even there the Church, in its character and modes of worship, was a Gentile community. Christianity was early carried to Edessa, the capital of the small state of Osrhene, in Mesopotamia. After the middle of the second century, the Church at Edessa was sufficiently flourishing to count among its members the king, Abgar Bar Manu. At about this time the gospel was preached in Persia, Media, Parthia, and Bactria. We have notices of churches in Arabia in the

early part of the third century. They were visited several times by Origen, the celebrated Alexandrian Church teacher (185-254). In the middle of the fourth century a missionary, Theophilus, of Diu, found churches in India. In Egypt, Christianity made great progress, especially at Alexandria, whence it spread to Cyrene and other neighboring places. In upper Egypt, where the Coptic language and the superstition of the people were obstacles in its path, Christianity had, nevertheless, gained a foothold as early as towards the close of the second century. At this time the gospel had been planted in proconsular Africa, being conveyed thither from Rome, and there was a flourishing church at Carthage. In Gaul, where the Druidical system, with its priesthood and sacrificial worship, was the religion of the Celtic population, several churches were founded from Asia Minor. At Lyons and Vienne there were strong churches in the last quarter of the second century. At this time Irenæus, Bishop of Lyons, speaks of the establishment of Christianity in Germany, west of the Rhine, and Tertullian, the North African presbyter, speaks of Christianity in Britain. The fathers in the second century describe in glowing terms, and not without rhetorical exaggeration, the rapid conquests of the Gospel. The number of converts in the reign of Hadrian must have been very large. Otherwise we cannot account for the enthusiastic language of Justin Martyr respecting the multitude of professing Christians. Tertullian writes in a similar strain. Irenæus refers to Barbarians who have believed without having a knowledge of letters, through oral teaching merely."—G. P. Fisher, *History of the Christian Church*, pp. 45-46.

Alexandria.—"Christianity first began its activity in the country among the Jewish and Greek population of the Delta, but gradually also among the Egyptians proper (the Copts) as may be inferred from the Coptic (Memphytic) translation of the New Testament (third century). In the second century, Gnosticism [see Gnostics], which had its chief seat here as well as in Syria, and, secondly, towards the close of the century, the Alexandrian Catechetical School, show the importance of this centre of religious movement and Christian education."—W. Moeller, *Hist. of the Christian Church*, p. 105.—"Never perhaps has the free statement of the Christian idea had less prejudice to encounter than at Alexandria at the close of the second century. Never has it more successfully vindicated by argument its right to be the great interpreter of the human spirit. The institutions of the great metropolis were highly favourable to this result. The Museum, built by the Ptolemies, was intended to be, and speedily became, the centre of an intense intellectual life. The Serapeum, at the other end of the town, rivalled it in beauty of architecture and wealth of rare MSS. The Sebasteion, reared in honour of Augustus, was no unworthy companion to these two noble establishments. In all three, splendid endowments and a rich professoriate attracted the talent of the world. If the ambition of a secured reputation drew many eminent men away to Rome, the means of securing such eminence were mainly procured at Alexandria. . . . The Christian Church in this city rose to the height of its grand opportunity. It entered the lists without fear and without favour, and boldly proclaimed its competence to

satisfy the intellectual cravings of man. Numbers of restless and inquiring spirits came from all parts of the world, hoping to find a solution of the doubts that perplexed them. And the Church, which had already brought peace to the souls of the woman and the slave, now girded herself to the harder task of convincing the trained intelligence of the man of letters and the philosopher."—C. T. Cruttwell, *A Literary History of Early Christianity*, bk. 4, ch. 1 (c. 2).—"The question . . . came up for decision towards the close of the sub-apostolic age, as to what shape the Church was finally to take. Two types were set before her to choose from—one the Hebrew-Latin type, as we may call it, into which . . . she finally settled down; the other the Hellenist type of a Demos, or commonwealth of free citizens, all equal, all alike kings and priests unto God, and whose moral and spiritual growth was left very much to the initiative of each member of the community. In Alexandria, as the meeting-point of all nationalities, and where Judaism itself had tried to set up a new type of thought, eclectic between Hebraism and Hellenism, and comprehending what was best in both, naturally enough there grew up a Christian type of eclecticism corresponding to that of Philo. . . . Into this seething of rival sects and races the Alexandrian school of catechists threw themselves, and made a noble attempt to rescue the Church, the synagogue, and the Stoics alike from the one bane common to all—the dangerous delusion that the truth was for them, not they for the truth. Setting out on the assumption that God's purpose was the education of the whole human family, they saw in the Logos doctrine of St. John the key to harmonise all truth, whether of Christian sect, Hebrew synagogue, or Stoic philosophy. . . . To educate all men up to this standard seemed to them the true ideal of the Church. True Gnosis was their keynote; and the Gnostic, as Clemens loves to describe himself, was to them the pattern philosopher and Christian in one. They regarded, moreover, a discipline of at least three years as imperative; it was the preliminary condition of entrance into the Christian Church."—J. B. Heard, *Alexandrian and Carthaginian Theology Contrasted*, pp. 37–38.—"The two great Christian writers of Alexandria were Clement and Origen. "The universal influence of Origen made itself felt in the third century over the whole field of Greek theology. In him, as it were, everything which had hitherto been striven after in the Greek field of theology, had been gathered together, so as, being collected here in a centre, to give an impulse in the most various directions; hence also the further development of theology in subsequent times is always accustomed to link itself on to one side or the other of his rich spiritual heritage. . . . And while this involves that Christianity is placed on friendly relations with the previous philosophical development of the highest conceptions of God and the world, yet on the other hand Christian truth also appears conversely as the universal truth which gathers together in itself all the hitherto isolated rays of divine truth. . . . In the great religious ferment of the time there was further contained the tendency to seek similar religious ideas amid the different mythological religious forms and to mingle them syncretistically. This religious ferment was still further increased by the original

content of Christianity, that mighty leaven, which announced a religion destined to the redemption and perfecting of the world, and by this means a like direction and tendency was imparted to various other religious views likewise. The exciting and moving effect of Gnosticism on the Church depended at the same time on the fact, that its representatives practically apprehended Christianity in the manner of the antique religious mysteries, and in so doing sought to lean upon the Christian communities and make themselves at home in them, according as their religious life and usages seemed to invite them, and to establish in them a community of the initiated and perfect; an endeavour which the powerful ascetic tendency in the church exploited and augmented in its own sense, and for which the institution of prophecy, which was so highly respected and powerful in the communities, afforded a handle. In this way the initiated were able to make for themselves a basis in the community on which they could depend, while the religio-philosophical speculations, which are always intelligible only to a few, at the same time propagated themselves and branched out scholastically."—W. Moeller, *History of the Christian Church*, pp. 215, 213, 130–131.—"At Alexandria, Basilides (A. D. 125) and Valentine exerted in turn an extraordinary influence; the latter endeavored to establish his school at Rome about the year 140. The Gnostics of Syria professed a more open dualism than those of Egypt. The Church of Antioch had to resist Saturnin, that of Edessa to oppose Bordesanes and Tatian."—E. De Pressensé, *The Early Years of Christianity; The Martyrs and Apologists*, p. 135.—"There was something very imposing in those mighty systems, which embraced heaven and earth. How plain and meagre in comparison seemed simple Christianity! There was something remarkably attractive in the breadth and liberality of Gnosticism. It seemed completely to have reconciled Christianity with culture. How narrow the Christian Church appeared! Even noble souls might be captivated by the hope of winning the world over to Christianity in this way. . . . Over against the mighty systems of the Gnostics, the Church stood, in sober earnestness and child-like faith, on the simple Christian doctrine of the Apostles. This was to be sought in the churches founded by the apostles themselves, where they had defined the faith in their preaching."—G. Uhlhorn, *The Conflict of Christianity with Heathenism*, bk. 2, ch. 3.—"Greek philosophy had joined hands with Jewish theosophy, and the Church knew not where to look for help. So serious did the danger seem, when it was assailed at once and from opposite sides by Jewish and Greek types of Gnosticism, the one from the monotheistic point of view impugning the Godhead, the other for the Docetic side explaining away [as a spiritual illusion] the manhood of Christ, that the Church, in despair of beating error by mere apology, fell back on the method of authority. The Church was the only safe keeper of the deposit of sacred tradition; whoever impugned that tradition, let him be put out of the communion of saints."—Rev. J. B. Heard, *Alexandrian and Carthaginian Theology Contrasted*, p. 41.—"The interest, the meaning, of Gnosticism rest entirely upon its ethical motive. It was an attempt, a serious attempt, to fathom the dread mystery of sorrow and pain, to answer that spectral doubt, which is mostly crushed

down by force—Can the world as we know it have been made by God? 'Cease,' says Basilides, 'from idle and curious variety, and let us rather discuss the opinions, which even barbarians have held, on the subject of good and evil.' 'I will say anything rather than admit that Providence is wicked.' Valentinus describes in the strain of an ancient prophet the woes that afflict mankind. 'I durst not affirm,' he concludes, 'that God is the author of all this.' So Tertullian says of Marcion, 'like many men of our time, and especially the heretics, he is bewildered by the question of evil.' They approach the problem from a non-Christian point of view, and arrive therefore at a non-Christian solution. . . . Many of them, especially the later sectaries, accepted the whole Christian Creed, but always with reserve. The teaching of the Church thus became in their eyes a popular exoteric confession, beneath their own Gnosis, or Knowledge, which was a Mystery, jealously guarded from all but the chosen few."—C. Bigg, *The Christian Platonists of Alexandria*, pp. 28-29.

Cæsarea.—"The chief points of interest in the history of the Church of Cæsarea during this period are the residence of Origen there (first between A. D. 215 and 219 and again after his final departure from Alexandria in 231), the education of Eusebius, the foundation of the great library by Pamphilus, and the martyrdoms during the Diocletian persecution. Most of these will come before us again in other connexions, but they require mention here. It would be difficult to over-estimate the effect of what they imply on the Church at large. Had the work of Origen, Pamphilus, and Eusebius at Cæsarea remained unrecorded, there would be a huge blank in ecclesiastical history, rendering much that is otherwise known scarcely intelligible. Had that work never been done, the course of ecclesiastical history would have been very different. In the whole of the second and third centuries it would be difficult to name two more influential Christians than Origen and Eusebius; and Pamphilus laboured earnestly to preserve and circulate the writings of the one and to facilitate those of the other. It was from the libraries of Pamphilus at Cæsarea and of Alexander at Jerusalem that Eusebius obtained most of his material" for his "Ecclesiastical History," which has preserved titles and quotations from many lost books of exceeding value.—A. Plummer, *The Church of the Early Fathers*, ch. 3.

Edessa.—"Edessa (the modern Urfa) was from the beginning of the third century one of the chief centres of Syrian Christian life and theological study. For many years, amid the vicissitudes of theological persecution, a series of flourishing theological schools were maintained there, one of which (the 'Persian school') is of great importance as the nursery of Nestorianism in the extreme East. It was as bishop of Edessa, also, that Jacob Baradaeus organized the monophysite churches into that Jacobite church of which he is the hero. From the scholars of Edessa came many of the translations which carried Greek thought to the East, and in the periods of exciting controversy Edessa was within the range of the theological movements that stirred Alexandria and Constantinople. The 'Chronicle of Edessa,' as it is called because the greater number of its notices relate to Edessene affairs, is a brief document in Syriac contained

in a manuscript of six leaves in the Vatican library. It is one of the most important fundamental sources for the history of Edessa, contains a long official narrative of the flood of A. D. 201, which is perhaps the only existing monument of heathen Syriac literature, and includes an excellent and very carefully dated list of the bishops of Edessa from A. D. 313 to 543."—*Andover Review*, v. 19, p. 374.—The Syriac Versions (of the Gospel) form a group of which mention should undoubtedly be made. The Syriac versions of the Bible (Old Testament) are among the most ancient remains of the language, the Syriac and the Chaldee being the two dialects of the Aramaean spoken in the North. Of versions of the New Testament, "the 'Peshito' or the 'Simple,' though not the oldest text, has been the longest known. . . . The 'Curetonian' . . . was discovered after its existence had been for a long time suspected by sagacious scholars [but is not much more than a series of fragments]. . . . Cureton, Tregelles, Alford, Ewald, Bleek, and others, believe this text to be older than the Peshito [which speaks for the Greek text of the second century, though its own date is doubtful]. . . . Other valuable Syriac versions are 'Pseudo-Jerusalem' . . . and the 'Jerusalem Syriac Lectionary' . . . a service-book with lessons from the Gospels for Sundays and feast days throughout the year . . . written at Antioch in 1030 in a dialect similar to that in use in Jerusalem and from a Greek text of great antiquity." A recent discovery renders these facts and statements of peculiar interests.—G. E. Merrill, *The Story of the Manuscripts*, ch. 10.

Rural Palestine.—"If Ebionism [see EBIONISM] was not primitive Christianity, neither was it a creation of the second century. As an organization, a distinct sect, it first made itself known, we may suppose, in the reign of Trajan: but as a sentiment, it had been harboured within the Church from the very earliest days. Moderated by the personal influence of the Apostles, soothed by the general practice of their church, not yet forced into declaring themselves by the turn of events, though scarcely tolerant of others, these Judaizers were tolerated for a time themselves. The beginning of the second century was a winnowing season in the Church of the Circumcision. . . . It is a probable conjecture, that after the destruction of Jerusalem the fugitive Christians, living in their retirement in the neighbourhood of the Essene settlements, received large accessions to their numbers from this sect, which thus inoculated the Church with its peculiar views. It is at least worthy of notice, that in a religious work emanating from this school of Ebionites the 'true Gospel' is reported to have been first propagated 'after the destruction of the holy place.'"—J. B. Lightfoot, *Dissertations on the Apostolic Age*, pp. 78-80.

Carthage.—"If the world is indebted to Rome for the organisation of the Church, Rome is indebted to Carthage for the theory on which that organisation is built. The career of Carthage as a Christian centre exemplifies the strange vicissitudes of history. The city which Rome in her jealousy had crushed, which, not content with crushing, she had obliterated from the face of the earth, had at the bidding of Rome's greatest son risen from her ashes, and by her career almost verified the poet's taunt that the greatness of Carthage was reared on the

ruin of Italy. For in truth the African capital was in all but political power no unworthy rival of Rome. It had steadily grown in commercial prosperity. Its site was so advantageous as to invite, almost to compel, the influx of trade, which ever spontaneously moves along the line of least resistance. And the people were well able to turn this natural advantage to account. A mixed nationality, in which the original Italian immigration lent a steadying force to the native Punic and kindred African elements that formed its basis, with its intelligence enriched by large accessions of Greek settlers from Cyrene and Alexandria—Carthage had developed in the second century of our era into a community at once wealthy, enterprising and ambitious. . . . It was no longer in the sphere of profane literature, but in her contributions to the cause of Christianity and the spiritual armoury of the Church, that the proud Queen of Africa was to win her second crown of fame. . . . The names of Tertullian, Cyprian and Augustine, at once suggest the source from which Papal Rome drew the principles of Church controversy, Church organisation, and Church doctrine, which have consolidated her authority, and to some extent justified her pretensions to rule the conscience of Christendom.”—C. T. Cruttwell, *A Literary History of Early Christianity*, bk. 5, ch. 2 (v. 2).—“At the end of the second century the African Tertullian first began to wrestle with the difficulties of the Latin language in the endeavour to make it a vehicle for the expression of Christian ideas. In reading his dogmatic writings the struggle is so apparent that it seems as though we beheld a rider endeavouring to discipline an unbroken steed. Tertullian’s doctrine is, however, still wholly Greek in substance, and this continued to be the case in the church of the Latin tongue until the end of the fourth century. Hilary, Ambrose, even Jerome, are essentially interpreters of Greek philosophy and theology to the Latin West. With Augustine learning begins to assume a Latin form, partly original and independent—partly, I say, for even later compositions are abundantly interwoven with Greek elements and materials. Very gradually from the writings of the African fathers of the church does the specific Latin element come to occupy that dominant position in Western Christendom, which soon, partly from self-sufficient indifference, partly from ignorance, so completely severed itself from Greek influences that the old unity and harmony could never be restored. Still the Biblical study of the Latins is, as a whole, a mere echo and copy of Greek predecessors.”—J. I. von Döllinger, *Studies in European History*, pp. 170–171.—From Carthage which was afterward the residence of “the primate of all Africa . . . the Christian faith soon disseminated throughout Numidia, Mauritania and Getulia, which is proved by the great number of bishops at two councils held at Carthage in 256 and 308. At the latter there were 270 bishops, whose names are not given, but at the former were bishops from (87) . . . cities.”—J. E. T. Wilsch, *Hand-book of the Geography and Statistics of the Church*.

Rome.—“In the West, Rome remains and indeed becomes ever more and more the ‘sedes Apostolica,’ by far the most important centre where, alongside of the Roman element, there are to be found elements streaming together from

all points of the Empire. Greek names, and the long lasting (still dominant in the second century) maintenance of Greek as the written language of Roman Christianity are here noteworthy. . . . Rome was the point of departure not only for Italy and the Western Provinces, but without doubt also for Proconsular Africa, where in turn Carthage becomes the centre of diffusion. . . . The diffusion in the Græco-Roman world as a whole goes first to the more important towns and from these gradually over the country. . . . The instruments however of this mission are by no means exclusively apostolic men, who pursue missions as their calling . . . ; every Christian becomes a witness in his own circle, and intercourse and trade bring Christians hither and thither, and along with them their Christian faith.”—W. Moeller, *History of the Christian Church*, pp. 105–107.—“It has been contended, and many still believe, that in ancient Rome the doctrines of Christ found no proselytes, except among the lower and poorer classes of citizens. . . . The gospel found its way also to the mansions of the masters, nay, even to the palace of the Cæsars. The discoveries lately made on this subject are startling, and constitute a new chapter in the history of imperial Rome. . . . A difficulty may arise in the mind of the reader: how was it possible for these magistrates, generals, consuls, officers, senators, and governors of provinces, to attend to their duties without performing acts of idolatry? . . . The Roman emperors gave plenty of liberty to the new religion from time to time; and some of them, moved by a sort of religious syncretism, even tried to ally it with the official worship of the empire, and to place Christ and Jupiter on the steps of the same ‘lararium.’ . . . We must not believe that the transformation of Rome from a pagan into a Christian city was a sudden and unexpected event, which took the world by surprise. It was the natural result of the work of three centuries, brought to maturity under Constantine by an inevitable reaction against the violence of Diocletian’s rule. It was not a revolution or a conversion in the true sense of these words; it was the official recognition of a state of things which had long ceased to be a secret. The moral superiority of the new doctrines over the old religions was so evident, so overpowering, that the result of the struggle had been a foregone conclusion since the age of the first apologists. The revolution was an exceedingly mild one, the transformation almost imperceptible. . . . The transformation may be followed stage by stage in both its moral and material aspect. There is not a ruin of ancient Rome that does not bear evidence of the great change. . . . Rome possesses authentic remains of the ‘houses of prayer’ in which the gospel was first announced in apostolic times. . . . A very old tradition, confirmed by the ‘Liber Pontificalis,’ describes the modern church of S. Pudentiana as having been once the private house of the same Pudens who was baptized by the apostles, and who is mentioned in the epistles of S. Paul. . . . The connection of the house with the apostolate of SS. Peter and Paul made it very popular from the beginning. . . . Remains of the house of Pudens were found in 1870. They occupy a considerable area under the neighboring houses. . . . Among the Roman churches whose origin can be traced to the hall of meeting, besides those of Pudens and Prisca

already mentioned, the best preserved seems to be that built by Demetrius at the third milestone of the Via Latina, near the 'painted tombs.' . . . The Christians took advantage of the freedom accorded to funeral colleges, and associated themselves for the same purpose, following as closely as possible their rules concerning contributions, the erection of lodges, the meetings, and the . . . love feasts; and it was largely through the adoption of these well-understood and respected customs that they were enabled to hold their meetings and keep together as a corporate body through the stormy times of the second and third centuries. Two excellent specimens of scholæ connected with Christian cemeteries and with meetings of the faithful have come down to us, one above the Catacombs of Callixtus, the other above those of Soter." This formation of Christian communities into colleges is an important fact, and connects these Christian societies with one of the social institutions of the Empire which may have influenced the church as an organization. "The experience gained in twenty-five years of active exploration in ancient Rome, both above and below ground, enables me to state that every pagan building which was capable of giving shelter to a congregation was transformed, at one time or another, into a church or a chapel. . . . From apostolic times to the persecution of Domitian, the faithful were buried, separately or collectively, in private tombs which did not have the character of a Church institution. These early tombs, whether above or below ground, display a sense of perfect security, and an absence of all fear or solicitude. This feeling arose from two facts: the small extent of the cemeteries, which secured to them the rights of private property, and the protection and freedom which the Jewish colony in Rome enjoyed from time immemorial. . . . From the time of the apostles to the first persecution of Domitian, Christian tombs, whether above or below ground, were built with perfect impunity and in defiance of public opinion. We have been accustomed to consider the catacombs of Rome as crypts plunged in total darkness, and penetrating the bowels of the earth at unfathomable depths. This is, in a certain measure, the case with those catacombs, or sections of catacombs, which were excavated in times of persecution; but not with those belonging to the first century. The cemetery of these members of Domitian's family who had embraced the gospel—such as Flavius Clemens, Flavia Domitilla, Plautilla, Petronilla, and others—reveals a bold example of publicity. . . . How is it possible to imagine that the primitive Church did not know the place of the death of its two leading apostles? In default of written testimony let us consult monumental evidence. There is no event of the imperial age and of imperial Rome which is attested by so many noble structures, all of which point to the same conclusion,—the presence and execution of the apostles in the capital of the empire."—R. Lanciani, *Pagan and Christian Rome*, ch. 1, 3 and 7.—The Church at Rome "gave no illustrious teachers to ancient Christianity. . . . All the greatest questions were debated elsewhere. . . . By a sort of instinct of race, [it] occupied itself far more with points of government and organization than of speculation. Its central position, in the capital of the empire, and its glorious memories, guar-

anteed to it a growing authority."—E. De Pressensé, *The Early Years of Christianity: The Martyrs and Apologists*, p. 41.

Gaul.—"Of the history of the Gallican Churches before the middle of the second century we have no certain information. It seems fairly probable indeed that, when we read in the Apostolic age of a mission of Crescens to 'Galatia' or 'Gaul,' the western country is meant rather than the Asiatic settlement which bore the same name; and, if so, this points to some relations with St. Paul himself. But, even though this explanation should be accepted, the notice stands quite alone. Later tradition indeed supplements it with legendary matter, but it is impossible to say what substratum of fact, if any, underlies these comparatively recent stories. The connection between the southern parts of Gaul and the western districts of Asia Minor had been intimate from very remote times. Gaul was indebted for her earliest civilization to her Greek settlements like Marseilles, which had been colonized from Asia Minor some six centuries before the Christian era; and close relations appear to have been maintained even to the latest times. During the Roman period the people of Marseilles still spoke the Greek language familiarly along with the vernacular Celtic of the native population and the official Latin of the dominant power. When therefore Christianity had established her headquarters in Asia Minor, it was not unnatural that the Gospel should flow in the same channels which already conducted the civilization and the commerce of the Asiatic Greeks westward. At all events, whatever we may think of the antecedent probabilities, the fact itself can hardly be disputed. In the year A. D. 177, under Marcus Aurelius, a severe persecution broke out on the banks of the Rhone in the cities of Vienne and Lyons—a persecution which by its extent and character bears a noble testimony to the vitality of the Churches in these places. To this incident we owe the earliest extant historical notice of Christianity in Gaul."—J. B. Lightfoot, *Essays on the work entitled Supernatural Religion*, pp. 251–252.—"The Churches of proconsular Africa, of Spain, of Italy, and of Southern Gaul constitute, at this period, the Western Church, so different in its general type from the Eastern. With the exception of Irenæus [bishop of Lyons] and Hippolytus [the first celebrated preacher of the West, of Italy and, for a period, Lyons] who represent the oriental element in Gaul and at Rome, the Western Fathers are broadly distinguished from those of the East. . . . They affirm rather than demonstrate; . . . they prefer practical to speculative questions. The system of episcopal authority is gradually developed with a larger amount of passion at Carthage, with greater prudence and patience in Italy."—E. De Pressensé, *The Early Years of Christianity: the Martyrs and Apologists*.

Spain.—"Christians are generally mentioned as having existed in all parts of Spain at the close of the second century; before the middle of the third century there is a letter of the Roman bishop Anterus (in 237) to the bishops of the provinces of Betica and Toletana . . . ; and after the middle of the same century a letter of Cyprian's was addressed to . . . people . . . in the north . . . as well as . . . in the south of that country."—J. E. T. Wiltch, *Handbook of*

the Geography and Statistics of the Church, pp. 40-41.

Britain.—"All that we can safely assert is that there is some reason for believing that there were Christians in Britain before A. D. 200. Certainly there was a British Church with bishops of its own soon after A. D. 300, and possibly some time before that. Very little can be known about this Celtic Church; but the scanty evidence tends to establish three points, (1) It had its origin from, and remained largely dependent upon, the Gallic Church. (2) It was confined almost exclusively to Roman settlements. (3) Its numbers were small and its members were poor. . . . That Britain may have derived its Christianity from Asia Minor cannot be denied; but the peculiar British custom respecting Easter must not be quoted in evidence of it. It seems to have been a mere blunder, and not a continuation of the old Quarta-deciman practice. Gaul is the more probable parent of the British Church. . . . At the Council of Rimini in 359 Constantius offered to pay out of the treasury the travelling expenses of all the bishops who attended. Out of more than four hundred bishops, three from Britain were the only clergy who availed themselves of this offer. Neither at Rimini, any more than at Arles, do the British representatives make any show: they appear to be quite without influence."—A. Plummer, *The Church of the Early Fathers*, ch. 8.

Goths.—"It has been observed that the first indisputable appearance of the Goths in European history must be dated in A. D. 238, when they laid waste the South-Danubian province of Moesia as far as the Black Sea. In the thirty years (238-269) that followed, there took place no fewer than ten such inroads. . . . From these expeditions they returned with immense booty, — corn and cattle, silks and fine linen, silver and gold, and captives of all ranks and ages. It is to these captives, many of whom were Christians, and not a few clergy, that the introduction of Christianity among the Goths is primarily due. . . . The period of the inroads, which so strangely formed a sowing-time for Christianity, was followed by a long period of tranquillity, during which the new faith took root and spread. . . . It is to the faithful work and pure lives of [Christian] men . . . who had fled from Roman civilisation for conscience sake, to the example of patience in misfortune and high Christian character displayed by the captives, and to the instruction of the presbyters sprinkled among them, that we must look, as the source of Christianity among the Goths. . . . The fact (to which we shall have to refer later), that, of all the sea raids undertaken by the Goths between the years 238 and 269, the Visigoths took part in only two, while the Ostrogoths, who were settled in Southern Russia along the coast of the Euxine; from the Crimea to the Dneister, were engaged probably in all of them, makes it very unlikely that the captives mentioned by Philostorgius were carried anywhere else than the eastern settlements. To the influence of these Asian Christians, exerted mainly, if not entirely upon the Ostrogoths, must be added the ever-increasing intercourse carried on by sea between the Crimea and both the southern shore of the Euxine and Constantinople. To these probabilities has now to be added the fact that the only

traces of an organised Gothic Church existing before the year 341 are clearly to be referred to a community in this neighbourhood. Among the bishops who were present at the Council of Nicaea (A. D. 325), and who signed the symbol which was then approved, we find a certain Theophilus, before whose name stand the words, 'de Gothis,' and after it the word 'Bosphoritanus.' There can be little doubt that this was a bishop representing a Gothic Church on the Cimmerian Bosphorus; and if, following the Paris MSS., we read further down the list the name Domnus Bosphorensis or Bosphoranus, we may find here another bishop from this diocese, and regard Theophilus as chief or arch-bishop of the Crimean churches. The undoubted presence at this council of at least one bishop of the Goths, and the conclusion drawn therefrom in favour of the orthodoxy of the Gothic Church in general, led afterwards to the greatest confusion. Failing to distinguish between the Crimean and Danubian communities, the historians often found their information contradictory, and altered it in the readiest way to suit the condition of the Church which they had specially in view. . . . The conversion of that section of the nation, which became the Gothic Church, was due to the apostolic labours of one of their own race, — the great missionary bishop Ulfilas [see *Goths*: A. D. 341-381]. But to him too was to be traced the heresy in which they stopped short on the way from heathenism to a complete Christian faith."—C. A. A. Scott, *Ulfilas, Apostle of the Goths*, pp. 19-30.—"The superstitions of the barbarians, who had found homes in the empire, had been exchanged for a more wholesome belief. But Christianity had done more than this. It had extended its influence to the distant East and South, to Abyssinia, and the tribes of the Syrian and Lybian deserts, to Armenia, Persia, and India."—G. P. Fisher, *Hist. of the Christian Church*, p. 98.—"We have before us many significant examples of the facility with which the most intelligent of the Pagans accepted the outward rite of Christian baptism, and made a nominal profession of the Faith, while they retained and openly practiced, without rebuke, without remark, with the indulgence even of genuine believers, the rites and usages of the Paganism they pretended to have abjured. We find abundant records of the fact that personages high in office, such as consuls and other magistrates, while administering the laws by which the old idolatries were proscribed, actually performed Pagan rites and even erected public statues to Pagan divinities. Still more did men, high in the respect of their fellow-Christians, allow themselves to cherish sentiments utterly at variance with the definitions of the Church."—C. Merivale, *Four lectures on some Epochs of Early Church History*, p. 150.—"We look back to the early acts and policy of the Church towards the new nations, their kings and their people; the ways and works of her missionaries and lawgivers, Ulfilas among the Goths, Augustine in Kent, Remigius in France, Boniface in Germany, Anscar in the North, the Irish Columban in Burgundy and Switzerland, Benedict at Monte Cassino; or the reforming kings, the Arian Theodoric, the great German Charles, the great English Alfred. Measured by the light and the standards they have helped us to attain to, their methods no doubt surprise,

disappoint—it may be, revolt us; and all that we dwell upon is the childishness, or the imperfect morality, of their attempts. But if there is anything certain in history, it is that in these rough communications of the deepest truths, in these [for us] often questionable modes of ruling minds and souls, the seeds were sown of all that was to make the hope and the glory of the foremost nations. . . . I have spoken of three other groups of virtues which are held in special regard and respect among us—those connected with manliness and hard work, with reverence for law and liberty, and with pure family life. The rudiments and tendencies out of which these have grown appear to have been early marked in the German races; but they were only rudiments, existing in company with much wilder and stronger elements, and liable, amid the changes and chances of barbarian existence, to be paralysed or trampled out. No mere barbarian virtues could by themselves have stood the trial of having won by conquest the wealth, the lands, the power of Rome. But their guardian was there. What Christianity did for these natural tendencies to good was to adopt them, to watch over them, to discipline, to consolidate them. The energy which warriors were accustomed to put forth in their efforts to conquer, the missionaries and ministers of Christianity exhibited in their enterprises of conversion and teaching. The crowd of unknown saints whose names fill the calendars, and live, some of them, only in the titles of our churches, mainly represent the age of heroic spiritual ventures, of which we see glimpses in the story of St. Boniface, the apostle of Germany; of St. Columban and St. Gall, wandering from Ireland to reclaim the barbarians of the Burgundian deserts and of the shores of the Swiss lakes. It was among men like these—men who were then termed emphatically ‘men of religion’—that the new races saw the example of life ruled by a great and serious purpose, which yet was not one of ambition or the excitement of war; a life of deliberate and steady industry, of hard and uncomplaining labour; a life as full of activity in peace, of stout and brave work, as a warrior’s was wont to be in the camp, on the march, in the battle. It was in these men and in the Christianity which they taught, and which inspired and governed them, that the fathers of our modern nations first saw exemplified the sense of human responsibility, first learned the nobleness of a ruled and disciplined life, first enlarged their thoughts of the uses of existence, first were taught the dignity and sacredness of honest toil. These great axioms of modern life passed silently from the special homes of religious employment to those of civil; from the cloisters and cells of men who, when they were not engaged in worship, were engaged in field-work or book-work,—clearing the forest, extending cultivation, multiplying manuscripts—to the guild of the craftsman, the shop of the trader, the study of the scholar. Religion generated and fed these ideas of what was manly and worthy in man.”—R. W. Church, *The Gifts of Civilisation*, pp. 279–283.

A. D. 312–337.—The Church and the Empire.—“Shortly after the beginning of the fourth century there occurred an event which, had it been predicted in the days of Nero or even of Decius, would have been deemed a wild fancy.

It was nothing less than the conversion of the Roman Emperor to the Christian faith. It was an event of momentous importance in the history of the Christian religion. The Roman empire, from being the enemy and persecutor of the Church, thenceforward became its protector and patron. The Church entered into an alliance with the State, which was to prove fruitful of consequences, both good and evil, in the subsequent history of Europe. Christianity was now to reap the advantages and incur the dangers arising from the friendship of earthly rulers and from a close connection with the civil authority. Constantine was born in 274. He was the son of Constantius Chlorus. His mother, Helena, was of obscure birth. She became a Christian—whether before or after his conversion, is doubtful. . . . After the death of Constantine’s father, a revolt against Galerius augmented the number of emperors, so that, in 308, not less than six claimed to exercise rule. The contest of Constantine was at first in the West, against the tyrannical and dissolute Maxentius. It was just before his victory over this rival at the Milvian Bridge, near Rome, that he adopted the Christian faith. That there mingled in this decision, as in most of the steps of his career, political ambition, is highly probable. The strength of the Christian community made it politic for him to win its united support. But he sincerely believed in the God whom the Christians worshipped, and in the help which, through his providence, he could lend to his servants. . . . Shortly before his victory over Maxentius there occurred what he asserted to be the vision of a flaming cross in the sky, seen by him at noonday, on which was the inscription, in Greek, ‘By this conquer.’ It was, perhaps, an optical illusion, the effect of a parhelion beheld in a moment when the imagination . . . was strongly excited. He adopted the labarum, or the standard of the cross, which was afterwards carried in his armies. [See *ROME*: A. D. 323.] In later contests with Licinius, the ruler in the East, who was a defender of paganism, Constantine became more distinctly the champion of the Christian cause. The final defeat of Licinius, in 323, left him the master of the whole Roman world. An edict signed by Galerius, Constantine, and Licinius, in 311, had proclaimed freedom and toleration in matters of religion. The edict of Milan, in 312, emanating from the two latter, established unrestricted liberty on this subject. If we consider the time when it was issued, we shall be surprised to find that it alleges as a motive for the edict the sacred rights of conscience.”—G. P. Fisher, *Hist. of the Christian Church*, pp. 87–88.—“Towards the end of the year Constantine left Rome for Milan, where he met Licinius. This meeting resulted in the issue of the famous edict of Milan. Up to that hour Christianity had been an ‘illicita religio,’ and it was a crime to be a Christian. Even in Trajan’s answer to Pliny this position is assumed, though it forms the basis of humane regulations. The edict of Milan is the charter of Christianity; it proclaims absolute freedom in the matter of religion. Both Christians and all others were to be freely permitted to follow whatsoever religion each might choose. Moreover, restitution was to be made to the Christian body of all churches and other buildings which had been alienated from them during the persecution. This was in

313 A. D. . . . But the causes of dissension remained behind. Once more (323) the question between paganism and Christianity was to be tried on the field of battle, and their armies confronted one another on the plains of Hadrianople. Again the skill of Constantine and the trained valour of his troops proved superior to the undisciplined levies of Licinius; while at sea Crispus, the eldest and ill-fated son of Constantine, destroyed the enemy's fleet in the crowded waters of the Hellespont, sowing thereby the seeds of his father's jealousy. Byzantium fell, but not without a vigorous resistance; and, after one more crushing defeat on the site of the modern Scutari, Licinius submitted himself to the mercy of Constantine. . . . What we notice in the whole of these events is the enormous power which still belonged to paganism. The balance still wavered between paganism and Christianity. . . . Constantine had now, by a marvellous succession of victories, placed himself in a position of supreme and undisputed power. At this juncture it is of interest to observe that . . . the divided empire, which followed the reign of Constantine, served to sustain Catholicity at least in one half of the world. . . . The foundation of Constantinople was the outward symbol of the new monarchy and of the triumph of Christianity. . . . The choice of this incomparable position for the new capital of the world remains the lasting proof of Constantine's genius. . . . The magnificence of its public buildings, its treasures of art, its vast endowments, the beauty of its situation, the rapid growth of its commerce, made it worthy to be 'as it were a daughter of Rome herself.' But the most important thought for us is the relation of Constantinople to the advance of Christianity. That the city which had sprung into supremacy from its birth and had become the capital of the conquered world, should have excluded from the circuit of its walls all public recognition of polytheism, and made the Cross its most conspicuous ornament, and the token of its greatness, gave a reality to the religious revolution. . . . The imperial centre of the world had been visibly displaced."—A. Carr, *The Church and the Roman Empire*, ch. 4.—With the first General Council of the Church, held at Nicæa, A. D. 325 (see NICÆA), "the decisions . . . of which received the force of law from the confirmation of the Emperor, a tendency was entered upon which was decisive for the further development; decisive also by the fact that the Emperor held it to be his duty to compel subordination to the decisions of the council on penalty of banishment, and actually carried out this banishment in the case of Arius and several of his adherents. The Emperor summoned general synods, the fiscus provided the cost of travel and subsistence (also at other great synods), an imperial commissioner opened them by reading the imperial edict, and watched over the course of business. Only the bishops and their appointed representatives had votes. Dogmatic points fixed . . . were to be the outcome of unanimous agreement, the rest of the ordinances (on the constitution, discipline and worship) of a majority of votes."—W. Moeller, *Hist. of the Christian Church*, p. 337.—"The direct influence of the emperor, however, does not appear until the Emperor Marcian procured from the Council of Chalcedon the completion of

the Patriarchal system. Assuming that Rome, Alexandria, and Antioch were Patriarchates by the recognition of their privileges at the Council of Nicæa (though the canon of that council does not really admit that inference), the Council of Chalcedon, by its ninth, seventeenth and twenty-eighth canons, enlarged and fixed the patriarchal jurisdiction and privileges of the Church of Constantinople, giving it authority over the Dioceses of Thrace, Asia and Pontus, with the power of ordaining and requiring canonical obedience from the metropolis of those Dioceses, and also the right to adjudicate appeals in causes ecclesiastical from the whole Eastern Church. The Bishop of Jerusalem also obtained in this council patriarchal authority over Palestine. The organization of the Church was thus conformed to that of the empire, the patriarchs corresponding to the Prætorian Prefects, the exarchs, to the governors of the Dioceses, and the metropolitans to the governors of the provinces—the Bishop of Rome being given by an edict of Valentinian III., of the year 445, supreme appellate jurisdiction in the West, and the Bishop of Constantinople, by these canons of Chalcedon, supreme appellate jurisdiction in the East. . . . Dean Milman remarks that the Episcopate of St. John Chrysostom was the last attempt of a bishop of Constantinople to be independent of the political power, and that his fate involved the freedom of the Church of that city."

—J. H. Egar, *Christendom: Ecclesiastical and Political, from Constantine to the Reformation*, pp. 25-27.—"The name of patriarch, probably borrowed from Judaism, was from this period the appellation of the highest dignitaries of the church, and by it were more immediately, but not exclusively, designated the bishops of Constantinople, Alexandria, Antioch, and Jerusalem. One patriarch accordingly presided over several provinces, and was distinguished from the metropolitan in this, that the latter was subordinate to him, and had only the superintendence of one province or a small district. However the designation applied only to the highest rulers of the church in the east, and not to those in the west, for here the title of patriarch was not unfrequently given, even in later times, to the metropolitan. The first mention of this title occurs in the second letter of the Roman bishop, Anacletus at the beginning of the second century, and it is next spoken of by Socrates; and after the Council of Chalcedon, in 451, it came into general use. The bishop of Constantinople bore the special title of œcumenical bishop or patriarch; there were also other titles in use among the Nestorians and Jacobites. The Primate and Metropolitan or Archbishops arose contemporaneously. The title of Eparch is also said to have been given to primates about the middle of the fifth century. The metropolitan of Ephesus subscribed himself thus in the year 680, therefore in the succeeding period. There was no particular title of long continuance for the Roman bishop until the sixth century; but from the year 536 he was usually called Papa, and from the time of Gregory the Great he styled himself *Servus Servorum Dei*."—J. E. T. Wiltch, *Handbook of the Geography and Statistics of the Church*, pp. 70, 71 and 72.—"Christianity may now be said to have ascended the imperial throne: with the single exception of Julian, from this period the monarchs of the Roman empire professed

the religion of the Gospel. This important crisis in the history of Christianity almost forcibly arrests the attention to contemplate the change wrought in Christianity by its advancement into a dominant power in the state; and the change in the condition of mankind up to this period, attributable to the direct authority or indirect influence of the new religion. By ceasing to exist as a separate community, and by advancing its pretensions to influence the general government of mankind, Christianity to a certain extent, forfeited its independence. It could not but submit to these laws, framed, as it might seem, with its own concurrent voice. It was no longer a republic, governed exclusively—as far, at least, as its religious concerns—by its own internal polity. The interference of the civil power in some of its most private affairs, the promulgation of its canons, and even, in some cases, the election of its bishops by the state, was the price which it must inevitably pay for its association with the ruling power. . . . During the reign of Constantine Christianity had made a rapid advance, no doubt, in the number of its proselytes as well as in its external position. It was not yet the established religion of the empire. It did not as yet stand forward as the new religion adapted to the new order of things, as a part of the great simultaneous change which gave to the Roman world a new capital, a new system of government, and, in some important instances, a new jurisprudence. . . . The religion of the emperor would soon become that of the court, and, by somewhat slower degrees, that of the empire. At present, however, as we have seen, little open aggression took place upon paganism. The few temples which were closed were insulated cases, and condemned as offensive to public morality. In general the temples stood in all their former majesty, for as yet the ordinary process of decay from neglect or supineness could have produced little effect. The difference was, that the Christian churches began to assume a more stately and imposing form. In the new capital they surpassed in grandeur, and probably in decoration, the pagan temples, which belonged to old Byzantium. The immunities granted to the Christian clergy only placed them on the same level with the pagan priesthood. The pontifical offices were still held by the distinguished men of the state: the emperor himself was long the chief pontiff; but the religious office had become a kind of appendage to the temporal dignity. The Christian prelates were constantly admitted, in virtue of their office, to the imperial presence.”—H. H. Milman, *Hist. of Christianity*, bk. 3, ch. 4.—“As early as Constantine’s time the punishment of crucifixion was abolished; immoral practices, like infanticide, and the exhibition of gladiatorial shows, were discouraged, the latter of these being forbidden in Constantinople; and in order to improve the relation of the sexes, severe laws were passed against adultery, and restrictions were placed on the facility of divorce. Further, the bishops were empowered, in the name of religion, to intercede with governors, and even with the emperor, in behalf of the unfortunate and oppressed. And gradually they obtained the right of exercising a sort of moral superintendence over the discharge of their official duties by the judges, and others, who belonged to their communities. The supervision of the

prisons, in particular, was entrusted to them; and, whereas in the first instance their power of interference was limited to exhortations addressed to the judges who superintended them, in Justinian’s reign the bishops were commissioned by law to visit the prisons on two days of each week in order to inquire into, and, if necessary, report upon, the treatment of the prisoners. In all these and many other ways, the influence of the State in controlling and improving society was advanced by its alliance with the Church.”—H. F. Tozer, *The Church and the Eastern Empire*, pp. 56-57.—“The Christians were still a separate people. . . . It can scarcely be doubted that the stricter moral tone of Constantine’s legislation more or less remotely emanated from Christianity. . . . During the reign of Constantine Christianity continued to advance beyond the borders of the Roman empire, and in some degree to indemnify herself for the losses which she sustained in the kingdom of Persia. The Ethiopians appear to have attained some degree of civilization; a considerable part of the Arabian commerce was kept up with the other side of the Red Sea through the port of Adulis; and Greek letters appear, from inscriptions recently discovered, to have made considerable progress among this barbarous people. . . . The theological opinions of Christianity naturally made more rapid progress than its moral influence. The former had only to overpower the resistance of a religion which had already lost its hold upon the mind, or a philosophy too speculative for ordinary understandings and too unsatisfactory for the more curious and inquiring; it had only to enter, as it were, into a vacant place in the mind of man. But the moral influence had to contest, not only with the natural dispositions of man, but with the barbarism and depraved manners of ages. While, then, the religion of the world underwent a total change, the Church rose on the ruins of the temple, and the pontifical establishment of paganism became gradually extinct or suffered violent suppression; the moral revolution was far more slow and far less complete. . . . Everywhere there was exaggeration of one of the constituent elements of Christianity; that exaggeration which is the inevitable consequence of a strong impulse upon the human mind. Wherever men feel strongly, they act violently. The more speculative Christians, therefore, who were more inclined, in the deep and somewhat selfish solicitude for their own salvation, to isolate themselves from the infected class of mankind, pressed into the extreme of asceticism; the more practical, who were in earnest in the desire of disseminating the blessings of religion throughout society, scrupled little to press into their service whatever might advance their cause. With both extremes the dogmatical part of the religion predominated. . . . In proportion to the admitted importance of the creed, men became more sternly and exclusively wedded to their opinions. . . . While they swept in converts indiscriminately from the palace and the public street, while the emperor and the lowest of the populace were alike admitted on little more than the open profession of allegiance, they were satisfied if their allegiance in this respect was blind and complete. Hence a far larger admixture of human passions, and the common vulgar incentives of action, were infused into the expanding Christian body.

Men became Christians, orthodox Christians, with little sacrifice of that which Christianity aimed chiefly to extirpate. Yet, after all, this imperfect view of Christianity had probably some effect in concentrating the Christian community, and holding it together by a new and more indissoluble bond. The world divided into two parties. . . . All, however, were enrolled under one or the other standard, and the party which triumphed eventually would rule the whole Christian world."—H. H. Milman, *Hist. of Christianity*, bk. 3, ch. 4-5.—"Of this deterioration of morals we have abundant evidence. Read the Canons of the various Councils and you will learn that the Church found it necessary to prohibit the commission of the most heinous and abominable crimes not only by the laity, but even by the clergy. Read the homilies of such preachers as Chrysostom, Basil, and Gregory, and you may infer what the moral tone of a Christian congregation must have been to which such reproofs could be addressed. Read, above all, the treatise on Providence, or *De Gubernatione Dei*, written at the close of our period by Salvian, a presbyter of Marseilles. The barbarians had over-spread the West, and Christians had suffered so many hardships that they began to doubt whether there was any Divine government of human affairs. Salvian retorted that the fact of their suffering was the best evidence of the doctrine of Providence, for the miseries they endured were the effects of the Divine displeasure provoked by the debauchery of the Church. And then he proceeds to draw up an indictment and to lend proof which I prefer not to give in detail. After making every allowance for rhetorical exaggeration, enough remains to show that the morality of the Church had grievously declined, and that the declension was due to the inroads of Pagan vice. . . . Under this head, had space permitted, some account would have been given of the growth of the Christian literature of this period, of the great writers and preachers, and of the opposing schools of interpretation which divided Christendom. In the Eastern Church we should have had to notice [at greater length the work of] Eusebius of Cæsarea, the father of Church History and the friend of Constantine; Ephrem the Syrian, the poet-preacher; the three Cappadocians, Basil of Cæsarea, Gregory of Nyssa, and Gregory of Nazianzus, each great in his own way, the first as a preacher and administrator, the second as a thinker, the third as a poet and panegyrist; Chrysostom, the orator and exegete; Theodore of Mopsuestia and Theodoret of Kyros, along with Chrysostom the most influential representatives of the School of Antioch. In the Western Church we should have had to speak of Ambrose, the eloquent preacher and voluminous writer; of Jerome, the biblical critic; and of Augustine, the philosopher and controversialist, whose thoughts live among us even at the present day."—W. Stewart, *The Church of the 4th and 5th Centuries* (*St. Giles' Lectures*, 4th series).—See ROME: A. D. 323, to 391-395.—"Hitherto Christian asceticism had been individualistic in its character. . . . In the third century hermits began to form a class by themselves in the East and in Africa; in the fourth they began to be organized into communities. After the institution of monastic societies, this development of Christian asceticism spread

far and wide from the deserts of the Thebaid and Lower Egypt; Basil, Jerome, Athanasius, Augustine, Ambrose, were foremost among its earliest advocates and propagators; Cassian, Columbanus, Benedict, and others, crowned the labours of their predecessors by a more elaborate organization."—I. Gregory Smith, *Christian Monasticism*, pp. 23-25.

A. D. 318-325.—The Arian Controversy and the Council of Nicæa. See ARIANISM, and NICÆA, THE FIRST COUNCIL OF.

A. D. 330-1054.—The Eastern (Greek, or Orthodox) Church.—"The Eastern Church," says a well-known writer, 'was like the East, stationary and immutable; the Western, like the West, progressive and flexible. This distinction is the more remarkable, because at certain periods of their course, there can be no doubt that the civilization of the Eastern Church was far higher than that of the Western.'—G. F. Maclear, *The Slavs*, p. 25.—It is the more remarkable because this long-continuing uniformity, while peculiarly adapted to a people and a church which should retain and transmit an inheritance of faith and culture, stands in singular contrast to the reputed character of the Greek-speaking peoples of the East. The word Greek, however, has, as an adjective, many meanings, and there is danger of wrong inference through inattention to these; some of its distinctive characters are therefore indicated in brackets in various places in the following matter. "The New Rome at the time of its foundation was Roman. . . . But from the first it was destined to become Greek; for the Greeks, who now began to call themselves Romans—an appellation which they have ever since retained—held fast to their language, manners, and prejudices, while they availed themselves to the full of their rights as Roman citizens. The turning-point in this respect was the separation of the empires of the East and the West in the time of Arcadius and Honorius; and in Justinian's time we find all the highest offices in the hands of the Greeks, and Greek was the prevailing language. But the people whom we call by this name were not the Hellenes of Greece proper, but the Macedonian Greeks. This distinction arose with the establishment of Greek colonies with municipal government throughout Asia by Alexander the Great and his successors. The type of character which was developed in them and among those who were Hellenised by their influence, differed in many respects from that of the old Greeks. The resemblance between them was indeed maintained by similarity of education and social feelings, by the possession of a common language and literature, and by their exclusiveness, which caused them to look down on less favoured races; but while the inhabitants of Greece retained more of the independent spirit and of the moral character and patriotism of their forefathers, the Macedonian Greeks were more cosmopolitan, more subservient, and more ready to take the impress of those among whom they were thrown: and the astuteness and versatility which at all times had formed one element in the Hellenic character, in them became the leading characteristic. The influence of this type is traceable in the policy of the Eastern Empire, varying in intensity in different ages in proportion to the power exercised by the Greeks: until, during the later period of the history—in

the time of the Comneni, and still more in that of the Palæologi—it is the predominant feature.”—H. F. Tozer, *The Church and the Eastern Empire*, pp. 9-10.—“What have been the effects of Christianity on what we call national character in Eastern Christendom? . . . The Greeks of the Lower Empire are taken as the typical example of these races, and the Greeks of the Lower Empire have become a byword for everything that is false and base. The Byzantine was profoundly theological, we are told, and profoundly vile. . . . Those who wish to be just to [it] . . . will pass . . . to the . . . equitable and conscientious, but by no means, indulgent, judgments of Mr. Finlay, Mr. Freeman, and Dean Stanley. One fact alone is sufficient to engage our deep interest in this race. It was Greeks [Hellenist Jews] and people imbued with Greek ideas who first welcomed Christianity. It was in their language that it first spoke to the world, and its first home was in Greek households and in Greek cities. It was in Greek [Hellenistic] atmosphere that the Divine Stranger from the East, in many respects so widely different from all that Greeks were accustomed to, first grew up to strength and shape; first showed its power of assimilating and reconciling; first showed what it was to be in human society. Its earliest nurslings were Greeks; Greeks [Hellenist Jews] first took in the meaning and measure of its amazing and eventful announcements; Greek sympathies first awoke and vibrated to its appeals; Greek obedience, Greek courage, Greek suffering first illustrated its new lessons. Had it not first gained over Greek mind and Greek belief, it is hard to see how it would have made its further way. . . . The Roman conquest of the world found the Greek race, and the Eastern nations which it had influenced, in a low and declining state—morally, socially, politically. The Roman Empire, when it fell, left them in the same discouraging condition, and suffering besides from the degradation and mischief wrought on all its subjects by its chronic and relentless fiscal oppression. . . . These were the men in whose childish conceit, childish frivolity, childish self-assertion, St. Paul saw such dangers to the growth of Christian manliness and to the unity of the Christian body—the idly curious and gossiping men of Athens; the vain and shamelessly ostentatious Corinthians, men in intellect, but in moral seriousness babes; the Ephesians, ‘like children carried away with every blast of vain teaching,’ the victims of every impostor, and sport of every deceit; the Cretans, proverbially, ‘ever liars, evil beasts, slow bellies;’ the passionate, volatile, Greek-speaking, Celts of Asia, the ‘foolish’ Galatians. . . . The Greek of the Roman times is portrayed in the special warnings of the Apostolic Epistles. After Apostolic times he is portrayed in the same way by the heathen satirist Lucian, and by the Christian preacher Chrysostom; and such, with all his bad tendencies, aggravated by almost uninterrupted misrule and oppression, the Empire, when it broke up, left him. The prospects of such a people, amid the coming storms, were dark. Everything, their gifts and versatility, as well as their faults, threatened national decay and disintegration. . . . These races whom the Empire of the Cæsars left like scattered sheep to the mercy of the barbarians, lived through a succession of the most appalling storms, and

kept themselves together, holding fast, resolute and unwavering, amid all their miseries and all their debasement, to the faith of their national brotherhood. . . . This, it seems to me, Christianity did for a race which had apparently lived its time, and had no future before it—the Greek race in the days of the Cæsars. It created in them, in a new and characteristic degree, national endurance, national fellowship and sympathy, national hope. . . . It gave them an Empire of their own, which, undervalued as it is by those familiar with the ultimate results of Western history, yet withstood the assaults before which, for the moment, Western civilisation sank, and which had the strength to last a life—a stirring and eventful life—of ten centuries. The Greek Empire, with all its evils and weaknesses, was yet in its time the only existing image in the world of a civilised state. . . . The lives of great men profoundly and permanently influence national character; and the great men of later Greek memory are saints. They belong to the people more than emperors and warriors; for the Church is of the people. . . . The mark which such men left on Greek society and Greek character has not been effaced to this day, even by the melancholy examples of many degenerate successors. . . . Why, if Christianity affected Greek character so profoundly, did it not do more? Why, if it cured it of much of its instability and trifling, did it not also cure it of its falsehood and dissimulation? Why, if it impressed the Greek mind so deeply with the reality of the objects of faith, did it not also check the vain inquisitiveness and spirit of disputatiousness and sophistry, which filled Greek Church history with furious wranglings about the most hopeless problems? Why, if it could raise such admiration for unselfishness and heroic nobleness, has not this admiration borne more congenial fruit? Why, if heaven was felt to be so great and so near, was there in real life such coarse and mean worldliness? Why, indeed? . . . Profoundly, permanently, as Christianity affected Greek character, there was much in that character which Christianity failed to reach, much that it failed to correct, much that was obstinately refractory to influences which, elsewhere, were so fruitful of goodness and greatness. The East, as well as the West, has still much to learn from that religion, which each too exclusively claims to understand, to appreciate, and to defend.”—R. W. Church, *The Gifts of Civilisation*, pp. 188-216.—“The types of character that were developed in the Eastern Church, as might be expected, were not of the very highest. There was among them no St. Francis, no St. Louis. The uniformity which pervades everything Byzantine prevented the development of such salient characters as are found in the West. It is difficult, no doubt, to form a true estimate of the influence of religion on men's lives in Eastern countries, just as it is of their domestic relations, and even of the condition of the lower classes, because such matters are steadily ignored by the contemporary historians. But all the evidence tends to show that individual rather than heroic piety was fostered by the system which prevailed there. That at certain periods a high tone of spirituality prevailed among certain classes is sufficiently proved by the beautiful hymns of the Eastern Church, many of which,

thanks to Dr. Neale's singular felicity in translation, are in use among ourselves. But the loftier development of their spirit took the form of asceticism, and the scene of this was rather the secluded monastery, or the pillar of the Stylite, than human society at large. But if the Eastern Church did not rise as high as her sister of the West, she never sank as low."—H. F. Tozer, *The Church and the Eastern Empire*, pp. 45-46.—"The Greek Church, or, as it calls itself, the Holy Orthodox, Catholic, Apostolic, Oriental Church, has a venerable if not an eventful history. Unlike the Church of the West, it has not been moulded by great political movements, the rise and fall of kingdoms, and the convulsions which have passed over the face of modern society. Its course has been out of the sight of European civilisation, it has grown up among peoples who have been but slightly affected, if they have been affected at all, by the progressive movements of mankind. It has no middle ages. It has no renaissance. It has no Reformation. It has given birth to no great universities and schools of learning. It has no Protestantism. It remains very much as the fourth and fifth centuries left it. . . . When the royal throne in the days of the first Christian Emperor was removed from Rome to Constantinople, there arose at once a cause of strife between the bishops of old and new Rome, as Byzantium or Constantinople was named. Each claimed pre-eminence, and each alternately received it from the governing powers in Church and State. One Council decreed (A. D. 381) that the Bishop of the new Rome should be inferior only to that of the old; another declared (A. D. 451) the equality of both prelates. The Patriarch of Constantinople at the close of the sixth century claimed superiority over all Christian Churches,—a claim which might have developed, had circumstances favoured it, into an Eastern Papacy. The assumption was, however, but short-lived, and the Bishop of Rome, Boniface, obtained from the Emperor Phocas in 606 the much-coveted position. The Eastern Church submitted, but from this time looked with a jealous eye on her Western sister. She noted and magnified every point of divergence between them. Differences or apparent differences in doctrine and ritual were denounced as heresies. Excommunications fulminated between the Eastern and Western city, and ecclesiastical bitterness was intensified by political intrigue. . . . In the ninth century the contest grew very fierce. The holder of the Eastern see, Photius, formulated and denounced the terrible doctrinal and other defections of the Western prelate and his followers. The list is very formidable. They, the followers of Rome, deemed it proper to fast on the seventh day of the week—that is on the Jewish Sabbath; in the first week of Lent they permitted the use of milk and cheese; they disapproved wholly of the marriage of priests; they thought none but bishops could anoint with the holy oil or confirm the baptized, and that they therefore anointed a second time those who had been anointed by presbyters; and fifthly, they had adulterated the Constantinopolitan Creed by adding to it the words Filioque, thus teaching that the Holy Spirit did not proceed only from the Father, but also from the Son. This last was deemed, and has always been deemed by the Greek Church the great

heresy of the Roman Church. . . . The Greek Church to-day in all its branches—in Turkey, Greece, and Russia—professes to hold firmly by the formulas and decisions of the seven Ecumenical or General Councils, regarding with special honour that of Nice. The Nicene and Athanasian Creeds are the symbols of its faith, the Filioque clause being omitted from the former, and the eighth article reading thus: 'And in the Holy Ghost, the Lord and Giver of life, who proceedeth from the Father, and with the Father and Son together is worshipped and glorified.' . . . The Greek Church, unlike the Latin, denounces the use of images as objects of devotion, and holds in abhorrence every form of what it terms 'image worship.' Its position in this manner is very curious. It is true, no figures of our Lord, of the Virgin, or saints, such as one sees in churches, wayside chapels, and in the open fields in countries where the Roman Church is powerful, are to be seen in Russia, Greece, or any of those lands where the Eastern Church is supreme. On the other hand, pictures of the plainest kind everywhere take their place, and are regarded with the deepest veneration."—J. C. Lees, *The Greek Church (in the Churches of Christendom)*, lect. 4.—See, also, FILIOQUE CONTROVERSY.

A. D. 337-476.—The fall of Imperial Rome.—The rise of Ecclesiastical Rome.—The political and religious history of the Empire from the death of Constantine is so fully narrated under Rome that mere mention here of a few events will suffice, viz.: the revival of Paganism under the Emperor Julian; the reascendency of Christianity; the formal establishment of Christianity as the religion of the Romans, by the suffrages of the senate; the final division of the Empire into East and West between the sons of Theodosius; the three sieges and the sacking of Rome by Alaric; the legal separation of the Eastern and Western Empires; the pillage of Rome by the Vandals and its final submission to the barbarians. See **ROME: A. D. 337-361**, to 445-476. For an account of the early bishops of Rome, see **PAPACY**. "A heathen historian traces the origin of the calamities which he records to the abolition of sacrifice by Theodosius, and the sack of Rome to the laws against the ancient faith passed by his son. This objection of the heathens that the overthrow of idolatry and the ascendancy of Christianity were the cause of the misfortunes of the empire was so wide spread, and had such force with those, both Pagans and Christians, who conceived history to be the outcome of magical or demonic powers, that Augustine devoted twelve years of his life to its refutation. His treatise, 'De Civitate Dei,' was begun in 413, and was not finished till 426, within four years of his death. Rome had once been taken; society, consumed by inward corruption, was shaken to its foundations by the violent onset of the Teutonic tribes; men's hearts were failing them for fear; the voice of calumny cried aloud, and laid these woes to the charge of the Christian faith. Augustine undertook to refute the calumny, and to restore the courage of his fellow-Christians. Taking a rapid survey of history, he asks what the gods had ever done for the well-being of the state or for public morality. He maintains that the greatness of Rome in the past was due to the virtues of her sons, and not to the protection of the gods. He shows that,

long before the rise of Christianity, her ruin had begun with the introduction of foreign vices after the destruction of Carthage, and declares that much in the ancient worship, instead of preventing, had hastened that ruin. He rises above the troubles of the present, and amid the vanishing glories of the city of men he proclaims the stability of the city of God. At a time when the downfall of Rome was thought to presage approaching doom, Augustine regarded the disasters around him as the birth-throes of a new world, as a necessary moment in the onward movement of Christianity."—W. Stewart, *The Church of the 4th and 5th Centuries* (St. Giles' Lectures, 4th series).—"There is as little ground for discovering a miraculous, as there is for disowning a providential element in the course of events. The institutions of Roman authority and law had been planted regularly over all the territory which the conquering hordes coveted and seized; alongside of every magistrate was now placed a minister of Christ, and by every Hall of Justice stood a House of Prayer. The Representative of Cæsar lost all his power and dignity when the armies of Cæsar were scattered in flight; the minister of Christ felt that behind him was an invisible force with which the hosts of the alien could not cope, and his behaviour impressed the barbarian with the conviction that there was reality here. That beneficent mission of Leo, A. D. 452, of which Gibbon says: 'The pressing eloquence of Leo, his majestic aspect and sacerdotal robes, excited the veneration of Attila for the spiritual father of the Christians'—would be but an instance of what many nameless priests from provincial towns did, 'not counting their lives dear to them.' The organisation of the Latin state vitalised by a new spiritual force vanquished the victors. It was the method and the discipline of this organisation, not the subtlety of its doctrine, nor the fervour of its officials, that beat in detail one chief with his motley following after another. Hence too it came about that the Christianity which was adopted as the religion of Europe was not modified to suit the tastes of the various tribes that embraced it, but was delivered to each as from a common fountain-head. . . . It was a social triumph, proceeding from religious motives which we may regard with unstinted admiration and gratitude."—J. Watt, *The Latin Church* (St. Giles' Lectures, 4th series).—"The temporal fall of the Imperial metropolis tended to throw a brighter light upon her ecclesiastical claims. The separation of the East and the West had already enhanced the religious dignity of the ancient capital. The great Eastern patriarchates of Antioch, Alexandria, and Jerusalem had up to that time all held themselves equal, if not superior to Rome. Constantinople had even assumed certain airs of supremacy over all. The General Councils which had defined the Faith at Nicæa and Constantinople had been composed almost wholly of Orientals. The great Doctors of the Church, the men who had defended or diffused the common Faith, had been mostly Greeks by origin and language. None had been Romans, and it was rarely, till the fourth century, that any of them had written in the Latin tongue. When Athanasius, exiled from Alexandria, came to Italy and Gaul, it was three years before he could learn enough of the language of the West to address its congregations in public. But this

curious fact shows that the Western Christians were now no longer the little Greek colony of the first and second centuries. Christianity had become the national religion of the native races. The Romans might now feel that they were becoming again a people; that their glorious career was assuming, as it were, a new point of departure. . . . For at this moment the popular instinct could not fail to perceive how strongly the conscience of the barbarians had been affected by the spiritual majesty of Christian Rome. The Northern hordes had beaten down all armed resistance. They had made a deep impression upon the strength of the Eastern Empire; they had, for a moment at least, actually overcome the Western; they had overrun many of the fairest provinces, and had effected a permanent lodgement in Gaul and Spain, and still more recently in Africa. Yet in all these countries, rude as they still were, they had submitted to accept the creed of the Gospel. There was no such thing as a barbarian Paganism established within the limits of the Empire anywhere, except perhaps in furthest Britain."—C. Merivale, *Four lectures on some Epochs of Early Church History*, pp. 130-136.—"When the surging tides of barbarian invasion swept over Europe, the Christian organization was almost the only institution of the past which survived the flood. It remained as a visible monument of what had been, and, by so remaining, was of itself an antithesis to the present. The chief town of the Roman province, whatever its status under barbarian rule, was still the bishop's see. The limits of the old 'province,' though the boundary of a new kingdom might bisect them, were still the limits of his diocese. The bishop's tribunal was the only tribunal in which the laws of the Empire could be pleaded in their integrity. The bishop's dress was the ancient robe of a Roman magistrate. The ancient Roman language which was used in the Church services was a standing protest against the growing degeneracy of the 'vulgar tongue.' . . . As the forces of the Empire became less and less, the forces of the Church became more and more. The Churches preserved that which had been from the first the secret of Imperial strength. For underneath the Empire which changed and passed, beneath the shifting pageantry of Emperors who moved across the stage and were seen no more, was the abiding empire of law and administration,—which changed only as the deep sea changes beneath the windswept waves. That inner empire was continued in the Christian Churches. In the years of transition from the ancient to the modern world, when all civilized society seemed to be disintegrated, the confederation of the Christian Churches, by the very fact of its existence upon the old imperial lines, was not only the most powerful, but the only powerful organization in the civilized world. It was so vast, and so powerful, that it seemed to be, and there were few to question its being, the visible realization of that Kingdom of God which our Lord Himself had preached."—E. Hatch, *The Organization of the Christian Churches*, pp. 160-178.

A. D. 347-412.—The Syrian Churches.—"St. Chrysostom was born there A. D. 347; and it was in his time that Antioch, with its hundred thousand Christians, became the leading Church in Asia, especially in the Arian controversy [see **ARIANISM**], for Arianism was very prevalent

there. But all this lies outside our period. The so-called 'School of Antioch' has its origin just before . . . our period [311, Wilsch]. Dorotheus, . . . and the martyr Lucian may be regarded as its founders. In contrast to the allegorising mysticism of the School of Alexandria, it was distinguished by a more sober and critical interpretation of Scripture. It looked to grammar and history for its principles of exegesis. But we must not suppose that there was at Antioch an educational establishment like the Catechetical School at Alexandria, which, by a succession of great teachers, kept up a traditional mode of exegesis and instruction. It was rather an intellectual tendency which, beginning with Lucian and Dorotheus, developed in a definite direction in Antioch and other Syrian Churches. . . . These notices of the Churches of Jerusalem, Cæsarea in Palestine, and Antioch must suffice as representative of the Syrian Churches. The number of these Churches was considerable even in the second century, and by the beginning of the fourth was very large indeed, as is seen by the number of bishops who attend local Councils."—A. Plummer, *The Church of the Early Fathers*, ch. 3.—"It has often astonished me that no one has ever translated the letters of St. Jerome. The letters of St. Augustine have been translated, and are in many parts very entertaining reading, but they are nothing in point of living interest when compared with St. Jerome's. These letters illustrate life about the year 400 as nothing else can. They show us, for instance, what education then was, what clerical life consisted in; they tell us of modes and fashions, and they teach us how vigorous and constant was the communication at that same period between the most distant parts of the Roman empire. We are apt to think of the fifth century as a time when there was very little travel, and when most certainly the East and West—Ireland, England, Gaul and Palestine—were much more widely and completely separated than now, when steam has practically annihilated time and space. And yet such an idea is very mistaken. There was a most lively intercourse existing between these regions, a constant Church correspondence kept up between them, and the most intense and vivid interest maintained by the Gallic and Syrian churches in the minutest details of their respective histories. Mark now how this happened. St. Jerome at Bethlehem was the centre of this intercourse. His position in the Christian world in the beginning of the fifth century can only be compared to, but was not at all equalled by, that of John Calvin at the time of the Reformation. Men from the most distant parts consulted him. Bishops of highest renown for sanctity and learning, like St. Augustine, and Exuperius of Toulouse in southern France, deferred to his authority. The keen interest he took in the churches of Gaul, and the intimate knowledge he possessed of the most petty local details and religious gossip therein, can only be understood by one who has studied his very abusive treatise against Vigilantius or his correspondence with Exuperius. . . . But how, it may be asked, was this correspondence carried on when there was no postal system? Here it was that the organization of monasticism supplied a want. Jerome's letters tell us the very name of his postman. He was a monk named Sysinnius. He was perpetually on the road between Mar-

seilles and Bethlehem. Again and again does Jerome mention his coming and his going. His appearance must indeed have been the great excitement of life at Bethlehem. Travelling probably via Sardinia, Rome, Greece, and the islands of the Adriatic, he gathered up all kinds of clerical news on the way—a piece of conduct on his part which seems to have had its usual results. As a tale-bearer, he not only revealed secrets, but also separated chief friends, and this monk Sysinnius with his gossips seems to have been the original cause of the celebrated quarrel between Augustine and Jerome."—G. T. Stokes, *Ireland and the Celtic Church*, pp. 170 172.

A. D. 496-800.—The Frankish Church to the Empire of Charlemagne.—"The baptism of Chlodovech [Clovis—see FRANKS: A. D. 481-511] was followed by the wholesale conversion of the Franks. No compulsion was used to bring the heathen into the Church. As a heathen, Chlodovech had treated the Church with forbearance; he was equally tolerant to heathenism when he was a Christian. But his example worked, and thousands of noble Franks crowded to the water of regeneration. Gregory of Tours reckons the Franks as Christians after the baptism of their king, which took place at Christmas, A. D. 496. His conversion made no alteration in the policy and conduct of Chlodovech; he remained the same mixture of cunning and audacity, of cruelty and sensuality, that he was before. . . . But, though his baptism was to him of no moral import, its consequences were wide spreading. When Gregory of Tours compares the conversion of Chlodovech with that of Constantine the Great, he was fully in the right. . . . And the baptism of Chlodovech declared to the world that the new blood being poured into the veins of the old and expiring civilization, had been quickened by the same elements, and would unite with the old in the new development. . . . That many of those who were baptized carried with them into their new Christianity their old heathen superstitions as well as their barbarism is certain; and the times were not those in which the growth of the great Christian graces was encouraged; the germs, however, of a new life were laid."—S. Baring-Gould, *The Church in Germany*, ch. 3.—"The details of the history of the Merovingian period of Frankish history are extraordinarily complicated; happily, it is not at all necessary for our purpose to follow them. . . . In the earlier years after the conquest, all ranks of the clergy were filled by Gallo-Romans. The Franks were the dominant race, and were Christian, but they were new converts from a rude heathenism, and it would take some generations to raise up a 'native ministry' among them. Not only the literature of the (Western) Church, but all its services, and, still more, the conversational intercourse of all civilized and Christian people, was in Latin. Besides, the Franks were warriors, a conquering caste, a separate nation; and to lay down the battle-axe and spear, and enter into the peaceful ranks of the Romano-Gallic Church, would have seemed to them like changing their nationality for that of the more highly cultured, perhaps, but, in their eyes, subject race. The Frank kings did not ignore the value of education. Clovis is said to have established a Palatine school, and encouraged his young men to qualify themselves for the positions which his conquests had opened out

to them. His grandsons, we have seen, prided themselves on their Latin culture. After a while, Franks aspired to the magnificent positions which the great sees of the Church offered to their ambition; and we find men with Teutonic names, and no doubt of Teutonic race, among the bishops. . . . For a still longer period, few Franks entered into the lower ranks of the Church. Not only did the priesthood offer little temptation to them, but also the policy of the kings and nobles opposed the diminution of their military strength, by refusing leave to their Franks to enter into holy orders or into the monasteries. The cultured families of the cities would afford an ample supply of men for the clergy, and promising youths of a lower class seem already not infrequently to have been educated for the service of the Church. It was only in the later period, when some approach had been made to a fusion of the races, that we find Franks entering into the lower ranks of the Church, and simultaneously we find Gallo-Romans in the ranks of the armies. . . . Monks wielded a powerful spiritual influence. But the name of not a single priest appears in the history of the times as exercising any influence or authority. . . . Under the gradual secularization of the Church in the Merovingian period, the monasteries had the greatest share in keeping alive a remnant of vital religion among the people; and in the gradual decay of learning and art, the monastic institution was the ark in which the ancient civilization survived the deluge of barbarism, and emerged at length to spread itself over the modern world."—E. L. Cutts, *Charlemagne*, ch. 5 and 7.—"Two Anglo-Saxon monks, St. Wilfrid, bishop of York, and St. Willibrord undertook the conversion of the savage fishermen of Friesland and Holland at the end of the seventh and beginning of the eighth century; they were followed by another Englishman, the most renowned of all these missionaries, Winfrith, whose name was changed to Boniface, perhaps by the Pope, in recognition of his active and beneficent apostleship. When Gregory II. appointed him bishop of Germany (723), he went through Bavaria and established there the dioceses of Frisingen, Passau, and Ratisbon. When Pope Zacharias bestowed the rank of metropolitan upon the Church of Mainz in 748, he entrusted its direction to St. Boniface, who from that time was primate, as it were, of all Germany, under the authority of the Holy See. St. Boniface was assassinated by the Pagans of Friesland in 755."—V. Duruy, *Hist. of the Middle Ages*, bk. 3, ch. 8.—"Boniface, whose original name was Winfrid, was of a noble Devonshire family (A. D. 680), educated at the monastery of Nutcell, in Hampshire, and at the age of thirty-five years had obtained a high reputation for learning and ability, when (in A. D. 716), seized with the prevalent missionary enthusiasm, he abandoned his prospects at home, and set out with two companions to labour among the Frisians. . . . Winfrid was refused permission by the Duke to preach in his dominions, and he returned home to England. In the following spring he went to Rome, where he remained for some months, and then, with a general authorization from the pope to preach the gospel in Central Europe, he crossed the Alps, passed through Bavaria into Thuringia, where he began his work. While here the death of Radbod,

A. D. 719, and the conquest of Frisia by Charles Martel, opened up new prospects for the evangelization of that country, and Boniface went thither and laboured for three years among the missionaries, under Willibrord of Utrecht. Then, following in the track of the victorious forces of Charles Martel, he plunged into the wilds of Hessa, converted two of its chiefs whose example was followed by multitudes of the Hessians and Saxons, and a monastery arose at Amöneburg as the head-quarters of the mission. The Bishop of Rome being informed of this success, summoned Boniface to Rome, A. D. 723, and consecrated him a regency bishop, with a general jurisdiction over all whom he should win from paganism into the Christian fold, requiring from him at the same time the oath which was usually required of bishops within the patriarchate of Rome, of obedience to the see. . . . Boniface was not only a zealous missionary, an earnest preacher, a learned scholar, but he was a statesman and an able administrator. He not only spread the Gospel among the heathen, but he organized the Church among the newly converted nations of Germany; he regulated the disorder which existed in the Frankish Church, and established the relations between Church and State on a settled basis. The mediæval analysts tell us that Boniface crowned Pepin king, and modern writers have usually reproduced the statement. 'Rettberg, and the able writer of the biography of Boniface in Herzog (Real Ecyk, s. v.), argue satisfactorily from Boniface's letters that he took no part in Pepin's coronation.' When Boniface withdrew from the active supervision of the Frankish Churches, it is probable that his place was to some extent supplied in the councils of the mayor and in the synods of the Church by Chrodegang, Bishop of Metz, a man whose character and influence in the history of the Frank Church have hardly hitherto been appreciated."—E. L. Cutts, *Charlemagne*, ch. 12.—"Both Karlmann and Pippin tried to reform certain abuses that had crept into the Church. Two councils, convoked by Karlmann, the one in Germany (742), the other in the following year at Lestines (near Charleroi, in Belgium), drew up decrees which abolished superstitious rites and certain Pagan ceremonies, still remaining in force; they also authorized grants of Church lands by the 'Prince' for military purposes on condition of a payment of an annual rent to the Church; they reformed the ecclesiastical life, forbade the priests to hunt or to ride through the woods with dogs, falcons, or sparrow-hawks; and, finally, made all priests subordinate to their diocesan bishops, to whom they were obliged to give account each year of their faith and their ministry—all of which were necessary provisions for the organization of the ecclesiastical hierarchy and for the regulation of church government. Similar measures were taken by the Council of Soissons, convoked by Pippin in 744. In 747, Karlmann renounced the world and retired to the celebrated Italian monastery of Monte Cassino. As he left he entrusted his children to the care of their uncle, Pippin, who robbed them of their inheritance and ruled alone over the whole Frankish Empire. . . . Charlemagne enlarged and completed the work which had only been begun by Charles Martel and Pippin. . . . The Middle Ages acknowledged two Masters, the Pope and the Emperor, and these

two powers came, the one from Rome, and the other from Austrasian France. . . . The mayors of Austrasia, Pippin of Heristal, and Charles Martel, rebuilt the Frankish monarchy and prepared the way for the empire of Charlemagne; . . . the Roman pontiffs . . . gathered around them all the churches of the West, and placed themselves at the head of the great Catholic society, over which one day Gregory VII. and Innocent III. should claim to have sole dominion."—V. DUBUY, *Hist. of the Middle Ages*, pp. 119-122, 108.—See MAYORS OF THE PALACE; FRANKS; A. D. 768-814; and PAPACY; A. D. 755-774, and 774.—The coronation of Charlemagne at Rome by Pope Leo III. (see ROMAN EMPIRE, A. D. 800) gave the Western Church the place in the state it had held under the earlier Roman emperors. The character of so great a man, the very books he read and all that fed the vigorous ideal element in so powerful a spirit are worthy of interest; for this at least he sought to accomplish—to give order to a tumultuous and barbarian world, and to establish learning, and purify the church: "While at table, he liked to hear a recital or a reading, and it was histories and the great deeds of past times which were usually read to him. He took great pleasure, also, in the works of St. Augustine, and especially in that whose title is 'De Civitate Dei.' . . . He practiced the Christian religion in all its purity and with great fervour, whose principles had been taught him from his infancy. . . . He diligently attended . . . church in the evening and morning, and even at night, to assist at the offices and at the holy sacrifice, as much as his health permitted him. He watched with care that nothing should be done but with the greatest propriety, constantly ordering the guardians of the church not to allow anything to be brought there or left there inconsistent with or unworthy of the sanctity of the place. . . . He was always ready to help the poor, and it was not only in his own country, or within his own dominions that he dispensed those gratuitous liberalities which the Greeks call 'alms,' but beyond the seas—in Syria, in Egypt, in Africa, at Jerusalem, at Alexandria, at Carthage, everywhere where he learned that Christians were living in poverty—he pitied their misery and loved to send them money. If he sought with so much care the friendship of foreign sovereigns, it was, above all, to procure for the Christians living under their rule help and relief. Of all the holy places, he had, above all, a great veneration for the Church of the Apostle St. Peter at Rome."—Eginhard, *Life of Charlemagne*.—"The religious side of Charles' character is of the greatest interest in the study of his remarkable character as a whole and his religious policy led to the most important and durable results of his reign. He inherited an ecclesiastical policy from his father; the policy of regulating and strengthening the influence of the Church in his dominions as the chief agent of civilization, and a great means of binding the various elements of the empire into one; the policy of accepting the Bishop of Rome as the head of Western Christianity, with patriarchal authority over all its Churches."—E. L. CUTTS, *Charlemagne*, ch. 23.—The following is a noteworthy passage from Charlemagne's Capitulary of 787: "It is our wish that you may be what it behoves the soldiers of the church to be,—religious in heart, learned in discourse, pure in

act, eloquent in speech; so that all who approach your house in order to invoke the Divine Master, or to behold the excellence of the religious life, may be edified in beholding you, and instructed in hearing you discourse or chant, and may return home rendering thanks to God most High. Fail not, as thou regardest our favour, to send a copy of this letter to all thy suffragans and to all the monasteries; and let no monk go beyond his monastery to administer justice or to enter the assemblies and the voting-places. Adieu."—J. B. MULLINGER, *The Schools of Charles the Great*.

5th-7th Centuries.—The Nestorian, Monophysite and Monothelite Controversies. See NESTORIAN AND MONOPHYSITE, and MONOTHELITE.

5th-9th Centuries.—The Irish Church and its missions.—The story of the conversion of Ireland by St. Patrick, and of the missionary labors of the Church which he founded, is briefly told elsewhere—see IRELAND: 5th-8th CENTURIES. "The early Church worked her way, in the literal sense of the word, 'underground,' under camp and palace, under senate and forum. But turn where we will in these Celtic missions, we notice how different were the features that marked them now. In Dalaradia St. Patrick obtains the site of his earliest church from the chieftain of the country, Dichu. At Tara, he obtains from King Laoghaire a reluctant toleration of his ministry. In Connaught he addresses himself first to the chieftains of Tirawley, and in Munster baptizes Angus, the king, at Cashel, the seat of the kings. What he did in Ireland reproduces itself in the Celtic missions of Wales and Scotland, and we cannot but take note of the important influence of Welsh and Pictish chiefs. . . . 'The people may not have adopted the actual profession of Christianity, which was all perhaps that in the first instance they adopted from any clear or intelligent appreciation of its superiority to their former religion. But to obtain from the people even an actual profession of Christianity was an important step to ultimate success. It secured toleration at least for Christian institutions. It enabled the missionaries to plant in every tribe their churches, schools, and monasteries, and to establish among the half pagan inhabitants of the country societies of holy men, whose devotion, usefulness, and piety soon produced an effect on the most barbarous and savage hearts.'"—G. F. MACLEAR, *Conversion of the West: The Celts*, ch. 11.—"The Medieval Church of the West found in the seventh century an immense task before it to fulfil. . . . The missionaries who addressed themselves to the enormous task of the conversion of Germany may be conveniently divided into three groups—the British, the Frankish, and, entering somewhat later into an honourable rivalry with these, the Anglo-Saxon. A word or two upon each of these groups. The British—they include Irish and Scotch—could no longer find a field for the exercise of their ministry in England, now that there the Roman rule and discipline, to which they were so little disposed to submit, had everywhere won the day. Their own religious houses were full to overflowing. At home there was little for them to do, while yet that divine hunger and thirst for the winning of souls, which had so possessed the heart of St. Patrick, lived on in theirs. To these so minded, pagan Germany offered a welcome field of

labour, and one in which there was ample room for all. Then there were the Frankish missionaries, who enjoyed the support of the Frankish kings, which sometimes served them in good stead; while at other times this protection was very far from a recommendation in their eyes who were easily persuaded to see in these missionaries the emissaries of a foe. Add to these the Anglo-Saxons; these last, mindful of the source from which they had received their own Christianity, making it a point to attach their converts to Rome, even as they were themselves bound to her by the closest ties. The language which these spoke—a language which as yet can have diverged very little from the Low German of Frisia, must have given to them many facilities which the Frankish missionaries possessed in a far slighter degree, the British not at all; and this may help to account for a success on their parts far greater than attended the labours of the others. To them too it was mainly due that the battle of the Creeds, which had been fought and lost by the Celtic missionaries in England, and was presently renewed in Germany, had finally the same issues there as in England. . . . At the same time, there were differences in the intensity and obstinacy of resistance to the message of truth, which would be offered by different tribes. There was ground, which at an early day had been won for the Gospel, but which in the storms and confusion of the two preceding centuries had been lost again; the whole line, that is, of the Danube and the Rhine, regions fair and prosperous once, but in every sense wildernesses now. In these we may note a readier acceptance of the message than found place in lands which in earlier times that message had never reached; as though obscure reminiscences and traditions of the past, not wholly extinct, had helped to set forward the present work.”—R. C. Trench, *Lectures on Medieval Church History*, lect. 5.—“From Ireland came Gallus, Fridolin, Kilian, Trutbert and Levin. . . . The order in which these men succeeded one another cannot always be established, from the uncertainty of the accounts. We know thus much, that of all those above-mentioned, Gallus was the first, for his labours in Helvetia (Switzerland) were continued from the preceding into the period of which we are now treating. On the other hand, it is uncertain as to Fridolin whether he had not completed his work before Gallus, in the sixth century, for in the opinion of some he closed his career in the time of Clodoveus I., but, according to others, he is said to have lived under Clodoveus II., or at another period. His labours extended over the lands on the Moselle, in the Vosges Mountains, over Helvetia, Rætia and Nigra Silva (the Black Forest). He built the monastery of Sekkinga on the Rhine. Trutbert was a contemporary and at the same time a countryman of Gallus. His sphere of action is said to have been Brisgovia (Breisgau) and the Black Forest. Almost half a century later Kilian proclaimed the gospel in Franconia and Wirtzburg, with two assistants, Colonatus and Totnanus. In the latter place they converted duke Gozbert, and were put to death there in 688. After the above mentioned missionaries from Ireland, in the seventh century, had built churches and monasteries in the southern Germany, the missionaries from Britain repaired with a similar purpose, to the northern countries.

. . . Men from other nations, as Willericus, bishop of Brema, preached in Transalbingia at the beginning of the ninth century. Almost all the missionaries from the kingdom of the Franks selected southern Germany as their sphere of action: Emmeran, about 649, Ratisbona, Rudbert, about 696, Bajoaria (Bavaria), Corbinian the country around Frisinga, Othbert the Breisgau and Black Forest, and Pirminius the Breisgau, Bajoaria, Franconia, Helvetia, and Alsatis.”—J. E. T. Wilsch, *Handbook of the Geography and Statistics of the Church*, v. 1, pp. 365–367.

A. D. 553–800.—The Western Church.—Rise of the Papacy.—“Though kindly treated, the Church of Rome did not make any progress under the Ostrogoths. But when their power had been broken (553), and Rome had been placed again under the authority of the Emperor of Constantinople [see **ROME: A. D. 535–553**], the very remoteness of her new master insured to the Church a more prosperous future. The invasion of the Lombards drove a great many refugees into her territory, and the Roman population showed a slight return of its old energy in its double hatred toward them, as barbarians and as Arians. . . . It was at this favorable point in the state of affairs, though critical in some respects, that Gregory the Great made his appearance (590–604). He was a descendant of the noble Anicia family, and added to his advantages of birth and position the advantages of a well-endowed body and mind. He was prefect of Rome when less than thirty years old, but after holding this office a few months he abandoned the honors and cares of worldly things for the retirement of the cloister. His reputation did not allow him to remain in the obscurity of that life. Toward 579 he was sent to Constantinople by Pope Pelagius II. as secretary or papal nuncio, and he rendered distinguished services to the Holy See in its relations with the Empire and in its struggles against the Lombards. In 590 the clergy, the senate, and the people raised him with one accord to the sovereign pontificate, to succeed Pelagius. As it was still necessary for every election to be confirmed by the Emperor at Constantinople, Gregory wrote to him to beg him not to sanction this one; but the letter was intercepted and soon orders arrived from Maurice ratifying the election. Gregory hid himself, but he was discovered and led back to Rome. When once Pope, though against his will, he used his power to strengthen the papacy, to propagate Christianity, and to improve the discipline and organization of the Church. . . . Strengthened thus by his own efforts, he undertook the propagation of Christianity and orthodoxy both within and without the limits of the old Roman Empire. Within those limits there were still some who clung to paganism, in Sicily, Sardinia, and even at the very gates of Rome, at Terracina, and doubtless also in Gaul, as there is a constitution of Childebert still extant dated 554, and entitled: ‘For the abolition of the remains of idolatry.’ There were Arians very near to Rome—namely, the Lombards; but through the intervention of Theudalinda, their queen, Gregory succeeded in having Adelwald, the heir to the throne, brought up in the Catholic faith; as early as 587 the Visigoths in Spain, under Reccared, were converted. . . . The Roman Empire had perished, and the barbarians had built upon its ruins many slight structures that

were soon overthrown. Not even had the Franks, who were destined to be perpetuated as a nation, as yet succeeded in founding a social state of any strength; their lack of experience led them from one attempt to another, all equally vain; even the attempt of Charlemagne met with no more permanent success. In the midst of these successive failures one institution alone, developing slowly and steadily through the centuries, following out the spirit of its principles, continued to grow and gain in power, in extent and in unity. . . . The Pope had now become, in truth, the ruler of Christendom. He was, however, still a subject of the Greek Emperor; but a rupture was inevitable, as his authority, on the one hand, was growing day by day, and the emperor's on the contrary, was declining."—V. Duruy, *Hist. of the Middle Ages*, pp. 114–115, 108–109, 117.—"The real power which advanced the credit of the Roman see during these ages was the reaction against the Byzantine despotism over the Eastern Church; and this is the explanation of the fact that although the new map of Europe had been marked out, in outline at least, by the year 500, the Roman see clung to the eastern connection until the first half of the eighth century. . . . In the political or diplomatic struggle between the Church and the Emperors, in which the Emperors endeavored to make the Church subservient to the imperial policy, or to adjust the situation to the necessities of the empire, and the Church strove to retain its autonomy as a witness to the faith and a legislator in the affairs of religion, the Bishop of Rome became, so to speak, the constitutional head of the opposition; and the East was willing to exalt his authority, as a counterpoise to that of the Emperor, to any extent short of acknowledging that the primacy implied a supremacy."—J. H. Egar, *Christendom: Ecclesiastical and Political, from Constantine to the Reformation*, p. 99.—"The election system was only used for one degree of the ecclesiastical dignitaries, for the bishopric. The lower dignitaries were chosen by the bishop. They were divided into two categories of orders—the higher and the lower orders. There were three higher orders, namely, the priests, the deacons, and the sub-deacons, and four lower orders, the acolytes, the doorkeepers, the exorcists, and the readers. The latter orders were not regarded as an integral part of the clergy, as their members were the servants of the others. As regards the territorial divisions, the bishop governed the diocese, which at a much later date was divided into parishes, whose spiritual welfare was in the hands of the parish priest or curate (curio). The parishes, taken together, constituted the diocese; the united dioceses, or suffragan bishoprics, constituted the ecclesiastical province, at whose head stood the metropolitan or archbishop. When a provincial council was held, it met in the metropolis and was presided over by the metropolitan. Above the metropolitans were the Patriarchs, in the East, and the Primates in the West, bishops who held the great capitals or the apostolic sees, Constantinople, Alexandria, Antioch, Rome, Jerusalem, Cesarea in Cappadocia, Carthage in Africa, and Heraclius in Thrace; among them Rome ranked higher by one degree, and from this supreme position exercised a supreme authority acknowledged by all the Church."—V. Duruy, *Hist. of the Middle Ages*, pp. 109–110.—

"The divergence of the two Churches, Eastern and Western, was greater in reality than it appears to be from a superficial view. It was based on essential variations in the character and disposition of the people in the East and in the West, on the nature of their civilization, and on the different, almost antagonistic, development of the Christian idea in one Church and in the other. . . . The Eastern Church rejoiced in its direct affiliation with apostolic times, in its careful preservation of traditions, and was convinced of its especial right to be considered the true heir and successor of Christ. . . . The letter of the law superseded the spirit; religion stiffened into formalism; piety consisted in strict observance of ceremonial rites; external holiness replaced sincere and heartfelt devotion. . . . Throughout the West the tendency was in a contrary direction—towards the practical application of the religious idea. The effete, worn-out civilization of the past was there renovated by contact and admixture with young and vigorous races, and gained new strength and vitality in the struggle for existence. The Church, freed from control, became independent and self-asserting; the responsibility of government, the preservation of social order, devolved upon it, and it rose proudly to the task."—A. F. Heard, *The Russian Church and Russian Dissent*, pp. 6–10.—"On the overthrow of the Western Empire, and the demonstration, rendered manifest to all, that with the complete triumph of the new world of secular politics a new spiritual development, a new phase of Divine guidance, was opening, the conscience of the believers was aroused to a sense of the sinfulness of their cowardly inactivity. 'Go ye into all nations, and baptize them,' had been the last words of their blessed Master. . . . It is to this new or revived missionary spirit which distinguished the sixth century, of which I would place Pope Gregory the First, or the Great, as the central figure, that I desire now to introduce you. Remember that the Empire, which had represented the unity of mankind, had become disintegrated and broken into fragments. Men were no longer Romans, but Goths and Sueves, Burgundians and Vandals, and beyond them Huns, Avars, Franks, and Lombards, some with a slight tincture of Christian teaching, but most with none. . . . Let but the Gospel be proclaimed to all, and leave the issue in God's hands! Such was the contrast between the age of Leo and the age of Gregory! . . . The conversion of Clovis and the Franks is, I suppose, the earliest instance of a Christian mission carried out on a national scale by the common action of the Church represented by the Pope and See of Rome. It becomes accordingly a great historical event, deserving the earnest consideration not of Churchmen only, but of all political enquirers."—C. Merivale, *Four Lectures on some Epochs of Early Church Hist.*, pp. 172–177.—"Christianity thus renewed its ardor for proselytism, and Gregory contributed to its success most wisely by enjoining precepts of moderation upon his missionaries, and by the skillful manner in which he made the transition to Catholicism easy to the pagans; he wrote to Augustine: 'Be careful not to destroy the pagan temples; it is only necessary to destroy the idols, then to sprinkle the edifice with holy water, and to build altars and place relics there. If the temples are well built, it is a wise and useful

thing for them to pass from the worship of demons to the worship of the true God; for while the nation sees its old places of worship still standing, it will be the more ready to go there, by force of habit, to worship the true God.' In the interior Gregory succeeded in arranging the different degrees of power in the Church, and in forcing the recognition of the supreme power of the Holy See. We find him granting the title of Vicar of Gaul to the bishop of Arles, and corresponding with Augustine, archbishop of Canterbury, in regard to Great Britain, with the archbishop of Seville in regard to Spain, with the archbishop of Thessalonica in regard to Greece, and, finally, sending legates 'a latere' to Constantinople. In his Pastoral, which he wrote on the occasion of his election, and which became an established precedent in the West, he prescribed to the bishops their several duties, following the decisions of many councils. He strengthened the hierarchy by preventing the encroachments of the bishops upon one another: 'I have given to you the spiritual direction of Britain,' he wrote to the ambitious Augustine, 'and not that of the Gauls.' He rearranged the monasteries, made discipline the object of his vigilant care, reformed Church music, and substituted the chant that bears his name for the Ambrosian chant, 'which resembled,' according to a contemporary, 'the far-off noise of a chariot rumbling over pebbles.' Rome, victorious again with the help of Gregory the Great, continued to push her conquests to distant countries after his death."—V. Duruy, *Hist. of the Middle Ages*, p. 116.—See, above: A. D. 496-800, and **ROME**: A. D. 590-640.

A. D. 597-800.—The English Church.—"It seems right to add a word of caution against the common confusion between the British Church and the English Church. They were quite distinct, and had very little to do with one another. To cite the British bishops at the Councils of Arles and Rimini as evidence of the antiquity of the English Church is preposterous. There was then no England; and the ancestors of English Churchmen were heathen tribes on the continent. The history of the Church of England begins with the episcopate of Archbishop Theodore (A. D. 668), or at the very earliest with the landing of Augustine (A. D. 597). By that time the British Church had been almost destroyed by the heathen English. . . . Bede tells us that down to his day the Britons still treated English Christians as pagans."—A. Plummer, *The Church of the Early Fathers*, ch. 8.—"About the year 580, in the pontificate of Pelagius, Gregory occupied the rank of a deacon among the Roman clergy. He was early noted for his zeal and piety; coming into large possessions, as an offshoot of an ancient and noble family, he had expended his wealth in the foundation of no less than seven monasteries, and had become himself the abbot of one of them, St. Andrew's, at Rome. Devoted as he was from the first to all the good works to which the religious profession might best apply itself, his attention was more particularly turned to the cause of Christian missions by casually remarking a troop of young slaves exhibited for sale in the Roman market. Struck with the beauty or fresh complexion of these strangers, he asked whether they were Christians or Pagans. They were Pagans, it was replied. How sad, he exclaimed, that such

fair countenances should lie under the power of demons. 'Whence came they?'—'From Anglia.'—'Truly they are Angels. What is the name of their country?'—'Deira.'—'Truly they are subject to the wrath of God: ira Dei. And their king?'—'Is named Ælla.'—'Let them learn to sing Allelujah.' Britain had lately fallen under the sway of the heathen Angles. Throughout the eastern section of the island, the faith of Christ, which had been established there from early times, had been, it seems, utterly extirpated. The British church of Lucius and Albanus still lingered, but was chiefly confined within the ruder districts of Cornwall, Wales, and Cumbria. The reported destruction of the people with all their churches, and all their culture, begun by the Picts and Scots, and carried on by the Angles and their kindred Saxons, had made a profound impression upon Christendom. The 'Groans of the Britons' had terrified all mankind, and discouraged even the brave missionaries of Italy and Gaul. . . . Gregory determined to make the sacrifice himself. He prevailed on the Pope to sanction his enterprise; but the people of Rome, with whom he was a favourite, interposed, and he was constrained reluctantly to forego the peril and the blessing. But the sight he had witnessed in the marketplace still retained its impression upon him. He kept the fair-haired Angles ever in view; and when, in the year 592, he was himself elevated to the popedom, he resolved to send a mission, and fling upon the obscure shores of Britain the full beams of the sun of Christendom, as they then seemed to shine so conspicuously at Rome. Augustine was the preacher chosen from among the inmates of one of Gregory's monasteries, for the arduous task thus imposed upon him. He was to be accompanied by a select band of twelve monks, together with a certain number of attendants. . . . There is something very remarkable in the facility with which the fierce idolaters, whose name had struck such terror into the Christian nations far and near, yielded to the persuasions of this band of peaceful evangelists."—C. Merivale, *Four lectures on some Epochs of Early Church History*, pp. 192-198.—See **ENGLAND**: A. D. 597-685.—The Roman missionaries in England landed in Kent and appear to have had more influence with the petty courts of the little kingdoms than with the people. The conversion of the North of England must be credited to the Irish monastery on the island of Iona. "At the beginning of the sixth century these Irish Christians were seized with an unconquerable impulse to wander afar and preach Christianity to the heathen. In 563 Columba, with twelve confederates, left Ireland and founded a monastery on a small island off the coast of Scotland (Iona or Hy), through the influence of which the Scots and Picts of Britain became converted to Christianity, twenty-three missions among the Scots and eighteen in the country of the Picts having been established at the death of Columba (597). Under his third successor the heathen Saxons were converted; Aedan, summoned by Oswald of Northumbria, having labored among them from 635 to 651 as missionary, abbot, and bishop. His successors, Finnan and Colman, worthily carried on his work, and introduced Christianity into other Anglo-Saxon kingdoms near East Anglia, Mercia, and Essex."—H. Zimmer, *The Irish*

Element in Mediæval Culture, pp. 19-21.—“Two hands of devoted men had hitherto been employed in the conversion of England, the Roman, assisted by their converts and some teachers from France, and the Irish, who were plainly the larger body. Between the two there were the old differences as to the time of keeping Easter and the form of the clerical tonsure. . . . Thus, while Oswy [King of Mercia] was celebrating Easter according to the custom he had learnt at Iona, his queen Earlfleda observed it according to the rule which she had learnt in Kent, and was still practising the austerities of Lent. These differences were tolerated during the Episcopate of Aidan and Finan, but when Finan died and was succeeded by Colman, the controversy” was terminated by Oswy, after much debate, with the words—“I will hold to St. Peter, lest, when I present myself at the gates of Heaven, he should close them against me.” . . . Colman, with all his Irish brethren, and thirty Northumbrians who had joined the monastery, quitted Lindisfarne and sailed to Iona.”—G. F. Maclear, *Conversion of the West: The English*, pp. 81-85.—The impartial historian to whom we owe all the early history of the English Church, thus records the memory of these devoted men as it remained in the minds of Englishmen long after their departure. It is a brief passage, one like those in the greater Ecclesiastical History of Eusebius, which must stand for much we do not know. Referring to their devoted lives—“For this reason the religious habit was at that time in great veneration; so that wheresoever any clergyman or monk happened to come, he was joyfully received by all persons, as God’s servant; and if they chanced to meet him upon the way, they ran to him, and bowing, were glad to be signed with his hand, or blessed with his mouth. Great attention was also paid to their exhortations; and on Sundays they flocked eagerly to the church, or the monasteries, not to feed their bodies, but to hear the word of God; and if any priest happened to come into a village, the inhabitants flocked together to hear from him the word of life; for the priests and clergymen went into the village on no other account than to preach, baptize, visit the sick, and, in few words, to take care of souls; and they were so free from worldly avarice, that none of them received lands and possessions for building monasteries, unless they were compelled to do so by the temporal authorities; which custom was for some time after observed in all the churches of the Northumbrians. But enough has now been said on this subject.”—*The Venerable Bede’s Ecclesiastical History of England*; ed. by J. A. Giles, bk. 3, ch. 26.—The English Church passed through several stages during this period. A notable one was the rise and fall of a loose monastic system which attracted men and women of the better classes, but for lack of a strict rule brought itself into disrepute. Another was the development of classical learning and the foundation of the school at Jarrow in Northumberland resulting in making England the intellectual centre of the world. Venerable Bede, who wrote the Ecclesiastical History of the English Church, was the greatest teacher of this epoch; and Alcuin, a Northumbrian by birth, and of the school at York, of the next. Invited by Charlemagne to the Frankish Court, he carried English learning to the Continent, and although

he died at the time of the foundation of the Empire, left his influence in many ways on the development of European culture. A single fact of interest will suffice, to show the close connection of this early history with that of Rome and the continent—viz., to Alcuin we are largely indebted for the parent script which formed our Roman letters. (I. Taylor, *The Alphabet*, v. 2, p. 180.) Northumbrian learning and the rich libraries of ancient and Anglo-Saxon literature were destroyed by the Danes, who, in their incursions, showed for a long time peculiar animosity to monks and monasteries. Although the service of this early Anglo-Saxon Church was partly in the vernacular, and large portions, if not all, of the Gospels had been translated, little remains to us of its early religious literature. The translations of the Gospel into Anglo-Saxon that have come down to us are to be attributed to a late period.

9th Century.—The Bulgarian Church.—“In the beginning of this 9th century, a sister of the reigning Bulgarian king, Bogoris, had fallen as a captive into the keeping of the Greek emperor. For thirty-eight years she lived at Constantinople, and was there instructed in the doctrines of the Christian Faith. Meanwhile, the administration passed into the hands of the empress Regent, Theodora. She was interested in a certain monk named Cupharas, who had been taken prisoner by the Bulgarians, and with a view to his redemption, she opened negotiations with Bogoris. An exchange of prisoners was finally effected. The sister of Bogoris was restored to him, while Cupharas was permitted to return to Constantinople. Before the release of the pious monk, however, he had striven, though quite unavailingly, to win the Bulgarian prince to the service of the Cross. These fruitless endeavors were supplemented by the entreaties of the king’s sister, on her return from Constantinople. . . . At last, fear snapped the fetters which love had failed to disengage. . . . His baptism was celebrated at midnight with profoundest secrecy. The rite was administered by no less a personage than the patriarch Photius. He emphasized the solemnity of the occasion by presenting the neophyte with a lengthy treatise on Christianity, theoretical and practical, considered mainly in its bearings on the duties of a monarch. The emperor Michael stood sponsor by proxy, and the Bulgarian king received, as his Christian name, that of his imperial godfather. . . . The battle-cries of theology rang over Christendom, and the world was regaled with the spectacle of a struggle between the rival Churches for the possession of Bulgaria, a country till recently so conspicuously destitute of dogma of any kind. The Bulgarians themselves, doubtless much astonished at the uproar for their sake, and, surely, more perplexed than ever by the manners and customs of Christianity, began to waver in their adherence to the Western Church, and to exhibit symptoms of an inclination to transfer their allegiance to Constantinople. The strife went on for years. At last, A. D. 877, the Latin clergy having been dismissed from the country, Pope John VIII. solemnly expostulated, protesting against the Greek proclivities of the Bulgarians, and predicting dire results from their identity with a Church which was rarely free from heresy in one form or another. Nevertheless, the Byzantine leanings of Bulgaria did cul-

minate in union with the Eastern Church. A Greek archbishop and bishops of the same communion, settled in the country. . . . 'The Eastern branch' of the Slavonic languages, properly so called, 'comprehends the Russian, with various local dialects, the Bulgarian, and the Illyrian. The most ancient document of this Eastern branch is the so-called ecclesiastical Slavonic, i. e., the ancient Bulgarian, into which Cyrillus and Methodius translated the Bible in the middle of the 9th century. This is still the authorized version of the Bible for the whole Slavonic race, and to the student of the Slavonic languages it is what Gothic is to the student of German.'—G. F. Maclear, *Conversion of the West: The Slavs*, pp. 54-69.

9th Century.—Conversion of Moravia.—"In the opening years of the 9th century, Moravia stretched from the Bavarian borders to the Hungarian river Drina, and from the banks of the Danube, beyond the Carpathian mountains, to the river Stryi in Southern Poland. Into this territory Christianity had been ushered as early as A. D. 801, by Charlemagne, who, as his custom was, enforced baptism at the point of the sword, at least as far as the king was concerned. Efforts were subsequently made by the archbishops of Salzburg and Passau to fan this first feeble flicker into something like a flame. But no success attended their exertions. Paganism was overpoweringly strong, and Christianity not only weak, but rude and uncouth in type. . . . The story of this country, during the process of emancipation from paganism, is but a repetition of the incidents with which, in neighbouring states, we have already become familiar. Ramifications of the work of Cyril and Methodius extended into Servia. The Slavonic alphabet made way there, as in Bohemia and Moravia, for Christianity. The Servians 'enjoyed the advantage of a liturgy which was intelligible to them; and we find that, early in the 10th century, a considerable number of Slavonian priests from all the dioceses were ordained by the bishop of Nona, who was himself a Slavonian by descent.'—G. F. Maclear, *Conversion of the West: The Slavs*, ch. 4.

9th-10th Centuries.—The Eastern Church as a missionary Church.—"If the missionary spirit is the best evidence of vitality in a church, it certainly was not wanting in the Eastern Church during the ninth and tenth centuries of our era. This period witnessed the conversion to Christianity of the principal Slavonic peoples, whereby they are both linked with Constantinople, and bound together by those associations of creed, as well as race, which form so important a factor in the European politics of the present day. The Moravians, the Bulgarians, and the Russians were now brought within the fold of the Church; and the way was prepared for that vast extension of the Greek communion by which it has spread, not only throughout the Balkan peninsula and the lands to the north of it, but wherever Russian influence is found—as far as the White Sea on the one side, and Kamtchatka on the other, and into the heart of Central Asia. The leaders in this great work were the two brothers, Cyril and Methodius, who in consequence of this, have since been known as the Apostles of the Slavonians. What Mezrop did for the Armenians, what Ulfilas did for the Goths, was accomplished for that race by Cyril

in the invention of a Slavonic alphabet, which from this cause is still known by the name of the Cyrillic. The same teacher, by his translation of the Scriptures into their tongue, provided them with a literary language, thereby producing the same result which Luther's Bible subsequently effected for Germany, and Dante's *Divina Commedia* for Italy. It is no matter for surprise that, throughout the whole of this great branch of the human race—even amongst the Russians, who owed their Christianity to another source—the names of these two brothers should occupy the foremost place in the calendar of Saints. It is not less significant that their names are not even mentioned by the Byzantine historians."—H. F. Tozer, *The Church and the Eastern Empire*, ch. 7.

9th-11th Centuries.—The Western Church as a missionary Church.—"The earlier missions of the Western Church have been described, but it is noteworthy that again and again missions to the same regions are necessary. It requires such a map as the one accompanying this article to make plain the slowness of its diffusions and the long period needed to produce even a nominally Christian Europe. "The views of Charlemagne for the conquest and conversion of the Northern heathens [see Saxons: A. D. 772-804], were not confined to the limits, wide as they were, of Saxony. The final pacification effected at Salz, seemed to open his eyes to more extensive enterprises in prospect. Political may have combined with religious motives in inducing him to secure the peace of his new frontiers, by enlisting the tribes of Denmark under the banner of the Cross, and he conceived the idea of planting a church in the neighbourhood of Hamburg, which should become a missionary centre. This plan, though interrupted by his death, was not neglected by his son Louis le Debonnaire, or 'the Pious.' . . . But it is easier to propose such a plan than find one willing to carry it out. The well-known ferocity of the Northmen long deterred any one from offering himself for such a duty. At length he received intelligence from Wala, the abbot of Corbey, near Amiens, that one of his monks was not unwilling to undertake the perilous enterprise. The intrepid volunteer was Anskar."—G. F. Maclear, *Conversion of the West: The Northmen*, ch. 2.—"In 822, Harold, the king of Jutland, and claimant of the crown of Denmark, came to seek the help of Louis the Pious, the son, and one of the successors, of Charlemagne. . . . On Harold's return to Denmark he was accompanied by Anskar, who well deserves to be called the apostle of Scandinavia. . . . Thus Anskar and Autbert set out in the train of Harold, and during the journey and voyage a kindly feeling sprang up between the royal and the missionary families. Harold got no cordial greeting from his proud heathen subjects when he announced to them that he had done homage to the emperor, and that he had embraced the gospel. He seems to have been very sincere and very earnest in his endeavours to induce his nobles and subjects to abandon idolatry and embrace Christianity. To expect that he was altogether judicious in these efforts would be to suppose that he had those views regarding the relation that ought to subsist between rulers and subjects, . . . views regarding liberty of conscience and the right of private judgment. . . . The result was that

after two years, in 828, he was compelled to abdicate the throne. . . . The position of Anskar, difficult as it was while Harold was on the throne, became still more difficult after his abdication. . . . But just at the time when the door was shut against him in Denmark, another was opened in Sweden, which promised to be wider and more effectual. . . . He was kindly received by the Swedish king, who gave him permission to preach, and his subjects freedom to accept and profess the gospel of Christ. As Anskar had been led to expect, so he found, many Christian captives, who had been brought from other countries,—France, Germany, Britain, Ireland,—and who, having been as sheep without a shepherd, gladly received from Anskar those consolations and exhortations which were fitted to alleviate the sorrows of their captivity. . . . After a year and a half's stay in Sweden, Anskar returned home, and gladdened the heart of the good emperor, and doubtless of many others, by the cheering prospect he was able to present of the acceptance of the gospel by the Swedes. He was now made nominally bishop of Hamburg, but with the special design of superintending and conducting missionary operations both in Denmark and Sweden. . . . Horik, king of Denmark, who had driven Harold from his throne, . . . had been hitherto an uncompromising enemy of the gospel. Anskar undertook the management of some political negotiations with him, and in the conduct of them made so favourable an impression on him that he refused to have any other negotiator or ambassador of the German king at his court. He treated him as a personal friend, and gave him full liberty to conduct missionary operations. These operations he conducted with his usual zeal, and by God's blessing, with much success. Many were baptized. The Christians of Germany and Holland traded more freely with the Danes than before, and the Danes resorted in larger numbers as traders to Holland and Germany; and in these and other ways a knowledge of the gospel, and some apprehension of the blessings which it brings with it, were diffused among the people. . . . Although the Norwegians were continually coming into contact, in the varying relations of war and peace, with the Swedes and the Danes, the French and the Germans, the English and the Irish, and although in this way some knowledge of the Christian system must have been diffused among them, yet the formal introduction of it into their country was a full century later than its introduction into Denmark and Sweden."—Thomas Smith, *Mediæval Missions*, pp. 122–138.—"The conversions in Denmark were confined to the mainland. The islands still remained pagan, while human victims continued to be offered till the Emperor Henry I. extorted from Gorm, the first king of all Denmark, in A. D. 934, protection for the Christians throughout his realm, and the abolition of human sacrifices. In Sweden, for seventy years after Anskar's death, the nucleus of a Christian Church continued to be restricted to the neighbourhood of Birka, and the country was hardly visited by Christian missionaries."—G. F. Maclear, *Conversion of the West: The Northmen*, ch. 2.—"It is very remarkable that, in the whole history of the introduction of Christianity into Norway and Iceland, extending over a period of a century and a half, we meet

not with the name of any noted bishop, or ecclesiastic, or missionary. There were, no doubt, ecclesiastics employed in the work, and these would appear to have been generally Englishmen; but they occupied a secondary place, almost their only province being to baptize those whom the kings compelled to submit to that ordinance. The kings were the real missionaries; and one cannot help feeling a kind of admiration for the ferocious zeal which one and another of them manifested in the undertaking,—even as the Lord commended the unjust steward because he had done wisely, although his wisdom was wholly misdirected. The most persistent and the most successful of these missionary kings was Olaf the Thick, who came from England in 1017, and set himself with heart and soul to the work of the demolition of heathenism, and the substitution of Christianity as the national religion."—Thomas Smith, *Mediæval Missions*, pp. 140–141.

10th Century.—The Russian Church.—"In the middle of the 10th century, the widowed Princess Olga, lately released from the cares of regency, travelled from Kiev to Constantinople. Whether her visit had political objects, or whether she was prompted to pay it solely, as some say, by a desire to know more of the holy faith of which only glimpses had been vouchsafed her at home, cannot be positively decided. But her sojourn in the imperial city was a turning-point in her career. Baptism was administered to her by the patriarch Polyeuctes, the emperor Constantine Porphyrogenitus officiating as sponsor. Polyeuctes then solemnly addressed the princess, predicting that through her instrumentality Russia should be richly blessed. 'Olga,' writes M. Mouravieff, 'now become Helena by baptism, that she might resemble both in name and deed the mother of Constantine the Great, stood meekly bowing down her head, and drinking in, as a sponge that is thirsty of moisture, the instructions of the prelate.' . . . Some latent impressions favourable to Christianity her youngest grandson, Vladimir, doubtless owed to her. Nevertheless when, at the death of his brother Yarapolk, for which indeed he was held responsible, he mounted the throne, no signs of a gracious character revealed themselves. He was, on the contrary, a bitter and bigoted pagan. . . . It seems to have occurred to many missionaries of varying types, that a chief of such mark should not be left at the mercy of his own violent passions. The spiritual well-being of Vladimir accordingly became the object of laborious journeys, of much exertion, and of redundant eloquence. . . . Last of all came a Greek emissary. He was neither 'a priest nor a missionary, but a philosopher.' . . . Like Bogoris, the wild Russian chief was greatly moved. . . . The following year the king laid before the elders of his council the rival pleas of these variously recommended forms of faith, and solicited their advice. The nobles mused awhile, and then counselled their master to ascertain how each religion worked at home. This, they thought, would be more practical evidence than the plausible representations of professors. On this suggestion Vladimir acted. Envoys were chosen,—presumably, for their powers of observation,—and the embassy of inquiry started. 'This public agreement,' says the historian of the Russian Church, 'explains in some degree the sudden

and general acceptance of Christianity which shortly after followed in Russia. It is probable that not only the chiefs, but the common people also, were expecting and ready for the change.

A report, far from encouraging, was in due time received from the ambassadors. Of the German and Roman, as well as the Jewish, religions in daily life, they spoke in very disparaging terms, while they declared the Mussulman creed, when reduced to practice, to be utterly out of the question. Disappointed in all these quarters, they now proceeded, by command, to Constantinople, or, as the Russians called it, Tzaragorod. . . . Singularly enough, the Russian envoys, accustomed, as we must suppose them to have been, only to the barest simplicity of life, had complained not only of the paucity of decoration in the Latin churches, but of a lack of beauty in their appointments. Thus the preparations of the patriarch were accurately fitted to their expectant frame of mind. They were led into the church of S. Sophia, gleaming with variegated marbles, and porphyries, and jasper, at that time 'the masterpiece of Christian architecture.' The building glittered with gold, and rich mosaics. The service was that of a high festival, either of St. John Chrysostom, or of the Death of the Virgin, and was conducted by the patriarch in person, clad in his most gorgeous vestments. . . . On their return to Vladimir, they dilated with eager delight on the wonders they had seen. The king listened gravely to their glowing account of 'the temple, like which there was none upon earth.' After sweetness, they protested, bitterness would be unbearable, so that—whatever others might do—they at all events should at once abandon heathenism. While the king hesitated, his boyers turned the scale by reminding him that if the creed of the Greeks had not indeed had much to recommend it, his pious and sagacious grandmother, Princess Olga, would not have loved and obeyed it. Her name acted like a talisman. Vladimir resolved to conform to Christianity. But still, fondly clinging to the habits of his forefathers, he cherished the idea of wooing and winning his new religion by the sword. . . . Under the auspices of the sovereign,

the stately church of St. Basil soon arose, on the very spot recently occupied by the temple of Perun. Kief became the centre of Christian influence, whence evangelizing energies radiated in all directions. Schools and churches were built, while Michael, the first metropolitan, attended by his bishops, 'made progresses into the interior of Russia, everywhere baptizing and instructing the people.' The Greek canon law came into force, and the use of the service-book and choral music of the Greek communion became general, while, in the Slavonic Scriptures and Liturgy of Cyril and Methodius, a road was discovered which led straight to the hearts of the native population. 'Cyril and Methodius, if any one, must be considered by anticipation as the first Christian teachers of Russia; their rude alphabet first instructed the Russian nation in letters, and, by its quaint Greek characters, still testifies in every Russian book, and on every Russian house or shop, the Greek source of the religion and literature of the empire.'—G. F. Maclear, *Conversion of the West: The Slavs*, ch. 5.

"As in the first centuries it was necessary that the heaven of Christianity should gradually penetrate the entire intellectual life of the cultivated nations, before a new spiritual creation, striking its root in the forms of the Grecian and Roman culture, which Christianity appropriated, could in these forms completely unfold itself; so after the same manner it was necessary that the heaven of Christianity which . . . had been introduced into the masses of the untutored nations, should gradually penetrate their whole inward life, before a new and peculiar spiritual creation could spring out of it, which should go on to unfold itself through the entire period of the middle ages. And the period in which we now are must be regarded as still belonging to the epoch of transition from that old spiritual creation which flourished on the basis of Grecian and Roman culture to the new one."—A. Neander, *General Hist. of the Christian Religion and Church*, v. 3, p. 456.—We leave the author's sentence incomplete, that it may express the more fully all the subsequent history of Christianity.

CHRYSE.—Vague reports of a region called Chryse (the Golden), somewhere beyond the Ganges, and of an island bearing the same name, off the mouths of the Ganges, as well as of another island called Argyre (the Silver Island), were prevalent among the early Roman geographical writers. They probably all had reference to the Malay peninsula, which Ptolemy called the Golden Chersonese.—E. H. Bunbury, *Hist. of Ancient Geog.*, ch. 25.

CILICIA.—KILIKIA.—An ancient district in the southeastern corner of Asia Minor, bordering on Syria. It was a satrapy of the Persian Empire, then a part of the kingdom of the Selucide, and afterwards a Roman province. The chief city of Cilicia was Tarsus, a very ancient commercial emporium, whose people were noted for mental acuteness. The Apostle Paul is to be counted among the distinguished natives of Tarsus, and a quite remarkable number of eminent teachers of philosophy were from the same birthplace.

CILICIA, Pirates of.—During the Mithridatic wars piracy was developed to alarming proportions in the eastern parts of the Mediterranean Sea. Distracted by civil conflicts and occupied by foreign ones, simultaneously, the Romans, for a considerable period, gave no proper heed to the growth of this lawlessness, until they found their commerce half destroyed and Rome and Italy actually threatened with starvation by the intercepting of their supplies from abroad. The pirates flourished under the protection and encouragement of the king of Pontus, at whose instance they established their chief headquarters, their docks, arsenals and magazines, at various points on the coast of Cilicia. Hence the name Cilician came to be applied to all the pirates of the time. This era of piracy was brought to an end, at last, by Pompey, who was sent against them, B. C. 67, with extraordinary powers conferred by the law known as the Lex Gabinia. He proceeded to his undertaking with remarkable energy and ability, and his hunting down of the freebooters which he accomplished effectually within three months from the day his operations began, was really the most brilliant exploit of his life.—H. G. Liddell, *Hist. of Rome*, bk. 7, ch. 63.

ALSO IN: C. Merivale, *Hist. of the Romans*, ch. 1.—G. Long, *Decline of the Roman Republic*, v. 3, ch. 6-7.

CILICIAN GATES.—A pass through the Taurus range of mountains, opening from Capadocia into Cilicia, was anciently called the

Pylæ Ciliciæ or Cilician Gates. The city of Tyana was situated at the entrance to the pass. Both Xenophon and Alexander, who traversed it, seem to have regarded the pass as one which no army could force if properly defended.—E. H. Bunbury, *Hist. of Ancient Geog.*, ch. 10, sect. 2, and ch. 12, sect. 1.

CILURNUM.—A Roman city in Britain, "the extensive ruins of which, well described as a British Pompeii, are visible near the modern hamlets of Chesters."—T. Wright, *Celt, Roman and Saxon*, ch. 5.

CIMARRONES, The. See AMERICA: A. D. 1572–1580, and JAMAICA: A. D. 1655–1796.

CIMBRI AND TEUTONES, The.—"For a considerable period [second century, B. C.] an 'unsettled people' had been wandering along the northern verge of the country occupied by the Celts on both sides of the Danube. They called themselves the Cimbri, that is, the Chempho, the champions, or, as their enemies translated it, the robbers; a designation, however, which to all appearance had become the name of the people even before their migration. They came from the north, and the first Celtic people with whom they came in contact were, so far as is known, the Boii, probably in Bohemia. More exact details as to the cause and the direction of their migration have not been recorded by contemporaries and cannot be supplied by conjecture. . . . But the hypothesis that the Cimbri, as well as the similar horde of the Teutones which afterwards joined them, belonged in the main not to the Celtic nation, to which the Romans at first assigned them, but to the Germanic, is supported by the most definite facts: viz., by the existence of two small tribes of the same name—remnants left behind to all appearance in their primitive seats—the Cimbri in the modern Denmark, the Teutones in the north-east of Germany in the neighbourhood of the Baltic, where Pytheas, a contemporary of Alexander the Great, makes mention of them thus early in connection with the amber trade; by the insertion of the Cimbri and Teutones in the list of the Germanic peoples among the Ingævones alongside of the Chauci; by the judgment of Cæsar, who first made the Romans acquainted with the distinction between the Germans and the Celts, and who includes the Cimbri, many of whom he must himself have seen, among the Germans; and lastly, by the very names of the people and the statements as to their physical appearance and habits. . . . On the other hand it is conceivable enough that such a horde, after having wandered perhaps for many years, and having doubtless welcomed every brother-in-arms who joined it in its movements near to or within the land of the Celts, would include a certain amount of Celtic elements. . . . When men afterwards began to trace the chain, of which this emigration, the first Germanic movement which touched the orbit of ancient civilization, was a link, the direct and living knowledge of it had long passed away."—T. Mommsen, *Hist. of Rome*, bk. 4, ch. 5.—"The name Kymri, or Cymri, still exists. It is the name that the Welsh give themselves, but I am not aware that any other people have called them by that name. These Kymri are a branch of the great Celtic people, and this resemblance of the words Kymri and Cimbri has led many modern writers to assume that the Cimbri were also a Celtic

people, as many of the ancient writers name them. But these ancient writers are principally the later Greeks, who are no authority at all on such a matter. . . . The name Cimbri has perished in Germany, while that of the Teutones, by some strange accident, is now the name of the whole Germanic population."—G. Long, *Decline of the Roman Republic*, v. 2, ch. 4.

ALSO IN: W. Ihne, *Hist. of Rome*, bk. 7, ch. 9.

B. C. 113–102.—Battles with the Romans.—The Cimbri and the Teutones made their first appearance on the Roman horizon in the year 113 B. C. when they entered Noricum. The Noricans were an independent people, as yet, but accepted a certain protection from Rome, and the latter sent her consul, Carbo, with an army, to defend them. Carbo made an unfortunate attempt to deal treacherously with the invaders and suffered an appalling defeat. Then the migrating barbarians, instead of pressing into Italy, on the heels of the flying Romans, turned westward through Helvetia to Gaul, and occupied themselves for four years in ravaging that unhappy country. In 109 B. C., having gathered their plunder into the fortified town of Aduatua and left it well protected, they advanced into the Roman province of Narbo, Southern Gaul, and demanded land to settle upon. The Romans resisted and were again overwhelmingly beaten. But even now the victorious host did not venture to enter Italy, and nothing is known of its movements until 105 B. C., when a third Roman army was defeated in Roman Gaul and its commander taken prisoner and slain. The affrighted Romans sent strong re-enforcements to the Rhone; but jealousy between the consul who commanded the new army and the proconsul who retained command of the old delivered both of them to destruction. They were virtually annihilated, Oct. 6, B. C. 105, at Arausio (Orange), on the left bank of the Rhone. It is said that 80,000 Roman soldiers perished on that dreadful field, besides half as many more of camp followers. "This much is certain," says Mommsen, "that only a few out of the two armies succeeded in escaping, for the Romans had fought with the river in their rear. It was a calamity which materially and morally far surpassed the day of Cannæ." In the panic which this disaster caused at Rome the constitution of the Republic was broken down. Marius, conqueror of Jugurtha, was recalled from Africa and not only re-elected to the Consulship, but invested with the office for five successive years. He took command in Gaul and found that the formidable invaders had moved off into Spain. This gave him time, fortunately, for the organizing and disciplining of his demoralized troops. When the barbarians reappeared on the Rhone, in the summer of 102 B. C., he faced them with an army worthy of earlier Roman times. They had now resolved, apparently, to force their way, at all hazards, into Italy, and had divided their increasing host, to move on Rome by two routes. The Cimbri, reinforced by the Tigorini, who had joined them, made a circuit to the Eastern Alps, while the Teutones, with Ambrones and Tougeni for confederates crossed the Rhone and attacked the defenders of the western passes. Failing to make any impression on the fortified camp of Marius the Teutones rashly passed it, marching straight for the coast road to Italy. Marius

cautiously followed and after some days gave battle to the barbarians, in the district of Aquæ Sextiæ, a few miles north of Massilia. The Romans that day took revenge for Arausio with awful interest. The whole barbaric horde was annihilated. "So great was the number of dead bodies that the land in the neighborhood was made fertile by them, and the people of Massilia used the bones for fencing their vineyards." Meantime the Cimbri and their fellows had reached and penetrated the Brenner pass and were in the valley of the Adige. The Roman army stationed there had given way before them, and Marius was needed to roll the invasion back. He did so, on the 30th of July B. C. 101, when the Cimbri were destroyed, at a battle fought on the Raudine Plain near Vercellæ, as completely as the Teutones had been destroyed at Aquæ Sextiæ.—T. Mommsen, *Hist. of Rome*, bk. 4, ch. 5.

ALSO IN: W. Ihne, *Hist. of Rome*, bk. 7, ch. 9.

CIMBRIAN CHERSONESUS.—The modern Danish promontory of Jutland; believed to have been the home of the Cimbri before they migrated southwards and invaded Gaul.

CIMINIAN FOREST, The.—The mountains of Viterbo, which formed anciently the frontier of Rome towards Etruria, were then covered with a thick forest—"the 'silva Ciminia' of which Livy gives so romantic a description. It was, however, nothing but a natural division between two nations which were not connected by friendship, and wished to have little to do with each other. . . . This forest was by no means like the 'silva Hercynia' with which Livy compares it, but was of just such an extent that, according to his own account, the Romans only wanted a couple of hours to march through it."—B. G. Niebuhr, *Lects. on the Hist. of Rome*, lect. 44.

CIMMERIANS, The.—"The name Cimmerians appears in the Odyssey,—the fable describes them as dwelling beyond the ocean-stream, immersed in darkness and unblessed by the rays of Helios. Of this people as existent we can render no account, for they had passed away, or lost their identity and become subject, previous to the commencement of trustworthy authorities: but they seem to have been the chief occupants of the Tauric Chersonese (Crimea) and of the territory between that peninsula and the river Tyras (Dneister) at the time when the Greeks first commenced their permanent settlements on those coasts in the seventh century B. C. The numerous localities which bore their name, even in the time of Herodotus, after they had ceased to exist as a nation,—as well as the tombs of the Cimmerian kings then shown near the Tyras,—sufficiently attest the fact; and there is reason to believe that they were—like their conquerors and successors the Scythians—a nomadic people, mare-milkers, moving about with their tents and herds, suitably to the nature of those unbroken steppes which their territory presented, and which offered little except herbage in profusion. Strabo tells us—on what authority we do not know—that they, as well as the Trères and other Thracians, had desolated Asia Minor more than once before the time of Ardys [King of Lydia, seventh century B. C.] and even earlier than Homer."—G. Grote, *Hist. of Greece*, pt. 2, ch. 17.—See, also, CUMÆ.

CINCINNATI: A. D. 1788.—The founding and naming of the city.—In 1787 "an offer was made to Congress by John Cleve Symmes [afterwards famous for his theory that the earth is hollow, with openings at the poles], to buy two millions of acres between the Little and the Great Miamis. Symmes was a Jerseyman of wealth, had visited the Shawanese country, had been greatly pleased with its fertility, and had come away declaring that every acre in the wildest part was worth a silver dollar. It was too, he thought, only a question of time, and a very short time, when this value would be doubled and tripled. Thousands of immigrants were pouring into this valley each year, hundreds of thousands of acres were being taken up, and the day would soon come when the rich land along the Miamis and the Ohio would be in great demand. There was therefore a mighty fortune in store for the lucky speculator who should buy land from Congress for five shillings an acre and sell it to immigrants for twenty. But . . . his business lagged, and though his offer to purchase was made in August, 1787, it was the 15th of May, 1788, before the contract was closed. In the meantime he put out a pamphlet and made known his terms of sale. A copy soon fell into the hands of Matthias Denman. He became interested in the scheme and purchased that section on which now stands the city of Cincinnati. One third he kept, one third he sold to Robert Patterson, and the remainder to John Filson. The conditions of the purchase from Symmes gave them two years in which to begin making clearings and building huts. But the three determined to lose no time, and at once made ready to lay out a city directly opposite that spot where the waters of the Licking mingled themselves with the Ohio. Denman and Patterson were no scholars. But Filson had once been a school-master, knew a little of Latin and something of history, and to him was assigned the duty of choosing a name for the town. . . . He determined to make one, and produced a word that was a most absurd mixture of Latin, Greek and French. He called the place Losantiville, which, being interpreted, means the city opposite the mouth of the Licking. A few weeks later the Indians scalped him."—J. B. McMaster, *Hist. of the People of the U. S.*, v. 1, p. 516.—The name given a little later to Filson's settlement was conferred on it by General St. Clair, Governor of the Territory, in honor of the Society of the Cincinnati. See NORTHWEST TERRITORY OF THE U. S.: A. D. 1788–1802.

ALSO IN: F. W. Miller, *Cincinnati's Beginnings*, A. D. 1863.—Threatened by John Morgan's Rebel Raid. See UNITED STATES OF AM.: A. D. 1863 (JULY: KENTUCKY).

CINCINNATI, The Society of the.—"Men of the present generation who in childhood rummaged in their grandmothers' cosy garrets cannot fail to have come across scores of musty and worm-eaten pamphlets, their yellow pages crowded with italics and exclamation points, inveighing in passionate language against the wicked and dangerous Society of the Cincinnati. Just before the army [of the American Revolu-

tion] was disbanded, the officers, at the suggestion of General Knox, formed themselves [April, 1783] into a secret society, for the purpose of keeping up their friendly intercourse and cherishing the heroic memories of the struggle in which they had taken part. With the fondness for classical analogies which characterized that time, they likened themselves to Cincinnatus, who was taken from the plow to lead an army, and returned to his quiet farm so soon as his warlike duties were over. They were modern Cincinnati. A constitution and by-laws were established for the order, and Washington was unanimously chosen to be its president. Its branches in the several states were to hold meetings each Fourth of July, and there was to be a general meeting of the whole society every year in the month of May. French officers who had taken part in the war were admitted to membership, and the order was to be perpetuated by descent through the eldest male representatives of the families of the members. It was further provided that a limited membership should from time to time be granted, as a distinguished honour, to able and worthy citizens, without regard to the memories of the war. A golden American eagle attached to a blue ribbon edged with white was the sacred badge of the order; and to this emblem especial favour was shown at the French court, where the insignia of foreign states were generally, it is said, regarded with jealousy. No political purpose was to be subserved by this order of the Cincinnati, save in so far as the members pledged to one another their determination to promote and cherish the union between the states. In its main intent the society was to be a kind of masonic brotherhood, charged with the duty of aiding the widows and the orphan children of its members in time of need. Innocent as all this was, however, the news of the establishment of such a society was greeted with a howl of indignation all over the country. It was thought that its founders were inspired by a deep-laid political scheme for centralizing the government and setting up a hereditary aristocracy. . . . The absurdity of the situation was quickly realized by Washington, and he prevailed upon the society, in its first annual meeting of May, 1784, to abandon the principle of hereditary membership. The agitation was thus allayed, and in the presence of graver questions the much-dreaded brotherhood gradually ceased to occupy popular attention."—J. Fiske, *The Critical Period of Am. Hist.*, ch. 3. —J. B. McMaster, *Hist. of the People of the U. S.*, v. 1, ch. 2.—"The hereditary succession was never abandoned. A recommendation to that effect was indeed made to the several State Societies, at the first General Meeting in Philadelphia. . . . But the proposition, unwillingly urged, was accepted in deprecatory terms by some, and by others it was totally rejected. . . . At the second General Meeting, it was resolved 'that the alterations could not take effect until they had been agreed to by all the State Societies.' They never were so agreed to, and consequently the original Institution remains in full force. Those Societies that accepted the proposed alterations unconditionally, of course perished with their own generation."—A. Johnston, *Some Acc't of the Soc. of the Cincinnati* (Penn. Hist. Soc. Memoirs, v. 6, pp. 51-53).—"The claim to membership has latterly been determined not by strict

primogeniture, but by a 'just elective preference, especially in the line of the first-born,' who has a moral but not an absolutely indisputable right; and membership has always been renewed by election. . . . Six only of the original thirteen states—Massachusetts, New York, New Jersey, Pennsylvania, Maryland, and South Carolina—are still [in 1873] represented at the General Meetings. The largest society, that of Massachusetts, consisting originally of 343 members, now [1873] numbers less than 80; that of New York, from 230 had in 1858 decreased to 73; the 268 of Pennsylvania to about 60; the 110 of New Jersey, in 1866, to 60; and the 131 of South Carolina was, in 1849, reduced to 71."—F. S. Drake, *Memorials of the Soc. of the Cincinnati of Mass.*, p. 37.

CINQ MARS, Conspiracy of. See FRANCE: A. D. 1641-1642.

CINQUE PORTS, The.—"Hastings, Sandwich, Dover, Romney, Hythe—this is the order in which the Cinque Ports were ranked in the times when they formed a flourishing and important confederation. Winchelsea and Rye were added to these five . . . soon after the Norman Conquest. . . . The new comers were officially known as 'the two Ancient Towns.' When therefore we wish to speak of this famous corporation with strict accuracy we say, 'The five Cinque Ports and two Ancient Towns.' The repetition of the number 'five' in this title probably never struck people so much as we might expect, since it very soon came to be merely a technical term, the French form of the word being pronounced, and very often spelt 'Synke' or 'Sinke,' just as if it was the English 'Sink.' . . . The difference between the Cinque Ports and the rest of the English coast towns is plainly indicated by mediæval custom, since they were generally spoken of collectively as 'The Ports.' . . . Most writers upon this subject . . . have been at pains to connect the Cinque Ports by some sort of direct descent with the five Roman stations and fortresses which, under the Comes Littoris Saxonici [see SAXON SHORE, COUNT OF], guarded the south-eastern shores of Britain."—M. Burrows, *The Cinque Ports*, ch. 1-3.—"Our kings have thought them [the Cinque Ports] worthy a peculiar regard; and, in order to secure them against invasions, have granted them a particular form of government. They are under a keeper, who has the title of Lord Warden of the Cinque Ports (an officer first appointed by William the Conqueror), who has the authority of an admiral among them, and issues out writs in his own name. The privileges anciently annexed to these ports and their dependents were [among others]: An exemption from all taxes and tolls. . . . A power to punish foreigners, as well as natives, for theft. . . . A power to raise mounds or banks in any man's land against breaches of the sea. . . . To convert to their own use such goods as they found floating on the sea; those thrown out of ships in a storm; and those driven ashore when no wreck or ship was to be seen. To be a guild or fraternity, and to be allowed the franchises of court-leet and court-baron. A power to assemble and keep a portmote or parliament for the Cinque Ports.

... Their barons to have the privilege of supporting the canopy over the king's head at his coronation. In return for these privileges the Cinque Ports were required to fit out 57 ships, each manned with 21 men and a boy, with which they were to attend the king's service for 15 days at their own expense; but if the state of affairs required their assistance any longer they were to be paid by the crown. ... As the term baron occurs continually throughout all the charters of the Ports, it may not be improper to inform our readers that it is of the same import as burgess or freeman. ... The representatives of the Ports in parliament are to this day styled barons." The post of Warden of the Cinque Ports, "formerly considered of so much honour and consequence, is now converted into a patent sinecure place, for life, with a salary of £4,000 a year."—*Hist. of the Boroughs of Great Britain; together with the Cinque Ports*, v. 3.—The office of Warden of the Cinque Ports has been held during the present century by Mr. Pitt, the Earl of Liverpool, the Duke of Wellington, the Earl of Dalhousie, Viscount Palmerston, and Earl Granville.

CIRCUS, Factions of the Roman.—"The race, in its first institution [among the Romans], was a simple contest of two chariots, whose drivers were distinguished by white and red liveries: two additional colours, a light green and a cerulian blue, were afterwards introduced; and as the races were repeated twenty-five times, one hundred chariots contributed in the same day to the pomp of the circus. The four factions soon acquired a legal establishment and a mysterious origin, and their fanciful colours were derived from the various appearances of nature in the four seasons of the year. ... Another interpretation preferred the elements to the seasons, and the struggle of the green and blue was supposed to represent the conflict of the earth and sea. Their respective victories announced either a plentiful harvest or a prosperous navigation, and the hostility of the husbandmen and mariners was somewhat less absurd than the blind ardour of the Roman people, who devoted their lives and fortunes to the colour which they had espoused. ... Constantinople adopted the follies, though not the virtues, of ancient Rome; and the same factions which had agitated the circus raged with redoubled fury in the hippodrome. Under the reign of Anastasius [A. D. 491-518] this popular frenzy was inflamed by religious zeal; and the greens, who had treacherously concealed stones and daggers under

baskets of fruit, massacred, at a solemn festival, 3,000 of their blue adversaries. From the capital this pestilence was diffused into the provinces and cities of the East, and the sportive distinction of two colours produced two strong and irreconcilable factions, which shook the foundations of a feeble government. ... A sedition, which almost laid Constantinople in ashes, was excited by the mutual hatred and momentary reconciliation of the two factions." This fearful tumult, which acquired the name of the Nika sedition, from the cry, "Nika" (vanquish), adopted by the rioters, broke out in connection with the celebration of the festival of the Ides of January, A. D. 532. For five days the city was given up to the mob and large districts in it were burned, including many churches and other stately edifices. The emperor Justinian would have abandoned his palace and throne, but for the heroic opposition of his consort, Theodora. On the sixth day, the imperial authority was re-established by the great soldier, Belisarius, after 30,000 citizens had been slain in the hippodrome and in the streets.—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 40.

CIRCUS MAXIMUS AT ROME, The.—"The races and wild beast shows in the circi were among the most ancient and most favourite Roman amusements, and the buildings dedicated to these sports were numerous, and nearly equal in magnificence to the amphitheatres. The Circus Maximus, which was first provided with permanent seats for the spectators as early as the time of Tarquinius Priscus, was successively restored and ornamented by the republican government in 327 and 174 B. C. and by Julius Cæsar, Augustus, Claudius, Domitian and Trajan. The result was a building which, in dimensions and magnificence, rivalled the Coliseum, but has, unfortunately, proved far less durable, scarcely a vestige of it now being left."—R. Burn, *Rome and the Campagna*, int. and ch. 12.—See, also, FORUM BOARIUM.

CISTERCIAN ORDER.—The Monastery of Citeaux.—"Harding was an Englishman who spent his boyhood in the monastery of Sherborne in Dorset, till he was seized with a passion for wandering and for study which led him first to Scotland, then to Gaul, and at last to Rome. It chanced that on his return thence, passing through the duchy of Burgundy, he stopped at the abbey of Molêmes. As he saw the ways and

habits familiar to his childhood reproduced in those of the monks, the wanderer's heart yearned for the peaceful life which he had forsaken; he took the vows, and became a brother of the house. But when, with the zeal of a convert, he began to look more closely into his monastic obligations, he perceived that the practice of Molêmes, and indeed of most other monasteries, fell very far short of the strict rule of S. Benedict. He remonstrated with his brethren till they had no rest in their minds. At last after long and anxious debates in the chapter, the abbot determined to go to the root of the matter, and appointed two brethren, whose learning was equalled by their piety, to examine diligently the original rule and declare what they found in it. The result of their investigations justified Harding's reproaches and caused a schism in the convent. The majority refused to alter their accustomed ways; finding they were not to be reformed, the zealous minority, consisting of Robert the abbot, Harding himself (or Stephen as he was called in religion) and sixteen others equally 'stiff-necked in their holy obstinacy,' left Molêmes, and sought a new abode in the wilderness. The site which they chose—in the diocese of Chalon-sur-Saône, not far from Dijon—was no happy valley, no 'green retreat' such as the earlier Benedictine founders had been wont to select. It was a dismal swamp overgrown with brushwood, a forlorn, dreary, unhealthy spot, from whose marshy character the new house took its name of 'the Cistern'—Cistellum, commonly called Cîteaux. There the little band set to work in 1098 to carry into practice their views of monastic duty. . . . Three-and-twenty daughter houses were brought to completion during his [Harding's] life-time. One of the earliest was Pontigny, founded in 1114, and destined in after-days to become inseparably associated with the name of another English saint. Next year there went forth another Cistercian colony, whose glory was soon to eclipse that of the mother-house itself. Its leader was a young monk called Bernard, and the place of its settlement was named Clairvaux. From Burgundy and Champagne the 'White Monks,' as the Cistercians were called from the colour of their habit, soon spread over France and Normandy. In 1128 they crossed the sea and made an entrance into their founder's native land."—K. Norgate, *England under the Angevin Kings*, v. 1, ch. 1.

CITIES, Imperial and Free, of Germany.—"The territorial disintegration of Germany [see GERMANY: 13TH CENTURY] had introduced a new and beneficial element into the national life, by allowing the rise and growth of the free cities. These were of two classes: those which stood in immediate connection with the Empire, and were practically independent republics; and those which, while owning some dependence upon spiritual or temporal princes, had yet conquered for themselves a large measure of self-government. The local distribution of the former, which is curiously unequal, depended

upon the circumstances which attended the dissolution of the old tribal dukedoms. Wherever some powerful house was able to seize upon the inheritance, free cities were few: wherever the contrary was the case, they sprang up in abundance. In Swabia and on the Rhine there were more than a hundred: Franconia on the contrary counted only Nürnberg and five smaller cities: Westphalia, Dortmund and Herford: while in Bavaria, Regensburg stood alone. . . . The Imperial free cities . . . were self-governed, under constitutions in which the aristocratic and the democratic elements mingled in various proportions: they provided for their own defence: they were republics, in the midst of States where the personal will of the ruler counted for more and more. . . . In these cities the refined and luxurious civilization, to which the princes were indifferent, and on which the knights waged predatory war, found expression in the pursuit of letters and the cultivation of the arts of life. There, too, the Imperial feeling, which was elsewhere slowly dying out of the land, retained much of its force. The cities held, so to speak, directly of the Empire, to which they looked for protection against powerful and lawless neighbours, and they felt that their liberties and privileges were bound up with the maintenance of the general order. . . . In them, too, as we might naturally expect, religious life put on a freer aspect."—C. Beard, *Martin Luther and the Reformation*, p. 16.—"Prior to the peace of Luneville [1801], Germany possessed 133 free cities, called Reichstädte. A Reichstadt ('civitas imperii') was a town under the immediate authority of the Emperor, who was represented by an imperial official called a Vogt or Schultheis. The first mention of the term 'civitas imperii' (imperial city) occurs in an edict of the emperor Frederick II. [1214–1250], in which Lubeck was declared a 'civitas imperii' in perpetuity. In a later edict, of the year 1237, we find that King Rudolf termed the following places 'civitates regni' (royal cities), viz., Frankfurt, Friedberg, Wetzlar, Oppenheim, Wesel, and Boppard. All these royal cities subsequently became imperial cities in consequence of the Kings of Germany being again raised to the dignity of Emperors. During the reign of Louis the Bavarian [1314–1347] Latin ceased to be the official language, and the imperial towns were designated in the vernacular 'Richtstat.' In course of time the imperial towns acquired, either by purchase or conquest, their independence. Besides the Reichstädte, there were Freistädte, or free towns, the principal being Cologne, Basle, Mayence, Ratisbon, Spire, and Worms. The free towns appear to have enjoyed the following immunities:—1. They were exempt from the oath of allegiance to the Emperor. 2. They were not bound to furnish a contingent for any expedition beyond the Alps. 3. They were free from all imperial taxes and duties. 4. They could not be pledged. 5. They were distinguished from the imperial towns by not having the imperial eagle emblazoned on the municipal escutcheon." Subsequently "the free towns were placed on the same footing as the Reichstadt, and the term 'Freistadt,' or free town, was disused. The government of the imperial towns was in the hands of a military and civil governor. . . . On the imperial towns becoming independent, the administration of the town was

entrusted to a college of from four to twenty-four persons, according to the population, and the members of this kind of town council were called either Rathsmann, Rathsfreund, or Rathsherr, which means councilman or adviser. The town councillors appear to have selected one or more of their number as presidents, with the title of Rathmeister, Burgermeister, or Stadtmeister. . . . Many of the imperial towns gained their autonomy either by purchase or force of arms. In like manner we find that others either lost their privileges or voluntarily became subjects of some burgrave or ecclesiastical prince, e. g., Cologne, Worms, and Spire placed themselves under the jurisdiction of their respective archbishops, whereas Altenburg, Chemnitz and Zwickau were seized by Frederick the Quarrelsome in his war with the Emperor; whilst others, like Hagenau, Colmar, Landau, and Strasburg, were annexed or torn from the German Empire. As the Imperial towns increased in wealth and power they extended the circle of their authority over the surrounding districts, and, in order to obtain a voice in the affairs of the empire, at length demanded that the country under their jurisdiction should be represented at the Reichstag (Imperial Diet). To accomplish this, they formed themselves into Bunds or confederations to assert their claims, and succeeded in forcing the Emperor and the princes to allow their representatives to take part in the deliberations of the Diet. The principal confederations brought into existence by the struggles going on in Germany were the Rhenish and Suabian Bunds, and the Hansa [see HANSA TOWNS]. . . . At the Diet held at Augsburg in 1474, it appears that almost all the imperial towns were represented, and in 1648, on the peace of Westphalia, when their presence in the Diet was formally recognized, they were formed into a separate college. . . . By the peace of Luneville four of the imperial towns, viz., Aix-la-Chapelle, Cologne, Spire, and Worms, were ceded to France. In 1803, all the imperial towns lost their autonomy with the exception of the following six:—Augsburg, Nuremberg, Frankfurt, Lubeck, Hamburg, and Bremen; and in 1806 the first three, and in 1810 the others, shared the same fate, but in 1815, on the fall of Napoleon, Bremen, Hamburg, Lubeck, and Frankfurt, recovered their freedom, and were admitted as members of the German Bund, which they continued to be up to the year 1866."—W. J. Wyatt, *Hist. of Prussia*, v. 2, pp. 427-432.—"According to the German historians the period of the greatest splendour of these towns was during the 14th and 15th centuries. . . . In the 16th century they still enjoyed the same prosperity, but the period of their decay was come. The Thirty-Years War hastened their fall, and scarcely one of them escaped destruction and ruin during that period. Nevertheless, the treaty of Westphalia mentions them positively, and asserts their position as immediate states, that is to say, states which depended immediately upon the Emperor; but the neighbouring Sovereigns, on the one hand, and on the other the Emperor himself, the exercise of whose power, since the Thirty-Years War, was limited to the lesser vassals of the empire, restricted their sovereignty within narrower and narrower limits. In the 18th century, 51 of them were still in existence, they filled two benches at the

diet, and had an independent vote there; but, in fact, they no longer exercised any influence upon the direction of general affairs. At home they were all heavily burthened with debts, partly because they continued to be charged for the Imperial taxes at a rate suited to their former splendour, and partly because their own administration was extremely bad. It is very remarkable that this bad administration seemed to be the result of some secret disease which was common to them all, whatever might be the form of their constitution. . . . Their population decreased, and distress prevailed in them. They were no longer the abodes of German civilization; the arts left them, and went to shine in the new towns created by the Sovereigns, and representing modern society. Trade forsook them—their ancient energy and patriotic vigour disappeared. Hamburg almost alone still remained a great centre of wealth and intelligence, but this was owing to causes quite peculiar to herself."—A. de Tocqueville, *State of Society in France before 1789*, note C.—See, also, HANSA TOWNS.—Of the 48 Free Cities of the Empire remaining in 1803, 42 were then robbed of their franchises, under the exigencies of the Treaty of Luneville (see GERMANY: A. D. 1801-1803). After the Peace of Pressburg only three survived, namely, Hamburg, Lubeck and Bremen (see GERMANY: A. D. 1805-1806). These were annexed to France by Napoleon in 1810.—See FRANCE: A. D. 1810 (FEBRUARY-DECEMBER). The Congress of Vienna, in 1815, restored freedom to them, and to Frankfurt, likewise, and they became members of the Germanic Confederation then formed.—See VIENNA, THE CONGRESS OF.—Lubeck gave up its privileges as a free city in 1866, joining the Prussian Customs Union. Hamburg and Bremen did the same in 1888, being absorbed in the Empire. This extinguished the last of the "free cities." See GERMANY: A. D. 1888.

CITIES OF REFUGE. The six Jewish "cities of refuge" for the manslayer (see Numbers xxxv, 6, 13-15) were Kedesh, Shechem, Hebron, Bezer, Ramoth-Gilead, and Golan.

CIVIL-SERVICE REFORM IN ENGLAND.

It was not till long after 1832 that the inherent mischief of the partisan system [of appointments in the national civil service] became manifest to the great body of thinking people. When that result was attained, the final struggle with patronage in the hands of members of Parliament began on a large scale. It seems to have been, even then, foreseen by the best informed that it could not be removed by any partisan agency. They began to see the need of some method by which fitness for the public service could be tested otherwise than by the fiat of a member of Parliament or the vote of the Cabinet or the Treasury. What that method should be was one of the great problems of the future. No government had then solved it. That there must be tests of fitness independent of any political action, or mere official influence, became more and more plain to thinking men. The leaders of the great parties soon began to see that a public opinion in favor of such tests was being rapidly developed, which seriously threatened their power, unless the party system itself could be made more acceptable to the people. . . . There was an abundance of fine promises made. But no member gave up his patronage—no way was opened by which a person of merit could get into an office or a place except by the favor of the party or the condescension of a member. The partisan blockade of every port of entry to the public service, which made it tenfold easier for a decayed butler or an incompetent cousin of a member or a minister, than for the promising son of a poor widow, to pass the barrier, was, after the Reform Bill as before, rigidly maintained. Fealty to the party and work in its ranks—subserviency to members and to ministers—and electioneering on their behalf—these were the virtues before which the ways to office and the doors of the Treasury were opened. Year by year, the public discontent with the whole system increased. . . . During the Melbourne administration, between 1834 and 1841, a demand for examinations, as a condition for admission to the service, came from two very different quarters. One was the higher officials, who declared that they could not do the public work with such poor servants as the partisan system supplied. The other was the more independent, thoughtful portion of the people, who held it to be as unjust as it was demoralizing for members of Parliament and other officers to monopolize the privilege of saying who might enter the public service. Lord Melbourne then yielded so far as to allow pass examinations to be instituted in some of the larger offices; and he was inclined to favor competitive examinations, but it was thought to be too great an innovation to attempt at once. These examinations—several of them being competitive—introduced by public officers in self-defence many years previous to 1853, had before that time produced striking results. In the Poor Law Commission, for example, they had brought about a reform that arrested public attention. Under the Committee on Education, they had caused the selection of teachers so much superior 'that higher salaries were bidden for them for private service.' . . . These examinations were steadily extended from office to office down to the radical change made in 1853. . . . It had been provided, long before 1853,

that those designed for the civil service of India, should not only be subjected to a pass examination, but should, before entering the service, be subjected to a course of special instruction at Haileybury College, a sort of civil West Point. This College was abolished in 1854, but equivalent instruction was elsewhere provided for. The directors had the patronage of nomination for such instruction. . . . If it seems strange that a severe course of study, for two years in such a college, was not sufficient to weed out the incompetents which patronage forced into it, we must bear in mind that the same influence which sent them there was used to keep them there. . . . Both the Derby and the Aberdeen administrations, in 1852 and 1853, took notice that the civil service was in a condition of peril to British India; and, without distinction of party, it was agreed that radical reforms must be promptly made. There was corruption, there was inefficiency, there was disgraceful ignorance, there was a humiliating failure in the government to command the respect of the more intelligent portion of the people of India, and there was a still more alarming failure to overawe the unruly classes. It was as bad in the army as in the civil offices. . . . There was, in short, a hotbed of abuses prolific of those influences which caused the fearful outbreak of 1857. It was too late when reform was decided upon, to prevent the outbreak, but not too late to save British supremacy in India. A change of system was entered upon in 1853. The 36th and 37th clauses of the India act of that year provided 'that all powers, rights, and privileges of the court of directors of the said India Company to nominate or appoint persons to be admitted as students . . . shall cease; and that, subject to such regulations as might be made, any person, being a natural born subject of her Majesty, who might be desirous of presenting himself, should be admitted to be examined as a candidate.' Thus, it will be seen, Indian patronage received its death-blow, and the same blow opened the door of study for the civil service of India to every British citizen. . . . In 1853, the British Government had reached a final decision that the partisan system of appointments could not be longer tolerated. Substantial control of nominations by members of Parliament, however guarded by restrictions and improved by mere pass examinations, had continued to be demoralizing in its effect upon elections, vicious in its influence upon legislation, and fatal to economy and efficiency in the departments. . . . The administration, with Lord Aberdeen at its head, promptly decided to undertake a radical and systematic reform. . . . It was decided that, in the outset, no application should be made to Parliament. The reform should be undertaken by the English Executive . . . for the time being. The first step decided upon was an inquiry into the exact condition of the public service. Sir Stafford Northcote (the present Chancellor of the Exchequer) and Sir Charles Trevelyan were appointed in 1853 to make such inquiry and a report. They submitted their report in November of the same year. . . . A system of competitive examinations . . . [was] recommended. . . . The report was accompanied with a scheme for carrying the examinations into effect, from which I quote the following passages. . . . 'Such a measure will exercise the happiest indu

ence in the education of the lower classes throughout England, acting by the surest of all motives—the desire a man has of bettering himself in life. . . . They will have attained their situations in an independent manner through their own merits. The sense of this conduct cannot but induce self-respect and diffuse a wholesome respect among the lower no less than the higher classes of official men. . . . The effect of it in giving a stimulus to the education of the lower classes can hardly be overestimated.' Such was the spirit of the report. This was the theory of the merit system, then first approved by an English administration for the home government. I hardly need repeat that the examinations referred to as existing were (with small exception) mere pass examinations, and that the new examinations proposed were open, competitive examinations. . . . But the great feature of the report, which made it really a proposal for the introduction of a new system, was its advocacy of open competition. Except the experiment just put on trial in India, no nation had adopted that system. It was as theoretical as it was radical. . . . A chorus of ridicule, indignation, lamentation, and wrath arose from all the official and partisan places of politics. The government saw that a further struggle was at hand. It appeared more clear than ever that Parliament was not a very hopeful place in which to trust the tender years of such a reform. . . . The executive caused the report to be spread broadcast among the people, and also requested the written opinions of a large number of persons of worth and distinction both in and out of office. The report was sent to Parliament, but no action upon it was requested. . . . About the time that English public opinion had pronounced its first judgment upon the official report, and before any final action had been taken upon it, the Aberdeen administration went out. . . . Lord Palmerston came into power early in 1855, than whom, this most practical of nations never produced a more hard-headed, practical statesman. . . . Upon his administration fell the duty of deciding the fate of the new system advocated in the report. . . . He had faith in his party, and believed it would gain more by removing grave abuses than by any partisan use of patronage. . . . Making no direct appeal to Parliament, and trusting to the higher public opinion, Lord Palmerston's administration advised that an order should be made by the Queen in Council for carrying the reform into effect; and such an order was made on the 21st of May, 1855."—D. B. Eaton, *Civil Service in Great Britain*.

CIVIL-SERVICE REFORM IN THE UNITED STATES.—"The question as to the Civil Service [in the United States] arises from the fact that the president has the power of appointing a vast number of petty officials, chiefly postmasters and officials concerned with the collection of the federal revenue. Such officials have properly nothing to do with politics, they are simply the agents or clerks or servants of the national government in conducting its business; and if the business of the national government is to be managed on such ordinary principles of prudence as prevail in the management of private business, such servants ought to be selected for personal merit and retained for life or during good behaviour. It did

not occur to our earlier presidents to regard the management of the public business in any other light than this. But as early as the beginning of the present century a vicious system was growing up in New York and Pennsylvania. In those states the appointive offices came to be used as bribes or as rewards for partisan services. By securing votes for a successful candidate, a man with little in his pocket and nothing in particular to do could obtain some office with a comfortable salary. It would be given to him as a reward, and some other man, perhaps more competent than himself, would have to be turned out in order to make room for him. A more effective method of driving good citizens 'out of politics' could hardly be devised. It called to the front a large class of men of coarse moral fibre. . . . The civil service of these states was seriously damaged in quality, politics degenerated into a wild scramble for offices, salaries were paid to men who did little or no public service in return, and the line which separates taxation from robbery was often crossed. About the same time there grew up an idea that there is something especially democratic, and therefore meritorious, about 'rotation in office.'" On the change of party which took place upon the election of Jackson to the presidency in 1828, "the methods of New York and Pennsylvania were applied on a national scale. Jackson cherished the absurd belief that the administration of his predecessor Adams had been corrupt, and he turned men out of office with a keen zest. During the forty years between Washington's first inauguration and Jackson's the total number of removals from office was 74, and out of this number 5 were defaulters. During the first year of Jackson's administration the number of changes made in the civil service was about 2,000. Such was the abrupt inauguration upon a national scale of the so-called Spoils System. The phrase originated with W. L. Marcy, of New York, who, in a speech in the senate in 1831 declared that 'to the victors belong the spoils.' . . . In the canvass of 1840 the Whigs promised to reform the civil service, and the promise brought them many Democratic votes; but after they had won the election they followed Jackson's example. The Democrats followed in the same way in 1845, and from that time down to 1885 it was customary at each change of party to make a 'clean sweep' of the offices. Soon after the Civil War the evils of the system began to attract serious attention on the part of thoughtful people."—J. Fiske, *Civil Gov't in the U. S.*, pp. 261-264.—"It was not until 1867 that any important move was made [toward a reform]. . . . This was by Mr. Jencks, of Rhode Island, who introduced a bill, made an able report and several speeches in its behalf. Unfortunately, death soon put an end to his labors and deprived the cause of an able advocate. But the seed he had sown bore good fruit. Attention was so awakened to the necessity of reform, that President Grant, in his message in 1870, called the attention of Congress to it, and that body passed an act in March, 1871, which authorized the President to prescribe, for admission to the Civil Service, such regulations as would best promote its efficiency, and ascertain the fitness of each candidate for the position he sought. For this purpose, it says, he may 'employ suitable persons to conduct such inquiries, and may prescribe their duties, and establish

regulations for the conduct of persons who may receive appointments in the Civil Service.' In accordance with this act, President Grant appointed a Civil Service Commission, of which George William Curtis was made chairman, afterwards succeeded by Dorman B. Eaton, and an appropriation of \$25,000 was made by Congress to defray its expenses. A like sum was voted next year; but after that nothing was granted until June, 1882, when, instead of \$25,000 asked for by the President, \$15,000 was grudgingly appropriated. It is due to Mr. Silas W. Burt, Naval Officer in New York, who had long been greatly interested in the subject of Reform, to say that he deserves the credit of having been the first to introduce open competitive examinations. Before the appointment of Grant's committee, he had held such an examination in his office. . . . Under Grant's commission, open competitive examinations were introduced in the departments at Washington, and Customs Service at New York, and in part in the New York Postoffice. Although this commission labored under many disadvantages in trying a new experiment, it was able to make a very satisfactory report, which was approved by the President and his cabinet. . . . The rules adopted by Grant's commission were prepared by the chairman, Mr. Curtis. They were admirably adapted for their purpose, and have served as the basis of similar rules since then. The great interest taken by Mr. Curtis at that time, and the practical value of his work, entitled him to be regarded as the leader of the Reform. . . . Other able men took an active part in the movement, but the times were not propitious, public sentiment did not sustain them, and Congress refused any further appropriation, although the President asked for it. As a consequence, Competitive Examinations were everywhere suspended, and a return made to 'pass examinations.' And this method continued in use at Washington until July, 1883, after the passage of the Civil Service Reform Act. . . . President Hayes favored reform of the Civil Service, and strongly urged it in his messages to Congress; yet he did things not consistent with his professions, and Congress paid little attention to his recommendations, and gave him no effectual aid. But we owe it to him that an order was passed in March, 1879, enforcing the use of competitive examinations in the New York Custom House. The entire charge of this work was given to Mr. Burt by the Collector. . . . In 1880, Postmaster James revived the competitive methods in some parts of his office. . . . When the President, desiring that these examinations should be more general and uniform, asked Congress for an appropriation, it was refused. But, notwithstanding this, competitive examinations continued to be held in the New York Custom House and Postoffice until the passage of the Reform Act of 1883. Feeling that more light was needed upon the methods and progress of reform in other countries, President Hayes had formally requested Mr. Dorman B. Eaton to visit England for the purpose of making such inquiries. Mr. Eaton spent several months in a careful, thorough examination; and his report was transmitted to Congress in December, 1879, by the President, in a message which described it as an elaborate and comprehensive history of the whole subject. This report was afterwards embodied in Mr. Eaton's 'Civil Service in Great

Britain.' . . . For this invaluable service Mr. Eaton received no compensation from the Government, not even his personal expenses to England having been paid. And to Mr. Eaton is due, also, the credit of originating Civil Service Reform Associations."—H. Lambert, *The Progress of Civil Service Reform in the United States*, pp. 6-10.—"The National Civil Service Reform League was organized at Newport, R. I., on the 11th of August, 1881. It was the result of a conference among members of civil service reform associations that had spontaneously arisen in various parts of the country for the purpose of awakening public interest in the question, like the clubs of the Sons of Liberty among our fathers, and the anti-slavery societies among their children. The first act of the League was a resolution of hearty approval of the bill then pending in Congress, known as the Pendleton bill. Within less than two years afterward the Civil Service law was passed in Congress by a vote in the Senate of 38 yeas to 5 nays, 33 Senators being absent, and in the House only a week later, by a vote of 155 yeas to 47 nays, 87 members not voting. In the House the bill was put upon its passage at once, the Speaker permitting only thirty minutes for debate. This swift enactment of righteous law was due, undoubtedly, to the panic of the party of administration, a panic which saw in the disastrous result of the recent election a demand of the country for honest politics; and it was due also to the exulting belief of the party of opposition that the law would essentially weaken the dominant party by reducing its patronage. The sudden and overwhelming vote was that of a Congress of which probably the members had very little individual knowledge or conviction upon the subject. But the instinct in regard to intelligent public opinion was undoubtedly sure, and it is intelligent public opinion which always commands the future. . . . The passage of the law was the first great victory of the ten years of the reform movement. The second is the demonstration of the complete practicability of reform attested by the heads of the largest offices of administration in the country. In the Treasury and Navy departments, the New York Custom House and Post Office, and other important custom houses and post offices, without the least regard to the wishes or the wrath of that remarkable class of our fellow-citizens, known as political bosses, it is conceded by officers, wholly beyond suspicion of party independence, that, in these chief branches of the public service, reform is perfectly practicable and the reformed system a great public benefit. And, although as yet these offices are by no means thoroughly reorganized upon reform principles, yet a quarter of the whole number of places in the public service to which the reformed methods apply are now included within those methods."—G. W. Curtis, *Address, National C. S. Reform League*, 1891. See, also, UNITED STATES OF AM.: A. D. 1895.

CLAIRVAUX, The Monastery of.—St. Bernard, "the greatest reformer of the abuses of

the monastic life, if not the greatest monk in history [A. D. 1091-1153] . . . revived the practice in the monastery of Cîteaux, which he first entered, and in that of Clairvaux, which he afterwards founded, of the sternest discipline which had been enjoined by St. Benedict. He became the ideal type of the perfect monk. . . . He was not a Pope, but he was greater than any Pope of his day, and for nearly half a century the history of the Christian Church is the history of the influence of one monk, the Abbot of Clairvaux."—C. J. Stillé, *Studies in Mediæval Hist.*, ch. 12.—"The convent of Cîteaux was found too small for the number of persons who desired to join the society which could boast of so eminent a saint. Finding his influence beneficial, Bernard proceeded to found a new monastery. The spot which he chose for his purpose was in a wild and gloomy vale, formerly known as the Valley of Wormwood. . . . The district pertained to the bishopric of Langres; and here Bernard raised his far famed abbey of Clairvaux."—H. Stebbing, *Hist. of Christ's Univ. Church*, ch. 26.

CLANS, Highland.—"The word Clan signifies simply children or descendants, and the clan name thus implies that the members of it are or were supposed to be descended from a common ancestor or eponymus, and they were distinguished from each other by their patronymics, the use of surnames in the proper sense being unknown among them. [See GENS, ROMAN.] . . . In considering the genealogies of the Highland clans we must bear in mind that in the early state of the tribal organisation the pedigree of the sept or clan, and of each member of the tribe, had a very important meaning. Their rights were derived through the common ancestor, and their relation to him, and through him to each other, indicated their position in the succession, as well as their place in the allocation of the tribe land. In such a state of society the pedigree occupied the same position as the title-deed of the feudal system, and the Sennachies were as much the custodiers of the rights of families as the mere panegyrist of the clan. . . . During the 16th century the clans were brought into direct contact with the Crown, and in the latter part of it serious efforts were made by the Legislature to establish an efficient control over them. These gave rise to the Acts of 1587 and 1594 . . . ; but they were followed in a few years by an important Statute, which had a powerful effect upon the position of the clans, and led to another great change in the theory of their descent. . . . The chiefs of the clans thus found themselves compelled to defend their rights upon grounds which could compete with the claims of their eager opponents, and to maintain an equality of rank and prestige with them in the Heralds' Office, which must drive them to every device necessary to effect their purpose; and they would not hesitate to manufacture titles to the land when they did not exist, and to put forward spurious pedigrees better calculated to maintain their position when a native descent had lost its value and was too weak to serve their purpose. From this period MS. histories of the leading Highland families

began to be compiled, in which these pretensions were advanced and spurious charters inserted. . . . The form which these pretentious genealogies took was that of making the eponymus or male ancestor of the clan a Norwegian, Dane, or Norman, or a cadet of some distinguished family, who succeeded to the chiefship and to the territory of the clan by marriage with the daughter and heiress of the last of the old Celtic line, thus combining the advantage of a descent which could compete with that of the great Norman families with a feudal succession to their lands; and the new form of the clan genealogy would have the greater tendency to assume this form where the clan name was derived not from a personal name or patronymic but from a personal epithet of its founder. . . . The conclusion, then, to which [an] analysis of the clan pedigrees which have been popularly accepted at different times has brought us, is that, so far as they profess to show the origin of the different clans, they are entirely artificial and untrustworthy, but that the older genealogies may be accepted as showing the descent of the clan from its eponymus or founder, and within reasonable limits for some generations beyond him, while the later spurious pedigrees must be rejected altogether. It may seem surprising that such spurious pedigrees and fabulous origins should be so readily credited by the Clan families as genuine traditions, and receive such prompt acceptance as the true fount from which they sprung; but we must recollect that the fabulous history of Hector Boece was as rapidly and universally adopted as the genuine annals of the national history, and became rooted in those parts of the country to which its fictitious events related as local traditions. When Hector Boece invested the obscure usurper Grig with the name and attributes of a fictitious king, Gregory the Great, and connected him with the royal line of kings, the Clan Gregor at once recognised him as their eponymous ancestor, and their descent from him is now implicitly believed in by all the MacGregors. It is possible, however, from these genealogies, and from other indications, to distribute the clans in certain groups, as having apparently a closer connection with each other, and these groups we hold in the main to represent the great tribes into which the Gaelic population was divided before they became broken up into clans. The two great tribes which possessed the greater part of the Highlands were the Gallgaidheal or Gael in the west, who had been under the power of the Norwegians, and the great tribe of the Moravians, or Men of Moray, in the Central and Eastern Highlands. To the former belong all the clans descended of the Lords of the Isles, the Campbells and Macleods probably representing the older inhabitants of their respective districts; to the latter belong in the main the clans brought in the old Irish genealogies from the kings of Dalriada of the tribe of Lorn, among whom the old Mormaers of Moray appear. The group containing the Clan Andres or old Rosses, the Mackenzies and Mathesons, belong to the tribe of Ross, the Clan Donnachy to Athole, the Clan Lawren to Strathern, and the Clan Pharlane to Lennox, while the group containing the MacNabs, Clan Gregor, and Mackinnons, appear to have emerged from Glendochart, at least to be connected with the old Columban monasteries. The Clans, properly

so called, were thus of native origin; the surnames partly of native and partly of foreign descent."—W. F. Skene, *Celtic Scotland*, bk. 3.

CLIENTES, Roman.—"To [the Roman] family or household united under the control of a living master, and the clan which originated out of the breaking up of such households, there further belonged the dependents or 'listeners' (clientes, from 'cluere'). This term denoted not the guests, that is, the members of similar circles who were temporarily sojourning in another household than their own, and still less the slaves who were looked upon in law as the property of the household and not as members of it, but those individuals who, while they were not free burgesses of any commonwealth, yet lived within one in a condition of protected freedom. The class included refugees who had found a reception with a foreign protector, and those slaves in respect to whom their master had for the time being waived the exercise of his rights, and so conferred on them practical freedom. This relation had not properly the character of a relation 'de jure,' like the relation of a man to his guest or to his slave: the client remained non-free, although good faith and use and wont alleviated in his case the condition of non-freedom. Hence the 'listeners' of the household (clientes) together with the slaves strictly so-called formed the 'body of servants' ('familia')." — T. Mommsen, *Hist. of Rome*, bk. 1, ch. 5.

CLOACA MAXIMA OF ROME, The.—"Even at the present day there stands unchanged the great sewer, the 'cloaca maxima,' the object of which, it may be observed, was not merely to carry away the refuse of the city, but chiefly to drain the large lake which was formed by the Tiber between the Capitoline, Aventine and Palatine, then extended between the Palatine and Capitoline, and reached as a swamp as far as the district between the Quirinal and Viminal. This work, consisting of three semicircles of immense square blocks, which, though without mortar, have not to this day moved a knife's breadth from one another . . . equalling the pyramids in extent and massiveness, far surpasses them in the difficulty of its execution. It is so gigantic, that the more one examines it the more inconceivable it becomes how even a large and powerful state could have executed it. . . . Whether the cloaca maxima was actually executed by Tarquinius Priscus or by his son Superbus is a question about which the ancients themselves are not agreed, and respecting which true historical criticism cannot presume to decide. But thus much may be said, that the structure must have been completed before the city encompassed the space of the seven hills and formed a compact whole. . . . But such a work cannot possibly have been executed by the powers of a state such as Rome is said to have been in those times."—B. G. Niebuhr, *Lects. on the Hist. of Rome*, lects. 5 and 8.

CLUBS, Ancient Greek. See LESCHE, HETÆRÆES, ERANI and THIASI.

The Beef Steak.—"In 1735 there was formed in the capital [London] the celebrated Beef Steak Club, or 'Sublime Society of Beef Steaks,' as its members always desired to be designated. The origin of this club is singular, and was in this wise. Rich, a celebrated harlequin, and patentee of Covent Garden Theatre in the time of George II., while engaged during the daytime in direct-

ing and controlling the arrangements of the stage scenery was often visited by his friends, of whom he had a very numerous circle. One day, while the Earl of Peterborough was present, Rich felt the pangs of hunger so keenly that he cooked a beef-steak and invited the earl to partake of it, which he did, relishing it so greatly that he came again, bringing some friends with him on purpose to taste the same fare. In process of time the beef-steak dinner became an institution. Some of the chief wits and greatest men of the nation, to the number of 24, formed themselves into a society, and took as their motto 'Steaks and Liberty.' Among its early celebrities were Bubb Doddington, Aaron Hill, Dr. Hoadley, Richard Glover, the two Colmans, Garrick and John Beard. The number of the 'steaks' remained at its original limit until 1785, when it was augmented by one, in order to secure the admission of the Heir-Apparent."—W. C. Sydney, *England and the English in the 18th Century*, ch. 6 (v. 1).

The Brothers'.—In 1711, a political club which took this name was founded in London by Henry St. John, afterwards Lord Bolingbroke, to counteract the "extravagance of the Kit Cat" and "the drunkenness of the Beefsteak." "This society . . . continued for some time to restrain the outburst of those elements of disunion with which the Harley ministry was so rife. To be a member of this club was esteemed a distinguished honour. They addressed each other as 'brother'; and we find their ladies in their correspondence claiming to be enrolled as sisters. The members of this club were the Dukes of Ormond, Shrewsbury, Beaufort; the Earls of Oxford, Arran, Jersey, Orrery, Bathurst; Lords Harley, Duplin, Masham; Sir Robert Raymond, Sir William Windham, Col. Hill, Col. Desney, St. John, Granville, Arbuthnot, Prior, Swift, and Friend."—G. W. Cooke, *Memoirs of Bolingbroke*, v. 1, ch. 10.

Dr. Johnson's.—"During his literary career Dr. Johnson assisted in the foundation of no fewer than three clubs, each of which was fully deserving of the name. In 1749 he established a club at a house in Ivy Lane, Paternoster Row, and only the year before he died he drafted a code of rules for a club, of which the members should hold their meetings, thrice in each week, at the Essex Head in the Strand; an establishment which was then kept by a former servant of his old friends the Thrales. Those members who failed to put in an appearance at the club were required to forfeit the sum of two pence. There is an interesting account of one of the meetings of the Ivy Lane Club, at which Johnson presided, in Sir John Hawkins's biography of him. . . . The next club with which Johnson became acquainted was the most influential of them all, and was the one which is now chiefly remembered in connection with his name. It was, however, a plant of slow and gradual growth. The first meeting of its members, who exulted in the designation of 'The Club,' was held in 1763 at a hostelry called the Turk's Head, situated in Gerard Street, Soho. 'The

Club' retained that title until after the funeral of Garrick, when it was always known as 'The Literary Club.' As its numbers were small and limited, the admission to it was an honour greatly coveted in political, legal, and literary circles. 'The Club' originated with Sir Joshua Reynolds, then President of the Royal Academy, who at first restricted its numbers to nine, these being Reynolds himself, Samuel Johnson, Edmund Burke, Dr. Christopher Nugent (an accomplished Roman Catholic physician), Bennet Langton, Topham Beauclerk, Sir John Hawkins, Oliver Goldsmith, and M. Chamier, Secretary in the War Office. The members assembled every Monday evening punctually at seven o'clock, and, having partaken of an inexpensive supper, conversed on literary, scientific and artistic topics till the clock indicated the hour of retiring. The numbers of the Literary Club were subsequently augmented by the enrolment of Garrick, Edward Gibbon, Lord Charlemont, Sir William Jones, the eminent Oriental linguist, and James Boswell, of biographical fame. Others were admitted from time to time, until in 1791 it numbered 35. In December, 1772, the day of meeting was altered to Friday, and the weekly suppers were commuted to fortnightly dinners during the sitting of parliament. Owing to the conversion of the original tavern into a private house, the club moved, in 1783, first to Prince's, in Sackville Street; next to Le Telier's in Dover Street; then, in 1792, to Parsloe's in St. James's Street; and lastly, in February, 1799, to the Thatched House Tavern in St. James's Street, where it remained until long after 1848."—W. C. Sydney, *England and the English in the 18th Century*, ch. 6 (v. 1).

The King's Head. See ENGLAND: A. D. 1678-1679.

The Kit Cat.—"The Kit Cat Club was instituted in 1699. Its most illustrious members were Congreve, Prior, Sir John Vanbrugh, the Earl of Orrery, and Lord Somers; but the members becoming more numerous, the most violent party obtained the majority, and the Earl and his friends were less regular in their attendance. . . . The Kit Cat took its name from a pastry-cook [Christopher Katt], whose pies formed a regular dish at the suppers of the club."—G. W. Cooke, *Memoirs of Bolingbroke*, v. 1, ch. 10, foot-note.

The Mohocks. See MOHOCKS.

The October and the March.—"The October Club came first into importance in the latest years of Anne, although it had existed since the last decade of the 17th century. The stout Tory squires met together in the 'Bell' Tavern, in narrow, dirty King Street, Westminster, to drink October ale, under Dahl's portrait of Queen Anne, and to trouble with their fierce uncompromising Jacobitism the fluctuating purposes of Harley and the crafty counsels of St. John. The genius of Swift tempered their hot zeal with the cool air of his 'advice.' Then the wilder spirits seceded, and formed the March Club, which retained all the angry Jacobitism of the parent body, but lost all its importance."—J. McCarthy, *Hist. of the Four Georges*, v. 1, ch. 5.

ALSO IN: W. C. Sydney, *England and the English in the 18th century*, ch. 6.

CLUBMEN. See ENGLAND: A. D. 1645 (JULY—AUGUST).

CLUGNY, OR CLUNY, The Monastery of.—The famous monastery of Clugny, or Cluny, was founded A. D. 910, at Cluny, near Macon, in Burgundy, by the abbot Count Berno, who had previously established and ruled the monastery of Gigni, near Lyons. It was founded under the auspices and at the expense of William, Count of Auvergne, commonly called William the Pious. "In the disastrous times which followed the death of Charles the Great and the failure of his scheme to reorganize the Western world under a single head, the discipline of the religious houses fell with everything else; fell, not perhaps quite so soon, yet by the end of the ninth century had fallen almost as low as it was possible to fall. But here symptoms of a moral reaction showed themselves earlier than elsewhere. The revival dates from 910, the year of the foundation of the Monastery of Clugny in Burgundy, which was destined to exercise an enormous influence on the future of the Church. While matters at Rome were at their worst, there were silently training there the men who should inaugurate a new state of things [notably Hildebrand, afterwards Pope Gregory VII.] Already, so one said at the time, the whole house of the Church was filled with the sweet savour of the ointment there poured out. It followed that wherever in any religious house there were any aspirations after a higher life, any longings for reformation, that house affiliated itself to Clugny; thus beginning to constitute a Congregation, that is a cluster of religious houses, scattered it might be over all Christendom, but owning one rule, acknowledging the superiority of one mother house, and receiving its abbots and priors from thence. In the Clugnian Congregation, for example, there were about two thousand houses in the middle of the twelfth century—these mostly in France; the Abbot, or Arch-Abbot, as he was called, of Clugny, being a kind of Pope of Monasticism, and for a long time, the Pope excepted, quite the most influential Church-ruler in Christendom."—R. COLCHESTER.—When Cæsar entered Britain, the site of modern Colchester was occupied by an “oppidum,” or fastness of the Trinobantes, which the Romans called Camulodunum. A little later, Camulodunum acquired some renown as the royal town of the Trinobantine king, or prince, Cunobelin, — the Cymbeline of Shakespeare. It was after the death of Cunobelin, and when his son Caractacus was king, during the reign of the emperor Claudius, that the Romans began their actual conquest of Britain. Claudius was present, in person, when Camulodunum was taken, and he founded there the first Roman colony in the island, calling it Claudiana Victricensis. That name was too cumbersome to be preserved; but the colonial character of the town caused it to be called Colonia-ceaster, the Colonia fortress,—abbreviated, in time, to Colne-ceaster, and, finally, to Colchester. The colony was destroyed by the Iceni, at the time of their rising, under Boadicea, but was reconstituted and grew into an important Roman town.—C. L. Cutts, *Colchester*, ch. 1-6.

A. D. 1648.—The Roundhead siege and capture.—On the collapse of the Royalist rising of 1648, which produced what is called the Second Civil War of the Puritan revolutionary period, Colchester received the “wreck of the insurrection,” so far as London and the surrounding country had lately been threatened by it. Troops of cavaliers, under Sir Charles Lucas and Lord Capel, having collected in the town, were surrounded and beleaguered there by Fairfax, and held out against their besiegers from June until late in August. “After two months of the most desperate resistance, Colchester, conquered by famine and sedition, at last surrendered (Aug. 27); and the next day a court-martial condemned to death three of its bravest defenders, Sir Charles Lucas, Sir George Lisle, and Sir Bernard Gascoign, as an example, it was said, to future rebels who might be tempted to imitate them. In vain did the other prisoners, Lord Capel at their head, entreat Fairfax to suspend the execution of the sentence, or at least that they should all undergo it, since all were alike guilty of the offence of these three. Fairfax, excited by the long struggle, or rather intimidated by Ireton, made no answer, and the condemned officers were ordered to be shot on the spot.” Gascoign, however, was reprieved at the last moment.—F. P. Guizot, *Hist. of the Eng. Revolution*, bk. 8.

COLCHIANS, The.—“The Colchians appear to have been in part independent, in part subject to Persia. Their true home was evidently that tract of country [on the Euxine] about the river Phasis. . . . Here they first became known to the commercial Greeks, whose early dealings in this quarter seem to have given rise to the poetic legend of the Argonauts. The limits of Colchis varied at different times, but the natural bounds were never greatly departed from. They were the Euxine on the east, the Caucasus on the north, the mountain range which forms the watershed between the Phasis (Rion) and the Cyrus (Kur) on the west, and the high ground

between Batoum and Kars (the Moschian mountains) on the south. . . . The most interesting question connected with the Colchians is that connected with their nationality. They were a black race dwelling in the midst of whites, and in a country which does not tend to make its inhabitants dark complexioned. That they were comparatively recent immigrants from a hotter climate seems therefore to be certain. The notion entertained by Herodotus of their Egyptian extraction appears to have been a conjecture of his own. . . . Perhaps the modern theory that the Colchians were immigrants from India is entitled to some share of our attention. . . . If the true Colchi were a colony of blacks, they must have become gradually absorbed in the white population proper to the country."—G. Rawlinson, *History of Herodotus*, bk. 7, app. 1.—See, also, ALARODIANS.

COLOMBIAN STATES, The.—This general title will be used, for convenience, to cover, for considerable periods of their history, the territory now divided between the republics of Venezuela, Ecuador, and the United States of Colombia (formerly New Granada), the latter embracing the Isthmus of Panama. The history of these countries being for a long time substan-

tially identical in the main, and only distinguishable at intervals, it seems to be difficult to do otherwise than hold it, somewhat arbitrarily, under one heading, until the several currents of events part company distinctly.

The aboriginal inhabitants. See AMERICAN ABORIGINES: CHIBCHA.

A. D. 1536—1731.—The Spanish conquest of New Granada.—Creation of the new viceroyalty.—“For some time after the disastrous failure of the attempt of Las Casas to found a colony on the Pearl coast of Cumaná, the northern portion of Spanish South America, from the Orinoco westwards, is almost lost to history. The powers working for good had signally failed, and the powers of evil seemed to have it almost all their own way. . . . Lying behind these extensive coasts to the westward in the interior, is the region to which the Spaniards gave the name of the kingdom of New Granada, the name being applied in consequence of a resemblance which was detected between the plain around Santa Fé de Bogotá and the royal Vega which adjoins the historical Moorish capital. New Granada was a most extensive region, comprising as it did the entire country from sea to sea in the north, lying between 60° and 78° longitude, and from 6° to 15° of latitude.” The Spanish conquest of New Granada was achieved in the main by Ximenes de Quesada, who invaded the country from the north, although the governor of Quito, Benalcázar, entered it likewise from the south. “Ximenes de Quesada came to America about the year 1535, in the suite of the Governor of Santa Marta, by whom he was selected to lead an expedition against the Chibchas, who dwelt on the plain of Bogotá and around the headwaters of the Magdalena. Setting out in April 1536 with 800 men, he succeeded in pushing his way through the forest and across innumerable streams. He contrived to subsist for eight months, during which he traversed 450 miles, enduring meanwhile the very utmost exertions and privations that human nature could support. . . . When he had surmounted the natural difficulties in his path, his remaining force consisted of but 166 men, with 60 horses. On March 2d, 1537, he resumed his advance; and, as usually happened, the mere sight of his horsemen terrified the Indians into submission. At Tunja, according to the Spanish historians, he was treacherously attacked whilst resting in the palace of one of the chiefs. . . . In any case, the chief was taken, and, after much slaughter, Ximenes found himself the absolute possessor of immense riches, one golden lantern alone being valued at 6,000 ducats. From Tunja Ximenes marched upon the sacred city of Iraca, where two Spanish soldiers accidentally set fire to the great Temple of the Sun. The result was that, after a conflagration which lasted several days, both the city and the temple were utterly destroyed. . . . On the 9th of August, 1538, was founded the city of Bogotá. Ximenes was soon here joined by Frederman, a subject of the Emperor Charles V., with 160 soldiers, with whom he had been engaged in conquering Venezuela; and likewise by Benalcázar, the conqueror of Quito. This latter warrior had crossed the continent in triumph at the head of 150 Spaniards, together with a multitude of native followers.” In the intrigues and jealous rivalries between the three which

followed, Ximenes de Quesada was pushed aside, at first, and even fined and banished by the Emperor; but in the end he triumphed and was appointed marshal of the kingdom of New Granada. "On his return to Bogotá in 1551, he, to his credit, exhibited an energy in protecting the people of the country against their invaders, equal to that which he had displayed in effecting their conquest. Ten years later he commanded a force organized to repel an attack from the ruler of Venezuela; shortly after which he was appointed Adelantado of the Kingdom of New Granada. He devoted three years, and an enormous amount of toil and money, to an absurd expedition in quest of the fabled El Dorado [see EL DORADO]." Quesada died of leprosy in 1572. Until 1718 the kingdom of New Granada remained subject to the Viceroy of Peru. In that year the Viceroyalty of Peru "was divided into two portions, the northern region, from the frontiers of Mexico as far as to the Orinoco, and on the Southern Sea from Veragua to Tumbez, forming the Viceroyalty of New Granada, of which the capital was Bogotá. To this region, likewise, was assigned the inland province of Quito. The Viceroyalty of New Granada, in fact, comprised what now [1884] forms the Republic of Venezuela, the United States of Columbia, and the Republic of Ecuador." In 1731 "it was deemed expedient to detach from the Viceroyalty of New Granada the provinces of Venezuela, Maracaibo, Varinas, Cumaná, and Spanish Guyana, and to form them into a separate Captain-Generalship, the residence of the ruler being fixed at Caracas in Venezuela."—R. G. Watson, *Spanish and Portuguese South America*, v. 2, ch. 9.

A. D. 1810-1819.—The struggle for independence and its achievement.—Miranda and Simon Bolivar.—The Earthquake in Venezuela.—The founding of the Republic of Colombia.—"The Colombian States occupy the first place in the history of South American independence. . . . The Colombian States were first in the struggle because they were in many ways nearest to Europe. It was through them that intercourse between the Pacific coast and Europe was mainly carried on: Porto Bello and Carthagen were thus the main inlets of European ideas. Besides, there was here constant communication with the West Indies; and government, population and wealth were less centralised than in the more important viceroyalties of Mexico and Peru. The Indians of New Granada had always been a restless race, and the increase of taxation which was resorted to for the defence of the coast in the war with Great Britain (1777-1783) produced discontents among the whole population, both red and white. . . . The French Revolution, coming soon afterwards, was another link in the chain of causes. . . . In Venezuela, which the industry of its inhabitants had raised from a poor mission district to a thriving commercial province, the progress of modern ideas was yet faster. . . . The conquest of Trinidad by England in 1797 gave a new turn to the movement. . . . It was from Trinidad that the first attempts were made to excite the Spanish colonists to revolution. Francis Miranda, by whom this was done, was a type of many other men to whom is due the credit of leading the South American peoples to independence. He was a native of Caracas,

and when a young man had held a French commission in the American War of Independence. On his return to Venezuela in 1783 he found the populace, as we have already mentioned, in an excited state, and finding that he was suspected of designs for liberating his own country, he went to Europe, and again attached himself to the French service. . . . Being proscribed by the Directory, he turned to England, and . . . when the war [between England and Spain] broke out afresh in 1804, and England sent out an expedition to invade Buenos Ayres, Miranda believed that his opportunity was come. In 1806, by English and American aid, he sailed from Trinidad and landed with 500 men on the coast of Venezuela. But the 'Colombian Army,' as Miranda named it, met with a cool reception among the people. His utter inability to meet the Spanish forces compelled him to retreat to Trinidad, nor did he reappear on the continent until after the revolution of 1810. The principal inhabitants of Caracas had been meditating the formation of a provisional government, on the model of the juntas of Spain, ever since the abdication of the king [see SPAIN: A. D. 1807-1808]; but it was not until 1810, when the final victory of Napoleon in Spain appeared certain, that they made a decisive movement in favour of independence. Spain, for the time at least, was now blotted out of the list of nations. Acting, therefore, in the name of Ferdinand VII., they deposed the Spanish colonial officers, and elected a supreme junta or council. Similar juntas were soon established in New Granada, at Santa Fé, Quito, Carthagen, and the other chief towns of the Viceroyalty . . . and the fortune of the patriot party in new Granada, from their close neighbourhood, was closely linked with that of the Venezuelans. The Regency of Cadiz, grasping for itself all the rights and powers of the Spanish nation, determined to reduce the colonists to subjection. They therefore declared the port of Caracas in a state of blockade, as the British government had done in the previous generation with that of Boston; and, as in the case of Boston, this resolution of the Regency amounted to a declaration of war. . . . A congress of all the provinces of Venezuela now met at Caracas, and published a declaration of independence on the 5th of July, 1811, and those of Mexico and New Granada soon followed. . . . The powers of nature seemed to conspire with the tyranny of Europe to destroy the young South American Republic. On the 26th of March, 1812, Venezuela was visited by a fearful earthquake, which destroyed the capital [Caracas] and several other towns, together with 20,000 people, and many others perished of hunger and in other ways. This day was Holy Thursday; and the superstitious people, prompted by their priests, believed this awful visitation to be a judgment from God for their revolt. The Spanish troops, under Monteverde, now began a fresh attack on the disquieted Venezuelans. Miranda, who on his return had been placed at the head of the army, had in the meantime overrun New Granada, and laid the foundation of the future United States of Colombia. But the face of affairs was changed by the news of the earthquake. Smitten with despair, his soldiers now deserted to the royalists; he lost ground everywhere; the fortress of Puerto Cavello, commanded by the

great Bolivar, then a colonel in the service of the Republic, was surrendered through treachery. On the 25th of June Miranda himself capitulated, with all his forces; and Venezuela fell once more into the hands of the royalists. Miranda himself was arrested, in defiance of the terms of the surrender, and perished in an European dungeon, as Toussaint had perished a few years before. . . . Monteverde emptied the prisons of their occupants, and filled them with the families of the principal citizens of the republic; and Caracas became the scene of a Reign of Terror. After Miranda's capitulation, Bolivar had gone to New Granada, which still maintained its independence, and entered into the service of that republic. Bolivar now reappeared in a new character, and earned for himself a reputation in the history of the new world which up to a certain point ranks with that of Washington. Simon Bolivar, like Miranda, was a native of Caracas. . . . Like Miranda, he had to some extent learned modern ideas by visiting the old world and the United States. When the cruelties of Monteverde had made Venezuela ripe for a new revolt, Bolivar reappeared on his native soil at the head of a small body of troops from the adjacent republic. The successes which he gained so incensed the royalists that they refused quarter to their prisoners, and war to the death ("guerra a muerte") was proclaimed. All obstacles disappeared before Bolivar's generalship, and on the 4th of August, 1813, he publicly entered Caracas, the fortress of Puerto Cavello being now the only one in the possession of the royalists. Bolivar was hailed with the title of the liberator of Venezuela. He was willing to see the republic restored; but the inhabitants very properly feared to trust at this time to anything but a military government, and vested the supreme power in him as dictator (1814). The event indeed proved the necessity of a military government. The defeated royalists raised fresh troops, many thousands of whom were negro slaves, and overran the whole country; Bolivar was beaten at La Puerta, and forced to take refuge a second time in New Granada; and the capital fell again into the hands of the royalists. . . . The War of Independence had been undertaken against the Regency; and had Ferdinand, on his restoration to the throne in 1814, shown any signs of conciliation, he might yet have recovered his American provinces. But the government persisted in its course of absolute repression. . . . New Granada, where Bolivar was general in chief of the forces, was the only part where the insurrection survived; and in 1815 a fleet containing 10,000 men under General Morillo arrived off Cartagena, its principal port. . . . Cartagena was only provisioned for a short time; and Bolivar, overpowered by numbers, quitted the soil of the continent and went to the West Indies to seek help to relieve Cartagena, and maintain the contest for liberty." Obtaining assistance in Hayti, he fitted out an expedition "which sailed in April from the port of Aux Cayes. Bolivar landed near Cumana, in the eastern extremity of Venezuela, and from this point he gradually advanced westwards, gaining strength by slow degrees. In the meantime, after a siege of 116 days, Cartagena surrendered; 5,000 of its inhabitants had perished of hunger. Both provinces were

now in Morillo's hands. Fancying himself completely master of the country, he proceeded to wreak a terrible vengeance on the Granadines. But at the news of Bolivar's reappearance, though yet at a distance, the face of affairs changed. . . . His successes in the year 1817 were sure, though slow: in 1818, after he had been joined by European volunteers, they were brilliant. Bolivar beat the royalists in one pitched battle after another [Sagamoso, July 1, 1819, and Pantano de Bargas, July 25]; and at length a decisive victory was won by his lieutenant, Santander, at Boyaca, in New Granada, August 1, 1819. This battle, in which some hundreds of British and French auxiliaries fought on the side of liberty, completely freed the two countries from the yoke of Spain."—E. J. Payne, *Hist. of European Colonies*, ch. 16.

Also in: C. S. Cochrane, *Journal of a Residence in Colombia*, v. 1, ch. 6-8.—H. Brownell, *N. and S. America Illustrated*, pp. 316-334.—C. Cushing, *Simon Bolivar* (*N. Am. A. D. 1819-1830.—The glory and the fall of Bolivar.—Dissolution of the Colombian Federation.—Tyranny under the Liberator, and monarchical schemes.—Three days after the battle of Boyaca, Bolivar entered Bogota in triumph. "A congress met in December and decided that Venezuela and Nueva Granada should form one republic, to be called Colombia. Morillo departed for Europe in 1820, and the victory gained by Bolivar at Carabobo on June 24, 1821, decided the fate of Colombia. In the following January General Bolivar assembled an army at Popayan to drive the Spaniards out of the province of Quito. His second in command, General Sucre, led an advanced guard, which was reinforced by a contingent of volunteers from Peru, under Santa Cruz. The Spanish General Ramirez was entirely defeated in the battle of Pichincha, and Quito was incorporated with the new republic of Colombia."—C. R. Markham, *Colonial Hist. of S. America* (*Narrative and Critical Hist. of Am.*, v. 8, ch. 5).—"The provinces of New Granada and Venezuela, together with the Presidency of Quito, now sent delegates to the convention of Cucuta, in 1821, and there decreed the union of the three countries as a single state by the name of the Republic of Colombia. The first Colombian federal constitution was concocted by the united wisdom of the delegates; and the result might easily have been foreseen. It was a farrago of crude and heterogeneous ideas. Some of its features were imitated from the American political system, some from the English, some from the French. . . . Bolivar of course became President; and the Republic had need of him. The task of liberation was not yet completed. Cartagena, and many other strong places, remained in Spanish hands. Bolivar reduced these one by one, and the second decisive victory of Carabobo, in 1822, finally secured Colombian freedom. The English claim the chief share in the battle of Carabobo: for the British legion alone carried the main Spanish position, losing in the feat two-thirds of its numbers. The war now fast drew to its close. The republic was able to contest with the invaders the dominion of the sea: General Padilla, on the 23rd of July, 1823, totally destroyed the Spanish fleet:

and the Spanish commander finally capitulated at Puerto Cavello in December. All these hard-won successes were mainly owing to the bravery and resolution of Bolivar. Bolivar deserves to the full the reputation of an able and patriotic soldier. He was now set free . . . to render important services to the rest of South America: and among the heroes of independence perhaps his name will always stand first. But Bolivar the statesman was a man very different from Bolivar the general. He was alternately timid and arbitrary. He was indeed afraid to touch the problems of statesmanship which awaited him: but instead of leading the Colombian people through independence to liberty, he stubbornly set his face against all measures of political or social reform. His fall may be said to have begun with the moment when his military triumphs were complete. The disaffection to the constitution of the leading people in Venezuela and Ecuador [the new name given to the old province of Quito, indicating its position at the equator] in 1826 and 1827, was favoured by the Provincial governors, Paez and Mosquera; and Bolivar, instead of resisting the disintegration of the state, openly favoured the military dictatorships which Paez and Mosquera established. This policy foreshadowed the reign of absolutism in New Granada itself. Bolivar . . . had now become not only the constitutional head of the Colombian federation, but also the military head of the Peruvian republics [see PERU: A. D. 1820-1826, 1825-1826, and 1826-1876]: and there can be no doubt that he intended the Colombian constitution to be reduced to the Peruvian model. As a first step towards reuniting all the South American nations under a military government, Paez, beyond reasonable doubt, with Bolivar's connivance, proclaimed the independence of Venezuela, April 30th, 1826. This practically broke up the Colombian federation: and the destruction of the constitution, so far as it regarded New Granada itself, soon followed. Bolivar had already resorted to the usual devices of military tyranny. The terrorism of Sbirri, arbitrary arrests, the assumption of additional executive powers, and, finally, the suppression of the vice-presidency, all pointed one way. . . . At length, after the practical secession of Venezuela and Ecuador under their military rulers, Congress decreed a summons for a Convention, which met at Ocaña in March, 1828. . . . The liberals, who were bent on electoral reform and decentralization, were paralyzed by the violent bearing of the Bolivian leaders: and Bolivar quartered himself in the neighbourhood, and threatened the Convention at the head of an army of 3,000 veterans. He did not, however, resort to open force. Instead of this, he ordered his party to recede from the Convention: and this left the Convention without the means of making a quorum. From this moment the designs of Bolivar were unmistakable. The dissolution of the Convention, and the appointment of Bolivar as Dictator, by a junta of notables, followed as a matter of course; and by the 'Organic decree' of August 1828, Bolivar assumed the absolute sovereignty of Colombia. A reign of brute force now followed: but the triumph of Bolivar was only ephemeral. . . . The Federation was gone: and it became a question of securing military rule in the separate provinces. A portentous change now occurred in Ecuador. The democratic party

under Flores triumphed over the Bolivians under Mosquera: and Paez assured his chief that no help was to be expected from Venezuela. At the Convention of Bogota, in 1830, though it was packed with Bolivar's nominees, it became clear that the liberator's star had set at last. . . . This convention refused to vote him President. Bolivar now withdrew from public life: and a few months later, December 17, 1830, he died broken-hearted at San Pedro, near Santa Martha. Bolivar, though a patriot as regarded the struggle with Spain, was in the end a traitor to his fellow citizens. Recent discoveries leave little doubt that he intended to found a monarchy on the ruins of the Spanish dominion. England and France, both at this time strongly conservative powers, were in favour of such a scheme; and a Prince of the House of Bourbon had already been nominated to be Bolivar's successor."—E. J. Payne, *Hist. of European Colonies*, ch. 16.—"About one month before his death, General Bolivar, the so-called 'Liberator' of South America, wrote a letter to the late General Flores of Ecuador, in which the following remarkable passages occur, which have never before been published in the English language: 'I have been in power for nearly 20 years, from which I have gathered only a few definite results: 1. America, for us, is ungovernable. 2. He who dedicates his services to a revolution, plows the sea. 3. The only thing that can be done in America, is to emigrate. 4. This country will inevitably fall into the hands of the unbridled rabble, and little by little become a prey to petty tyrants of all colors and races.'"—F. Hassaurek, *Four Years among Spanish-Americans*, ch. 12.

ALSO IN: J. M. Spence, *The Land of Bolivar*, v. 1, ch. 7.—E. B. Eastwick, *Venezuela*, ch. 11 (*Battle of Carabobo*).

A. D. 1821-1854.—Emancipation of slaves.—The abolition of slavery in the three republics of New Granada, Venezuela and Ecuador was initiated in the Republic of Colombia, while it embraced them all. "By a law of the 21st of July, 1821, it was provided that the children of slaves, born after its publication in the principal cities of the republic, should be free. . . . Certain revenues were appropriated to the creation of an emancipation fund in each district. . . . Aside from a certain bungling looseness with which almost all Spanish-American laws are drawn, it [the act of 1821] contains some very sensible regulations, and served to lay a solid foundation for the work of emancipation, since completed by the three republics which then constituted Colombia." In Ecuador the completion of emancipation was reached in 1854.—F. Hassaurek, *Four Years among Spanish-Americans*, pp. 330-333.

A. D. 1826.—The Congress of Panama.—"The proposition for assembling this body emanated from Bolivar, who, in 1823, as president of Colombia, invited the governments of Mexico, Peru, Chile, and Buenos Ayres, to form a confederacy of the Spanish-American states, by means of plenipotentiaries to be convened, in the spirit of classic analogy, in the isthmus of Panama. To this invitation the governments of Peru and Mexico promptly acceded, Chile and Buenos Ayres neglected or declined to be represented in the assembly, for the reasons which we shall presently state. This magnificent idea of a second Achaean League seized on the imagina-

tions of many speculative and of some practical men in America and Europe, as destined to create a new era in the political history of the world by originating a purer system of public law, and almost realizing Bernardin de Saint Pierre's league of the modern nations. In its original shape, it was professedly a plan of a belligerent nature, having for its main object to combine the revolutionized states against the common enemy. But time was required for carrying it into effect. Meanwhile the project, magnified by the course of events, began to change its complexion. The United States were invited to participate in the Congress, so as to form an American policy, and a rallying point for American interests, in opposition to those of Europe; and, after the discussions which are so familiar to all, the government of the United States accepted the invitation, and despatched its representatives to Panama. . . . In the interval, between the proposal of the plan and its execution, Central America was added to the family of American nations, and agreed to take part in the Congress. At length, after many delays, this modern Amphictyonic Council, consisting of plenipotentiaries from Colombia, Central America, Peru and Mexico, assembled in the city of Panama, June 22, 1826, and in a session of three weeks concluded various treaties; one of perpetual union, league, and confederation; others relating to the contingents which the confederates should contribute for the common defence; and another for the annual meeting of the Congress in time of war. Having thus promptly despatched their private affairs, the assembly adjourned to Tacubaya in Mexico, on account of the insalubrious climate of Panama, before the delegation of the United States had arrived; since when it has justly acquired the epithet of 'introuvable,' and probably never will reassemble in its original form. Is there not a secret history of all this? Why did Chile and Buenos Ayres refuse to participate in the Congress? Why has it now vanished from the face of the earth? The answer given in South America is, that Bolivar proposed the assembly as part of a grand scheme of ambition,—ascribed to him by the republican party, and not without some countenance from his own conduct,—for establishing a military empire to embrace the whole of Spanish-America, or at least an empire uniting Colombia and the two Perus. To give the color of plausibility to the projected assembly, the United States were invited to be represented; and it is said Bolivar did not expect, nor very graciously receive, their acceptance of the invitation."—C. Cushing, *Bolivar and the Bolivian Constitution* (*N. A. Rev.*, Jan., 1830).—In the United States "no question, in its day, excited more heat and intemperate discussion, or more feeling between a President and Senate, than this proposed mission to the Congress of American nations at Panama; and no heated question ever cooled off and died out so suddenly and completely. . . . Though long since sunk into oblivion, and its name almost forgotten, it was a master subject on the political theatre during its day; and gave rise to questions of national and of constitutional law, and of national policy, the importance of which survive the occasion from which they sprung; and the solution of which (as then solved), may be some guide to future action, if similar questions again

occur. Besides the grave questions to which the subject gave rise, the subject itself became one of unusual and painful excitement. It agitated the people, made a violent debate in the two Houses of Congress, inflamed the passions of parties and individuals, raised a tempest before which Congress bent, made bad feeling between the President [John Quincy Adams] and the Senate; and led to the duel between Mr. Randolph and Mr. Clay. It was an administration measure, and pressed by all the means known to an administration. It was evidently relied upon as a means of acting upon the people—as a popular movement which might have the effect of turning the tide which was then running high against Mr. Adams and Mr. Clay. . . . Now, the chief benefit to be derived from its retrospect—and that indeed is a real one—is a view of the firmness with which was then maintained, by a minority, the old policy of the United States, to avoid entangling alliances and interference with the affairs of other nations;—and the exposition of the Monroe doctrine, from one so competent to give it as Mr. Adams."—T. H. Benton, *Thirty Years' View*, ch. 25 (v. 1).

A. D. 1830-1886.—Revolutions and civil wars.—The New Confederation (1863) of the United States of Colombia.—The Republic of Colombia.—"New Granada was obliged in 1830 to recognize the disruption of Colombia, which had long been an accomplished fact. From this date the three states have a separate history, which is very much of a piece, though Venezuela was for some years preserved from the intestine commotions which have from the beginning distracted New Granada and Ecuador. . . . Mosquera, who had won the election which decided the fate of Bolivar did not long occupy the presidency. . . . Mosquera was soon driven out by General Urdanete, who was now at the head of the conservative or Bolivian party. But after the death of their leader, this party suffered a natural relapse, and Urdanete was overthrown early in 1831. The history of New Granada may be said really to commence with the presidency of Bolivar's old rival and companion in arms, Santander, who was elected under the constitution of 1832. . . . His presidency . . . was a comparatively bright episode; and with its termination in 1836 begins the dark and troubled period which the Granadines emphatically designate by the name of the 'Twelve Years.' The scanty measure of liberalism which Santander had dealt out to the people was now withdrawn. Marquez, his successor, was a sceptic in politics and a man of infirm will. . . . Now began the ascendancy of clericalism, of absolutist oligarchy, and of government by the galleys. This same system continued under President Herran, who was elected in 1841; and then appeared on the scene, as his chief minister, the famous Dr. Ospina," who brought back the Jesuits and curtailed the constitution. Liberalism again gained ground, electing General Lopez to the presidency in 1849 and once more expelling the Jesuits. In April 1854 a radical revolution overturned the constitution and President Obando was declared dictator. The conservatives rallied, however, and regained possession of the government before

the close of the year. In 1857 Ospina entered on the presidency and civil war soon raged throughout the country. "After a hundred fights the revolution triumphed in July, 1861. . . . Mosquera, who was now in possession of the field, was a true pupil of Bolívar's, and he thought the time had come for reviving Bolívar's plans. . . . In 1863 Mosquera's new Federal Constitution was proclaimed. Henceforth each State [of the eight federal States into which the 44 provinces of New Granada were divided] became practically independent under its own President; and to mark the change the title of the nation was altered. At first it was called the Granadine Confederation: but it afterwards took the name of Colombia [the United States of Colombia], which had formerly been the title of the larger Confederation under Bolívar. Among the most important facts in recent Colombian history is the independence of the State of Panama, which has become of great importance through the construction of the railway connecting the port of Colon, or Aspinwall, as it was named by the Americans, on the Atlantic, with that of Panama on the Pacific. This railway was opened in 1855; and in the same year Panama declared itself a sovereign state. The State of Panama, after many years of conservative domination, has now perhaps the most democratic government in the world. The President is elected for two years only, and is incapable of re-election. Panama has had many revolutions of its own; nor has the new Federal Constitution solved all the difficulties of the Granadine government. In 1867 Mosquera was obliged to have recourse to a coup d'état, and declared himself dictator, but he was soon afterwards arrested; a conservative revolution took place; Mosquera was banished; and Gutierrez became President. The liberals, however, came back the next year, under Ponce. Since 1874 [the date of writing being 1879] General Perez has been President of Colombia."

—E. J. Payne, *Hist. of European Colonies*, ch. 16.—"The federal Constitution of 1863 was clearly formed on the model of the Constitution of the United States of America. It remained in force until 1886, when it was superseded by a law which gave the State a centralized organization and named it the 'Republic of Colombia.'"
—*Const. of the Republic of Colombia, with Hist. Introd.* by B. Moses (*Sup. to Annals of Am. Acad. of Pol. and Soc. Science*, Jan., 1893).

A. D. 1885-1891.—The Revolution of 1885.—The constitution of 1886.—The presidency of Dr. Nuñez.—"Cartagena is virtually the centre of political power in Colombia, for it is the residence of President Nuñez, a dictator without the name. Before the revolution of 1885, during which Colon was burned and the Panama Railway protected by American marines, the States enjoyed a large measure of home rule. The insurgents who were defeated in that struggle were Radicals and advanced Liberals. They were making a stand against centralized government, and they were overthrown. When the followers of Dr. Nuñez were victorious, they transformed the constitutional system of the country. . . . Dr. Nuñez, who had entered public life as a Radical agitator, swung completely around the circle. As the leader of the National party he became the ally of Clericalism, and the defender of ecclesiastical privilege. Being a man of unrivalled capacity for directing public

affairs and enforcing party discipline, he has established a highly centralized military government without incurring unpopularity by remaining constantly in sight and openly exercising authority. . . . Strong government has not been without its advantages; but the system can hardly be considered either republican or democratic. . . . Of all the travesties of popular government which have been witnessed in Spanish America, the political play enacted in Bogotá and Cartagena is the most grotesque. Dr. Nuñez is known as the titular President of the Republic. His practice is to go to the capital at the beginning of the presidential term, and when he has taken the oath of office to remain there a few weeks until all matters of policy and discipline are arranged among his followers. He then retires to his country-seat in Cartagena, leaving the vice-President to bear the burdens of state."—I. N. Ford, *Tropical America*, ch. 12.

A. D. 1892.—Re-election of President Nuñez.—In 1892, Dr. Rafael Nuñez was elected President for a fourth term, the term of office being six years.—*Statesman's Year-book*, 1893.

COLONI. See DEDITITIUS.

COLONIA AGRIPPINENSIS.—Agripina, the daughter of Germanicus and the mother of Nero, founded on the Rhine the Colonia Agrippinensis (modern Cologne)—probably the only colony of Roman veterans ever established under female auspices. The site had been previously occupied by a village of the Ubii. "It is curious that this abnormal colony has, alone, of all its kindred foundations, retained to the present day the name of Colonia."—C. Merivale, *Hist. of the Romans*, ch. 50.

COLORADO: A. D. 1803-1848.—Acquisition of the eastern part in the Louisiana Purchase and the western part from Mexico. See LOUISIANA: A. D. 1798-1803; and MEXICO: A. D. 1848.

A. D. 1806-1876.—Early explorations.—Gold discoveries.—Territorial and state organization.—The first American explorer to penetrate to the mountains of Colorado was Lieutenant Zebulon Pike, sent out with a small party by General Wilkinson, in 1806. He approached within 15 miles of the Rocky Mountain Peak which bears his name. A more extensive official exploration of the country was made in 1819 by Major Stephen H. Long, whose report upon the whole region drained by the Missouri, Arkansas and Platte rivers and their tributaries was unfavorable and discouraging. Fremont's explorations, which touched Colorado, were made in 1843-44. "The only persons encountered in the Rocky mountains by Frémont at this time were the few remaining traders and their former employes, now their colonists, who lived with their Mexican and Indian wives and half-breed children in a primitive manner of life, usually under the protection of some defensive structure called a fort. The first American

families in Colorado were a part of the Mormon battalion of 1846, who, with their wives and children, resided at Pueblo from September to the spring and summer of the following year, when they joined the Mormon emigration to Salt Lake. . . . Measures were taken early in March, 1847, to select locations for two United States forts between the Missouri and the Rocky mountains, the sites selected being those now occupied by Kearney City and Fort Laramie. . . . Up to 1853 Colorado's scant population still lived in or near some defensive establishment, and had been decreasing rather than increasing for the past decade, owing to the hostility of the Indians." In 1858 the first organized searching or prospecting for gold in the region was begun by a party of Cherokee Indians and whites. Other parties soon followed; the search succeeded; and the Pike's Peak mining region was speedily swarming with eager adventurers. In the fall of 1858 two rival towns were laid out on the opposite sides of Cherry Creek. They were named respectively Auraria and Denver. The struggle for existence between them was bitter, but brief. Auraria succumbed and Denver survived, to become the metropolis of the Mountains. The first attempt at political organization was made at the Auraria settlement, in November, 1858, and took the form of a provisional territorial organization, under the name of the Territory of Jefferson; but the provisional government did not succeed in establishing its authority, opposed as it was by conflicting claims to territorial jurisdiction on the part of Utah, New Mexico, Kansas, Nebraska, and Dakota. At length, on the 28th of February, 1861, an act of Congress became law, by which the proposed new territory was duly created, but not bearing the name of Jefferson. "The name of Colorado was given to it at the suggestion of the man selected for its first governor." Remaining in the territorial condition until July, 1876, Colorado was then admitted to the Union as a state.—H. H. Bancroft, *Hist. of the Pacific States*, v. 20 : *Colorado*, ch. 2-6.

COLOSSEUM, OR COLISEUM, The.—"The Flavian Amphitheatre, or Colosseum, was built by Vespasian and Titus in the lowest part of the valley between the Cælean and Esquiline Hills, which was then occupied by a large artificial pool for naval fights ('Naumachia'). . . . The exact date of the commencement of the Colosseum is doubtful, but it was opened for use in A. D. 80. . . . As built by the Flavian Emperors the upper galleries ('moeniani') were of wood, and these, as in the case of the Circus Maximus, at many times caught fire from lightning and other causes, and did much damage to the stone-work of the building."—J. H. Middleton, *Ancient Rome in 1885*, ch. 10.

COMITATUS.—COMITES.—GESITHS.

—**THEGNS.**—Comitatus is the name given by Tacitus to a body of warlike companions among the ancient Germans "who attached themselves in the closest manner to the chieftain of their choice. They were in many cases the sons of the nobles who were ambitious of renown or of a perfect education in arms. The princes provided for them horses, arms, and such rough equipment as they wanted. These and plentiful entertainment were accepted instead of wages. In time of war the comites fought for their chief, at once his defenders and the rivals of his prowess. . . . In the times of forced and unwelcome rest they were thoroughly idle; they cared neither for farming nor for hunting, but spent the time in feasting and in sleep. . . . Like the Frank king,

the Anglo-Saxon king seems to have entered on the full possession of what had been the right of the elective principes [to nominate and maintain a comitatus, to which he could give territory and political power]: but the very principle of the comitatus had undergone a change from what it was in the time of Tacitus, when it reappears in our historians, and it seems to have had in England a peculiar development and a bearing of special importance on the constitution. In Tacitus the comites are the personal following of the princes; they live in his house, are maintained by his gifts, fight for him in the field. If there is little difference between companions and servants, it is because civilization has not yet introduced voluntary helplessness. . . . Now the king, the perpetual princeps and representative of the race, conveys to his personal following public dignity and importance. His gesiths and thegns are among the great and wise men of the land. The right of having such dependents is not restricted to him, but the gesith of the ealdorman or bishop is simply a retainer, a pupil or a ward: the free household servants of the ceorl are in a certain sense his gesiths also. But the gesiths of the king are his guard and private council; they may be endowed by him from the folkland and admitted by him to the witenagemot. . . . The Danish huscarls of Canute are a late reproduction of what the familia of the Northumbrian kings must have been in the eighth century. . . . The development of the comitatus into a territorial nobility seems to be a feature peculiar to English history. . . . The Lombard gasind, and the Bavarian sindman were originally the same thing as the Anglo-Saxon gesith. But they sank into the general mass of vassalage as it grew up in the ninth and tenth centuries. . . . Closely connected with the gesith is the thegn; so closely that it is scarcely possible to see the difference except in the nature of the employment. The thegn seems to be primarily the warrior gesith; in this idea Alfred uses the word as translating the 'miles' of Bede. He is probably the gesith who has a particular military duty in his master's service. But he also appears as a landowner. The ceorl who has acquired five hides of land, and a special appointment in the king's hall, with other judicial rights, becomes thegn-worthy. . . . And from this point, the time of Athelstan, the gesith is lost sight of, except very occasionally; the more important members of the class having become thegns, and the lesser sort sinking into the ranks of mere servants to the king. The class of thegns now widens; on the one hand the name is given to all who possess the proper quantity of land, whether or no they stand in the old relation to the king; on the other the remains of the old nobility place themselves in the king's service. The name of thegn covers the whole class which after the Conquest appears under the name of knights, with the same qualification in land and nearly the same obligations. It also carried so much of nobility as is implied in hereditary privilege. The thegn-born are contrasted with the ceorl-born; and are perhaps much the same as the gesithcund. . . . Under the name of thegn are included however various grades of dignity. The class of king's thegns is distinguished from that of the medial thegns, and from a residuum that falls in rank below the latter. . . . The very name, like that of the gesith, has different senses

in different ages and kingdoms; but the original idea of military service runs through all the meanings of thegn, as that of personal association is traceable in all the applications of gesith." — W. Stubbs, *Const. Hist. of Eng.*, ch. 2, sect. 14 and ch. 6, sect. 63–65.

ALSO IN: T. Hodgkin, *Italy and Her Invaders*, bk. 4, ch. 7. — See, also, COUNT AND DUKE.

COMITIA CENTURIATA.—"Under the original constitution of Rome, the patricians alone . . . enjoyed political rights in the state, but at the same time they were forced to bear the whole burden of political duties. In these last were included, for example, the tilling of the king's fields, the construction of public works and buildings . . . ; citizens alone, also, were liable to service in the army. . . . The political burdens, especially those connected with the army, grew heavier, naturally, as the power of Rome increased, and it was seen to be an injustice that one part of the people, and that, too, the smaller part, should alone feel their weight. This led to the first important modification of the Roman constitution, which was made even before the close of the regal period. According to tradition, its author was the king Servius Tullius, and its general object was to make all men who held land in the state liable to military service. It thus conferred no political rights on the plebeians, but assigned to them their share of political duties. . . . According to tradition, all the freeholders in the city between the ages of 17 and 60, with some exceptions, were divided, without distinction as to birth, into five classes ('classis,' 'a summoning,' 'calo') for service in the infantry according to the size of their estates. Those who were excepted served as horsemen. These were selected from among the very richest men in the state. . . . Of the five classes of infantry, the first contained the richest men. . . . The members of the first class were required to come to the battle array in complete armor, while less was demanded of the other four. Each class was subdivided into centuries or bodies of a hundred men each, for convenience in arranging the army. There were in all 193 centuries. . . . This absolute number and this apportionment were continued, as the population increased and the distribution of wealth altered, until the name century came to have a purely conventional meaning, even if it had any other in the beginning. Henceforth a careful census was taken every fourth year, and all freeholders were made subject to the 'tributum.' The arrangement of the people thus described was primarily made simply for military purposes. . . . Gradually, however, this organization came to have political significance, until finally these men, got together for what is the chief political duty in a primitive state, enjoyed what political privileges there were. . . . In the end, this 'exercitus' of Servius Tullius formed another popular assembly, the Comitia Centuriata, which supplanted the comitia curiata entirely, except in matters connected with the religion of the family and very soon of purely formal significance. This organization, therefore, became of the highest civil importance, and was continued for civil purposes long after the army was marshalled on quite another plan."—A. Tighe, *Development of the Roman Const.*, ch. 4.

ALSO IN: W. Ihne, *Hist. of Rome*, bk. 6, ch. 1 — W. Ramsay, *Manual of Roman Antiq.*, ch. 4.

COMITIA CURIATA.—"In the beginning, any member of any one of the clans which were included in the three original Roman tribes, was a Roman citizen. So, too, were his children born in lawful wedlock, and those who were adopted by him according to the forms of law. Illegitimate children, on the other hand, were excluded from the number of citizens. These earliest Romans called themselves patricians (patricii, 'children of their fathers'), for some reason about which we cannot be sure. Perhaps it was in order to distinguish themselves from their illegitimate kinsmen and from such other people as lived about, having no pretense of blood connection with them, and who were, therefore, incapable of contracting lawful marriages, according to the patrician's view of this religious ceremony. The patricians . . . were grouped together in families, clans and tribes, partly on the basis of blood relationship, but chiefly on the basis of common religious worship. Besides these groups, there was still another in the state, the curia, or 'ward,' which stood between the clan and the tribe. In the earliest times, tradition said, ten families formed a clan, ten clans a curia and ten curiæ a tribe. These numbers, if they ever had any historical existence, could not have sustained themselves for any length of time in the case of the clans and families, for such organisms of necessity would increase and decrease quite irregularly. About the nature of the curia we have practically no direct information. The organization had become a mere name at an early period in the city's history. Whether the members of a curia thought of themselves as having closer kinship with one another than with members of other curiæ is not clear. We know, however, that the curiæ were definite political subdivisions of the city, perhaps like modern wards, and that each curia had a common religious worship for its members' participation. Thus much, at any rate, is significant, because it has to do with the form of Rome's primitive popular assembly. When the king wanted to harangue the people ('populus,' cf. 'populor,' 'to devastate') he called them to a 'contio' (compounded of 'co' and 'venio'). But if he wanted to propose to them action which implied a change in the organic law of the state, he summoned them to a comitia (compounded of 'con' and 'eo'). To this the name comitia curiata was given, because its members voted by curiæ. Each curia had one vote, the character of which was determined by a majority of its members, and a majority of the curiæ decided the matter for the comitia."—A. Tighe, *Development of the Roman Const.*, ch. 3.

COMMON LAW, English.—"The municipal law of England, or the rule of civil conduct prescribed to the inhabitants of this kingdom, may with sufficient propriety be divided into two kinds; the 'lex non scripta,' the unwritten or common law; and the 'lex scripta,' the written or statute law. The 'lex non scripta,' or unwritten law, includes not only general customs, or the common law properly so called, but also the particular customs of certain parts of the kingdom; and likewise those particular laws that are by custom observed only in certain courts and jurisdictions. When I call these parts of our law 'leges non scriptæ,' I would not be understood as if all those laws were at present merely oral, or communicated from the former ages to the present solely by word of mouth. . . . But, with us at present, the monuments and evidences of our legal customs are contained in the records of the several courts of justice, in books of reports and judicial decisions, and in the treatises of learned sages of the profession, preserved and handed down to us from the times of highest antiquity. However, I therefore style these parts of our law 'leges non scriptæ,' because their original institution and authority are not set down in writing, as Acts of Parliament are, but they receive their binding power, and the force of laws, by long and immemorial usage, and by their universal reception throughout the kingdom."—Sir W. Blackstone, *Commentaries*, int., sect. 3. See, also, LAW, COMMON.

COMMUNE, The.—The commonalty; the commons. In feudal usage, the term signified, as defined by Litré, the body of the bourgeois or burghers of a town who had received a charter which gave them rights of self-government. "In France the communal constitution was during this period (12th century) encouraged, although not very heartily, by Lewis VI., who saw in it one means of fettering the action of the barons and bishops and securing to himself the support of a strong portion of his people. In some cases the commune of France is, like the guild, a voluntary association, but its objects are from the first more distinctly political. In some parts of the kingdom the towns had risen against their lords in the latter half of the eleventh century, and had retained the fruits of

their hard-won victories. In others, they possessed, in the remaining fragments of the Karolingian constitution, some organisation that formed a basis for new liberties. The great number of charters granted in the twelfth century shows that the policy of encouraging the third estate was in full sway in the royal councils, and the king by ready recognition of the popular rights gained the affections of the people to an extent which has few parallels in French history. The French charters are in both style and substance very different from the English. The liberties which are bestowed are for the most part the same, exemption from arbitrary taxation, the right to local jurisdiction, the privilege of enfranchising the villein who has been for a year and a day received within the walls, and the power of electing the officers. But whilst all the English charters contain a confirmation of free and good customs, the French are filled with an enumeration of bad ones. . . . The English have an ancient local constitution the members of which are the recipients of the new grant, and guilds of at least sufficient antiquity to render their confirmation typical of the freedom now guaranteed; French *communia* is a new body which, by the action of a sworn confederacy, has wrung from its oppressors a deliverance from hereditary bondage. . . . The commune lacks too the ancient element of festive religious or mercantile association which is so conspicuous in the history of the guild. The idea of the latter is English, that of the former is French or Gallic. Yet notwithstanding these differences, the substantial identity of the privileges secured by these charters seems to prove the existence of much international sympathy. The ancient liberties of the English were not unintelligible to the townsmen of Normandy; the rising freedom of the German cities roused a corresponding ambition in the towns of Flanders; and the struggles of the Italian municipalities awoke the energies of the cities of Provence. All took different ways to win the same liberties. . . . The German *hansa* may have been derived from England; the *communa* of London was certainly derived from France. . . . The *communa* of London, and of those other English towns which in the twelfth century aimed at such a constitution, was the old English guild in a new French garb: it was the ancient association, but directed to the attainment of municipal rather than mercantile privileges."—W. Stubbs, *Const. Hist. of Eng.*, ch. 11.—"Oppression and insurrection were not the sole origin of the communes. . . . Two causes, quite distinct from feudal oppression, viz., Roman traditions and Christian sentiments, had their share in the formation of the communes and in the beneficial results thereof. The Roman municipal regimen, which is described in M. Guizot's 'Essais sur l'Histoire de France' (1st Essay, pp. 1-44), [also in 'Hist. of Civilization,' v. 2, lect. 2] did not every where perish with the Empire; it kept its footing in a great number of towns, especially in those of Southern Gaul."—F. P. Guizot, *Popular Hist. of France*, ch. 19.

COMPASS, Introduction of the Mariner's.—"It is perhaps impossible to ascertain the epoch when the polarity of the magnet was first known in Europe. The common opinion which ascribes its discovery to a citizen of Amalfi in the 14th century, is undoubtedly erroneous. Guiot de Provins, a French poet who lived about the year 1200, or, at the latest, under St. Louis, describes it in the most unequivocal language. James de Vitry, a bishop in Palestine, before the middle of the 13th century, and Guido Guinizzelli, an Italian poet of the same time, are equally explicit. The French, as well as Italians, claim the discovery as their own; but whether it were due to either of these nations, or rather learned from their intercourse with the Saracens, is not easily to be ascertained. . . . It is a singular circumstance, and only to be explained by the obstinacy with which men are apt to reject improvements, that the magnetic needle was not generally adopted in navigation till very long after the discovery of its properties, and even after their peculiar importance had been perceived. The writers of the 13th century, who mention the polarity of the needle, mention also its use in navigation; yet Capmany has found no distinct proof of its employment till 1403, and does not believe that it was frequently on board Mediterranean ships at the latter part of the preceding age."—H. Hallam, *The Middle Ages*, ch. 9, pt. 2, with note.—"Both Chaucer, the English, and Barbour, the Scottish, poet, allude familiarly to the compass in the latter part of the 14th century."—G. L. Craik, *Hist. of British Commerce*, v. 1, p. 138.—"We have no certain information of the directive tendency of the natural magnet being known earlier than the middle or end of the 11th century (in Europe, of course). . . . That it was known at this date and its practical value recognized, is shown by a passage from an Icelandic historian, quoted by Hanstien in his treatise of Terrestrial Magnetism. In this extract an expedition from Norway to Iceland in the year 863 is described; and it is stated that three ravens were taken as guides, for, adds the historian, 'in those times seamen had no loadstone in the northern countries.' This history was written about the year A. D. 1068, and the allusion I have quoted obviously shows that the author was aware of natural magnets having been employed as a compass. At the same time it fixes a limit of the discovery in northern countries. We find no mention of artificial magnets being so employed till about a

century later."—Sir W. Thompson, *quoted by R. F. Burton in Ultima Thule*, v. 1, p. 312.

CONGO FREE STATE, The Founding of the.—“Since Leopold II.’s accession to the throne [of Belgium], his great object has been to secure colonial possessions to Belgium for her excess of population and production. To this end he founded, in October, 1876, with the aid of eminent African explorers, the International African Association. Its object was to form committees in several countries, with a view to the collection of funds, and to the establishment of a chain of stations across Africa, passing by Lake Tanganyika, to assist future explorers. Accordingly committees were formed, whose presidents were as follows: in England, the Prince of Wales; in Germany the Crown Prince; in Italy the King’s brother; in France, M. de Lesseps; and in Belgium, King Leopold. Sums of money were subscribed, and stations were opened from Bagomoyo (just south of Zanzibar) to Lake Tanganyika; but when toward the close of 1877, Stanley reappeared on the Atlantic coast and revealed the immense length of the marvelous Congo River, King Leopold at once turned his attention in that direction. That he might not put himself forward prematurely, he acted under cover of an association and a committee of exploration, which were in reality formed and entirely supported by the King’s energy and by the large sums of money that he lavished upon them. Through this association King Leopold maintained Stanley for five years on the Congo. During this time a road was made from the coast to Stanley Pool, where the navigable portion of the Upper Congo commences; and thus was formed the basis of the future empire. During this period Stanley signed no less than four thousand treaties or

concessions of territory, on which upward of two thousand chiefs had placed their marks in sign of adhesion. At a cost of many months of transportation, necessitating the employment of thousands of porters, light steamers were placed on the upper river which was explored as far as Stanley Falls. Its numerous tributaries also were followed up as far as the rapids that interrupt their courses. Many young Belgian officers and other adventurous explorers established themselves on the banks of the Congo and the adjoining river, the Kouilou, and founded a series of stations, each occupied by one or two Europeans and by a few soldiers from Zanzibar. In this way the country was insensibly taken possession of in the most pacific manner, without a struggle and with no bloodshed whatever; for the natives, who are of a very gentle disposition, offered no resistance. The Senate of the United States, which was called upon, in 1884, to give an opinion on the rights of the African Association, made a careful examination of the matter, and recognized the legality of the claims and title deeds submitted to them. A little later, in order to mark the formation of a state, the Congo Association adopted as its flag a gold star on a blue ground. A French lawyer, M. Deloume, in a very well-written pamphlet entitled 'Le Droit des Gens dans l'Afrique Equatoriale,' has proved that this proceeding was not only legitimate, but necessary. The embryo state, however, lacked one essential thing, namely, recognition by the civilized powers. It existed only as a private association, or, as a hostile publicist expressed it, as 'a state in shares, indulging in pretensions of sovereignty.' Great difficulties stood in the way of realizing this essential condition. Disputes, on the one hand with France and on the other with Portugal, appeared inevitable. . . . King Leopold did not lose heart. In 1882 he obtained from the French government an assurance that, while maintaining its rights to the north of Stanley Pool, it would give support to the International Association of the Congo. With Portugal it seemed very difficult to come to an understanding. . . . Prince Bismarck took part in the matter, and in the German Parliament praised highly the work of the African Association. In April, 1884, he proposed to France to come to an understanding, and to settle all difficulties by general agreement. From this proposition sprang the famous Berlin conference, the remarkable decisions of which we shall mention later. At the same time, before the conference opened, Germany signed an agreement with the International Association of the Congo, in which she agreed to recognize its flag as that of a state, in exchange for an assurance that her trade should be free, and that German subjects should enjoy all the privileges of the most favored nations. Similar agreements were entered upon with nearly all the other countries of the globe. The delegates of the Association were accepted at the conference on the same footing as those of the different states that were represented there, and on February 26, the day on which the act was signed, Bismarck expressed himself as follows: 'The new State of the Congo is destined to be one of the chief safe-guards of the work we have in view, and I sincerely trust that its development will fulfill the noble aspirations of its august founder.' Thus the Congo Inter-

national Association, hitherto only a private enterprise, seemed now to be recognized as a sovereign state, without having, however, as yet assumed the title. But where were the limits of its territory. . . . Thanks to the interference of France, after prolonged negotiations an understanding was arrived at on February 15, 1885, by which both parties were satisfied. They agreed that Portugal should take possession of the southern bank of the Congo, up to its junction with the little stream Uango, above Nokki, and also of the district of Kabinda forming a wedge that extends into the French territory on the Atlantic Ocean. The International Congo Association—for such was still its title—was to have access to the sea by a strip of land extending from Manyanga (west of Leopoldville) to the ocean, north of Banana, and comprising in addition to this port, Boma and the important station of Vivi. These treaties granted the association 931,285 square miles of territory, that is to say, a domain eighty times the size of Belgium, with more than 7,500 miles of navigable rivers. The limits fixed were, on the west, the Kuango, an important tributary of the Congo; on the south, the sources of the Zambesi; on the east, the Lakes Bangweolo, Moero, and Tanganyika, and a line passing through Lake Albert Edward to the river Ouelle; on the north, a line following the fourth degree of latitude to the Mobangi River on the French frontier. The whole forms one eleventh part of the African continent. The association became transformed into a state in August 1885, when King Leopold, with the authorization of the Belgian Chambers, notified the powers that he should assume the title of Sovereign of the Independent State of the Congo, the union of which with Belgium was to be exclusively personal. The Congo is, therefore, not a Belgian colony, but nevertheless the Belgian Chambers have recently given valuable assistance to the King's work; first, in taking, on July 26, 1889, 10,000,000 francs' worth of shares in the railway which is to connect the seaport of Matadi with the riverport of Leopoldville, on Stanley Pool, and secondly by granting a loan of 25,000,000 francs to the Independent State on August 4, 1890. The King, in a will laid before Parliament, bequeaths all his African possessions to the Belgian nation, authorizing the country to take possession of them after a lapse of ten years."—E. de Laveleye, *The Division of Africa* (*The Forum*, Jan., 1891). CONGREGATION OF THE ORATORY, The.—"Philip of Neri, a young Florentine of good birth (1515-1595; canonised 1622) . . . in 1548 instituted at Rome the Society of the Holy Trinity, to minister to the wants of the pilgrims at Rome. But the operations of his mission gradually extended till they embraced the spiritual welfare of the Roman population at large, and the reformation of the Roman clergy in particular. No figure is more serene and more sympathetic to us in the history of the Catholic reaction than that of this latter-day 'apostle of Rome.' From his association, which followed the rule of St. Augustine, sprang in 1575 the Congregation of the Oratory at Rome, famous as the seminary of much that is most admirable in the labours of the Catholic clergy."

-A. W. Ward, *The Counter-Reformation*, p. 30.

—"In the year 1766, there were above a hundred Congregations of the Oratory of S. Philip in Europe and the East Indies; but since the revolutions of the last seventy years many of these have ceased to exist, while, on the contrary, within the last twelve years two have been established in England."—Mrs. Hope, *Life of S. Philip Neri*, ch. 24.

CONGRESS OF THE UNITED STATES.—"The Constitution created Congress and conferred upon it powers of legislation for national purposes, but made no provision as to the method by which these powers should be exercised. In consequence Congress has itself developed a method of transacting its business by means of committees. The Federal Legislature consists of two Houses—the Senate, or Upper and less numerous branch, and the House of Representatives, or the Lower and more numerous popular branch. The Senate is composed of two members from each State elected by the State legislatures for a term of six years, one third of whom retire every two years. The presiding officer is the Vice-President. Early in each session the Senate chooses a President pro tempore, so as to provide for any absence of the Vice-President, whether caused by death, sickness, or for other reasons. The House of Representatives is at present [1891] composed of 332 members and four delegates from the Territories. These delegates, however, have no vote, though they may speak. The House is presided over by a Speaker, elected at the beginning of each [Congress]. A quorum for business is, in either House, a majority. Congress meets every year in the beginning of December. Each Congress lasts two years and holds two sessions—a long and a short session. The long session lasts from December to midsummer [or until the two Houses agree upon an adjournment]. The short session

lasts from December, when Congress meets again, until the 4th of March. The term of office then expires for all the members of the House and for one-third of the Senators. The long session ends in even years (1880 and 1882, etc.), and the short session in odd years (1881 and 1883). Extra sessions may be called by the President for urgent business. In the early part of the November preceding the end of the short session of Congress occurs the election of Representatives. Congressmen then elected do not take their seats until thirteen months later, that is, at the re-assembling of Congress in December of the year following, unless an extra session is called. The Senate frequently holds secret, or, as they are called, executive sessions, for the consideration of treaties and nominations of the President, in which the House of Representatives has no voice. It is then said to sit with closed doors. An immense amount of business must necessarily be transacted by a Congress that legislates for nearly 63,000,000 of people. . . . Lack of time, of course, prevents a consideration of each bill separately by the whole legislature. To provide a means by which each subject may receive investigation and consideration, a plan is used by which the members of both branches of Congress are divided into committees. Each committee busies itself with a certain class of business, and bills when introduced are referred to this or that committee for consideration, according to the subjects to which the bills relate. . . . The Senate is now divided between 50 and 60 committees, but the number varies from session to session. . . . The House of Representatives is organized into 60 committees [appointed by the Speaker], ranging, in their number of members, from thirteen down. . . . The Committee of Ways and Means, which regulates customs duties and excise taxes, is by far the most important. . . . Congress ordinarily assembles at noon and remains in session until 4 or 5 P. M., though towards the end of the term it frequently remains in session until late in the night. . . . There is still one feature of Congressional government which needs explanation, and that is the caucus. A caucus is the meeting of the members of one party in private, for the discussion of the attitude and line of policy which members of that party are to take on questions which are expected to arise in the legislative halls. Thus, in Senate caucus, is decided who shall be members of the various committees. In these meetings is frequently discussed whether or not the whole party shall vote for or against this or that important bill, and thus its fate is decided before it has even come up for debate in Congress."—W. CONNECTICUT: The River and the Name.—"The first discoveries made of this part of New England were of its principal river and the fine meadows lying upon its bank. Whether the Dutch at New Netherlands, or the people of New Plymouth, were the first discoverers of the river is not certain. Both the English and the Dutch claimed to be the first discoverers, and both purchased and made a settlement of the lands upon it nearly at the same time. . . . From this fine river, which the Indians call Quonehtacut, or Connecticut, (in English the long river) the colony originally took its name."—B. Trumbull, *Hist. of Conn.*, ch. 2.—According to Dutch accounts, the river was entered by Adriaen Block, ascended to latitude 41° 48', and named Fresh River, in 1614. See NEW YORK: A. D. 1610-1614.

The Aboriginal inhabitants. See AMERICAN ABORIGINES: ALGONQUIAN FAMILY.

A. D. 1631.—The grant to Lord Say and Sele, and others.—In 1631, the Earl of Warwick granted to Lord Say and Sele, Lord Brooke, Sir Richard Saltonstall, and others, "the territory between Narragansett River and southwest towards New York for 120 miles and west to the Pacific Ocean, or, according to the words of President Clap of Yale College, 'from Point Judith to New York, and from thence a west line to the South Sea, and if we take Narragansett River in its whole length the tract will extend as far north as Worcester. It comprehends the whole of the colony of Connecticut and more. This was called the old patent of Connecticut, and had been granted the previous year, 1630, by the Council of Plymouth [or Council for New England] to the Earl of Warwick. Yet before the English had planted settlements in Connecticut the Dutch had purchased of the Pequots land where Hartford now stands and erected a small trading fort called 'The House of Good Hope.'"—C. W. Bowen, *Boundary Disputes of Conn.*, p. 15.—In 1635, four years after the Connecticut grant, said to have been derived originally from the Council for New England, in 1630, had been transferred by the Earl of Warwick to Lord Say and Seal and others, the Council made an attempt, in connivance with the English court, to nullify all its grants, to regain possession of the territory of New England and to parcel it out by lot among its own members. In this attempted parcelling, which proved ineffectual, Connecticut fell to the lot of the Earl of Carlisle, the Duke of Lennox, and the Duke of Hamilton. Modern investigation seems to have found the alleged grant from the Council of Plymouth, or Council for New England, to the Earl of Warwick, in 1630, to be mythical. "No one has ever seen it, or has heard of any one who claims to have seen it. It is not mentioned even in the grant from Warwick to the Say and Sele patentees in 1631. . . . The deed is a mere quit-claim, which warrants nothing and does not even assert title to the soil transferred. . . . Why the Warwick transaction took this peculiar shape, why Warwick transferred, without showing title, a territory which the original owners granted anew to other patentees in 1635, are questions which are beyond conjecture."—A. Johnston, *Connecticut*, ch. 2.—See NEW ENGLAND: A. D. 1635.

A. D. 1634-1637.—The pioneer settlements.—"In October, 1634, some men of Plymouth, led by William Holmes, sailed up the Connecti-

cut river, and, after bandying threats with a party of Dutch who had built a rude fort on the site of Hartford, passed on and fortified themselves on the site of Windsor. Next year Governor Van Twiller sent a company of seventy men to drive away these intruders, but after reconnoitering the situation the Dutchmen thought it best not to make an attack. Their little stronghold at Hartford remained unmolested by the English, and, in order to secure the communication between this advanced outpost and New Amsterdam, Van Twiller decided to build another fort at the mouth of the river, but this time the English were beforehand. Rumours of Dutch designs may have reached the ears of Lord Say and Sele and Lord Brooke—"fanatic Brooke," as Scott calls him in 'Marmion'—who had obtained from the Council for New England a grant of territory on the shores of the Sound. These noblemen chose as their agent the younger John Winthrop, son of the Massachusetts governor, and this new-comer arrived upon the scene just in time to drive away Van Twiller's vessel and build an English fort which in honour of his two patrons he called 'Say-Brooke.' Had it not been for seeds of discontent already sown in Massachusetts, the English hold upon the Connecticut valley might perhaps have been for a few years confined to these two military outposts at Windsor and Saybrooke. But there were people in Massachusetts who did not look with favour upon the aristocratic and theocratic features of its polity. The provision that none but church-members should vote or hold office was by no means unanimously approved. . . . Cotton declared that democracy was no fit government either for church or for commonwealth, and the majority of the ministers agreed with him. Chief among those who did not was the learned and eloquent Thomas Hooker, pastor of the church at Newtown. . . . There were many in Newtown who took Hooker's view of the matter; and there, as also in Watertown and Dorchester, which in 1633 took the initiative in framing town governments with selectmen, a strong disposition was shown to evade the restrictions upon the suffrage. While such things were talked about, in the summer of 1633, the adventurous John Oldham was making his way through the forest and over the mountains into the Connecticut valley, and when he returned to the coast his glowing accounts set some people to thinking. Two years afterward, a few pioneers from Dorchester pushed through the wilderness as far as the Plymouth men's fort at Windsor, while a party from Watertown went farther and came to a halt upon the site of Wethersfield. A larger party, bringing cattle and such goods as they could carry, set out in the autumn and succeeded in reaching Windsor. . . . In the next June, 1636, the Newtown congregation, a hundred or more in number, led by their sturdy pastor, and bringing with them 160 head of cattle, made the pilgrimage to the Connecticut valley. Women and children took part in this pleasant summer journey; Mrs. Hooker, the pastor's wife, being too ill to walk, was carried on a litter. Thus, in the memorable year in which our great university was born, did Cambridge become, in the true Greek sense of a much-abused word, the metropolis or 'mother town' of Hartford. The migration at once became strong in numbers. During the past

twelvemonth a score of ships had brought from England to Massachusetts more than 3,000 souls, and so great an accession made further movement easy. Hooker's pilgrims were soon followed by the Dorchester and Watertown congregations, and by the next May 800 people were living in Windsor, Hartford, and Wethersfield. As we read of these movements, not of individuals, but of organic communities, united in allegiance to a church and its pastor, and fervid with the instinct of self-government, we seem to see Greek history renewed, but with centuries of added political training. For one year a board of commissioners from Massachusetts governed the new towns, but at the end of that time the towns chose representatives and held a General Court at Hartford, and thus the separate existence of Connecticut was begun. As for Springfield, which was settled about the same time by a party from Roxbury, it remained for some years doubtful to which state it belonged."—J. Fiske, *The Beginnings of New Eng.*, ch. 3.

A. D. 1636-1639.—The constitutional evolution.—"It must be noted that [the] Newtown, Watertown, and Dorchester migrations had not been altogether a simple transfer of individual settlers from one colony to another. In each of these migrations a part of the people was left behind, so that the Massachusetts towns did not cease to exist. And yet each of them brought its Massachusetts magistrates, its ministers (except Watertown), and all the political and ecclesiastical machinery of the town; and at least one of them (Dorchester) had hardly changed its structure since its members first organized in 1630 at Dorchester in England. The first settlement of Connecticut was thus the migration of three distinct and individual town organizations out of the jurisdiction of Massachusetts and into absolute freedom. It was the Massachusetts town system set loose in the wilderness. At first the three towns retained even their Massachusetts names; and it was not until the eighth court meeting, February 21 1636 (7), that it was decided that 'the plantaçon nowe called Newtowne shalbe called & named by the name of Harteforde Towne, likewise the plantaçon nowe called Watertowne shalbe called & named Wythersfeild,' and 'the plantaçon called Dorchester shalbe called Windsor.' On the same day the boundaries between the three towns were 'agreed' upon, and thus the germ of the future State was the agreement and union of the three towns. Accordingly, the subsequent court meeting at Hartford, May 1, 1637, for the first time took the name of the 'Genrall Corte,' and was composed, in addition to the town magistrates who had previously held it, of 'comittees' of three from each town. So simply and naturally did the migrated town system evolve, in this binal assembly, the seminal principle of the Senate and House of Representatives of the future State of Connecticut. The Assembly further showed its consciousness of separate existence by declaring 'an offensive warr ag' the Pequoit,' assigning the proportions of its miniature army and supplies to each town, and appointing a commander. . . . So complete are the features of State-hood, that we may fairly assign May 1, 1637, as the proper birthday of

Connecticut. No king, no Congress, presided over the birth: its seed was in the towns. January 14, 1638 (9), the little Commonwealth formed the first American Constitution at Hartford. So far as its provisions are concerned, the King, the Parliament, the Plymouth Council, the Warwick grant, the Say and Sele grant, might as well have been non-existent: not one of them is mentioned. . . . This constitution was not only the earliest but the longest in continuance of American documents of the kind, unless we except the Rhode Island charter. It was not essentially altered by the charter of 1662, which was practically a royal confirmation of it; and it was not until 1818 that the charter, that is the constitution of 1639, was superseded by the present constitution. Connecticut was as absolutely a state in 1639 as in 1776."—A. Johnston, *The Genesis of a New Eng. State* (Johns Hopkins Univ. Studies, no. 11).—The following is the text of those "Fundamental Orders" adopted by the people dwelling on Connecticut River, January 14, 1638 (9), which formed the first of written constitutions: "FORASMUCH as it hath pleased the Almighty God by the wise disposition of his diuynne p'uidence so to Order and dispose of things that we the Inhabitants and Residents of Windsor, Harteford and Wethersfield are now cohabiting and dwelling in and vpon the River of Conectecotte and the Lands thereunto adioyning; And well knowing where a people are gathered together the word of God requires that to mayntayne the peace and vnion of such a people there should be an orderly and decent Gouerment established according to God, to order and dispose of the affayres of the people at all seasons as ocation shall require; doe therefore assotiate and conioyne our selues to be as one Publike State or Comonwelth; and doe, for our selues and our Successors and such as shall be adioyned to vs att any tyme hereafter, enter into Combination and Confederation together, to mayntayne and p'searue the liberty and purity of the gospell of our Lord Jesus w^{ch} we now p'fesse, as also the disciplyne of the Churches, w^{ch} according to the truth of the said gospell is now practised amongst vs; As also in o' Ciuell Affaires to be guided and gouerned according to such Lawes, Rules, Orders and decrees as shall be made, ordered & decreed, as followeth:—1. It is Ordered, sentenced and decreed, that there shall be yerely two generall Assemblies or Courts, the one the second thursday in April, the other the second thursday in September following; the first shall be called the Courte of Election, wherein shall be yerely Chosen frō tyme to tyme soe many Magestrats and other publike Officers as shall be found requisitte: Whereof one to be chosen Gouernour for the yeare ensuing and vntill another be chosen, and noe other Magestrate to be chosen for more than one yeare; p'uided allwayes there be sixe chosen besids the Gouernour; w^{ch} being chosen and sworne according to an Oath recorded for that purpose shall haue power to administer iustice according to the Lawes here established, and for want thereof according to the rule of the word of God; w^{ch} choise shall be made by all that are admitted freemen and haue taken the Oath of Fidellity, and doe cohabitte w^{ch} in this Jurisdiction, (hauing bene admitted Inhabitants by the maior p'te of the Towne wherein they liue,) or the mayor p'te of such as shall be then p'sent. 2. It is Ordered,

sentenced and decreed, that the Election of the aforesaid Magistrats shall be on this manner: every p'son p'sent and qualified for choyse shall bring in (to the p'sons deputed to receaue thē) one single pap' wth the name of him written in yt whom he desires to haue Gouvernour, and he that hath the greatest nūber of papers shall be Gouvernor for that yeare. And the rest of the Magistrats or publike Officers to be chosen in this manner: The Secretary for the tyme being shall first read the names of all that are to be put to choise and then shall severally nominate them distinctly, and every one that would haue the p'son nominated to be chosen shall bring in one single paper written vpon, and he that would not haue him chosen shall bring in a blanke: and every one that hath more written papers then blanks shall be a Magistrat for that yeare; wth papers shall be receaued and told by one or more that shall be then chosen by the court and sworne to be faythfull therein: but in case there should not be sixe chosen as aforesaid, besids the Gouvernor, out of those wth are nominated, then he or they wth haue the most written pap's shall be a Magistrate or Magistrats for the ensueing yeare, to make vp the foresaid nūber. 3. It is Ordered, sentenced and decreed, that the Secretary shall not nominate any p'son, nor shall any p'son be chosen newly into the Magistracy wth was not p'pounded in some Generall Courte before, to be nominated the next Election; and to that end yt shall be lawfull for ech of the Townes aforesaid by their deputies to nominate any two whō they conceaue fitte to be put to election; and the Courte may ad so many more as they iudge requisitt. 4. It is Ordered, sentenced and decreed that noe p'son be chosen Gouvernor aboue once in two yeares, and that the Gouvernor be always a mēber of some approved congregation, and formerly of the Magistracy wth in this Jurisdiction; and all the Magistrats Freemen of this Comonwelth: and that no Magistrate or other publike officer shall execute any p'te of his or their Office before they are severally sworne, wth shall be done in the face of the Courte if they be p'sent, and in case of absence by some deputed for that purpose. 5. It is Ordered, sentenced and decreed, that to the aforesaid Courte of Election the seu'all Townes shall send their deputies, and when the Elections are ended they may p'ceed in any publike searvice as at other Courts. Also the other Generall Courte in September shall be for making of lawes, and any other publike ocaton, wth concerns the good of the Comonwelth. 6. It is Ordered, sentenced and decreed, that the Gou'nor shall, ether by himselfe or by the secretary, send out sumons to the Constables of eu' Towne for the cauleing of these two standing Courts, on month at lest before their seu'all tymes: And also if the Gou'nor and the gretest p'te of the Magistrats see cause vpon any spetiall ocaton to call a generall Courte, they may giue order to the secretary soe to doe wth in fowerteene dayes warning; and if vrgent necessity so require, vpon a shorter notice, giueing sufficient grownds for yt to the deputies when they meete, or els be questioned for the same; And if the Gou'nor and Mayor p'te of Magistrats shall ether neglect or refuse to call the two Generall standing Courts or ether of thē, as also at other tymes when the ocatons of the Comonwelth require, the Freemen thereof, or the Mayor p'te of them, shall petition to them soe to doe: if

then yt be ether denyed or neglected the said Freemen or the Mayor p'te of them shall haue power to giue order to the Constables of the seuerrall Townes to doe the same, and so may meete together, and chuse to themselves a Moderator, and may p'ceed to do any Acte of power, wth any other Generall Courte may. 7. It is Ordered, sentenced and decreed that after there are warrants giuen out for any of the said Generall Courts, the Constable or Constables of ech Towne shall forthwth give notice distinctly to the inhabitants of the same, in some Publike Assembly or by goeing or sending frō howse to howse, that at a place and tyme by him or them lymited and sett, they meet and assemble thē selues together to elect and chuse certen deputies to be att the Generall Courte then following to agitate the afayres of the comonwelth; wth said Deputyes shall be chosen by all that are admitted Inhabitants in the seu'all Townes and haue taken the oath of fidelity; p'uided that non be chosen a Deputy for any Generall Courte wth is not a Freeman of this Comonwelth. The foresaid deputies shall be chosen in manner following: every p'son that is p'sent and qualified as before exp'ssed, shall bring the names of such, written in seu'all papers, as they desire to haue chosen for that Employment, and these 3 or 4, more or lesse, being the nūber agreed on to be chosen for that tyme, that haue greatest nūber of papers written for thē shall be deputies for that Courte; whose names shall be endorsed on the backe side of the warrant and returned into the Courte, wth the Constable or Constables hand vnto the same. 8. It is Ordered, sentenced and decreed, that Wyndsor, Hartford and Wethersfield shall haue power, ech Towne, to send fower of their freemen as deputies to every Generall Courte; and whatsoever other Townes shall be hereafter added to this Jurisdiction, they shall send so many deputies as the Courte shall judge meete, a reasonable p'portion to the nūber of Freemen that are in the said Townes being to be attended therein; wth deputies shall have the power of the whole Towne to giue their voats and allowance to all such lawes and orders as may be for the publike good, and unto wth the said Townes are to be bownd. 9. It is ordered and decreed, that the deputies thus chosen shall haue power and liberty to appoynt a tyme and a place of meeting together before any Generall Courte to aduise and consult of all such things as may concerne the good of the publike, as also to examine their owne Elections, whether according to the order, and if they or the gretest p'te of them find any election to be illegal they may seclud such for p'sent frō their meeting, and returne the same and their resons to the Courte; and if yt proue true, the Courte may fyne the p'ty or p'tyes so intruding and the Towne, if they see cause, and giue out a warrant to goe to a newe election in a legal way, either in p'te or in whole. Also the said deputies shall haue power to fyne any that shall be disorderly at their meetings, or for not coming in due tyme or place according to appoyntment; and they may returne the said fynes into the Courte if yt be refused to be paid, and the treasurer to take notice of yt, and to estreete or levy the same as he doth other fynes. 10. It is Ordered, sentenced and decreed, that every Generall Courte, except such as through neglecte of the Gou'nor and the greatest p'te of Magistrats the Freemen themselves doe call, shall consist of

the Gouvernor, or some one chosen to moderate the Court, and 4 other Magestrats at lest, wth the mayor p^{te} of the deputies of the seuerall Townes legally chosen; and in case the Freemen or mayor p^{te} of thē, through neglect or refusall of the Gouvernor and mayor p^{te} of the mages- trats, shall call a Courte, y^e shall consist of the mayor p^{te} of Freemen that are p^{sent} or their deputies, wth a Moderator chosen by thē: In w^{ch} said Generall Courts shall consist the supreme power of the Comonwelth, and they only shall haue power to make laws or repeale thē, to graunt leuyes, to admitt of Freemen, dispose of lands vndisposed of, to seuerall Townes or p^{sons}, and also shall haue power to call ether Courte or Magistrate or any other p^{son} whatsoever into question for any misdemeavour, and may for just causes displace or deale otherwise according to the nature of the offence; and also may deale in any other matter that concerns the good of this comon welth, excepte election of Magestrats, w^{ch} shall be done by the whole boddy of Freemen. In w^{ch} Courte the Gouvernour or Moderator shall haue power to order the Courte to giue liberty of spech, and silence vnceasonable and disorderly speakings, to put all things to voate, and in case the voate be equall to haue the casting voice. But non of these Courts shall be adiornd or dis- solved w^{thout} the consent of the maior p^{te} of the Court. 11. It is ordered, sentenced and decreed, that when any Generall Courte vppon the occa- sions of the Comonwelth haue agreed vppon any sume or somes of mony to be leuyed vppon the seuerall Townes w^{thin} this Jurisdiction, that a Committee be chosen to sett out and appoynt w^l shall be the p^{portion} of euery Towne to pay of the said leuy, p^{ro}vided the Committees be made vp of an equall nūber out of each Towne. 14th Janu- ary, 1638, the 11 Orders abouesaid are voted." —*Public Records of the Colony of Connecticut*, v. 1.

A. D. 1638.—The planting of New Haven Colony.—"In the height of the Hutchinson controversy [see MASSACHUSETTS: A. D. 1636-1638], John Davenport, an eminent nonconformist minister from London, had arrived at Boston, and with him a wealthy company, led by two mer- chants, Theophilus Eaton and Edward Hopkins. Alarmed at the new opinions and religious agita- tions of which Massachusetts was the seat, not- withstanding very advantageous offers of settle- ment there, they preferred to establish a separate community of their own, to be forever free from the innovations of error and licentiousness. Eaton and others sent to explore the coast west of the Connecticut, selected a place for settle- ment near the head of a spacious bay at Quina- piack [or Quinnipiack], or, as the Dutch called it, Red Hill, where they built a hut and spent the winter. They were joined in the spring [April, 1638] by the rest of their company, and Davenport preached his first sermon under the shade of a spreading oak. Presently they entered into what they called a 'plantation covenant,' and a communication being opened with the Indians, who were but few in that neighborhood, the lands of Quinapiack were purchased, except a small reservation on the east side of the bay, the Indians receiving a few presents and a promise of protection. A tract north of the bay, ten miles in one direction and thirteen in the other,

was purchased for ten coats; and the colonists proceeded to lay out in squares the ground-plan of a spacious city, to which they presently gave the name of New Haven."—R. Hildreth, *Hist. of the U. S.*, v. 1, ch. 9.—"They formed their politi- cal association by what they called a 'plantation covenant,' 'to distinguish it from a church cov- enant, which could not at that time be made.' In this compact they resolved, 'that, as in matters that concern the gathering and ordering of a church, so likewise in all public offices which concern civil order, as choice of magis- trates and officers, making and repealing of laws; dividing allotments of inheritance, and all things of like nature,' they would 'be ordered by the rules which the Scriptures hold forth.' It had no external sanction, and comprehended no acknowledgment of the government of England. The company consisted mostly of Londoners, who at home had been engaged in trade. In proportion to their numbers, they were the richest of all the plantations. Like the settlers on Narragansett Bay, they had no other title to their lands than that which they obtained by purchase from the Indians."—J. G. Palfrey, *Hist. of New Eng.*, v. 1, ch. 13.

ALSO IN: C. H. Levermore, *The Republic of New Haven*, ch. 1.

A. D. 1639.—The Fundamental Agreement of New Haven.—"In June, 1639, the whole body of settlers [at Quinnipiack, or New Haven] came together to frame a constitution. A tradi- tion, seemingly well founded, says that the meeting was held in a large barn. According to the same account, the purpose for which they had met and the principles on which they ought to proceed were set forth by Davenport in a ser- mon. 'Wisdom hath builded her house, she hath hewn out seven pillars,' was the text. There is an obvious connection between this and the subsequent choice of seven of the chief men to lay the foundation of the constitution. . . . Davenport set forth the general system on which the constitution ought to be framed. The two main principles which he laid down were, that Scripture is a perfect and sufficient rule for the conduct of civil affairs, and that church-member- ship must be a condition of citizenship. In this the colonists were but imitating the example of Massachusetts. . . . After the sermon, five resolu- tions [followed by a sixth, constituting together what was called the 'fundamental agreement' of New Haven Colony], formally introducing Davenport's proposals, were carried. If a church already existed, it was not considered fit to form a basis for the state. Accordingly a fresh one was framed by a curiously complicated process. As a first step, twelve men were elected. These twelve were instructed, after a due inter- val for consideration, to choose seven out of their own number, who should serve as a nu- cleus for the church. At the same time an oath was taken by the settlers, which may be looked on as a sort of preliminary and provisional test of citizenship, pledging them to accept the principles laid down by Davenport. Sixty-three of the inhabitants took the oath, and their example was soon followed by fifty more. By October, four months after the original meeting, the seven formally established the new common- wealth. They granted the rights of a freeman to all who joined them, and who were recognized members either of the church at New Haven or

of any other approved church. The freemen thus chosen entered into an agreement to the same effect as the oath already taken. They then elected a Governor and four Magistrates, or, as they were for the present called, a Magistrate and four Deputies. . . . The functions of the Governor and Magistrates were not defined. Indeed, but one formal resolution was passed as to the constitution of the colony, namely, 'that the Word of God shall be the only rule attended unto in ordering the affairs of government.'—J. A. Doyle, *The English in Am.: The Puritan Colonies*, v. 1, ch. 6.—"Of all the New England colonies, New Haven was most purely a government by compact, by social contract. . . . The free planters . . . signed each their names to their voluntary compact, and ordered that 'all planters hereafter received in this plantation should submit to the said fundamentall agreement, and testifie the same by subscribing their names.' It is believed that this is the sole instance of the formation of an independent civil government by a general compact wherein all the parties to the agreement were legally required to be actual signers thereof. When this event occurred, John Locke was in his seventh year, and Rousseau was a century away."—C. H. Levermore, *The Republic of New Haven*, p. 23.

A. D. 1639-1662.—The alleged Blue Laws of New Haven.—"Just when or by whom the acts and proceedings of New Haven colony were first stigmatized as Blue Laws, cannot now be ascertained. The presumption, however, is strong that the name had its origin in New York, and that it gained currency in Connecticut, among episcopalian and other dissenters from the established church, between 1720 and 1750. . . . In the colony of New Haven, before the union with Connecticut, the privileges of voting and of holding civil office were, by the 'fundamental agreement,' restricted to church-members. This peculiarity of her constitution was enough to give color to the assertion that her legislation was, pre-eminently, blue. That her old record-book contained a code of 'blue laws' which were discreditable to puritanism, and which testified to the danger of schism, became, among certain classes, an assured belief. To this imaginary code wit and malice made large additions, sometimes by pure invention, sometimes by borrowing absurd or arbitrary laws from the records of other colonies. And so the myth grew. . . . No specimens of the laws so stigmatized seem to have been published before 1781, when 'a sketch of some of them' was given to the world by the Rev. Samuel Peters in 'A General History of Connecticut.' In this "History," it is said, were collected all the extravagant stories that had been set afloat during the previous fifty years.—J. H. Trumbull, *The True Blue Laws of Conn. and N. Haven*, *Introd.*

A. D. 1660-1664.—The protection of the regicides at New Haven.—"Against the colony of New Haven the king had a special grudge. Two of the regicide judges [Whalley and Goffe], who had sat in the tribunal which condemned his father, escaped to New England in 1660 and were well received there. . . . The king's detectives hotly pursued them through the woodland paths of New England, and they would soon have been taken but for the aid they got from the people. . . . After lurking about New Haven and Milford for two or three years . . . they sought a more secluded hiding place near Hadley."—J. Fiske, *The Beginnings of New Eng.*

A. D. 1662-1664.—The Royal Charter and annexation of New Haven to the River Colony.—"The Restoration in England left the New Haven colony under a cloud in the favor of the new government: it had been tardy and ungracious in its proclamation of Charles II.; it had been especially remiss in searching for the regicide colonels, Goffe and Whalley; and any application for a charter would have come from New Haven with a very ill grace. Connecticut was under no such disabilities; and it had in its Governor, John Winthrop [the younger, son of the first governor of Massachusetts], a man well calculated to win favor with the new King. . . . In March, 1660, the General Court solemnly declared its loyalty to Charles II., sent the Governor to England to offer a loyal address to the King and ask him for a charter, and laid aside £500 for his expenses. Winthrop was successful, and the charter was granted April 20, 1662. The acquisition of the charter raised the Connecticut leaders to the seventh heaven of satisfaction. And well it might, for it was a grant of privileges with hardly a limitation. Practically the King had given Winthrop 'carte blanche,' and allowed him to frame the charter to suit himself. It incorporated the freemen of Connecticut as a 'body corporate and polittique,' by the name of 'The Governor and Company of the English Colony of Connecticut in New England in America.' . . . The people were to have all the liberties and immunities of free and natural subjects of the King, as if born within the realm. It granted to the Governor and Company all that part of New England south of the Massachusetts line and west of the 'Norroaganatt River commonly called Norroaganatt Bay' to the South Sea, with the 'Islands thereunto adioyninge.' . . . It is difficult to see more than two points in which it [the charter] altered the constitution adopted by the towns in 1639. There were now to be two deputies from each town; and the boundaries of the Commonwealth now embraced the rival colony of New Haven. . . . New Haven did not submit without a struggle, for not only her pride of separate existence but the supremacy of her ecclesiastical system was at stake. For three years a succession of diplomatic notes passed between the General Court of Connecticut and 'our honored friends of New Haven, Milford, Branford, and Guilford.' . . . In October, 1664, the Connecticut General Court appointed the New Haven magistrates commissioners for

their towns, 'with magistraticall powers,' established the New Haven local officers in their places for the time, and declared oblivion for any past resistance to the laws. In December, Milford having already submitted, the remnant of the New Haven General Court, representing New Haven, Guilford, and Branford, held its last meeting and voted to submit, 'with a salvo jure of our former rights and claims, as a people who have not yet been heard in point of plea.' The next year the laws of New Haven were laid aside forever, and her towns sent deputies to the General Court at Hartford. . . . In 1701 the General Court . . . voted that its annual October session should thereafter be held at New Haven. This provision of a double capital was incorporated into the constitution of 1818, and continued until in 1873 Hartford was made sole capital."—A. Johnston, *The Genesis of a New Eng. State*, pp. 25-28.

A. D. 1674-1675.—Long Island and the western half of the colony granted to the Duke of York.—In 1674, after the momentary recovery of New York by the Dutch, and its re-surrender to the English, "the king issued a new patent for the province, in which he not only included Long Island, but the territory up to the Connecticut River, which had been assigned to Connecticut by the royal commissioners. The assignment of Long Island was regretted, but not resisted; and the island which is the natural sea-wall of Connecticut passed, by royal decree, to a province whose only natural claim to it was that it barely touched it at one corner. The revival of the duke's claim to a part of the mainland was a different matter, and every preparation was made for resistance. In July, 1675, just as King Philip's war had broken out in Plymouth, hasty word was sent from the authorities at Hartford to Captain Thomas Bull at Saybrook that Governor Andros of New York was on his way through the Sound for the purpose, as he avowed, of aiding the people against the Indians. Of the two evils, Connecticut rather preferred the Indians. Bull was instructed to inform Andros, if he should call at Saybrook, that the colony had taken all precautions against the Indians, and to direct him to the actual scene of conflict, but not to permit the landing of any armed soldiers. 'And you are to keep the king's colors standing there, under his majesty's lieutenant, the governor of Connecticut; and if any other colors be set up there, you are not to suffer them to stand. . . . But you are in his majesty's name required to avoid striking the first blow; but if they begin, then you are to defend yourselves, and do your best to secure his majesty's interest and the peace of the whole colony of Connecticut in our possession.' Andros came and landed at Saybrook, but confined his proceedings to reading the duke's patent against the protest of Bull and the Connecticut representatives."—A. A. D. 1685-1687.—The hostile king and the hidden charter.—Sir Edmund Andros in possession of the government.—"During the latter years of the reign of Charles II. the king had become so reckless of his pledges and his faith that he did not scruple to set the dangerous example of violating the charters that had been granted by the crown. Owing to the friendship that the king entertained for Winthrop, we have seen that Connecticut was favored by him to a degree even after the death of that great man. But no sooner had Charles demised and the sceptre passed into the hands of his bigoted brother, King James II., than Connecticut was called upon to contend against her sovereign for liberties that had been affirmed to her by the most solemn muniments known to the law of England. The accession of James II. took place on the 6th day of February 1685, and such was his haste to violate the honor of the crown that, early in the summer of 1685, a quo warranto was issued against the governor and company of Connecticut, citing them to appear before the king, within eight days of St. Martin's, to show by what right and tenor they exercised certain powers and privileges." This was quickly followed by two other writs, conveyed to Hartford by Edward Randolph, the implacable enemy of the colonies. "The day of appearance named in them was passed long before the writs were served." Mr. Whiting was sent to England as the agent of the colony, to exert such influences as might be brought to bear against the plainly hostile and unscrupulous intentions of the king; but his errand was fruitless. "On the 28th of December another writ of quo warranto was served upon the governor and company of the colony. This writ bore date the 23d of October, and required the defendants to appear before the king 'within eight days of the purification of the Blessed Virgin.' . . . Of course, the day named was not known to the English law, and was therefore no day at all in legal contemplation." Already, the other New England colonies had been brought under a provisional general government, by commissioners, of whom Joseph Dudley was named president. President Dudley "addressed a letter to the governor and council, advising them to resign the charter into the king's hands. Should they do so, he undertook to use his influence in behalf of the colony. They did not deem it advisable to comply with the request. Indeed they had hardly time to do so before the old commission was broken up, and a new one granted, superseding Dudley and naming Sir Edmund Andros governor of New England. Sir Edmund arrived in Boston on the 19th of December, 1686, and the next day he published his commission and took the government into his hands. Scarcely had he established himself, when he sent a letter to the governor and company of Connecticut, acquainting them with his appointment, and informing them that he was commissioned by the king to receive their charter if they would give it up to him."—G. H. Hollister, *Hist. of Conn.*, v. 1, ch. 14.—On

receipt of the communication from Andros, "the General Court was at once convened, and by its direction a letter was addressed to the English Secretary of State, earnestly pleading for the preservation of the privileges that had been granted to them. For the first time they admitted the possibility that their petition might be denied, and in that case requested to be united to Massachusetts. This was construed by Sir Edmund as a virtual surrender; but as the days went by he saw that he had mistaken the spirit and purpose of the colony. Andros finally decided to go in person to Connecticut. He arrived at Hartford the last day of October, attended by a retinue of 60 officers and soldiers. The Assembly, then in session, received him with every outward mark of respect. After this formal exchange of courtesies, Sir Edmund publicly demanded the charter, and declared the colonial government dissolved. Tradition relates that Governor Treat, in calm but earnest words, remonstrated against this action. . . . The debate was continued until the shadows of the early autumnal evening had fallen. After candles were lighted, the governor and his council seemed to yield; and the box supposed to contain the charter was brought into the room, and placed upon the table. Suddenly the lights were extinguished. Quiet reigned in the room, and in the dense crowd outside the building. The candles were soon relighted; but the charter had disappeared, and after the most diligent search could not be found. The common tradition has been, that it was taken under cover of the darkness by Captain Joseph Wadsworth, and hidden by him in the hollow trunk of a venerable and noble oak tree standing near the entrance-gate of Governor Wyllys's mansion. The charter taken by Captain Wadsworth was probably the duplicate, and remained safely in his possession for several years. There is reason to believe that, some time before the coming of Andros to Hartford, the original charter had been carefully secreted, and the tradition of later times makes it probable that, while the duplicate charter that was taken from the table was hidden elsewhere, the original charter found a safe resting place in the heart of the tree that will always be remembered as The Charter Oak. This tree is said to have been preserved by the early settlers at the request of the Indians. 'It has been the guide of our ancestors for centuries,' they said, 'as to the time of planting our corn. When the leaves are the size of a mouse's ears, then is the time to put it in the ground.' The record of the Court briefly states that Andros, having been conducted to the governor's seat by the governor himself, declared that he had been commissioned by his Majesty to take on him the government of Connecticut. The commission having been read, he said that it was his Majesty's pleasure to make the late governor and Captain John Allyn members of his council. The secretary handed their common seal to Sir Edmund, and afterwards wrote these words inclosing the record: 'His Excellency, Sir Edmund Andros, Knight, Captain-General and Governor of his Majesty's Territory and Dominion in New England, by order from his Majesty, King of England, Scotland and Ireland, the 31st of October, 1687, took into his hands the government of this colony of Connecticut, it being by his Majesty annexed to the Massachusetts and

other colonies under his Excellency's government. Finis.' Andros soon disclosed a hand of steel beneath the velvet glove of plausible words and fair promises."—E. B. Sanford, *Hist. of Conn.*, ch. 16.

A. D. 1689-1701.—The reinstatement of the charter government.—"April, 1689, came at last. The people of Boston, at the first news of the English Revolution, clapped Andros into custody. May 9, the old Connecticut authorities quietly resumed their functions, and called the assembly together for the following month. William and Mary were proclaimed with great fervor. Not a word was said about the disappearance or reappearance of the charter; but the charter government was put into full effect again, as if Andros had never interrupted it. An address was sent to the king, asking that the charter be no further interfered with; but operations under it went on as before. No decided action was taken by the home government for some years, except that its appointment of the New York governor, Fletcher, to the command of the Connecticut militia, implied a decision that the Connecticut charter had been superseded. Late in 1693, Fitz John Winthrop was sent to England as agent to obtain a confirmation of the charter. He secured an emphatic legal opinion from Attorney General Somers, backed by those of Treby and Ward, that the charter was entirely valid, Treby's concurrent opinion taking this shape: 'I am of the same opinion, and, as this matter is stated, there is no ground of doubt.' The basis of the opinion was that the charter had been granted under the great seal; that it had not been surrendered under the common seal of the colony, nor had any judgment of record been entered against it; that its operation had merely been interfered with by overpowering force; that the charter therefore remained valid; and that the peaceable submission of the colony to Andros was merely an illegal suspension of lawful authority. In other words, the passive attitude of the colonial government had disarmed Andros so far as to stop the legal proceedings necessary to forfeit the charter, and their prompt action, at the critical moment, secured all that could be secured under the circumstances. William was willing enough to retain all possible fruit of James's tyranny, as he showed by enforcing the forfeiture of the Massachusetts charter; but the law in this case was too plain, and he ratified the lawyers' opinion in April, 1694. The charter had escaped its enemies at last, and its escape is a monument of one of the advantages of a real democracy. . . . Democracy had done more for Connecticut than class influence had done for Massachusetts."—A. Johnston, *Connecticut*, ch. 12.—"The decisions which established the rights of Connecticut included Rhode Island. These two commonwealths were the portion of the British empire distinguished above all others by the largest liberty. Each was a nearly perfect democracy under the shelter of a monarchy. . . . The crown, by reserving to itself the right of appeal, had still a method of interfering in the internal

affairs of the two republics. Both of them were included among the colonies in which the lords of trade advised a complete restoration of the prerogatives of the crown. Both were named in the bill which, in April, 1701, was introduced into parliament for the abrogation of all American charters. The journals of the house of lords relate that Connecticut was publicly heard against the measure, and contended that its liberties were held by contract in return for services that had been performed; that the taking away of so many charters would destroy all confidence in royal promises, and would afford a precedent dangerous to all the chartered corporations of England. Yet the bill was read a second time. . . . The impending war with the French postponed the purpose till the accession of the house of Hanover."—G. Bancroft, *Hist. of the U. S. (Author's last revision)*, pt. 3, ch. 3 (v. 2).

A. D. 1765.—The revolt against the Stamp Act.—"The English government understood very well that the colonies were earnestly opposed to the Stamp Act, but they had no thought of the storm of wrath and resistance which it would arouse. It was a surprise to many of the leaders of public affairs in America. . . . Governor Fitch and Jared Ingersoll, with other prominent citizens who had done all in their power to oppose the scheme of taxation . . . counselled submission. They mistook the feeling of the people. . . . The clergy were still the leaders of public opinion, and they were united in denunciation of the great wrong. Societies were organized under the name of the Sons of Liberty, the secret purpose of which was to resist the Stamp Act by violent measures if necessary. . . . Mr. Ingersoll, who had done all in his power to oppose the bill, after its passage decided to accept the position of stamp agent for Connecticut. Franklin urged him to take the place, and no one doubted his motives in accepting it. The people of Connecticut, however, were not pleased with this action. . . .

He was visited by a crowd of citizens, who inquired impatiently if he would resign." Ingersoll put them off with evasive replies for some time; but finally there was a gathering of a thousand men on horseback, from Norwich, New London, Windham, Lebanon and other towns, each armed with a heavy peeled club, who surrounded the obstinate stamp agent at Wethersfield and made him understand that they were in deadly earnest. "'The cause is not worth dying for,' said the intrepid man, who would never have flinched had he not felt that, after all, this band of earnest men were in the right. A formal resignation was given him to sign. . . . After he had signed his name, the crowd cried out, 'Swear to it!' He begged to be excused from taking an oath. 'Then shout Liberty and Property,' said the now good-natured company. To this he had no objection, and waved his hat enthusiastically as he repeated the words. Having given three cheers, the now hilarious party dined together." Ingersoll was then escorted to Hartford, where he read his resignation publicly at the court-house.—E. B. Sanford, *Hist. of Connecticut*, ch. 29.

A. D. 1776.—Assumes to be a "free, sovereign and independent State."—"In May, 1776, the people had been formally released from their allegiance to the crown; and in October the general assembly passed an act assuming the functions of a State. The important section of the act was the first, as follows: 'That the ancient form of civil government, contained in the charter from Charles the Second, King of England, and adopted by the people of this State, shall be and remain the civil Constitution of this State, under the sole authority of the people thereof, independent of any king or prince whatever. And that this Republic is, and shall forever be and remain, a free, sovereign and independent State, by the name of the State of Connecticut.' The form of the act speaks what was doubtless always the belief of the people, that their charter derived its validity, not from

the will of the crown, but from the assent of the people. And the curious language of the last sentence, in which 'this Republic' declares itself to be 'a free, sovereign, and independent State,' may serve to indicate something of the appearance which state sovereignty doubtless presented to the Americans of 1776-89."—A. CONSCRIPT FATHERS.—The Roman senators were so called,—"Patres Conscripti." The origin of the designation has been much discussed, and the explanation which has found most acceptance is this: that when, at the organization of the Republic, there was a new creation of senators, to fill the ranks, the new senators were called "conscripti" ("added to the roll") while the older ones were called "patres" ("fathers"), as before. Then the whole senate was addressed as "Patres et Conscripti," which lapsed finally into "Patres-Conscripti."—H. G. Liddell, *Hist. of Rome*, bk. 1, ch. 4.

CONSISTORY, The Papal. See CURIA, PAPAL.

CONSISTORY COURTS OF THE BISHOPS.—"The duties of the officials of these courts resembled in theory the duties of the censors under the Roman Republic. In the middle ages, a lofty effort had been made to overpass the common limitations of government, to introduce punishment for sins as well as crimes, and to visit with temporal penalties the breach of the moral law. . . . The administration of such a discipline fell as a matter of course, to the clergy. . . . Thus arose throughout Europe a system of spiritual surveillance over the habits and conduct of every man, extending from the cottage to the castle, taking note of all wrong dealing, of all oppression of man by man, of all licentiousness and profligacy, and representing upon earth, in the principles by which it was guided, the laws of the great tribunal of Almighty God. Such was the origin of the church courts, perhaps the greatest institutions yet devised by man. But to aim at these high ideals is as perilous as it is noble; and weapons which may be safely trusted in the hands of saints become fatal implements of mischief when saints have ceased to wield them. . . . The Consistory Courts had continued into the sixteenth century with unrestricted jurisdiction, although they had been for generations merely perennially flowing fountains, feeding the ecclesiastical exchequer. The moral conduct of every English man and woman remained subject to them. . . . But . . . the censures were no longer spiritual. They were commuted in various gradations for pecuniary fines, and each offence against morality was rated at its specific money value in the Episcopal tables. . . . The misdemeanours of which the courts took cognizance were 'offences against chastity,' 'heresy,' or 'matter sounding thereunto,' 'witchcraft,' 'drunkenness,' 'scandal,' 'defamation,' 'impudent words,' 'broken promises,' 'untruth,' 'absence from church,' 'speaking evil of saints,' 'non-payment of offerings,' and other delinquencies incapable of legal definition."—J. A. Froude, *Hist. of England*, ch. 3.

CONSOLS.—In 1751, a variety of British government securities were consolidated in one form of stock called "consolidated annuities." By abbreviation they got the name of "consols," which has clung to all similar securities since.

CONSPIRACY BILL, The. See ENGLAND: A. D. 1858-1859.

CONSTABLE, The.—"The name is derived from the 'comes stabuli' of the Byzantine court, and appears in the west as early as the days of Gregory of Tours. The duties of the constables of France . . . and those of the constables of Naples . . . are not exactly parallel with [those of] the constables of England. In Naples the constable kept the king's sword, commanded the army, appointed the quarters, disciplined the troops and distributed the sentinels; the marshals and all other officers being his subordinates. The French office was nearly the same. In England, however, the marshal was not subordinate to the constable. Probably the English marshals fulfilled the duties which had been in Normandy discharged by the constables. The marshal is

more distinctly an officer of the court, the constable one of the castle or army. . . . The constable . . . exercised the office of quartermaster-general of the court and army and succeeded to the duties of the Anglo-Saxon staller."—W. Stubbs, *Const. Hist. of Eng.*, ch. 11, sect. 122, and note.

CONSTABLE OF FRANCE.—"No other dignity in the world has been held by such a succession of great soldiers as the office of Constable of France. The Constable was originally a mere officer of the stables, but his power had increased by the suppression of the office of Grand Seneschal, and by the time of Philip Augustus he exercised control over all the military forces of the crown. He was the general in chief of the army and the highest military authority in the kingdom. The constables had for four centuries been leaders in the wars of France, and they had experienced strange and varied fortunes. The office had been bestowed on the son of Simon de Montfort, and he for this honor had granted to the king of France his rights over those vast domains which had been given his father for his pious conquests. [See **ALBIGENSES**: A. D. 1217-1229.] It had been bestowed on Raoul de Nesle, who fell at Courtrai, where the French nobility suffered its first defeat from Flemish boors; on Bertrand de Guesclin, the last of the great warriors, whose deeds were sung with those of the paladins of Charlemagne; on Clisson, the victor of Roosebeck [or Rosebecque]; on Armagnac, whose name has a bloody preeminence among the leaders of the fierce soldiery who ravaged France during the English wars; on Buchan, whose Scotch valor and fidelity gained him this great trust among a foreign people; on Richemont, the companion of Joan Darc; on Saint Pol, the ally of Charles the Bold, the betrayer and the victim of Louis XI.; on the Duke of Bourbon, who won the battle of Pavia against his sovereign, and led his soldiers to that sack of Rome which made the ravages of Genseric and Alaric seem mild; on Anne of Montmorenci, a prominent actor in every great event in France from the battle of Pavia against Charles V. to that of St. Denis against Coligni; on his son, the companion of Henry IV. in his youth, and his trusted adviser in his age. . . . The sword borne by such men had been bestowed [1621] on Luines, the hero of an assassination, who could not drill a company of infantry; it was now [1622] given to the hero of many battles [the Duke of Lesdiguieres], and the great office was to expire in the hands of a great soldier."—J. CONSTANTINOPLE: A. D. 330.—Transformation of Byzantium.—"Constantine had for some time contemplated the erection of a new capital. The experience of nearly half a century had confirmed the sagacity of Diocletian's selection of a site on the confines of Europe and Asia [Nicomedia] as the whereabouts in which the political centre of gravity of the Empire rested. At one time Constantine thought of adopting the site of ancient Troy, and is said to have actually commenced building a new city there. . . . More prosaic reasons ultimately prevailed. The practical genius of Constantine recognized in the town of Byzantium, on the European side of the border line between the two continents, the site best adapted for his new capital. All subsequent ages have applauded his discernment, for experience has endorsed the wisdom of the choice. By land, with its Asian suburb of Chrysopolis [modern Scutari], it practically spanned the narrow strait and joined Europe and Asia: by sea, it was open on one side to Spain, Italy, Greece, Africa, Egypt, Syria; on the other to the Euxine, and so by the Danube it had easy access to the whole of that important frontier between the Empire and the barbarians; and round all the northern coasts of the sea it took the barbarians in flank. . . . The city was solemnly dedicated with religious ceremonies on the 11th of May, 330, and the occasion was celebrated, after the Roman fashion, by a great festival, largesses and games in the hippodrome, which lasted forty days. The Emperor gave to the city institutions modelled after those of the ancient Rome."—E. L. Cutts, *Constantine the Great*, ch. 29.—"The new walls of Constantine stretched from the port to the Propontis . . . at the distance of fifteen stadia from the ancient fortification, and, with the city of Byzantium, they enclosed five of the seven hills which, to the eyes of those who approach Constantinople, appear to rise above each other in beautiful order. About a century after the death of the founder, the new buildings . . . already covered the narrow ridge of the sixth and the broad summit of the seventh hill. . . . The buildings of the new city were executed by such artificers as the reign of Constantine could afford; but they were decorated by the hands of the most celebrated masters of the age of Pericles and Alexander. . . . By his commands the cities of Greece and Asia were despoiled of their most

valuable ornaments."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 17.—"The new city was an exact copy of old Rome. . . . It was inhabited by senators from Rome. Wealthy individuals from the provinces were likewise compelled to keep up houses at Constantinople, pensions were conferred upon them, and a right to a certain amount of provisions from the public stores was annexed to these dwellings. Eighty thousand loaves of bread were distributed daily to the inhabitants of Constantinople. . . . The tribute of grain from Egypt was appropriated to supply Constantinople, and that of Africa was left for the consumption of Rome."—G. Finlay, *Greece under the Romans*, ch. 2.

A. D. 511-512.—Tumults concerning the Trisagion.—During the reign of Anastasius, at Constantinople, the fierce controversy which had raged for many years throughout the empire, between the Monophysites (who maintained that the divine and the human natures in Christ were one), and the adherents of the Council of Chalcedon (which declared that Christ possessed two natures in one person), was embittered at the imperial capital by opposition between the emperor, who favored the Monophysites, and the patriarch who was strict in Chalcedonian orthodoxy. In 511, and again in 512, it gave rise to two alarming riots at Constantinople. On the first occasion, a Monophysite or Eutychian party "burst into the Chapel of the Archangel in the Imperial Palace and dared to chant the Te Deum with the addition of the forbidden words, the war-cry of many an Eutychian mob, 'Who wast crucified for us.' The Trisagion, as it was called, the thrice-repeated cry to the Holy One, which Isaiah in his vision heard uttered by the seraphim, became, by the addition of these words, as emphatic a statement as the Monophysite party could desire of their favourite tenet that God, not man, breathed out his soul unto death outside the gates of Jerusalem. . . . On the next Sunday the Monophysites sang the verse which was their war-cry in the great Basilica itself." The riot which ensued was quieted with difficulty by the patriarch, to whom the emperor humbled himself. But in the next year, on a fast-day (Nov. 6) the Monophysites gave a similar challenge, singing the Trisagion with the prohibited words added, and "again psalmody gave place to blows; men wounded and dying lay upon the floor of the church. . . . The orthodox mob streamed from all parts into the great forum. There they swarmed and swayed to and fro all that day and all that night, shouting forth, not the greatness of the Ephesian Diana, but 'Holy, Holy, Holy,' without the words 'Who wast crucified.' They hewed down the monks,—a minority of their class,—who were on the side of the imperial creed, and burned their monasteries with fire." After two days of riot, the aged emperor humbled himself to the mob, in the great Circus, offered to

abdicate the throne and made peace by promises to respect the decrees of Chalcedon.—T. Hodgkin, *Italy and Her Invaders*, bk. 4, ch. 10.—See, also, NESTORIAN AND MONOPHYSITE CONTROVERSY.

A. D. 668-675.—First siege by the Saracens.—"Forty-six years after the flight of Mahomet from Mecca his disciples appeared in arms under the walls of Constantinople. They were animated by a genuine or fictitious saying of the prophet, that, to the first army which besieged the city of the Cæsars, their sins were forgiven. . . . No sooner had the Caliph Moawiyah [the first of the Ommyade caliphs, seated at Damascus,] suppressed his rivals and established his throne, than he aspired to expiate the guilt of civil blood by the success of this holy expedition; his preparations by sea and land were adequate to the importance of the object; his standard was entrusted to Sophian, a veteran warrior. . . . The Greeks had little to hope, nor had their enemies any reasons of fear, from the courage and vigilance of the reigning Emperor, who disgraced the name of Constantine, and imitated only the inglorious years of his grandfather Heraclius. Without delay or opposition, the naval forces of the Saracens passed through the unguarded channel of the Hellespont, which even now, under the feeble and disorderly government of the Turks, is maintained as the natural bulwark of the capital. The Arabian fleet cast anchor and the troops were disembarked near the palace of Hebdomon, seven miles from the city. During many days, from the dawn of light to the evening, the line of assault was extended from the golden gate to the Eastern promontory. . . . But the besiegers had formed an insufficient estimate of the strength and resources of Constantinople. The solid and lofty walls were guarded by numbers and discipline; the spirit of the Romans was rekindled by the last danger of their religion and empire; the fugitives from the conquered provinces more successfully renewed the defence of Damascus and Alexandria; and the Saracens were dismayed by the strange and prodigious effects of artificial fire. This firm and effectual resistance diverted their arms to the more easy attempts of plundering the European and Asiatic coasts of the Propontis; and, after keeping the sea from the month of April to that of September, on the approach of winter they retreated four score miles from the capital, to the isle of Cyzicus, in which they had established their magazine of spoil and provisions. So patient was their perseverance, or so languid were their operations, that they repeated in the six following summers the same attack and retreat, with a gradual abatement of hope and vigour, till the mischances of shipwreck and disease, of the sword and of fire, compelled them to relinquish the fruitless enterprise. They might bewail the loss, or commemorate the martyrdom, of 30,000 Moslems who fell in the siege of Constantinople. . . . The event of the siege revived, both in the East and West, the reputation of the Roman arms, and

cast a momentary shade over the glories of the Saracens. . . . A peace, or truce of thirty years was ratified between the two Empires; and the stipulation of an annual tribute, fifty horses of a noble breed, fifty slaves, and 3,000 pieces of gold, degraded the majesty of the commander of the faithful."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 52.

A. D. 680.—General Council. See MONOTHE-LITE CONTROVERSY.

A. D. 717-718.—The second siege by the Saracens.—"When Leo [the Isaurian] was raised to the [Byzantine] throne [A. D. 717], the empire was threatened with immediate ruin. Six emperors had been dethroned within the space of twenty-one years. . . . The Bulgarians and Slavonians wasted Europe up to the walls of Constantinople; the Saracens ravaged the whole of Asia Minor to the shores of the Bosphorus. . . . The Caliph Suleiman, who had seen one private adventurer succeed the other in quick succession on the imperial throne, deemed the moment favourable for the final conquest of the Christians; and, reinforcing his brother's army [in Asia Minor], he ordered him to lay siege to Constantinople. The Saracen empire had now reached its greatest extent. From the banks of the Sihun and the Indus to the shores of the Atlantic in Mauretania and Spain, the order of Suleiman was implicitly obeyed. . . . The army Moslemah led against Constantinople was the best-appointed that had ever attacked the Christians: it consisted of 80,000 warriors. The Caliph announced his intention of taking the field in person with additional forces, should the capital of the Christians offer a protracted resistance to the arms of Islam. The whole expedition is said to have employed 180,000 men. . . . Moslemah, after capturing Pergamus, marched to Abydos, where he was joined by the Saracen fleet. He then transported his army across the Hellespont, and marching along the shore of the Propontis, invested Leo in his capital both by land and sea. The strong walls of Constantinople, the engines of defence with which Roman and Greek art had covered the ramparts, and the skill of the Byzantine engineers, rendered every attempt to carry the place by assault hopeless, so that the Saracens were compelled to trust to the effect of a strict blockade for gaining possession of the city. . . . The besiegers encamped before Constantinople on the 15th August 717. The Caliph Suleiman died before he was able to send any reinforcements to his brother. The winter proved unusually severe." Great numbers of the warriors from the south were destroyed by the inclemency of a climate to which they had not become inured; many more died of famine in the Moslem camp, while the besieged city was plentifully supplied. The whole undertaking was disastrous from its beginning to its close, and, exactly one year from the pitching of his camp under the Byzantine walls, "on the 15th of August 718, Moslemah raised the siege, after ruining one of the finest armies the Saracens ever assembled. . . . Few military details concerning Leo's defence of Constantinople have been preserved, but there can be no doubt that it was one of the most brilliant exploits of a warlike age. . . . The vanity of Gallic writers has magnified the success of Charles Martel over a plundering expedition of the Spanish Arabs into a marvellous victory, and attributed the de-

liverance of Europe from the Saracen yoke to the valour of the Franks. A veil has been thrown over the talents and courage of Leo, a soldier of fortune, just seated on the imperial throne, who defeated the long-planned schemes of conquest of the Caliphs Welid and Suleiman. . . . The Saracens were gradually expelled from most of their conquests beyond Mount Tauris."—G. Finlay, *Hist. of the Byzantine Empire from 716 to 1057*, ch. 1.

8th-10th Centuries. See TRADE, MEDIEVAL: BYZANTINE.

A. D. 865.—First attack by the Russians.—"In the year 865, a nation hitherto unknown made its first appearance in the history of the world, where it was destined to act no unimportant part. Its entrance into the political system of the European nations was marked by an attempt to take Constantinople, a project which it has often revived. . . . In the year 862, Rurik, a Scandinavian or Varangian chief, arrived at Novgorod, and laid the first foundation of the state which has grown into the Russian empire. The Russian people, under Varangian domination, rapidly increased in power, and reduced many of their neighbours to submission. . . . From what particular circumstance the Russians were led to make their daring attack on Constantinople is not known. The Emperor Michael [III.] had taken the command of an army to act against the Saracens, and Oryphas, admiral of the fleet, acted as governor of the capital during his absence. Before the Emperor had commenced his military operations, a fleet of 200 Russian vessels of small size, taking advantage of a favourable wind, suddenly passed through the Bosphorus, and anchored at the mouth of the Black River in the Propontis, about 18 miles from Constantinople. This Russian expedition had already plundered the shores of the Black Sea, and from its station within the Bosphorus it ravaged the country about Constantinople, and plundered the Prince's Islands, pillaging the monasteries and slaying the monks as well as the other inhabitants. The Emperor, informed by Oryphas of the attack on his capital hastened to its defence. . . . It required no great exertions on the part of the imperial officers to equip a force sufficient to attack and put to flight these invaders; but the horrid cruelty of the barbarians, and the wild daring of their Varangian leaders, made a profound impression on the people of Constantinople."—G. Finlay, *Hist. of the Byzantine Empire*, bk. 1, ch. 3, sect. 3.

A. D. 907-1043.—Repeated attacks by the Russians.—Notwithstanding an active and increasing commercial intercourse between the Greeks and the Russians, Constantinople was exposed, during the tenth century and part of the eleventh, to repeated attacks from the masterful Varangians and their subjects. In the year 907, a fleet of 2,000 Russian vessels or boats swarmed into the Bosphorus, and laid waste the shores in the neighborhood of Constantinople. "It is not improbable that the expedition was undertaken to obtain indemnity for some commercial losses sustained by imperial negligence, monopoly or oppression. The subjects of the emperor were murdered, and the Russians amused themselves

with torturing their captives in the most barbarous manner. At length Leo [VI.] purchased their retreat by the payment of a large sum of money. . . . These hostilities were terminated by a commercial treaty in 912." There was peace under this treaty until 941, when a third attack on Constantinople was led by Igor, the son of Rurik. But it ended most disastrously for the Russians and Igor escaped with only a few boats. The result was another important treaty, negotiated in 945. In 970 the Byzantine Empire was more seriously threatened by an attempt on the part of the Russians to subdue the kingdom of Bulgaria; which would have brought them into the same dangerous neighborhood to Constantinople that the Russia of our own day has labored so hard to reach. But the able soldier John Zimisces happened to occupy the Byzantine throne; the Russian invasion of Bulgaria was repelled and Bulgaria, itself, was reannexed to the Empire, which pushed its boundaries to the Danube, once more. For more than half a century, Constantinople was undisturbed by the covetous ambition of her Russian fellow Christians. Then they invaded the Bosphorus again with a formidable armament; but the expedition was wholly disastrous and they retreated with a loss of 15,000 men. "Three years elapsed before peace was re-established; but a treaty was then concluded and the trade at Constantinople placed on the old footing. From this period the alliance of the Russians with the Byzantine Empire was long uninterrupted; and as the Greeks became more deeply imbued with ecclesiastical prejudices, and more hostile to the Latin nations, the Eastern Church became, in their eyes, the symbol of their nationality, and the bigoted attachment of the Russians to the same religious formalities obtained for them from the Byzantine Greeks the appellation of the most Christian nation."—G. Finlay, *Hist. of the Byzantine Empire, from 716 to 1057*, bk. 2, ch. 3, sect. 2.

A. D. 1081.—Sacked by the rebel army of Alexius Comnenus.—Alexius Comnenus, the emperor who occupied the Byzantine throne at the time of the First Crusade, and who became historically prominent in that connection, acquired his crown by a successful rebellion. He was collaterally of the family of Isaac Comnenus, (Isaac I.) who had reigned briefly in 1057-1059,—he, too, having been, in his imperial office, the product of a revolution. But the interval of twenty-two years had seen four emperors come and go—two to the grave and two into monastic seclusion. It was the last of these—Nicephorus III. (Botaneites) that Alexius displaced, with the support of an army which he had previously commanded. One of the gates of the capital was betrayed to him by a German mercenary, and he gained the city almost without a blow. "The old Emperor consented to resign his crown and retire into a monastery. Alexius entered the imperial palace, and the rebel army commenced plundering every quarter of the city. Natives and mercenaries vied with one another in license and rapine. No class of society was sacred from their lust and avarice, and the inmates of monasteries, churches, and palaces were alike plundered and insulted. This sack of Constantinople by the Slavonians, Bulgarians, and Greeks in the service of the families of Comnenus, Ducas,

and Paleologos, who crept treacherously into the city, was a fit prologue to its sufferings when it was stormed by the Crusaders in 1204. From this disgraceful conquest of Constantinople by Alexius Comnenus, we must date the decay of its wealth and civic supremacy, both as a capital and a commercial city. . . . The power which was thus established in rapine terminated about a century later in a bloody vengeance inflicted by an infuriated populace on the last Emperor of the Comnenian family, Andronicus I. Constantinople was taken on the 1st of April, 1081, and Alexius was crowned in St. Sophia's next day."—G. Finlay, *Hist. of the Byzantine and Greek Empires, from 716 to 1453*, bk. 3, ch. 1.

A. D. 1261-1453.—The restored Greek Empire.—On the 25th of July, A. D. 1261, Constantinople was surprised and the last Latin emperor expelled by the fortunate arms of Michael Palæologus, the Greek usurper at Nicæa. (See GREEK EMPIRE OF NICÆA.) Twenty days later Michael made his triumphal entry into the ancient capital. "But after the first transport of devotion and pride, he sighed at the dreary prospect of solitude and ruin. The palace was defiled with smoke and dirt and the gross intemperance of the Franks; whole streets had been consumed by fire, or were decayed by the injuries of time; the sacred and profane edifices were stripped of their ornaments; and, as if they were conscious of their approaching exile, the industry of the Latins had been confined to the work of pillage and destruction. Trade had expired under the pressure of anarchy and distress, and the numbers of inhabitants had decreased with the opulence of the city. It was the first care of the Greek monarch to reinstate the nobles in the palaces of their fathers. . . . He re peopled Constantinople by a liberal invitation to the provinces, and the brave 'volunteers' were seated in the capital which had been recovered by their arms. Instead of banishing the factories of the Pisans, Venetians, and Genoese, the prudent conqueror accepted their oaths of allegiance, encouraged their industry, confirmed their privileges and allowed them to live under the jurisdiction of their proper magistrates. Of these nations the Pisans and Venetians preserved their respective quarters in the city; but the services and power of the Genoese [who had assisted in the reconquest of Constantinople] deserved at the same time the gratitude and the jealousy of the Greeks. Their independent colony was first planted at the seaport town of Heraclea in Thrace. They were speedily recalled, and settled in the exclusive possession of the suburb of Galata, an advantageous post, in which they revived the commerce and insulted the majesty of the Byzantine Empire. The recovery of Constantinople was celebrated as the era of a new Empire." The new empire thus

established in the ancient Roman capital of the east made some show of vigor at first. Michael Palæologus "wrested from the Franks several of the noblest islands of the Archipelago—Lesbos, Chios, and Rhodes. His brother Constantine was sent to command in Malvasia and Sparta; and the Eastern side of the Morea, from Argos and Napoli to Cape Tænarus, was repossessed by the Greeks. . . . But in the prosecution of these Western conquests the countries beyond the Hellespont were left naked to the Turks; and their depredations verified the prophecy of a dying senator, that the recovery of Constantinople would be the ruin of Asia." Not only was Asia Minor abandoned to the new race of Turkish conquerors—the Ottomans—but those most aggressive of the proselytes of Islam were invited in the next generation to cross the Bosphorus, and to enter Thrace as partisans in a Greek civil war. Their footing in Europe once gained, they devoured the distracted and feeble empire piece by piece, until little remained to it beyond the capital itself. Long before the latter fell, the empire was a shadow and a name. In the very suburbs of Constantinople, the Genoese podesta, at Pera or Galata, had more power than the Greek Emperor; and the rival Italian traders, of Genoa, Venice and Pisa, fought their battles under the eyes of the Byzantines with indifference, almost, to the will or wishes, the opposition or the help of the latter. "The weight of the Roman Empire was scarcely felt in the balance of these opulent and powerful republics. . . . The Roman Empire (I smile in transcribing the name) might soon have sunk into a province of Genoa, if the ambition of the republic had not been checked by the ruin of her freedom and naval power. A long contest of 130 years was determined by the triumph of Venice. . . . Yet the spirit of commerce survived that of conquest; and the colony of Pera still awed the capital and navigated the Euxine, till it was involved by the Turks in the final servitude of Constantinople itself."—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 62-63.

A. D. 1348-1355.—War with the Genoese.—Alliance with Venice and Aragon.—John Cantacuzenos, who usurped the throne in 1347, "had not reigned a year before he was involved in hostilities with the Genoese colony of Galata, which had always contained many warm partisans of the house of Paleologos [displaced by Cantacuzenos]. This factory had grown into a flourishing town, and commanded a large portion of the Golden Horn. During the civil war, the Genoese capitalists had supplied the regency with money, and they now formed almost every branch of the revenue which the imperial government derived from the port. . . . The financial measures of the new emperor reduced their profits. . . . The increased industry of the Greeks, and the jealousy of the Genoese, led to open hostilities. The colonists of Galata commenced the war in a treacherous manner, without any authority from the republic of Genoa (1348). With a fleet of only eight large and some small galleys they attacked Constantinople while Cantacuzenos was absent from the capital, and burned several buildings and the greater

part of the fleet he was then constructing. The Empress Irene, who administered the government in the absence of her husband, behaved with great prudence and courage and repulsed a bold attack of the Genoese. Cantacuzenos hastened to the capital, where he spent the winter in repairing the loss his fleet had sustained. As soon as it was ready for action, he engaged the Genoese in the port, where he hoped that their naval skill would be of no avail, and where the numerical superiority of his ships would insure him a victory. He expected, moreover, to gain possession of Galata itself by an attack on the land side while the Genoese were occupied at sea. The cowardly conduct of the Greeks, both by sea and land, rendered his plans abortive. The greater part of his ships were taken, and his army retreated without making a serious attack. Fortunately for Cantacuzenos, the colonists of Galata received an order from the Senate of Genoa to conclude peace. . . . Their victory enabled them to obtain favourable terms, and to keep possession of some land they had seized, and on which they soon completed the construction of a new citadel. The friendly disposition manifested by the government of Genoa induced Cantacuzenos to send ambassadors to the Senate to demand the restoration of the island of Chios, which had been conquered by a band of Genoese exiles in 1346. A treaty was concluded, by which the Genoese were to restore the island to the Emperor of Constantinople in ten years. . . . But this treaty was never carried into execution, for the exiles at Chios set both the republic of Genoa and the Greek Empire at defiance, and retained their conquest." The peace with Genoa was of short duration. Cantacuzenos was bent upon expelling the Genoese from Galata, and as they were now involved in the war with the Venetians which is known as the war of Caffa he hoped to accomplish his purpose by joining the latter. "The Genoese had drawn into their hands the greater part of the commerce of the Black Sea. The town of Tana or Azof was then a place of great commercial importance, as many of the productions of India and China found their way to western Europe from its warehouses. The Genoese, in consequence of a quarrel with the Tartars, had been compelled to suspend their intercourse with Tana, and the Venetians, availing themselves of the opportunity, had extended their trade and increased their profits. The envy of the Genoese led them to obstruct the Venetian trade and capture Venetian ships, until at length the disputes of the two republics broke out in open war in 1348. In the year 1351, Cantacuzenos entered into an alliance with Venice, and joined his forces to those of the Venetians, who had also concluded an alliance with Peter the Ceremonious, king of Aragon. Nicholas Pisani, one of the ablest admirals of the age, appeared before Constantinople with the Venetian fleet; but his ships had suffered severely from a storm, and his principal object was attained when he had convoyed the merchantmen of Venice safely into the Black Sea. Cantacuzenos, however, had no object but to take Galata; and, expecting to receive important aid from Pisani, he attacked the Genoese colony by sea and land. His assault was defeated in consequence of the weakness of the Greeks and the lukewarmness of the Venetians. Pisani retired

to Negropont, to effect a junction with the Catalan fleet; and Pagano Doria, who had pursued him with a superior force, in returning to Galata to pass the winter, stormed the town of Heracleia on the Sea of Marmora, where Cantacuzenos had collected large magazines of provisions, and carried off a rich booty, with many wealthy Greeks, who were compelled to ransom themselves by paying large sums to these captors. Cantacuzenos was now besieged in Constantinople. . . . The Genoese, unable to make any impression on the city, indemnified themselves by ravaging the Greek territory on the Black Sea. . . . Early in the year 1352, Pisani returned to Constantinople with the Catalan fleet, under Ponizio da Santapace, and a great battle was fought between the allies and the Genoese, in full view of Constantinople and Galata. The scene of the combat was off the island of Prote, and it received the name of Vrachophagos from some sunken rocks, of which the Genoese availed themselves in their manœuvres. The honour of a doubtful and bloody day rested with the Genoese. . . . Pisani soon quitted the neighbourhood of Constantinople, and Cantacuzenos, having nothing more to hope from the Venetian alliance . . . concluded a peace with the republic of Genoa. In this war he had exposed the weakness of the Greek empire, and the decline of the maritime force of Greece, to all the states of Europe. The treaty confirmed all the previous privileges and encroachments of the colony of Galata and other Genoese establishments in the Empire."—G. Finlay, *Hist. of the Byzantine and Greek Empires*, 716-1453, bk. 4, ch. 2, sect. 4.—The retirement of the Greeks from the contest did not check the war between Genoa and Venice and the other allies of the latter, which was continued until 1355. The Genoese were defeated, August 29, 1353, by the Venetians and Catalans, in a great battle fought near Lojera, on the northern coast of Sardinia, losing 41 galleys and 4,500 or 5,000 men. They obtained their revenge the next year, on the 4th of November, when Paganino Doria surprised the Venetian admiral, Pisani, at Portolongo, opposite the island of Sapienza, as he was preparing to go into winter-quarters. "The Venetians sustained not so much a defeat as a total discomfiture; 450 were killed; an enormous number of prisoners, loosely calculated at 6,000, and a highly valuable booty in prizes and stores, were taken." In June, 1355, the war was ended by a treaty which excluded Venice from all Black Sea ports except Caffa.—W. C. Hazlitt, *Hist. of the Venetian Republic*, ch. 18-19 (v. 3).

ALSO IN: F. A. Parker, *The Fleets of the World*, pp. 88-94.

A. D. 1453.—Conquest by the Turks.—Mahomet II., son of Amurath II. came to the Ottoman throne, at the age of twenty-one, in 1451. "The conquest of Constantinople was the first object on which his thoughts were fixed at the opening of his reign. The resolution with which he had formed this purpose expressed itself in his stern reply to the ambassadors of the Emperor, offering him tribute if he would renounce the project of building a fort on the European shore of the Bosphorus, which, at the distance of only five miles from the capital, would give him the command of the Black Sea. He ordered the envoys to retire, and threatened to flay alive any who should dare to bring him a

similar message again. The fort was finished in three months and garrisoned with 400 janizaries; a tribute was exacted of all vessels that passed, and war was formally declared by the Sultan. Constantine [Constantine Palæologus, the last Greek Emperor] made the best preparations in his power for defence; but he could muster only 600 Greek soldiers." In order to secure aid from the Pope and the Italians, Constantine united himself with the Roman Church. A few hundred troops were then sent to his assistance; but, at the most, he had only succeeded in manning the many miles of the city wall with 9,000 men, when, in April, 1453, the Sultan invested it. The Turkish army was said to number 250,000 men, and 420 vessels were counted in the accompanying fleet. A summons to surrender was answered with indignant refusal by Constantine, "who had calmly resolved not to survive the fall of the city," and the final assault of the furious Turks was made on the 29th of May, 1453. The heroic Emperor was slain among the last defenders of the gate of St. Romanos, and the janizaries rode over his dead body as they charged into the streets of the fallen Roman capital. "The despairing people—senators, priests, monks, nuns, husbands, wives and children—sought safety in the church of St. Sophia. A prophecy had been circulated that here the Turks would be arrested by an angel from heaven, with a drawn sword; and hither the miserable multitude crowded, in the expectation of supernatural help. The conquerors followed, sword in hand, slaughtering those whom they encountered in the street. They broke down the doors of the church with axes, and, rushing in, committed every act of atrocity that a frantic thirst for blood and the inflamed passions of demons could suggest. All the unhappy victims were divided as slaves among the soldiers, without regard to blood or rank, and hurried off to the camp; and the mighty cathedral, so long the glory of the Christian world, soon presented only traces of the orgies of hell. The other quarters of the city were plundered by other divisions of the army. . . . About noon the Sultan made his triumphal entry by the gate of St. Romanos, passing by the body of the Emperor, which lay concealed among the slain. Entering the church, he ordered a moolah to ascend the bema and announce to the Mussulmans that St. Sophia was now a mosque, consecrated to the prayers of the true believers. He ordered the body of the Emperor to be sought, his head to be exposed to the people, and afterwards to be sent as a trophy, to be seen by the Greeks, in the principal cities of the Ottoman Empire. For three days the city was given up to the indescribable horrors of pillage and the license of the Mussulman soldiery. Forty thousand perished during the sack of the city and fifty thousand were reduced to slavery."—C. C. Felton, *Greece, Ancient and Modern: Fourth course*, lect. 6.

ALSO IN: G. Finlay, *Hist. of the Byzantine and Greek Empires from 716 to 1453*, bk. 4, ch. 2.—E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 68.

A. D. 1453-1481.—The city repopulated and rebuilt.—Creation of the Turkish Stamboul.—"It was necessary for Mohammed II. to repeople Constantinople, in order to render it the capital of the Othoman Empire. The installation of an

orthodox Patriarch calmed the minds of the Greeks, and many who had emigrated before the siege gradually returned, and were allowed to claim a portion of their property. But the slow increase of population, caused by a sense of security and the hope of gain, did not satisfy the Sultan, who was determined to see his capital one of the greatest cities of the East, and who knew that it had formerly exceeded Damascus, Bagdad and Cairo, in wealth, extent and population. From most of his subsequent conquests Mohammed compelled the wealthiest of the inhabitants to emigrate to Constantinople, where he granted them plots of land to build their houses. . . . Turks, Greeks, Servians, Bulgarians, Albanians, and Lazes, followed one another in quick succession, and long before the end of his reign Constantinople was crowded by a numerous and active population, and presented a more flourishing aspect than it had done during the preceding century. The embellishment of his capital was also the object of the Sultan's attention. . . . Mosques, minarets, fountains and tombs, the great objects of architectural magnificence among the Mussulmans, were constructed in

every quarter of the city. . . . The picturesque beauty of the Stamboul of the present day owes most of its artificial features to the Othoman conquest, and wears a Turkish aspect. The Constantinople of the Byzantine Empire disappeared with the last relics of the Greek Empire. The traveller who now desires to view the vestiges of a Byzantine capital, and examine the last relics of Byzantine architecture, must continue his travels eastward to Trebizond."—G. Finlay, *Hist. of the Byzantine and Greek Empires, from 716 to 1453, bk. 4, ch. 2, sect. 7.*

CONSTITUTION OF THE ARGENTINE REPUBLIC.

The subjoined text of the Constitution of the Argentine Republic is a translation "from the official edition of 1868," taken from R. Napp's work on "The Argentine Republic," prepared for the Central Argentine Commission on the Centenary Exhibition at Philadelphia, 1876. According to the "Statesman's Year-Book" of 1893, there have been no modifications since 1860:

Part 1.

Article 1. The Argentine Nation adopts the federal-republican, and representative form of Government, as established by the present Constitution.

Art. 2. The Federal Government shall maintain the Apostolic Roman Catholic Faith.

Art. 3. The authorities of the Federal Government shall reside in the city which a special law of Congress may declare the capital of the Republic, subsequently to the cession by one or more of the Provincial Legislatures, of the territory about to be federalized.

Art. 4. The Federal Government shall administer the expenses of the Nation out of the revenue in the National Treasury, derived from import and export duties; from the sale and lease of the public lands; from postage; and from such other taxes as the General Congress may equitably and proportionably lay upon the people; as also, from such loans and credits as may be decreed by it in times of national necessity, or for enterprises of national utility.

Art. 5. Each Province shall make a Constitution for itself, according to the republican representative system, and the principles, declarations and guarantees of this Constitution; and which shall provide for (secure) Municipal Government, primary education and the administration of justice. Under these conditions the Federal Government shall guarantee to each Province the exercise and enjoyment of its institutions.

Art. 6. The Federal Government shall intervene in the Provinces to guarantee the republican

form of Government, or to repel foreign invasion, and also, on application of their constituted authorities, should they have been deposed by sedition or by invasion from another Province, for the purpose of sustaining or re-establishing them.

Art. 7. Full faith shall be given in each Province to the public acts, and judicial proceedings of every other Province; and Congress may by general laws, prescribe the manner in which such acts and proceedings shall be proved, and the effect thereof.

Art. 8. The citizens of each Province shall be entitled to all the rights, privileges and immunities, inherent to the citizens of all the several Provinces. The reciprocal extradition of criminals between all the Provinces, is obligatory.

Art. 9. Throughout the territory of the Nation, no other than the National Custom-Houses shall be allowed, and they shall be regulated by the tariffs sanctioned by Congress.

Art. 10. The circulation of all goods produced or manufactured in the Republic, is free within its borders, as also, that of all species of merchandise which may be dispatched by the Custom-Houses of entry.

Art. 11. Such articles of native or foreign production, as well as cattle of every kind, which pass from one Province to another, shall be free from all transit-duties, and also the vehicles, vessels or animals, which transport them; and no tax, let it be what it may, can be henceforward imposed upon them on account of such transit.

Art. 12. Vessels bound from one Province to another, shall not be compelled to enter, anchor, or pay transit-duties; nor in any case can preferences be granted to one port over another, by any commercial laws or regulations.

Art. 13. New Provinces may be admitted into the Nation; but no Province shall be erected within the territory of any other Province, or Provinces, nor any Province be formed by the junction of various Provinces, without the con-

sent of the legislatures of the Provinces concerned, as well as of Congress.

Art. 14. All the inhabitants of the Nation shall enjoy the following rights, according to the laws which regulate their exercise: viz., to labor and to practice all lawful industry; to trade and navigate; to petition the authorities; to enter, remain in, travel over and leave, Argentine territory; to publish their ideas in the public press without previous censure; to enjoy and dispose of their property; to associate for useful purposes; to profess freely their religion; to teach and to learn.

Art. 15. In the Argentine Nation there are no slaves; the few which now exist shall be free from the date of the adoption of this Constitution, and a special law shall regulate the indemnity acknowledged as due by this declaration. All contracts for the purchase and sale of persons is a crime, for which those who make them, as well as the notary or functionary which authorizes them, shall be responsible, and the slaves who in any manner whatever may be introduced, shall be free from the sole fact that they tread the territory of the Republic.

Art. 16. The Argentine Nation does not admit the prerogatives of blood nor of birth; in it, there are no personal privileges or titles of nobility. All its inhabitants are equal in presence of the law, and admissible to office without other condition than that of fitness. Equality is the basis of taxation as well as of public posts.

Art. 17. Property is inviolable, and no inhabitant of the Nation can be deprived of it, save by virtue of a sentence based on law. The expropriation for public utility must be authorized by law and previously indemnified. Congress alone shall impose the contributions mentioned in Art. 4. No personal service shall be exacted save by virtue of law, or of a sentence founded on law. Every author or inventor is the exclusive proprietor of his work, invention or discovery, for the term which the law accords to him. The confiscation of property is henceforward and forever, stricken from the Argentine penal-code. No armed body can make requisitions, nor exact assistance of any kind.

Art. 18. No inhabitant of the Nation shall suffer punishment without a previous judgment founded on a law passed previously to the cause of judgment, nor be judged by special commissions, or withdrawn from the Judges designated by law before the opening of the cause. No one shall be obliged to testify against himself; nor be arrested, save by virtue of a written order from a competent authority. The defense at law both of the person and his rights, is inviolable. The domicile, private papers and epistolary correspondence, are inviolable; and a law shall determine in what cases, and under what imputations, a search-warrant can proceed against and occupy them. Capital punishment for political causes, as well as every species of torture and whippings, are abolished for ever. The prisons of the Nation shall be healthy and clean, for the security, and not for the punishment, of the criminals detained in them, and every measure which under pretext of precaution may mortify them more than such security requires, shall render responsible the Judge who authorizes it.

Art. 19. Those private actions of men that in nowise offend public order and morality, or injure a third party, belong alone to God, and are

beyond the authority of the magistrates. No inhabitant of the Nation shall be compelled to do what the law does not ordain, nor be deprived of anything which it does not prohibit.

Art. 20. Within the territory of the Nation, foreigners shall enjoy all the civil rights of citizens; they can exercise their industries, commerce or professions, in accordance with the laws; own, buy and sell real-estate; navigate the rivers and coasts; freely profess their religion, and testate and marry. They shall not be obliged to become citizens, nor to pay forced contributions. Two years previous residence in the Nation shall be required for naturalization, but the authorities can shorten this term in favour of him who so desires it, under the allegation and proof of services rendered to the Republic.

Art. 21. Every Argentine citizen is obliged to arm himself in defense of his country and of this Constitution, according to the laws which Congress shall ordain for the purpose, and the decrees of the National Executive. For the period of ten years from the day on which they may have obtained their citizenship, this service shall be voluntary on the part of the naturalized.

Art. 22. The people shall not deliberate nor govern save by means of their Representatives and Authorities, created by this Constitution. Every armed force or meeting of persons which shall arrogate to itself the rights of the people, and petition in their name, is guilty of sedition.

Art. 23. In the event of internal commotion or foreign attack which might place in jeopardy the practice of this Constitution, and the free action of the Authorities created by it, the Province or territory where such disturbance exists shall be declared in a state of siege, all constitutional guarantees being meantime suspended there. But during such suspension the President of the Republic cannot condemn nor apply any punishment per se. In respect to persons, his power shall be limited to arresting and removing them from one place to another in the Nation, should they not prefer to leave Argentine territory.

Art. 24. Congress shall establish the reform of existing laws in all branches, as also the trial by Jury.

Art. 25. The Federal Government shall foment European immigration; and it cannot restrict, limit, nor lay any impost upon, the entry upon Argentine territory, of such foreigners as come for the purpose of cultivating the soil, improving manufactures, and introducing and teaching the arts and sciences.

Art. 26. The navigation of the interior rivers of the Nation is free to all flags, subject only to such regulations as the National Authority may dictate.

Art. 27. The Federal Government is obliged to strengthen the bonds of peace and commerce with foreign powers, by means of treaties which shall be in conformity with the principles of public law laid down in this Constitution.

Art. 28. The principles, rights and guarantees laid down in the foregoing articles, cannot be altered by any laws intended to regulate their practice.

Art. 29. Congress cannot grant to the Executive, nor the provincial legislatures to the Governor of Provinces, any "extraordinary faculties," nor the "sum of the public power," nor "renunciations or supremacies" by which the lives,

honor or fortune of the Argentines shall be at the mercy of any Government or person whatever. Acts of this nature shall be irremediably null and void, and shall subject those who frame, vote, or sign them, to the pains and penalties incurred by those who are infamous traitors to their country.

Art. 30. This Constitution can be reformed in whole or in part. The necessity for the reform shall be declared by Congress by at least a two-thirds vote; but it can only be accomplished by a convention called ad hoc.

Art. 31. This Constitution, and the laws of the Nation which shall be made in pursuance thereof, and all treaties made or which shall be made with Foreign Powers, shall be the supreme law of the land; and the authorities of every Province shall be bound thereby, anything in the Constitution or laws of any Province to the contrary notwithstanding, excepting in the case of Buenos-Aires, in the treaties ratified after the compact of Nov. 11th, 1859.

Art. 32. The Federal Congress shall not dictate laws restricting the liberty of the press, nor establish any federal jurisdiction over it.

Art. 33. The enumeration in this Constitution of certain rights and guarantees, shall not be construed to deny or disparage other rights and guarantees, not enumerated; but which spring from the principle of popular sovereignty, and the republican form of Government.

Art. 34. The Judges of the Federal courts shall not be Judges of Provincial tribunals at the same time; nor shall the federal service, civil as well as military, constitute a domicile in the Province where it may be exercised, if it be not habitually that of the employé; it being understood by this, that all Provincial public-service is optional in the Province where such employé may casually reside.

Art. 35. The names which have been successively adopted for the Nation, since the year 1810 up to the present time; viz., the United Provinces of the Rio de la Plata, Argentine Republic and Argentine Confederation, shall henceforward serve without distinction, officially to designate the Government and territory of the Provinces, whilst the words Argentine Nation shall be employed in the making and sanction of the laws.

Part II.—Section I.

Article 36. All legislative powers herein granted shall be vested in a Congress composed of two Chambers, one of National Deputies, and the other of Senators of the Provinces and of the capital.

Chapter I.

Article 37. The Chamber of Deputies shall be composed of representatives elected directly by the people of the Provinces, for which purpose each one shall be considered as a single electoral district, and by a simple plurality of votes in the ratio of one for each 20,000 inhabitants, or for a fraction not less than 10,000.

Art. 38. The deputies for the first Legislature shall be nominated in the following proportion: for the Province of Buenos-Aires, twelve; for that of Córdoba, six; for Catamarca, three; Corrientes, four; Entre-Rios, two; Jujui, two; Mendoza, three; Rioja, two; Salta, three; Santiago, four; San Juan, two; Santa-Fé, two; San Luis, two; and for that of Tucumán, three.

Art. 39. For the second Legislature a general census shall be taken, and the number of Deputies be regulated by it; thereafter, this census shall be decennial.

Art. 40. No person shall be a Deputy who shall not have attained the age of twenty five years, have been four years in the exercise of citizenship, and be a native of the Province which elects him, or a resident of it for the two years immediately preceding.

Art. 41. For the first election, the provincial Legislatures shall regulate the method for a direct election of the National Deputies. Congress shall pass a general law for the future.

Art. 42. The Deputies shall hold their place for four years, and are re-eligible; but the House shall be renewed each biennial, by halves; for which purpose those elected to the first Legislature, as soon as the session opens, shall decide by lot who shall leave at the end of the first period.

Art. 43. In case of vacancy, the Government of the Province or of the capital, shall call an election for a new member.

Art. 44. The origination of the tax-laws and those for the recruiting of troops, belongs exclusively to the House of Deputies.

Art. 45. It has the sole right of impeaching before the Senate, the President, Vice-President, their Ministers, and the members of the Supreme Court and other inferior Tribunals of the Nation, in suits which may be undertaken against them for the improper discharge of, or deficiency in, the exercise of their functions; or for common crimes, after having heard them, and declared by a vote of two thirds of the members present, that there is cause for proceeding against them.

Chapter II.

Article 46. The Senate shall be composed of two Senators from each Province, chosen by the Legislatures thereof by plurality of vote, and two from the capital elected in the form prescribed for the election of the President of the Nation. Each Senator shall have one vote.

Art. 47. No person shall be a Senator who shall not have attained the age of thirty years, been six years a citizen of the Nation, enjoy an annual rent or income of two thousand hard-dollars, and be a native of the Province which elects him, or a resident of the same for the two years immediately preceding.

Art. 48. The Senators shall enjoy their trust for nine years, and are indefinitely re-eligible; but the Senate shall be renewed by thirds each three years, and shall decide by lot, as soon as they be all re-united, who shall leave at the end of the first and second triennial periods.

Art. 49. The Vice-President of the Nation shall be President of the Senate; but shall have no vote, except in a case of a tie.

Art. 50. The Senate shall choose a President pro-tempore who shall preside during the absence of the Vice-President, or when he shall exercise the office of President of the Nation.

Art. 51. The Senate shall have sole power to try all impeachments presented by the House of Deputies. When sitting for that purpose they shall be under oath. When the President of the Nation is tried, the Chief Justice shall preside. No person shall be convicted without the concurrence of two-thirds of the members present.

Art. 52. Judgment in case of impeachment, shall not extend farther than to removal from

office, and disqualification to hold and enjoy any office of honor, trust, or profit under the Nation. But the party convicted shall, nevertheless, be liable to indictment, trial, judgment and punishment according to law, before the ordinary tribunals.

Art. 53. It belongs, moreover, to the Senate, to authorize the President to declare martial law in one or more points of the Republic, in case of foreign aggression.

Art. 54. When any seat of a Senator be vacant by death, resignation or other reason, the Government to which the vacancy belongs, shall immediately proceed to the election of a new member.

Chapter III.

Article 55. Both Chambers shall meet in ordinary session, every year from the 1st May until the 30th September. They can be extraordinarily convoked, or their session be prolonged by the President of the Nation.

Art. 56. Each House shall be the judge of the elections, returns, and qualifications of its own members. Neither of them shall enter into session without an absolute majority of its members; but a smaller number may compel absent members to attend the sessions, in such terms and under such penalties as each House may establish.

Art. 57. Both Houses shall begin and close their sessions simultaneously. Neither of them whilst in sessions can suspend its meetings for more than three days, without the consent of the other.

Art. 58. Each House may make its rules of proceeding, and with the concurrence of two-thirds punish its members for disorderly behavior in the exercise of their functions, or remove, and even expel them from the House, for physical or moral incapacity occurring after their incorporation; but a majority of one above one half of the members present, shall suffice to decide questions of voluntary resignation.

Art. 59. In the act of their incorporation the Senators and Deputies shall take an oath to properly fulfil their charge, and to act in all things in conformity to the prescriptions of this Constitution.

Art. 60. No member of Congress can be indicted, judicially interrogated, or molested for any opinion or discourse which he may have uttered in fulfilment of his Legislative duties.

Art. 61. No Senator or Deputy, during the term for which he may have been elected, shall be arrested, except when taken 'in flagrante' commission of some crime which merits capital punishment or other degrading sentence; an account thereof shall be rendered to the Chamber he belongs to, with a verbal process of the facts.

Art. 62. When a complaint in writing be made before the ordinary courts against any Senator or Deputy, each Chamber can by a two-thirds vote, suspend the accused in his functions and place him at the disposition of the competent judge for trial.

Art. 63. Each of the Chambers can cause the Ministers of the Executive to come to their Hall, to give such explanations or information as may be considered convenient.

Art. 64. No member of Congress can receive any post or commission from the Executive, without the previous consent of his respective Cham-

ber, excepting such as are in the line of promotion.

Art. 65. The regular ecclesiastics cannot be members of Congress, nor can the Governors of Provinces represent the Province which they govern.

Art. 66. The Senators and Deputies shall be remunerated for their services, by a compensation to be ascertained by law.

Chapter IV.

Article 67. The Congress shall have power:—

1. To legislate upon the Custom-Houses and establish import duties; which, as well as all appraisements for their collection, shall be uniform throughout the Nation, it being clearly understood that these, as well as all other national contributions, can be paid in any money at the just value which may be current in the respective Provinces. Also, to establish export duties.
2. To lay direct taxes for determinate periods, whenever the common defense and general welfare require it, which shall be uniform throughout the territory of the Nation.
3. To borrow money on the credit of the Nation.
4. To determine the use and sale of the National lands.
5. To establish and regulate a National Bank in the capital, with branches in the Provinces, and with power to emit bills.
6. To regulate the payment of the home and foreign debts of the Nation.
7. To annually determine the estimates of the National Administration, and approve or reject the accounts of expenses.
8. To grant subsidies from the National Treasury to those Provinces, whose revenues, according to their budgets, do not suffice to cover the ordinary expenses.
9. To regulate the free navigation of the interior rivers, open such ports as may be considered necessary, create and suppress Custom-Houses, but without suppressing those which existed in each Province at the time of its incorporation.
10. To coin money, regulate the value thereof and of foreign coin, and adopt a uniform system of weights and measures for the whole Nation.
11. To decree civil, commercial, penal and mining Codes, but such Codes shall have no power to change local jurisdiction; their application shall belong to the Federal or Provincial courts, in accordance with such things or persons as may come under their respective jurisdiction; especially, general laws embracing the whole Nation, shall be passed upon naturalization and citizenship, subject to the principle of native citizenship; also upon bankruptcy, the counterfeiting of current-money and public State documents; and such laws as may be required for the establishment of trial by Jury.
12. To regulate commerce by land and sea with foreign nations, and between the Provinces.
13. To establish and regulate the general post-offices and post-roads of the Nation.
14. To finally settle the National boundaries, fix those of the Provinces, create new Provinces, and determine by a special legislation, the organization and governments, which such National territories as are beyond the limits assigned to the Province, should have.
15. To provide for the security of the frontiers; preserve peaceful relations with the Indians, and promote their conversion to Catholicism.
16. To provide all things conducive to the prosperity of the country, to the advancement and happiness of the Provinces, and to the increase of enlightenment, decreeing plans for general and university instruction, promoting

industry, immigration, the construction of railways, and navigable canals, the peopling of the National lands, the introduction and establishment of new industries, the importation of foreign capital and the exploration of the interior rivers, by protection laws to these ends, and by temporary concessions and stimulating recompenses. 17. To constitute tribunals inferior to the Supreme Court, create and suppress public offices, fix their attributes, grant pensions, decree honors and general amnesties. 18. To accept or reject the resignation of the President or Vice-President of the Republic, and declare new elections; to make the scrutiny and rectification of the same. 19. To ratify or reject the treaties made with other Nations and the Concordats with the Apostolic See, and regulate the patronage of advowsons throughout the Nation. 20. To admit religious orders within the Nation, other than those already existing. 21. To authorize the Executive to declare war and make peace. 22. To grant letters of marque and reprisal, and to make rules concerning prizes. 23. To fix the land and sea forces in time of peace and war: and to make rules and regulations for the government of said forces. 24. To provide for calling forth the militia of all, or a part of, the Provinces, to execute the laws of the Nation, suppress insurrections or repel invasions. To provide for organizing, arming, and disciplining said militia, and for governing such part of them as may be employed in the service of the Nation, reserving to the Provinces respectively, the appointment of the corresponding chiefs and officers, and the authority of training the militia according to the discipline prescribed by Congress. 25. To permit the introduction of foreign troops within the territory of the Nation, and the going beyond it of the National forces. 26. To declare martial law in any or various points of the Nation in case of domestic commotion, and ratify or suspend the declaration of martial law made by the executive during the recess. 27. To exercise exclusive legislation over the territory of the National capital, and over such other places acquired by purchase or cession in any of the Provinces, for the purpose of establishing forts, arsenals, warehouses, or other needful national buildings. 28. To make all laws and regulations which shall be necessary for carrying into execution the foregoing powers, and all others vested by the present Constitution in the Government of the Argentine Nation.

Chapter V.

Article 68. Laws may originate in either of the Houses of Congress, by bills presented by their members or by the Executive, excepting those relative to the objects treated of in Art. 44.

Art. 69. A bill being approved by the House wherein it originated, shall pass for discussion to the other House. Being approved by both, it shall pass to the Executive of the Nation for his examination; and should it receive his approbation he shall publish it as law.

Art. 70. Every bill not returned within ten working-days by the Executive, shall be taken as approved by him.

Art. 71. No bill entirely rejected by one House, can be presented again during that year. But should it be only amplified or corrected by the revising House, it shall return to that wherein it originated; and if there the additions or cor-

rections be approved by an absolute majority, it shall pass to the Executive. If the additions or corrections be rejected, it shall return to the revising House, and if here they be again sanctioned by a majority of two-thirds of its members, it shall pass to the other House, and it shall not be understood that the said additions and corrections are rejected, unless two-thirds of the members present should so vote.

Art. 72. A bill being rejected in whole or in part by the Executive, he shall return it with his objections to the House in which it originated; here it shall be debated again; and if it be confirmed by a majority of two-thirds, it shall pass again to the revising House. If both Houses should pass it by the same majority, it becomes a law, and shall be sent to the Executive for promulgation. In such case the votes of both Houses shall be by yeas and nays, and the names of the persons so voting shall be recorded, as well as the objections of the Executive, and shall be immediately published in the daily-press. If the Houses differ upon the objections, the bill cannot be renewed during that year.

Art. 73. The following formula shall be used in the passage of the laws: "The Senate and Chamber of Deputies of the Argentine Nation in Congress assembled, etc. decree, or sanction, with the force of law."

Section II.—Chapter I.

Article 74. The Executive power of the Nation shall be exercised by a citizen, with the title of "President of the Argentine Nation."

Art. 75. In case of the sickness, absence from the capital, death, resignation or dismissal of the President, the Executive power shall be exercised by the Vice-President of the Nation. In case of the removal, death, resignation, or inability of the President and Vice-President of the Nation, Congress will determine which public functionary shall then fill the Presidency, until the disability be removed or a new President be elected.

Art. 76. No person except a natural-born citizen or a son of a natural-born citizen brought forth abroad, shall be eligible as President or Vice-President of the Nation; he is required to belong to the Apostolic-Roman-Catholic communion, and possess the other qualifications required to be elected Senator.

Art. 77. The President and Vice-President shall hold office during the term of six years; and cannot be re-elected except after an interval of an equal period.

Art. 78. The President of the Nation shall cease in his functions the very day on which his period of six years expires, and no event whatever which may have interrupted it, can be a motive for completing it at a later time.

Art. 79. The President and Vice-President shall receive a compensation from the National Treasury, which cannot be altered during the period for which they shall have been elected. During the same period they cannot exercise any other office nor receive any other emolument from the Nation, or any of its Provinces.

Art. 80. The President and Vice-President before entering upon the execution of their offices, shall take the following oath administered by the President of the Senate (the first time by the President of the Constituent Congress) in Congress assembled: "I (such an one) swear by

God our Lord, and by these Holy Evangelists, that I will faithfully and patriotically execute the office of President (or Vice-President) of the Nation, and observe and cause to be faithfully observed, the Constitution of the Argentine Nation. If I should not do so, let God and the Nation indict me."

Chapter II.

Article 81. The election of the President and Vice-President of the Nation, shall be made in the following manner:—The capital and each of the Provinces shall by direct vote nominate a board of electors, double the number of Deputies and Senators which they send to Congress, with the same qualifications and under the same form as those prescribed for the election of Deputies. Deputies or Senators, or officers in the pay of the Federal Government cannot be electors. The electors being met in the National capital and in that of their respective Provinces, four months prior to the conclusion of the term of the out-going President, they shall proceed by signed ballots, to elect a President, and Vice-President, one of which shall state the person as President, and the other the person as Vice-President, for whom they vote. Two lists shall be made of all the individuals elected as President, and other two also, of those elected as Vice-President, with the number of votes which each may have received. These lists shall be signed by the electors, and shall be remitted closed and sealed, two of them (one of each kind) to the President of the Provincial Legislature, and to the President of the Municipality in the capital, among whose records they shall remain deposited and closed; the other two shall be sent to the President of the Senate (the first time to the President of the Constituent Congress).

Art. 82. The President of the Senate (the first time that of the Constituent Congress) all the lists being received, shall open them in the presence of both Houses. Four members of Congress taken by lot and associated to the Secretaries, shall immediately proceed to count the votes, and to announce the number which may result in favor of each candidate for the Presidency and Vice-Presidency of the Nation. Those who have received an absolute majority of all the votes in both cases, shall be immediately proclaimed President and Vice-President.

Art. 83. In case there be no absolute majority, on account of a division of the votes, Congress shall elect one of the two persons who shall have received the highest number of votes. If the first majority should have fallen to a single person, and the second to two or more, Congress shall elect among all the persons who may have obtained the first and second majorities.

Art. 84. This election shall be made by absolute plurality of votes, and voting by name. If, on counting the first vote, no absolute majority shall have been obtained, a second trial shall be made, limiting the voting to the two persons who shall have obtained the greatest number of suffrages at the first trial. In case of an equal number of votes, the operation shall be repeated, and should the result be the same, then the President of the Senate (the first time that of the Constituent Congress) shall decide it. No scrutiny or rectification of these elections can be made, unless three-fourth parts of all the members of the Congress be present.

Art. 85. The election of the President and Vice-President of the Nation, shall be concluded in a single meeting of the Congress, and thereafter, the result and the electoral lists shall be published in the daily-press.

Chapter III.

Article 86. The President of the Nation has the following attributes:—1. He is the supreme chief of the Nation, and is charged with the general administration of the country. 2. He issues such instructions and regulations as may be necessary for the execution of the laws of the Nation, taking care not to alter their spirit with regulative exceptions. 3. He is the immediate and local chief of the National capital. 4. He participates in making the laws according to the Constitution; and sanctions and promulgates them. 5. He nominates the Judges of the Supreme Court and of the Inferior Federal tribunals, and appoints them by and with the consent and advice of the Senate. 6. He has power to pardon or commute penalties against officers subject to Federal jurisdiction, preceded by a report of the proper Tribunal, excepting in case of impeachment by the House of Deputies. 7. He grants retiring-pensions, leaves of absence and pawnbrokers' licences, in conformity to the laws of the Nation. 8. He exercises the rights of National Patronage in the presentation of Bishops for the cathedrals, choosing from a ternary nomination of the Senate. 9. He grants letters-patent or retains the decrees of the Councils, the bulls, briefs and rescripts of the Holy Roman Pontiff, by and with the consent of the Supreme Court, and must require a law for the same when they contain general and permanent dispositions. 10. He appoints and removes Ministers Plenipotentiary and Chargé d'Affaires, by and with the consent and advice of the Senate; and himself alone appoints and removes the Ministers of his Cabinet, the officers of the Secretaryships, Consular Agents, and the rest of the employés of the Administration whose nomination is not otherwise ordained by this Constitution. 11. He annually opens the Sessions of Congress, both Houses being united for this purpose in the Senate Chamber, giving an account to Congress on this occasion of the state of the Nation, of the reforms provided by the Constitution, and recommending to its consideration such measures as may be judged necessary and convenient. 12. He prolongs the ordinary meetings of Congress or convokes it in extra session, when a question of progress or an important interest so requires. 13. He collects the rents of the Nation and decrees their expenditure in conformity to the law or estimates of the Public expenses. 14. He negotiates and signs those treaties of peace, of commerce, of navigation, of alliance, of boundaries and of neutrality, requisite to maintain good relations with foreign powers; he receives their Ministers and admits their Consuls. 15. He is commander in chief of all the sea and land forces of the Nation. 16. He confers, by and with the consent of the Senate, the high military grades in the army and navy of the Nation; and by himself on the field of battle. 17. He disposes of the land and sea forces, and takes charge of their organization and distribution according to the requirements of the Nation. 18. By the authority and approval of Congress, he declares war and grants letters of marque and

reprisal. 19. By and with the consent of the Senate, in case of foreign aggression and for a limited time, he declares martial law in one or more points of the Nation. In case of internal commotion he has this power only when Congress is in recess, because it is an attribute which belongs to this body. The President exercises it under the limitations mentioned in Art. 23. 20. He may require from the chiefs of all the branches and departments of the Administration, and through them from all other employes, such reports as he may believe necessary, and they are compelled to give them. 21. He cannot absent himself from the capital of the Nation without permission of Congress. During the recess he can only do so without permission on account of important objects of public service. 22. The President shall have power to fill all vacancies that may happen during the recess of the Senate, by granting commissions, which shall expire at the end of their next session.

Chapter IV.

Article 87. Five Minister-Secretaries; to wit, of the Interior; of Foreign Affairs; of Finance; of Justice, Worship and Public Instruction; and of War and the Navy; shall have under their charge the dispatch of National affairs, and they shall counter-sign and legalize the acts of the President by means of their signatures, without which requisite they shall not be efficacious. A law shall determine the respective duties of the Ministers.

Art. 88. Each Minister is responsible for the acts which he legalizes, and collectively, for those which he agrees to with his colleagues.

Art. 89. The Ministers cannot determine anything whatever, by themselves, except what concerns the economical and administrative regimen of their respective Departments.

Art. 90. As soon as Congress opens, the Ministers shall present to it a detailed report of the State of the Nation, in all that relates to their respective Departments.

Art. 91. They cannot be Senators or Deputies without resigning their places as Ministers.

Art. 92. The Ministers can assist at the meetings of Congress and take part in its debates, but they cannot vote.

Art. 93. They shall receive for their services a compensation established by law, which shall not be increased or diminished, in favor or against, the actual incumbents.

Section III.—Chapter I.

Article 94. The Judicial Power of the Nation shall be exercised by a Supreme Court of Justice, and by such other inferior Tribunals as Congress may establish within the dominion of the Nation.

Art. 95. The President of the Nation cannot in any case whatever, exercise Judicial powers, arrogate to himself any knowledge of pending causes, or reopen those which have terminated.

Art. 96. The Judges of the Supreme Court and of the lower National-Tribunals, shall keep their places *quamdiu se bene gesserit*, and shall receive for their services a compensation determined by law, which shall not be diminished in any manner whatever during their continuance in office.

Art. 97. No one can be a member of the Supreme Court of Justice, unless he shall have been an attorney at law of the Nation for eight years,

and shall possess the qualifications required for a Senator.

Art. 98. At the first installation of the Supreme Court, the individuals appointed shall take an oath administered by the President of the Nation, to discharge their functions, by the good and legal administration of Justice according to the prescriptions of this Constitution. Thereafter, the oath shall be taken before the President of the Court itself.

Art. 99. The Supreme Court shall establish its own internal and economical regulations, and shall appoint its subaltern employes.

Chapter II.

Article 100. The Judicial power of the Supreme Court and the lower National-Tribunals, shall extend to all cases arising under this Constitution, the laws of the Nation with the reserve made in clause 11 of Art. 67, and by treaties with foreign nations; to all cases affecting ambassadors, public Ministers and foreign Consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the Nation shall be party; to controversies between two or more Provinces; between a Province and the citizens of another; between the citizens of different Provinces; and between a Province or its citizens, against a foreign State or citizen.

Art. 101. In these cases the Supreme Court shall exercise an appellate jurisdiction according to such rules and exceptions as Congress may prescribe; but in all cases affecting ambassadors, ministers and foreign consuls, or those in which a Province shall be a party, it shall exercise original and exclusive jurisdiction.

Art. 102. The trial of all ordinary crimes except in cases of impeachment, shall terminate by jury, so soon as this institution be established in the Republic. These trials shall be held in the same Province where the crimes shall have been committed, but when not committed within the frontiers of the Nation, but against International Law, Congress shall determine by a special law the place where the trial shall take effect.

Art. 103. Treason against the Nation shall only consist in levying war against it, or in adhering to its enemies, giving them aid and comfort. Congress shall fix by a special law the punishment of treason; but it cannot go beyond the person of the criminal, and no attainder of treason shall work corruption of blood to relatives of any grade whatever.

Art. 104. The Provinces keep all the powers not delegated by this Constitution to the Federal Government, and those which were expressly reserved by special compacts at the time of their incorporation.

Art. 105. They create their own local institutions and are governed by these. They elect their own Governors, their Legislators and other Provincial functionaries, without intervention from the Federal Government.

Art. 106. Each Province shall make its own Constitution in conformity with the dispositions of Art. 5.

Art. 107. The Provinces with the consent of Congress can celebrate contracts among themselves for the purposes of administering justice and promoting economical interests and works of common utility, and also, can pass protective laws for the purpose with their own resources, of promoting manufactures, immigration, the

building of railways and canals, the peopling of their lands, the introduction and establishment of new industries, the import of foreign capital and the exploration of their rivers.

Art. 108. The Provinces cannot exercise any powers delegated to the Nation. They cannot celebrate compacts of a political character, nor make laws on commerce or internal or external navigation; nor establish Provincial Custom-Houses, nor coin money, nor establish Banks of emission, without authority of Congress; nor make civil, commercial, penal or mining Codes after Congress shall have sanctioned those provided for in this Constitution; nor pass laws upon citizenship or naturalization; bankruptcy, counterfeiting money or public State-documents; nor lay tonnage dues; nor arm vessels of war or

CONSTITUTION OF THE AUSTRO-HUNGARIAN EMPIRE.—For a general account of the Ausgleich or agreement under which the duality of the Austro-Hungarian Empire was arranged in 1867, see AUSTRIA: A. D. 1866-1867, and 1866-1887. The following describes the principal features of the constitutional organization of the empire: "The emperor has an absolute veto on all measures in all of the three parliaments after named. He can also dissolve any of them. The legislative and administrative assemblies of the empire are four in number, viz.: (1). The Delegationen, which is the imperial parliament. (2). The Reichsrath and the Reichstag, which are the parliaments for Austria proper and Hungary respectively. (3). The Landtag, which is the parliament for the provinces of the empire of Austria. (4). The Gemeinderath or the Gemeindeausschuss, which are the councils of the communes, but they have no legislative functions proper." The Delegationen, or imperial parliament of the dual empire, "acts as one House, but meets in two chambers or bodies, one for Austria and one for Hungary. Each chamber has 60 members, composed of 20 members elected from the upper house of each part of the united empire, and 40 from the lower. It is elected for one year only. The chambers of the imperial parliament meet at the same time and in the same place, alternately in Austria and Hungary, and, as a rule, in the cities of Vienna and Buda-Pesth. They legislate for the united empire on (1) its foreign policy, (2) its finances, (3) its army and navy, and (4) for the affairs of Bosnia and Herzegovina, as they have no Landtag of their own. A minister of state for each of the first three of these matters controls its departments, while the fourth is under the management of the common finance minister. The ministers are appointed by the emperor after consultation with leaders of parties. The presidents of the Delegationen, as also the vice-presidents, must be members of the chambers, but they receive no special salary. They are elected by the members. Each chamber meets separately, and discusses the measures and bills submitted to it by the ministers of state, or by any six of its members. If both chambers agree upon the matter submitted to them, the emperor's sanction is obtained to it, and it becomes law. If the chambers cannot agree, after each of them has discussed the matter three times, upon written communication from the other, a session of both chambers is convened, and the question is decided by a

raise armies, save in the case of foreign invasion, or of a danger so imminent that it admits of no delay, and then an account thereof must be immediately given to the Federal Government; or name or receive foreign agents; or admit new religious orders.

Art. 109. No Province can declare or make war to another Province. Its complaints must be submitted to the Supreme Court of Justice and be settled by it. Hostilities de facto are acts of civil-war and qualified as seditious and tumultuous, which the General Government must repress and suffocate according to law.

Art. 110. The Provincial Governors are the natural agents of the Federal Government to cause the fulfilment of the laws of the Nation. See ARGENTINE REPUBLIC: A. D. 1880-1891.

majority of those present. Two thirds of the members of the house must, however, in this case be in attendance. In the ordinary case the quorum of each chamber is 30 members. The sittings of the chambers are public, but they may be private on the proposition of the president or of five members, and voted upon. The chambers are convened by the writ of the emperor. . . . Each chamber appoints 24 judges to hear and determine any cases which may be brought against the ministers of the crown for breach of power. . . . Two per cent. being first paid by Hungary, the balance of the imperial expenditure is borne in the proportion of 70 per cent. by Austria and 30 per cent. by Hungary, the former being the wealthier country. . . . The Reichsrath [the Austrian parliament] . . . consists of two houses—one called the Herren House, or Upper House; the other called the Abgeordneten House, i. e. the House of Deputies, or the Lower House. It is elected for six years. The Herren House is composed of (1) Princes of the imperial house, who are majors. (2) Chiefs of noble houses, owning large estates, nominated by the emperor, who, being once nominated, are members for life, and their successors after them, and so this class, to some extent, is one of hereditary legislators. (3) Archbishops and bishops with the dignity of prince. (4) Men who have distinguished themselves in science, art, commerce, law, or medicine, who are nominated by the emperor for life, on the advice of the ministers of state. The number of members of the Upper House is not fixed, but it is about 200. . . . The Lower or Abgeordneten House is that of the deputies, elected by the people, and consists of 353 members. It is elected for six years. The people vote for its members in four classes in their various provinces. The first class are the owners of large estates, who elect 85 members. . . . The second class are those who pay five florins of direct taxation in towns, and includes all doctors of the universities, whether they pay taxes or not. The towns are grouped so as to give one member for each group. The groups need not be of equal size. This class elects 115 members. The third class is the chambers of commerce and industry, which elect 22 members. . . . The fourth class are the members of the country communes who pay five florins of direct taxation. They elect 131 members. The communes for this purpose are divided into groups of 500 voters, and a certain number of communes make an electoral district. . . . The elections are not

CONSTITUTION: AUSTRIA-HUNGARY.

all held on one day, and each class votes by itself in each province on a particular day. The communes vote first, then the citizens, then the chambers, and then the landowners, all on different days. The election takes place in a public hall, where the voters gather; and their names

CONSTITUTION OF BELGIUM.

being called over, if present, they go up to the presiding officer, and vote orally, or by a card placed by them in a box. If not present when called upon, they can attend and vote later on."
—J. P. Coldstream, *The Institutions of Austria*, ch. 2.

CONSTITUTION OF BELGIUM.

On page 2304 of this work, under NETHERLANDS (BELGIUM): A. D. 1892-1893, there is given some account of the revision of the constitution of the kingdom, in 1893, and the peculiar new features introduced in its provisions, relative to the elective franchise. The following is a translation of the text of the revised constitution:

Title I.

Of the Territory and of its Divisions.

Article 1. Belgium is divided into provinces, these provinces are: Antwerp, Brabant, Western Flanders, Eastern Flanders, Hainaut, Liège, Limburg, Luxemburg, Namur. It is the prerogative of law, if there is any reason, to divide the territory into a larger number of provinces. Colonies, possessions beyond the seas or protectorates which Belgium may acquire, are governed by particular laws. The Belgian forces appointed for their defense can only be recruited by voluntary enlistment.

Article 2. The subdivisions of the provinces can be established only by law.

Article 3. The boundaries of the State, of the provinces and of the communes can be changed or rectified only by a law.

Title II.

Of the Belgians and their Rights.

Article 4. The title Belgian is acquired, preserved and lost according to the regulations determined by civil law. The present Constitution, and other laws relating to political rights, determine what are, in addition to such title, the conditions necessary for the exercise of these rights.

Article 5. Naturalization is granted by the legislative power. The great naturalization, alone, assimilates the foreigner to the Belgian for the exercise of political rights.

Article 6. There is no distinction of orders in the State. Belgians are equal before the law; they alone are admissible to civil and military offices, with such exceptions as may be established by law in particular cases.

Article 7. Individual liberty is guaranteed. No person can be prosecuted except in the cases provided for by law and in the form which the law prescribes. Except in the case of flagrant misdemeanor, no person can be arrested without the order of a judge, which must be served at the time of the arrest, or, at the latest, within twenty-four hours.

Article 8. No person can be deprived, against his will, of the judge assigned to him by law.

Article 9. No punishment can be established or applied except by provision of law.

Article 10. The domicile is inviolable; no domiciliary visit can be made otherwise than in the cases provided for by law and in the form which it prescribes.

Article 11. No person can be deprived of his property except for public use, in the cases and in the manner established by law, and with prior indemnity.

Article 12. The penalty of confiscation of goods cannot be imposed.

Article 13. Civil death is abolished; it cannot be revived.

Article 14. Religious liberty, public worship, and freedom of expressed opinion in all matters are guaranteed, with a reserve for the repression of offenses committed in the exercise of these liberties.

Article 15. No person can be compelled to join, in any manner whatsoever, in the acts and ceremonies of any worship, nor to observe its days of rest.

Article 16. The State has no right to interfere in the appointment nor in the installation of the ministers of any religion, nor to forbid them to correspond with their superiors and to publish their acts under the ordinary responsibility of publication. Civil marriage shall always precede the nuptial benediction, with the exceptions to be prescribed by law in case of need.

Article 17. Teaching is free; all preventive measures are forbidden; the repression of offenses is regulated only by law. Public instruction given at the expense of the State is also regulated by law.

Article 18. The press is free; censorship can never be re-established; caution-money from writers, editors or printers cannot be required. When the author is known and is a resident of Belgium, the editor, the printer or the distributor cannot be prosecuted.

Article 19. Belgians have the right to meet peaceably and without arms, in conformity with such laws as may regulate the use of their right but without the requirement of a previous authorization. This stipulation does not apply to open air meetings, which remain entirely subject to police regulations.

Article 20. Belgians have the right of association; this right cannot be subject to any preventive measure.

Article 21. It is the right of every person to address to the public authorities petitions signed by one or several. The constituted authorities alone have the right to address petitions in a collective name.

Article 22. The secrecy of correspondence is inviolable. The law determines who are the agents responsible for violation of the secrecy of letters confided to the post.

Article 23. The use of the languages spoken in Belgium is optional; it can be prescribed only by law, and only for acts of public authority and for judicial transactions.

Article 24. No previous authorization is necessary for the undertaking of proceedings against public officials, on account of acts in their administration, except that which is enacted concerning ministers.

Title III.

Of Powers.

Article 25. All powers are derived from the nation. They are exercised in the manner prescribed by the Constitution.

Article 26. Legislative power is exercised collectively by the King, the Chamber of Representatives and the Senate.

Article 27. The initiative belongs to each one of the three branches of the legislative power. Nevertheless, all laws relating to the revenue or to the expenditures of the State, or to the contingent of the army must be voted first by the Chamber of Representatives.

Article 28. The interpretation of laws by authority belongs only to the legislative power.

Article 29. The executive power, as regulated by the Constitution, belongs to the King.

Article 30. The judicial power is exercised by the courts and tribunals. Decrees and judgments are executed in the name of the King.

Article 31. Interests exclusively communal or provincial, are regulated by the communal or provincial councils, according to the principles established by the Constitution.

Chapter First.—Of The Chambers.

Article 32. Members of both Chambers represent the nation, and not merely the province or the subdivision of province which has elected them.

Article 33. The sittings of the Chambers are public. Nevertheless, each Chamber forms itself into a secret committee on the demand of its president or of ten members. It then decides by absolute majority whether the sitting on the same subject shall be resumed publicly.

Article 34. Each Chamber verifies the powers of its members and decides all contests on the subject that may arise.

Article 35. No person can be at the same time a member of both Chambers.

Article 36. A member of one of the two Chambers who is appointed by the government to any salaried office, except that of minister, and who accepts the same, ceases immediately to sit, and resumes his functions only by virtue of a new election.

Article 37. At every session, each Chamber elects its president and its vice-presidents and forms its bureau.

Article 38. Every resolution is adopted by the absolute majority of the votes, excepting as may be directed by the rules of the Chambers in regard to elections and presentations. In case of an equal division of votes, the proposition brought under deliberation is rejected. Neither of the two Chambers can adopt a resolution unless the majority of its members is present.

Article 39. Votes are given by the voice or by sitting and rising; on "l'ensemble des lois" the vote is always taken by the call of the roll of names. Elections and presentations of candidates are made by ballot.

Article 40. Each Chamber has the right of inquiry [or investigation].

Article 41. A bill can be passed by one of the Chambers only after having been voted article by article.

Article 42. The Chambers have the right to amend and to divide the articles and the amendments proposed.

Article 43. The presenting of petitions in person to the Chambers is forbidden. Each Chamber has the right to refer to ministers the petitions that are addressed to it. Ministers are required to give explanations whenever the Chamber requires them.

Article 44. No member of either Chamber can be prosecuted or called to account for opinions expressed or votes given by him in the performance of his duties.

Article 45. No member of either Chamber can be prosecuted or arrested in affairs of repression, during the session, without the authorization of the Chamber of which he is a member, except the case be "de flagrant delit." No bodily constraint can be exercised against a member of either Chamber during the session, except with the same authorization. The detention or the prosecution of a member of either Chamber is suspended during the whole session if the Chamber so requires.

Article 46. Each Chamber determines by its rules the mode in which it will exercise its powers.

Section I.—Of the Chamber of Representatives.

Article 47. Deputies to the Chamber of Representatives are elected directly under the following conditions: A vote is conferred on citizens who have completed their 25th year, who have resided for at least one year in the same commune, and who are not within one of the cases of exclusion provided for by law. A supplementary vote is conferred on each citizen who fulfills one of the following conditions: 1. To have completed 35 years of age, to be married, or to be a widower having legitimate offspring, and to pay to the State a tax of not less than 5 francs on account of dwelling-houses or buildings occupied, unless exempted by reason of his profession. 2. To have completed the age of 25 years and to be owner: Either of real property, valued at not less than 2,000 francs to be rated on the basis of the "revenu cadastral," or of a "revenu cadastral" proportioned to that value; Or of an inscription in the great book of the public debt, or of a "carnet de rente Belge" at the savings bank of at least 100 francs of "rente." The inscriptions and bank books must have belonged to the incumbent for at least two years and a half. The property of the wife is assigned to the husband; that of children under age, to the father. Two supplementary votes are assigned to citizens fully 25 years of age who are included in one of the following cases: A. To be the holder of a diploma of higher instruction or of a similar certificate of attendance on a complete course of medium instruction of the higher degree, without distinction between public and private establishments. B. To fill or to have filled a public office, to occupy or to have occupied a position, to practise or to have practised a private profession, which implies the supposition that the titular has at least an average education of the higher degree. The law determines these functions, positions and professions, as well as, in given cases, the time during which they shall have been occupied or practised. No person can accumulate more than three votes.

Article 48. The constitution of the electoral colleges is regulated by law for each province. The vote is obligatory and takes place in the commune with exceptions to be determined by law.

Article 49. The electoral law fixes the number of deputies according to the population; this number cannot exceed the proportion of a

deputy for 40,000 inhabitants. It determines also the qualifications of an elector and the mode of the electoral operations.

Article 50. To be eligible, it is necessary: 1. To be a Belgian by birth or to have received the "grand naturalization"; 2. To enjoy civil and political rights; 3. To have completed 25 years of age; 4. To reside in Belgium. No other condition of eligibility can be required.

Article 51. The members of the Chamber of Representatives are elected for four years. Half of them are changed every two years, according to the order of the series determined by the electoral law. In case of dissolution, the Chamber is entirely renewed.

Article 52. Each member of the Chamber of Representatives receives a yearly indemnity of 4,000 francs. He is, besides, entitled to free travel on the State railways and on the "conceded" railways, from his residence to the city where the session is held.

Section II.—Of the Senate.

Article 53. The Senate is composed: 1. Of members elected in proportion to the population of each province, conformably to Art. 47; though the law may require that the electors shall be 30 years of age, the provisions of Art. 48 are applicable to the election of these senators. 2. Of members elected by the provincial councils, to the number of two from each province having less than 500,000 inhabitants, of three from each province having from 500,000 to 1,000,000 of inhabitants, and of four from each province having more than one million of inhabitants.

Article 54. The number of senators elected directly by the electoral body is equal to half the number of the members of the Chamber of Representatives.

Article 55. Senators are elected for eight years; half of them are changed every four years, according to the order of the series determined by the electoral law. In case of dissolution, the Senate is entirely renewed.

Article 56. To be eligible for election and to remain a senator, it is necessary: 1. To be a Belgian by birth or to have received the "grande naturalization"; 2. To enjoy civil and political rights; 3. To reside in Belgium; 4. To be at least 40 years of age; 5. To pay into the treasury of the State at least 1,200 francs of direct taxes, patents included; Or to be either proprietor or usufructuary of real property situated in Belgium, the cadastral revenue from which is at least 12,000 francs. In the provinces where the number of those eligible does not attain the proportion of one in 5,000 inhabitants, the list is completed by adding the heaviest tax-payers of the province to the extent of that proportion. Citizens whose names are inscribed on the complementary list are eligible only in the province where they reside.

Article 56 bis. Senators elected by the provincial councils are exempted from all conditions of census; they cannot belong to the assembly which elects them, nor can they have been a member of it during the year of the election, nor during the two previous years.

Article 57. Senators receive neither salary nor indemnity.

Article 58. The King's sons, or in their absence the Belgian Princes of the branch of the Royal family called to reign, are by right sena-

tors at 18 years of age. They have a deliberative voice only at 25 years of age.

Article 59. Any assembly of the Senate which may be held outside the time of the session of the Chamber of Representatives is null and void.

Chapter II.—Of the King and his Ministers.

Section II.—Of the King.

Article 60. The constitutional powers of the King are hereditary in the direct, natural and legitimate descent from His Majesty Leopold-George-Christian-Frederick of Saxe-Coburg, from male to male, by order of primogeniture, and to the perpetual exclusion of the females of their line. The prince who marries without the consent of the King or of those who, in his absence, exercise his powers, in the cases provided for by the Constitution, shall forfeit his rights. Nevertheless he can be restored to his rights by the King or by those who, in his absence, exercise his authority in the cases provided for by the Constitution, with the consent of both Chambers.

Article 61. In default of male descendants of his Majesty Leopold-George-Christian-Frederick of Saxe-Coburg, the King can name his successor, with the assent of the Chambers, expressed in the manner prescribed by the following article. If no nomination has been made according to the proceeding here stated, the throne will be vacant.

Article 62. The King cannot be, at the same time, the chief of another State, without the consent of both Chambers. Neither of the two Chambers can deliberate on this subject if two-thirds at least of the members who compose it are not present, and the resolution is adopted only if it receives two-thirds at least of the votes cast.

Article 63. The person of the King is inviolable; his ministers are responsible.

Article 64. No act of the King can have effect if it is not countersigned by a minister, who, thereby, makes himself responsible.

Article 65. The King appoints and dismisses his ministers.

Article 66. He confers the grades in the army. He appoints to the offices of general administration and of foreign relations, with the exceptions determined by law. He appoints to other offices only by virtue of express provisions of a law.

Article 67. He makes the regulations and decrees necessary to the execution of the laws, without power to suspend the laws themselves, nor to exempt from their execution.

Article 68. The King commands the land and naval forces, declares war, makes treaties of peace, of alliance, and of commerce. He announces them to the Chambers as soon as the interest and the safety of the State admit of it, adding to them appropriate communications. Treaties of commerce and those which might burden the State or bind Belgians individually become effective only after having received the approval of the Chambers. No cession, nor exchange, nor addition of territory can take place without authority of a law. In no case can the secret articles of a treaty be destructive to the open articles.

Article 69. The King sanctions and promulgates the laws.

Article 70. The Chambers meet by right every year, on the 2d Tuesday in November, unless

previously summoned by the King. The Chambers must remain in session at least 40 days in each year. The King declares the closing of the session. The King has the right to call extra sessions of the Chambers.

Article 71. The King has the right to dissolve the Chambers, either simultaneously or separately; the act of dissolution to contain a convocation of the electors within forty days and of the Chambers within two months.

Article 72. The King may adjourn the Chambers. The adjournment, however, cannot exceed the term of one month, nor be renewed in the same session, without the consent of the Chambers.

Article 73. He has the right to remit or to reduce penalties pronounced by the judges, except those which are enacted concerning the ministers.

Article 74. He has the right to coin money, in execution of the law.

Article 75. He has the right to confer titles of nobility, without power to attach any privilege to them.

Article 76. He confers the military orders, observing in that regard what the law prescribes.

Article 77. The law fixes the civil list for the duration of each reign.

Article 78. The King has no other powers than those formally conferred on him by the Constitution, and by laws enacted pursuant to the Constitution.

Article 79. On the death of the King, the Chambers meet without convocation, not later than the tenth day after that of his decease. If the Chambers had been previously dissolved, and if the convocation had been fixed in the act of dissolution for a later date than the tenth day, the old Chambers resume their functions until the meeting of those which are to take their place. If one Chamber only had been dissolved, the same rule is followed with regard to that Chamber. From the death of the King and until his successor on the throne or the regent has taken the oath, the constitutional powers of the King are exercised, in the name of the Belgian nation, by the ministers assembled in council and under their responsibility.

Article 80. The King is of age when he has completed his 18th year. He takes possession of the throne only after having solemnly taken, in the midst of the Chambers assembled together, the following oath: "I swear to observe the Constitution and the laws of the Belgian people, to maintain the national independence and to preserve the integrity of the territory."

Article 81. If, on the death of the King, his successor is a minor, both Chambers meet in one body for the purpose of providing for the regency and the guardianship.

Article 82. If it is impossible for the King to reign, the ministers, after having caused that inability to be established, convoke the Chambers immediately. Guardianship and regency are to be provided for by the Chambers convened.

Article 83. The regency can be conferred on one person only. The regent enters upon his duties only after he has taken the oath prescribed by Article 80.

Article 84. No change can be made in the Constitution during a regency.

Article 85. In case of a vacancy on the throne, the Chambers deliberating together, arrange provisionally for the regency until the meeting of new Chambers, that meeting to take place within two months, at the latest. The new Chambers deliberating together provide definitely for the vacancy.

Section II.—Of the Ministers.

Article 86. No person can be a minister who is not a Belgian by birth, or who has not received the "grande naturalization."

Article 87. No member of the royal family can be a minister.

Article 88. Ministers have a deliberative voice in either Chamber only when they are members of it. They have free admission into each Chamber and must have a hearing when they ask for it. The Chambers may require the presence of ministers.

Article 89. In no case, can the order of the King, verbal or written, relieve a minister of responsibility.

Article 90. The Chamber of Representatives has the right to accuse ministers and to arraign them before the Court of Cassation [Appeal], which alone has the right to judge them, the united Chambers reserving what may be enacted by law concerning civil action by a party wronged, and as to crimes and misdemeanors which ministers may have committed outside of the performance of their duties. A law shall determine the cases of responsibility, the penalties to be inflicted on the ministers, and the manner of proceeding against them, either upon the accusation admitted by the Chamber of Representatives, or upon prosecution by parties wronged.

Article 91. The King may pardon a minister sentenced by the Court of Cassation only upon the request of one of the two Chambers.

Chapter III.—Of the Judiciary Power.

Article 92. Contests concerning civil rights are exclusively within the jurisdiction of the tribunals.

Article 93. Contests concerning political rights are within the jurisdiction of the tribunals, with exceptions determined by law.

Article 94. No tribunal can be established otherwise than by law. Neither commissions nor extraordinary tribunals, under any denomination whatever, can be created.

Article 95. There is for the whole of Belgium one Court of Cassation. This Court does not consider the ground of causes, except in the judgment of ministers.

Article 96. Sittings of the tribunals are public, unless such publicity be dangerous to order or morals, and in that case the tribunal declares it by a judgment. In the matter of political or press offenses, the exclusion of the public must be voted unanimously.

Article 97. The ground of every judgment is to be stated. It is pronounced in public sitting.

Article 98. The jury is established in all criminal cases, and for political and press offenses.

Article 99. The judges of the peace and judges of the tribunals are appointed directly by the King. Councillors of the Courts of appeal and presidents and vice-presidents of the courts of original jurisdiction are appointed by the King, from two double lists, presented, one by those courts and the other by the provincial

Councils. Councillors of the Court of Cassation are appointed by the King from two double lists, one presented by the Senate and the other by the Court of Cassation. In these two cases the candidates whose names are on one list may also be inscribed on the other. All presentations are made public at least fifteen days before the appointment. The courts choose their presidents and vice-presidents from among their members.

Article 100. Judges are appointed for life. No judge can be deprived of his position or suspended, except by a judgment. The displacement of a judge can take place only through a new appointment and with his consent.

Article 101. The King appoints and dismisses the public prosecutors to the courts and tribunals.

Article 102. The salaries of the members of the judicial order are fixed by law.

Article 103. No judge may accept salaried offices from the government unless he exercises them gratuitously, and excluding the cases of incompatibility defined by law.

Article 104. There are three courts of appeal in Belgium. The law determines their jurisdiction and the places in which they shall be established.

Article 105. Special enactments regulate the organization of military courts, their powers, the rights and obligations of the members of such courts, and the duration of their functions. There are tribunals of commerce in the places determined by law, which regulate their organization, their powers, the mode of appointment of their members and the term of the latter's duties.

Article 106. Conflicts of jurisdiction are settled by the Court of Cassation, according to proceedings regulated by law.

Article 107. Courts and tribunals shall apply general, provincial and local decisions and regulations only so far as they are conformable to the laws.

Chapter IV.—Of Provincial and Communal Institutions.

Article 108. Provincial and communal institutions are regulated by the laws. These laws sanction the application of the following principles: 1. Direct election, with the exceptions which the law may establish in regard to the chiefs of communal administration and the government commissioners to the provincial councils; 2. The assigning to provincial and communal councils of all which is of provincial and communal interest without prejudice to the approval of their acts in the cases and according to the proceedings which law determines; 3. The publicity of the sittings of the provincial and communal councils within the limits established by law; 4. The publicity of budgets and accounts; 5. The intervention of the King or of the legislative power to prevent the provincial and communal councils from going beyond their powers and injuring the general welfare.

Article 109. The drawing up of certificates of birth, marriage and death, and the keeping of the registers, are the exclusive prerogatives of communal authorities.

Title IV.

Of the Finances.

Article 110. No tax for the profit of the State can be imposed otherwise than by a law. No

charge or provincial assessment can be imposed without the consent of the provincial council. No charge or communal assessment can be imposed, without the consent of the communal council. The law must determine those exceptions of which experience will show the necessity in the matter of provincial and communal impositions.

Article 111. Taxes for the profit of the State are voted annually. The laws which impose them are valid for one year only, unless renewed.

Article 112. There can be no creation of privilege in the matter of taxes. No exemption from nor diminution of taxes can be established otherwise than by a law.

Article 113. Beyond the cases expressly excepted by law, no payment can be exacted from citizens, otherwise than in taxes levied for the profit of the State, of the province, or of the commune. No innovation is made on the actually existing system of the polders and the wateringen, which remain subject to the ordinary legislation.

Article 114. No pension, nor gratuity at the expense of the public treasury can be granted without authority of law.

Article 115. Each year, the Chambers determine the law of accounts and vote the budget. All the receipts and expenditures of the State must be entered in the budget and in the accounts.

Article 116. The members of the court of accounts are appointed by the Chamber of Representatives and for the term fixed by law. That court is intrusted with the examination and the settlement of the accounts of the general administration and of all the accountants for the public treasury. It sees that no article of the expenses of the budget has been exceeded and that no transfer has taken place. It determines the accounts of the different administrations of the State and is required for that purpose to gather all information, and all documents that may be necessary. The general account of the State is submitted to the Chambers with the observations of the court of accounts. This court is organized by law.

Article 117. The salaries and pensions of the ministers of religion are paid by the State; the sums required to meet these expenses are entered annually in the budget.

Title V.

Of the Army.

Article 118. The mode of recruiting the army is determined by law. The law also regulates promotions, and the rights and obligations of the military.

Article 119. The contingent of the army is voted annually. The law that fixes it is of force for one year only, unless renewed.

Article 120. The organization and the powers of the gendarmerie are the subject of a law.

Article 121. No foreign troops can be admitted to the service of the State, nor to occupy or pass through its territory, except by provision of law.

Article 122. There is a civic guard; its organization is regulated by law. The officers of all ranks, up to that of captain at least, are appointed by the guards with exceptions judged necessary for the accountants.

Article 123. The mobilization of the civic guard can occur only by direction of law.

CONSTITUTION OF BELGIUM.

Article 124. Military men can be deprived of their grades, honors, and pensions only in the manner determined by law.

Title VI.

General Provisions.

Article 125. The Belgian nation adopts the colors red, yellow and black, and for the arms of the kingdom the Belgic lion with the motto: "L'Union fait la Force" ["Union is Strength"].

Article 126. The city of Brussels is the capital of Belgium and the seat of its government.

Article 127. No oath can be imposed except by law. The law also determines its formula.

Article 128. Any foreigner who is within the territory of Belgium enjoys the protection accorded to persons and goods, with the exceptions defined by law.

Article 129. No law, decree, or administrative regulation, general, provincial, or communal, is obligatory until it has been published in the form prescribed by law.

CONSTITUTION OF BRAZIL.

Article 130. The Constitution cannot be suspended, either wholly or in part.

Title VII.

Of the Revision of the Constitution.

Article 131. The legislative power has the right to declare that there is occasion for revising such constitutional provision as it designates. After such declaration, the two Chambers are dissolved. Two new Chambers shall then be convoked, in conformity with Article 71. These Chambers act, in concurrence with the King, on the points submitted for revision. In such case, the Chambers cannot deliberate unless two-thirds at least of the members composing each one of them are present, and no change which does not receive at least two-thirds of the votes in its favor shall be adopted.

[The remaining Articles—132–139—are "Temporary Provisions" and "Supplementary Provisions," the latter specifying certain subjects on which it is declared to be "necessary to provide by separate laws and with the least possible delay."]

CONSTITUTION OF BRAZIL.

The following text of the Constitution of the United States of Brazil, adopted February 24, 1891, is taken from a translation published in Bulletin No. 7 of the Bureau of American Republics, Washington:

We, the representatives of the Brazilian people, united in constitutional congress, to organize a free and democratic régime, do establish, decree and promulgate the following constitution of the Republic of the United States of Brazil:

Article 1. The Brazilian nation, adopting as a form of government the Federal Republic proclaimed November 15, 1889, constitutes itself, by the perpetual and indissoluble union of its former provinces, the United States of Brazil.

Art. 2. Each of the former provinces shall constitute a State, and the former municipal district shall form the Federal District, continuing to be the capital of the Union until the following article shall be carried into effect.

Art. 3. In the center there is allotted as the property of the Union a zone of 14,400 square kilometres, which in due time shall be laid off for the establishment of the future federal capital. *Sole paragraph.*—After the change of site of the capital, the present Federal District shall constitute a State.

Art. 4. The States shall have the right to incorporate themselves, one with another, subdivide themselves, dismember themselves to join with others or form new States, with the consent of the respective local legislatures in two successive annual sessions and the approval of the national Congress.

Art. 5. It shall be the duty of each State to provide, at its own expense, for the necessities of its government and administration; but the Union shall extend assistance to any State which, in case of public calamity, shall demand it.

Art. 6. The Federal Government shall not interfere in matters pertaining peculiarly to the States, save: (1) To repel foreign invasion, or the invasion of one State by another. (2) To maintain the federative republican form of government. (3) To reestablish order and tranquillity in the States at the request of the respective governments.

(4) To assure the execution of the laws and federal decrees.

Art. 7. It is the exclusive prerogative of the Union to decree: (1) Duties on imports from foreign countries. (2) Duties of entry, departure, and stay of vessels; the coasting trade for national articles being free of duties, as well as for foreign merchandise that has already paid an import duty. (3) Stamp duties, save the restrictions imposed by article 9, § 1, No. 1. (4) Postal and federal telegraphic taxes. § 1. The Union alone shall have the power: (1) To establish banks of emission. (2) To create and maintain custom-houses. § 2. The taxes decreed by the Union shall be uniform for all the States. § 3. The laws of the Union and the acts and decisions of its authorities shall be executed throughout the country by federal officials, except that the enforcement of the former may be committed to the governments of the States, with the consent of the said States.

Art. 8. The Federal Government is forbidden to make distinctions and preferences in favor of the ports of any of the States against those of others.

Art. 9. The States alone are competent to decree taxes: (1) On the exportation of merchandise of their own production. (2) On landed property. (3) On the transmission of property. (4) On industries and professions. § 1. The States also have the exclusive right to decree: (1) Stamp duties on instruments emanating from their respective governments and business of their internal economy. (2) Contributions touching their own telegraph and postal service. § 2. The products of the other States are exempt from imposts in the State whence they are exported. § 3. It is lawful for a State to levy duties on imports of foreign goods only when intended for consumption in its own territory; but it shall, in such case, cover into the federal treasury the amount of duties collected. § 4. The right is reserved to the States of establishing telegraph lines between the different points of their own territory, and between these and those of other States not served by federal lines; but

the Union may take possession of them when the general welfare shall require.

Art. 10. The several States are prohibited from taxing the federal property or revenue, or anything in the service of the Union, and vice versa.

Art. 11. It is forbidden to the States, as well as to the Unions: (1) To impose duties on the products of the other States, or of foreign countries, in transit through the territory of any State, or from one State to another, as also on the vehicles, whether by land or water, by which they are transported. (2) To establish, aid, or embarrass the exercise of religious worship. (3) To enact *ex post facto* laws.

Art. 12. In addition to the sources of revenue set forth in articles 7 and 9, it shall be lawful for the Union, as well as for the States, cumulatively or otherwise, to create any others whatsoever which may not be in contravention of the terms of articles 7, 9, and 11, § 1.

Art. 13. The right of the Union and of the States to legislate in regard to railways and navigation of internal waters shall be regulated by federal law. *Sole paragraph.*—The coastwise trade shall be carried on in national vessels.

Art. 14. The land and naval forces are permanent national institutions, intended for the defense of the country from foreign attack and the maintenance of the laws of the land. Within the limits of the law, the armed forces are from their nature held to obedience, each rank to its superior, and bound to support all constitutional institutions.

Art. 15. The legislative, executive, and judicial powers are organs of the national sovereignty, harmonious and independent among themselves.

Art. 16. The legislative power is vested in the national Congress, with the sanction of the President of the Republic. § 1. The national Congress is composed of two branches, the Chamber of Deputies and the Senate. § 2. The elections for senators and for deputies shall be held simultaneously throughout the country. § 3. No person shall be senator and deputy at the same time.

Art. 17. The Congress shall assemble in the federal capital on the 3d day of May of each year, unless some other day shall be fixed by law, without being convoked, and shall continue in session 4 months from the date of the opening, and may be prorogued, adjourned, or convoked in extraordinary session. § 1. The Congress alone shall have the power to deliberate on the prorogation or extension of its session. § 2. Each legislature shall last for 3 years. § 3. The governor of any State in which there shall be a vacancy in the representation, including the case of resignation, shall order a new election to be held at once.

Art. 18. The Chamber and the Senate shall hold their sessions apart and in public, unless otherwise resolved by a majority vote, and shall deliberate only when, in each of the chambers, there shall be present an absolute majority of its members. *Sole paragraph.*—To each of the chambers shall belong the right to verify and recognize the powers of its members, to choose its own presiding officers, to organize its internal government, to regulate the service of its own police rules, and to choose its own secretaries.

Art. 19. The deputies and senators can not be held to account for their opinions, expressions, and votes in the discharge of their mandate.

Art. 20. Deputies and senators, from the time of receiving their certificate of election until a new election, can not be arrested or proceeded against criminally without the permission of their respective chambers, except in the case of a flagrant crime, in which bail is inadmissible. In such case, the prosecution being carried to exclusive decision, the prosecuting authority shall send the court records to the respective chamber for its decision on the prosecution of the charge, unless the accused shall prefer immediate judgment.

Art. 21. The members of the two chambers, on taking their seats, shall take a formal obligation, in public session, to perform their duties faithfully.

Art. 22. During the sessions the senators and deputies shall receive an equal pecuniary salary and mileage, which shall be fixed by Congress at the end of each session for the following one.

Art. 23. No member of the Congress, from the time of his election, can make contracts with the executive power or receive from it any paid commission or employment. § 1. Exceptions to this prohibition are: (1) Diplomatic missions. (2) Commissions or military commands. (3) Advancement in rank and legal promotion. § 2. No deputy or senator, however, can accept an appointment for any mission, commission, or command mentioned in Nos. 1 and 2 of the preceding paragraph, without the consent of the chamber to which he belongs, when such acceptance would prevent the exercise of his legislative duties, except in case of war or such as involve the honor or integrity of the nation.

Art. 24. No deputy or senator can be president or form part of a directory of any bank, company, or enterprise which enjoys the favors of the Federal Government defined in and by law. *Sole paragraph.*—Nonobservance of the provisions of the foregoing article by any deputy or senator shall involve the loss of his seat.

Art. 25. The legislative commission shall be incompatible with the exercise of any other functions during the sessions.

Art. 26. The conditions for eligibility to the national Congress are: (1) To be in possession of the rights of Brazilian citizenship and to be registered as a voter. (2) For the Chamber, to have been for more than 4 years a Brazilian citizen; and for the Senate, for more than 6 years. This provision does not include those citizens referred to in No. 4, article 69.

Art. 27. The Congress shall by special legislation declare the cases of electoral incompetency.

Art. 28. The Chamber of Deputies shall be composed of the representatives of the people, elected by the States and the Federal District by direct suffrage, the representation of the minority being guaranteed. § 1. The number of the deputies shall be fixed by law in such a way as not to exceed one for each 70,000 inhabitants, and that there shall not be less than four for each State. § 2. To this end the Federal Government shall at once order a census to be taken of the population of the Republic, which shall be revised every 10 years.

Art. 29. To the Chamber belongs the initiative in the adjournment of the legislative sessions and in all legislation in regard to taxation, to the determination of the size of the army and navy, in the discussion of propositions from the executive power, and in the decision to proceed or not

in charges against the President of the Republic under the terms of article 53, and against the ministers of state in crimes connected with those of the said President.

Art. 30. The Senate shall be composed of citizens eligible under the terms of article 26 and more than 35 years of age, to the number of three senators for each State and three for the Federal District, chosen in the same manner as the deputies.

Art. 31. The mandate of a senator shall continue for 9 years, and one-third of the Senate shall be renewed every 3 years. *Sole paragraph.*—A senator elected in place of another shall exercise his mandate during the remainder of the term of the latter.

Art. 32. The Vice President of the Republic shall be the president of the Senate, where he shall vote only in case of tie, and shall be replaced in case of absence or impediment by the vice president of that body.

Art. 33. The Senate alone shall have the power to try and sentence the President of the Republic and the other federal officers designated by the constitution, under the conditions and in the manner which it prescribes. § 1. The Senate, when sitting as a tribunal of justice, shall be presided over by the president of the federal supreme court. § 2. It shall not pass sentence of condemnation unless two-thirds of its members be present. § 3. It shall not impose other penalties than the loss of office and prohibition from holding any other, without prejudice to the action of ordinary justice against the condemned.

Art. 34. The national Congress shall have exclusive power: (1) To estimate the revenue, and fix the expenditures of the Federal Government annually, and take account of the receipts and expenditures of each financial budget. (2) To authorize the executive to contract loans and make other operations of credit. (3) To legislate in regard to the public debt and furnish means for its payment. (4) To control the collection and disposition of the national revenue. (5) To regulate international commerce, as well as that of the States with each other and with the Federal District; to establish and regulate the collection of customs duties in the ports, create or abolish warehouses of deposit. (6) To legislate in regard to navigation of rivers running through more than one State, or through foreign territory. (7) To determine the weight, value, inscription, type, and denomination of the currency. (8) To create banks of emission, legislate in regard to this emission and to tax it. (9) To fix the standard of weights and measures. (10) To determine definitely the boundaries of the States between each other, those of the Federal District, and those of the national territory with the adjoining nations. (11) To authorize the Government to declare war, if there be no recourse to arbitration or in case of failure of this, and to make peace. (12) To decide definitely in regard to treaties and conventions with foreign nations. (13) To remove the capital of the Union. (14) To extend aid to the States in the case referred to in article 5. (15) To legislate in regard to federal postal and telegraph service. (16) To adopt the necessary measures for the protection of the frontiers. (17) To fix every year the number of the land and naval forces. (18) To make laws for the organization of the army and navy. (19) To grant or refuse to foreign forces passage through

the territory of the country to carry on military operations. (20) To mobilize and make use of the national guard or local militia in the cases designated by the Constitution. (21) To declare a state of siege at one or more points in the national territory, in the emergency of an attack by foreign forces, or internal disturbance, and to approve or suspend the state of siege proclaimed by the executive power or its responsible agents in the absence of the Congress. (22) To regulate the conditions and methods of elections for federal offices throughout the country. (23) To legislate upon the civil, criminal, and commercial laws and legal procedures of the federal judiciary. (24) To establish uniform naturalization laws. (25) To create and abolish federal public offices, to fix the duties of the same, and designate their salaries. (26) To organize the federal judiciary according to the terms of article 55 and the succeeding, section 3. (27) To grant amnesty. (28) To commute and pardon penalties imposed upon federal officers for offenses arising from their responsibility. (29) To make laws regarding Government lands and mines. (30) To legislate in regard to the municipal organization of the Federal District, as well as to the police, the superior instruction and other services which in the capital may be reserved for the Government of the Union. (31) To govern by special legislation those points of the territory of the Republic needed for the establishment of arsenals, other establishments or institutions for federal uses. (32) To settle cases of extradition between the States. (33) To enact such laws and resolutions as may be necessary for the exercise of the powers belonging to the Union. (34) To enact the organic laws necessary for the complete execution of the requirements of the Constitution. (35) To prorogue and adjourn its own sessions.

Art. 35. It shall belong likewise to the Congress, but not exclusively: (1) To watch over the Constitution and the laws, and provide for necessities of a federal character. (2) To promote in the country the development of literature, the arts, and sciences, together with immigration, agriculture, manufactures, and commerce, without privileges such as would obstruct the action of the local governments. (3) To create institutions of higher instruction and of high school education in the States. (4) To provide for high school instruction in the Federal District.

Art. 36. Save the exceptions named in article 27, all bills may originate, indifferently, in the Chamber or in the Senate, and may be introduced by any of their members.

Art. 37. A bill, after being passed in one of the chambers, shall be submitted to the other, and, if the latter shall approve the same, it shall send it to the executive, who, if he approve it, shall sanction and promulgate it. § 1. If, however, the President of the Republic shall consider it unconstitutional, or contrary to the good of the nation, he shall refuse his sanction to the same within 10 working days, counted from that on which he received it (the bill), and shall return it, within the same period, to the chamber in which it originated, with his reasons for his refusal. § 2. The failure of the executive to signify his disapproval within the above-named 10 days shall be considered as an approval, and in case his sanction be refused after the close of the

CONSTITUTION OF BRAZIL.

session of the Congress, the President shall make public his reasons therefor. § 3. The bill sent back to the chamber where it originated shall be discussed and voted upon by call of names, and shall be considered as passed if it obtain two-thirds of the votes of the members present; and, in this case, it shall be sent to the other chamber, whence, if it receive the same majority, it shall return, as a law, to the executive to be formally promulgated. § 4. The sanction and promulgation shall be effected in the following forms: (1) "The national Congress enacts and I sanction the following law (or resolution)." (2) "The national Congress enacts and I promulgate the following law (or resolution)."

Art. 38. If the law be not promulgated by the President of the Republic within 48 hours, in the cases provided for in §§ 2 and 3 of the preceding article, the president of the Senate, or the vice president, if the former shall not do so in the same space of time, shall promulgate it, making use of the following formula: "I, president (or vice president) of the Senate, make known to whomsoever these presents may come, that the national Congress enacts and promulgates the following law (or resolution)."

Art. 39. A bill from one chamber, amended in the other, shall return to the former, which, if it accept the amendments, shall send it, changed to conform with the same, to the executive. § 1. In the contrary case, it shall go back to the amending chamber, where the alterations shall be considered as approved, if they receive the vote of two-thirds of the members present; in the latter case, the bill shall return to the chamber where it originated, and there the amendments can be rejected only by a two-thirds vote. § 2. If the alterations be rejected by such vote, the bill shall be submitted without them to the approval of the executive.

Art. 40. Bills finally rejected or not approved, shall not be presented again in the same legislative session.

Art. 41. The executive power shall be exercised by the President of the United States of Brazil, as elective chief of the nation. § 1. The Vice President, elected simultaneously with the President, shall serve in place of the latter in case of impediment and succeed him in case of vacancy in the Presidency. § 2. In case of impediment or vacancy in the Vice Presidency, the following officers, in the order named, shall be called to the Presidency: The vice president of the Senate, the president of the Chamber of Deputies, the president of the federal supreme court. § 3. The following are the conditions of eligibility to the Presidency or Vice Presidency of the Republic: (1) Must be a native of Brazil. (2) Must be in the exercise of political rights. (3) Must be more than 35 years of age.

Art. 42. In case of vacancy from any cause in the Presidency or Vice Presidency before the expiration of the first 2 years of the Presidential term, a new election shall be held.

Art. 43. The President shall hold his office during 4 years, and is not eligible for reelection for the next succeeding term. § 1. The Vice President who shall fill the Presidency during the last year of the Presidential term shall not be eligible to the Presidency for the next term of that office. § 2. On the same day on which his Presidential term shall cease the President shall, without fail, cease to exercise the functions of

CONSTITUTION OF BRAZIL.

his office, and the newly elected President shall at once succeed him. § 3. If the latter should be hindered or should fail to do so, the succession shall be effected in accordance with §§ 1 and 2 of article 41. § 4. The first Presidential term shall expire on the 15th of November, 1894.

Art. 44. On taking possession of his office, the President, in a session of the Congress, or, if it be not assembled, before the federal supreme court, shall pronounce the following affirmation: "I promise to maintain the federal Constitution and comply with its provisions with perfect loyalty, to promote the general welfare of the Republic, to observe its laws, and support the union, integrity, and independence of the nation."

Art. 45. The President and Vice President shall not leave the national territory without the permission of the Congress, under penalty of loss of office.

Art. 46. The President and Vice President shall receive the salary fixed by the Congress in the preceding Presidential term.

Art. 47. The President and Vice President shall be chosen by direct suffrage of the nation and an absolute majority of the votes. § 1. The election shall take place on the first day of March in the last year of the Presidential term, and the counting of the votes cast at the different precincts shall at once be made in the respective capitals of the States and in the federal capital. The Congress shall make the count at its first session of the same year, with any number of members present. § 2. If none of those voted for shall have received an absolute majority, the Congress shall elect, by a majority of votes of those present, one of the two who, in the direct election, shall have received the highest number of votes. In case of a tie the older shall be considered elected. § 3. The manner of the election and of the counting of the votes shall be regulated by ordinary legislation. § 4. The relatives, both by consanguinity and by marriage, in the first and second degrees, of the President and Vice President shall be ineligible for the offices of President and Vice President, provided the said officials are in office at the time of the election or have left the office even 6 months before.

Art. 48. To the President of the Republic shall belong the exclusive right to—(1) Sanction, promulgate, and make public the laws and resolutions of the Congress; issue decrees, instructions, and regulations for their faithful execution. (2) Choose and dismiss at will the cabinet officers. (3) Exercise or appoint some one to exercise supreme command over the land and naval forces of the United States of Brazil, as well as over the local police, when called to arms for the internal or external defense of the Union. (4) Govern and distribute, under the laws of the Congress, according to the necessities of the National Government, the land and naval forces. (5) Dispose of the offices, both military and civil, of a federal character, with the exceptions specified in the Constitution. (6) Pardon crimes and commute penalties for offenses subject to federal jurisdiction, save in the cases mentioned in article 34, No. 28, and article 52, § 2. (7) Declare war and make peace, under the provisions of article 34, No. 11. (8) Declare war at once in case of foreign invasion or aggression. (9) Give an annual statement to the national Congress of the condition of the country, with a recommenda-

CONSTITUTION OF BRAZIL.

tion of pressing provisions and reforms, through a message, which he shall send to the secretary of the Senate on the day of the opening of the legislative session. (10) Convoke the Congress in extra session. (11) Appoint the federal judges when proposed by the supreme court. (12) Appoint the members of the federal supreme court and ministers of the diplomatic corps, with the approval of the senate; and, in the absence of the Congress, appoint them in commission until considered by the senate. (13) Appoint the other members of the diplomatic corps and consular agents. (14) Maintain relations with foreign states. (15) Declare, directly, or through his responsible agents, a state of siege at any point of the national territory, in case of foreign aggression or serious internal disturbance. (Article 6, No. 3; article 34, No. 21; and article 80.) (16) Set on foot international negotiations, celebrate agreements, conventions, and treaties, always ad referendum to the Congress, and approve those made by the States in conformity with article 65, submitting them when necessary to the authority of the Congress.

Art. 49. The President of the Republic shall be assisted by the ministers of state (cabinet officers), agents of his confidence, who sign the acts and preside over their respective departments into which the federal administration is divided.

Art. 50. The cabinet ministers shall not exercise any other employment or function of a public nature, be eligible to the Presidency or Vice Presidency of the Union, or be elected deputy or senator. *Sole paragraph.*—Any deputy or senator, who shall accept the position of cabinet minister, shall lose his seat in the respective chamber, and a new election shall at once be held, in which he shall not be voted for.

Art. 51. The cabinet ministers shall not appear at the sessions of the Congress, and shall communicate with that body in writing only or by personal conference with the committees of the chambers. The annual report of the ministers shall be addressed to the President of the Republic, and distributed to all the members of the Congress.

Art. 52. The cabinet ministers shall not be responsible to the Congress or to the courts for advice given to the President of the Republic. § 1. They shall be responsible, nevertheless, with respect to their acts, for crimes defined in the law. § 2. For common crimes and those for which they are responsible they shall be prosecuted and tried by the federal supreme court, and for those committed jointly with the President of the Republic, by the authority competent to judge this latter.

Art. 53. The President of the United States of Brazil shall be brought to trial and judgment, after the Chamber of Deputies shall have decided that he should be tried on the charges made against him, in the federal supreme court, in the case of common crimes, and in those of responsibility, in the Senate. *Sole paragraph.*—As soon as it shall be decided to try him on the charges brought, the President shall be suspended in the exercise of the duties of his office.

Art. 54. Crimes of responsibility on the part of the President of the Republic are such as are directed against—(1) The political existence of the Union. (2) The Constitution and the form of the Federal Government. (3) The free exercise of the political powers. (4) The legal enjoyment

CONSTITUTION OF BRAZIL.

and exercise of political or individual rights. (5) The internal security of the country. (6) The purity of the administration. (7) The constitutional keeping and use of the public funds. (8) The financial legislation enacted by the Congress. § 1. These offenses shall be defined in a special law. § 2. Another law shall provide for the charges, the trial, and the judgment. § 3. Both these laws shall be enacted in the first session of the first Congress.

Art. 55. The judicial power of the Union shall be lodged in a federal supreme court, sitting in the capital of the Republic, and as many inferior federal courts and tribunals, distributed through the country, as the Congress shall create.

Art. 56. The federal supreme court shall be composed of fifteen justices, appointed under the provisions of article 48, No. 12, from among the oldest thirty citizens of well-known knowledge and reputation who may be eligible to the Senate.

Art. 57. The federal justices shall hold office for life, being removable solely by judicial sentence. § 1. Their salaries shall be fixed by law of the Congress, and can not be diminished. § 2. The Senate shall try the members of the federal supreme court for crimes of responsibility, and this latter the lower federal judges.

Art. 58. The federal courts shall choose their presidents from among their own members, and shall organize their respective clerical corps. § 1. In these corps the appointment and dismissal of the respective clerks, as well as the filling of the judicial offices in the respective judicial districts, shall belong to the presidents of the respective courts. § 2. The President of the Republic shall appoint from among the members of the federal supreme court the attorney-general of the Republic, whose duties shall be defined by law.

Art. 59. To the federal supreme court shall belong the duty of—(1) Trying and judging by original and exclusive jurisdiction—(a) The President of the Republic for common crimes, and the cabinet ministers in the cases specified in article 52. (b) The ministers of the diplomatic corps for common crimes and those of responsibility. (c) Cases and disputes between the States and the Union, or between the States one with another. (d) Disputes and claims between foreign states and the Union, or between foreign nations and the States. (e) Conflicts between the federal courts one with another, or between these and those of the States, as well as those between the courts of one State and those of another. (2) Deciding, on appeal, questions pronounced upon by the lower federal courts and tribunals, as well as those mentioned in § 1 of the present article and in article 60. (3) Reviewing the proceedings of finished trials, under the provisions of article 81. § 1. Decisions of State courts in last appeal can be carried to the federal supreme court—(a) When the validity or application of the federal laws or treaties is called in question and the decision of the State court shall be against the same. (b) When the validity of laws or acts of the governments of the States in respect to the Constitution or of the federal laws is contested and the State court shall have decided in favor of the validity of the acts or laws in question. § 2. In the cases which involve the application of the laws of the States, the federal court shall consult the jurisprudence of the local tribunals, and vice versa, the State court shall consider

that of the federal tribunals when the interpretation of the laws of the Union is involved.

Art. 60. It shall belong to the federal courts to decide—(a) Cases in which the plaintiff, or the defendant shall rest the case on some provision of the federal Constitution. (b) All suits brought against the Government of the Union or the national treasury based on constitutional provisions, on the laws and regulations of the executive power, or on contracts made with the said Government. (c) Suits arising from compensations, claims, indemnification of damages, or any others whatsoever brought by the Government of the Union against private individuals, and vice versa. (d) Litigations between a State and the citizens of another, or between citizens of different States having differences in their laws. (e) Suits between foreign states and Brazilian citizens. (f) Actions begun by foreigners, and based either on contracts with the Federal Government or on conventions or treaties of the Union with other nations. (g) Questions of maritime law and navigation, whether on the sea or on the rivers and lakes of the country. (h) Questions of international law, whether criminal or civil. (i) Political crimes. § 1. Congress is forbidden to commit any part of the federal jurisdiction to the State courts. § 2. Sentences and orders of the federal judges will be executed by federal court officers, and the local police shall assist them when called upon by the same.

Art. 61. The decisions of the State courts or tribunals in matters within their competence shall put an end to the suits and questions, except as to (1) habeas corpus, or (2) effects of a foreigner deceased in cases not provided for by convention or treaty. In such cases there shall be voluntary recourse to the federal supreme court.

Art. 62. The State courts shall not have the power to intervene in questions submitted to the federal tribunals, or to annul, alter, or suspend the sentences or orders of these latter; and, reciprocally, the federal judiciary can not interfere in questions submitted to the State courts, or annul, alter, or suspend their decisions or orders, except in the cases provided in this Constitution.

Art. 63. Each State shall be governed by the constitution and laws which it shall adopt, respect being observed for the constitutional principles of the Union.

Art. 64. The unexplored mines and wild lands lying within the States shall belong to these States respectively; and to the Union only as much territory as may be necessary for the defense of the frontiers, for fortifications, military works, and federal railways. *Sole paragraph.*—The national properties, not necessary for the service of the Union, shall pass to the domain of the States in whose territory they may be situated.

Art. 65. The States shall have the right to—(1) Conclude agreements and conventions among themselves, if such be not of a political character. (Article 48, No. 16.) (2) Exercise in general any and every power or right not denied expressly by the Constitution, or implicitly in its express terms.

Art. 66. It is forbidden to the States to—(1) Refuse to recognize public documents of the Union, or of any of the States, of a legislative, administrative, or judicial character. (2) Reject the currency or notes issued by banks, which

circulate by act of the Federal Government. (3) Make or declare war, one with another, or make reprisals. (4) Refuse the extradition of criminals demanded by the justice of other States, or of the Federal District, in conformity with the laws of Congress which relate to this subject. (Article 41, No. 32.)

Art. 67. Save the restrictions specified in the Constitution, and the federal laws, the Federal District shall be governed directly by the municipal authorities. *Sole paragraph.*—Expenses of a local character in the capital of the Republic must be provided for exclusively by the municipal authorities.

Art. 68. The States shall organize themselves in such a manner as to assure the autonomy of the municipalities in everything that concerns their peculiar interests.

Art. 69. The following shall be Brazilian citizens: (1) Natives of Brazil, though of foreign parentage (father), provided he be not in the service of his nation. (2) Sons of a Brazilian father, and illegitimate sons of a Brazilian mother, born in foreign parts, if they take up their residence (domicile) in the republic. (3) Sons of a Brazilian father who may be in another country in the service of the Republic, although they do not make their domicile in Brazil. (4) Foreigners, who, being in Brazil on the 15th of November, 1889, shall not declare, within 6 months from the time when the Constitution enters into force, their desire to preserve their original nationality. (5) Foreigners who possess property (real estate) in Brazil and are married to Brazilian women, or have Brazilian children, provided they reside in Brazil, unless they shall declare their intention of not changing their nationality. (6) Foreigners naturalized in any other way.

Art. 70. Citizens of more than 21 years of age, and registered according to law, shall be electors. § 1. The following shall not be registered as electors for federal or State elections: (1) Beggars. (2) Persons ignorant of the alphabet. (3) Soldiers on pay, except alumni of the military schools of higher instruction. (4) Members of monastic orders, companies, congregations, or communities of whatsoever denomination, who are subject to vows of obedience, rule, or statute, which implies the surrender of individual liberty. § 2. Citizens who can not be registered shall not be eligible.

Art. 71. The rights of the Brazilian citizen can be suspended or lost only in the following cases: § 1. The rights may be suspended—(a) For physical or moral incapacity. (b) For criminal conviction, during the operation of the sentence. § 2. They may be lost—(a) By naturalization in a foreign country. (b) By acceptance of employment or pension from a foreign power, without permission of the federal executive. § 3. The means of reacquiring lost rights of the Brazilian citizen shall be specified by federal law.

Art. 72. The Constitution secures to Brazilians and foreigners residing in the country the inviolability of their rights touching individual liberty, and security, and property, in the following terms: § 1. No person shall be forced to do, or leave undone, anything whatever, except by virtue of law. § 2. Before the law all persons are equal. The Republic does not recognize privileges of birth, or titles of nobility, and abolishes all existing honorary orders, with all their prerogatives and decorations, as well as all

hereditary and conciliar titles. § 3. All persons and religious professions may exercise, publicly and freely, the right of worship, and may associate themselves for that purpose, acquire property, observance being had to the provisions of the common law. § 4. The Republic recognizes only the civil marriage, the celebration of which shall be gratuitous. § 5. The cemeteries shall be secular in character, and be managed by the municipal authorities, being free to all religious sects for the exercise of their respective rites as regards their members, provided they do not offend public morals or the laws. § 6. The instruction given in the public institutions shall be secular. § 7. No sect or church shall receive official aid, nor be dependent on, nor connected with, the Government of the Union, or of the States. § 8. All persons have the right of free association and assembly, without arms; and the police force shall not intervene, except to maintain the public order. § 9. Any person whatsoever shall have the right to address, by petition, the public powers, denounce abuses of the authorities, and appeal to the responsibility of the accused. § 10. In time of peace any person may, without passport, enter or leave the territory of the Republic, with his fortune and goods, whenever and however he may choose. § 11. The house is the inviolable asylum of the person; no one can enter it at night without the consent of the inhabitant, except to aid the victims of a crime or disaster; nor by day, unless in the cases and in the form prescribed by law. § 12. The expression of opinion shall be free, in respect to whatever subject, through the press or through the tribune, without subjection to censorship, each one being responsible for the abuses he may commit, in the cases and in the form prescribed by law. Anonymous publications are forbidden. § 13. Cases of flagrante delicto alone excepted, no arrest shall be made, unless after declaration of the charge (save in cases determined by law), and by written order of the competent authorities. § 14. No person shall be kept in prison without charge formally made, save the exceptions mentioned in the law, or taken to prison, or detained there, if he give bail, in cases where such is lawful. § 15. No person shall be condemned, except by competent authority, and in virtue of law already existing and in the form prescribed by it. § 16. The law shall secure to the accused the fullest defense by all the resources and means essential to the same, including the notice of the charge, delivered to the prisoner within 24 hours and signed by the proper authority along with the names of the accusers and witnesses. § 17. The rights of property are maintained in all their plenitude, and no disappropriation shall be made, except from necessity or public utility, and indemnity shall, in such cases, be made beforehand. Mines belong to the owners of the soil, under the limitations to be established by the law to encourage the development of this branch of industry. § 18. Correspondence under seal is inviolable. § 19. No penalty shall extend beyond the person of the delinquent. § 20. The penalty of the galleys is abolished, as also judicial banishment. § 21. The death penalty is abolished, except in the cases under military law in time of war. § 22. The habeas corpus shall always be granted when the individual suffers violence or compulsion, through illegality or abuse of power, or considers

himself in imminent danger of the same. § 23. There shall be no privileged tribunal, except in such cases as, from their nature, belong to special courts. § 24. The free exercise of any profession, moral, intellectual, or industrial, is guaranteed. § 25. Industrial inventions belong to their authors, to whom the law will grant a temporary privilege, or to whom the Congress will give a reasonable premium, when it is desirable to make the invention public property. § 26. To authors of literary and artistic works is guaranteed the exclusive right of reproducing them through the press or by any other mechanical process, and their heirs shall enjoy the same right during the space of time determined by the law. § 27. The law shall also secure the rights of property in trade-marks. § 28. No Brazilian can be deprived of his civil and political rights on account of religious belief or duty, nor be exempted from the performance of any civic duty. § 29. Those who shall claim exemption from any burden imposed by the laws of the Republic on its citizens, on account of religious belief, or who shall accept any foreign decoration or title of nobility, shall lose all their political rights. § 30. No tax of any kind shall be collected except in virtue of a law authorizing the same. § 31. The institution of trial by jury is maintained.

Art. 73. Public offices, civil or military, are accessible to all Brazilian citizens, always observing the conditions of particular capacity fixed by the law; but the accumulation of remunerations is forbidden.

Art. 74. Commissions, offices, and positions not subject to removal are guaranteed in all their plenitude.

Art. 75. Only such public officials as have become infirm in the service of the nation shall be retired on pay.

Art. 76. Officers of the army and navy shall lose their commissions only in case of condemnation to more than 2 years in prison, pronounced in judgment by the competent tribunals.

Art. 77. There shall be a special court for the trial of military offenses committed by soldiers or marines. § 1. This court shall be composed of a supreme military tribunal, whose members shall hold their seats for life, and of the councils necessary for the formulation of the charge and the judgment of the crimes. § 2. The organization and powers of the supreme military tribunal shall be determined by law.

Art. 78. The enumeration of the rights and guaranties expressed in the Constitution does not exclude other guaranties and rights, not enumerated, but resulting from the form of government established and principles settled by said Constitution.

Art. 79. The citizen vested with the functions of either of these three federal powers shall not exercise those of another.

Art. 80. Any part of the territory of the Union may be declared in state of siege, and the constitutional guaranties suspended for a determined period, whenever the security of the Republic so demands in case of foreign aggression or intestine disturbance. (Article 34, No. 21.) § 1. The power to execute the above provision may, if the Congress be not in session and the country be in imminent peril, be used by the federal executive. (Article 48, No. 15.) § 2. In the exercise of this power, during the state of siege, the executive shall be restricted to the following

measures of repression against persons: (1) To their detention in a place not allotted to persons accused of common crimes. (2) To banishment to other parts of the national territory. § 3. As soon as the Congress shall have assembled, the President of the Republic shall make a report to that body of the exceptional measures which may have been taken. § 4. The authorities who shall have ordered such measures shall be responsible for any abuses that may have been committed.

Art. 81. In criminal cases, trials concluded may be reviewed at any time, in favor of the condemned parties, by the federal supreme court, for the purpose of correcting or of confirming the sentence. § 1. The law shall determine the cases and the form of such revision, which may be asked for by the condemned, by any one of the people, or by the attorney-general of the Republic, *ex officio*. § 2. In such revision the penalties imposed by the sentence reviewed can not be increased. § 3. The provisions of the present article are applicable to military trials.

Art. 82. Public officers shall be strictly responsible for the abuses and omissions that occur in the exercise of the duties of their offices, as well as for the indulgences and negligences for which they do not hold their subordinates responsible. *Sole paragraph.*—They shall all be bound by formal obligation, on taking possession of their offices, to discharge the lawful duties of the same.

Art. 83. Until revoked, the laws of the ancien régime shall remain in force, in as far as they are not, explicitly or implicitly, contrary to the system of government established by the Constitution, and to the principles laid down in the same.

Art. 84. The federal government guaranties the payment of the public debt, both internal and foreign.

Art. 85. The officers of the line and of the annexed classes of the navy shall have the same commissions and advantage as those of the army of corresponding rank.

Art. 86. Every Brazilian shall be bound to military service in defense of the country and the Constitution, as provided by the federal laws.

Art. 87. The federal army shall be made up of contingents which the states and the Federal District are bound to furnish, constituted in conformity with the annual law regulating the number of the forces. § 1. The general organization of the army shall be determined by a federal law, in accordance with No. 18 of article 34. § 2. The Union shall have charge of the military instruction of the troops and of the higher military instruction. § 3. Compulsory recruiting for military purposes is abolished. § 4. The army and navy shall be made up by volunteering without bounties, or, if this means be not sufficient, by lot previously determined. The crews for the navy shall be made up from the naval school, the schools of marine apprentices, and the merchant marine, by means of lot.

Art. 88. In no case, either directly or indirectly, alone or in alliance with another nation, shall the United States of Brazil engage in a war of conquest.

Art. 89. A tribunal of accounts shall be instituted for the auditing of the receipt and expense accounts and examining into their legality before their presentation to the Congress. The mem-

bers of this tribunal shall be appointed by the President of the Republic, with the approval of the Senate, and can lose their seats only by sentence.

Art. 90. The Constitution may be amended, at the initiative of the national Congress, or of the legislatures of the States. § 1. An amendment shall be considered as proposed, when, having been presented by one-fourth, at least, of the members of either house of the Congress, it shall have been accepted in three readings (discussions) by two-thirds of the votes in both houses of the Congress, or when it shall have been asked for by two-thirds of the States represented, each one by a majority of the votes of its legislature, said votes to be taken in the course of 1 year. § 2. The proposed amendment shall be considered approved, if, in the following year, after three discussions, it shall have been adopted by a majority of two-thirds of the votes in the two houses of the Congress. § 3. The amendment adopted shall be published with the signatures of the presidents and clerks of the two chambers, and be incorporated into the Constitution as a part of the same. § 4. No project having a tendency to abolish the federative republican form, or the equal representation of the States in the Senate, shall be admitted for consideration in the Congress.

Art. 91. This Constitution, after approval, shall be promulgated by the president of the Congress and signed by the members of the same.

Temporary Provisions.

Article 1. After the promulgation of this Constitution, the Congress, in joint assembly, shall choose consecutively, by an absolute majority of votes in the first balloting, and, if no candidate shall receive such, by a plurality in the second balloting, the President and Vice President of the United States of Brazil. § 1. This election shall be in two distinct ballotings, for the President and Vice President respectively, the ballots for President being taken and counted, in the first place, and afterwards for Vice President. § 2. The President and Vice President, thus elected, shall occupy the Presidency and Vice Presidency of the Republic during the first Presidential term. § 3. For said election there shall be no incompatibilities admitted. § 4. As soon as said election shall be concluded, the Congress shall consider as terminated its mission in joint session and, separating into Chamber and Senate, shall enter upon the exercise of its functions as defined by law, on the 15th of June of the present year, and can not in any case be dissolved. § 5. In the first year of the first legislature, among its preparatory measures, the Senate shall designate the first and second third of its members, whose term of office shall cease at the end of the first and second 3-year terms. § 6. The discrimination shall be made in three lists, corresponding to the three classes, allotting to them the senators of each State and of the Federal District according to the number of votes received by them respectively, so as to allot to the third for the last 3 years the one receiving the highest number of votes in the Federal District and in each State, and to the other two-thirds the remaining two names in the order of the number of votes received by them respectively. § 7. In case of tie, the oldest shall be preferred, and if the ages are equal, the choice shall be made by lot.

CONSTITUTION OF BRAZIL.

Art. 2. The State which, by the end of the year 1892, shall not have adopted its constitution, shall, by act of the federal legislative power, be placed under that of one of the other States, which it shall judge most suitable, until the State thus subjected to said constitution shall amend it in the manner provided in the same.

Art. 3. As fast as the States shall be organized, the Federal Government shall deliver to them the administration of the services which belong to them, and shall settle the responsibility of the federal administration in all that relates to said services and to the payment of the respective officials.

Art. 4. While, during the period of organization of their services, the States shall be engaged in regulating their expenses, the Federal Government shall, for this purpose, open special credits to them, under conditions determined by the Congress.

Art. 5. In the States which shall become organized the classification of the revenues established in the Constitution shall enter into force.

Art. 6. In the first appointments for the federal magistracy and for that of the States, the preference shall be given to the justices and magistrates of the higher courts of the greatest note. Such as are not admitted into the new organization of the judiciary, and have served 30 years, shall be retired on full pay. Those who have

CONSTITUTION OF CANADA.

served for less than 30 years shall continue to receive their salaries until they shall be employed, or retired with pay corresponding to their length of service. The payment of salaries of magistrates retired or set aside shall be made by the Federal Government.

Art. 7. To D. Pedro de Alcantara, ex-Emperor of Brazil, a pension is granted, to run from the 15th of November, 1889, sufficient to guaranty him a decent subsistence during his lifetime. The Congress, at its first session, shall fix the amount of said pension.

Art. 8. The Federal Government shall acquire for the nation the house in which Dr. Benjamin Constant Botelho de Magalhães died, and shall have placed on it a memorial slab in memory of that great patriot, the founder of the Republic. *Sole paragraph.*—The widow of the said Dr. Benjamin Constant shall have, during her lifetime, the usufruct of the said house. We order, then, all the authorities to whom the recognition and execution of this Constitution belongs, to execute it and have it executed and observed faithfully and fully in all its provisions. Let the same be published and observed throughout the territory of the nation. Hall of the sessions of the National Constitutional Congress, in the city of Rio de Janeiro, in the year 1891, and the third of the Republic. See BRAZIL: 1889-1891.

CONSTITUTION OF CALIFORNIA.—For an account of the main features of this

singular constitution, see CALIFORNIA: A. D. 1877-1880.

CONSTITUTION OF CANADA.

A. D. 1774.—The Quebec Act. See CANADA: A. D. 1763-1774.

A. D. 1791.—The Constitutional Act. See CANADA: A. D. 1791.

A. D. 1840.—The Union Act. See CANADA: A. D. 1840-1867.

A. D. 1867.—The British North America Act.—The history of the Confederation of the provinces of British North America, forming the Dominion of Canada, is given briefly under CANADA: A. D. 1867. The following is the text of the Act of the Parliament of Great Britain by which the Confederation was formed and its constitution established:

An Act for the Union of Canada, Nova Scotia, and New Brunswick, and the Government thereof; and for purposes connected therewith. 29TH MARCH, 1867.

WHEREAS the Provinces of Canada, Nova Scotia, and New Brunswick have expressed their desire to be federally united into one Dominion under the Crown of the United Kingdom of Great Britain and Ireland, with a constitution similar in principle to that of the United Kingdom: And whereas such a Union would conduce to the welfare of the Provinces and promote the interests of the British Empire; And whereas on the establishment of the Union by authority of Parliament it is expedient, not only that the Constitution of the Legislative Authority in the Dominion be provided for, but also that the nature of the Executive Government therein be declared: And whereas it is expedient that provision be made for the eventual admission into the Union of other parts of British North America: Be it therefore enacted and declared

by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. This Act may be cited as The British North America Act, 1867.

2. The provisions of this Act referring to Her Majesty the Queen extend also to the heirs and successors of Her Majesty, Kings and Queens of the United Kingdom of Great Britain and Ireland.

3. It shall be lawful for the Queen, by and with the advice of Her Majesty's Most Honourable Privy Council, to declare by Proclamation that, on and after a day therein appointed, not being more than six months after the passing of this Act, the Provinces of Canada, Nova Scotia, and New Brunswick shall form and be one Dominion under the name of Canada; and on and after that day those three Provinces shall form and be one Dominion under that name accordingly.

4. The subsequent provisions of this Act shall, unless it is otherwise expressed or implied, commence and have effect on and after the Union, that is to say, on and after the day appointed for the Union taking effect in the Queen's Proclamation; and in the same provisions, unless it is otherwise expressed or implied, the name Canada shall be taken to mean Canada as constituted under this Act.

5. Canada shall be divided into four Provinces, named Ontario, Quebec, Nova Scotia, and New Brunswick.

6. The parts of the Province of Canada (as it exists at the passing of this Act) which formerly

constituted respectively the Provinces of Upper Canada and Lower Canada shall be deemed to be severed, and shall form two separate Provinces. The part which formerly constituted the Province of Upper Canada shall constitute the Province of Ontario; and the part which formerly constituted the Province of Lower Canada shall constitute the Province of Quebec.

7. The Provinces of Nova Scotia and New Brunswick shall have the same limits as at the passing of this Act.

8. In the general census of the population of Canada, which is hereby required to be taken in the year one thousand eight hundred and seventy-one, and in every tenth year thereafter, the respective populations of the four Provinces shall be distinguished.

9. The Executive Government and authority of and over Canada is hereby declared to continue and be vested in the Queen.

10. The provisions of this Act referring to the Governor General extend and apply to the Governor General for the time being of Canada, or other the Chief Executive Officer or Administrator, for the time being carrying on the Government of Canada on behalf and in the name of the Queen, by whatever title he is designated.

11. There shall be a Council to aid and advise in the Government of Canada, to be styled the Queen's Privy Council for Canada; and the persons who are to be members of that Council shall be from time to time chosen and summoned by the Governor General and sworn in as Privy Councillors, and members thereof may be from time to time removed by the Governor General.

12. All powers, authorities, and functions which under any Act of the Parliament of Great Britain, or of the Parliament of the United Kingdom of Great Britain and Ireland, or of the Legislature of Upper Canada, Lower Canada, Canada, Nova Scotia, or New Brunswick, are at the Union vested in or exercisable by the respective Governors or Lieutenant Governors of those Provinces, with the advice, or with the advice and consent, of the respective Executive Councils thereof, or in conjunction with those Councils, or with any number of members thereof, or by those Governors or Lieutenant Governors individually, shall, as far as the same continue in existence and capable of being exercised after the Union in relation to the Government of Canada, be vested in and exercisable by the Governor General, with the advice or with the advice and consent of or in conjunction with the Queen's Privy Council for Canada, or any members thereof, or by the Governor General individually, as the case requires, subject nevertheless (except with respect to such as exist under Acts of the Parliament of Great Britain or of the Parliament of the United Kingdom of Great Britain and Ireland) to be abolished or altered by the Parliament of Canada.

13. The provisions of this Act referring to the Governor General in Council shall be construed as referring to the Governor General acting by and with the advice of the Queen's Privy Council for Canada.

14. It shall be lawful for the Queen, if Her Majesty thinks fit, to authorize the Governor General from time to time to appoint any person or any persons, jointly or severally, to be his Deputy or Deputies within any part or parts of

Canada, and in that capacity to exercise during the pleasure of the Governor General such of the powers, authorities, and functions of the Governor General as the Governor General deems it necessary and expedient to assign to him or them, subject to any limitations or directions expressed or given by the Queen; but the appointment of such a Deputy or Deputies shall not affect the exercise by the Governor General himself of any power, authority or function.

15. The Command-in-Chief of the Land and Naval Militia, and of all Naval and Military Forces, of and in Canada, is hereby declared to continue and be vested in the Queen.

16. Until the Queen otherwise directs, the seat of Government of Canada shall be Ottawa.

17. There shall be one Parliament for Canada, consisting of the Queen, an Upper House styled the Senate, and the House of Commons.

18. The privileges, immunities, and powers to be held, enjoyed, and exercised by the Senate and by the House of Commons, and by the members thereof respectively, shall be such as are from time to time defined by Act of the Parliament of Canada, but so that the same shall never exceed those at the passing of this Act held, enjoyed, and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland and by the members thereof.

19. The Parliament of Canada shall be called together not later than six months after the Union.

20. There shall be a Session of the Parliament of Canada once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one Session and its first sitting in the next Session.

21. The Senate shall, subject to the provisions of this Act, consist of seventy-two members, who shall be styled Senators.

22. In relation to the constitution of the Senate, Canada shall be deemed to consist of three divisions—1. Ontario; 2. Quebec; 3. The Maritime Provinces, Nova Scotia and New Brunswick; which three divisions shall (subject to the provisions of this Act) be equally represented in the Senate as follows: Ontario by twenty-four Senators; Quebec by twenty-four Senators; and the Maritime Provinces by twenty-four Senators, twelve thereof representing Nova Scotia, and twelve thereof representing New Brunswick. In the case of Quebec each of the twenty-four Senators representing that Province shall be appointed for one of the twenty-four Electoral Divisions of Lower Canada specified in Schedule A. to chapter one of the Consolidated Statutes of Canada.

23. The qualification of a Senator shall be as follows:—(1) He shall be of the full age of thirty years: (2) He shall be either a natural born subject of the Queen, or a subject of the Queen naturalized by an Act of the Parliament of Great Britain, or of the Parliament of the United Kingdom of Great Britain and Ireland, or of the Legislature of one of the Provinces of Upper Canada, Lower Canada, Canada, Nova Scotia, or New Brunswick, before the Union, or of the Parliament of Canada after the Union. (3) He shall be legally or equitably seised as of freehold for his own use and benefit of lands or tenements held in free and common socage, or seised or possessed for his own use and benefit of

lands or tenements held in franc-alieu or in roture, within the Province for which he is appointed, of the value of four thousand dollars, over and above all rents, dues, debts, charges, mortgages, and incumbrances due or payable out of or charged on or affecting the same: (4) His real and personal property shall be together worth \$4,000 over and above his debts and liabilities: (5) He shall be resident in the Province for which he is appointed: (6) In the case of Quebec he shall have his real property qualification in the Electoral Division for which he is appointed, or shall be resident in that Division.

24. The Governor General shall from time to time, in the Queen's name, by instrument under the Great Seal of Canada, summon qualified persons to the Senate; and, subject to the provisions of this Act, every person so summoned shall become and be a member of the Senate and a Senator.

25. Such persons shall be first summoned to the Senate as the Queen by warrant under Her Majesty's Royal Sign Manual thinks fit to approve, and their names shall be inserted in the Queen's Proclamation of Union.

26. If at any time on the recommendation of the Governor General the Queen thinks fit to direct that three or six members be added to the Senate, the Governor General may by summons to three or six qualified persons (as the case may be), representing equally the three divisions of Canada, add to the Senate accordingly.

27. In case of such addition being at any time made the Governor General shall not summon any person to the Senate, except on a further like direction by the Queen on the like recommendation, until each of the three divisions of Canada is represented by twenty-four Senators and no more.

28. The number of Senators shall not at any time exceed seventy-eight.

29. A Senator shall, subject to the provisions of this Act, hold his place in the Senate for life.

30. A Senator may by writing under his hand addressed to the Governor General resign his place in the Senate, and thereupon the same shall be vacant.

31. The place of a Senator shall become vacant in any of the following cases: (1) If for two consecutive Sessions of the Parliament he fails to give his attendance in the Senate: (2) If he takes an oath or makes a declaration or acknowledgment of allegiance, obedience, or adherence to a foreign power, or does an act whereby he becomes a subject or citizen, or entitled to the rights or privileges of a subject or citizen of a foreign power: (3) If he is adjudged bankrupt or insolvent, or applies for the benefit of any law relating to insolvent debtors, or becomes a public defaulter: (4) If he is attainted of treason or convicted of felony or of any infamous crime: (5) If he ceases to be qualified in respect of property or of residence; provided, that a Senator shall not be deemed to have ceased to be qualified in respect of residence by reason only of his residing at the seat of the Government of Canada while holding an office under that Government requiring his presence there.

32. When a vacancy happens in the Senate by resignation, death, or otherwise, the Governor General shall by summons to a fit and qualified person fill the vacancy.

33. If any question arises respecting the qualification of a Senator or a vacancy in the Senate the same shall be heard and determined by the Senate.

34. The Governor General may from time to time, by instrument under the Great Seal of Canada, appoint a Senator to be Speaker of the Senate, and may remove him and appoint another in his stead.

35. Until the Parliament of Canada otherwise provides, the presence of at least fifteen Senators, including the Speaker, shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

36. Questions arising in the Senate shall be decided by a majority of voices, and the Speaker shall in all cases have a vote, and when the voices are equal the decision shall be deemed to be in the negative.

37. The House of Commons shall, subject to the provisions of this Act, consist of one hundred and eighty-one members, of whom eighty-two shall be elected for Ontario, sixty-five for Quebec, nineteen for Nova Scotia, and fifteen for New Brunswick.

38. The Governor General shall from time to time, in the Queen's name, by instrument under the Great Seal of Canada, summon and call together the House of Commons.

39. A Senator shall not be capable of being elected or of sitting or voting as a member of the House of Commons.

40. Until the Parliament of Canada otherwise provides, Ontario, Quebec, Nova Scotia, and New Brunswick shall, for the purposes of the election of members to serve in the House of Commons, be divided into Electoral Districts as follows:—(1) Ontario shall be divided into the Counties, Ridings of Counties, Cities, parts of Cities, and Towns enumerated in the first Schedule to this Act, each whereof shall be an Electoral District, each such District as numbered in that Schedule being entitled to return one member. (2) Quebec shall be divided into sixty-five Electoral Districts, composed of the sixty-five Electoral Divisions into which Lower Canada is at the passing of this Act divided under chapter two of the Consolidated Statutes of Canada, chapter seventy-five of the Consolidated Statutes for Lower Canada, and the Act of the Province of Canada of the twenty-third year of the Queen, chapter one, or any other Act amending the same in force at the Union, so that each such Electoral Division shall be for the purposes of this Act an Electoral District entitled to return one member. (3) Each of the eighteen Counties of Nova Scotia shall be an Electoral District. The County of Halifax shall be entitled to return two members, and each of the other Counties one member. (4) Each of the fourteen Counties into which New Brunswick is divided, including the City and County of St. John, shall be an Electoral District; the City of St. John shall also be a separate Electoral District. Each of those fifteen Electoral Districts shall be entitled to return one member.

41. Until the Parliament of Canada otherwise provides, all laws in force in the several Provinces at the Union relative to the following matters or any of them, namely,—the qualifications and disqualifications of persons to be elected or to sit or vote as members of the House of Assembly or Legislative Assembly in the

several Provinces, the voters at elections of such members, the oaths to be taken by voters, the returning officers, their powers and duties, the proceedings at elections, the periods during which elections may be continued, the trial of controverted elections, and proceedings incident thereto, the vacating of seats of members, and the execution of new writs in case of seats vacated otherwise than by dissolution,—shall respectively apply to elections of members to serve in the House of Commons for the same several Provinces. Provided that, until the Parliament of Canada otherwise provides, at any election for a Member of the House of Commons for the District of Algoma, in addition to persons qualified by the law of the Province of Canada to vote, every male British subject aged twenty-one years or upwards, being a householder, shall have a vote.

42. For the first election of members to serve in the House of Commons the Governor General shall cause writs to be issued by such person, in such form, and addressed to such returning officers as he thinks fit. The person issuing writs under this section shall have the like powers as are possessed at the Union by the officers charged with the issuing of writs for the election of members to serve in the respective House of Assembly or Legislative Assembly of the Province of Canada, Nova Scotia, or New Brunswick; and the Returning Officers to whom writs are directed under this section shall have the like powers as are possessed at the Union by the officers charged with the returning of writs for the election of members to serve in the same respective House of Assembly or Legislative Assembly.

43. In case a vacancy in the representation in the House of Commons of any Electoral District happens before the meeting of the Parliament, or after the meeting of the Parliament before provision is made by the Parliament in this behalf, the provisions of the last foregoing section of this Act shall extend and apply to the issuing and returning of a writ in respect of such vacant District.

44. The House of Commons on its first assembling after a general election shall proceed with all practicable speed to elect one of its members to be Speaker.

45. In case of a vacancy happening in the office of Speaker by death, resignation or otherwise, the House of Commons shall with all practicable speed proceed to elect another of its members to be Speaker.

46. The Speaker shall preside at all meetings of the House of Commons.

47. Until the Parliament of Canada otherwise provides, in case of the absence for any reason of the Speaker from the chair of the House of Commons for a period of forty-eight consecutive hours, the House may elect another of its members to act as Speaker, and the member so elected shall during the continuance of such absence of the Speaker have and execute all the powers, privileges, and duties of Speaker.

48. The presence of at least twenty members of the House of Commons shall be necessary to constitute a meeting of the House for the exercise of its powers, and for that purpose the Speaker shall be reckoned as a member.

49. Questions arising in the House of Commons shall be decided by a majority of voices

other than that of the Speaker, and when the voices are equal, but not otherwise, the Speaker shall have a vote.

50. Every House of Commons shall continue for five years from the day of the return of the writs for choosing the House (subject to be sooner dissolved by the Governor General), and no longer.

51. On the completion of the census in the year one thousand eight hundred and seventy-one, and of each subsequent decennial census, the representation of the four Provinces shall be re-adjusted by such authority, in such manner and from such time as the Parliament of Canada from time to time provides, subject and according to the following rules:—(1) Quebec shall have the fixed number of sixty-five members: (2) There shall be assigned to each of the other Provinces such a number of members as will bear the same proportion to the number of its population (ascertained at such census) as the number sixty-five bears to the number of the population of Quebec (so ascertained): (3) In the computation of the number of members for a Province a fractional part not exceeding one-half of the whole number requisite for entitling the Province to a member shall be disregarded; but a fractional part exceeding one-half of that number shall be equivalent to the whole number: (4) On any such re-adjustment the number of members for a Province shall not be reduced unless the proportion which the number of the population of the Province bore to the number of the aggregate population of Canada at the then last preceding re-adjustment of the number of members for the Province is ascertained at the then latest census to be diminished by one-twentieth part or upwards: (5) Such re-adjustment shall not take effect until the termination of the then existing Parliament.

52. The number of members of the House of Commons may be from time to time increased by the Parliament of Canada, provided the proportionate representation of the Provinces prescribed by this Act is not thereby disturbed.

53. Bills for appropriating any part of the public revenue, or for imposing any tax or impost, shall originate in the House of Commons.

54. It shall not be lawful for the House of Commons to adopt or pass any vote, resolution, address, or bill for the appropriation of any part of the public revenue, or of any tax or impost, to any purpose that has not been first recommended to that House by message of the Governor General in the Session in which such vote, resolution, address, or bill is proposed.

55. Where a bill passed by the Houses of the Parliament is presented to the Governor General for the Queen's assent, he shall declare according to his discretion, but subject to the provisions of this Act and to Her Majesty's instructions, either that he assents thereto in the Queen's name, or that he withholds the Queen's assent, or that he reserves the bill for the signification of the Queen's pleasure.

56. Where the Governor General assents to a bill in the Queen's name, he shall by the first convenient opportunity send an authentic copy of the Act to one of Her Majesty's Principal Secretaries of State, and if the Queen in Council within two years after receipt thereof by the Secretary of State thinks fit to disallow the Act, such disallowance (with a certificate of the Secre-

tary of State of the day on which the Act was received by him) being signified by the Governor General, by speech or message to each of the Houses of the Parliament, or by proclamation, shall annul the Act from and after the day of such signification.

57. A bill reserved for the signification of the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor General for the Queen's assent, the Governor General signifies, by speech or message to each of the Houses of the Parliament or by proclamation, that it has received the assent of the Queen in Council. An entry of every such speech, message, or proclamation shall be made in the Journal of each House, and a duplicate thereof duly attested shall be delivered to the proper officer to be kept among the Records of Canada.

58. For each Province there shall be an officer, styled the Lieutenant Governor, appointed by the Governor General in Council by instrument under the Great Seal of Canada.

59. A Lieutenant Governor shall hold office during the pleasure of the Governor General; but any Lieutenant Governor appointed after the commencement of the first Session of the Parliament of Canada shall not be removable within five years from his appointment, except for cause assigned, which shall be communicated to him in writing within one month after the order for his removal is made, and shall be communicated by message to the Senate and to the House of Commons within one week thereafter if the Parliament is then sitting, and if not then within one week after the commencement of the next Session of the Parliament.

60. The salaries of the Lieutenant Governors shall be fixed and provided by the Parliament of Canada.

61. Every Lieutenant Governor shall, before assuming the duties of his office, make and subscribe before the Governor General, or some person authorized by him, oaths of allegiance and office similar to those taken by the Governor General.

62. The provisions of this Act referring to the Lieutenant Governor extend and apply to the Lieutenant Governor for the time being of each Province or other the chief executive officer or administrator for the time being carrying on the government of the Province, by whatever title he is designated.

63. The Executive Council of Ontario and of Quebec shall be composed of such persons as the Lieutenant Governor from time to time thinks fit, and in the first instance of the following officers, namely:—The Attorney-General, the Secretary and Registrar of the Province, the Treasurer of the Province, the Commissioner of Crown Lands, and the Commissioner of Agriculture and Public Works, with in Quebec the Speaker of the Legislative Council and the Solicitor General.

64. The Constitution of the Executive Authority in each of the Provinces of Nova Scotia and New Brunswick shall, subject to the provisions of this Act, continue as it exists at the Union until altered under the authority of this Act.

65. All powers, authorities, and functions which under any Act of the Parliament of Great Britain, or of the Parliament of the United Kingdom of Great Britain and Ireland, or of the

Legislature of Upper Canada, Lower Canada, or Canada, were or are before or at the Union vested in or exercisable by the respective Governors or Lieutenant Governors of those Provinces, with the advice, or with the advice and consent, of the respective Executive Councils thereof, or in conjunction with those Councils, or with any number of members thereof, or by those Governors or Lieutenant Governors individually, shall, as far as the same are capable of being exercised after the Union in relation to the Government of Ontario and Quebec, respectively, be vested in, and shall or may be exercised by the Lieutenant Governor of Ontario and Quebec respectively, with the advice or with the advice and consent of or in conjunction with the respective Executive Councils, or any members thereof, or by the Lieutenant Governor individually, as the case requires, subject nevertheless (except with respect to such as exist under Acts of the Parliament of Great Britain, or of the Parliament of the United Kingdom of Great Britain and Ireland), to be abolished or altered by the respective Legislatures of Ontario and Quebec.

66. The provisions of this Act, referring to the Lieutenant Governor in Council shall be construed as referring to the Lieutenant Governor of the Province acting by and with the advice of the Executive Council thereof.

67. The Governor General in Council may from time to time appoint an administrator to execute the office and functions of Lieutenant Governor during his absence, illness, or other inability.

68. Unless and until the Executive Government of any Province otherwise directs with respect to that Province, the seats of Government of the Provinces shall be as follows, namely,—of Ontario, the City of Toronto; of Quebec, the City of Quebec; of Nova Scotia, the City of Halifax; and of New Brunswick, the City of Fredericton.

69. There shall be a Legislature for Ontario consisting of the Lieutenant Governor and of one House, styled the Legislative Assembly of Ontario.

70. The Legislative Assembly of Ontario shall be composed of eighty-two members, to be elected to represent the eighty-two Electoral Districts set forth in the first Schedule to this Act.

71. There shall be a Legislature for Quebec consisting of the Lieutenant Governor and of two Houses, styled the Legislative Council of Quebec and the Legislative Assembly of Quebec.

72. The Legislative Council of Quebec shall be composed of twenty-four members, to be appointed by the Lieutenant Governor in the Queen's name, by instrument under the Great Seal of Quebec, one being appointed to represent each of the twenty-four Electoral Divisions of Lower Canada in this Act referred to, and each holding office for the term of his life, unless the Legislature of Quebec otherwise provides under the provisions of this Act.

73. The qualifications of the Legislative Councillors of Quebec shall be the same as those of the Senators for Quebec.

74. The place of a Legislative Councillor of Quebec shall become vacant in the cases, 'mutatis mutandis' in which the place of Senator becomes vacant.

75. When a vacancy happens in the Legislative Council of Quebec, by resignation, death, or otherwise, the Lieutenant Governor, in the Queen's name, by instrument under the Great Seal of Quebec, shall appoint a fit and qualified person to fill the vacancy.

76. If any question arises respecting the qualification of a Legislative Councillor of Quebec, or a vacancy in the Legislative Council of Quebec, the same shall be heard and determined by the Legislative Council.

77. The Lieutenant Governor may from time to time, by instrument under the Great Seal of Quebec, appoint a member of the Legislative Council of Quebec to be Speaker thereof, and may remove him and appoint another in his stead.

78. Until the Legislature of Quebec otherwise provides, the presence of at least ten members of the Legislative Council, including the Speaker, shall be necessary to constitute a meeting for the exercise of its powers.

79. Questions arising in the Legislative Council of Quebec shall be decided by a majority of voices, and the Speaker shall in all cases have a vote, and when the voices are equal the decision shall be deemed to be in the negative.

80. The Legislative Assembly of Quebec shall be composed of sixty-five members, to be elected to represent the sixty-five Electoral Divisions or Districts of Lower Canada in this Act referred to, subject to alteration thereof by the Legislature of Quebec: Provided that it shall not be lawful to present to the Lieutenant Governor of Quebec for assent any bill for altering the limits of any of the Electoral Divisions or Districts mentioned in the second Schedule to this Act, unless the second and third readings of such bill have been passed in the Legislative Assembly with the concurrence of the majority of the members representing all those Electoral Divisions or Districts, and the assent shall not be given to such bills unless an address has been presented by the Legislative Assembly to the Lieutenant Governor stating that it has been so passed.

81. The Legislatures of Ontario and Quebec respectively shall be called together not later than six months after the Union.

82. The Lieutenant Governor of Ontario and of Quebec shall from time to time, in the Queen's name, by instrument under the Great Seal of the Province, summon and call together the Legislative Assembly of the Province.

83. Until the Legislature of Ontario or of Quebec otherwise provides, a person accepting or holding in Ontario or in Quebec any office, commission, or employment, permanent or temporary, at the nomination of the Lieutenant Governor, to which an annual salary, or any fee, allowance, emolument, or profit of any kind or amount whatever from the Province is attached, shall not be eligible as a member of the Legislative Assembly of the respective Province, nor shall he sit or vote as such; but nothing in this section shall make ineligible any person being a member of the Executive Council of the respective Province, or holding any of the following offices, that is to say, the offices of Attorney-General, Secretary and Registrar of the Province, Treasurer of the Province, Commissioner of Crown Lands, and Commissioner of Agriculture and Public Works and, in Quebec, Solicitor-General, or shall disqualify him to sit or vote in

the House for which he is elected, provided he is elected while holding such office.

84. Until the Legislatures of Ontario and Quebec respectively otherwise provide, all laws which at the Union are in force in those Provinces respectively, relative to the following matters, or any of them, namely,—the qualifications and disqualifications of persons to be elected or to sit or vote as members of the Assembly of Canada, the qualifications or disqualifications of voters, the paths to be taken by voters, the Returning Officers, their powers and duties, the proceedings at elections, the periods during which such elections may be continued, and the trial of controverted elections and the proceedings incident thereto, the vacating of the seats of members and the issuing and execution of new writs in case of seats vacated otherwise than by dissolution, shall respectively apply to elections of members to serve in the respective Legislative Assemblies of Ontario and Quebec. Provided that until the Legislature of Ontario otherwise provides, at any election for a member of the Legislative Assembly of Ontario for the District of Algoma, in addition to persons qualified by the law of the Province of Canada to vote, every male British subject, aged twenty-one years or upwards, being a householder, shall have a vote.

85. Every Legislative Assembly of Ontario and every Legislative Assembly of Quebec shall continue for four years from the day of the return of the writs for choosing the same (subject nevertheless to either the Legislative Assembly of Ontario or the Legislative Assembly of Quebec being sooner dissolved by the Lieutenant Governor of the Province), and no longer.

86. There shall be a session of the Legislature of Ontario and of that of Quebec once at least in every year, so that twelve months shall not intervene between the last sitting of the Legislature in each Province in one session and its first sitting in the next session.

87. The following provisions of this Act respecting the House of Commons of Canada, shall extend and apply to the Legislative Assemblies of Ontario and Quebec, that is to say,—the provisions relating to the election of a Speaker originally and on vacancies, the duties of the Speaker, the absence of the Speaker, the quorum, and the mode of voting, as if those provisions were here re-enacted and made applicable in terms to each such Legislative Assembly.

88. The constitution of the Legislature of each of the Provinces of Nova Scotia and New Brunswick shall, subject to the provisions of this Act, continue as it exists at the Union until altered under the authority of this Act; and the House of Assembly of New Brunswick existing at the passing of this Act shall, unless sooner dissolved, continue for the period for which it was elected.

89. Each of the Lieutenant Governors of Ontario, Quebec, and Nova Scotia shall cause writs to be issued for the first election of members of the Legislative Assembly thereof in such form and by such person as he thinks fit, and at such time and addressed to such Returning Officer as the Governor General directs, and so that the first election of member of Assembly for any Electoral District or any subdivision thereof shall be held at the same time and at the same places as the election for a member to serve in the

House of Commons of Canada for that Electoral District.

90. The following provisions of this Act respecting the Parliament of Canada, namely,—the provisions relating to appropriation and tax bills, the recommendation of money votes, the assent to bills, the disallowance of Acts, and the signification of pleasure on bills reserved,—shall extend and apply to the Legislatures of the several Provinces as if those provisions were here re-enacted and made applicable in terms to the respective Provinces and the Legislatures thereof, with the substitution of the Lieutenant Governor of the Province for the Governor General, of the Governor General for the Queen and for a Secretary of State, of one year for two years, and of the Province for Canada.

91. It shall be lawful for the Queen, by and with the advice and consent of the Senate and House of Commons, to make laws for the peace, order, and good government of Canada, in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces; and for greater certainty, but not so as to restrict the generality of the foregoing terms of this section, it is hereby declared that (notwithstanding anything in this Act) the exclusive legislative authority of the Parliament of Canada extends to all matters coming within the classes of subjects next hereinafter enumerated, that is to say,—1. The Public Debt and Property. 2. The regulation of Trade and Commerce. 3. The raising of money by any mode or system of Taxation. 4. The borrowing of money on the public credit. 5. Postal service. 6. The Census and Statistics. 7. Militia, Military and Naval Service, and Defence. 8. The fixing of and providing for the salaries and allowances of civil and other officers of the Government of Canada. 9. Beacons, Buoys, Lighthouses, and Sable Island. 10. Navigation and Shipping. 11. Quarantine and the establishment and maintenance of Marine Hospitals. 12. Sea coast and inland Fisheries. 13. Ferries between a Province and any British or Foreign country, or between two Provinces. 14. Currency and Coinage. 15. Banking, incorporation of banks, and the issue of paper money. 16. Savings Banks. 17. Weights and Measures. 18. Bills of Exchange and Promissory Notes. 19. Interest. 20. Legai tender. 21. Bankruptcy and Insolvency. 22. Patents of invention and discovery. 23. Copyrights. 24. Indians, and lands reserved for the Indians. 25. Naturalization and Aliens. 26. Marriage and Divorce. 27. The Criminal Law, except the Constitution of Courts of Criminal Jurisdiction, but including the Procedure in Criminal Matters. 28. The Establishment, Maintenance, and Management of Penitentiaries. 29. Such classes of subjects as are expressly excepted in the enumeration of the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces. And any matter coming within any of the classes of subjects enumerated in this section shall not be deemed to come within the class of matters of a local or private nature comprised in the enumeration of the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces.

92. In each Province the Legislature may exclusively make laws in relation to matters coming

within the classes of subjects next hereinafter enumerated; that is to say,—1. The amendment from time to time, notwithstanding anything in this Act, of the Constitution of the Province, except as regards the office of Lieutenant Governor. 2. Direct Taxation within the Province in order to the raising of a Revenue for Provincial purposes. 3. The borrowing of money on the sole credit of the Province. 4. The establishment and tenure of Provincial offices and the appointment and payment of Provincial officers. 5. The management and sale of the Public Lands belonging to the Province and of the timber and wood thereon. 6. The establishment, maintenance, and management of public and reformatory prisons in and for the Province. 7. The establishment, maintenance, and management of hospitals, asylums, charities, and eleemosynary institutions in and for the Province, other than marine hospitals. 8. Municipal institutions in the Province. 9. Shop, saloon, tavern, auctioneer, and other licenses in order to the raising of a revenue for Provincial, local, or municipal purposes. 10. Local works and undertakings other than such as are of the following classes,—*a.* Lines of steam or other ships, railways, canals, telegraphs, and other works and undertakings connecting the Province with any other or others of the Provinces, or extending beyond the limits of the Province: *b.* Lines of steamships between the Province and any British or foreign country. *c.* Such works as, although wholly situate within the Province, are before or after their execution declared by the Parliament of Canada to be for the general advantage of Canada or for the advantage of two or more of the Provinces. 11. The incorporation of companies with Provincial objects. 12. The solemnization of marriage in the Province. 13. Property and civil rights in the Province. 14. The administration of justice in the Province, including the constitution, maintenance, and organization of Provincial Courts, both of civil and of criminal jurisdiction, and including procedure in Civil matters in those Courts. 15. The imposition of punishment by fine, penalty, or imprisonment for enforcing any law of the Province made in relation to any matter coming within any of the classes of subjects enumerated in this section. 16. Generally all matters of a merely local or private nature in the Province.

93. In and for each Province the Legislature may exclusively make laws in relation to education, subject and according to the following provisions: (1) Nothing in any such law shall prejudicially affect any right or privilege with respect to denominational schools which any class of persons have by law in the Province at the Union. (2) All the powers, privileges, and duties at the Union by law conferred and imposed in Upper Canada on the separate schools and school trustees of the Queen's Roman Catholic subjects shall be and the same are hereby extended to the dissentient schools of the Queen's Protestant and Roman Catholic subjects in Quebec. (3) Where in any Province a system of separate or dissentient schools exists by law at the Union or is thereafter established by the Legislature of the Province, an appeal shall lie to the Governor General in Council from any Act or decision of any Provincial authority affecting any right or privilege of the Protestant

or Roman Catholic minority of the Queen's subjects in relation to education; (4) In case any such Provincial law as from time to time seems to the Governor General in Council requisite for the due execution of the provisions of this section is not made, or in case any decision of the Governor General in Council on any appeal under this section is not duly executed by the proper Provincial authority in that behalf, then and in every such case, and as far only as the circumstances of each case require, the Parliament of Canada may make remedial laws for the due execution of the provisions of this section and of any decision of the Governor General in Council under this section.

94. Notwithstanding anything in this Act, the Parliament of Canada may make provision for the uniformity of all or any of the laws relative to property and civil rights in Ontario, Nova Scotia, and New Brunswick, and of the procedure of all or any of the Courts in those three Provinces; and from and after the passing of any Act in that behalf the power of the Parliament of Canada to make laws in relation to any matter comprised in any such Act shall, notwithstanding anything in this Act, be unrestricted; but any Act of the Parliament of Canada making provision for such uniformity shall not have effect in any Province unless and until it is adopted and enacted as law by the Legislature thereof.

95. In each Province the Legislature may make laws in relation to Agriculture in the Province, and to Immigration into the Province; and it is hereby declared that the Parliament of Canada may from time to time make laws in relation to Agriculture in all or any of the Provinces, and to Immigration into all or any of the Provinces; and any law of the Legislature of a Province relative to Agriculture or to Immigration shall have effect in and for the Province as long and as far only as it is not repugnant to any Act of the Parliament of Canada.

96. The Governor General shall appoint the Judges of the Superior, District, and County Courts in each Province, except those of the Courts of Probate in Nova Scotia and New Brunswick.

97. Until the laws relative to property and civil rights in Ontario, Nova Scotia, and New Brunswick, and the procedure of the Courts in those Provinces, are made uniform, the Judges of the Courts of those Provinces appointed by the Governor General shall be selected from the respective Bars of those Provinces.

98. The Judges of the Courts of Quebec shall be selected from the Bar of that Province.

99. The Judges of the Superior Courts shall hold office during good behaviour, but shall be removable by the Governor General on address of the Senate and House of Commons.

100. The salaries, allowances, and pensions of the Judges of the Superior, District, and County Courts (except the Courts of Probate in Nova Scotia and New Brunswick), and of the Admiralty Courts in cases where the Judges thereof are for the time being paid by salary, shall be fixed and provided by the Parliament of Canada.

101. The Parliament of Canada may, notwithstanding anything in this Act, from time to time, provide for the constitution, maintenance, and organization of a general Court of Appeal

for Canada, and for the establishment of any additional Courts for the better administration of the Laws of Canada.

102. All duties and revenues over which the respective Legislatures of Canada, Nova Scotia, and New Brunswick before and at the Union had and have power of appropriation, except such portions thereof as are by this Act reserved to the respective Legislatures of the Provinces, or are raised by them in accordance with the special powers conferred on them by this Act, shall form one Consolidated Revenue Fund, to be appropriated for the public service of Canada in the manner and subject to the charges in this Act provided.

103. The Consolidated Revenue Fund of Canada shall be permanently charged with the costs, charges, and expenses incident to the collection, management, and receipt thereof, and the same shall form the first charge thereon, subject to be reviewed and audited in such manner as shall be ordered by the Governor General in Council until the Parliament otherwise provides.

104. The annual interest of the public debts of the several Provinces of Canada, Nova Scotia, and New Brunswick at the Union shall form the second charge on the Consolidated Revenue Fund of Canada.

105. Unless altered by the Parliament of Canada, the salary of the Governor General shall be ten thousand pounds sterling money of the United Kingdom of Great Britain and Ireland, payable out of the Consolidated Revenue Fund of Canada, and the same shall form the third charge thereon.

106. Subject to the several payments by this Act charged on the Consolidated Revenue Fund of Canada, the same shall be appropriated by the Parliament of Canada for the public service.

107. All stocks, cash, banker's balances, and securities for money belonging to each Province at the time of the Union, except as in this Act mentioned, shall be the property of Canada, and shall be taken in reduction of the amount of the respective debts of the Provinces at the Union.

108. The public works and property of each Province, enumerated in the third schedule to this Act, shall be the property of Canada.

109. All lands, mines, minerals, and royalties belonging to the several Provinces of Canada, Nova Scotia and New Brunswick at the Union, and all sums then due or payable for such lands, mines, minerals, or royalties, shall belong to the several Provinces of Ontario, Quebec, Nova Scotia and New Brunswick in which the same are situate or arise, subject to any trusts existing in respect thereof, and to any interest other than that of the Province in the same.

110. All assets connected with such portions of the public debt of each Province as are assumed by that Province shall belong to that Province.

111. Canada shall be liable for the debts and liabilities of each Province existing at the Union.

112. Ontario and Quebec conjointly shall be liable to Canada for the amount (if any) by which the debt of the Province of Canada exceeds at the Union sixty-two million five hundred thousand dollars, and shall be charged with interest at the rate of five per centum per annum thereon.

113. The assets enumerated in the fourth Schedule to this Act belonging at the Union to

the Province of Canada shall be the property of Ontario and Quebec conjointly.

114. Nova Scotia shall be liable to Canada for the amount (if any) by which its public debt exceeds at the Union eight million dollars, and shall be charged with interest at the rate of five per centum per annum thereon.

115. New Brunswick shall be liable to Canada for the amount (if any) by which its public debt exceeds at the Union seven million dollars, and shall be charged with interest at the rate of five per centum per annum thereon.

116. In case the public debt of Nova Scotia and New Brunswick do not at the Union amount to eight million dollars and seven million dollars respectively, they shall respectively receive by half-yearly payments in advance from the Government of Canada interest at five per centum per annum on the difference between the actual amounts of their respective debts and such stipulated amounts.

117. The several provinces shall retain all their respective public property not otherwise disposed of in this Act, subject to the right of Canada to assume any lands or public property required for fortifications or for the defence of the country.

118. The following sums shall be paid yearly by Canada to the several Provinces for the support of their Governments and Legislatures: Ontario, eighty thousand dollars; Quebec, seventy thousand dollars; Nova Scotia, sixty thousand dollars; New Brunswick, fifty thousand dollars; [total] two hundred and sixty thousand dollars; and an annual grant in aid of each Province shall be made, equal to eighty cents per head, of the population as ascertained by the census of one thousand eight hundred and sixty-one, and in the case of Nova Scotia and New Brunswick, by each subsequent decennial census until the population of each of those two Provinces amounts to four hundred thousand souls, at which rate such grant shall thereafter remain. Such grant shall be in full Settlement of all future demands on Canada, and shall be paid half-yearly in advance to each Province; but the Government of Canada shall deduct from such grants, as against any Province, all sums chargeable as interest on the Public Debt of that Province in excess of the several amounts stipulated in this Act.

119. New Brunswick shall receive by half-yearly payments in advance from Canada, for the period of ten years from the Union, an additional allowance of sixty-three thousand dollars per annum; but as long as the Public Debt of that Province remains under seven million dollars a deduction equal to the interest at five per centum per annum on such deficiency shall be made from that allowance of sixty-three thousand dollars.

120. All payments to be made under this Act, or in discharge of liabilities created under any Act of the Provinces of Canada, Nova Scotia and New Brunswick respectively, and assumed by Canada, shall, until the Parliament of Canada otherwise directs, be made in such form and manner as may from time to time be ordered by the Governor General in Council.

121. All articles of the growth, produce, or manufacture of any one of the Provinces shall, from and after the Union, be admitted free into each of the other Provinces.

122. The Customs and Excise Laws of each Province shall, subject to the provisions of this Act, continue in force until altered by the Parliament of Canada.

123. Where Customs duties are, at the Union, leviable on any goods, wares or merchandises in any two Provinces, those goods, wares and merchandises may, from and after the Union, be imported from one of those Provinces into the other of them on proof of payment of the Customs duty leviable thereon in the Province of exportation, and on payment of such further amount (if any) of Customs duty as is leviable thereon in the Province of importation.

124. Nothing in this Act shall, affect the right of New Brunswick to levy the lumber dues provided in chapter fifteen, of title three, of the Revised Statutes of New Brunswick, or in any Act amending that act before or after the Union, and not increasing the amount of such dues; but the lumber of any of the Provinces other than New Brunswick shall not be subjected to such dues.

125. No lands or property belonging to Canada or any Province shall be liable to taxation.

126. Such portions of the duties and revenues over which the respective Legislatures of Canada, Nova Scotia, and New Brunswick had before the Union power of appropriation as are by this Act reserved to the respective Governments or Legislatures of the Provinces, and all duties and revenues raised by them in accordance with the special powers conferred upon them by this act, shall in each Province form one Consolidated Revenue Fund to be appropriated for the public service of the Province.

127. If any person being at the passing of this Act a member of the Legislative Council of Canada, Nova Scotia, or New Brunswick, to whom a place in the Senate is offered, does not within thirty days thereafter, by writing under his hand, addressed to the Governor General of the Province of Canada, or to the Lieutenant Governor of Nova Scotia or New Brunswick (as the case may be), accept the same, he shall be deemed to have declined the same; and any person who, being at the passing of this Act a member of the Legislative Council of Nova Scotia or New Brunswick, accepts a place in the Senate, shall thereby vacate his seat in such Legislative Council.

128. Every member of the Senate or House of Commons of Canada shall before taking his seat therein, take and subscribe before the Governor General or some person authorized by him, and every member of a Legislative Council or Legislative Assembly of any Province shall before taking his seat therein, take and subscribe before the Lieutenant Governor of the Province, or some person authorized by him, the oath of allegiance contained in the fifth Schedule to this Act; and every member of the Senate of Canada and every member of the Legislative Council of Quebec shall also, before taking his seat therein, take and subscribe before the Governor General, or some person authorized by him, the declaration of qualification contained in the same Schedule.

129. Except as otherwise provided by this Act, all laws in force in Canada, Nova Scotia, or New Brunswick at the Union, and all courts of civil and criminal jurisdiction, and all legal

commissions, powers and authorities, and all officers, judicial, administrative, and ministerial, existing therein at the Union, shall continue in Ontario, Quebec, Nova Scotia, and New Brunswick respectively, as if the Union had not been made, subject nevertheless (except with respect to such as are enacted by or exist under Acts of the Parliament of Great Britain or of the Parliament of the United Kingdom of Great Britain and Ireland), to be repealed, abolished or altered by the Parliament of Canada, or by the Legislature of the respective Province, according to the authority of the Parliament or of that Legislature under this Act.

130. Until the Parliament of Canada otherwise provides, all officers of the several Provinces having duties to discharge in relation to matters other than those coming within the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces shall be officers of Canada, and shall continue to discharge the duties of their respective offices under the same liabilities, responsibilities and penalties as if the Union had not been made.

131. Until the Parliament of Canada otherwise provides, the Governor General in Council may from time to time appoint such officers as the Governor General in Council deems necessary or proper for the effectual execution of this Act.

132. The Parliament and Government of Canada shall have all powers necessary or proper for performing the obligations of Canada or of any Province thereof, as part of the British Empire towards foreign countries, arising under treaties between the Empire and such foreign countries.

133. Either the English or the French language may be used by any person in the debates of the Houses of Parliament of Canada and of the Houses of the Legislature of Quebec; and both those languages shall be used in the respective records and journals of those Houses; and either of those languages may be used by any person or in any pleading or process in or issuing from any Court of Canada established under this Act, and in or from all or any of the Courts of Quebec. The Acts of the Parliament of Canada and of the Legislature of Quebec shall be printed and published in both those languages.

134. Until the Legislature of Ontario or of Quebec otherwise provides, the Lieutenant Governors of Ontario and Quebec may each appoint under the Great Seal of the Province the following officers, to hold office during pleasure, that is to say,—the Attorney General, the Secretary and Registrar of the Province, the Treasurer of the Province, the Commissioner of Crown Lands and the Commissioner of Agriculture and Public Works, and, in the case of Quebec, the Solicitor General; and may, by order of the Lieutenant Governor in Council from time to time prescribe the duties of those officers and of the several departments over which they shall preside or to which they shall belong, and of the officers and clerks thereof; and may also appoint other and additional officers to hold office during pleasure, and may from time to time prescribe the duties of those officers, and of the several departments over which they shall preside or to which they shall belong, and of the officers and clerks thereof.

135. Until the Legislature of Ontario or Quebec otherwise provides, all rights, powers,

duties, functions, responsibilities or authorities at the passing of this Act vested in or imposed on the Attorney General, Solicitor General, Secretary and Registrar of the Province of Canada, Minister of Finance, Commissioner of Crown Lands, Commissioner of Public Works, and Minister of Agriculture and Receiver General, by any law, statute or ordinance of Upper Canada, Lower Canada, or Canada, and not repugnant to this Act, shall be vested in or imposed on any officer to be appointed by the Lieutenant Governor for the discharge of the same or any of them; and the Commissioner of Agriculture and Public Works shall perform the duties and functions of the office of Minister of Agriculture at the passing of this Act imposed by the law of the Province of Canada as well as those of the Commissioner of Public Works.

136. Until altered by the Lieutenant Governor in Council, the Great Seals of Ontario and Quebec respectively, shall be the same or of the same design, as those used in the Provinces of Upper Canada and Lower Canada respectively before their Union as the Province of Canada.

137. The words “and from thence to the end of the then next ensuing Session of the Legislature,” or words to the same effect, used in any temporary Act of the Province of Canada not expired before the Union, shall be construed to extend and apply to the next Session of Parliament of Canada, if the subject matter of the Act is within the powers of the same as defined by this Act, or to the next Sessions of the Legislatures of Ontario and Quebec respectively, if the subject matter of the Act is within the powers of the same as defined by this Act.

138. From and after the Union, the use of the words “Upper Canada,” instead of “Ontario,” or “Lower Canada” instead of “Quebec,” in any deed, writ, process, pleading, document, matter or thing, shall not invalidate the same.

139. Any Proclamation under the Great Seal of the Province of Canada, issued before the Union to take effect at a time which is subsequent to the Union, whether relating to that Province or to Upper Canada, or to Lower Canada, and the several matters and things therein proclaimed shall be and continue of like force and effect as if the Union had not been made.

140. Any proclamation which is authorized by any Act of the Legislature of the Province of Canada to be issued under the Great Seal of the Province of Canada, whether relating to that Province or to Upper Canada, or to Lower Canada, and which is not issued before the Union, may be issued by the Lieutenant Governor of Ontario or of Quebec, as its subject matter requires, under the Great Seal thereof; and from and after the issue of such Proclamation the same and the several matters and things therein proclaimed shall be and continue of the like force and effect in Ontario or Quebec as if the Union had not been made.

141. The Penitentiary of the Province of Canada shall, until the Parliament of Canada otherwise provides, be and continue the Penitentiary of Ontario and of Quebec.

142. The division and adjustment of the debts, credits, liabilities, properties and assets of Upper Canada and Lower Canada shall be referred to the arbitrament of three arbitrators, one chosen by the Government of Ontario, one by the Government of Quebec, and one by the

Government of Canada; and the selection of the Arbitrators shall not be made until the Parliament of Canada and the Legislatures of Ontario and Quebec have met; and the arbitrator chosen by the Government of Canada shall not be a resident either in Ontario or in Quebec.

143. The Governor General in Council may from time to time order that such and so many of the records, books, and documents of the Province of Canada as he thinks fit shall be appropriated and delivered either to Ontario or to Quebec, and the same shall henceforth be the property of that Province; and any copy thereof or extract therefrom, duly certified by the officer having charge of the original thereof shall be admitted as evidence.

144. The Lieutenant Governor of Quebec may from time to time, by Proclamation under the Great Seal of the Province, to take effect from a day to be appointed therein, constitute townships in those parts of the Province of Quebec in which townships are not then already constituted, and fix the metes and bounds thereof.

145. Inasmuch as the Provinces of Canada, Nova Scotia, and New Brunswick have joined in a declaration that the construction of the Intercolonial Railway is essential to the consolidation of the Union of British North America, and to the assent thereto of Nova Scotia and New Brunswick, and have consequently agreed that provision should be made for its immediate construction by the Government of Canada: Therefore, in order to give effect to that agreement, it shall be the duty of the Government and Parliament of Canada to provide for the commencement, within six months after the Union, of a railway connecting the River St. Lawrence with the City of Halifax in Nova Scotia, and for the construction thereof without intermission, and the completion thereof with all practicable speed.

146. It shall be lawful for the Queen, by and with the advice of Her Majesty's Most Honourable Privy Council, on Addresses from the Houses of the Parliament of Canada, and from the Houses of the respective Legislatures of the Colonies or Provinces of Newfoundland, Prince Edward Island, and British Columbia, to admit those Colonies or Provinces, or any of them, into the Union, and on Address from the Houses of the Parliament of Canada to admit Rupert's Land and the North-western Territory, or either of them, into the Union, on such terms and conditions in each case as are in the Addresses expressed and as the Queen thinks fit to approve, subject to the provisions of this Act, and the provisions of any Order in Council in that behalf shall have effect as if they had been enacted by the Parliament of the United Kingdom of Great Britain and Ireland.

147. In case of the admission of Newfoundland and Prince Edward Island, or either of them, each shall be entitled to a representation in the Senate of Canada of four members, and (notwithstanding anything in this Act) in case of the admission of Newfoundland the normal number of Senators shall be seventy-six and their maximum number shall be eighty-two; but Prince Edward Island when admitted shall be deemed to be comprised in the third of the three divisions into which Canada is, in relation to the constitution of the Senate, divided by this Act, and accordingly, after the admission of Prince Edward Island, whether Newfoundland is ad-

mitted or not, the representation of Nova Scotia and New Brunswick in the Senate shall, as vacancies occur, be reduced from twelve to ten members respectively, and the representation of each of those Provinces shall not be increased at any time beyond ten, except under the provisions of this Act for the appointment of three or six additional Senators under the direction of the Queen.

A. D. 1871.—British North America Act, 1871.—An Act respecting the Establishment of Provinces in the Dominion of Canada. [29TH JUNE, 1871.]

WHEREAS doubts have been entertained respecting the powers of the Parliament of Canada to establish Provinces in territories admitted, or which may hereafter be admitted, into the Dominion of Canada, and to provide for the representation of such Provinces in the said Parliament, and it is expedient to remove such doubts, and to vest such powers in the said Parliament: Be it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords, Spiritual and Temporal, and Commons in this present Parliament assembled, and by the authority of the same, as follows:—

1. This Act may be cited for all purposes as The British North America Act, 1871.

2. The Parliament of Canada may from time to time establish new Provinces in any territories forming for the time being part of the Dominion of Canada, but not included in any Province thereof, and may, at the time of such establishment, make provision for the constitution and administration of any such Province, and for the passing of laws for the peace, order and good government of such Province, and for its representation in the said Parliament.

3. The Parliament of Canada may from time to time, with the consent of the Legislature of any Province of the said Dominion, increase, diminish, or otherwise alter the limits of such Province, upon such terms and conditions as may be agreed to by the said Legislature, and may, with the like consent, make provision respecting the effect and operation of any such increase or diminution or alteration of territory in relation to any Province affected thereby.

4. The Parliament of Canada may from time to time make provision for the administration, peace, order, and good government of any territory not for the time being included in any Province.

5. The following Acts passed by the said Parliament of Canada, and intitled respectively: "An Act for the temporary government of Rupert's Land and the North-Western Territory when united with Canada:" and "An Act to amend and continue the Act thirty-two and thirty-three Victoria, chapter three, and to establish and provide for the government of the Province of Manitoba," shall be and be deemed to have been valid and effectual for all purposes whatsoever from the date at which they respectively received the assent, in the Queen's name, of the Governor General of the said Dominion of Canada.

6. Except as provided by the third section of this Act, it shall not be competent for the Parliament of Canada to alter the provisions of the last mentioned Act of the said Parliament in so far as it relates to the Province of Manitoba, or of any other Act hereafter establishing new Prov-

CONSTITUTION OF CANADA.

inces in the said Dominion, subject always to the right of the Legislature of the Province of Manitoba to alter from time to time the provisions of any law respecting the qualification of electors and members of the Legislative Assembly, and to make laws respecting elections in the said Province.

A. D. 1875.—Parliament of Canada Act, 1875.—An Act to remove certain doubts with respect to the powers of the Parliament of Canada, under Section 18 of the British North America Act, 1867. [19TH JULY, 1875.]

WHEREAS by section 18 of The British North America Act, 1867, it is provided as follows:—"The privileges, immunities, and powers to be held, enjoyed, and exercised by the Senate and by the House of Commons, and by the members thereof respectively, shall be such as are from time to time defined by Act of the Parliament of Canada, but so that the same shall never exceed those at the passing of this Act held, enjoyed, and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland, and by the members thereof." And whereas doubts have arisen with regard to the power of defining by an Act of the Parliament of Canada, in pursuance of the said section, the said privileges, powers or immunities; and it is expedient to remove such doubts: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. Section 18 of The British North America Act, 1867, is hereby repealed, without prejudice to anything done under that section, and the following section shall be substituted for the section so repealed:—The privileges, immunities, and powers to be held, enjoyed and exercised by the Senate and by the House of Commons, and by the members thereof respectively, shall be such as are from time to time defined by Act of the Parliament of Canada, but so that any Act of the Parliament of Canada defining such privileges, immunities and powers shall not confer any privileges, immunities, or powers exceeding those at the passing of such Act held, enjoyed, and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland, and by the members thereof.

2. The Act of the Parliament of Canada passed in the thirty-first year of the reign of her present Majesty, chapter twenty-four, intituled An Act to provide for oaths to witnesses being administered in certain cases for the purposes of

CONSTITUTION OF ENGLAND.

either House of Parliament, shall be deemed to be valid, and to have been valid as from the date at which the royal assent was given thereto by the Governor General of the Dominion of Canada.

3. This Act may be cited as The Parliament of Canada Act, 1875.

A. D. 1886.—British North America Act, 1886.—An Act respecting the Representation in the Parliament of Canada of Territories which for the time being form part of the Dominion of Canada, but are not included in any Province. [25TH JUNE, 1886.]

WHEREAS it is expedient to empower the Parliament of Canada to provide for the representation in the Senate and House of Commons of Canada, or either of them, of any territory which for the time being forms part of the Dominion of Canada, but is not included in any Province: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in the present Parliament assembled, and by the authority of the same, as follows:—

1. The Parliament of Canada may from time to time make provision for the representation in the Senate and House of Commons of Canada, or in either of them, of any territories which for the time being form part of the Dominion of Canada, but are not included in any Province thereof.

2. Any Act passed by the Parliament of Canada before the passing of this Act for the purpose mentioned in this Act shall, if not disallowed by the Queen, be, and shall be deemed to have been, valid and effectual from the date at which it received the assent, in Her Majesty's name, of the Governor-General of Canada. It is hereby declared that any Act passed by the Parliament of Canada, whether before or after the passing of this Act, for the purpose mentioned in this Act, or in The British North America Act, 1871, has effect, notwithstanding anything in The British North America Act, 1867, and the number of Senators or the number of Members of the House of Commons specified in the last-mentioned Act is increased by the number of Senators or of Members, as the case may be, provided by any such Act of the Parliament of Canada for the representation of any provinces or territories of Canada.

3. This Act may be cited as The British North America Act, 1886. This Act and The British North America Act, 1867, and The British North America Act, 1871, shall be construed together, and may be cited together as The British North America Acts, 1867 to 1886.

CONSTITUTION OF ENGLAND.—"Our English Constitution was never made, in the sense in which the Constitutions of many other countries have been made. There never was any moment when Englishmen drew out their political system in the shape of a formal document, whether as the carrying out of any abstract political theories or as the imitation of

CONSTITUTION OF ENGLAND

the past or present system of any other nation. There are indeed certain great political documents, each of which forms a landmark in our political history. There is the Great Charter [see ENGLAND: A. D. 1215], the Petition of Rights [same: A. D. 1625-1628, and 1628], the Bill of Rights [same: A. D. 1689 (October)]. But not one of these gave itself out as the enactment of anything new. All claimed to set forth, with new strength, it might be, and with new clearness, those rights of Englishmen which were already old. . . . The life and soul of English law has ever been precedent; we have always held that whatever our fathers once did their sons have a right to do again."—E. A. Freeman, *The Growth of the English Constitution*, ch. 2.—"It is, in the first place, necessary to have a clear understanding of what we mean when we talk about 'the English Constitution.' Few terms in our language have been more laxly employed. . . . Still, the term, 'the English Constitution' is susceptible of full and accurate explanation: though it may not be easy to set it lucidly forth, without first investigating the archaeology of our history, rather more deeply than may suit hasty talkers and superficial thinkers. . . . Some furious Jacobins, at the close of the last century, used to clamour that there was no such thing as the English Constitution, because it could not be produced in full written form, like that of the United States. . . . But an impartial and earnest investigator may still satisfy himself that England has a constitution, and that there is ample cause why she should cherish it. And by this it is meant that he will recognise and admire, in the history, the laws and the institutions of England, certain great leading principles, which have existed from the earliest period of our nationality down to the present time; expanding and adapting themselves to the progress of society and civilization, advancing and varying in development, but still essentially the same in substance and spirit. These great primeval and enduring principles are the principles of the English Constitution. And we are not obliged to learn them from imperfect evidences or precarious speculation; for they are imperishably recorded in the Great Charter, and in Charters and Statutes connected with and confirmatory of Magna Charta [see ENGLAND: A. D. 1215]. . . . These

CONSTITUTION OF FRANCE.

great primeval and enduring principles of our Constitution are as follows: The government of the country by an hereditary sovereign, ruling with limited powers, and bound to summon and consult a parliament of the whole realm, comprising hereditary peers and elective representatives of the commons. That without the sanction of parliament no tax of any kind can be imposed; and no law can be made, repealed, or altered. That no man be arbitrarily fined or imprisoned, that no man's property or liberties be impaired, and that no man be in any way punished, except after a lawful trial. Trial by jury. That justice shall not be sold or delayed. These great constitutional principles can all be proved, either by express terms or by fair implication, from Magna Carta, and its . . . supplement [the statute 'Confirmatio Cartarum']. Their vigorous development was aided and attested in many subsequent statutes, especially in the Petition of Rights and the Bill of Rights. . . . Lord Chatham called these three 'The Bible of the English Constitution,' to which appeal is to be made on every grave political question."—E. S. Creasy, *Rise and Progress of the Eng. Const.*, ch. 1.—"The fact that our constitution has to be collected from statutes, from legal decisions, from observation of the course of conduct of the business of politics; that much of what is written is of a negative sort, stating what the Crown and its ministers cannot do; that there is no part of it which an omnipotent Parliament may not change at will; all this is a puzzle not only to foreign jurists who are prepared to say, with De Tocqueville, that the English constitution does not exist, but to ourselves who are prepared to maintain that it is a monument, if only we can find it, of political sagacity. Those who praise it call it flexible; those who criticise it unstable."—Sir W. R. Anson, *The Law and Custom of the Const.*, pt. 1, p. 35.

A. D. 1875-1889.—The Constitution of the Third Republic.—The circumstances of the framing and adoption in 1875 of the Constitution of the Third Republic will be found narrated under FRANCE: A. D. 1871-1876. The following is the text of the organic law of 1875, with the later amendatory and supplemental enactments, down to July 17, 1889, as translated and edited, with an historical introduction, by Mr. Charles F. A. Currier, and published in the *Annals of the American Academy of Political and Social Science*, March, 1893. It is reproduced here with the kind permission of the President of the Academy, Professor Edmund J. James:

1875. Law on the Organization of the Public Powers. February 25.

ARTICLE 1. The legislative power is exercised by two assemblies: the Chamber of Deputies and the Senate. The Chamber of Deputies is elected by universal suffrage, under the conditions determined by the electoral law.¹ The composition, the method of election, and the powers of the Senate shall be regulated by a special law.²

ART. 2. The President of the Republic is chosen by an absolute majority of votes of the Senate and Chamber of Deputies united in National Assembly. He is elected for seven years. He is re-eligible.

ART. 3. The President of the Republic has the initiative of the laws, concurrently with the members of the two Chambers. He promulgates the laws when they have been voted by the two Chambers; he looks after and secures their execution. He has the right of pardon; amnesty can be granted by law only. He disposes of the armed force. He appoints to all civil and military positions. He presides over national festivals; envoys and ambassadors of foreign powers are accredited to him. Every act of the President of the Republic must be countersigned by a Minister.

ART. 4. As vacancies occur on and after the promulgation of the present law, the President of the Republic appoints, in the Council of Ministers, the Councilors of State in ordinary service. The Councilors of State thus chosen may be dismissed only by decree rendered in the Council of Ministers. The Councilors of State chosen by virtue of the law of May 24, 1872, cannot, before the expiration of their powers, be dismissed except in the manner determined by that law. After the dissolution of the National Assembly, revocation may be pronounced only by resolution of the Senate.

ART. 5. The President of the Republic may, with the advice of the Senate, dissolve the Chamber of Deputies before the legal expiration of its term. [In that case the electoral colleges are summoned for new elections within the space of three months.]³

ART. 6. The Ministers are jointly and severally ('solidairement') responsible to the Chambers for the general policy of the government, and individually for their personal acts. The President of the Republic is responsible in case of high treason only.⁴

ART. 7. In case of vacancy by death or for any other reason, the two Chambers assembled together proceed at once to the election of a new President. In the meantime the Council of Ministers is invested with the executive power.⁵

ART. 8. The Chambers shall have the right by separate resolutions, taken in each by an absolute majority of votes, either upon their own initiative or upon the request of the President of the Republic, to declare a revision of the Constitutional Laws necessary. After each of the two Chambers shall have come to this decision, they shall meet together in National Assembly to proceed with the revision. The acts effecting revision of the constitutional laws, in whole or

in part, must be by an absolute majority of the members composing the National Assembly. [During the continuance, however, of the powers conferred by the law of November 20, 1873, upon Marshal de MacMahon, this revision can take place only upon the initiative of the President of the Republic.]

[ART. 9. The seat of the Executive Power and of the two Chambers is at Versailles.]²

1875. Law on the Organization of the Senate. February 24.

[ARTICLE 1.¹ The Senate consists of three hundred members: Two hundred and twenty-five elected by the departments and colonies, and seventy-five elected by the National Assembly.]

[ART. 2. The departments of the Seine and Nord elect each five senators. The following departments elect four senators each: Seine-Inférieure, Pas-de-Calais, Gironde, Rhône, Finistère, Côtes-du-Nord. The following departments elect three senators each: Loire-Inférieure, Saône-et-Loire, Ile-et-Vilaine, Seine-et-Oise, Isère, Puy-de-Dôme, Somme, Bouches-du-Rhône, Aisne, Loire, Manche, Maine-et-Loire, Morbihan, Dordogne, Haute-Garonne, Charente-Inférieure, Calvados, Sarthe, Hérault, Basses-Pyrénées, Gard, Aveyron, Vendée, Orne, Oise, Vosges, Allier. All the other departments elect two senators each. The following elect one senator each: The Territory of Belfort, the three departments of Algeria, the four colonies: Martinique, Guadeloupe, Réunion and the French Indies.]

[ART. 3. No one can be senator unless he is a French citizen, forty years of age at least, and enjoying civil and political rights.]

[ART. 4. The senators of the departments and colonies are elected by an absolute majority and by 'scrutin de liste', by a college meeting at the capital of the department or colony and composed of: (1) of the deputies; (2) of the general councilors; (3) of the arrondissement councilors; (4) of delegates elected, one by each municipal council, from among the voters of the commune. In the French Indies the members of the colonial council or of the local councils are substituted for the general councilors, arrondissement councilors and delegates from the municipal councils. They vote at the capital of each district.]

[ART. 5. The senators chosen by the Assembly are elected by 'scrutin de liste' and by an absolute majority of votes.]

[ART. 6. The senators of the departments and colonies are elected for nine years and renewable by thirds every three years. At the beginning of the first session the departments shall be divided into three series containing an equal number of senators each. It shall be determined by lot which series shall be renewed at the expiration of the first and second triennial periods.]

[ART. 7. The senators elected by the Assembly are irremovable. Vacancies by death, by resignation, or for any other reason, shall, within the space of two months, be filled by the Senate itself.]

¹ Amended by constitutional law of August 11, 1884, *infra*.

² Repealed by constitutional law of June 21, 1879, *infra*.

³ By the constitutional law of August 14, 1884, it was provided that Articles 1 to 7 of this law should no longer have a constitutional character; and they were repealed by the law of December 9, 1884, *infra*.

¹ See law of November 30, 1875, *infra*.

² See laws of February 24 and August 2, 1875, *infra*.

³ Amended by constitutional law of August 14, 1884, *infra*.

⁴ See Art. 12, law of July 16, 1875, *infra*.

⁵ See Arts. 3 and 11, law of July 16, 1875, *infra*.

ART. 8. The Senate has, concurrently with the Chamber of Deputies, the initiative and passing of laws. Money bills, however, must first be introduced in, and passed by the Chamber of Deputies.

ART. 9. The Senate may be constituted a Court of Justice to judge either the President of the Republic or the Ministers, and to take cognizance of attacks made upon the safety of the State.

ART. 10. Elections to the Senate shall take place one month before the time fixed by the National Assembly for its own dissolution. The Senate shall organize and enter upon its duties the same day that the National Assembly is dissolved.

ART. 11. The present law shall be promulgated only after the passage of the law on the public powers.¹

1875. Law on the Relations of the Public Powers. July 16.

ARTICLE 1. The Senate and the Chamber of Deputies shall assemble each year the second Tuesday of January, unless convened earlier by the President of the Republic. The two Chambers continue in session at least five months each year. The sessions of each begin and end at the same time. [On the Sunday following the opening of the session, public prayers shall be addressed to God in the churches and temples, to invoke His aid in the labors of the Chambers.]²

ART. 2. The President of the Republic pronounces the closure of the session. He may convene the Chambers in extra session. He must convene them if, during the recess, an absolute majority of the members of each Chamber request it. The President may adjourn the Chambers. The adjournment, however, must not exceed one month, nor take place more than twice in the same session.

ART. 3. One month at least before the legal expiration of the powers of the President of the Republic, the Chambers must be called together in National Assembly and proceed to the election of a new President. In default of a summons, this meeting shall take place, as of right, the fifteenth day before the expiration of those powers. In case of the death or resignation of the President of the Republic, the two Chambers shall reassemble immediately, as of right. In case the Chamber of Deputies, in consequence of Article 5 of the law of February 25, 1875, is dissolved at the time when the presidency of the Republic becomes vacant, the electoral colleges shall be convened at once, and the Senate shall reassemble as of right.

ART. 4. Every meeting of either of the two Chambers which shall be held at a time other than the common session of both is illegal and void, except the case provided for in the preceding article, and that when the Senate meets as a court of justice; and in this last case, judicial duties alone shall be performed.

ART. 5. The sittings of the Senate and of the Chamber of Deputies are public. Nevertheless each Chamber may meet in secret session, upon the request of a fixed number of its members, determined by the rules. It decides by absolute majority whether the sitting shall be resumed in public upon the same subject.

¹ i. e., the law of February 25, 1875, *supra*.

² Repealed by law of August 14, 1884, *infra*.

ART. 6. The President of the Republic communicates with the Chambers by messages, which are read from the tribune by a Minister. The Ministers have entrance to both Chambers, and must be heard when they request it. They may be represented, for the discussion of a specific bill, by commissioners designated by decree of the President of the Republic.

ART. 7. The President of the Republic promulgates the laws within the month following the transmission to the Government of the law finally passed. He must promulgate, within three days, laws whose promulgation shall have been declared urgent by an express vote in each Chamber. Within the time fixed for promulgation the President of the Republic may, by a message with reasons assigned, request of the two Chambers a new discussion, which cannot be refused.

ART. 8. The President of the Republic negotiates and ratifies treaties. He communicates them to the Chambers as soon as the interests and safety of the State permit. Treaties of peace, and of commerce, treaties which involve the finances of the State, those relating to the persons and property of French citizens in foreign countries, shall become definitive only after having been voted by the two Chambers. No cession, no exchange, no annexation of territory shall take place except by virtue of a law.

ART. 9. The President of the Republic cannot declare war except by the previous assent of the two Chambers.

ART. 10. Each Chamber is the judge of the eligibility of its members, and of the legality of their election; it alone can receive their resignation.

ART. 11. The bureau¹ of each Chamber is elected each year for the entire session, and for every extra session which may be held before the ordinary session of the following year. When the two Chambers meet together as a National Assembly, their bureau consists of the President, Vice-Presidents and Secretaries of the Senate.

ART. 12. The President of the Republic may be impeached by the Chamber of Deputies only, and tried by the Senate only. The Ministers may be impeached by the Chamber of Deputies for offences committed in the performance of their duties. In this case they are tried by the Senate. The Senate may be constituted a court of Justice, by a decree of the President of the Republic, issued in the Council of Ministers, to try all persons accused of attempts upon the safety of the State. If procedure is begun by the ordinary courts, the decree convening the Senate may be issued any time before the granting of a discharge. A law shall determine the method of procedure for the accusation, trial and judgment.²

ART. 13. No member of either Chamber shall be prosecuted or held responsible on account of any opinions expressed or votes cast by him in the performance of his duties.

ART. 14. No member of either Chamber shall, during the session, be prosecuted or arrested for any offence or misdemeanor, except on the authority of the Chamber of which he is a

¹ The bureau of the Senate consists of a president, four vice-presidents, six secretaries and three questors; the bureau of the Chamber of Deputies is the same, except that there are eight secretaries instead of six.

² Fixed by law of April 10, 1889.

member, unless he be caught in the very act. The detention or prosecution of a member of either Chamber is suspended for the session, and for its [the Chamber's] entire term, if it demands it.

1879. Law Revising Article 9 of the Constitutional Law of February 25, 1875. June 21.

Article 9 of the constitutional law of February 25, 1875, is repealed.

1884. Law Partially Revising the Constitutional Laws, August 14.

ARTICLE 1. Paragraph 2 of Article 5 of the constitutional law of February 25, 1875, on the Organization of the Public Powers, is amended as follows: "In that case the electoral colleges meet for new elections within two months, and the Chamber within the ten days following the close of the elections."

ART. 2. To Paragraph 3 of Article 8 of the same law of February 25, 1875, is added the following: "The Republican form of the Government cannot be made the subject of a proposed revision. Members of families that have reigned in France are ineligible to the presidency of the Republic."

ART. 3. Articles 1 to 7 of the constitutional law of February 24, 1875, on the Organization of the Senate, shall no longer have a constitutional character.¹

ART. 4. Paragraph 3 of Article 1 of the constitutional law of July 16, 1875, on the Relation of the Public Powers, is repealed.

1875. Law on the Election of Senators. August 2.

ARTICLE 1. A decree of the President of the Republic, issued at least six weeks in advance, determines the day for the elections to the Senate, and at the same time that for the choice of delegates of the municipal councils. There must be an interval of at least one month between the choice of delegates and the election of senators.

ART. 2. Each municipal council elects one delegate. The election is without debate, by secret ballot, and by an absolute majority of votes. After two ballots a plurality is sufficient, and in case of an equality of votes, the oldest is declared elected. If the Mayor is not a member of the municipal council, he presides, but shall not vote.² On the same day and in the same way an alternate is elected, who takes the place of the delegate in case of refusal or inability to serve.³ The choice of the municipal councils shall not extend to a deputy, a general councilor, or an arrondissement councilor.⁴ All communal electors, including the municipal councilors, are eligible without distinction.

ART. 3. In the communes where a municipal committee exists, the delegate and alternate shall be chosen by the old council.⁵

ART. 4. If the delegate was not present at the election, the Mayor shall see to it that he is notified within twenty-four hours. He must transmit to the Prefect, within five days, notice of his acceptance. In case of refusal or silence, he is replaced by the alternate, who is then placed upon the list as the delegate of the commune.⁶

¹ And may therefore be amended by ordinary legislation. See the law of December 9, 1884, *infra*.

² Amended by Art. 8, law of December 9, 1884, *infra*.

³ See Art. 4, law of February 24, 1875, *supra*.

⁴ See Art. 8, law of December 9, 1884, *infra*.

ART. 5. The official report of the election of the delegate and alternate is transmitted at once to the Prefect; it states the acceptance or refusal of the delegates and alternates, as well as the protests raised, by one or more members of the municipal council, against the legality of the election. A copy of this official report is posted on the door of the town hall.¹

ART. 6. A statement of the results of the election of delegates and alternates is drawn up within a week by the Prefect; this is given to all requesting it, and may be copied and published. Every elector may, at the bureaux of the prefecture, obtain information and a copy of the list, by communes, of the municipal councilors of the department, and, at the bureaux of the sub-prefectures a copy of the list, by communes, of the municipal councilors of the arrondissement.

ART. 7. Every communal elector may, within three days, address directly to the Prefect a protest against the legality of the election. If the Prefect deems the proceedings illegal, he may request that they be set aside.

ART. 8. Protests concerning the election of the delegate or alternate are decided, subject to an appeal to the Council of State, by the council of the prefecture, and, in the colonies, by the privy council. A delegate whose election is annulled because he does not satisfy the conditions demanded by law, or on account of informality, is replaced by the alternate. In case the election of the delegate and alternate is rendered void, as by the refusal or death of both after their acceptance, new elections are held by the municipal council on a day fixed by an order of the Prefect.¹

ART. 9. Eight days, at the latest, before the election of senators, the Prefect, and, in the colonies, the Director of the Interior, arranges the list of the electors of the department in alphabetical order. The list is communicated to all demanding it, and may be copied and published. No elector has more than one vote.

ART. 10. The deputies, the members of the general council, or of the arrondissement councils, who have been announced by the returning committees, but whose powers have not been verified, are enrolled upon the list of electors and are allowed to vote.

ART. 11. In each of the three departments of Algeria the electoral college is composed: (1) of the deputies; (2) of the members of the general councils, of French citizenship; (3) of delegates elected by the French members of each municipal council from among the communal electors of French citizenship.

ART. 12. The electoral college is presided over by the President of the civil tribunal of the capital of the department or colony. The President is assisted by the two oldest and two youngest electors present at the opening of the meeting. The bureau thus constituted chooses a secretary from among the electors. If the President is prevented [from presiding] his place is taken by the Vice-President [of the civil tribunal], and, in his absence, by the oldest justice.

ART. 13. The bureau divides the electors in alphabetical order into sections of at least one hundred voters each. It appoints the President

¹ See Art. 8, law of December 9, 1884, *infra*.

and Inspectors of each of these sections. It decides all questions and contests which may arise in the course of the election, without, however, power to depart from the decisions rendered by virtue of Article 8 of the present law.

ART. 14. The first ballot begins at eight o'clock in the morning and closes at noon. The second begins at two o'clock and closes at four o'clock. The third, if it takes place, begins at six o'clock and closes at eight o'clock. The results of the ballotings are determined by the bureau and announced the same day by the President of the electoral college.¹

ART. 15. No one is elected senator on either of the first two ballots unless he receives: (1) an absolute majority of the votes cast; and (2) a number of votes equal to one-fourth of the total number of electors registered. On the third ballot a plurality is sufficient, and, in case of an equality of votes, the oldest is elected.

ART. 16. Political meetings for the nomination of senators may take place conformably to the rules laid down by the law of June 6, 1868² subject to the following conditions: I. These meetings may be held from the date of the election of delegates up to the day of the election [of senators] inclusive; II. They must be preceded by a declaration made, at latest, the evening before, by seven senatorial electors of the arrondissement, and indicating the place, the day and the hour the meeting is to take place, and the names, occupation and residence of the candidates to be presented; III. The municipal authorities will see to it that no one is admitted to the meeting unless he is a deputy, general councilor, arrondissement councilor, delegate or candidate. The delegate will present, as a means of identification, a certificate from the Mayor of his commune, the candidate a certificate from the official who shall have received the declaration mentioned in the preceding paragraph.³

ART. 17. Delegates who take part in all the ballotings shall, if they demand it, receive from the State, upon the presentation of their letter of summons, countersigned by the President of the electoral college, a remuneration for traveling expenses, which shall be paid to them upon the same basis and in the same manner as that given to jurors by Articles 35, 90 and following, of the decree of June 18, 1811. A public administrative regulation shall determine the method of fixing the amount and the method of payment of this remuneration.⁴

ART. 18. Every delegate who, without lawful reason, shall not take part in all the ballotings, or, having been hindered, shall not have given notice to the alternate in sufficient season, shall, upon the demand of the public prosecutor, be punished by a fine of fifty francs by the civil tribunal of the capital.⁴ The same penalty may be imposed upon the alternate who, after having been notified by letter, telegram, or notice personally delivered in due season, shall not have taken part in the election.

ART. 19. Every attempt at corruption by the employment of means enumerated in Articles 177 and following, of the Penal Code, to influ-

¹ See Art. 8, law of December 9, 1884, *infra*.

² This law has been superseded by a law of June 30, 1881.

³ Done by decree of December 26, 1875.

⁴ Of the department.

ence the vote of an elector, or to keep him from voting, shall be punished by imprisonment of from three months to two years, and a fine of from fifty to five hundred francs, or by one of these two penalties alone. Article 463 of the Penal Code shall apply to the penalties imposed by the present article.¹

ART. 20. It is incompatible for a senator to be: I. Councilor of State, Maitre de Requêtes, Prefect or Sub-Prefect, except Prefect of the Seine and Prefect of Police; II. Member of the courts of appeal ("appel,"²) or of the tribunals of first instance, except public prosecutor at the court of Paris; III. General Paymaster, Special Receiver, official or employé of the central administration of the ministries.

ART. 21. The following shall not be elected by the department or the colony included wholly or partially in their jurisdiction, during the exercise of their duties and during the six months following the cessation of their duties by resignation, dismissal, change of residence, or other cause: I. The First Presidents, Presidents, and members of the courts of appeal ("appel"); II. The Presidents, Vice-Presidents, Examining Magistrates, and members of the tribunals of first instance; III. The Prefect of Police; Prefects and Sub-Prefects, and Prefectorial General Secretaries; the Governors, Directors of the Interior, and General Secretaries of the Colonies; IV. The Chief Arrondissement Engineers and Chief Arrondissement Road-Surveyors; V. The School Rectors and Inspectors; VI. The Primary School Inspectors; VII. The Archbishops, Bishops, and Vicars General; VIII. The officers of all grades of the land and naval force; IX. The Division Commissaries and the Military Deputy Commissaries; X. The General Paymasters and Special Receivers of Money; XI. The Supervisors of Direct and Indirect Taxes, of Registration of Lands and of Posts; XII. The Guardians and Inspectors of Forests.

ART. 22. A senator elected in several departments, must let his choice be known to the President of the senate within ten days following the verification of the elections. If a choice is not made in this time, the question is settled by lot in open session. The vacancy shall be filled within one month and by the same electoral body. The same holds true in case of an invalidated election.

ART. 23. If by death or resignation the number of senators of a department is reduced by one-half, the vacancies shall be filled within the space of three months, unless the vacancies occur within the twelve months preceding the triennial elections. At the time fixed for the triennial elections, all vacancies shall be filled which have occurred, whatever their number and date.¹

[ART. 24. The election of senators chosen by the National Assembly takes place in public sitting, by "scrutin de liste," and by an absolute majority of votes, whatever the number of ballotings.

ART. 25. When it is necessary to elect successors of senators chosen by virtue of Article 7 of the law of February 24, 1875, the Senate pro-

¹ See Article 8, law of December 9, 1884, *infra*.

² France is divided into twenty-six judicial districts, in each of which there is a *cour d'appel*. There are similar courts in Algeria and the colonies. The *Cour de Cassation* is the supreme court of appeal for all France, Algeria and the colonies.

ceeds in the manner indicated in the preceding article].¹

ART. 26. Members of the Senate receive the same salary as members of the Chamber of Deputies.²

ART. 27. There are applicable to elections to the Senate all the provisions of the electoral law relating: I. to cases of unworthiness and incapacity; II. to offences, prosecutions, and penalties; III. to election proceedings, in all respects not contrary to the provisions of the present law.

Temporary Provisions.

ART. 28. For the first election of members of the Senate, the law which shall determine the date of the dissolution of the National Assembly shall fix, without regard to the intervals established by Article 1, the date on which the municipal councils shall meet for the election of delegates and the day for the election of Senators. Before the meeting of the municipal councils, the National Assembly shall proceed to the election of those Senators whom it is to choose.

ART. 29. The provisions of Article 21, by which an interval of six months must elapse between the cessation of duties and election, shall not apply to officials, except Prefects and Sub-Prefects, whose duties shall have ceased either before the promulgation of the present law or within twenty days following.

1875. Law on the Election of Deputies.³ November 30.

ARTICLE 1. The deputies shall be chosen by the voters registered: I. upon the lists drawn up in accordance with the law of July 7, 1874; II. upon the supplementary list including those who have lived in the commune six months. Registration upon the supplementary list shall take place conformably to the laws and regulations now governing the political electoral lists, by the committees and according to the forms established by Articles 1, 2 and 3 of the law of July 7, 1874. Appeals relating to the formation and revision of either list shall be carried directly before the Civil Chamber of the Court of Appeal ("Cassation"). The electoral lists drawn up March 31, 1875, shall serve until March 31, 1876.

ART. 2. The soldiers of all ranks and grades, of both the land and naval forces, shall not vote when they are with their regiment, at their post or on duty. Those who, on election day, are in private residence, in non-activity or in possession of a regular leave of absence, may vote in the commune on the lists of which they are duly registered. This last provision applies equally to officers on the unattached list or on the reserve list.

ART. 3. During the electoral period, circulars and platforms ("professions de foi") signed by the candidates, placards and manifestoes signed by one or more voters, may, after being deposited with the public prosecutor, be posted and distributed without previous authorization. The distribution of ballots is not subjected to this deposit.⁴ Every public or municipal official is forbidden to distribute ballots, platforms and circu-

lars of candidates. The provisions of Article 19 of the organic law of August 2, 1875, on the elections of Senators, shall apply to the elections of deputies.

ART. 4. Balloting shall continue one day only. The voting occurs at the chief place of the commune; each commune may nevertheless be divided, by order of the Prefect, into as many sections as may be demanded by local circumstances and the number of voters. The second ballot shall take place the second Sunday following the announcement of the first ballot, according to the provisions of Article 65, of the law of March 15, 1849.

ART. 5. The method of voting shall be according to the provisions of the organic and regulating decrees of February 2, 1852. The ballot is secret. The voting lists used at the elections in each section, signed by the President and Secretary, shall remain deposited for eight days at the Secretary's office at the town hall, where they shall be communicated to every voter requesting them.

ART. 6. Every voter is eligible, without any tax qualification, at the age of twenty-five years.

ART. 7. No soldier or sailor forming part of the active forces of land or sea may, whatever his rank or position, be elected a member of the Chamber of Deputies. This provision applies to soldiers and sailors on the unattached list or in non-activity, but does not extend to officers of the second section of the list of the general staff, nor to those who, kept in the first section for having been commander-in-chief in the field, have ceased to be employed actively, nor to officers who, having privileges acquired on the retired list, are sent to or maintained at their homes while awaiting the settlement of their pension. The decision by which the officer shall have been permitted to establish his rights on the retired list shall become, in this case, irrevocable. The rule laid down in the first paragraph of the present Article shall not apply to the reserve of the active army nor to the territorial army.

ART. 8. The exercise of public duties paid out of the treasury of the State is incompatible with the office of deputy. Consequently every official elected deputy shall be superseded in his duties if, within the eight days following the verification of powers, he has not signified that he does not accept the office of deputy. There are excepted from the preceding provisions the duties of Minister, Under Secretary of State, Ambassador, Minister Plenipotentiary, Prefect of the Seine, Prefect of Police, First President of the Court of Appeal ("cassation,"), First President of the Court of Accounts, First President of the Court of Appeal ("appel") of Paris, Attorney General at the Court of Appeal ("cassation,"), Attorney General at the Court of Accounts, Attorney General at the Court of Appeal ("appel") of Paris, Archbishop and Bishop, Consistorial Presiding Pastor in consistorial districts whose capital has two or more pastors, Chief Rabbi of the Central consistory, Chief Rabbi of the Consistory of Paris.

ART. 9. There are also excepted from the provisions of Article 8: I. titular professors of chairs which are filled by competition or upon the nomination of the bodies where the vacancy occurs; II. persons who have been charged with a temporary mission. All missions continuing more than six months cease to be temporary and are governed by Article 8 above.

¹ Articles 24 and 25 repealed by law of December 9, 1884, *infra*.

² See Article 17, law of November 30, 1875, *infra*.

³ See, *infra*, the laws of June 16, 1885, and February 13, 1889, amending the electoral law.

⁴ See, however, a law of December 20, 1878, by which deposit is made necessary.

CONSTITUTION OF FRANCE.

ART. 10. The official preserves the rights which he has acquired to a retiring pension, and may, after the expiration of his term of office, be restored to active service. The civil official who, having had twenty years of service at the date of the acceptance of the office of deputy, and shall be fifty years of age at the time of the expiration of this term of office, may establish his rights to an exceptional retiring pension. This pension shall be regulated according to the third Paragraph of Article 12 of the law of June 9, 1853. If the official is restored to active service after the expiration of his term of office, the provisions of Article 3, Paragraph 2, and Article 28 of the law of June 9, 1853, shall apply to him. In duties where the rank is distinct from the employment, the official, by the acceptance of the office of deputy, loses the employment and preserves the rank only.

ART. 11. Every deputy appointed or promoted to a salaried public position ceases to belong to the Chamber by the very fact of his acceptance; but he may be re-elected, if the office which he occupies is compatible with the office of deputy. Deputies who become Ministers or Under-Secretaries of State are not subjected to a re-election.

ART. 12. There shall not be elected by the arrondissement or the colony included wholly or partially in their jurisdiction, during the exercise of their duties or for six months following the expiration of their duties due to resignation, dismissal, change of residence, or any other cause: I. The First-Presidents, Presidents, and members of the Courts of Appeal ("appel"); II. The Presidents, Vice-Presidents, Titular Judges, Examining Magistrates, and members of the tribunals of first instance; III. The Prefect of Police; the Prefects and General Secretaries of the Prefectures; the Governors, Directors of the Interior, and General Secretaries of the Colonies; IV. The Chief Arrondissement Engineers and Chief Arrondissement Road-Surveyors; V. The School Rectors and Inspectors; VI. The Primary School Inspectors; VII. The Archbishops, Bishops, and Vicars General; VIII. The General Paymasters and Special Receivers of Money; IX. The Supervisors of Direct and Indirect Taxes, of Registration of Lands, and of Posts; X. The Guardians and Inspectors of Forests. The Sub-Prefects shall not be elected in any of the arrondissements of the department where they perform their duties.

ART. 13. Every imperative mandate is null and void.

ART. 14. Members of the Chamber of Deputies are elected by single districts. Each administrative arrondissement shall elect one deputy. Arrondissements having more than 100,000 inhabitants shall elect one deputy in addition for every additional 100,000 inhabitants or fraction of 100,000. Arrondissements of this kind shall be divided into districts whose boundaries shall be established by law and may be changed only by law.

ART. 15. Deputies shall be chosen for four years. The Chamber is renewable integrally.

ART. 16. In case of vacancy by death, resignation, or otherwise, a new election shall be held within three months of the date when the vacancy occurred. In case of option,¹ the vacancy shall be filled within one month.

¹ I. e., when a deputy had been elected from two or more districts.

CONSTITUTION OF FRANCE.

ART. 17. The deputies shall receive a salary. This salary is regulated by Articles 96 and 97 of the law of March 15, 1849, and by the provisions of the law of February 16, 1872.

ART. 18. No one is elected on the first ballot unless he receives: (1) an absolute majority of the votes cast; (2) a number of votes equal to one-fourth of the number of voters registered. On the second ballot a plurality is sufficient. In case of an equality of votes, the oldest is declared elected.

ART. 19. Each department of Algeria elects one deputy.

ART. 20. The voters living in Algeria in a place not yet made a commune, shall be registered on the electoral list of the nearest commune. When it is necessary to establish electoral districts, either for the purpose of grouping mixed communes in each of which the number of voters shall be insufficient, or to bring together voters living in places not formed into communes the decrees for fixing the seat of these districts shall be issued by the Governor-General, upon the report of the Prefect or of the General commanding the division.

ART. 21. The four colonies to which senators have been assigned by the law of February 24, 1875, on the organization of the Senate, shall choose one deputy each.

ART. 22. Every violation of the prohibitive provisions of Article 3, Paragraph 3, of the present law shall be punished by a fine of from sixteen francs to three hundred francs. Nevertheless the criminal courts may apply Article 463 of the Penal Code. The provisions of Article 6 of the law of July 7, 1874, shall apply to the political electoral lists. The decree of January 29, 1871, and the laws of April 10, 1871, May 2, 1871, and February 18, 1873, are repealed. Paragraph 11 of Article 15 of the organic decree of February 2, 1852, is also repealed, in so far as it refers to the law of May 21, 1836, on lotteries, reserving, however, to the courts the right to apply to convicted persons Article 42 of the Penal Code. The provisions of the laws and decrees now in force, with which the present law does not conflict, shall continue to be applied.

ART. 23. The provision of Article 12 of the present law by which an interval of six months must elapse between the expiration of duties and election, shall not apply to officials, except Prefects and Sub-Prefects, whose duties shall have ceased either before the promulgation of the present law or within the twenty days following it.

1879. Law Relating to the Seat of the Executive Power and of the Chambers at Paris. July 22.

ARTICLE 1. The seat of the Executive Power and of the two Chambers is at Paris.

ART. 2. The Palace of the Luxemburg and the Palais-Bourbon are assigned, the first to the use of the Senate, the second to that of the Chamber of Deputies. Nevertheless each of the Chambers is authorized to choose, in the city of Paris, the palace which it wishes to occupy.

ART. 3. The various parts of the palace of Versailles now occupied by the Senate and Chamber of Deputies preserve their arrangements. Whenever, according to Articles 7 and 8 of the law of February 25, 1875, on the organization of the public powers, a meeting of the National Assem-

bly takes place, it shall sit at Versailles, in the present hall of the Chamber of Deputies. Whenever, according to Article 9 of the law of February 24, 1875, on the organization of the Senate, and Article 12 of the constitutional law of July 16, 1875, on the relations of the public powers, the Senate shall be called upon to constitute itself a Court of Justice, it shall indicate the town and place where it proposes to sit.

ART. 4. The Senate and Chamber of Deputies will sit at Paris on and after November 3 next.

ART. 5. The Presidents of the Senate and Chamber of Deputies are charged with the duty of securing the external and internal safety of the Chambers over which they preside. To this end they have the right to call upon the armed force and every authority whose assistance they judge necessary. The demands may be addressed directly to all officers, commanders, or officials, who are bound to obey immediately, under the penalties established by the laws. The Presidents of the Senate and Chamber of Deputies may delegate to the questors or to one of them their right of demanding aid.

ART. 6. Petitions to either of the Chambers can be made and presented in writing only. It is forbidden to present them in person or at the bar.

ART. 7. Every violation of the preceding article, every provocation, by speeches uttered publicly, or by writings, or printed matter, posted or distributed, to a crowd upon the public ways, having for an object the discussion, drawing up, or carrying to the Chambers or either of them, of petitions, declarations, or addresses—whether or not any results follow such action—shall be punished by the penalties enumerated in Paragraph 1 of Article 5 of the law of June 7, 1848.

ART. 8. The preceding provisions do not diminish the force of the law of June 7, 1848, on riotous assemblies.

ART. 9. Article 463 of the Penal Code applies to the offences mentioned in the present law.

1884. Law Amending the Organic Laws on the Organization of the Senate and the Elections of Senators. December 9.

ARTICLE 1. The Senate consists of three hundred members, elected by the departments and the colonies. The present members, without any distinction between senators elected by the National Assembly or the Senate and those elected by the departments and colonies, maintain their term of office during the time for which they have been chosen.

ART. 2. The department of the Seine elects ten senators. The department of the Nord elects eight senators. The following departments elect five senators each: Côtes-du-Nord, Finistère, Gironde, Ille-et-Vilaine, Loire, Loire-Inférieure, Pas-de-Calais, Rhône, Saône-et-Loire, Seine-Inférieure. The following departments elect four senators each: Aisne, Bouches-du-Rhône, Charente-Inférieure, Dordogne, Haute-Garonne, Isère, Maine-et-Loire, Manche, Morbihan, Puy-de-Dôme, Seine-et-Oise, Somme. The following departments elect three senators each: Ain, Allier, Ardèche, Ardennes, Aube, Aude, Aveyron, Calvados, Charente, Cher, Corrèze, Corse, Côte-d'Or, Creuse, Doubs, Drôme, Eure, Eure-et-Loir, Gard, Gers, Hérault, Indre, Indre-et-Loire, Jura, Landes, Loir-et-Cher, Haute-Loire, Loiret, Lot, Lot-et-Garonne, Marne, Haute-Marne, Mayenne, Meurthe-et-Moselle, Meuse, Nièvre,

Oise, Orne, Basses-Pyrénées, Haute-Saône, Sarthe, Savoie, Haute-Savoie, Seine-et-Marne, Deux-Sèvres, Tarn, Var, Vendée, Vienne, Haute-Vienne, Vosges, Yonne. The following departments elect two senators each: Basses-Alpes, Hautes-Alpes, Alpes-Maritimes, Ariège, Cantal, Lozère, Hautes-Pyrénées, Pyrénées-Orientales, Tarn-et-Garonne, Vaucluse. The following elect one senator each: the Territory of Belfort, the three departments of Algeria, the four colonies: Martinique, Guadeloupe, Réunion and French Indies.

ART. 3. In the departments where the number of senators is increased by the present law, the increase shall take effect as vacancies occur among the life senators. To this end, within eight days after the vacancy occurs, it shall be determined by lot what department shall be called upon to elect a senator. This election shall take place within three months of the determination by lot. Furthermore, if the vacancy occurs within six months preceding the triennial election, the vacancy shall be filled at that election. The term of office in this case shall expire at the same time as that of the other senators belonging to the same department.

ART. 4. No one shall be a senator unless he is a French citizen, forty years of age, at least, and enjoying civil and political rights. Members of families that have reigned in France are ineligible to the Senate.

ART. 5. The soldiers of the land and naval forces cannot be elected senators. There are excepted from this provision: I. The Marshals and Admirals of France; II. The general officers maintained without limit of age in the first section of the list of the general staff and not provided with a command; III. The general officers placed in the second section of the list of the general staff; IV. Soldiers of the land and naval forces who belong either to the reserve of the active army or to the territorial army.

ART. 6. Senators are elected by "scrutin de liste," by a college meeting at the capital of the department or colony, and composed: (1) of the Deputies; (2) of the General Councilors; (3) of the Arrondissement Councilors; (4) of delegates elected from among the voters of the commune, by each Municipal Council. Councils composed of ten members shall elect one delegate. Councils composed of twelve members shall elect two delegates. Councils composed of sixteen members shall elect three delegates. Councils composed of twenty-one members shall elect six delegates. Councils composed of twenty-three members shall elect nine delegates. Councils composed of twenty-seven members shall elect twelve delegates. Councils composed of thirty members shall elect fifteen delegates. Councils composed of thirty-two members shall elect eighteen delegates. Councils composed of thirty-four members shall elect twenty-one delegates. Councils composed of thirty-six members or more shall elect twenty-four delegates. The Municipal Council of Paris shall elect thirty delegates. In the French Indies the members of the local councils take the place of Arrondissement Councilors. The Municipal Council of Pondichéry shall elect five delegates. The Municipal Council of Karikal shall elect three delegates. All the other communes shall elect two delegates each. The balloting takes place at the capital of each district.

ART. 7. Members of the Senate are elected for nine years. The Senate is renewed every three years according to the order of the present series of departments and colonies.

ART. 8. Articles 2 (paragraphs 1 and 2), 3, 4, 5, 8, 14, 16, 19 and 23 of the organic law of August 2, 1875, on the Elections of Senators are amended as follows: "Art. 2 (paragraphs 1 and 2). In each Municipal Council the election of delegates takes place without debate and by secret ballot, by "scrutin de liste" and by an absolute majority of votes cast. After two ballots a plurality is sufficient, and in case of an equality of votes the oldest is elected. The procedure and method is the same for the election of alternates. Councils having one, two, or three delegates to choose shall elect one alternate. Those choosing six or nine delegates elect two alternates. Those choosing twelve or fifteen delegates elect three alternates. Those choosing eighteen or twenty-one delegates elect four alternates. Those choosing twenty-four delegates elect five alternates. The Municipal Council of Paris elects eight alternates. The alternates take the place of delegates in case of refusal or inability to serve, in the order determined by the number of votes received by each of them. Art. 3. In communes where the duties of a Municipal Council are performed by a special delegation organized by virtue of Article 44 of the law of April 5, 1884, the senatorial delegates and alternates shall be chosen by the old council. Art. 4. If the delegates were not present at the election, notice is given them by the Mayor within twenty-four hours. They must within five days notify the Prefect of their acceptance. In case of declination or silence they shall be replaced by the alternates, who are then placed upon the list as the delegates of the commune. Art. 5. The official report of the election of delegates and alternates is transmitted at once to the Prefect. It indicates the acceptance or declination of the delegates and alternates, as well as the protests made by one or more members of the Municipal Council against the legality of the election. A copy of this official report is posted on the door of the town hall. Art. 8. Protests concerning the election of delegates or alternates are decided, subject to an appeal to the Council of State, by the Council of the Prefecture, and, in the colonies, by the Privy Council. Delegates whose election is set aside because they do not satisfy the conditions demanded by law, or because of informality, are replaced by the alternates. In case the election of a delegate and of an alternate is rendered void, as by the refusal or death of both after their acceptance, new elections are held by the Municipal Council on a day fixed by decree of the Prefect. Art. 14. The first ballot begins at eight o'clock in the morning and closes at noon. The second begins at two o'clock and closes at four o'clock. The third begins at seven o'clock and closes at ten o'clock. The results of the ballotings are determined by the bureau and announced immediately by the President of the electoral college. Art. 16. Political meetings for the nomination of senators may be held from the date of the promulgation of the decree summoning the electors up to the day of the election inclusive. The declaration prescribed by Article 2 of the law of June 30, 1881, shall be made by two voters, at least. The forms and regulations

of this Article, as well as those of Article 3, shall be observed. The members of Parliament elected or electors in the department, the senatorial electors, delegates and alternates, and the candidates, or their representatives, may alone be present at these meetings. The municipal authorities will see to it that no other person is admitted. Delegates and alternates shall present as a means of identification a certificate from the Mayor of the commune; candidates or their representatives a certificate from the official who shall have received the declaration mentioned in Paragraph 2. Art. 19. Every attempt at corruption or constraint by the employment of means enumerated in Articles 177 and following of the Penal Code, to influence the vote of an elector or to keep him from voting, shall be punished by imprisonment of from three months to two years, and by a fine of from fifty francs to five hundred francs, or by one of these penalties alone. Article 463 of the Penal Code is applicable to the penalties provided for by the present article. Art. 23. Vacancies caused by the death or resignation of senators shall be filled within three months; moreover, if the vacancy occurs within the six months preceding the triennial elections, it shall be filled at those elections."

ART. 9. There are repealed: (1) Articles 1 to 7 of the law of February 24, 1875, on the organization of the Senate; (2) Articles 24 and 25 of the law of August 2, 1875, on the elections of senators.

Temporary Provision.

In case a special law on parliamentary incompatibilities shall not have been passed at the date of the next senatorial elections, Article 8, of the law of November 30, 1875, shall apply to those elections. Every official affected by this provision, who has had twenty years of service and is fifty years of age at the date of his acceptance of the office [of senator], may establish his right to a proportional retiring pension, which shall be governed by the third paragraph of Article 12, of the law of June 9, 1853.

1885. Law Amending the Electoral Law. June 16.

[ARTICLE 1.¹ The members of the Chamber of Deputies are elected by "scrutin de liste."

ART. 2. Each department elects the number of deputies assigned to it in the table² annexed to the present law, on the basis of one deputy for seventy thousand inhabitants, foreign residents not included. Account shall be taken, nevertheless, of every fraction smaller than seventy thousand.³ Each department elects at least three deputies. Two deputies are assigned to the territory of Belfort, six to Algeria, and ten to the colonies, as is indicated by the table. This table can be changed by law only.

ART. 3. The department forms a single electoral district.]

ART. 4. Members of families that have reigned in France are ineligible to the Chamber of Deputies.

ART. 5. No one is elected on the first ballot unless he receives: (1) an absolute majority of

¹ Articles 1, 2 and 3 repealed by the law of February 13, 1889, *infra*.

² This table may be found in the *Bulletin des Lois*, twelfth series, No. 15,518; and in the *Journal Officiel* for June 17, 1885, p. 3974.

³ *i. e.*, fractions of less than 70,000 are entitled to a deputy.

CONSTITUTION OF FRANCE.

the votes cast; (2) a number of votes equal to one-fourth of the total number of voters registered. On the second ballot a plurality is sufficient. In case of an equality of votes, the oldest of the candidates is declared elected.

ART. 6. Subject to the case of a dissolution foreseen and regulated by the Constitution, the general elections take place within sixty days preceding the expiration of the powers of the Chamber of Deputies.

ART. 7. Vacancies shall not be filled which occur in the six months preceding the renewal of the Chamber.

1887. Law on Parliamentary Incompatibilities. December 26.

Until the passage of a special law on parliamentary incompatibilities, Articles 8 and 9 of the law of November 30, 1875, shall apply to senatorial elections. Every official affected by this provision who has had twenty years of service and is fifty years of age at the time of his acceptance of the office [of senator], may establish his rights to a proportional retiring pension, which shall be governed by the third paragraph of Article 12 of the law of June 9, 1853.

1889. Law Re-establishing Single Districts for the Election of Deputies. February 13.

ARTICLE 1. Articles 1, 2 and 3 of the law of June 16, 1885, are repealed.

ART. 2. Members of the Chamber of Deputies are elected by single districts. Each administrative arrondissement in the departments, and each municipal arrondissement at Paris and at Lyons, elects one deputy. Arrondissements whose population exceeds one hundred thousand inhabitants elect an additional deputy for every one hundred thousand or fraction of one hundred thousand inhabitants. The arrondissements are in this case divided into districts, a table¹ of which is annexed to the present law and can be changed by a law only.

¹ This table may be found in the *Journal Officiel* for February 14, 1889, pp. 76 and following; and in the *Bulletin des Lois*, twelfth series, No. 20,475.

CONSTITUTION OF GERMANY.

ART. 3. One deputy is assigned to the territory of Belfort, six to Algeria, and ten to the colonies, as is indicated by the table.

ART. 4. On and after the promulgation of the present law, until the renewal of the Chamber of Deputies, vacancies occurring in the Chamber of Deputies shall not be filled.

1889. Law on Multiple Candidatures. July 17.

ARTICLE 1. No one may be a candidate in more than one district.

ART. 2. Every citizen who offers himself or is offered at the general or partial elections must, by a declaration signed or countersigned by himself, and duly legalized, make known in what district he means to be a candidate. This declaration is deposited, and a provisional receipt obtained therefor, at the Prefecture of the department concerned, the fifth day, at latest, before the day of election. A definitive receipt shall be delivered within twenty-four hours.

ART. 3. Every declaration made in violation of Article 1 of the present law is void and not to be received. If declarations are deposited by the same citizen in more than one district, the earliest in date is alone valid. If they bear the same date, all are void.

ART. 4. It is forbidden to sign or post placards, to carry or distribute ballots, circulars, or platforms in the interest of a candidate who has not conformed to the requirements of the present law.

ART. 5. Ballots bearing the name of a citizen whose candidacy is put forward in violation of the present law shall not be included in the return of votes. Posters, placards, platforms, and ballots posted or distributed to support a candidacy in a district where such candidacy is contrary to the law, shall be removed or seized.

ART. 6. A fine of ten thousand francs shall be imposed on the candidate violating the provisions of the present law, and one of five thousand francs on all persons acting in violation of Article 4 of the present law.

CONSTITUTION OF GERMANY.

13th-17th Centuries.—The Old (Holy Roman) Empire.—The Golden Bull. See GERMANY: A. D. 1125-1152; 1347-1493; and DIET, THE GERMANIC.

A. D. 1815.—The Confederation. See GERMANY: A. D. 1814-1820.

A. D. 1871.—The New Empire.—On the 18th day of January, 1871; at Versailles, King William of Prussia assumed the title of German Emperor. On the 16th of April following the Emperor issued a proclamation, by and with the consent of the Council of the German Confederation, and of the Imperial Diet, decreeing the adoption of a constitution for the Empire. See GERMANY: A. D. 1871 (JANUARY) and (APRIL). The following is a translation of the text of the Constitution, as transmitted by the American Minister at Berlin to his Government:

His Majesty the King of Prussia, in the name of the North German Union, His Majesty the King of Bavaria, His Majesty the King of Württemberg, His Royal Highness the Grand Duke of Baden, and His Royal Highness the Grand Duke of Hesse, and by Rhine for those

parts of the Grand Duchy of Hesse which are situated south of the Main, conclude an eternal alliance for the protection of the territory of the confederation, and of the laws of the same, as well as for the promotion of the welfare of the German people. This confederation shall bear the name of the German Empire, and shall have the following constitution.

I.—Territory.

Article 1. The territory of the confederation shall consist of the States of Prussia, with Lauenburg, Bavaria, Saxony, Württemberg, Baden, Hesse, Mecklenburg-Schwerin, Saxe-Weimar, Mecklenburg-Strelitz, Oldenburg, Brunswick, Saxe-Meiningen, Saxe-Altenburg, Saxe-Coburg-Gotha, Anhalt, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Waldeck, Reuss of the elder branch, Reuss of the younger branch, Schaumburg-Lippe, Lippe, Lubeck, Bremen, and Hamburg.

II.—Legislation of the Empire.

Article 2. Within this territory the Empire shall have the right of legislation according to the provisions of this constitution, and the laws

of the Empire shall take precedence of those of each individual state. The laws of the Empire shall be rendered binding by imperial proclamation, such proclamation to be published in a journal devoted to the publication of the laws of the Empire, (*Reichsgesetzblatt*.) If no other period shall be designated in the published law for it to take effect, it shall take effect on the fourteenth day after the day of its publication in the law-journal at Berlin.

Article 3. There is one citizenship for all Germany, and the citizens or subjects of each state of the federation shall be treated in every other state thereof as natives, and shall have the right of becoming permanent residents, of carrying on business, of filling public offices, and may acquire all civil rights on the same conditions as those born in the state, and shall also have the same usage as regards civil prosecutions and the protection of the laws. No German shall be limited, in the exercise of this privilege, by the authorities of his native state, or by the authorities of any other state of the confederation. The regulations governing the care of paupers, and their admission into the various parishes, are not affected by the principle enunciated in the first paragraph. In like manner those treaties shall remain in force which have been concluded between the various states of the federation in relation to the custody of persons who are to be banished, the care of sick, and the burial of deceased citizens. With regard to the rendering of military service to the various states, the necessary laws will be passed hereafter. All Germans in foreign countries shall have equal claims upon the protection of the Empire.

Article 4. The following matters shall be under the supervision of the Empire and its legislature: 1. The privilege of carrying on trade in more than one place; domestic affairs and matters relating to the settlement of natives of one state in the territory of another; the right of citizenship; the issuing and examination of passports; surveillance of foreigners and of manufactures, together with insurance business, so far as these matters are not already provided for by article 3 of this constitution, (in Bavaria, however, exclusive of domestic affairs and matters relating to the settlement of natives of one state in the territory of another;) and likewise matters relating to colonization and emigration to foreign countries. 2. Legislation concerning customs duties and commerce, and such imposts as are to be applied to the uses of the Empire. 3. Regulation of weights and measures of the coinage, together with the emission of funded and unfunded paper money. 4. Banking regulations in general. 5. Patents for inventions. 6. The protection of literary property. 7. The organization of a general system of protection for German trade in foreign countries; of German navigation, and of the German flag on the high seas; likewise the organization of a general consular representation of the Empire. 8. Railway matters, (subject in Bavaria to the provisions of article 46,) and the construction of means of communication by land and water for the purposes of home defense and of general commerce. 9. Rafting and navigation upon those waters which are common to several States, and the condition of such waters, as likewise river and other water dues. 10. Postal and telegraphic affairs; but in Bavaria and Hungary these shall

be subject to the provisions of article 52. 11. Regulations concerning the execution of judicial sentences in civil matters, and the fulfillment of requisitions in general. 12. The authentication of public documents. 13. General legislation regarding the law of obligations, criminal law, commercial law, and the law of exchange; likewise judicial proceedings. 14. The imperial army and navy. 15. The surveillance of the medical and veterinary professions. 16. The press, trades' unions, &c.

Article 5. The legislative power of the Empire shall be exercised by the federal council and the diet. A majority of the votes of both houses shall be necessary and sufficient for the passage of a law. When a law is proposed in relation to the army or navy, or to the imposts specified in article 35, the vote of the presiding officer shall decide; in case of a difference of opinion in the federal council, if said vote shall be in favor of the retention of the existing arrangements.

III.—Federal Council.

Article 6. The federal council shall consist of the representatives of the states of the confederation, among whom the votes shall be divided in such a manner that Prussia, including the former votes of Hanover, the electorate of Hesse, Holstein, Nassau, and Frankfurt shall have 17 votes; Bavaria, 6 votes; Saxony, 4 votes; Württemberg, 4 votes; Baden, 3 votes; Hesse, 3 votes; Mecklenburg-Schwerin, 2 votes; Saxe-Weimar, 1 vote; Mecklenburg-Strelitz, 1 vote; Oldenburg, 1 vote; Brunswick, 2 votes; Saxe-Meiningen, 1 vote; Saxe-Altenburg, 1 vote; Saxe-Coburg-Gotha, 1 vote; Anhalt, 1 vote; Schwarzburg-Rudolstadt, 1 vote; Schwarzburg-Sondershausen, 1 vote; Waldeck, 1 vote; Reuss, elder branch, 1 vote; Reuss, younger branch, 1 vote; Schaumburg-Lippe, 1 vote; Lippe, 1 vote; Lubeck, 1 vote; Bremen, 1 vote; Hamburg, 1 vote; total 58 votes. Each member of the confederation shall appoint as many delegates to the federal council as it has votes; the total of the votes of each state shall, however, be cast by only one delegate.

Article 7. The federal council shall take action upon—1. The measures to be proposed to the diet and the resolutions passed by the same. 2. The general provisions and regulations necessary for the execution of the laws of the Empire, so far as no other provision is made by said laws. 3. The defects which may be discovered in the execution of the laws of the Empire, or of the provisions and regulations heretofore mentioned. Each member of the confederation shall have the right to introduce motions, and it shall be the duty of the presiding officer to submit them for deliberation. Legislative action shall take place by simple majority, with the exceptions of the provisions in articles 5, 37, and 78. Votes not represented or instructed shall not be counted. In the case of a tie, the vote of the presiding officer shall decide. When legislative action upon a subject which does not affect, according to the provisions of this constitution, the whole Empire is taken, the votes of only those states of the confederation shall be counted which shall be interested in the matter in question.

Article 8. The federal council shall appoint from its own members permanent committees—1. On the army and the fortifications. 2. On naval affairs. 3. On duties and taxes. 4. On commerce and trade. 5. On railroads, post

offices, and telegraphs. 6. On the judiciary. 7. On accounts. In each of these committees there shall be representatives of at least four states of the confederation, beside the presiding officer, and each state shall be entitled to only one vote in the same. In the committee on the army and fortifications Bavaria shall have a permanent seat; the remaining members of it, as well as the members of the committee on naval affairs, shall be appointed by the Emperor; the members of the other committees shall be elected by the federal council. These committees shall be newly formed at each session of the federal council, *i. e.*, each year, when the retiring members shall again be eligible. Besides, there shall be appointed in the federal council a committee on foreign affairs, over which Bavaria shall preside, to be composed of the plenipotentiaries of the Kingdoms of Bavaria, Saxony, and Würtemberg, and of two plenipotentiaries of the other states of the Empire, who shall be elected annually by the federal council. Clerks shall be placed at the disposal of the committees to perform the necessary work appertaining thereto.

Article 9. Each member of the federal council shall have the right to appear in the diet, and shall be heard there at any time when he shall so request, to represent the views of his government, even when the same shall not have been adopted by the majority of the council. Nobody shall be at the same time a member of the federal council and of the diet.

Article 10. The Emperor shall afford the customary diplomatic protection to the members of the federal council.

IV.—Presidium.

Article 11. The King of Prussia shall be the president of the confederation, and shall have the title of German Emperor. The Emperor shall represent the Empire among nations, declare war, and conclude peace in the name of the same, enter into alliances and other conventions with foreign countries, accredit ambassadors, and receive them. For a declaration of war in the name of the Empire, the consent of the federal council shall be required, except in case of an attack upon the territory of the confederation or its coasts. So far as treaties with foreign countries refer to matters which, according to article 4, are to be regulated by the legislature of the Empire, the consent of the federal council shall be required for their ratification, and the approval of the diet shall be necessary to render them valid.

Article 12. The Emperor shall have the right to convene the federal council and the diet, and to open, adjourn, and close them.

Article 13. The convocation of the federal council and the diet shall take place annually, and the federal council may be called together for the preparation of business without the diet; the latter, however, shall not be convoked without the federal council.

Article 14. The convocation of the federal council shall take place as soon as demanded by one-third of its members.

Article 15. The chancellor of the Empire, who shall be appointed by the Emperor, shall preside in the federal council, and supervise the conduct of its business. The chancellor of the Empire shall have the right to delegate the power to represent him to any member of the federal council.

Article 16. The necessary bills shall be laid before the diet in the name of the Emperor, in accordance with the resolutions of the federal council, and they shall be represented in the diet by members of the federal council or by special commissioners appointed by said council.

Article 17. To the Emperor shall belong the right to prepare and publish the laws of the Empire. The laws and regulations of the Emperor shall be published in the name of the Empire, and require for their validity the signature of the chancellor of the Empire, who thereby becomes responsible for their execution.

Article 18. The Emperor shall appoint the officers of the Empire, require them to take the oath of allegiance, and dismiss them when necessary. Officials appointed to an office of the Empire from one of the states of the confederation shall enjoy the same rights to which they were entitled in their native states by their official position, provided no other legislative provision shall have been made previously to their entrance into the service of the Empire.

Article 19. If states of the confederation shall not fulfill their constitutional duties, proceedings may be instituted against them by military execution. This execution shall be ordered by the federal council, and enforced by the Emperor.

V.—Diet.

Article 20. The members of the diet shall be elected by universal suffrage, and by direct secret ballot. Until regulated by law, which is reserved by section 5 of the election law of May 31, 1869 (*Bundesgesetzblatt*, 1869, section 145,) 48 delegates shall be elected in Bavaria, 17 in Würtemberg, 14 in Baden, 6 in Hesse, south of the river Main, and the total number of delegates shall be 382.

Article 21. Officials shall not require a leave of absence in order to enter the diet. When a member of the diet accepts a salaried office of the Empire, or a salaried office in one of the states of the confederation, or accepts any office of the Empire, or of a state, with which a high rank or salary is connected, he shall forfeit his seat and vote in the diet, but may recover his place in the same by a new election.

Article 22. The proceedings of the diet shall be public. Truthful reports of the proceedings of the public sessions of the diet shall subject those making them to no responsibility.

Article 23. The diet shall have the right to propose laws within the jurisdiction of the Empire, and to refer petitions addressed to it to the federal council or the chancellor of the Empire.

Article 24. Each legislative period of the diet shall last three years. The diet may be dissolved by a resolution of the federal council, with the consent of the Emperor.

Article 25. In the case of a dissolution of the diet, new elections shall take place within a period of 60 days, and the diet shall reassemble within a period of 90 days after the dissolution.

Article 26. Unless by consent of the diet, an adjournment of that body shall not exceed the period of 30 days, and shall not be repeated during the same session, without such consent.

Article 27. The diet shall examine into the legality of the election of its members and decide thereon. It shall regulate the mode of transacting business, and its own discipline, by establish-

ing rules therefor, and elect its president, vice-presidents, and secretaries.

Article 28. The diet shall pass laws by absolute majority. To render the passage of laws valid, the presence of the majority of the legal number of members shall be required. When passing laws which do not affect the whole Empire, according to the provisions of this constitution, the votes of only those members shall be counted who shall have been elected in those states of the confederation which the laws to be passed shall affect.

Article 29. The members of the diet shall be the representatives of the entire people, and shall not be subject to orders and instructions from their constituents.

Article 30. No member of the diet shall at any time suffer legal prosecution on account of his vote, or on account of utterances made while in the performance of his functions, or be held responsible outside of the diet for his actions.

Article 31. Without the consent of the diet, none of its members shall be tried or punished, during the session, for any offense committed, except when arrested in the act of committing the offense, or in the course of the following day. The same rule shall apply in the case of arrests for debt. At the request of the diet, all legal proceedings instituted against one of its members, and likewise imprisonment, shall be suspended during its session.

Article 32. The members of the diet shall not be allowed to draw any salary, or be compensated as such.

VI.—Customs and Commerce.

Article 33. Germany shall form a customs and commercial union, having a common frontier for the collection of duties. Such territories as cannot, by reason of their situation, be suitably embraced within the said frontier, shall be excluded. It shall be lawful to introduce all articles of commerce of a state of the confederation into any other state of the confederation, without paying any duty thereon, except so far as such articles are subject to taxation therein.

Article 34. The Hanseatic towns, Bremen and Hamburg, shall remain free ports outside of the common boundary of the customs union, retaining for that purpose a district of their own, or of the surrounding territory, until they shall request to be admitted into the said union.

Article 35. The Empire shall have the exclusive power to legislate concerning everything relating to the customs, the taxation of salt and tobacco manufactured or raised in the territory of the confederation; concerning the taxation of manufactured brandy and beer, and of sugar and sirup prepared from beets or other domestic productions. It shall have exclusive power to legislate concerning the mutual protection of taxes upon articles of consumption levied in the several states of the Empire; against embezzlement; as well as concerning the measures which are required, in granting exemption from the payment of duties, for the security of the common customs frontier. In Bavaria, Würtemberg, and Baden, the matter of imposing duties on domestic brandy and beer is reserved for the legislature of each country. The states of the confederation shall, however, endeavor to bring about uniform legislation regarding the taxation of these articles.

Article 36. The imposing of duties and excises on articles of consumption, and the collec-

tion of the same (article 35,) is left to each state of the confederation within its own territory, so far as this has been done by each state heretofore. The Emperor shall have the supervision of the institution of legal proceedings by officials of the empire, whom he shall designate as adjuncts to the custom or excise offices, and boards of directors of the several states, after hearing the committee of the Confederate Council on customs and revenues. Notices given by these officials as to defects in the execution of the laws of the Empire (article 35) shall be submitted to the confederate council for action.

Article 37. In taking action upon the rules and regulations for the execution of the laws of the Empire, (article 35,) the vote of the presiding officer shall decide, whenever he shall pronounce for upholding the existing rule or regulation.

Article 38. The amounts accruing from customs and other revenues designated in article 35 of the latter, so far as they are subject to legislation by the diet, shall go to the treasury of the Empire. This amount is made up of the total receipts from the customs and other revenues, after deducting therefrom—1. Tax compensations and reductions in conformity with existing laws or regulations. 2. Reimbursements for taxes unduly imposed. 3. The costs for collection and administration, viz.: *a.* In the department of customs, the costs which are required for the protection and collection of customs on the frontiers and in the frontier districts. *b.* In the department of the duty on salt, the costs which are used for the pay of the officers charged with collecting and controlling these duties in the salt mines. *c.* In the department of duties on beet-sugar and tobacco, the compensation which is to be allowed, according to the resolutions of the confederate council, to the several state governments for the costs of the collection of these duties. *d.* Fifteen per cent. of the total receipts in the departments of the other duties. The territories situated outside of the common customs frontier shall contribute to the expenses of the Empire by paying an 'aversum,' (a sum of acquittance.) Bavaria, Würtemberg, and Baden shall not share in the revenues from duties on liquors and beer, which go into the treasury of the Empire, nor in the corresponding portion of the aforesaid 'aversum.'

Article 39. The quarterly statements to be regularly made by the revenue officers of the federal states at the end of every quarter, and the final settlements (to be made at the end of the year, and after the closing of the account-books) of the receipts from customs, which have become due in the course of the quarter, or during the fiscal year, and the revenues of the treasury of the Empire, according to article 38, shall be arranged by the boards of directors of the federal states, after a previous examination in general summaries in which every duty is to be shown separately; these summaries shall be transmitted to the federal committee on accounts. The latter provisionally fixes, every three months, taking as a basis these summaries, the amount due to the treasury of the Empire from the treasury of each state, and it shall inform the federal council and the federal States of this act; furthermore, it shall submit to the federal council, annually, the final statement of these amounts, with its remarks. The federal council shall act upon the fixing of these amounts.

Article 40. The terms of the customs-union treaty of July 8, 1867, remain in force, so far as they have not been altered by the provisions of this constitution, and as long as they are not altered in the manner designated in articles 7 and 78.

VII. — Railways.

Article 41. Railways, which are considered necessary for the defense of Germany or for purposes of general commerce, may be built for the account of the Empire by a law of the Empire, even in opposition to the will of those members of the confederation through whose territory the railroads run, without detracting from the rights of the sovereign of that country; or private persons may be charged with their construction and receive rights of expropriation. Every existing railway company is bound to permit new railroad lines to be connected with it, at the expense of these latter. All laws granting existing railway companies the right of injunction against the building of parallel or competition lines are hereby abolished throughout the Empire, without detriment to rights already acquired. Such right of injunction can henceforth not be granted in concessions to be given hereafter.

Article 42. The governments of the federal states bind themselves, in the interest of general commerce, to have the German railways managed as a uniform net-work, and for this purpose to have the lines constructed and equipped according to a uniform system.

Article 43. Accordingly, as soon as possible, uniform arrangements as to management, shall be made, and especially shall uniform regulations be instituted for the police of the railroads. The Empire shall take care that the administrative officers of the railway lines keep the roads always in such a condition as is required for public security, and that they be equipped with the necessary rolling stock.

Article 44. Railway companies are bound to establish such passenger trains of suitable velocity as may be required for ordinary travel, and for the establishment of harmonizing schedules of travel; also, to make provision for such freight trains as may be necessary for commercial purposes, and to establish, without extra remuneration, offices for the direct forwarding of passengers and freight trains, to be transferred, when necessary, from one road to another.

Article 45. The Empire shall have control over the tariff of fares. The same shall endeavor to cause — 1. Uniform regulations to be speedily introduced on all German railway lines. 2. The tariff to be reduced and made uniform as far as possible, and particularly to cause a reduction of the tariff for the transport of coal, coke, wood, minerals, stone, salt, crude iron, manure, and similar articles, for long distances, as demanded by the interests of agriculture and industry, and to introduce a one-penny tariff as soon as practicable.

Article 46. In case of distress, especially in case of an extraordinary rise in the price of provisions, it shall be the duty of the railway companies to adopt temporarily a low special tariff, to be fixed by the Emperor, on motion of the competent committee, for the forwarding of grain, flour, vegetables, and potatoes. This tariff shall, however, not be less than the lowest rate for raw produce existing on the said line. The foregoing provisions, and those of articles 42

to 45, shall not apply to Bavaria. The imperial government has, however, the power, also with regard to Bavaria, to establish, by way of legislation, uniform rules for the construction and equipment of such railways as may be of importance for the defense of the country.

Article 47. The managers of all railways shall be required to obey, without hesitation, requisitions made by the authorities of the Empire for the use of their roads for the defense of Germany. Particularly shall the military and all material of war be forwarded at uniform reduced rates.

VIII. — Mails and Telegraphs.

Article 48. The mails and telegraphs shall be organized and managed as state institutions throughout the German Empire. The legislation of the empire in regard to postal and telegraphic affairs, provided for in article 4, does not extend to those matters whose regulation is left to the managerial arrangement, according to the principles which have controlled the North German administration of mails and telegraphs.

Article 49. The receipts of mails and telegraphs are a joint affair throughout the Empire. The expenses shall be paid from the general receipts. The surplus goes into the treasury of the Empire. (Section 12.)

Article 50. The Emperor has the supreme supervision of the administration of mails and telegraphs. The authorities appointed by him are in duty bound and authorized to see that uniformity be established and maintained in the organization of the administration and in the transaction of business, as also in regard to the qualifications of employés. The Emperor shall have the power to make general administrative regulations, and also exclusively to regulate the relations which are to exist between the post and telegraph offices of Germany and those of other countries. It shall be the duty of all officers of the post-office and telegraph department to obey imperial orders. This obligation shall be included in their oath of office. The appointment of superior officers (such as directors, counselors, and superintendents,) as they shall be required for the administration of the mails and telegraphs, in the various districts; also the appointment of officers of the posts and telegraphs (such as inspectors or comptrollers,) acting for the aforesaid authorities in the several districts, in the capacity of supervisors, shall be made by the Emperor for the whole territory of the German Empire, and these officers shall take the oath of fealty to him as a part of their oath of office. The governments of the several states shall be informed in due time, by means of imperial confirmation and official publication, of the aforementioned appointments, so far as they may relate to their territories. Other officers required by the department of mails and telegraphs, as also all officers to be employed at the various stations, and for technical purposes, and hence officiating at the actual centers of communication, &c., shall be appointed by the respective governments of the states. Where there is no independent administration of inland mails or telegraphs, the terms of the various treaties are to be enforced.

Article 51. In assigning the surplus of the post-office department to the treasury of the Empire for general purposes, (article 49,) the following proceeding is to be observed in con-

sideration of the difference which has heretofore existed in the clear receipts of the post-office departments of the several territories, for the purpose of securing a suitable equalization during the period of transition below named. Of the post-office surplus, which accumulated in the several mail districts during the five years from 1861 to 1865, an average yearly surplus shall be computed, and the share which every separate mail district has had in the surplus resulting therefrom for the whole territory of the Empire shall be fixed upon by a percentage. In accordance with the proportion thus made, the several states shall be credited on the account of their other contributions to the expenses of the empire with their quota accruing from the postal surplus in the Empire, for a period of eight years subsequent to their entrance into the post-office department of the Empire. At the end of the said eight years this distinction shall cease, and any surplus in the post-office department shall go, without division, into the treasury of the Empire, according to the principle enunciated in article 49. Of the quota of the post-office department surplus resulting during the aforementioned period of eight years in favor of the Hanseatic towns, one-half shall every year be placed at the disposal of the Emperor, for the purpose of providing for the establishment of uniform post-offices in the Hanseatic towns.

Article 52. The stipulations of the foregoing articles 48 to 51 do not apply to Bavaria and Würtemberg. In their stead the following stipulation shall be valid for these two states of the confederation. The Empire alone is authorized to legislate upon the privileges of the post-office and telegraph departments, on the legal position of both institutions toward the public, upon the franking privilege and rates of postage, and upon the establishment of rates for telegraphic correspondence into Hanseatic towns. Exclusive, however, of managerial arrangements, and the fixing of tariffs for internal communication within Bavaria and Würtemberg. In the same manner the Empire shall regulate postal and telegraphic communication with foreign countries, excepting the immediate communication of Bavaria and Würtemberg with their neighboring states, not belonging to the Empire, in regard to which regulation the stipulations in article 49 of the postal treaty of November 23, 1867, remains in force. Bavaria and Würtemberg shall not share in the postal and telegraphic receipts which belong to the treasury of the Empire.

IX. — Marine and Navigation.

Article 53. The navy of the Empire is a united one, under the supreme command of the Emperor. The Emperor is charged with its organization and arrangement, and he shall appoint the officers and officials of the navy, and in his name these and the seamen are to be sworn in. The harbor of Kiel and the harbor of the Jade are imperial war harbors. The expenditures required for the establishment and maintenance of the navy and the institutions connected therewith shall be defrayed from the treasury of the Empire. All sea-faring men of the Empire, including machinists and hands employed in ship-building, are exempt from service in the army, but obliged to serve in the imperial navy. The apportionment of men to supply the wants of the navy shall be made according to the actual sea-faring population,

and the quota furnished in accordance herewith by each state shall be credited to the army account.

Article 54. The merchant vessels of all states of the confederation shall form a united commercial marine. The Empire shall determine the process for ascertaining the tonnage of sea-going vessels, shall regulate the issuing of tonnage-certificates and sea-letters, and shall fix the conditions to which a permit for commanding a sea-going vessel shall be subject. The merchant vessels of all the states of the confederation shall be admitted on an equal footing to the harbors, and to all natural and artificial water-courses of the several states of the confederation, and shall receive the same usage therein. The duties which shall be collected from sea-going vessels, or levied upon their freights, for the use of naval institutions in the harbors, shall not exceed the amount required for the maintenance and ordinary repair of these institutions. On all natural water-courses, duties are only to be levied for the use of special establishments, which serve for facilitating commercial intercourse. These duties, as well as the duties for navigating such artificial channels, which are property of the state, are not to exceed the amount required for the maintenance and ordinary repair of the institutions and establishments. These rules apply to rafting, so far as it is carried on on navigable water-courses. The levying of other or higher duties upon foreign vessels or their freights than those which are paid by the vessels of the federal states or their freights does not belong to the various states, but to the Empire.

Article 55. The flag of the war and merchant navy shall be black, white, and red.

X. — Consular Affairs.

Article 56. The Emperor shall have the supervision of all consular affairs of the German Empire, and he shall appoint consuls, after hearing the committee of the federal council on commerce and traffic. No new state consulates are to be established within the jurisdiction of the German consuls. German consuls shall perform the functions of state consuls for the states of the confederation not represented in their district. All the now existing state consulates shall be abolished, as soon as the organization of the German consulates shall be completed, in such a manner that the representation of the separate interests of all the federal states shall be recognized by the federal council as secured by the German consulates.

XI. — Military Affairs of the Empire.

Article 57. Every German is subject to military duty, and in the discharge of this duty no substitute can be accepted.

Article 58. The costs and the burden of all the military system of the Empire are to be borne equally by all the federal states and their subjects, and no privileges or molestations to the several states or classes are admissible. Where an equal distribution of the burdens cannot be effected 'in natura' without prejudice to the public welfare, affairs shall be equalized by legislation in accordance with the principles of justice.

Article 59. Every German capable of bearing arms shall serve for seven years in the standing army, ordinarily from the end of his twentieth to the beginning of his twenty-eighth year; the first three years in the army of the field, the last

four years in the reserve; during the next five years he shall belong to the militia. In those states of the confederation in which heretofore a longer term of service than twelve years was required by law, the gradual reduction of the required time of service shall take place in such a manner as is compatible with the interests and the war-footing of the army of the Empire. As regards the emigration of men belonging to the reserve, only those provisions shall be in force which apply to the emigration of members of the militia.

Article 60. The strength of the German army in time of peace shall be, until the 31st December, 1871, one per cent. of the population of 1867, and shall be furnished by the several federal states in proportion to their population. In future the strength of the army in time of peace shall be fixed by legislation.

Article 61. After the publication of this constitution the full Prussian military system of legislation shall be introduced without delay throughout the Empire, as well the statutes themselves as the regulations, instructions, and ordinances issued for their execution, explanation, or completion; thus, in particular, the military penal code of April 3, 1845; the military orders of the penal court of April 3, 1845; the ordinance concerning the courts of honor of July 20, 1843; the regulations with respect to recruiting, time of service, matters relating to the service and subsistence, to the quartering of troops, claims for damages, mobilizing, &c., for times of peace and war. Orders for the attendance of the military upon religious services is, however, excluded. When a uniform organization of the German army shall have been established, a comprehensive military law for the Empire shall be submitted to the diet and the federal council for their action in accordance with the constitution.

Article 62. For the purpose of defraying the expenses of the whole German army, and the institutions connected therewith, the sum of 225 (two hundred and twenty-five) thalers shall be placed at the disposal of the Emperor until the 31st of December, 1871, for each man in the army on the peace-footing, according to article 60. (See section 12.) After the 31st of December, 1871, the payment of these contributions of the several states to the imperial treasury must be continued. The strength of the army in time of peace, which has been temporarily fixed in article 60, shall be taken as a basis for calculating these amounts until it shall be altered by a law of the Empire. The expenditure of this sum for the whole army of the Empire and its establishments shall be determined by a budget law. In determining the budget of military expenditures, the lawfully established organization of the imperial army, in accordance with this constitution, shall be taken as a basis.

Article 63. The total land force of the Empire shall form one army, which, in war and in peace, shall be under the command of the Emperor. The regiments, &c., throughout the whole German army shall bear continuous numbers. The principal colors and the cut of the garments of the Royal Prussian army shall serve as a pattern for the rest of the army. It is left to commanders of contingent forces to choose the external badges, cockades, &c. It shall be the duty and the right of the Emperor to take care that,

throughout the German army, all divisions be kept full and well equipped, and that unity be established and maintained in regard to organization and formation, equipment, and command in the training of the men, as well as in the qualification of the officers. For this purpose the Emperor shall be authorized to satisfy himself at any time of the condition of the several contingents, and to provide remedies for existing defects. The Emperor shall determine the strength, composition, and division of the contingents of the imperial army, and also the organization of the militia, and he shall have the right to designate garrisons within the territory of the confederation, as also to call any portion of the army into active service. In order to maintain the necessary unity in the care, arming, and equipment of all troops of the German army, all orders hereafter to be issued for the Prussian army shall be communicated in due form to the commanders of the remaining contingents by the committee on the army and fortifications, provided for in article 8, No. 1.

Article 64. All German troops are bound implicitly to obey the orders of the Emperor. This obligation shall be included in the oath of allegiance. The commander-in-chief of a contingent, as well as all officers commanding troops of more than one contingent, and all commanders of fortresses, shall be appointed by the Emperor. The officers appointed by the Emperor shall take the oath of fealty to him. The appointment of generals, or of officers performing the duties of generals, in a contingent force, shall be in each case subject to the approval of the Emperor. The Emperor has the right with regard to the transfer of officers, with or without promotion, to positions which are to be filled in the service of the Empire, be it in the Prussian army or in other contingents, to select from the officers of all the contingents of the army of the Empire.

Article 65. The right to build fortresses within the territory of the Empire shall belong to the Emperor, who, according to section 12, shall ask for the appropriation of the necessary means required for that purpose, if not already included in the regular appropriation.

Article 66. If not otherwise stipulated, the princes of the Empire and the senates shall appoint the officers of their respective contingents, subject to the restriction of article 64. They are the chiefs of all the troops belonging to their respective territories, and are entitled to the honors connected therewith. They shall have especially the right to hold inspections at any time, and receive, besides the regular reports and announcements of changes for publication, timely information of all promotions and appointments concerning their respective contingents. They shall also have the right to employ, for police purposes, not only their own troops but all other contingents of the army of the Empire who are stationed in their respective territories.

Article 67. The unexpended portion of the military appropriation shall, under no circumstances, fall to the share of a single government, but at all times to the treasury of the Empire.

Article 68. The Emperor shall have the power, if the public security of the Empire demands it, to declare martial law in any part thereof, until the publication of a law regulating the grounds, the form of announcement, and the effects of such a declaration, the provisions of the

Prussian law of June 4, 1851, shall be substituted therefor. (Laws of 1851, page 451.)

Addition to section XI.

The provisions contained in this section shall go into effect in Bavaria as provided for in the treaty of alliance of November 23, 1870, (Bundesgesetzblatt, 1871, section 9,) under III, section 5, in Württemberg, as provided for in the military convention of November 21-25, 1870, (Bundesgesetzblatt, 1870, section 658.)

XII.—Finances of the Empire.

Article 69. All receipts and expenditures of the Empire shall be estimated yearly, and included in the financial estimate. The latter shall be fixed by law before the beginning of the fiscal year, according to the following principles:

Article 70. The surplus of the previous year, as well as the customs duties, the common excise duties, and the revenues derived from the postal and telegraph service, shall be applied to the defrayal of all general expenditure. In so far as these expenditures are not covered by the receipts, they shall be raised, as long as no taxes of the Empire shall have been established, by assessing the several states of the Empire according to their population, the amount of the assessment to be fixed by the Chancellor of the Empire in accordance with the budget agreed upon.

Article 71. The general expenditure shall be, as a rule, granted for one year; they may, however, in special cases, be granted for a longer period. During the period of transition fixed in Article 60, the financial estimate, properly classified, of the expenditures of the army shall be laid before the federal council and the diet for their information.

Article 72. An annual report of the expenditure of all the receipts of the Empire shall be rendered to the federal council and the diet, through the Chancellor of the Empire.

Article 73. In cases of extraordinary requirements, a loan may be contracted in accordance with the laws of the Empire, such loan to be granted by the Empire.

Addition to section XII.

Articles 69 and 71 apply to the expenditures for the Bavarian army only according to the provisions of the addition to section XI of the treaty of November 23, 1870; and article 72 only so far as is required to inform the federal council and the diet of the assignment to Bavaria of the required sum for the Bavarian army.

XIII.—Settlement of Disputes and Modes of Punishment.

Article 74. Every attempt against the existence, the integrity, the security, or the constitution of the German Empire; finally, any offense committed against the federal council, the diet, a member of the federal council, or of the diet, a magistrate or public official of the Em-

pire, while in the execution of his duty, or with reference to his official position, by word, writing, printing, signs, or caricatures, shall be judicially investigated, and upon conviction punished in the several states of the Empire, according to the laws therein existing, or which shall hereafter exist in the same, according to which laws a similar offense against any one of the states of the Empire, its constitution, legislature, members of its legislature, authorities or officials is to be judged.

Article 75. For those offenses, specified in Article 74, against the German Empire, which, if committed against one of the states of the Empire, would be deemed high treason, the superior court of appeals of the three free Hanseatic towns at Lubeck shall be the competent deciding tribunal in the first and last resort. More definite provisions as to the competency and the proceedings of the superior court of appeals shall be adopted by the Legislature of the Empire. Until the passage of a law of the Empire, the existing competency of the courts in the respective states of the Empire, and the provisions relative to the proceedings of those courts, shall remain in force.

Article 76. Disputes between the different states of the confederation, so far as they are not of a private nature, and therefore to be decided by the competent authorities, shall be settled by the federal council, at the request of one of the parties. Disputes relating to constitutional matters in those of the states of the confederation whose constitution contains no provision for the settlement of such differences, shall be adjusted by the federal council, at the request of one of the parties, or, if this cannot be done, they shall be settled by the legislative power of the confederation.

Article 77. If in one of the states of the confederation justice shall be denied, and no sufficient relief can be procured by legal measures, it shall be the duty of the federal council to receive substantiated complaints concerning denial or restriction of justice, which are to be judged according to the constitution and the existing laws of the respective states of the confederation, and thereupon to obtain judicial relief from the confederate government in the matter which shall have given rise to the complaint.

XIV.—General Provision.

Amendments of the constitution shall be made by legislative enactment. They shall be considered as rejected when 14 votes are cast against them in the federal council. The provisions of the constitution of the Empire, by which fixed rights of individual states of the confederation are established in their relation to the whole, shall only be modified with the consent of that state of the confederation which is immediately concerned.

CONSTITUTION OF ITALY.

The kingdom of Italy is governed under the constitution granted in 1848, by Charles Albert, to his Sardinian subjects. The following translation, by Drs. Lindsay and Rowe, of the University of Pennsylvania, is from the "Annals of the American Academy of Political and Social

Science," November, 1894. The constitution has no provision for its own amendment; but most Italian jurists hold that it can be amended by Parliament, with the king's approval. For, as the translators remark in their historical introduction, an immutable constitution is an

instrument "contrary to the true conception of an organic law. As a matter of fact several provisions have been either abrogated or rendered null and void through change of conditions. Thus the second clause of Article 28, requiring the previous consent of the bishop for the printing of Bibles, prayer books and catechisms, has been rendered of no effect through subsequent laws regulating the relations of Church and State. Article 76, which provides for the establishment of a communal militia, has been abrogated by the military law of June 14, 1874. The fact that no French-speaking provinces now form part of the kingdom has made Article 62 a dead-letter. So also Articles 53 and 55 are no longer strictly adhered to. At all events their observance has been suspended for the time being."

The translated text of the Constitution is as follows:

(Charles Albert, by the Grace of God, King of Sardinia, Cyprus and Jerusalem, Duke of Savoy, Genoa, Monferrato, Aosta, of the Chiabrese, Genovese and of Piacenza; Prince of Piedmont and Oneglia; Marquis of Italy, Saluzzo, Ivrea, Susa, Ceva, of the Maro, of Oristano, of Cesana and Savona; Count of Moriana, Geneva, Nice, Tenda, Romonte, Asti, Alexandria, Goceano, Novara, Tortona, Vigevano and of Bobbio; Baron of Vaud and Faucigny; Lord of Vercelli, Pinerolo, Tarantasia, of the Lomellina and of the Valley of Sesia, etc., etc.) With the fidelity of a king and the affection of a father, we are about to-day to fulfill all that we promised our most beloved subjects in our proclamation of the eighth of last February, whereby we desired to show, in the midst of the extraordinary events then transpiring throughout the country, how much our confidence in our subjects increased with the gravity of the situation, and how, consulting only the impulse of our heart, we had fully determined to make their condition conform to the spirit of the times and to the interests and dignity of the nation. We, believing that the broad and permanent representative institutions established by this fundamental statute are the surest means of cementing the bonds of indissoluble affection that bind to our crown a people that has so often given us ample proof of their faithfulness, obedience and love, have determined to sanction and promulgate this statute. We believe, further, that God will bless our good intentions, and that this free, strong and happy nation will ever show itself more deserving of its ancient fame and thus merit a glorious future. Therefore, we, with our full knowledge and royal authority and with the advice of our Council, have ordained and do hereby ordain and declare in force the fundamental perpetual and irrevocable statute and law of the monarchy as follows:

Article 1. The Catholic, Apostolic and Roman religion is the only religion of the State [see Law of the Papal Guarantees, under *ПАПАЦЫ*: A. D. 1870 (page 2478)]. Other cults now existing are tolerated conformably to the law.

Article 2. The State is governed by a representative monarchical government, and the throne is hereditary according to the Salic law.

Article 3. The legislative power shall be exercised collectively by the King and the two Chambers, the Senate and the Chamber of Deputies.

Article 4. The person of the King is sacred and inviolable.

Article 5. To the King alone belongs the executive power. He is the supreme head of the State; commands all land and naval forces; declares war; makes treaties of peace, alliance, commerce and other treaties, communicating them to the Chambers as soon as the interest and security of the State permits, accompanying such notice with opportune explanations; provided that treaties involving financial obligations or change of State territory shall not take effect until they have received the consent of the Chambers.

Article 6. The King appoints to all the offices of the State and makes the necessary decrees and regulations for the execution of the laws, provided that such decrees do not suspend or modify their observance.

Article 7. The King alone sanctions and promulgates the laws.

Article 8. The King may grant pardons and commute sentences.

Article 9. The King convokes the two Chambers each year. He may prorogue their sessions and dissolve the Chamber of Deputies, in which case he shall convoke a new Chamber within a period of four months.

Article 10. The initiative in legislation belongs both to the King and the two Houses. All bills, however, imposing taxes or relating to the budget shall first be presented to the Chamber of Deputies.

Article 11. The King shall attain his majority upon completion of his eighteenth year.

Article 12. During the King's minority, the Prince who is his nearest relative in the order of succession to the throne, shall be regent of the realm, provided he be twenty-one years of age.

Article 13. Should the Prince upon whom the regency devolves be still in his minority and this duty pass to a more distant relative, the regent who actually takes office shall continue in the same until the King becomes of age.

Article 14. In the absence of male relatives, the regency devolves upon the Queen-Mother.

Article 15. In the event of the prior decease of the Queen-Mother, the regent shall be elected by the legislative Chambers, convoked within ten days by the Ministers of the Crown.

Article 16. The preceding provisions in reference to the regency are also applicable in case the King has attained his majority, but is physically incapable of reigning. Under such circumstances, if the heir presumptive to the throne be eighteen years of age, he shall be regent of full right.

Article 17. The Queen-Mother has charge of the education of the King until he has completed his seventh year; from this time on his guardianship passes into the hands of the regent.

Article 18. All rights pertaining to the civil power in matters of ecclesiastical benefices and in the execution of all regulations whatsoever coming from foreign countries shall be exercised by the King.

Article 19. The civil list of the Crown shall remain, during the present reign, at an amount equal to the average of the same for the past ten years. The King shall continue to have the use of the royal palaces, villas, gardens and their appurtenances, and also of all chattels intended for the use of the Crown, of which a

speedy inventory shall be made by a responsible ministerial department. In the future the prescribed dotation of the Crown shall be fixed for the duration of each reign by the first Legislature subsequent to the King's accession to the throne.

Article 20. The property that the King possesses in his own right, shall form his private patrimony, together with that to which he may acquire title either for a consideration or gratuitously in the course of his reign. The King may dispose of his private patrimony either by deed or will exempt from the provisions of the civil law as to the amount thus disposable. In all other cases, the King's patrimony is subject to the laws that govern other property.

Article 21. The law shall provide an annual civil list for the heir apparent to the throne when he has attained his majority, and also earlier on occasion of his marriage; for the allowances of the Princes of the royal family and royal blood within the specified conditions; for the dowries of the Princesses and for the dowries of the Queens.

Article 22. Upon ascending the throne, the King shall take an oath in the presence of the two Chambers to observe faithfully the present constitution.

Article 23. The regent, before entering on the duties of that office, shall swear fidelity to the King and faithful observance of this constitution and of the laws of the State.

Article 24. All the inhabitants of the Kingdom, whatever their rank or title, shall enjoy equality before the law. All shall equally enjoy civil and political rights and be eligible to civil and military office, except as otherwise provided by law.

Article 25. All shall contribute without discrimination to the burdens of the State, in proportion to their possessions.

Article 26. Individual liberty is guaranteed. No one shall be arrested or brought to trial except in cases provided for and according to the forms prescribed by law.

Article 27. The domicile shall be inviolable. No house search shall take place except in the enforcement of law and in the manner prescribed by law.

Article 28. The press shall be free, but the law may suppress abuses of this freedom. Nevertheless, Bibles, catechisms, liturgical and prayer books shall not be printed without the previous consent of the bishop.

Article 29. Property of all kinds whatsoever shall be inviolable. In all cases, however, where the public welfare, legally ascertained, demands it, property may be condemned and transferred in whole or in part after a just indemnity has been paid according to law.

Article 30. No tax shall be levied or collected without the consent of the Chambers and the sanction of the King.

Article 31. The public debt is guaranteed. All obligations between the State and its creditors shall be inviolable.

Article 32. The right to peaceful assembly, without arms, is recognized, subject, however, to the laws that may regulate the exercise of this privilege in the interest of the public welfare. This privilege is not applicable, however, to meetings in public places or places open to the public, which shall remain entirely subject to police law and regulation.

Article 33. The Senate shall be composed of members, having attained the age of forty years, appointed for life by the King, without limit of numbers. They shall be selected from the following categories of citizens: 1. Archbishops and Bishops of the State. 2. The President of the Chamber of Deputies. 3. Deputies after having served in three Legislatures, or after six years of membership in the Chamber of Deputies. 4. Ministers of State. 5. Secretaries to Ministers of State. 6. Ambassadors. 7. Envoys Extraordinary after three years of such service. 8. The First Presidents of the Courts of Cassation and of the Chamber of Accounts. 9. The First Presidents of the Courts of Appeal. 10. The Attorney-General of the Courts of Cassation and the Prosecutor-General, after five years of service. 11. The Presidents of the Chambers of the Courts of Appeal after three years of service. 12. The Councillors of the Courts of Cassation and of the Chamber of Accounts after five years of service. 13. The Advocates-General and Fiscals-General of the Courts of Appeal after five years of service. 14. All military officers of the land and naval forces with title of general. Major-generals and rear-admirals after five years of active service in this capacity. 15. The Councillors of State after five years of service. 16. The members of the Councils of Division after three elections to their presidency. 17. The Provincial Governors (Intendenti generali) after seven years of service. 18. Members of the Royal Academy of Science of seven years standing. 19. Ordinary members of the Superior Council of Public Instruction after seven years of service. 20. Those who by their services or eminent merit have done honor to their country. 21. Persons who, for at least three years, have paid direct property or occupation taxes to the amount of 3,000 lire.

Article 34. The Princes of the Royal Family shall be members of the Senate. They shall take rank immediately after the President. They shall enter the Senate at the age of twenty-one and have a vote at twenty-five.

Article 35. The President and Vice-Presidents of the Senate shall be appointed by the King, but the Senate chooses from among its own members its secretaries.

Article 36. The Senate may be constituted a High Court of Justice by decree of the King for judging crimes of high treason and attempts upon the safety of the State, also for trying Ministers placed in accusation by the Chamber of Deputies. When acting in this capacity, the Senate is not a political body. It shall not then occupy itself with any other judicial matters than those for which it was convened; any other action is null and void.

Article 37. No Senator shall be arrested except by virtue of an order of the Senate, unless in cases of flagrant commission of crime. The Senate shall be the sole judge of the imputed misdemeanors of its members.

Article 38. Legal documents as to births, marriages and deaths in the Royal Family shall be presented to the Senate and deposited by that body among its archives.

Article 39. The elective Chamber is composed of deputies chosen by the electoral colleges as provided by law. [The election law long in force was that of December 17, 1860, which was subsequently modified in July, 1875, and in

May, 1877. In January, 1882, a comprehensive electoral reform was inaugurated by which the electoral age qualification was reduced from twenty-five to twenty-one years, and the tax qualification to an annual payment of nineteen lire eighty centesimi as a minimum of direct taxes. This law introduced a new provision requiring of electors a knowledge of reading and writing. It is an elaborate law of 107 articles. The provisions relating to the elections by general ticket were further revised by law of May and decree of June, 1882, and the text of the whole law was co-ordinated with the preceding laws by Royal Decree of September 24, 1882. It was again modified May 5th, 1891, by the abolition of elections on general tickets and the creation of a Commission for the territorial division of the country into electoral colleges. The number of electoral colleges is at present fixed at 508, each electing one Deputy. Twelve articles of this law of 1882, as thus amended, have been again amended by a law dated June 28, 1892, prescribing further reforms in the control and supervision of elections, and by law of July 11, 1894, on the revision of electoral and registration lists."—Foot-note.]

Article 40. No person shall be a member of the Chamber who is not a subject of the King, thirty years of age, possessing all civil and political rights and the other qualifications required by law.

Article 41. Deputies shall represent the nation at large and not the several Provinces from which they are chosen. No binding instructions may therefore be given by the electors.

Article 42. Deputies shall be elected for a term of five years; their power ceases ipso jure at the expiration of this period.

Article 43. The President, Vice-presidents and Secretaries of the Chamber of Deputies shall be chosen from among its own members at the beginning of each session for the entire session.

Article 44. If a Deputy ceases for any reason whatsoever to perform his duties, the electoral college that chose him shall be convened at once to proceed with a new election.

Article 45. Deputies shall be privileged from arrest during the sessions, except in cases of flagrant commission of crime; but no Deputy may be brought to trial in criminal matters without the previous consent of the Chamber.

Article 46. No warrant of arrest for debts may be executed against a Deputy during the sessions of the Chamber, nor within a period of three weeks preceding or following the same. ["This article has been practically abolished by the Mancini law of December 6, 1877, doing away with personal arrest for debts."—Foot-note.]

Article 47. The Chamber of Deputies shall have power to impeach Ministers of the Crown and to bring them to trial before the High Court of Justice.

Article 48: The sessions of the Senate and Chamber of Deputies shall begin and end at the same time, and every meeting of one Chamber, at a time when the other, is not in session, is illegal and its acts wholly null and void.

Article 49. Senators and Deputies before entering upon the duties of their office shall take an oath of fidelity to the King and swear to observe faithfully the Constitution and laws of the State and to perform their duties with the joint

welfare of King and country as the sole end in view.

Article 50. The office of Senator or Deputy does not entitle to any compensation or remuneration.

Article 51. Senators and Deputies shall not be held responsible in any other place for opinions expressed or votes given in the Chambers.

Article 52. The sessions of the Chambers shall be public. Upon the written request of ten members secret sessions may be held.

Article 53. No session or vote of either Chamber shall be legal or valid unless an absolute majority of its members is present. [This article is not observed in actual parliamentary practice.—Foot-note.]

Article 54. The action of either Chamber on any question shall be determined by a majority of the votes cast.

Article 55. All bills shall be submitted to committees elected by each House for preliminary examination. Any proposition discussed and approved by one Chamber shall be transmitted to the other for its consideration and approval; after passing both Chambers it shall be presented to the King for his sanction. Bills shall be discussed article by article.

Article 56. Any bill rejected by one of the three legislative powers cannot again be introduced during the same session.

Article 57. Every person who shall have attained his majority has the right to send petitions to the Chambers, which in turn must order them to be examined by a committee; on report of the committee each House shall decide whether they are to be taken into consideration, and if voted in the affirmative, they shall be referred to the competent Minister or shall be deposited with a Government Department for proper action.

Article 58. No petition may be presented in person to either Chamber. No persons except the constituted authorities shall have the right to submit petitions in their collective capacity.

Article 59. The Chambers shall not receive any deputation, nor give hearing to other than their own members and the Ministers and Commissioners of the Government.

Article 60. Each Chamber shall be sole judge of the qualifications and elections of its own members.

Article 61. The Senate as well as the Chamber of Deputies shall make its own rules and regulations respecting its methods of procedure in the performance of its respective duties.

Article 62. Italian shall be the official language of the Chambers. The use of French shall, however, be permitted to those members coming from French-speaking districts and to other members in replying to the same.

Article 63. Votes shall be taken by rising, by division, and by secret ballot. The latter method, however, shall always be employed for the final vote on a law and in all cases of a personal nature.

Article 64. No one shall hold the office of Senator and Deputy at the same time.

Article 65. The King appoints and dismisses his ministers.

Article 66. The Ministers shall have no vote in either Chamber unless they are members thereof. They shall have entrance to both Chambers and must be heard upon request.

Article 67. The Ministers shall be responsible. Laws and decrees of the government shall not

CONSTITUTION OF ITALY.

take effect until they shall have received the signature of a Minister.

Article 68. Justice emanates from the King and shall be administered in his name by the judges he appoints.

Article 69. Judges appointed by the King, except Cantonal or District judges (*di mandamento*), shall not be removed after three years of service.

Article 70. Courts, tribunals and judges are retained as at present existing. No modification shall be introduced except by law.

Article 71. No one shall be taken from his ordinary legal jurisdiction. It is therefore not lawful to create extraordinary tribunals or commissions.

Article 72. The proceedings of tribunals in civil cases and the hearings in criminal cases shall be public as provided by law.

Article 73. The interpretation of the laws, in the form obligatory upon all citizens, belongs exclusively to the legislative power.

Article 74. Communal and provincial institutions and the boundaries of the communes and provinces shall be regulated by law.

Article 75. The military conscriptions shall be regulated by law.

Article 76. A communal militia shall be established on a basis fixed by law.

Article 77. The State retains its flag, and the blue cockade is the only national one.

Article 78. The knightly orders now in existence shall be maintained with their endowments, which shall not be used for other purposes than those specified in the acts by which they were

CONSTITUTION OF JAPAN.

established. The King may create other orders and prescribe their constitutions.

Article 79. Titles of the nobility are guaranteed to those who have a right to them. The King may confer new titles.

Article 80. No one may receive orders, titles or pensions from a foreign power without the King's consent.

Article 81. All laws contrary to the provisions of the present constitution are hereby abrogated.

Given at Turin on the fourth day of March, in the year of Our Lord one thousand eight hundred and forty-eight, and of Our Reign the eighteenth.

Transitory Provisions.

Article 82. This statute shall go into effect on the day of the first meeting of the Chambers, which shall take place immediately after the elections. Until that time urgent public service shall be provided for by royal ordinances according to the mode and form now in vogue, excepting, however, the ratifications and registrations in the courts which are from now on abolished.

Article 83. In the execution of this statute the King reserves to himself the right to make the laws for the press, elections, communal militia and organization of the Council of State. Until the publication of the laws for the press, the regulations now in force on this subject remain valid.

Article 84. The Ministers are entrusted with, and are responsible for the execution and full observance of these transitory provisions.

CONSTITUTION OF JAPAN.

This text of the Constitution promulgated by the Emperor, February 11, 1889, is from a pamphlet published at Johns Hopkins University:

Chapter I.

Article I. The Empire of Japan shall be reigned over and governed by a line of Emperors unbroken for ages eternal.

Article II. The Imperial Throne shall be succeeded to by Imperial male descendants, according to the provisions of the Imperial House Law.

Article III. The Emperor is sacred and inviolable.

Article IV. The Emperor is the head of the Empire, combining in Himself the rights of sovereignty, and exercises them, according to the provisions of the present Constitution.

Article V. The Emperor exercises the legislative power with the consent of the Imperial Diet.

Article VI. The Emperor gives sanction to laws, and orders them to be promulgated and executed.

Article VII. The Emperor convokes the Imperial Diet, opens, closes, and prorogues it, and dissolves the House of Representatives.

Article VIII. The Emperor, in consequence of an urgent necessity to maintain public safety or to avert public calamities, issues, when the Imperial Diet is not sitting, Imperial Ordinances in the place of law. Such Imperial Ordinances are to be laid before the Imperial Diet at its next session, and when the Diet does not approve the said Ordinances, the Government shall declare them to be invalid for the future.

Article IX. The Emperor issues, or causes to be issued, the Ordinances necessary for the carrying out of the laws, or for the maintenance of the public peace and order, and for the promotion of the welfare of the subjects. But no Ordinance shall in any way alter any of the existing laws.

Article X. The Emperor determines the organization of the different branches of the administration, and the salaries of all civil and military officers, and appoints and dismisses the same. Exceptions especially provided for in the present Constitution or in other laws, shall be in accordance with the respective provisions (bearing thereon).

Article XI. The Emperor has the supreme command of the Army and Navy.

Article XII. The Emperor determines the organization and peace standing of the Army and Navy.

Article XIII. The Emperor declares war, makes peace, and concludes treaties.

Article XIV. The Emperor proclaims the law of siege. The conditions and effects of the law of siege shall be determined by law.

Article XV. The Emperor confers titles of nobility, rank, orders, and other marks of honor.

Article XVI. The Emperor orders amnesty, pardon, commutation of punishment, and rehabilitation.

Article XVII. A Regency shall be instituted in conformity with the provisions of the Imperial House Law. The Regent shall exercise the powers appertaining to the Emperor in His name.

Chapter II.

Article XVIII. The conditions necessary for being a Japanese subject shall be determined by law.

Article XIX. Japanese subjects may, according to qualifications determined in law or ordinances, be appointed to civil or military offices equally, and may fill any other public offices.

Article XX. Japanese subjects are amenable to service in the Army or Navy, according to the provisions of law.

Article XXI. Japanese subjects are amenable to the duty of paying taxes, according to the provisions of law.

Article XXII. Japanese subjects shall have the liberty of abode and of changing the same within the limits of law.

Article XXIII. No Japanese subject shall be arrested, detained, tried, or punished, unless according to law.

Article XXIV. No Japanese subject shall be deprived of his right of being tried by the judges determined by law.

Article XXV. Except in the cases provided for in the law, the house of no Japanese subject shall be entered or searched without his consent.

Article XXVI. Except in the cases mentioned in the law, the secrecy of the letters of every Japanese subject shall remain inviolate.

Article XXVII. The right of property of every Japanese subject shall remain inviolate. Measures necessary to be taken for the public benefit shall be provided for by law.

Article XXVIII. Japanese subjects shall, within limits not prejudicial to peace and order, and not antagonistic to their duties as subjects, enjoy freedom of religious belief.

Article XXIX. Japanese subjects shall, within the limits of law, enjoy the liberty of speech, writing, publication, public meetings, and associations.

Article XXX. Japanese subjects may present petitions, by observing the proper forms of respect, and by complying with the rules specially provided for the same.

Article XXXI. The provisions contained in the present Chapter shall not affect the exercise of the powers appertaining to the Emperor in times of war or in cases of a national emergency.

Article XXXII. Each and every one of the provisions contained in the preceding Articles of the present Chapter, that are not in conflict with the laws or the rules and discipline of the Army and Navy, shall apply to the officers and men of the Army and of the Navy.

Chapter III.

Article XXXIII. The Imperial Diet shall consist of two Houses, a House of Peers and a House of Representatives.

Article XXXIV. The House of Peers shall, in accordance with the Ordinance concerning the House of Peers, be composed of the members of the Imperial Family, of the orders of nobility, and of those persons who have been nominated thereto by the Emperor.

Article XXXV. The House of Representatives shall be composed of members elected by the people according to the provisions of the Law of Election.

Article XXXVI. No one can at one and the same time be a member of both Houses.

Article XXXVII. Every law requires the consent of the Imperial Diet.

Article XXXVIII. Both Houses shall vote upon projects of law submitted to it by the Government, and may respectively initiate projects of law.

Article XXXIX. A Bill, which has been rejected by either the one or the other of the two Houses, shall not be again brought in during the same session.

Article XL. Both Houses can make representations to the Government, as to laws or upon any other subject. When, however, such representations are not accepted, they cannot be made a second time during the same session.

Article XLI. The Imperial Diet shall be convoked every year.

Article XLII. A session of the Imperial Diet shall last during three months. In case of necessity, the duration of a session may be prolonged by Imperial Order.

Article XLIII. When urgent necessity arises, an extraordinary session may be convoked, in addition to the ordinary one. The duration of an extraordinary session shall be determined by Imperial Order.

Article XLIV. The opening, closing, prolongation of session, and prorogation of the Imperial Diet, shall be effected simultaneously for both Houses. In case the House of Representatives has been ordered to dissolve, the House of Peers shall at the same time be prorogued.

Article XLV. When the House of Representatives has been ordered to dissolve, members shall be caused by Imperial Order to be newly elected, and the new House shall be convoked within five months from the day of dissolution.

Article XLVI. No debate can be opened and no vote can be taken in either House of the Imperial Diet, unless not less than one-third of the whole number of the members thereof is present.

Article XLVII. Votes shall be taken in both Houses by absolute majority. In the case of a tie vote, the President shall have the casting vote.

Article XLVIII. The deliberations of both Houses shall be held in public. The deliberations may, however, upon demand of the Government or by resolution of the House, be held in secret sitting.

Article XLIX. Both Houses of the Imperial Diet may respectively present addresses to the Emperor.

Article L. Both Houses may receive petitions presented by subjects.

Article LI. Both Houses may enact, besides what is provided for in the present Constitution and in the Law of the Houses, rules necessary for the management of their internal affairs.

Article LII. No member of either House shall be held responsible outside the respective Houses, for any opinion uttered or for any vote given in the House. When, however, a member himself has given publicity to his opinions by public speech, by documents in printing or in writing, or by any other similar means, he shall, in the matter, be amenable to the general law.

Article LIII. The members of both Houses shall, during the session, be free from arrest, unless with the consent of the House, except in cases of flagrant delicts, or of offences connected with a state of internal commotion or with a foreign trouble.

Article LIV. The Ministers of State and the Delegates of the Government may, at any time, take seats and speak in either House.

Chapter IV.

Article LV. The respective Ministers of State shall give their advice to the Emperor, and be responsible for it. All Laws, Imperial Ordinances, and Imperial Rescripts of whatever kind, that relate to the affairs of the State, require the countersignature of a Minister of State.

Article LVI. The Privy Council shall, in accordance with the provisions for the organization of the Privy Council, deliberate upon important matters of State, when they have been consulted by the Emperor.

Chapter V.

Article LVII. The Judicature shall be exercised by the Courts of Law according to law, in the name of the Emperor. The organization of the Courts of Law shall be determined by law.

Article LVIII. The judges shall be appointed from among those who possess proper qualifications according to law. No judge shall be deprived of his position, unless by way of criminal sentence or disciplinary punishment. Rules for disciplinary punishment shall be determined by law.

Article LIX. Trials and judgments of a Court shall be conducted publicly. When, however, there exists any fear that such publicity may be prejudicial to peace and order, or to the maintenance of public morality, the public trial may be suspended by provision of law or by the decision of the Court of Law.

Article LX. All matters that fall within the competency of a special Court shall be specially provided for by law.

Article LXI. No suit at law, which relates to rights alleged to have been infringed by the legal measures of the executive authorities, and which shall come within the competency of the Court of Administrative Litigation specially established by law, shall be taken cognizance of by a Court of Law.

Chapter VI.

Article LXII. The imposition of a new tax or the modification of the rates (of an existing one) shall be determined by law. However, all such administrative fees or other revenue having the nature of compensation shall not fall within the category of the above clause. The raising of national loans and the contracting of other liabilities to the charge of the National Treasury, except those that are provided in the Budget, shall require the consent of the Imperial Diet.

Article LXIII. The taxes levied at present shall, in so far as they are not remodelled by new law, be collected according to the old system.

Article LXIV. The expenditure and revenue of the State require the consent of the Imperial Diet by means of an annual Budget. Any and all expenditures overpassing the appropriations set forth in the Titles and Paragraphs of the Budget, or that are not provided for in the Budget, shall subsequently require the approbation of the Imperial Diet.

Article LXV. The Budget shall be first laid before the House of Representatives.

Article LXVI. The expenditures of the Im-

perial House shall be defrayed every year out of the National Treasury, according to the present fixed amount for the same, and shall not require the consent thereto of the Imperial Diet, except in case an increase thereof is found necessary.

Article LXVII. Those already fixed expenditures based by the Constitution upon the powers appertaining to the Emperor, and such expenditures as may have arisen by the effect of law, or that appertain to the legal obligations of the Government, shall be neither rejected nor reduced by the Imperial Diet, without the concurrence of the Government.

Article LXVIII. In order to meet special requirements, the Government may ask the consent of the Imperial Diet to a certain amount as a Continuing Expenditure Fund, for a previously fixed number of years.

Article LXIX. In order to supply deficiencies which are unavoidable, in the Budget, and to meet requirements unprovided for in the same, a Reserve Fund shall be provided in the Budget.

Article LXX. When the Imperial Diet cannot be convoked, owing to the external or internal condition of the country, in case of urgent need for the maintenance of public safety, the Government may take all necessary financial measures, by means of an Imperial Ordinance. In the case mentioned in the preceding clause, the matter shall be submitted to the Imperial Diet at its next session, and its approbation shall be obtained thereto.

Article LXXI. When the Imperial Diet has not voted on the Budget, or when the Budget has not been brought into actual existence, the Government shall carry out the Budget of the preceding year.

Article LXXII. The final account of the expenditures and revenue of the State shall be verified and confirmed by the Board of Audit, and it shall be submitted by the Government to the Imperial Diet, together with the report of verification of the said Board. The organization and competency of the Board of Audit shall be determined by law separately.

Chapter VII.

Article LXXIII. When it has become necessary in future to amend the provisions of the present Constitution, a project to that effect shall be submitted to the Imperial Diet by Imperial Order. In the above case, neither House can open the debate, unless not less than two-thirds of the whole number of members are present, and no amendment can be passed, unless a majority of not less than two-thirds of the members present is obtained.

Article LXXIV. No modification of the Imperial House Law shall be required to be submitted to the deliberation of the Imperial Diet. No provision of the present Constitution can be modified by the Imperial House Law.

Article LXXV. No modification can be introduced into the Constitution, or into the Imperial House Law, during the time of a Regency.

Article LXXVI. Existing legal enactments, such as laws, regulations, ordinances, or by whatever names they may be called, shall, so far as they do not conflict with the present Constitution, continue in force. All existing contracts or orders, that entail obligations upon the Government, and that are connected with expenditure shall come within the scope of Art. LXVII.

CONSTITUTION OF MEXICO.

The following translated text of the Constitution of Mexico is from Bulletin No. 9 of the Bureau of the American Republics, published in July, 1891:

Preamble.—In the name of God and with the authority of the Mexican people. The representatives of the different States, of the District and Territories which compose the Republic of Mexico, called by the Plan proclaimed in Ayutla the 1st of March, 1854, amended in Acapulco the 11th day of the same month and year, and by the summons issued the 17th of October, 1855, to constitute the nation under the form of a popular, representative, democratic republic, exercising the powers with which they are invested, comply with the requirements of their high office, decreeing the following political Constitution of the Mexican Republic, on the indestructible basis of its legitimate independence, proclaimed the 16th of September, 1810, and completed the 27th of September, 1821.

Article 1. The Mexican people recognize that the rights of man are the basis and the object of social institutions. Consequently they declare that all the laws and all the authorities of the country must respect and maintain the guarantees which the present Constitution establishes.

Art. 2. In the Republic all are born free. Slaves who set foot upon the national territory recover, by that act alone, their liberty, and have a right to the protection of the laws.

Art. 3. Instruction is free. The law shall determine what professions require a diploma for their exercise, and with what requisites they must be issued.

Art. 4. Every man is free to adopt the profession, industrial pursuit, or occupation which suits him, the same being useful and honorable, and to avail himself of its products. Nor shall any one be hindered in the exercise of such profession, industrial pursuit, or occupation, unless by judicial sentence when such exercise attacks the rights of a third party, or by governmental resolution, dictated in terms which the law marks out, when it offends the rights of society.

Art. 5. No one shall be obliged to give personal services without just compensation, and without his full consent. The state shall not permit any contract, pact, or agreement to be carried into effect which has for its object the diminution, loss, or irrevocable sacrifice of the liberty of man, whether it be for the sake of labor, education, or a religious vow. The law, consequently, may not recognize monastic orders, nor may it permit their establishment, whatever may be the denomination or object with which they claim to be formed.* Neither may an agreement be permitted in which anyone stipulates for his proscription or banishment.

Art. 6. The expression of ideas shall not be the object of any judicial or administrative inquisition, except in case it attacks morality, the rights of a third party, provokes some crime or misdemeanor, or disturbs public order.

Art. 7. The liberty to write and to publish writings on any subject whatsoever is inviolable. No law or authority shall establish previous censure, nor require security from authors or printers,

nor restrict the liberty of the press, which has no other limits than respect of private life, morality, and the public peace. The crimes which are committed by means of the press shall be judged by the competent tribunals of the Federation, or by those of the States, those of the Federal District and the Territory of Lower California, in accordance with their penal laws.*

Art. 8. The right of petition, exercised in writing in a peaceful and respectful manner, is inviolable; but in political matters only citizens of the Republic may exercise it. To every petition must be returned a written opinion by the authority to whom it may have been addressed, and the latter is obliged to make the result known to the petitioner.

Art. 9. No one may be deprived of the right peacefully to assemble or unite with others for any lawful object whatsoever, but only citizens of the Republic may do this in order to take part in the political affairs of the country. No armed assembly has a right to deliberate.

Art. 10. Every man has a right to possess and carry arms for his security and legitimate defence. The law shall designate what arms are prohibited and the punishment which those shall incur who carry them.

Art. 11. Every man has a right to enter and to go out of the Republic, to travel through its territory and change his residence, without the necessity of a letter of security, passport, safe-conduct, or other similar requisite. The exercise of this right shall not prejudice the legitimate faculties of the judicial or administrative authority in cases of criminal or civil responsibility.

Art. 12. There are not, nor shall there be recognized in the Republic, titles of nobility, or prerogatives, or hereditary honors. Only the people, legitimately represented, may decree recompenses in honor of those who may have rendered or may render eminent services to the country or to humanity.

Art. 13. In the Mexican Republic no one may be judged by special law nor by special tribunals. No person or corporation may have privileges, or enjoy emoluments, which are not compensation for a public service and are established by law. Martial law may exist only for crimes and offences which have a definite connection with military discipline. The law shall determine with all clearness the cases included in this exception.

Art. 14. No retroactive law shall be enacted. No one may be judged or sentenced except by laws made prior to the act, and exactly applicable to it, and by a tribunal which shall have been previously established by law.

Art. 15. Treaties shall never be made for the extradition of political offenders, nor for the extradition of those violators of the public order who may have held in the country where they committed the offence the position of slaves; nor agreements or treaties in virtue of which may be altered the guarantees and rights which this Constitution grants to the man and to the citizen.

* This article was amended May 15, 1883, by introducing the last sentence as a substitute for the following: "The crimes of the press shall be judged by one jury which tests the fact and by another which applies the law and designates the punishment."

* This sentence was introduced into the original article September 25, 1878, with other less important amendments.

Art. 16. No one may be molested in his person, family, domicile, papers and possessions, except in virtue of an order written by the competent authority, which shall establish and assign the legal cause for the proceedings. In the case of in flagrante delicto any person may apprehend the offender and his accomplices, placing them without delay at the disposal of the nearest authorities.

Art. 17. No one may be arrested for debts of a purely civil character. No one may exercise violence in order to reclaim his rights. The tribunals shall always be prompt to administer justice. This shall be gratuitous, judicial costs being consequently abolished.

Art. 18. Imprisonment shall take place only for crimes which deserve corporal punishment. In any state of the process in which it shall appear that such a punishment might not be imposed upon the accused, he shall be set at liberty under bail. In no case shall the imprisonment or detention be prolonged for default of payment of fees, or of any furnishing of money whatever.

Art. 19. No detention shall exceed the term of three days, unless justified by a writ showing cause of imprisonment and other requisites which the law establishes. The mere lapse of this term shall render responsible the authority that orders or consents to it, and the agents, ministers, wardens, or jailers who execute it. Any maltreatment in the apprehension or in the confinement of the prisoners, any injury which may be inflicted without legal ground, any tax or contribution in the prisons, is an abuse which the laws must correct and the authorities severally punish.

Art. 20. In every criminal trial the accused shall have the following guarantees: I. That the grounds of the proceedings and the name of the accuser, if there shall be one, shall be made known to him. II. That his preparatory declaration shall be taken within forty-eight hours, counting from the time he may be placed at the disposal of the judge. III. That he shall be confronted with the witnesses who testify against him. IV. That he shall be furnished with the data which he requires and which appear in the process, in order to prepare for his defence. V. That he shall be heard in defence by himself or by counsel, or by both, as he may desire. In case he should have no one to defend him, a list of official defenders shall be presented to him, in order that he may choose one or more who may suit him.

Art. 21. The application of penalties properly so called belongs exclusively to the judicial authority. The political or administrative authorities may only impose fines, as correction, to the extent of five hundred dollars, or imprisonment to the extent of one month, in the cases and manner which the law shall expressly determine.

Art. 22. Punishments by mutilation and infamy, by branding, flogging, the bastinado, torture of whatever kind, excessive fines, confiscation of property, or any other unusual or extraordinary penalties, shall be forever prohibited.

Art. 23. In order to abolish the penalty of death, the administrative power is charged to establish, as soon as possible, a penitentiary system. In the meantime the penalty of death shall be abolished for political offences, and shall not be extended to other cases than treason during foreign war, highway robbery, arson, parricide, homicide with treachery, premeditation or ad-

vantage, to grave offences of the military order, and piracy, which the law shall define.

Art. 24. No criminal proceeding may have more than three instances. No one shall be tried twice for the same offence, whether by the judgment he be absolved or condemned. The practice of absolving from the instance is abolished.

Art. 25. Sealed correspondence which circulates by the mails is free from all registry. The violation of this guarantee is an offence which the law shall punish severely.

Art. 26. In time of peace no soldier may demand quarters, supplies, or other real or personal service without the consent of the proprietor. In time of war he shall do this only in the manner prescribed by the law.

Art. 27. Private property shall not be appropriated without the consent of the owner, except for the sake of public use, and with previous indemnification. The law shall determine the authority which may make the appropriation and the conditions under which it may be carried out. No corporation, civil or ecclesiastical, whatever may be its character, denomination, or object, shall have legal capacity to acquire in proprietorship or administer for itself real estate, with the single exception of edifices destined immediately and directly to the service and object of the institution.*

Art. 28. There shall be no monopolies, nor places of any kind for the sale of privileged goods, nor prohibitions under titles of protection to industry. There shall be excepted only those relative to the coining of money, to the mails, and to the privileges which, for a limited time, the law may concede to inventors or perfectors of some improvement.

Art. 29. In cases of invasion, grave disturbance of the public peace, or any other cases whatsoever which may place society in great danger or conflict, only the President of the Republic in concurrence with the Council of Ministers and with the approbation of the Congress of the Union, and, in the recess thereof, of the permanent deputation, may suspend the guarantees established by this Constitution, with the exception of those which assure the life of man; but such suspension shall be made only for a limited time, by means of general provisions, and without being limited to a determined person. If the suspension should take place during the session of Congress, this body shall concede the authorizations which it may esteem necessary in order that the Executive may meet properly the situation. If the suspension should take place during the recess, the permanent deputation shall convoke the Congress without delay in order that it may make the authorizations.

Art. 30. Mexicans are— I. All those born, within or without the Republic, of Mexican parents. II. Foreigners who are naturalized in conformity with the laws of the Federation. III. Foreigners who acquire real estate in the Republic or have Mexican children; provided they do not manifest their resolution to preserve their nationality.

Art. 31. It is an obligation of every Mexican— I. To defend the independence, the territory, the honor, the rights and interests of his country. II. To contribute for the public expenses, as well of the Federation as of the State and municipality

* See Article 3 of Additions to the Constitution.

in which he resides, in the proportional and equitable manner which the laws may provide.

Art. 32. Mexicans shall be preferred to foreigners in equal circumstances, for all employments, charges, or commissions of appointment by the authorities, in which the condition of citizenship may not be indispensable. Laws shall be issued to improve the condition of Mexican laborers, rewarding those who distinguish themselves in any science or art, stimulating labor, and founding practical colleges and schools of arts and trades.

Art. 33. Foreigners are those who do not possess the qualifications determined in Article 30. They have a right to the guarantees established by . . . [Articles 1-29] of the present Constitution, except that in all cases the Government has the right to expel pernicious foreigners. They are under obligation to contribute to the public expenses in the manner which the laws may provide, and to obey and respect the institutions, laws, and authorities of the country, subjecting themselves to the judgments and sentences of the tribunals, without power to seek other protection than that which the laws concede to Mexican citizens.

Art. 34. Citizens of the Republic are all those who, having the quality of Mexicans, have also the following qualifications: I. Eighteen years of age if married, or twenty-one if not married. II. An honest means of livelihood.

Art. 35. The prerogatives of the citizen are—**I.** To vote at popular elections. **II.** The privilege of being voted for for any office subject to popular election, and of being selected for any other employment or commission, having the qualifications established by law. **III.** To associate to discuss the political affairs of the country. **IV.** To take up arms in the army or in the national guard for the defence of the Republic and its institutions. **V.** To exercise in all cases the right of petition.

Art. 36. Every citizen of the Republic is under the following obligations: **I.** To be inscribed on the municipal roll, stating the property which he has, or the industry, profession, or labor by which he subsists. **II.** To enlist in the national guard. **III.** To vote at popular elections in the district to which he belongs. **IV.** To discharge the duties of the offices of popular election of the Federation, which in no case shall be gratuitous.

Art. 37. The character of citizen is lost—**I.** By naturalization in a foreign country. **II.** By serving officially the government of another country or accepting its decorations, titles, or employments without previous permission from the Federal Congress; excepting literary, scientific, and humanitarian titles, which may be accepted freely.

Art. 38. The law shall prescribe the cases and the form in which may be lost or suspended the rights of citizenship and the manner in which they may be regained.

Art. 39. The national sovereignty resides essentially and originally in the people. All public power emanates from the people, and is instituted for their benefit. The people have at all times the inalienable right to alter or modify the form of their government.

Art. 40. The Mexican people voluntarily constitute themselves a democratic, federal, representative republic, composed of States free and sovereign in all that concerns their internal gov-

ernment, but united in a federation established according to the principles of this fundamental law.

Art. 41. The people exercise their sovereignty by means of Federal officers in cases belonging to the Federation, and through those of the States in all that relates to the internal affairs of the States within the limits respectively established by this Federal Constitution, and by the special Constitutions of the States, which latter shall in no case contravene the stipulations of the Federal Compact.

Art. 42. The National Territory comprises that of the integral parts of the Federation and that of the adjacent islands in both oceans.

Art. 43. The integral parts of the Federation are: the States of Aguascalientes, Colima, Chiapas, Chihuahua, Durango, Guanajuato, Guerrero, Jalisco, Mexico, Michoacan, Nuevo Leon and Coahuila, Oajaca, Puebla, Querétaro, San Luis Potosi, Sinaloa, Sonora, Tabasco, Tamaulipas, Tlascala, Valle de Mexico, Veracruz, Yucatan, Zacatecas, and the Territory of Lower California.

Art. 44. The States of Aguascalientes, Chiapas, Chihuahua, Durango, Guerrero, Mexico, Puebla, Querétaro, Sinaloa, Sonora, Tamaulipas, and the Territory of Lower California shall preserve the limits which they now have.

Art. 45. The States of Colima and Tlascala shall preserve in their new character of States the limits which they have had as Territories of the Federation.

Art. 46. The State of the Valley of Mexico shall be formed of the territory actually composing the Federal District, but the erection into a State shall only have effect when the supreme Federal authorities are removed to another place.

Art. 47. The State of Nuevo Leon and Coahuila shall comprise the territory which has belonged to the two distinct States of which it is now formed, except the part of the hacienda of Bonanza, which shall be reincorporated in Zacatecas, on the same terms in which it was before its incorporation in Coahuila.

Art. 48. The States of Guanajuato, Jalisco, Michoacan, Oajaca, San Luis Potosi, Tabasco, Veracruz, Yucatan, and Zacatecas shall recover the extension and limits which they had on the 31st of December, 1852, with the alterations the following Article establishes.

Art. 49. The town of Contepec, which has belonged to Guanajuato, shall be incorporated in Michoacan. The municipality of Ahualulco, which has belonged to Zacatecas, shall be incorporated in San Luis Potosi. The municipalities of Ojo-Caliente and San Francisco de los Adames, which have belonged to San Luis, as well as the towns of Nueva Tlascala and San Andres del Teul, which have belonged to Jalisco, shall be incorporated in Zacatecas. The department of Tuxpan shall continue to form a part of Veracruz. The canton of Huimanguillo, which has belonged to Veracruz, shall be incorporated in Tabasco.*

* Besides the twenty-four States which are mentioned in this section there have been created subsequently, according to executive decrees issued in accordance with the Constitution, the four following:

XXV. That of Campeche, separated from Yucatan.

XXVI. That of Coahuila, separated from Nuevo Leon.

XXVII. That of Hidalgo, in territory of the ancient State of Mexico, which formed the second military district.

XXVIII. That of Morelos, in territory also of the ancient State of Mexico, which formed the third military district.

Art. 50. The supreme power of the Federation is divided for its exercise into legislative, executive, and judicial. Two or more of these powers shall never be united in one person or corporation, nor the legislative power be deposited in one individual.

Art. 51. The legislative power of the nation is deposited in a general Congress, which shall be divided into two houses, one of Deputies and the other of Senators.*

Art. 52. The House of Deputies shall be composed of representatives of the nation, elected in their entire number every two years by Mexican citizens.

Art. 53. One deputy shall be elected for each forty thousand inhabitants, or for a fraction which exceeds twenty thousand. The territory in which the population is less than that determined in this article shall, nevertheless, elect one deputy.

Art. 54. For each deputy there shall be elected one alternate.

Art. 55. The election for deputies shall be indirect in the first degree, and by secret ballot, in the manner which the law shall prescribe.

Art. 56. In order to be eligible to the position of a deputy it is required that the candidate be a Mexican citizen in the enjoyment of his rights; that he be fully twenty-five years of age on the day of the opening of the session; that he be a resident of the State or Territory which makes the election, and that he be not an ecclesiastic. Residence is not lost by absence in the discharge of any public trust bestowed by popular election.

Art. 57. The positions of Deputy and of Senator are incompatible with any Federal commission or office whatsoever for which a salary is received.

Art. 58. The Deputies and the Senators from the day of their election to the day on which their trust is concluded, may not accept any commission or office offered by the Federal Executive, for which a salary is received, except with the previous license of the respective house. The same requisites are necessary for the alternates of Deputies and Senators when in the exercise of their functions. A. The Senate is composed of two Senators for each State and two for the Federal District. The election of Senators shall be indirect in the first degree. The Legislature of each State shall declare elected the person who shall have obtained the absolute majority of the votes cast, or shall elect from among those who shall have obtained the relative majority in the manner which the electoral law shall prescribe. For each Senator there shall be elected an alternate. B. The Senate shall be renewed one-half every two years. The Senators named in the second place shall go out at the end of the first two years, and thereafter the half who have held longer. C. The same qualifications are required for a Senator as for a Deputy, except that of age, which must be at least thirty years on the day of the opening of the session.

Art. 59. The Deputies and Senators are privileged from arrest for their opinions manifested in the performance of their duties, and shall never be liable to be called to account for them.

Art. 60. Each house shall judge of the election of its members, and shall solve the doubts which may arise regarding them.

Art. 61. The houses may not open their sessions nor perform their functions without the presence in the Senate of at least two-thirds, and in the House of Deputies of more than one-half of the whole number of their members, but those present of one or the other body must meet on the day indicated by the law and compel the attendance of absent members under penalties which the law shall designate.

Art. 62. The Congress shall have each year two periods of ordinary sessions: the first, which may be prorogued for thirty days, shall begin on the 16th of September and end on the 15th of December, and the second, which may be prorogued for fifteen days, shall begin the 1st of April and end the last day of May.

Art. 63. At the opening of the sessions of the Congress the President of the Union shall be present and shall pronounce a discourse in which he shall set forth the state of the country. The President of the Congress shall reply in general terms.

Art. 64. Every resolution of the Congress shall have the character of a law or decree. The laws and decrees shall be communicated to the Executive, signed by the Presidents of both houses and by a Secretary of each of them, and shall be promulgated in this form: "The Congress of the United States of Mexico decrees:" (Text of the law or decree.)

Art. 65. The right to initiate laws or decrees belongs: I. To the President of the Union. II. To the Deputies and Senators of the general Congress. III. To the Legislatures of the States.

Art. 66. Bills presented by the President of the Republic, by the Legislatures of the States, or by deputations from the same, shall pass immediately to a committee. Those which the Deputies or the Senators may present shall be subjected to the procedure which the rules of debate may prescribe.

Art. 67. Every bill which shall be rejected in the house where it originated, before passing to the other house, shall not again be presented during the sessions of that year.

Art. 68. The second period of sessions shall be destined, in all preference, to the examination of and action upon the estimates of the following fiscal year, to passing the necessary appropriations to cover the same, and to the examination of the accounts of the past year, which the Executive shall present.

Art. 69. The last day but one of the first period of sessions the Executive shall present to the House of Deputies the bill of appropriations for the next year following and the accounts of the preceding year. Both shall pass to a committee of five Representatives appointed on the same day, which shall be under obligation to examine said documents, and present a report on them at the second session of the second period.

Art. 70. The formation of the laws and of the decrees may begin indiscriminately in either of the two houses, with the exception of bills which treat of loans, taxes, or imposts, or of the recruiting of troops, all of which must be discussed first in the House of Deputies.

Art. 71. Every bill, the consideration of which does not belong exclusively to one of the houses, shall be discussed successively in both, the rules of debate being observed with reference to the form, the intervals, and manner of proceeding in discussions and voting. A. A bill having been

* The original form of this article was as follows: "The exercise of the supreme legislative power is vested in one assembly, which shall be denominated Congress of the Union."

approved in the house where it originated, shall pass for its discussion to the other house. If the latter body should approve it, it will be remitted to the Executive, who, if he shall have no observations to make, shall publish it immediately. B. Every bill shall be considered as approved by the Executive if not returned with observations to the house where it originated within ten working days, unless during this term Congress shall have closed or suspended its sessions, in which case the return must be made the first working day on which it shall meet. C. A bill rejected wholly or in part by the Executive must be returned with his observations to the house where it originated. It shall be discussed again by this body, and if it should be confirmed by an absolute majority of votes, it shall pass again to the other house. If by this house it should be sanctioned with the same majority, the bill shall be a law or decree, and shall be returned to the Executive for promulgation. The voting on the law or decree shall be by name. D. If any bill should be rejected wholly in the house in which it did not originate, it shall be returned to that in which it originated with the observations which the former shall have made upon it. If having been examined anew it should be approved by the absolute majority of the members present, it shall be returned to the house which rejected it, which shall again take it into consideration, and if it should approve it by the same majority it shall pass to the Executive, to be treated in accordance with division A; but, if it should reject it, it shall not be presented again until the following sessions. E. If a bill should be rejected only in part, or modified, or receive additions by the house of revision, the new discussion in the house where it originated shall treat only of the rejected part, or of the amendments or additions, without being able to alter in any manner the articles approved. If the additions or amendments made by the house of revision should be approved by the absolute majority of the votes present in the house where it originated, the whole bill shall be passed to the Executive, to be treated in accordance with division A. But if the additions or amendments made by the house of revision should be rejected by the majority of the votes in the house where it originated, they shall be returned to the former, in order that the reasons of the latter may be taken into consideration; and if by the absolute majority of the votes present said additions or amendments shall be rejected in this second revision, the bill, in so far as it has been approved by both houses, shall be passed to the Executive, to be treated in accordance with division A; but if the house of revision should insist, by the absolute majority of the votes present, on said additions or amendments, the whole bill shall not be again presented until the following sessions, unless both houses agree by the absolute majority of their members present that the law or decree shall be issued solely with the articles approved, and that the parts added or amended shall be reserved to be examined and voted in the following sessions. F. In the interpretation, amendment, or repeal of the laws or decrees, the rules established for their formation shall be observed. G. Both houses shall reside in the same place, and they shall not remove to another without first agreeing to the removal and on the time and manner of making it, designating the same point for the meeting of both. But if both houses,

agreeing to the removal, should differ as to time, manner, or place, the Executive shall terminate the difference by choosing one of the places in question. Neither house shall suspend its sessions for more than three days without the consent of the other. H. When the general Congress meets in extra sessions, it shall occupy itself exclusively with the object or objects designated in the summons; and if the special business shall not have been completed on the day on which the regular session should open, the extra sessions shall be closed nevertheless, leaving the points pending to be treated of in the regular sessions. The Executive of the Union shall not make observations on the resolutions of the Congress when this body prorogues its sessions or exercises functions of an electoral body or a jury.

Art. 72. The Congress has power—I. To admit new States or Territories into the Federal Union, incorporating them in the nation. II. To erect Territories into States when they shall have a population of eighty thousand inhabitants and the necessary elements to provide for their political existence. III. To form new States within the limits of those existing, it being necessary to this end—1. That the fraction or fractions which asked to be erected into a State shall number a population of at least one hundred and twenty thousand inhabitants. 2. That it shall be proved before Congress that they have elements sufficient to provide for their political existence. 3. That the Legislatures of the States, the territories of which are in question, shall have been heard on the expediency or in expediency of the establishment of the new State, and they shall be obliged to make their report within six months, counted from the day on which the communication relating to it shall have been remitted to them. 4. That the Executive of the Federation shall likewise be heard, who shall send his report within seven days, counted from the date on which he shall have been asked for it. 5. That the establishment of the new State shall have been voted for by two-thirds of the Deputies and Senators present in their respective houses. 6. That the resolution of Congress shall have been ratified by the majority of the Legislatures of the States, after examining a copy of the proceedings; provided that the Legislatures of the States whose territory is in question shall have given their consent. 7. If the Legislatures of the States whose territory is in question shall not have given their consent, the ratification mentioned in the preceding clause must be made by two-thirds of the Legislatures of the other States. A. The exclusive powers of the House of Deputies are—I. To constitute itself an Electoral College in order to exercise the powers which the law may assign to it, in respect to the election of the Constitutional President of the Republic, Magistrates of the Supreme Court, and Senators for the Federal District. II. To judge and decide upon the resignations which the President of the Republic or the Magistrates of the Supreme Court of Justice may make. The same power belongs to it in treating of licenses solicited by the first. III. To watch over, by means of an inspecting committee from its own body, the exact performance of the business of the chief auditorship. IV. To appoint the principal officers and other employees of the same. V. To constitute itself a jury of accusation, for the high functionaries of whom Article 103 of this Constitution treats. VI. To

examine the accounts which the Executive must present annually, to approve the annual estimate of expenses, and to initiate the taxes which in its judgment ought to be decreed to cover these expenses. B. The exclusive powers of the Senate are—*I.* To approve the treaties and diplomatic conventions which the Executive may make with foreign powers. *II.* To ratify the appointments which the President of the Republic may make of ministers, diplomatic agents, consuls-general, superior employés of the Treasury, colonels and other superior officers of the national army and navy, on the terms which the law shall provide. *III.* To authorize the Executive to permit the departure of national troops beyond the limits of the Republic, the passage of foreign troops through the national territory, the station of squadrons of other powers for more than a month in the waters of the Republic. *IV.* To give its consent in order that the Executive may dispose of the national guard outside of their respective States or Territories, determining the necessary force. *V.* To declare, when the Constitutional legislative and executive powers of a State shall have disappeared, that the case has arrived for appointing to it a provisional Governor, who shall call elections in conformity with the Constitutional laws of the said State. The appointment of Governor shall be made by the Federal Executive with the approval of the Senate, and in its recesses with the approval of the Permanent Commission. Said functionary shall not be elected Constitutional Governor at the elections which are had in virtue of the summons which he shall issue. *VI.* To decide political questions which may arise between the powers of a State, when any of them may appear with this purpose in the Senate, or when on account of said questions Constitutional order shall have been interrupted during a conflict of arms. In this case the Senate shall dictate its resolution, being subject to the general Constitution of the Republic and to that of the State. The law shall regulate the exercise of this power and that of the preceding. *VII.* To constitute itself a jury of judgment in accordance with Article 105 of this Constitution. C. Each of the houses may, without the intervention of the other—*I.* Dictate economic resolutions relative to its internal regimen. *II.* Communicate within itself, and with the Executive of the Union, by means of committees from its own body. *III.* Appoint the employés of its secretaryship, and make the internal regulations for the same. *IV.* Issue summons for extraordinary elections, with the object of filling the vacancies of their respective members. *IV.* To regulate definitely the limits of the States, terminating the differences which may arise between them relative to the demarcation of their respective territories, except when these difficulties have a contentious character. *V.* To change the residence of the supreme powers of the Federation. *VI.* To establish the internal order of the Federal District and Territories, taking as a basis that the citizens shall choose by popular election the political, municipal, and judicial authorities, and designating the taxes necessary to cover their local expenditure. *VII.* To approve the estimates of the Federal expenditure, which the Executive must annually present to it, and to impose the necessary taxes to cover them. *VIII.* To give rules under which the Executive may make loans on the credit of the nation; to approve said loans,

and to recognize and order the payment of the national debt. *IX.* To establish tariffs on foreign commerce, and to prevent, by means of general laws, onerous restrictions from being established with reference to the commerce between the States. *X.* To issue codes, obligatory throughout the Republic, of mines and commerce, comprehending in this last banking institutions. *XI.* To create and suppress public Federal employments and to establish, augment, or diminish their salaries. *XII.* To ratify the appointments which the Executive may make of ministers, diplomatic agents, and consuls, of the higher employés of the Treasury, of the colonels and other superior officers of the national army and navy. *XIII.* To approve the treaties, contracts, or diplomatic conventions which the Executive may make. *XIV.* To declare war in view of the data which the Executive may present to it. *XV.* To regulate the manner in which letters of marque may be issued; to dictate laws according to which must be declared good or bad the prizes on sea and land, and to issue laws relating to maritime rights in peace and war. *XVI.* To permit or deny the entrance of foreign troops into the territory of the Republic, and to consent to the station of squadrons of other powers for more than a month in the waters of the Republic. *XVII.* To permit the departure of national troops beyond the limits of the Republic.* *XVIII.* To raise and maintain the army and navy of the Union, and to regulate their organization and service. *XIX.* To establish regulations with the purpose of organizing, arming, and disciplining the national guard, reserving respectively to the citizens who compose it the appointment of the commanders and officers, and to the States the power of instructing it in conformity with the discipline prescribed by said regulations. *XX.* To give its consent in order that the Executive may control the national guard outside of its respective States and Territories, determining the necessary force. *XXI.* To dictate laws on naturalization, colonization, and citizenship. *XXII.* To dictate laws on the general means of communication and on the post-office and mails. *XXIII.* To establish mints, fixing the conditions of their operation, to determine the value of foreign money, and adopt a general system of weights and measures. *XXIV.* To fix rules to which must be subject the occupation and sale of public lands and the price of these lands. *XXV.* To grant pardons for crimes cognizable by the tribunals of the Federation. *XXVI.* To grant rewards or recompense for eminent services rendered to the country or humanity. *XXVII.* To prorogue for thirty working days the first period of its ordinary sessions. *XXVIII.* To form rules for its internal regulation, to take the necessary measures to compel the attendance of absent members, and to correct the faults or omissions of those present. *XXIX.* To appoint and remove freely the employés of its secretaryship and those of the chief auditorship, which shall be organized in accordance with the provisions of the law. *XXX.* To make all laws which may be necessary and proper to render effective the foregoing powers and all others granted by this Constitution and the authorities of the Union.†

*Article I, by Section B, Clause III., Article 72, of the law of the 10th of November, 1854.

†See respecting this Article the additions A, B, and C to Article 72 of the law of the 13th of November, already cited.

Art. 73. During the recess of Congress there shall be a Permanent Deputation composed of twenty-nine members, of whom fifteen shall be Deputies and fourteen Senators, appointed by their respective houses the evening before the close of the sessions.

Art. 74. The attributes of the Permanent Deputation are—**I.** To give its consent to the use of the national guard in the cases mentioned in Article 72, Clause XX. **II.** To determine by itself, or on the proposal of the Executive, after hearing him in the first place, the summons of Congress, or of one house alone, for extra sessions, the vote of two-thirds of the members present being necessary in both cases. The summons shall designate the object or objects of the extra sessions. **III.** To approve the appointments which are referred to in Article 85, Clause III. **IV.** To administer the oath of office to the President of the Republic, and to the Justices of the Supreme Court, in the cases provided by this Constitution.* **V.** To report upon all the business not disposed of, in order that the Legislature which follows may immediately take up such unfinished business.

Art. 75. The exercise of the supreme executive power of the Union is vested in a single individual, who shall be called "President of the United States of Mexico."

Art. 76. The election of President shall be indirect in the first degree, and by secret ballot, in such manner as may be prescribed by the electoral law.

Art. 77. To be eligible to the position of President, the candidate must be a Mexican citizen by birth, in the exercise of his rights, be fully thirty-five years old at the time of the election, not belong to the ecclesiastical order, and reside in the country at the time the election is held.

Art. 78. The President shall enter upon the performance of the duties of his office on the first of December, and shall continue in office four years, being eligible for the Constitutional period immediately following; but he shall remain incapable thereafter to occupy the presidency by a new election until four years shall have passed, counting from the day on which he ceased to perform his functions.

Art. 79. In the temporary default of the President of the Republic, and in the vacancy before the installation of the newly-elected President, the citizen who may have performed the duties of President or Vice-President of the Senate, or of the Permanent Commission in the periods of recess, during the month prior to that in which said default may have occurred, shall enter upon the exercise of the executive power of the Union.

A. The President and Vice-President of the Senate and of the Permanent Commission shall not be reelected to those offices until a year after having held them. **B.** If the period of sessions of the Senate or of the Permanent Commission shall begin in the second half of a month, the default of the President of the Republic shall be covered by the President or Vice-President who may have acted in the Senate or in the Permanent Commission during the first half of the said month. **C.** The Senate and the Permanent Commission shall renew, the last day of each month, their Presidents and Vice-Presidents. For these

offices the Permanent Commission shall elect, alternatively, in one month two Deputies and in the following month two Senators. **D.** When the office of President of the Republic is vacant, the functionary who shall take it constitutionally as his substitute must issue, within the definite term of fifteen days, the summons to proceed to a new election, which shall be held within the term of three months, and in accordance with the provisions of Article 76 of this Constitution. The provisional President shall not be eligible to the presidency at the elections which are held to put an end to his provisional term. **E.** If, on account of death or any other reason, the functionaries who, according to this law, should take the place of the President of the Republic, might not be able in any absolute manner to do so, it shall be taken, under predetermined conditions, by the citizen who may have been President or Vice-President of the Senate or the Permanent Commission in the month prior to that in which they discharged those offices. **F.** When the office of President of the Republic shall become vacant within the last six months of the constitutional period, the functionary who shall take the place of the President shall terminate this period. **G.** To be eligible to the position of President or Vice-President of the Senate or of the Permanent Commission, one must be a Mexican citizen by birth. **H.** If the vacancy in the office of President of the Republic should occur when the Senate and Permanent Commission are performing their functions in extra sessions, the President of the Commission shall fill the vacancy, under conditions indicated in this article. **I.** The Vice-President of the Senate or of the Permanent Commission shall enter upon the performance of the functions which this Article confers upon them, in the vacancies of the office of President of the Senate or of the Permanent Commission, and in the periods only while the impediment lasts. **J.** The newly-elected President shall enter upon the discharge of his duties, at the latest, sixty days after that of the election. In case the House of Deputies shall not be in session, it shall be convened in extra session, in order to make the computation of votes within the term mentioned.

Art. 80. In the vacancy of the office of President, the period of the newly-elected President shall be computed from the first of December of the year prior to that of his election, provided he may not have taken possession of his office on the date which Article 78 determines.

Art. 81. The office of President of the Union may not be resigned, except for grave cause, approved by Congress, before whom the resignation shall be presented.

Art. 82. If for any reason the election of President shall not have been made and published by the first of December, on which the transfer of the office should be made, or the President-elect shall not have been ready to enter upon the discharge of his duties, the term of the former President shall end nevertheless, and the supreme executive power shall be deposited provisionally in the functionary to whom it belongs according to the provisions of the reformed Article 79 of this Constitution.

Art. 83. The President, on taking possession of his office, shall take an oath before Congress, and in its recess before the Permanent Commission, under the following formula: "I swear to

* See the Amendment of September 25, 1873, Art. 4.

perform loyally and patriotically the duties of President of the United States of Mexico, according to the Constitution, and seek in everything for the welfare and prosperity of the Union."*

Art. 84. The President may not remove from the place of the residence of the Federal powers, nor lay aside the exercise of his functions, without grave cause, approved by the Congress, and in its recesses by the Permanent Commission.

Art. 85. The powers and obligations of the President are the following: I. To promulgate and execute the laws passed by the Congress of the Union, providing, in the administrative sphere, for their exact observance. II. To appoint and remove freely the Secretaries of the Cabinet, to remove the diplomatic agents and superior employés of the Treasury, and to appoint and remove freely the other employés of the Union whose appointment and removal are not otherwise provided for in the Constitution or in the laws. III. To appoint ministers, diplomatic agents, consuls-general, with the approval of Congress, and, in its recess, of the Permanent Commission. IV. To appoint, with the approval of Congress, the colonels and other superior officers of the national army and navy, and the superior employés of the treasury. V. To appoint the other officers of the national army and navy, according to the laws. VI. To control the permanent armed force by sea and land for the internal security and external defence of the Federation. VII. To control the national guard for the same objects within the limits established by Article 72, Clause XX. VIII. To declare war in the name of the United States of Mexico, after the passage of the necessary law by the Congress of the Union. IX. To grant letters of marque, subject to bases fixed by the Congress. X. To direct diplomatic negotiations and make treaties with foreign powers, submitting them for the ratification of the Federal Congress. XI. To receive ministers and other envoys from foreign powers. XII. To convoke Congress in extra sessions when the Permanent Commission shall consent to it. XIII. To furnish the judicial power with that assistance which may be necessary for the prompt exercise of its functions. XIV. To open all classes of ports, to establish maritime and frontier custom-houses and designate their situation. XV. To grant, in accordance with the laws, pardons to criminals sentenced for crimes within the jurisdiction of the Federal tribunals. XVI. To grant exclusive privileges, for a limited time and according to the proper law, to discoverers, inventors, or perfectors of any branch of industry.

Art. 86. For the dispatch of the business of the administrative department of the Federation there shall be the number of Secretaries which the Congress may establish by a law, which shall provide for the distribution of business and prescribe what shall be in charge of each Secretary.

Art. 87. To be a Secretary of the Cabinet it is required that one shall be a Mexican citizen by birth, in the exercise of his rights, and fully twenty-five years old.

Art. 88. All the regulations, decrees, and orders of the President must be signed by the Secretary of the Cabinet who is in charge of the department to which the subject belongs. Without this requisite they shall not be obeyed.

* See the Amendments and Additions of September 25, 1873.

Art. 89. The Secretaries of the Cabinet, as soon as the sessions of the first period shall be opened, shall render an account to the Congress of the state of their respective departments.

Art. 90. The exercise of the judicial power of the Federation is vested in a Supreme Court of Justice and in the district and circuit courts.

Art. 91. The Supreme Court of Justice shall be composed of eleven judges, four supernumeraries, one fiscal, and one attorney-general.

Art. 92. Each of the members of the Supreme Court of Justice shall remain in office six years, and his election shall be indirect in the first degree, under conditions established by the electoral law.

Art. 93. In order to be elected a member of the Supreme Court of Justice it is necessary that one be learned in the science of the law in the judgment of the electors, more than thirty-five years old, and a Mexican citizen by birth, in the exercise of his rights.

Art. 94. The members of the Supreme Court of Justice, on entering upon the exercise of their charge, shall take an oath before Congress, and, in its recesses, before the Permanent Commission, in the following form: "Do you swear to perform loyally and patriotically the charge of Magistrate of the Supreme Court of Justice, which the people have conferred upon you in conformity with the Constitution, seeking in everything the welfare and prosperity of the Union?"*

Art. 95. A member of the Supreme Court of Justice may resign his office only for grave cause, approved by the Congress, to whom the resignation shall be presented. In the recesses of the Congress the judgment shall be rendered by the Permanent Commission.

Art. 96. The law shall establish and organize the circuit and district courts.

Art. 97. It belongs to the Federal tribunals to take cognizance of— I. All controversies which may arise in regard to the fulfilment and application of the Federal laws, except in the case in which the application affects only private interests; such a case falls within the competence of the local judges and tribunals of the common order of the States, of the Federal District, and of the Territory of Lower California. II. All cases pertaining to maritime law. III. Those in which the Federation may be a party. IV. Those that may arise between two or more States. V. Those that may arise between a State and one or more citizens of another State. VI. Civil or criminal cases that may arise under treaties with foreign powers. VII. Cases concerning diplomatic agents and consuls.

Art. 98. It belongs to the Supreme Court of Justice, in the first instance, to take cognizance of controversies which may arise between one State and another, and of those in which the Union may be a party.

Art. 99. It belongs also to the Supreme Court of Justice to determine the questions of jurisdiction which may arise between the Federal tribunals, between these and those of the States, or between the courts of one State and those of another.

Art. 100. In the other cases comprehended in Article 97, the Supreme Court of Justice shall be a court of appeal or, rather, of last resort, according to the graduation which the law may make in the jurisdiction of the circuit and district courts.

* See Additions to the Constitution, September 25, 1873.

Art. 101. The tribunals of the Federation shall decide all questions which arise — I. Under laws or acts of whatever authority which violate individual guarantees. II. Under laws or acts of the State authority which violate or restrain the sovereignty of the States. III. Under laws or acts of the State authority which invade the sphere of the Federal authority.

Art. 102. All the judgments which the preceding article mentions shall be had on petition of the aggrieved party, by means of judicial proceedings and forms which shall be prescribed by law. The sentence shall be always such as to affect private individuals only, limiting itself to defend and protect them in the special case to which the process refers, without making any general declaration respecting the law or act which gave rise to it.

Art. 103. The Senators, the Deputies, the members of the Supreme Court of Justice, and the Secretaries of the Cabinet are responsible for the common crimes which they may commit during their terms of office, and for the crimes, misdemeanors, and negligence into which they may fall in the performance of the duties of said office. The Governors of the States are likewise responsible for the infraction of the Constitution and Federal laws. The President of the Republic is also responsible; but during the term of his office he may be accused only for the crimes of treason against the country, express violation of the Constitution, attack on the freedom of election, and grave crimes of the common order. The high functionaries of the Federation shall not enjoy any Constitutional privilege for the official crimes, misdemeanors, or negligence into which they may fall in the performance of any employment, office, or public commission which they may have accepted during the period for which, in conformity with the law, they shall have been elected. The same shall happen with respect to those common crimes which they may commit during the performance of said employment, office, or commission. In order that the cause may be initiated when the high functionary shall have returned to the exercise of his proper functions, proceeding should be undertaken in accordance with the provision of Article 104 of this Constitution.

Art. 104. If the crime should be a common one, the House of Representatives, formed into a grand jury, shall declare, by an absolute majority of votes, whether there is or is not ground to proceed against the accused. In the negative case, there shall be no ground for further proceedings; in the affirmative, the accused shall be, by the said act, deprived of his office, and subjected to the action of the ordinary tribunals.

Art. 105. The houses shall take cognizance of official crimes, the House of Deputies as a jury of accusation, the Senators as a jury of judgment. The jury of accusation shall have for its object to declare, by an absolute majority of votes, whether the accused is or is not culpable. If the declaration should be absolutory, the functionary shall continue in the exercise of his office; if it should be condemnatory, he shall be immediately deprived of his office, and shall be placed at the disposal of the Senate. The latter, formed into a jury of judgment, and, with the presence of the criminal and of the accuser, if there should be one, shall proceed to apply, by an absolute majority of votes, the punishment which the law designates.

Art. 106. A judgment of responsibility for official crimes having been pronounced, no favor of pardon may be extended to the offender.

Art. 107. The responsibility for official crimes and misdemeanors may be required only during the period in which the functionary remains in office, and one year thereafter.

Art. 108. With respect to demands of the civil order, there shall be no privilege or immunity for any public functionary.

Art. 109. The States shall adopt for their internal regimen the popular, representative, republican form of government, and may provide in their respective Constitutions for the reelection of the Governors in accordance with what Article 78 provides for the President of the Republic.

Art. 110. The States may regulate among themselves, by friendly agreements, their respective boundaries; but those regulations shall not be carried into effect without the approval of the Congress of the Union.

Art. 111. The States may not in any case — I. Form alliances, treaties, or coalitions with another State, or with foreign powers, excepting the coalition which the frontier States may make for offensive or defensive war against the Indians. II. Grant letters of marque or reprisal. III. Coin money, or emit paper money or stamped paper.

Art. 112. Neither may any State, without the consent of the Congress of the Union: I. Establish tonnage duties, or any port duty, or impose taxes or duties upon importations or exportations. II. Have at any time permanent troops or vessels of war. III. Make war by itself on any foreign power except in cases of invasion or of such imminent peril as to admit of no delay. In these cases the State shall give notice immediately to the President of the Republic.

Art. 113. Each State is under obligation to deliver without delay the criminals of other States to the authority that claims them.

Art. 114. The Governors of the States are obliged to publish and cause to be obeyed the Federal laws.

Art. 115. In each State of the Federation entire faith and credit shall be given to the public acts, records, and judicial proceedings of all the other States. The Congress may, by means of general laws, prescribe the manner of proving said acts, records, and proceedings, and the effect thereof.

Art. 116. The powers of the Union are bound to protect the States against all invasion or external violence. In case of insurrection or internal disturbance they shall give them like protection, provided the Legislature of the State, or the Executive, if the Legislature is not in session, shall request it.

Art. 117. The powers which are not expressly granted by this Constitution to the Federal authorities are understood to be reserved to the States.

Art. 118. No person may at the same time hold two Federal elective offices; but if elected to two, he may choose which of them he will fill.

Art. 119. No payment shall be made which is not comprehended in the budget or determined by a subsequent law.

Art. 120. The President of the Republic, the members of the Supreme Court of Justice, the Deputies, and other public officers of the Federa-

CONSTITUTION OF MEXICO.

tion, who are chosen by popular election, shall receive a compensation for their services, which shall be determined by law and paid by the Federal Treasury. This compensation may not be renounced, and any law which augments or diminishes it shall not have effect during the period for which a functionary holds the office.

Art. 121. Every public officer, without any exception, before taking possession of his office, shall take an oath to maintain this Constitution and the laws which emanate from it.*

Art. 122. In time of peace no military authority may exercise more functions than those which have close connection with military discipline. There shall be fixed and permanent military commands only in the castles, fortresses, and magazines which are immediately under the government of the Union; or in encampments, barracks, or depots which may be established outside of towns for stationing troops.

Art. 123. It belongs exclusively to the Federal authorities to exercise, in matters of religious worship and external discipline, the intervention which the laws may designate.

Art. 124. The States shall not impose any duty for the simple passage of goods in the internal commerce. The Government of the Union alone may decree transit duties, but only with respect to foreign goods which cross the country by international or interoceanic lines, without being on the national territory more time than is necessary to traverse it and depart to the foreign country. They shall not prohibit, either directly or indirectly, the entrance to their territory, or the departure from it, of any merchandise, except on police grounds; nor burden the articles of national production on their departure for a foreign country or for another State. The exemptions from duties which they concede shall be general; they may not be decreed in favor of the products of specified origin. The quota of the import for a given amount of merchandise shall be the same, whatever may have been its origin, and no heavier burden may be assigned to it than that which the similar products of the political entity in which the import is decreed bear. The national merchandise shall not be submitted to definite route nor to inspection or registry on the ways, nor any fiscal document be demanded for its internal circulation. Nor shall they burden foreign merchandise with a greater quota than that which may have been permitted them by the Federal law to receive.

Art. 125. The forts, military quarters, magazines, and other edifices necessary to the govern-

CONSTITUTION OF NORWAY.

ment of the Union shall be under the immediate inspection of the Federal authorities.

Art. 126. This Constitution, the laws of the Congress of the Union which emanate from it, and all the treaties made or which shall be made by the President of the Republic, with the approval of Congress, shall be the supreme law of the whole Union. The judges of each State shall be guided by said Constitution, law, and treaties in spite of provisions to the contrary which may appear in the Constitutions or laws of the States.

Art. 127. The present Constitution may be added to or reformed. In order that additions or alterations may become part of the Constitution, it is required that the Congress of the Union, by a vote of two-thirds of the members present, shall agree to the alterations or additions, and that these shall be approved by the majority of the Legislatures of the States. The Congress of the Union shall count the votes of the Legislatures and make the declaration that the reforms or additions have been approved.

Art. 128. This Constitution shall not lose its force and vigor even if its observance be interrupted by a rebellion. In case that by any public disturbance a government contrary to the principles which it sanctions shall be established, as soon as the people recover their liberty its observance shall be reestablished, and in accordance with it and the laws which shall have been issued in virtue of it, shall be judged not only those who shall have figured in the government emanating from the rebellion, but also those who shall have coöperated with it.

Additions.

Art. 1. The State and the Church are independent of one another. The Congress may not pass laws establishing or prohibiting any religion.

Art. 2. Marriage is a civil contract. This and the other acts relating to the civil state of persons belong to the exclusive jurisdiction of the functionaries and authorities of the civil order, within limits provided by the laws, and they shall have the force and validity which the same attribute to them.

Art. 3. No religious institution may acquire real estate or capital fixed upon it, with the single exception established in Article 27 of this Constitution.

Art. 4. The simple promise to speak the truth and to comply with the obligations which have been incurred, shall be substituted for the religious oath, with its effects and penalties.

CONSTITUTION OF NEW YORK STATE.—Its several revisions. See NEW

YORK: A. D. 1777, 1821, 1846, 1867–1882, and 1894.

CONSTITUTION OF NORWAY.

"On May 17, 1814, . . . a constitution was granted to Norway. The Fundamental Law of the constitution (*Grundlov*), which almost every peasant farmer now-a-days has framed and hung up in the chief room of his house, bears the date the 4th of November 1814."—C. F. Keary, *Norway and the Norwegians*, ch. 13.—The following is the text of the constitution as granted in 1814:

*See the Additions of September 25, 1873.

Title I.

Article 1. The kingdom of Norway is a free, independent, undivisible, and inalienable state, united to Sweden under the same king. The form of its government is limited, hereditary, and monarchical.

2. The Lutheran evangelical religion shall continue to be the ruling religion of the kingdom; those of the inhabitants which profess it

CONSTITUTION OF NORWAY.

are bound to bring up their children in its tenets; Jesuits and monastic orders shall not be prohibited in the kingdom. The admission of Jews into the kingdom shall always be, as formerly, prohibited.

Title II.

Article 1. The executive power is declared to be in the person of the king.

2. The king shall always profess the evangelical Lutheran religion, which he shall maintain and protect.

3. The person of the king is sacred: he can neither be blamed or accused.

4. The succession is lineal, and collateral, such as it is determined by the order of succession decreed by the general estates of Sweden, and sanctioned by the king in the Act of the 26th September 1810, of which a translation is annexed to this Constitution. Of the number of legitimate heirs, is comprehended the child in its mother's womb, which, as soon as it shall be born, after the death of its father, takes the place which is due to him in the line of succession. When a Prince, heir of the re-united crowns of Norway and Sweden, shall be born, his name, and the day of his birth shall be announced at the first Storthing, and inscribed in the registers.

5. Should there not be found any prince, a legitimate heir to the throne, the king can propose his successor at the Storthing of Norway, and at the same time to the states general of Sweden. As soon as the king shall have made the proposition, the representatives of the two nations shall choose from among them a committee, invested with the right of determining the election, in case the king's proposition should not, by the plurality of voices, be approved of separately by the representatives of each of the countries. The number of members of this committee, shall be composed of an equal number of Norwegians and Swedes, so that the step to follow in the election shall be regulated by a law which the king shall propose at the same time to the next Storthing, and the states general of Sweden. They shall draw by lot one out of the committee for its member.

6. The Storthing* of Norway, and the states general of Sweden shall concert to fix by a law the king's majority; if they cannot agree, a committee, taken from the representatives of the two nations, shall decide it in the manner established by article 5th, title 2nd. As soon as the king shall have attained the years of majority fixed by the law, he shall publicly declare that he is of age.†

7. When the king comes of age he shall take into his hands the reins of government, and make the following oath to the Storthing: "I swear, on my soul and conscience, to govern the kingdom of Norway conformably to its constitution and laws." If the Storthing is not then assembled, this oath shall be deposited in writing in the council, and solemnly repeated by the king at the first Storthing, either *vivâ voce* or by writing, by the person whom he shall have appointed to this effect.

8. The coronation of the king shall take place when he is of age, in the cathedral of Drontheim,

*The national assembly, or general estates of the kingdom.

†A law of the Storthing, 13th July 1815, and sanctioned by the king, declared that the king is major on arriving at the age of eighteen years.

CONSTITUTION OF NORWAY.

at the time and with those ceremonies that shall be fixed by himself.

9. The king shall pass some time in Norway yearly, unless this is prevented by urgent circumstances.

10. The king shall exclusively choose a council of Norwegians, citizens, who shall have attained the seventieth year of their age. This council shall be composed at least of a minister of state, and seven other members. In like manner the king can create a viceroy or a government. The king shall arrange the affairs between the members of the council, in such manner as he shall consider expedient. Besides these ordinary members of council, the king, or in his absence the viceroy (or the government jointly with the ordinary members of council) may on particular occasions, call other Norwegians, citizens, to sit there, provided they are not members of the Storthing. The father and son, or two brothers, shall not, at the same time, have a seat in the council.

11. The king shall appoint a governor of the kingdom in his absence, and on failure it shall be governed by the viceroy or a governor, with five at least of the members of council. They shall govern the kingdom in the name and behalf of the king; and they shall observe inviolably, as much the principles contained in this fundamental law as those relative precepts the king shall lay down in his instructions. They shall make a humble report to the king upon those affairs they have decided. All matters shall be decided by plurality of votes. If the votes happen to be equal, the viceroy or governor, or in their absence the first member of council, shall have two.

12. The prince royal or his eldest son can be viceroy; but this can only occur when they have attained the majority of the king. In the case of a governor, either a Norwegian or a Swede may be nominated. The viceroy shall remain in the kingdom, and shall not be allowed to reside in a foreign one beyond three months each year. When the king shall be present, the viceroy's functions shall cease. If there is no viceroy, but only a governor, the functions of the latter shall also cease, in which event he is only the first member of council.

13. During the residence of the king in Sweden, he shall always have near him the minister of state of Norway, and two of the members of the Norwegian council, when they shall be annually changed. These are charged with similar duties, and the same constitutional responsibility attaches to them as to the sitting council in Norway; and it is only in their presence that state affairs shall be decided by the king. All petitions addressed to the king by Norwegian citizens ought, first, to be transmitted to the Norwegian council, that they may be duly considered previously to decisions being pronounced. In general, no affairs ought to be decided before the council has expressed an opinion, in case it should be met with important objections. The minister of state of Norway ought to report the affairs, and he shall be responsible for expedition in the resolutions which shall have been taken.

14. The king shall regulate public worship and its rites, as well as all assemblies that have religion for their object, so that ministers of religion may observe their forms prescribed to them.

15. The king can give and abolish ordinances which respect commerce, the custom-house, manufactures, and police. They shall not, however, be contrary to the constitution nor the laws adopted by the Storthing. They shall have provisional force until the next Storthing.

16. The king shall in general regulate the taxes imposed by the Storthing. The public treasurer of Norway shall remain in Norway, and the revenues shall only be employed towards the expenses of Norway.

17. The king shall superintend the manner in which the domains and crown property of the state are employed and governed, in the manner fixed by the Storthing, and which shall be most advantageous to the country.

18. The king in council has the right to pardon criminals when the supreme tribunal has pronounced its opinion. The criminal has the choice of receiving pardon from the king or of submitting to the punishment to which he is condemned. In the cases which the Odelsting would have ordered to be carried to the Rigsret, there can be no other pardon but that which shall liberate from a capital punishment.

19. The king, after having heard his Norwegian council, shall dispose of all the civil, ecclesiastic, and military employments. Those who assist in the functions shall swear obedience and fidelity to the constitution and to the king. The princes of the royal family cannot be invested with any civil employment; yet the prince royal, or his eldest son, may be nominated viceroy.

20. The governor of the kingdom, the minister of state, other members of council, and those employed in the functions connected with these offices, the envoys and consuls, superior magistrates, civil and ecclesiastic commanders of regiments, and other military bodies, governors of fortresses, and commanders-in-chief of ships of war, shall, without previous arrest, be deposed by the king and his Norwegian council. As to the pension to be granted to those employed they shall be decided by the first Storthing. In the mean time, they shall enjoy two-third parts of their former salary. The others employed can only be suspended by the king, and they shall afterwards be brought before the tribunals, but cannot be deposed excepting by order of an arrest, and the king cannot make them change their situations contrary to their will.

21. The king can confer orders of knighthood on whomsoever he chooses, in reward of distinguished services, which shall be published; but he can confer no other rank, with the title, than that which is attached to every employment. An order of knighthood does not liberate the person on whom it is conferred from those duties common to all citizens, and particular titles are not conferred in order to obtain situations in the state. Such persons shall preserve the title and rank attached to those situations which they have occupied. No person can, for the future, obtain personal, mixed, or hereditary privileges.

22. The king elects and dismisses, whenever he thinks proper, all the officers attached to his court.

23. The king is commander-in-chief of all the forces, by sea and land, in the kingdom, and these cannot be increased or diminished without the consent of the Storthing. They will not be ceded to the service of any foreign power, and troops belonging to a foreign power (except

auxiliary troops in case of a hostile invasion,) cannot enter the country without the consent of the Storthing. During peace, the Norwegian troops shall be stationed in Norway, and not in Sweden. Notwithstanding this the king may have in Sweden a Norwegian guard, composed of volunteers, and may for a short time, not exceeding six weeks in a year, assemble troops in the environs of the two countries, for exercising; but in case there are more than 3,000 men, composing the army of one of the two countries, they cannot in time of peace enter the other.* The Norwegian army and gun-boats shall not be employed without the consent of the Storthing. The Norwegian fleet shall have dry docks, and during peace its stations and harbours in Norway. Ships of war of both countries shall be supplied with the seamen of the other, so long as they shall voluntarily engage to serve. The landwehr, and other Norwegian forces, which are not calculated among the number of troops of the line, shall never be employed beyond the frontiers of the kingdom of Norway.

24. The king has the right of assembling troops, commencing war, making peace, concluding and dissolving treaties, sending ministers to, and receiving those of, foreign courts. When he begins war he ought to advise the council of Norway, consult it, and order it to prepare an address on the state of the kingdom, relative to its finances, and proper means of defence. On this the king shall convoke the minister of state of Norway, and those of the council of Sweden, at an extraordinary assembly, when he shall explain all those relative circumstances that ought to be taken into consideration; with a representation of the Norwegian council, and a similar one on the part of Sweden, upon the state of the kingdom, shall then be presented. The king shall then require advice upon these objects; and each shall be inserted in a register, under the responsibility imposed by the constitution, when the king shall then adopt that resolution which he judges most proper for the benefit of the state.

25. On this occasion all the members of council must be present, if not prevented by some lawful cause, and no resolution ought to be adopted unless one half of the members are present. In Norwegian affairs, which, according to the fifteenth article, are decided in Sweden, no resolution shall be taken unless the minister of state of Norway and one of the members of council, or two members, are present.

26. The representations respecting employments, and other important acts, excepting those of a diplomatic and military nature, properly so called, shall be referred to the council by him who is one of the members in the department charged with it, who shall accordingly draw up the resolution adopted in council.

27. If any member of council is prevented from appearing, and referring the affairs which belong to his peculiar department, he shall be replaced in this office by one of the others appointed to this purpose, either by the king, if personally present, and if not, by him who has precedence in the council, jointly with the other members composing it. Should several of these be prevented

* The law of the Storthing, 5th July 1816, bears, that troops of the line shall be employed beyond the frontiers of the kingdom, and the interpretation given by it to that law is, that troops of the line shall be employed beyond the frontiers of the two kingdoms.

from appearing, so that only one half of the ordinary number is present, the other employed in the offices shall in like manner have right to sit in council; and in that event it shall be afterwards referred to the king, who decides if they ought to continue to exercise this office.

28. The council shall keep a register of all affairs that may come under its consideration. Every individual who sits in it shall be at liberty to give his opinion freely, which the king is obliged to hear; but it is reserved to his majesty to adopt resolutions after he has consulted his own mind. If a member of council finds that the king's resolution is contrary to the form of government, the laws of the kingdom, or injurious to the state, he shall consider it his duty to oppose it, and record his opinion in the register accordingly; but he who remains silent shall be presumed to have agreed with the king, and shall be responsible for it, even in the case of being referred to at a future period; and the Odelsthing is empowered to bring him before the Rigsret.

29. All the orders issued by the king (military affairs excepted) shall be countersigned by the Norwegian minister of state.

30. Resolutions made in absence of the king, by the council in Norway, shall be publicly proclaimed and signed by the viceroy, or the governor and council, and countersigned by him who shall have referred them, and he is further responsible for the accuracy and dispatch with the register in which the resolution is entered.

31. All representations relative to the affairs of this country, as well as writings concerning them, must be in the Norwegian language.

32. The heir-apparent to the throne, if a son of the reigning king, shall have the title of prince royal, the other legitimate heirs to the crown shall be called princes, and the king's daughters princesses.

33. As soon as the heir shall have attained the age of eighteen, he shall have a right to sit in council, without, however, having a vote, or any responsibility.

34. No prince of the blood shall marry without permission of the king, and in case of contravention, he shall forfeit his right to the crown of Norway.

35. The princes and princesses of the royal family, shall not, so far as respects their persons, be bound to appear before other judges, but before the king or whomsoever he shall have appointed for that purpose.

36. The minister of state of Norway, as well as the two members of council who are near the king, shall have a seat and deliberative voice in the Swedish council, where objects relative to the two kingdoms shall be treated of. In affairs of this nature the advice of the council ought also to be understood, unless these require quick dispatch, so as not to allow time.

37. If the king happens to die, and the heir to the throne is under age, the council of Norway, and that of Sweden, shall assemble, and mutually call a convocation of the Storting in Norway and Diet of Sweden.

38. Although the representatives of the two kingdoms should have assembled, and regulated the administration during the king's minority, a council composed of an equal number of Norwegian and Swedish members shall govern the kingdoms, and follow their fundamental recipro-

cal laws. The minister of state of Norway who sits in this council, shall draw by ballot in order to decide on which of its members the preference shall happen to fall.

39. The regulations contained in the two last articles shall be always equally adopted after the constitution of Sweden. It belongs to the Swedish council, in this quality, to be at the head of government.

40. With respect to more particular and necessary affairs that might occur in cases under the three former articles, the king shall propose to the first Storting in Norway, and at the first Diet in Sweden, a law having for its basis the principle of a perfect equality existing between the two kingdoms.

41. The election of guardians to be at the head of government during the king's minority, shall be made after the same rules and manner formerly prescribed in the second title, Article 5th, concerning the election of an heir to the throne.

42. The individuals who in the cases under the 38th and 39th articles, are at the head of government, shall be, the Norwegians at the Storting of Norway, and shall take the following oath: "I swear, on my soul and conscience, to govern the kingdom conformably to its constitution and laws;" and the Swedes shall also make a similar oath. If there is not a Storting or Diet, it shall be deposited in writing in the council, and afterwards repeated at the first of these when they happen to assemble.

43. As soon as the governments have ceased, they shall be restored to the king, and the Storting.

44. If the Storting is not convoked, agreeably to what is expressed in the 38th and 39th articles, the supreme tribunal shall consider it as an imperious duty, at the expiration of four weeks, to call a meeting.

45. The charge of the education of the king, in case his father may not have left in writing instructions regarding it, shall be regulated in the manner laid down under the 5th and 41st articles. It is held to be an invariable rule, that the king during his minority shall learn the Norwegian language.

46. If the masculine line of the royal family is extinct, and there has not been elected a successor to the throne, the election of a new dynasty shall be proceeded in, and after the manner prescribed under the 5th article. In the mean time the executive power shall be exercised agreeably to the 41st article.

Title III.

Article 1. Legislative power is exercised by the Storting, which is constituted of two houses, namely, the Lagthing and Odelsthing.

2. None shall have a right to vote but Norwegians, who have attained twenty-five years, and resided in the country during five years. 1. Those who are exercising, or who have exercised functions. 2. Possess land in the country, which has been let for more than five years. 3. Are burgesses of some city, or possess either in it, or some village, a house, or property of the value of at least three hundred bank crowns in silver.

3. There shall be drawn up in cities by the magistrates, and in every parish by the public authority and the priest, a register of all the in-

habitants who are voters. They shall also note in it without delay, those changes which may successively take place. Before being inscribed in the register, every one shall take an oath, before the tribunal, of fidelity to the constitution.

4. Right of voting is suspended in the following cases: 1. By the accusation of crime before a tribunal; 2. By not attaining the proper age; 3. By insolvency or bankruptcy, until creditors have obtained their payment in whole, unless it can be proved that the former has arisen from fire, or other unforeseen events.

5. The right of voting is forfeited definitively: 1. By condemnation to the house of correction, slavery, or punishment for defamatory language; 2. By acceptance of the service of a foreign power, without the consent of government. 3. By obtaining the right of citizen in a foreign country. 4. By conviction of having purchased and sold votes, and having voted in more than one electoral assembly.

6. The electoral assemblies and districts are held every three years, and shall finish before the end of the month of December.

7. Electoral assemblies shall be held for the country, at the manor-house of the parish, the church, town-hall, or some other fit place. In the country they shall be directed by the first minister and assistants; and in towns, by magistrates and sheriffs; election shall be made in the order appointed by the registers. Disputes concerning the right of voting shall be decided by the directors of the assembly, from whose judgment an appeal may be made to the Storthing.

8. Before proceeding to the election, the constitution shall be read with a loud voice in the cities, by the first magistrate, and in the country by the curate.

9. In cities, an elector shall be chosen by fifty eligible inhabitants. They shall assemble eight days after, in the place appointed by the magistrate, and choose, either from amongst themselves, or from others who are eligible in the department of their election, a fourth of their number to sit at the Storthing, that is after the manner of three to six in choosing one; seven to ten in electing two; eleven to fourteen in choosing three, and fifteen to eighteen in electing four; which is the greatest number permitted to a city to send. If these consist of less than 150 eligible inhabitants, they shall send the electors to the nearest city, to vote conjointly with the electors of the former, when the two shall only be considered as forming one district.*

10. In each parish in the country the eligible inhabitants shall choose in proportion to their number electors in the following manner; that is to say, a hundred may choose one; two to three hundred, three; and so on in the same proportion.† Electors shall assemble a month after, in the place appointed by the bailiff, and choose, either from amongst themselves or the others of

the bailiwick eligible, a tenth of their own number to sit at the Storthing, so that five to fourteen may choose one; fifteen to twenty-four may choose two of them; twenty-five to thirty-four, three; thirty-five and beyond it, four. This is the greatest number.

11. The powers contained in the 9th and 10th articles shall have their proper force and effect until next Storthing. If it is found that the representatives of cities constitute more or less than one-third of those of the kingdom, the Storthing, as a rule for the future, shall have right to change these powers in such a manner that representatives of the cities may join with those of the country, as one to two; and the total number of representatives ought not to be under seventy-five, nor above one hundred.

12. Those eligible, who are in the country, and are prevented from attending by sickness, military service, or other proper reasons, can transmit their votes in writing to those who direct the electoral assemblies, before their termination.

13. No person can be chosen a representative, unless he is thirty years of age, and has resided ten years in the country.

14. The members of council, those employed in their offices, officers of the court, and its pensioners, shall not be chosen as representatives.

15. Individuals chosen to be representatives, are obliged to accept of the election, unless prevented by motives considered lawful by the electors, whose judgment may be submitted to the decision of the Storthing. A person who has appeared more than once as representative at an ordinary Storthing, is not obliged to accept of the election for the next ordinary Storthing. If legal reasons prevent a representative from appearing at the Storthing, the person who after him has most votes shall take his place.

16. As soon as representatives have been elected, they shall receive a writing in the country from the superior magistrate, and in the cities from the magistrate, also from all the electors, as a proof that they have been elected in the manner prescribed by the constitution. The Storthing shall judge of the legality of this authority.

17. All representatives have a right to claim an indemnification in travelling to and returning from the Storthing; as well as subsistence during the period they shall have remained there.

18. During the journey, and return of representatives, as well as the time they may have attended the Storthing, they are exempted from arrest; unless they are seized in some flagrant and public act, and out of the Storthing they shall not be responsible for the opinions they may have declared in it. Every one is bound to conform himself to the order established in it.

19. Representatives, chosen in the manner above declared, compose the Storthing of the kingdom of Norway.

20. The opening of the Storthing shall be made the first lawful day in the month of February, every three years, in the capital of the kingdom, unless the king, in extraordinary circumstances, by foreign invasion or contagious disease, fixes on some other city of the kingdom. Such change ought then to be early announced.

21. In extraordinary cases, the king has the right of assembling the Storthing, without respect to the ordinary time. The king will then cause to be issued a proclamation, which is to be read in all the principal churches six weeks at

* A law passed 8th February 1816, contains this amendment. Twenty-five electors and more shall not elect more than three representatives, which shall be, ad interim, the greatest number which the bailiwick can send; and, consequently, out of which the number of representatives in the county, which are sixty-one, shall be diminished from fifty to fifty three.

† If future Storthings discover the number of representatives of towns from an increase of population should amount to thirty, the same Storthing shall have right to augment of new the number of representatives of the country, in the manner fixed by the principles of the constitution, which shall be held as a rule in future.

least previous to the day fixed for the assembling of members of the Storthing at the place appointed.

22. Such extraordinary Storthing may be dissolved by the king when he shall judge fit.

23. Members of the Storthing shall continue in the exercise of their office during three consecutive years, as much during an extraordinary as any ordinary Storthing that might be held during this time.

24. If an extraordinary Storthing is held at a time when the ordinary Storthing ought to assemble, the functions of the first will cease, as soon as the second shall have met.

25. The extraordinary Storthing, no more than the ordinary, can be held if two-thirds of the members do not happen to be present.

26. As soon as the Storthing shall be organized, the king, or the person who shall be appointed by him for that purpose, shall open it by an address, in which he is to describe the state of the kingdom, and those objects to which he directs the attention of the Storthing. No deliberation ought to take place in the king's presence. The Storthing shall choose from its members one-fourth part to form the Lagthing, and the other three-fourths to constitute the Odelsting. Each of these houses shall have its private meetings, and nominate its president and secretary.

27. It belongs to the Storthing,—1. To make and abolish laws, establish imposts, taxes, custom-houses, and other public acts, which shall, however, only exist until the 1st of July of that year, when a new Storthing shall be assembled, unless this last is expressly renewed by them. 2. To make loans, by means of the credit of the state. 3. To watch over the finances of the state. 4. To grant sums necessary for its expenses. 5. To fix the yearly grant for the maintenance of the king and viceroy, and also appendages of the royal family; which ought not, however, to consist in landed property. 6. To exhibit the register of the sitting council in Norway, and all the reports, and public documents (the affairs of military command excepted), and certified copies, or extracts of the registers kept by the ministers of state and members of council near the king, or the public documents, which shall have been produced. 7. To communicate whatever treaties the king shall have concluded in the name of the state with foreign powers, excepting secret articles, provided these are not in contradiction with the public articles. 8. To require all individuals to appear before the Storthing on affairs of state, the king and royal family excepted. This is not, however, applicable to the princes of the royal family, as they are invested with other offices than that of viceroy. 9. To examine the lists of provisional pensions; and to make such alterations as shall be judged necessary. 10. To name five revisers, who are annually to examine the accounts of the state, and publish printed extracts of these, which are to be remitted to the revisers also every year before the 1st of July. 11. To naturalize foreigners.

28. Laws ought first to be proposed to the Odelsting, either by its own members or the government, through one of the members of council. If the proposition is accepted, it shall be sent to the Lagthing, who approve or reject it; and in the last case return it accompanied with remarks. These shall be weighed by the Odelsting, which sets the proposed law aside, or

remits it to the Lagthing, with or without alterations. When a law shall have been twice proposed by the Odelsting to the Lagthing, and the latter shall have rejected it a second time, the Storthing shall assemble, when two-thirds of the votes shall decide upon it. Three days at least ought to pass between each of those deliberations.

29. When a resolution proposed by the Odelsting shall be approved by the Lagthing, or by the Storthing alone, a deputation of these two houses to the Storthing shall present it to the king if he is present, and if not, to the viceroy, or Norwegian council, and require it may receive the royal sanction.

30. Should the king approve of the resolution, he subscribes to it, and from that period it is declared to pass into a public law. If he disapproves he returns it to the Odelsting, declaring that at this time he does not give it his sanction.

31. In this event, the Storthing, then assembled, ought to submit the resolution to the king, who may proceed in it in the same manner if the first ordinary Storthing presents again to him the same resolution. But if, after reconsideration, it is still adopted by the two houses of the third ordinary Storthing, and afterwards submitted to the king, who shall have been intreated not to withhold his sanction to a resolution that the Storthing, after the most mature deliberations, believes to be useful; it shall acquire the strength of a law, even should it not receive the king's signature before the closing of the Storthing.

32. The Storthing shall sit as long as it shall be judged necessary, but not beyond three months, without the king's permission. When the business is finished, or after it has assembled for the time fixed, it is dissolved by the king. His Majesty gives, at the same time, his sanction to the decrees not already decided, either in corroborating or rejecting them. All those not expressly sanctioned are held to be rejected by him.

33. Laws are to be drawn up in the Norwegian language, and (those mentioned in 31st article excepted) in name of the king, under the seal of the kingdom, and in these terms:—"We, &c. Be it known, that there has been submitted to us a decree of the Storthing (of such a date) thus expressed (follows the resolution); We have accepted and sanctioned as law the said decree, in giving it our signature, and seal of the kingdom."

34. The king's sanction is not necessary to the resolutions of the Storthing, by which the legislative body,—1. Declares itself organized as the Storthing, according to the constitution. 2. Regulates its internal police. 3. Accepts or rejects writs of present members. 4. Confirms or rejects judgments relative to disputes respecting elections. 5. Naturalizes foreigners. 6. And in short, the resolution by which the Odelsting orders some member of council to appear before the tribunals.

35. The Storthing can demand the advice of the supreme tribunal in judicial matters.

36. The Storthing will hold its sittings with open doors, and its acts shall be printed and published, excepting in cases where a contrary measure shall have been decided by the plurality of votes.

37. Whoever molests the liberty and safety of the Storthing, renders himself guilty of an act of high treason towards the country.

Title IV.

Article 1. The members of the Lagthing and supreme tribunal composing the Rigsret, judge in the first and last instance of the affairs entered upon by the Odelsting, either against the members of council or supreme tribunal for crimes committed in the exercise of their offices, or against the members of Storthing for acts committed by them in a similar capacity. The president of the Lagthing has the precedence in the Rigsret.

2. The accused can, without declaring his motive for so doing, refuse, even a third part of the members of the Rigsret, provided, however, that the number of persons who compose this tribunal be not reduced to less than fifteen.

3. The supreme tribunal shall judge in the last instance, and ought not to be composed of a lesser number than the resident and six assessors.

4. In time of peace the supreme tribunal, with two superior officers appointed by the king, constitutes a tribunal of the second and last resort in all military affairs which respect life, honour, and loss of liberty for a time beyond the space of three months.

5. The arrests of the supreme tribunal shall not in any case be called upon to be submitted to revisal.

6. No person shall be named member of the supreme tribunal, if he has not attained at least thirty years of age.

Title V.

Article 1. Employments in the states shall be conferred only on Norwegian citizens, who profess the Evangelical Lutheran religion — have sworn fidelity to the constitution and king, speak the language of the country, and are,—1. Either born in the kingdom of parents who were then subjects of the state. 2. Or born in a foreign country, their father and mother being Norwegians, and at that period not the subjects of another state. 3. Or, who on the 17th May, 1814, had a permanent residence in the kingdom, and did not refuse to take an oath to maintain the independence of Norway. 4. Or who in future shall remain ten years in the kingdom. 5. Or who have been naturalized by the Storthing. Foreigners, however, may be nominated to these official situations in the university and colleges, as well as to those of physicians, and consuls in a foreign country. In order to succeed to an office in the superior tribunal, the person must be thirty years old; and to fill a place in the inferior magistracy,—a judge of the tribunal of first instance, or a public receiver, he must be twenty-five.

2. Norway does not acknowledge herself owing any other debt than that of her own.

3. A new general code, of a civil and criminal nature, shall first be published; or, if that is impracticable, at the second ordinary Storthing. Meantime, the laws of the state, as at present existing, shall preserve their effect, since they are not contrary to this fundamental law, or provisional ordinances published in the interval. Permanent taxes shall continue to be levied until next Storthing.

4. No protecting dispensation, letter of respite, or restitutions, shall be granted after the new general code shall be published.

5. No persons can be judged but in conformity to the law, or be punished until a tribunal shall

have taken cognizance of the charges directed against them. Torture shall never take place.

6. Laws shall have no retro-active effect.

7. Fees due to officers of justice are not to be combined with rents payable to the public treasury.

8. Arrest ought not to take place excepting in cases and in the manner fixed by law. Illegal arrests, and unlawful delays, render him who occasions them responsible to the person arrested. Government is not authorized to employ military force against the members of the state, but under the forms prescribed by the laws, unless an assembly which disturbs the public tranquillity does not instantly disperse after the articles of the code concerning sedition shall have been read aloud three times by the civil authorities.

9. The liberty of the press shall be established. No person can be punished for a writing he has ordered to be printed or published, whatever may be the contents of it, unless he has, by himself or others, wilfully declared, or prompted others to, disobedience of the laws, contempt for religion, and constitutional powers, and resistance to their operations; or has advanced false and defamatory accusations against others. It is permitted to every one to speak freely his opinion on the administration of the state, or on any other object whatever.

10. New and permanent restrictions on the freedom of industry are not to be granted in future to any one.

11. Domiciliary visits are prohibited, excepting in the cases of criminals.

12. Refuge will not be granted to those who shall be bankrupts.

13. No person can in any case forfeit his landed property, and fortune.

14. If the interest of the state requires that any one should sacrifice his moveable or immoveable property for the public benefit, he shall be fully indemnified by the public treasury.

15. The capital, as well as the revenues of the domains of the church, can be applied only for the interests of the clergy, and the prosperity of public instruction. The property of benevolent institutions shall be employed only for their profit.

16. The right of the power of redemption called Odelstret*, and that of possession, called Afædesret (father's right), shall exist. Particular regulations, which will render these of utility to the states and agriculture, shall be determined by the first or second Storthing.

17. No county, barony, majorat or "fidei commis"† shall be created for the future.

18. Every citizen of the state, without regard to birth or fortune, shall be equally obliged, during a particular period, to defend his country.‡ The application of this principle and its restrictions, as well as the question of ascertaining to what point it is of benefit to the country, that this obligation should cease at the age of twenty-five,—shall be abandoned to the decision

* In virtue of the right of "Odelstret," members of a family to whom certain lands originally pertained, can reclaim and retake possession of the same, even after the lapse of centuries, provided these lands are representative of the title of the family; that is, if for every ten years successively they shall have judicially made reservation of their right. This custom, injurious perhaps to the progress of agriculture, does, however, attach the peasants to their native soil.

† Entail.

‡ Every person is obliged to serve from twenty-one to twenty-three, and not after.

CONSTITUTION OF NORWAY.

of the first ordinary Storting, after they shall have been discharged by a committee; in the meantime, vigorous efforts shall preserve their effect.

19. Norway shall retain her own language, her own finances and coin: institutions which shall be determined upon by laws.

20. Norway has the right of having her own flag of trade and war, which shall be an union flag.

21. If experience should show the necessity of changing some part of this fundamental law, a proposition to this purpose shall be made to an

CONSTITUTION OF PLYMOUTH COLONY (Compact of the Pilgrim Fathers). See MASSACHUSETTS: A. D. 1620.

CONSTITUTION OF PRUSSIA.

ordinary Storting, published and printed; and it only pertains to the next ordinary Storting to decide if the change proposed ought to be effectual or not. Such alteration, however, ought never to be contrary to the principles of this fundamental law; and should only have for its object those modifications in which particular regulations do not alter the spirit of the constitution. Two-thirds of the Storting ought to agree upon such a change. Christiana, 4th November, 1814. See SCANDINAVIAN STATES (NORWAY): A. D. 1814-1815.

CONSTITUTION OF POLAND (The old). See POLAND: A. D. 1573, and 1578-1652.(of 1791). See POLAND: A. D. 1791-1792.

CONSTITUTION OF PRUSSIA.

The following text of the Constitution granted by Frederick William, King of Prussia, on the 31st of January, 1850, with subsequent alterations, is a translation made by Mr. Charles Lowe, and published in the appendix to his Life of Prince Bismarck, 1885.

WE, Frederick William, &c., hereby proclaim and give to know that, whereas the Constitution of the Prussian State, promulgated by us on the 5th December, 1848, subject to revision in the ordinary course of legislation, and recognised by both Chambers of our Kingdom, has been submitted to the prescribed revision; we have finally established that Constitution in agreement with both Chambers. Now, therefore, we promulgate, as a fundamental law of the State, as follows:—

Article 1.—All parts of the Monarchy in its present extent form the Prussian State Territory.

Article 2.—The limits of this State Territory can only be altered by law.

Article 3.—The Constitution and the laws determine under what conditions the quality and civil rights of a Prussian may be acquired, exercised, and forfeited.

Article 4.—All Prussians are equal before the law. Class privileges there are none. Public offices, subject to the conditions imposed by law, are equally accessible to all who are competent to hold them.

Article 5.—Personal freedom is guaranteed. The forms and conditions under which any limitation thereof, especially arrest, is permissible, will be determined by law.

Article 6.—The domicile is inviolable. Intrusion and search therein, as well as the seizing of letters and papers, are only allowed in legally settled cases.

Article 7.—No one may be deprived of his lawful judge. Exceptional tribunals and extraordinary commissions are inadmissible.

Article 8.—Punishments can only be threatened or inflicted according to the law.

Article 9.—Property is inviolable. It can only be taken or curtailed from reasons of public weal and expediency, and in return for statutory compensation which, in urgent cases at least, shall be fixed beforehand.

Article 10.—Civil death and confiscation of property, as punishments, are not possible.

Article 11.—Freedom of emigration can only be limited by the State, with reference to military service. Migration fees may not be levied.

Article 12.—Freedom of religious confession, of meeting in religious societies (Art. 30 and 31), and of the common exercise of religion in private and public, is guaranteed. The enjoyment of civil and political rights is independent of religious belief, yet the duties of a citizen or a subject may not be impaired by the exercise of religious liberty.

Article 13.—Religious and clerical societies, which have no corporate rights, can only acquire those rights by special laws.

Article 14.—The Christian religion is taken as the basis of those State institutions which are connected with the exercise of religion—all religious liberty guaranteed by Art. 12 notwithstanding.

Article 15.*—The Protestant and Roman Catholic Churches, as well as every other religious society, regulate and administer their own affairs in an independent manner, and remain in possession and enjoyment of the institutions, foundations, and moneys intended for their purposes of public worship, education, and charity.

Article 16.*—Intercourse between religious societies and their superiors shall be unobstructed. The making public of Church ordinances is only subject to those restrictions imposed on all other publications.

Article 17.—A special law will be passed with respect to Church patronage, and to the conditions on which it may be abolished.

Article 18.*—Abolished is the right of nominating, proposing, electing, and confirming, in the matter of appointments to ecclesiastical posts, in so far as it belongs to the State, and is not based on patronage or special legal titles.

Article 19.—Civil marriage will be introduced in accordance with a special law, which shall also regulate the keeping of a civil register.

Article 20.—Science and its doctrines are free.

Article 21.—The education of youth shall be sufficiently cared for by public schools. Parents and their substitutes may not leave their children or wards without that education prescribed for the public folk-schools.

* Affected by the Falk laws of 1875, and by the Act of 1887 which repealed them. See GERMANY: A. D. 1875-1887.

Article 22.—Every one shall be at liberty to give instruction, and establish institutions for doing so, providing he shall have given proof of his moral, scientific, and technical capacity to the State authorities concerned.

Article 23.—All public and private institutions of an educational kind are under the supervision of authorities appointed by the State. Public teachers have the rights and duties of State servants.

Article 24.—In the establishment of public folk-schools,* confessional differences shall receive the greatest possible consideration. Religious instruction in the folk-schools will be superintended by the religious societies concerned. Charge of the other (external) affairs of the folk-schools belongs to the Parish (Commune). With the statutory co-operation of the Commune, the State shall appoint teachers in the public folk-schools from the number of those qualified (for such posts).

Article 25.—The means for establishing, maintaining, and enlarging the public folk-schools shall be provided by the Communes, which may, however, be assisted by the State in proven cases of parochial inability. The obligations of third persons—based on special legal titles—remain in force. The State, therefore, guarantees to teachers in folk-schools a steady income suitable to local circumstances. In public folk-schools education shall be imparted free of charge.

Article 26.—A special law will regulate all matters of education.

Article 27.—Every Prussian is entitled to express his opinion freely by word, writing, print, or artistic representation. Censorship may not be introduced; every other restriction on freedom of the Press will only be imposed by law.

Article 28.—Offences committed by word, writing, print, or artistic representation will be punished in accordance with the general penal code.

Article 29.—All Prussians are entitled to meet in closed rooms, peacefully and unarmed, without previous permission from the authorities. But this provision does not apply to open-air meetings, which are subject to the law with respect to previous permission from the authorities.

Article 30.—All Prussians have the right to assemble (in societies) for such purposes as do not contravene the penal laws. The law will regulate, with special regard to the preservation of public security, the exercise of the right guaranteed by this and the preceding article.

Article 31.—The law shall determine the conditions on which corporate rights may be granted or refused.

Article 32.—The right of petitioning belongs to all Prussians. Petitions under a collective name are only permitted to authorities and corporations.

Article 33.—The privacy of letters is inviolable. The necessary restrictions of this right, in cases of war and of criminal investigation, will be determined by law.

Article 34.—All Prussians are bound to bear arms. The extent and manner of this duty will be fixed by law.

Article 35.—The army comprises all sections of the standing army and the Landwehr (terri-

torial forces). In the event of war, the King can call out the Landsturm in accordance with the law.

Article 36.—The armed force (of the nation) can only be employed for the suppression of internal troubles, and the execution of the laws, in the cases and manner specified by statute, and on the requisition of the civil authorities. In the latter respect exceptions will have to be determined by law.

Article 37.—The military judiciary of the army is restricted to penal matters, and will be regulated by law. Provisions with regard to military discipline will remain the subject of special ordinances.

Article 38.—The armed force (of the nation) may not deliberate either when on or off duty; nor may it otherwise assemble than when commanded to do so. Assemblies and meetings of the Landwehr for the purpose of discussing military institutions, commands and ordinances, are forbidden even when it is not called out.

Article 39.—The provisions of Arts. 5, 6, 29, 30, and 32 will only apply to the army in so far as they do not conflict with military laws and rules of discipline.

Article 40.—The establishment of feudal tenures is forbidden. The Feudal Union still existing with respect to surviving fiefs shall be dissolved by law.

Article 41.—The provisions of Art. 40 do not apply to Crown fiefs or to non-State fiefs.

Article 42.—Abolished without compensation, in accordance with special laws passed, are: 1. The exercise or transfer of judicial power connected with the possession of certain lands, together with the dues and exemptions accruing from this right; 2. The obligations arising from patriarchal jurisdiction, vassalage, and former tax and trading institutions. And with these rights are also abolished the counter-services and burdens hitherto therewith connected.

Article 43.—The person of the King is inviolable.

Article 44.—The King's Ministers are responsible. All Government acts (documentary) of the King require for their validity the approval of a Minister, who thereby assumes responsibility for them.

Article 45.—The King alone is invested with executive power. He appoints and dismisses Ministers. He orders the promulgation of laws, and issues the necessary ordinances for their execution.

Article 46.—The King is Commander-in-Chief of the army.

Article 47.—The King fills all posts in the army, as well as in other branches of the State service, in so far as not otherwise ordained by law.

Article 48.—The King has the right to declare war and make peace, and to conclude other treaties with foreign governments. The latter require for their validity the assent of the Chambers in so far as they are commercial treaties, or impose burdens on the State, or obligations on its individual subjects.

Article 49.—The King has the right to pardon, and to mitigate punishment. But in favour of a Minister condemned for his official acts, this right can only be exercised on the motion of that Chamber whence his indictment emanated. Only by special law can the King suppress inquiries already instituted.

* We cannot translate "Volksschule" better than by "folk-school."

Article 50.—The King may confer orders and other distinctions, not carrying with them privileges. He exercises the right of coinage in accordance with the law.

Article 51.—The King convokes the Chambers, and closes their sessions. He may dissolve both at once, or only one at a time. In such a case, however, the electors must be assembled within a period of 60 days, and the Chambers summoned within a period of 90 days respectively after the dissolution.

Article 52.—The King can adjourn the Chambers. But without their assent this adjournment may not exceed the space of 30 days, nor be repeated during the same session.

Article 53.—The Crown, according to the laws of the Royal House, is hereditary in the male line of that House in accordance with the law of primogeniture and agnatic succession.

Article 54.—The King attains his majority on completing his 18th year. In presence of the united Chambers he will take the oath to observe the Constitution of the Monarchy steadfastly and inviolably, and to rule in accordance with it and the laws.

Article 55.—Without the consent of both Chambers the King cannot also be ruler of foreign realms (Reiche).

Article 56.—If the King is a minor, or is otherwise lastingly prevented from ruling himself, the Regency will be undertaken by that agnate (Art. 53) who has attained his majority and stands nearest the Crown. He has immediately to convoke the Chambers, which, in united session, will decide as to the necessity of the Regency.

Article 57.—If there be no agnate of age, and if no legal provision has previously been made for such a contingency, the Ministry of State will convoke the Chambers, which shall then elect a Regent in united session. And until the assumption of the Regency by him, the Ministry of State will conduct the Government.

Article 58.—The Regent will exercise the powers invested in the King in the latter's name; and, after institution of the Regency, he will take an oath before the united Chambers to observe the Constitution of the Monarchy steadfastly and inviolably, and to rule in accordance with it and the laws. Until this oath is taken, the whole Ministry of State for the time being will remain responsible for all acts of the Government.

Article 59.—To the Crown Trust Fund appertains the annuity drawn from the income of the forests and domains.

Article 60.—The Ministers, as well as the State officials appointed to represent them, have access to each Chamber, and must at all times be listened to at request. Each Chamber can demand the presence of the Ministers. The Ministers are only entitled to vote in one or other of the Chambers when members of it.

Article 61.—On the resolution of a Chamber the Ministers may be impeached for the crime of infringing the Constitution, of bribery, and of treason. The decision of such a case lies with the Supreme Tribunal of the Monarchy sitting in United Senates. As long as two Supreme Tribunals co-exist, they shall unite for the above purpose. Further details as to matters of responsibility, (criminal) procedure (thereupon), and punishments, are reserved for a special law.

Article 62.—The legislative power will be exercised in common by the King and by two Cham-

bers. Every law requires the assent of the King and the two Chambers. Money bills and budgets shall first be laid before the Second Chamber; and the latter (i. e., budgets) shall either be wholly approved by the First Chamber, or rejected altogether.

Article 63.—In the event only of its being urgently necessary to maintain public security, or deal with an unusual state of distress when the Chambers are not in session, ordinances, which do not contravene the Constitution, may be issued with the force of law, on the responsibility of the whole Ministry. But these must be laid for approval before the Chambers at their next meeting.

Article 64.—The King, as well as each Chamber, has the right of proposing laws. Bills that have been rejected by one of the Chambers, or by the King, cannot be re-introduced in the same session.

Articles 65-68.—The First Chamber is formed by royal ordinance, which can only be altered by a law to be issued with the approval of the Chambers. The First Chamber is composed of members appointed by the King, with hereditary rights, or only for life.

Article 69.—The Second Chamber consists of 430 members.* The electoral districts are determined by law. They may consist of one or more Circles (Arrondissements), or of one or more of the larger towns.

Article 70.—Every Prussian who has completed his 25th year (i. e., attained his majority), and is capable of taking part in the elections of the Commune where he is domiciled, is entitled to act as a primary voter (Urwähler). Any one who is entitled to take part in the election of several Communes, can only exercise his right as primary voter in one Commune.

Article 71.—For every 250 souls of the population, one (secondary) elector (Wahlmann) shall be chosen. The primary voters fall into three classes, in proportion to the amount of direct taxes they pay—and in such a manner as that each class will represent a third of the sum-total of the taxes paid by the primary voters. This sum-total is reckoned:—(a) by Parishes, in case the Commune does not form of itself a primary electoral district. (b) by (Government) Districts (Bezirke), in case the primary electoral district consists of several Communes. The first class consists of those primary voters, highest in the scale of taxation, who pay a third of the total. The second class consists of those primary voters, next highest in the scale, whose taxes form a second third of the whole; and the third class is made up of the remaining tax-payers (lowest in the scale) who contribute the other third of the whole. Each class votes apart, and for a third of the secondary electors. These classes may be divided into several voting sections, none of which, however, must include more than 500 primary voters. The secondary voters are elected in each class from the number of the primary voters in their district, without regard to the classes.

Article 72.—The deputies are elected by the secondary voters. Details will be regulated by an electoral law, which must also make the necessary provision for those cities where flour and slaughter duties are levied instead of direct taxes.

* Originally 350 only—a number which, in 1851, was increased by 2, for the Principality of Hohenzollern, and in 1867 by 80 for the annexed provinces.

Article 73.—The legislative period of the Second Chamber is fixed at three years.

Article 74.—Eligible as deputy to the Second Chamber is every Prussian who has completed his thirtieth year, has forfeited none of his civil rights in consequence of a valid judicial sentence, and has been a Prussian subject for three years. The president and members of the Supreme Chamber of Accounts cannot sit in either House of the Diet (Landtag).

Article 75.—After the lapse of a legislative period the Chambers will be elected anew, and the same in the event of dissolution. In both cases, previous members are re-eligible.

Article 76.—Both Houses of the Diet of the Monarchy shall be regularly convened by the King in the period from the beginning of November in each year till the middle of the following January, and otherwise as often as circumstances require.

Article 77.—The Chambers will be opened and closed by the King in person, or by a Minister appointed by him to do so, at a combined sitting of the Chambers. Both Chambers shall be simultaneously convened, opened, adjourned, and closed. If one Chamber is dissolved, the other shall be at the same time prorogued.

Article 78.—Each Chamber will examine the credentials of its members, and decide thereupon. It will regulate its own order of business and discipline by special ordinances, and elect its president, vice-presidents, and office-bearers. Civil servants require no leave of absence in order to enter the Chamber. If a member of the Chamber accepts a salaried office of the State, or is promoted in the service of the State to a post involving higher rank or increase of pay, he shall lose his seat and vote in the Chamber, and can only recover his place in it by re-election. No one can be member of both Chambers.

Article 79.—The sittings of both Chambers are public. On the motion of its president, or of ten members, each Chamber may meet in private sitting—at which this motion will then have to be discussed.

Article 80.—Neither of the Chambers can pass a resolution unless there be present a majority of the legal number of its members. Each Chamber passes its resolutions by absolute majority of votes, subject to any exceptions that may be determined by the order of business for elections.

Article 81.—Each Chamber has the separate right of presenting addresses to the King. No one may in person present to the Chambers, or to one of them, a petition or address. Each Chamber can transmit the communications made to it to the Ministers, and demand of them an answer to any grievances thus conveyed.

Article 82.—Each Chamber is entitled to appoint commissions of inquiry into facts—for its own information.

Article 83.—The members of both Chambers are representatives of the whole people. They vote according to their simple convictions, and are not bound by commissions or instructions.

Article 84.—For their votes in the Chamber they can never be called to account, and for the opinions they express therein they can only be called to account within the Chamber, in virtue of the order of business. No member of a Chamber can, without its assent, be had up for examination, or be arrested during the Parlia-

mentary session for any penal offence, unless he be taken in the act, or in the course of the following day. A similar assent shall be necessary in the case of arrest for debts. All criminal proceedings against a member of the Chamber, and all arrests for preliminary examination, or civil arrest, shall be suspended during the Parliamentary session on demand from the Chamber concerned.

Article 85.—The members of the Second Chamber shall receive out of the State Treasury travelling expenses and daily fees, according to a statutory scale; and renunciation thereof shall be inadmissible.

Article 86.—The judicial power will be exercised in the name of the King, by independent tribunals subject to no other authority but that of the law. Judgment shall be executed in the name of the King.

Article 87.—The judges will be appointed for life by the King, or in his name. They can only be removed or temporarily suspended from office by judicial sentence, and for reasons foreseen by the law. Temporary suspension from office (not ensuing on the strength of a law), and involuntary transfer to another place, or to the retired list, can only take place from the causes and in the form mentioned by law, and in virtue of a judicial sentence. But these provisions do not apply to cases of transfer, rendered necessary by changes in the organisation of the courts or their districts.

Article 88 (*abolished*).

Article 89.—The organisation of the tribunals will only be determined by law.

Article 90.—To the judicial office only those can be appointed who have qualified themselves for it as prescribed by law.

Article 91.—Courts for special kinds of affairs, and, in particular, tribunals for trade and commerce, shall be established by statute in those places where local needs may require them. The organisation and jurisdiction of such courts, as well as their procedure and the appointment of their members, the special status of the latter, and the duration of their office, will be determined by law.

Article 92.—In Prussia there shall only be one supreme tribunal.

Article 93.—The proceedings of the civil and criminal courts shall be public. But the public may be excluded by an openly declared resolution of the court, when order or good morals may seem endangered (by their admittance). In other cases publicity of proceedings can only be limited by law.

Article 94.—In criminal cases the guilt of the accused shall be determined by jurymen, in so far as exceptions are not determined by a law issued with the previous assent of the Chambers. The formation of a jury-court shall be regulated by a law.

Article 95.—By a law issued with the previous assent of the Chambers, there may be established a special court whereof the jurisdiction shall include the crimes of high treason, as well as those crimes against the internal and external security of the State, which may be assigned to it by law.

Article 96.—The competence of the courts and of the administrative authorities shall be determined by law. Conflicts of authority between the courts and the administrative authorities shall be settled by a tribunal appointed by law.

Article 97.—A law shall determine the conditions on which public, civil, and military officials may be sued for wrongs committed by them in exceeding their functions. But the previous assent of official superiors need not be requested.

Article 98.—The special legal status (*Rechtsverhältnisse*) of State officials (including advocates and solicitors) not belonging to the judicial class, shall be determined by a law, which, without restricting the Government in the choice of its executive agents, will grant civil servants proper protection against arbitrary dismissal from their posts or diminution of their pay.

Article 99.—All income and expenditure of the State must be pre-estimated for every year, and be presented in the Budget, which shall be annually fixed by a law.

Article 100.—Taxes and dues for the State Treasury may only be raised in so far as they shall have been included in the Budget or ordained by special laws.

Article 101.—In the matter of taxes there must be no privilege of persons. Existing tax-laws shall be subjected to a revision, and all such privileges abolished.

Article 102.—State and Communal officers can only levy dues on the strength of a law.

Article 103.—The contracting of loans for the State Treasury can only be effected on the strength of a law; and the same holds good of guarantees involving a burden to the State.

Article 104.—Budget transgressions require subsequent approval by the Chambers. The Budget will be examined and audited by the Supreme Chamber of Accounts. The general Budget accounts of every year, including tabular statistics of the National Debt, shall, with the comments of the Supreme Chamber of Accounts, be laid before the Chambers for the purpose of exonerating the Government. A special law will regulate the establishment and functions of the Supreme Chamber of Accounts.

Article 105.—The representation and administration of the Communes. Arrondissements and Provinces of the Prussian State, will be determined in detail by special laws.

Article 106.—Laws and ordinances become binding after having been published in the form prescribed by law. The examination of the validity of properly promulgated Royal ordinances is not within the competence of the authorities, but of the Chambers.

Article 107.—The Constitution may be altered by ordinary legislative means; and such alteration shall merely require the usual absolute majority in both Chambers on two divisions (of the House), between which there must elapse a period of at least twenty-one days.

Article 108.—The members of both Chambers, and all State officials, shall take the oath of fealty and obedience to the King, and swear conscientiously to observe the Constitution. The army will not take the oath to the Constitution.

Article 109.—Existing taxes and dues will continue to be raised; and all provisions of existing statute-books, single laws, and ordinances, which do not contravene the present Constitution, will remain in force until altered by law.

Article 110.—All authorities holding appointments in virtue of existing laws will continue their activity pending the issue of organic laws affecting them.

Article 111.—In the event of war or revolution, and pressing danger to public security therefrom ensuing, Articles 5, 6, 7, 27, 28, 29, 30, and 36 of the Constitution may be suspended for a certain time, and in certain districts—the details to be determined by law.

Article 112.—Until issue of the law contemplated in Article 26, educational matters will be controlled by the laws at present in force.

Article 113.—Prior to the revision of the criminal code, a special law will deal with offences committed by word, writing, print, or artistic representation.

Article 114 (*abolished*).

Article 115.—Until issue of the electoral law contemplated in Article 72, the ordinance of 30th May, 1849, touching the return of deputies to the Second Chamber, will remain in force; and with this ordinance is associated the provisional electoral law for elections to the Second Chamber in the Hohenzollern Principalities of 30th April, 1851.

Article 116.—The two supreme tribunals still existing shall be combined into one—to be organised by a special law.

Article 117.—The claims of State officials appointed before the promulgation of the Constitution shall be taken into special consideration by the Civil Servant Law.

Article 118.—Should changes in the present Constitution be rendered necessary by the German Federal Constitution to be drawn up on the basis of the Draft of 26th May, 1849, such alterations will be decreed by the King; and the ordinances to this effect laid before the Chambers, at their first meeting. The Chambers will then have to decide whether the changes thus provisionally ordained harmonise with the Federal Constitution of Germany.

Article 119.—The Royal oath mentioned in Article 54, as well as the oath prescribed to be taken by both Chambers and all State officials, will have to be tendered immediately after the legislative revision of the present Constitution (Articles 62 and 108).

In witness whereof we have hereunto set our signature and seal.

Given at Charlottenburg, the 31st January, 1850. (Signed) **FRIEDRICH WILHELM.**

In connection with Article 44 the course of domestic and parliamentary politics drew forth the following Declaratory Rescript from the German Emperor and King of Prussia, in 1882:—"The right of the King to conduct the Government and policy of Prussia according to his own discretion is limited by the Constitution (of January 31, 1850), but not abolished. The Government acts (documentary) of the King require the counter-signature of a Minister, and, as was also the case before the Constitution was issued, have to be represented by the King's Ministers; but they nevertheless remain Government acts of the King, from whose decisions they result, and who thereby constitutionally expresses his will and pleasure. It is therefore not admissible, and leads to obscuration of the constitutional rights of the King, when their exercise is so spoken of as if they emanated from the Ministers for the time being responsible for them, and not from the King himself. The Constitution of Prussia is the expression of the monarchical tradition of this country, whose development is based on the living and actual re-

CONSTITUTION OF PRUSSIA.

lations of its Kings to the people. These relations, moreover, do not admit of being transferred to the Ministers appointed by the King, for they attach to the person of the King. Their preservation, too, is a political necessity for Prussia. It is, therefore, my will that both in Prussia and in the Legislative Bodies of the realm (or Reich), there may be no doubt left as to my own constitutional right and that of my successors to personally conduct the policy of my Government; and that the theory shall always be gainsaid that the [doctrine of the] inviolability of the person of the King, which has always existed in Prussia, and is enunciated by Article 43 of the Constitution, or the necessity of a responsible counter-signature of my Government acts, deprives them of the character of Royal and independent decisions. It is the duty of my Ministers to support

my constitutional rights by protecting them from doubt and obscurity, and I expect the same from all State servants (Beamten) who have taken to me the official oath. I am far from wishing to impair the freedom of elections, but in the case of those officials who are intrusted with the execution of my Government acts, and may, therefore, in conformity with the disciplinary law forfeit their situations, the duty solemnly undertaken by their oath of service also applies to the representation by them of the policy of my Government during election times. The faithful performance of this duty I shall thankfully acknowledge, and I expect from all officials that, in view of their oath of allegiance, they will refrain from all agitation against my Government also during elections.—Berlin, January 4, 1882.—WILHELM. VON BISMARCK. To the Ministry of State."

CONSTITUTION OF SWEDEN.

"Four fundamental laws account for the present political constitution of Sweden: the law concerning the form of government (regeringsformen) dated June 6, 1809; the law on representation (riksdags-ordningen), June 22, 1866; the order of succession (successions-ordningen), Sept. 26, 1810; and the law on the liberty of the press (tryckfrihets-förordningen), July 16, 1812. The union with Norway is regulated by the act of union (riks-akten), Aug. 6, 1815. . . . The representation of the nation, since the law of June 22, 1866, rests not as formerly on the division of the nation into four orders, but on election only. Two chambers, having equal authority, compose the diet. The members of the first chamber are elected for nine years by the 'landstingen' (species of provincial assemblies) and by the 'stadsfullmäktige' (municipal councillors) of cities which do not sit in the 'landsting.'—*Lalor's Cyclopaedia of Political Science*, v. 3, pp. 834—835.—"The First Chamber consists (1892) of 147 members, or one deputy for every 30,000 of the population. The election of the members takes place by the 'Landstings,' or provincial representations, 25 in number, and the municipal corporations of the towns, not already represented in the 'Landstings,' Stockholm, Göteborg, Malmö and Norrköping. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 80,000 kroner, or 4,444 l., or an annual income of 4,000 kroner, or 223 l. They are elected for the term of nine years, and obtain no payment for their services. The Second Chamber consists (Autumn 1892) of 228 members, of whom 76 are elected by the towns and 146 by the rural districts, one representative being returned for every 10,000 of the population of towns, one for every 'Domsaga,' or rural district, of under 40,000 inhabitants, and two for rural districts of

over 40,000 inhabitants. All natives of Sweden, aged 21, possessing real property to the taxed value of 1,000 kroner, or 56 l., or farming, for a period of not less than five years, landed property to the taxed value of 6,000 kroner, or 333 l., or paying income tax on an annual income of 800 kroner, or 45 l., are electors; and all natives, aged 25, possessing, and having possessed at least one year previous to the election, the same qualifications, may be elected members of the Second Chamber. The number of qualified electors to the Second Chamber in 1890 was 288,096, or 6.0 of the population; only 110,896, or 38.5 of the electors actually voted. In the smaller towns and country districts the election may either be direct or indirect, according to the wish of the majority. The election is for the term of three years, and the members obtain salaries for their services, at the rate of 1,200 kroner, or 67 l., for each session of four months, besides travelling expenses. . . . The members of both Chambers are elected by ballot, both in town and country."—*Statesman's Year-book*, 1893, p. 965.—"The Diet, or Riksdag, assembles every year, in ordinary session, on the 15th of January, or the day following, if the 15th is a holiday. It may be convoked in extraordinary session by the king. In case of the decease, absence, or illness of the king, the Diet may be convoked extraordinarily by the Council of State, or even, if this latter neglects to do so, by the tribunals of second instance. The king may dissolve the two chambers simultaneously, or one of them alone, during the ordinary sessions, but the new Diet assembles after the three months of the dissolution, and can only be dissolved again four months after resuming its sitting. The king dissolves the extraordinary session when he deems proper. . . . The Diet divides the right of initiative with the king; the consent of the synod is necessary for ecclesiastical Laws. . . . Every three

years the Diet names a commission of twenty-four members (twelve from each chamber), charged with the duty of electing six persons who are commissioned under the presidency of the Procureur general of the Diet to watch over the liberty of the press."—G. Demombynes, *Constitutions Européennes*, v. 1, pp. 84-90.—The following is the text of the Constitution as adopted in 1809, the subsequent modifications of which are indicated above:

Form of government adopted by the King and the Estates of the Swedish Realm, at Stockholm, on the 6th of June, 1809; together with the Alterations afterwards introduced.

We Charles, by the Grace of God, King of the Swedes, the Goths, and the Vandals, &c. &c. &c. Heir to Norway, Duke of Sleswick-Holstein, Stormarn, and Ditmarsen, Count of Oldenburg and Delmenhorst, &c. &c. &c. make known, that having unlimited confidence in the estates of the realm, charged them with drawing up a new form of government, as the perpetual groundwork of the prosperity and independence of our common native land, We do hereby perform a dear and pleasing duty in promulgating the fundamental law (which has been) upon mature deliberation, framed and adopted by the estates of the realm, and presented unto Us this day, together with their free and unanimous offer of the Swedish crown. Having with deep emotion and an affectionate interest in the prosperity of a nation which has afforded Us so striking a proof of confidence and attachment, complied with their request, We trust to our endeavors to promote its happiness, as the reciprocal rights and duties of the monarch and the subjects have been marked so distinctly, that, without encroachment on the sacred nature and power of majesty, the constitutional liberty of the people is protected. We do therefore hereby adopt, sanction, and ratify this form of government, such as it follows here:—

We the underwritten representatives of the Swedish realm, counts, barons, bishops, knights, nobles, clergymen, burghers, and peasants, assembled at a general Diet, in behalf of ourselves and our brethren at home, Do hereby make known, that, having by the late change of government, to which we, the deputies of the Swedish people, gave our unanimous assent, exercised our rights of drawing up a new and improved constitution, we have, in repealing those fundamental laws, which down to this day have been in force more or less; viz.,—The Form of Government of the 21st of August 1772, the Act of Union and Security, of the 21st of February and the 3d of April 1789, the Ordinance of Diet, of the 24th of January 1617, as well as all those laws, acts, statutes, and resolutions comprehended under the denomination of fundamental laws;—We have Resolved to adopt for the kingdom of Sweden and its dependencies the following constitution, which from henceforth shall be the chief fundamental law of the realm, reserving to Ourselves, before the expiration of the present Diet, to consider the other fundamental laws, mentioned in the 85th article of this constitution.

Article 1. The kingdom of Sweden shall be governed by a king, who shall be hereditary in that order of succession which the estates will further hereafter determine.

2. The king shall profess the pure evangelical faith, such as is contained and declared in the

Augsburgian Confession, and explained in the Decree of the Diet at Upsala in the year 1593.

3. The majesty of the king shall be held sacred and inviolable; and his actions shall not be subject to any censure.

4. The king shall govern the realm alone, in the manner determined by this constitution. In certain cases, however, (to be specified) he shall take the opinion of a council of state, which shall be constituted of well-informed, experienced, honest, and generally-esteemed native Swedes, noblemen and commoners, who profess the pure evangelical faith.

5. The council of state shall consist of nine members, viz., the minister of state and justice, who shall always be a member of the king's supreme court of judicature, the minister of state for foreign affairs, six counsellors of state, three of whom at least must have held civil offices, and the chancellor of the court, or aulic chancellor. The secretaries of state shall have a seat and vote in the council, when they have to report matters there, and in cases that belong to their respective departments. Father and son, or two brothers, shall not be permitted to be constant members of the council of state.

6. The secretaries of state shall be four, viz. —One for military affairs; a second for public economy, mining, and all other affairs connected with the civil and interior administration; a third for the finances of the realm, inland and foreign commerce, manufactures, &c.; and the fourth, for affairs relating to religion, public education, and charities.

7. All affairs of government shall be laid before the king, and decided in a council of state: those of a ministerial nature, however, excepted, concerning the relations of the realm with foreign powers, and matters of military command, which the king decides in his capacity of commander-in-chief of the land and naval forces.

8. The king can make no decision in matters in which the council of state are to be heard, unless at least three counsellors of state, and the secretary of state whom it concerns, or his deputy-secretary, are present.—All the members of the council shall, upon due notice, attend all deliberations deemed of importance, and which concern the general administration of the affairs of the kingdom; such as questions for adopting new statutes, repealing or altering those in existence, introducing new institutions in the different branches of the administration, &c.

9. Minutes shall be kept of all matters which shall come before the king in his council of state. The ministers of state, the counsellors of state, the aulic chancellor, and the secretaries of state or deputy-secretaries, shall be peremptorily bound to deliver their opinions: it is, however, the prerogative of the king to decide. Should it, however, unexpectedly occur, that the decisions of the king are evidently contrary to the constitution and the common law of the realm, it shall in that case be the duty of the members of the council of state to make spirited remonstrances against such decision or resolution. Unless a different opinion has been recorded in the minutes (for then the counsellors present shall be considered as having advised the king to the adopted measure), the members of the council shall be responsible for their advices, as enacted in the 106th article.

10. Necessary informations having been demanded and obtained from the proper boards, authorities, and functionaries, the affairs for deliberation shall be prepared by the secretary of state and eight skilful and impartial men, consisting of four nobles and four commoners, in order to their being laid before the king in the council of state.—The secretary, as well as all the other members of this committee (which are nominated by the king) for preparing the general affairs of the kingdom, shall upon all occasions, when so met, deliver their opinions to the minutes, which shall afterwards be reported to the king and the council of state.

11. As to the management of the ministerial affairs, they may be prepared and conducted in the manner which appears most suitable to the king. It appertains to the minister for foreign affairs to lay such matters before him in the presence of the aulic chancellor, or some other member of the council, if the chancellor cannot attend. In the absence of the minister of state this duty devolves upon the aulic chancellor, or any other member of the council of state, whom his majesty may appoint. After having ascertained the opinions of these official persons entered in the minutes, and for which they shall be responsible, the king shall pronounce his decision in their presence. It shall be the duty of the aulic chancellor to keep the minutes on these occasions. The king shall communicate to the council of state the information on these topics as may be necessary, in order that they may have a general knowledge even of this branch of the administration.

12. The king can enter into treaties and alliances with foreign powers, after having ascertained, as enacted in the preceding article, the opinion of the minister of state for foreign affairs, and of the aulic chancellor.

13. When the king is at liberty to commence war, or conclude peace, he shall convoke an extraordinary council of state: the ministers of state, the counsellors of state, the aulic chancellor, and the secretaries of state; and, after having explained to them the circumstances which require their consideration, he shall desire their opinions thereon, which each of them shall individually deliver, on the responsibility defined in the 107th article. The king shall thereafter have a right to adopt the resolutions, or make such decision as may appear to him most beneficial for the kingdom.

14. The king shall have the supreme command of the military forces by sea and land.

15. The king shall decide in all matters of military command, in the presence of that minister or officer to whom he has entrusted the general management thereof. It shall be the duty of this person to give his opinion, under responsibility, upon the resolutions taken by the king, and in case of these being contrary to his advice, he shall be bound to enter his objections and counsel in the minutes, which the king must confirm by his own signature. Should this minister or official person find the resolutions of the king to be of a dangerous tendency, or founded on mistaken or erroneous principles, he shall advise his majesty to convoke two or more military officers of a superior rank into a council of war. The king shall, however, be at liberty to comply with or to reject this proposition for a council of war; and if approved of, he may take what no-

tice he pleases of the opinions of such council, which shall, however, be entered in the minutes.

16. The king shall promote the exercise of justice and right, and prevent partiality and injustice. He shall not deprive any subject of life, honour, liberty, and property, without previous trial and sentence, and in that order which the laws of the country prescribe. He shall not disturb, or cause to be disturbed, the peace of any individual in his house. He shall not banish any from one place to another, nor constrain, or cause to be constrained, the conscience of any; but shall protect every one in the free exercise of his religion, provided he does not thereby disturb the tranquillity of society, or occasion public offence. The king shall cause every one to be tried in that court to which he properly belongs.

17. The king's prerogative of justice shall be invested in twelve men, learned in the law, six nobles, and six commoners, who have shown knowledge, experience, and integrity in judicial matters. They shall be styled counsellors of justice, and constitute the king's supreme court of justice.

18. The supreme court of justice shall take cognizance of petitions to the king for cancelling sentences which have obtained legal force, and granting extension of time in lawsuits, when it has been, through some circumstances, forfeited.

19. If information be sought by judges or courts of justice concerning the proper interpretation of the law, the explanation thus required shall be given by the said supreme court.

20. In time of peace, all cases referred from the courts martial shall be decided in the supreme court of justice. Two military officers of a superior degree, to be nominated by the king, shall, with the responsibility of judges, attend and have a vote in such cases in the supreme court. The number of judges may not, however, exceed eight. In time of war, all such cases shall be tried as enacted by the articles of war.

21. The king, should he think fit to attend, shall have right to two votes in causes decided by the supreme court. All questions concerning explanations of the law shall be reported to him, and his suffrages counted, even though he should not have attended the deliberations of the court.

22. Causes of minor importance may be decided in the supreme court by five members, or even four, if they are all of one opinion; but in causes of greater consequence seven counsellors, at least, must attend. More than eight members of the supreme court, or four noblemen and four commoners, may not be at one time in active service.

23. All the decrees of the supreme court of justice shall issue in the king's name, and under his hand and seal.

24. The cases shall be prepared in the "king's inferior court for revision of judiciary affairs," in order to be laid before, or produced in the supreme court.

25. In criminal cases the king has a right to grant pardon, to mitigate capital punishment, and to restore property forfeited to the crown. In applications, however, of this kind, the supreme court shall be heard, and the king give his decision in the council of state.

26. When matters of justice are laid before the council of state, the minister of state and justice, and, at least, two counsellors of state, two members of the supreme court, and the chan-

cellor of justice shall attend, who must all deliver their opinions to the minutes, according to the general instruction for the members of the council of state, quoted in the 91st article.

27. The king shall nominate, as chancellor of justice, a juris-consult, an able and impartial man, who has previously held the office of a judge. It shall be his chief duty, as the highest legal officer or attorney general of the king, to prosecute, either personally or through the officers or fiscals under him, in all such cases as concern the public safety and the rights of the crown, on the king's behalf, to superintend the administration of justice, and to take cognizance of, and correct, errors committed by judges or other legal officers in the discharge of their official duties.

28. The king, in his council of state, has a right to appoint native Swedes to all such offices and places within the kingdom for which the king's commissions are granted. The proper authorities shall, however, send in the names of the candidates to be put in nomination for such employments. The king may, likewise, appoint foreigners of eminent talents to military offices, without, however, entrusting to them the command of the fortresses of the realm. In preferences the king shall only consider the merits and the abilities of the candidates, without any regard to their birth. Ministers and counsellors of state and of justice, secretaries of state, judges, and all other civil officers, must always be of the pure evangelical faith.

29. The archbishop and bishops shall be elected as formerly, and the king nominates one of the three candidates proposed to him.

30. The king appoints, as formerly, the incumbents of rectories in the gift of the crown. As to the consistorial benefices, the parishioners shall be maintained in their usual right of election.

31. Citizens, who are freemen of towns, shall enjoy their privilege as heretofore, of proposing to the king three candidates for the office of burgomaster or mayor, one of whom the king selects. The aldermen and secretaries of the magistracy of Stockholm shall be elected in the same manner.

32. The king appoints envoys to foreign courts and the officers of the embassies, in the presence of the minister of state for foreign affairs and the aulic chancellor.

33. When offices, for which candidates are proposed, are to be filled up, the members of the council of state shall deliver their opinions on the qualifications and merits of the applicants. They shall also have right to make respectful remonstrances against the nomination of the king respecting other offices.

34. The new functionaries created by this constitution, viz.—the ministers and counsellors of state and counsellors of justice, shall be paid by the crown, and may not hold any other civil offices. The two ministers of state are the highest functionaries of the realm. The counsellors of state shall hold the rank of generals, and the counsellors of justice that of lieutenant-generals.

35. The minister of state for foreign affairs, the counsellors of state, the presidents of the public boards, the grand governor of Stockholm, the deputy governor, and the chief magistrate of police in the city, the aulic chancellor, the chancellor of justice, the secretaries of state, the governors or lord-lieutenants of provinces, field marshals, generals and admirals of all de-

grees, adjutant generals, adjutant in chief, adjutants of the staff, the governors of fortresses, captain lieutenants, and officers of the king's life guards, colonels of the regiments, and officers second in command in the foot and horse guards, lieutenant-colonels in the brigade of the life regiments, chiefs of the artillery of the royal engineers, ministers, envoys, and commercial agents with foreign powers, and official persons employed in the king's cabinet for the foreign correspondence, and at the embassies, as holding places of trust, can be removed by the king, when he considers it necessary for the benefit of the realm. The king shall, however, signify his determination in the council of state, the members whereof shall be bound to make respectful remonstrances, if they see it expedient.

36. Judges, and all other official persons, not included in the preceding article, cannot be suspended from their situations without legal trial, nor be translated or removed to other places, without having themselves applied for these.

37. The king has power to confer dignities on those who have served their country with fidelity, bravery, virtue, and zeal. He may also promote to the order of counts and barons, persons, who by eminent merits have deserved such an honour. Nobility and the dignity of a count and baron, granted from this time, shall no longer devolve to any other than the individual himself thus created a noble, and after him, to the oldest of his male issue in a direct descending line, and this branch of the family being extinct, to the nearest male descendant of the ancestor.

38. All despatches and orders emanating from the king, excepting such as concern military affairs, shall be countersigned by the secretary who has submitted them to the council, and is responsible for their being conformable to the minutes. Should the secretary find any of the decisions made by the king to be contrary to the spirit of the constitution, he shall make his remonstrances respecting the same, in the council of state. Should the king still persist in his determination, it shall then be the duty of the secretary to refuse his countersign, and resign his place, which he may not resume until the estates of the realm shall have examined and approved of his conduct. He shall, however, in the mean time, receive his salary, and all the fees of his office as formerly.

39. If the king wishes to go abroad, he shall communicate his resolution to the council of state, in a full assembly, and take the opinion of all its members, as enacted in the ninth article. During the absence of the king he may not interfere with the government, or exercise the regal power, which shall be carried on, in his name, by the council of state; the council of state cannot, however, confer dignities or create counts, barons, and knights; and all officers appointed by the council shall only hold their places *ad interim*.

40. Should the king be in such a state of health as to be incapable of attending to the affairs of the kingdom, the council of state shall conduct the administration, as enacted in the preceding article.

41. The king shall be of age after having completed eighteen years. Should the king die before the heir of the crown has attained this age, the government shall be conducted by the council of state, acting with regal power and authority, in the name of the king, until the estates

of the realm shall have appointed a provisional government or regency; and the council of state is enjoined strictly to conform to the enactments of this constitution.

42. Should the melancholy event take place, that the whole royal family became extinct on the male side, the council of state shall exercise the government with regal power and authority, until the estates have chosen another royal house, and the new king has taken upon himself the government. All occurrences or things having reference to the four last articles, shall be determined by the whole council of state and the secretaries of state.

43. When the king takes the field of battle, or repairs to distant parts of the kingdom, he shall constitute four of the members of the council of state to exercise the government in those affairs which he is pleased to prescribe.

44. No prince of the royal family shall be permitted to marry without having obtained the consent of the king, and in the contrary case shall forfeit his right of inheritance to the kingdom, both for himself and descendants.

45. Neither the crown prince, or any other prince of the royal family, shall have any appanage or civil place. The princes of the blood may, however, bear titles of dukedoms and principalities, as heretofore, but without any claims upon those provinces.

46. The kingdom shall remain divided, as heretofore, into governments, under the usual provincial administrations. No governor-general shall, from this time, be appointed within the kingdom.

47. The courts of justice, superior as well as inferior, shall administer justice according to the laws and statutes of the realm. The provincial governors, and all other public functionaries, shall exercise the offices entrusted to them according to existing regulations; they shall obey the orders of the king, and be responsible to him if any act is done contrary to law.

48. The court of the king is under his own management, and he may at his own pleasure appoint or discharge all his officers and attendants there.

49. The estates of the realm shall meet every fifth year. In the decree of every Diet the day shall be fixed for the next meeting of the estates. The king may, however, convoke the estates to an extraordinary Diet before that time.

50. The Diets shall be held in the capital, except when the invasion of an enemy, or some other important impediment, may render it dangerous for the safety of the representatives.

51. When the king or council convokes the estates, the period for the commencement of the Diet shall be subsequent to the thirtieth, and within the fiftieth day, to reckon from that day when the summons has been proclaimed in the churches of the capital.

52. The king names the speakers of the nobles, the burghers and the peasants: the archbishop is, at all times, the constant speaker of the clergy.

53. The estates of the realm shall, immediately after the opening of the Diet, elect the different committees, which are to prepare the affairs intended for their consideration. Such committees shall consist in,—a constitutional committee, which shall take cognizance of questions concerning proposed alterations in the fundamental laws, report thereupon to the representatives,

and examine the minutes held in the council of state;—a committee of finances, which shall examine and report upon the state and management of the revenues;—a committee of taxation, for regulating the taxes;—a committee of the bank for inquiring into the administration of the affairs of the national bank;—a law committee for digesting propositions concerning improvements in the civil, criminal, and ecclesiastical laws;—a committee of public grievances and matters of economy, to attend to the defects in public institutions, suggest alterations, &c.

54. Should the king desire a special committee for deliberating with him on such matters as do not come within the cognizance of any of the other committees, and are to be kept secret, the estates shall select it. This committee shall, however, have no right to adopt any resolutions, but only to give their opinion on matters referred to them by the king.

55. The representatives of the realm shall not discuss any subject in the presence of the king, nor can any other committee than the one mentioned in the above article hold their deliberations before him.

56. General questions started at the meetings or the orders of the estates, cannot be immediately discussed or decided, but shall be referred to the proper committees, which are to give their opinion thereupon. The propositions or report of the committees shall, in the first instance, without any alteration or amendment, be referred to the estates at the general meetings of all the orders. If at these meetings, observations should be made which may prevent the adoption of the proposed measure, these objections shall be communicated to the committee, in order to its being examined and revised. A proposition thus prepared having been again referred to the estates, it shall remain with them to adopt it, with or without alterations, or to reject it altogether. Questions concerning alterations in the fundamental laws, shall be thus treated:—If the constitutional committee approves of the suggestion of one of the representatives, or the committee reports in favour of or against a measure proposed by the king, the opinion of the committee shall be referred to the estates, who may discuss the topic, but not come to any resolution during that Diet.—If at the general meetings of the orders no observations are made against the opinion of the committee, the question shall be postponed till the Diet following, and then be decided solely by yes or no, as enacted in the 75th article of the ordinance of Diet.—If, on the contrary, objections are urged at the general meetings of the orders against the opinion of the committee, these shall be referred back for its reconsideration. If all the orders be of one opinion, the question shall be postponed for final decision, as enacted above. Should again a particular order differ from the other orders, twenty members shall be elected from among every order, and added to the committee, for adjusting the differences. The question being thus prepared, shall be decided at the following Diet.

57. The ancient right of the Swedish people, of imposing taxes on themselves, shall be exercised by the estates only at a general Diet.

58. The king shall at every Diet lay before the committee of finances the state of the revenues in all their branches. Should the crown have obtained subsidies through treaties with for-

oreign powers, these shall be explained in the usual way.

59. The king shall refer to the decision of this committee to determine what the government may require beyond the ordinary taxation, to be raised by an extraordinary grant.

60. No taxes of any description whatever can be increased without the express consent of the estates. The king may not farm or let on lease the revenues of state, for the sake of profit to himself and the crown; nor grant monopolies to private individuals, or corporations.

61. All taxes shall be paid to the end of that term for which they have been imposed. Should, however, the estates meet before the expiration of that term, new regulations shall take place.

62. The funds required by government having been ascertained by the committee of finances, it shall rest with the estates whether to assign proportionate means, and also to determine how the various sums granted shall be appropriated.

63. Besides these means, two adequate sums shall be voted and set apart for the disposal of the king, after he has consulted the council of state,—for the defence of the kingdom, or some other important object;—the other sum to be deposited in the national bank, in case of war, after the king has ascertained the opinion of the council and convened the estates. The seal of the order for this latter sum may not be broken, nor the money be paid by the commissioners of the bank, till the summons to Diet shall have been duly proclaimed in the churches of the capital.

64. The ordinary revenues of the land, as well as the extraordinary grants which may be voted by the estates, shall be at the disposal of the king for the civil list and other specified purposes.

65. The above means may not be applied but for the assigned purposes, and the council of state shall be responsible if they permit any deviation in this respect, without entering their remonstrances in the minutes, and pointing out what the constitution in this case ordains.

66. The funds of amortissement or national debt, shall remain, as heretofore, under the superintendence and direction of the estates, who have guaranteed or come under a responsibility for the national debt; and after having received the report of the committee of finances on the affairs of that establishment, the estates will provide, through a special grant, the requisite means for paying the capital as well as the interest of this debt, in order that the credit of the kingdom may be maintained.

67. The deputy of the king shall not attend the meetings of the directors or commissioners of the funds of amortissement, on any other occasion than when the directors are disposed to take his opinion.

68. The means assigned for paying off the national debt shall not, under any pretence or condition, be appropriated to other purposes.

69. Should the estates, or any particular order, entertain doubts either in allowing the grant proposed by the committee of finances, or as to the participation in the taxes, or the principles of the management of the funds of amortissement, these doubts shall be communicated to the committee for their further consideration.—If the committee cannot coincide in the opinions of the estates, or a single order, it shall depute some members to explain circumstances. Should this order still persist in its opinion, the question

shall be decided by the resolution of three orders. If two orders be of one, and the other two of a different opinion, thirty new members of every order shall be added to the committee—the committee shall then vote conjointly, and not by orders, with folded billets, for adopting, or rejecting, unconditionally the proposition of the committee.

70. The committee of taxation shall at every Diet suggest general principles for dividing the future taxes, and the amount having been fixed, the committee shall also propose how these are to be paid, referring their proposition to the consideration and decision of the states.

71. Should a difference of opinion arise between the orders, as to these principles and the mode of applying them, and dividing the taxes; or, what hardly can be presumed, any order decline participating in the proposed taxation, the order, which may thus desire some alteration, shall communicate their views to the other representatives, and suggest in what mode this alteration may be effected without frustrating the general object. The committee of taxation having again reported thereon to the estates, they, the estates, shall decide the question at issue. If three orders object to the proposition of the committee, it shall be rejected. If, again, three orders oppose the demands of a single order, or if two be of an opinion contrary to that of the other two, the question shall be referred to the committee of finances, with an additional number of members, as enacted in the above article. If the majority of this committee assent to the proposition of the committee of taxation, in those points concerning which the representatives have disagreed, the proposition shall be considered as the general resolution of the estates. Should it, on the contrary, be negatived by a majority of votes, or be rejected by three orders, the committee of taxation shall propose other principles for levying and dividing the taxes.

72. The national bank shall remain, as formerly, under the superintendence and guarantee of the estates, and the management of directors selected from among all the orders, according to existing regulations. The states alone can issue bank-notes, which are to be recognized as the circulating medium of the realm.

73. No troops, new taxes or imposts, either in money or kind, can be levied without the voluntary consent of the estates, in the usual order, as aforesaid.

74. The king shall have no right to demand or levy any other aid for carrying on war, than that contribution of provisions which may be necessary for the maintenance of the troops during their march through a province. These contributions shall, however, be immediately paid out of the treasury, according to the fixed price-current of provisions, with an augmentation of a moiety, according to this valuation. Such contributions may not be demanded for troops which have been quartered in a place, or are employed in military operations, in which case they shall be supplied with provisions from the magazines.

75. The annual estimation of such rentes as are paid in kind shall be fixed by deputies elected from among all the orders of the estates.

76. The king cannot, without the consent of the estates, contract loans within or without the kingdom, nor burthen the land with any new debts.

77. He cannot also, without the consent of the estates, vend, pledge, mortgage, or in any other way alienate domains, farms, forests, parks, preserves of game, meadows, pasture-land, fisheries, and other appurtenances of the crown. These shall be managed according to the instructions of the estates.

78. No part of the kingdom can be alienated through sale, mortgage, donation, or in any other way whatever.

79. No alteration can be effected in the standard value of the coin, either for enhancing or deteriorating it, without the consent of the estates.

80. The land and naval forces of the realm shall remain on the same footing, till the king and the estates may think proper to introduce some other principles. No regular troops can be raised, without the mutual consent of the king and the estates.

81. This form of government and the other fundamental laws cannot be altered or repealed, without the unanimous consent of the king and the estates. Questions to this effect cannot be brought forward at the meetings of the orders, but must be referred to the constitutional committee, whose province it is to suggest such alterations in the fundamental laws, as may be deemed necessary, useful, and practicable. The estates may not decide on such proposed alterations at the same Diet. If all the orders agree about the alteration, it shall be submitted to the king, through the speakers, for obtaining his royal sanction. After having ascertained the opinion of the council, the king shall take his resolution, and communicate to the estates either his approbation or reasons for refusing it. In the event of the king proposing any alteration in the fundamental laws, he shall, after having taken the opinion of the council, deliver his proposition to the estates, who shall, without discussing it, again refer it to the constitutional committee. If the committee coincide in the proposition of the king, the question shall remain till next Diet. If again the committee is averse to the proposition of the king, the estates may either reject it immediately or adjourn it to the following Diet. In the case of all the orders approving of the proposition, they shall request that a day be appointed to declare their consent in the presence of his majesty, or signify their disapprobation through their speakers.

82. What the estates have thus unanimously resolved and the king sanctioned, concerning alterations in the fundamental laws, or the king has proposed and the estates approved of, shall for the future have the force and effect of a fundamental law.

83. No explanation of the fundamental laws may be established by any other mode or order, than that prescribed by the two preceding articles. Laws shall be applied according to their literal sense.

84. When the constitutional committee find no reason for approving of the proposition, made by a representative concerning alterations or explanations of the fundamental laws, it shall be the duty of the committee to communicate to him, at his request, their opinion, which the proposer of the resolution may publish, with his own motion, and under the usual responsibility of authors.

85. As fundamental laws of the present form of government, there shall be considered the ordi-

nance of Diet, the order of succession, and the act concerning universal liberty of the press.

86. By the liberty of the press is understood the right of every Swedish subject to publish his writings, without any impediment from the government, and without being responsible for them, except before a court of justice, or liable to punishment, unless their contents be contrary to a clear law, made for the preservation of public peace. The minutes, or protocols, or the proceedings, may be published in any case, excepting the minutes kept in the council of state and before the king in ministerial affairs, and those matters of military command; nor may the records of the bank, and the office of the funds of amortissement, or national debt, be printed.

87. The estates, together with the king, have the right to make new and repeal old laws. In this view such questions must be proposed at the general meetings of the orders of the estates, and shall be decided by them, after having taken the opinion of the law committee, as laid down in the 56th article. The proposition shall be submitted, through the speakers, to the king, who, after having ascertained the opinion of the council of state and supreme court, shall declare either his royal approbation, or motives for withholding it. Should the king desire to propose any alteration in the laws, he shall, after having consulted the council of state and supreme court, refer his proposition, together with their opinion, to the deliberation of the states, who, after having received the report of the law committee, shall decide on the point. In all such questions the resolution of three orders shall be considered as the resolution of the estates of the realm. If two orders are opposed to the other two, the proposition is negatived, and the law is to remain as formerly.

88. The same course, or mode of proceeding, shall be observed in explaining the civil, criminal, and ecclesiastical laws, as in making these. Explanations concerning the proper sense of the law given by the supreme court in the name of the king, in the interval between the Diets, may be rejected by the states, and shall not afterwards be valid, or cited by the courts of judicature.

89. At the general meetings of the orders of the estates, questions may be proposed for altering, explaining, repealing, and issuing acts concerning public economy; and the principles of public institutions of any kind may be discussed. These questions shall afterwards be referred to the committee of public grievances and economical affairs, and then be submitted to the decision of the king, in a council of state. When the king is pleased to invite the estates to deliberate with him on questions concerning the general administration, the same course shall be adopted as is prescribed for questions concerning the laws.

90. During the deliberations of the orders, or their committees, no questions shall be proposed but in the way expressly prescribed by this fundamental law, concerning either appointing or removing of officers, decisions and resolutions of the government and courts of law, and the conduct of private individuals and corporations.

91. When the king, in such cases as those mentioned in the 39th article, is absent from the kingdom longer than twelve months, the council shall convoke the estates to a general Diet, and

cause the summons to be proclaimed within fifteen days from the above time, in the churches of the capital, and speedily afterwards in the other parts of the kingdom. If the king, after being informed thereof, does not return to the kingdom, the estates shall adopt such measures as they deem most beneficial for the country.

92. The same shall be enacted in case of any disease or ill health of the king, which might prevent him from attending to the affairs of the kingdom for more than twelve months.

93. When the heir of the crown, at the decease of the king, is under age, the council of state shall issue summons to the representatives to meet. The estates of the realm shall have the right, without regard to the will of a deceased king concerning the administration, to appoint one or several guardians, to rule in the king's name, according to this fundamental law, till the king becomes of age.

94. Should it ever happen that the royal family become extinct in the male line, the council of state shall convene the estates, to elect another royal family to rule conformably to this fundamental law.

95. Should, contrary to expectation, the council of state fail to convoke the estates, in the cases prescribed by the 91st, 93d, and 94th articles, it shall be the positive duty of the directors of the house of nobles, the chapters throughout the kingdom, the magistrates in the capital, and the governors in the provinces, to give public notice thereof, in order that elections of deputies to the Diet may forthwith take place, and the estates assemble to protect their privileges and rights of the kingdom. Such a Diet shall be opened on the fiftieth day from that period when the council of state had proclaimed the summons in the churches of the capital.

96. The estates shall at every Diet appoint an officer, distinguished for integrity and learning in the law, to watch over, as their deputy, the conduct of the judges and other official men, and who shall, in legal order and at the proper court, arraign those who in the performance of their offices have betrayed negligence and partiality, or else have committed any illegal act. He shall, however, be liable to the same responsibility as the law prescribes for public prosecutors in general.

97. This deputy or attorney-general of the estates shall be chosen by twelve electors out of every order.

98. The electors shall at the same time they choose the said attorney-general, elect a person possessing equal or similar qualities to succeed him, in case of his death before the next Diet.

99. The attorney-general may, whenever he pleases, attend the sessions of all the superior and inferior courts, and the public offices, and shall have free access to their records and minutes; and the king's officers shall be bound to give him every assistance.

100. The attorney-general shall at every Diet present a report of the performance of his office, explaining the state of the administration of justice in the land, noticing the defects in the existing laws, and suggesting new improvements. He shall also, at the end of each year, publish a general statement concerning these.

101. Should the supreme court, or any of its members, from interest, partiality, or negligence, judge so wrong that an individual, contrary to law and evidence, did lose or might have lost life,

liberty, honour, or property, the attorney-general shall be bound, and the chancellor of justice authorised, to arraign the guilty, according to the laws of the realm, in the court after mentioned.

102. This court is to be denominated the court of justice for the realm, and shall be formed by the president in the superior court of Swea, the presidents of all the public boards, four senior members of the council of state, the highest commander of the troops within the capital, and the commander of the squadron of the fleet stationed at the capital, two of the senior members of the superior court of Swea, and the senior member of all the public boards. Should any of the officers mentioned above decline attending this court, he shall be legally responsible for such a neglect of duty. After trial, the judgment shall be publicly announced: no one can alter such a sentence. The king may, however, extend pardon to the guilty, but not admitting him any more into the service of the kingdom.

103. The estates shall at every Diet nominate a jury of twelve members from out of each order, for deciding if the members of the supreme court of justice have deserved to fill their important places, or if any member, without having been legally convicted for the faults mentioned in the above articles, yet ought to be removed from office.

104. The estates shall not resolve themselves into a court of justice, nor enter into any special examination of the decrees, verdicts, resolutions of the supreme court.

105. The constitutional committee shall have right to demand the minutes of the council of state, except those which concern ministerial or foreign affairs, and matters of military command, which may only be communicated as far as these have a reference to generally known events, specified by the committee.

106. Should the committee find from these minutes that any member of the council of state has openly acted against the clear dictates of the constitution, or advised any infringement either of the same or of the other laws of the realm, or that he had omitted to remonstrate against such a violation, or caused and promoted it by wilfully concealing any information, the committee shall order the attorney-general to institute the proper proceedings against the guilty.

107. If the constitutional committee should find that any or all the members of the council of state have not consulted the real interest of the kingdom, or that any of the secretaries of state have not performed his or their official duties with impartiality, activity, and skill, the committee shall report it to the estates, who, if they deem it necessary, may signify to the king their wish of having those removed, who may thus have given dissatisfaction. Questions to this effect may be brought forward at the general meetings of the orders, and even be proposed by any of the committees. These cannot, however, be decided until the constitutional committee have delivered their opinion.

108. The estates shall at every Diet appoint six individuals, two of whom must be learned in the law, besides the attorney-general, to watch over the liberty of the press. These deputies shall be bound to give their opinion as to the legality of publications, if such be requested by the authors. These deputies shall be chosen by six electors out of every order.

CONSTITUTION OF SWEDEN.

109. Diets may not last longer than three months from the time that the king has informed the representatives of the state of the revenues. Should, however, the estates at the expiration of that time not have concluded their deliberations, they may demand the Diet to be prolonged for another month, which the king shall not refuse. If again, contrary to expectation, the estates at the expiration of this term have not regulated the civil list, the king shall dissolve the Diet, and taxation continue in its former state till the next meeting of representatives.

110. No representative shall be responsible for any opinion uttered at meetings of the orders, or of the committees, unless by the express permission of at least five-sixths of his own order: nor can a representative be banished from the Diet. Should any individual or body, either civil or military, endeavour to offer violence to the estates, or to any individual representative, or presume to interrupt and disturb their deliberations, it shall be considered as an act of treason, and it rests with the estates to take legal cognizance of such an offence.

111. Should any representative, after having announced himself as such, be insulted, either at the Diet or on his way to or from the same, it shall be punished as a violation of the peace of the king.

112. No official person may exercise his official authority (his authority in that capacity) to

CONSTITUTION: SWITZERLAND.

influence the elections of deputies to the Diet, under pain of losing his place.

113. Individuals elected for regulating the taxation shall not be responsible for their lawful deeds in this their capacity.

114. The king shall leave the estates in undisturbed possession of their liberties, privileges, and immunities. Modifications which the prosperity of the realm may demand can only be done with the general concurrence and consent of the estates and the sanction of the king. Nor can any new privileges be granted to one order, without the consent of the other, and the sanction of the sovereign.

This we have confirmed by our names and seals, on the sixth day of the month of June, in the year after the birth of our Lord one thousand eight hundred and nine.

On behalf of the Nobles, M. Ankarsvard. On behalf of the Clergy, Jac. Ax. Lindblom. On behalf of the Burghers, H. N. Schwan. On behalf of the Peasantry, Lars Olsson, Speakers.

The above form of government we have not only acknowledged Ourselves, but do also command all our faithful subjects to obey it; in confirmation of which, we have thereto affixed our manual signature and the seal of the realm. In the city of our royal residence, Stockholm, on the sixth day of the month of June, in the year after the birth of our Lord one thousand eight hundred and nine.

CHARLES.

CONSTITUTION OF THE SWISS CONFEDERATION.

After the Sonderbund secession and war of 1847 (see SWITZERLAND: A. D. 1803-1848), the task of drawing up a Constitution for the Confederacy was confided to a committee of fourteen members, and the work was finished on the 14th of April, 1848. "The project was submitted to the Cantons, and accepted at once by thirteen and a half; others joined during the summer, and the new Constitution was finally promulgated with the assent of all on the 12th September. Hence arose the seventh and last phase of the Confederation, by the adoption of a Federal Constitution for the whole of Switzerland, being the first which was entirely the work of Swiss, without any foreign influence, although its authors had studied that of the United States. . . . It was natural that, as in process of time commerce and industry were developed, and as the differences between the legislation of the various Cantons became more apparent, a revision of the first really Swiss Confederation should be necessary." This was proposed both in 1871 and 1872, but the partisans of a further centralization, though successful in the Chambers, were defeated upon an appeal to the popular vote on the 12th of May 1872, by a majority of between five and six thousand, and by thirteen Cantons to nine. The question was, however, by no means settled, and in 1874 a new project of revision more acceptable to the partisans of cantonal independence, was adopted by the people, the numbers being 340,199, to 198,013. The Cantons were about two to one in favour of the revision, 14½ declaring for and 7½ against it. This Constitution bears date the 29th May, 1874, and has since been added to and altered in certain particulars." — Sir F. O. Adams and C. D. Cunningham, *The*

Swiss Confederation, ch. 1.—"Since 1848, . . . Switzerland has been a federal state, consisting of a central authority, the Bund, and 19 entire and six half states, the Cantons; to foreign powers she presents an united front, while her internal policy allows to each Canton a large amount of independence. . . . The basis of all legislative division is the Commune or Gemeinde, corresponding in some slight degree to the English Parish. The Commune in its legislative and administrative aspect or 'Einwohnergemeinde' is composed of all the inhabitants of a Commune. It is self-governing and has the control of the local police; it also administers all matters connected with pauperism, education, sanitary and funeral regulations, the fire brigade, the maintenance of public peace and trusteeships. . . . At the head of the Commune is the Gemeinderath, or Communal Council, whose members are elected from the inhabitants for a fixed period. It is presided over by an Ammann, or Mayor, or President. . . . Above the Commune on the ascending scale comes the Canton. . . . Each of the 19 Cantons and 6 half Cantons is a sovereign state, whose privileges are nevertheless limited by the Federal Constitution, particularly as regards legal and military matters; the Constitution also defines the extent of each Canton, and no portion of a Canton is allowed to secede and join itself to another Canton. . . . Legislative power is in the hands of the 'Volk'; in the political sense of the word the 'Volk' consists of all the Swiss living in the Canton, who have passed their 20th year and are not under disability from crime or bankruptcy. The voting on the part of the people deals mostly with alterations in the cantonal constitution, treaties, laws, decisions of the

First Council involving expenditures of Frs. 100,000 and upward, and other decisions which the Council considers advisable to subject to the public vote, which also determines the adoption of propositions for the creation of new laws, or the alteration or abolition of old ones, when such a plebiscite is demanded by a petition signed by 5,000 voters. . . . The First Council (Grosse Rath) is the highest political and administrative power of the Canton. It corresponds to the 'Chamber' of other countries. Every 1,300 inhabitants of an electoral circuit send one member. . . . The Kleine Rath or special council (corresponding to the 'Ministerium' of other continental countries) is composed of three members and has three proxies. It is chosen by the First Council for a period of two years. It superintends all cantonal institutions and controls the various public boards. . . . The populations of the 22 sovereign Cantons constitute together the Swiss Confederation."—P. Hauri, *Sketch of the Constitution of Switzerland (in Strickland's The Engadine)*.

The following text of the Federal Constitution of the Swiss Confederation is a translation from parallel French and German texts, by Professor Albert Bushnell Hart, of Harvard College. It appeared originally in "Old South Leaflets," No. 18, and is now reprinted under permission from Professor Hart, who has most kindly revised his translation throughout and introduced the later amendments, to July, 1893.

In the Name of Almighty God.—The Swiss Confederation, desiring to confirm the alliance of the Confederates, to maintain and to promote the unity, strength, and honor of the Swiss nation, has adopted the Federal Constitution following:

Chapter 1. General Provisions.—ARTICLE 1. The peoples of the twenty-two sovereign Cantons of Switzerland, united by this present alliance, viz.: Zurich, Bern, Luzern, Uri, Schwyz, Unterwalden (Upper and Lower), Glarus, Zug, Freiburg, Solothurn, Basel (urban and rural), Schaffhausen, Appenzell (the two Rhodes), St. Gallen, Grisons, Aargau, Thurgau, Ticino, Vaud, Valais, Neuchâtel, and Geneva, form in their entirety the Swiss Confederation.

ART. 2. The purpose of the Confederation is, to secure the independence of the country against foreign nations, to maintain peace and order within, to protect the liberty and the rights of the Confederates, and to foster their common welfare.

ART. 3. The Cantons are sovereign, so far as their sovereignty is not limited by the Federal Constitution; and, as such, they exercise all the rights which are not delegated to the federal government.

ART. 4. All Swiss are equal before the law. In Switzerland there are neither political dependents, nor privileges of place, birth, persons, or families.

ART. 5. The Confederation guarantees to the Cantons their territory, their sovereignty, within the limits fixed by Article 3, their Constitutions, the liberty and rights of the people, the constitutional rights of citizens, and the rights and powers which the people have conferred on those in authority.

ART. 6. The Cantons are bound to ask of the Confederation the guaranty of their Constitutions. This guaranty is accorded, provided: (a) that the

Constitutions contain nothing contrary to the provisions of the Federal Constitution. (b) That they assure the exercise of political rights, according to republican forms, representative or democratic. (c) That they have been ratified by the people, and may be amended whenever the majority of all the citizens demand it.

ART. 7. All separate alliances and all treaties of a political character between the Cantons are forbidden. On the other hand the Cantons have the right to make conventions among themselves upon legislative, administrative or judicial subjects; in all cases they shall bring such conventions to the attention of the federal officials, who are authorized to prevent their execution, if they contain anything contrary to the Confederation, or to the rights of other Cantons. Should such not be the case, the covenanting Cantons are authorized to require the coöperation of the federal officials in carrying out the convention.

ART. 8. The Confederation has the sole right of declaring war, of making peace, and of concluding alliances and treaties with foreign powers, particularly treaties relating to tariffs and commerce.

ART. 9. By exception the Cantons preserve the right of concluding treaties with foreign powers, respecting the administration of public property, and border and police intercourse; but such treaties shall contain nothing contrary to the Confederation or to the rights of other Cantons.

ART. 10. Official intercourse between Cantons and foreign governments, or their representatives, shall take place through the Federal Council. Nevertheless, the Cantons may correspond directly with the inferior officials and officers of a foreign State, in regard to the subjects enumerated in the preceding article.

ART. 11. No military capitulations shall be made.

ART. 12. No members of the departments of the federal government, civil and military officials of the Confederation, or federal representatives or commissioners, shall receive from any foreign government any pension, salary, title, gift, or decoration. Such persons, already in possession of pensions, titles, or decorations, must renounce the enjoyment of pensions and the bearing of titles and decorations during their term of office. Nevertheless, inferior officials may be authorized by the Federal Council to continue in the receipt of pensions. No decoration or title conferred by a foreign government shall be borne in the federal army. No officer, non-commissioned officer, or soldier shall accept such distinction.

ART. 13. The Confederation has no right to keep up a standing army. No Canton or Half-Canton shall, without the permission of the federal government keep up a standing force of more than three hundred men; the mounted police [gendarmérie] is not included in this number.

ART. 14. In case of differences arising between Cantons, the States shall abstain from violence and from arming themselves; they shall submit to the decision to be taken upon such differences by the Confederation.

ART. 15. In case of sudden danger of foreign attack, the authorities of the Cantons threatened shall request the aid of other members of the Confederation and shall immediately notify the federal government; the subsequent action of

the latter shall not thereby be precluded. The Cantons summoned are bound to give aid. The expenses shall be borne by the Confederation.

ART. 16. In case of internal disturbance, or if the danger is threatened by another Canton, the authorities of the Canton threatened shall give immediate notice to the Federal Council, in order that that body may take the measures necessary, within the limits of its power (Art. 102, §§ 3, 10, 11), or may summon the Federal Assembly. In extreme cases the authorities of the Canton are authorized, while giving immediate notice to the Federal Council, to ask the aid of other Cantons, which are bound to afford such aid. If the executive of the Canton is unable to call for aid, the federal authority having the power may, and if the safety of Switzerland is endangered shall, intervene without requisition. In case of federal intervention, the federal authorities shall take care that the provisions of Article 5 be observed. The expenses shall be borne by the Canton asking aid or occasioning federal intervention, except when the Federal Assembly otherwise decides on account of special circumstances.

ART. 17. In the cases mentioned in Articles 15 and 16, every Canton is bound to afford undisturbed passage for the troops. The troops shall immediately be placed under federal command.

ART. 18. Every Swiss is bound to perform military service. Soldiers who lose their lives or suffer permanent injury to their health, in consequence of federal service, are entitled to aid from the Confederation for themselves or their families, in case of need. Each soldier shall receive without expense his first equipment, clothing, and arms. The weapon remains in the hands of the soldier, under conditions which shall be prescribed by federal legislation. The Confederation shall enact uniform provisions as to an exemption tax.

ART. 19. The federal army is composed: (a) Of the cantonal military corps. (b) Of all Swiss who do not belong to such military corps, but are nevertheless liable to military service. The Confederation exercises control over the army and the material of war provided by law. In cases of danger, the Confederation has also the exclusive and direct control of men not included in the federal army, and of all other military resources of the Cantons. The Cantons have authority over the military forces of their territory, so far as this right is not limited by the Federal Constitution or laws.

ART. 20. The laws on the organization of the army are passed by the Confederation. The enforcement of military laws in the Cantons is intrusted to the cantonal officials, within limits which shall be fixed by federal legislation, and under the supervision of the Confederation. Military instruction of every kind pertains to the Confederation. The same applies to the arming of troops. The furnishing and maintenance of clothing and equipment is within the power of the Cantons; but the Cantons shall be credited with the expenses therefor, according to a regulation to be established by federal legislation.

ART. 21. So far as military reasons do not prevent, bodies of troops shall be formed out of the soldiers of the same Cantons. The composition of these bodies of troops, the maintenance of their effective strength, the appointment and promotion of officers of these bodies of troops,

belong to the Cantons, subject to general provisions which shall be established by the Confederation.

ART. 22. On payment of a reasonable indemnity, the Confederation has the right to use or acquire drill-grounds and buildings intended for military purposes, within the Cantons, together with the appurtenances thereof. The terms of the indemnity shall be settled by federal legislation.

ART. 23. The Confederation may construct at its own expense, or may aid by subsidies, public works which concern Switzerland or a considerable part of the country. For this purpose it may expropriate property, on payment of a reasonable indemnity. Further enactments upon this matter shall be made by federal legislation. The Federal Assembly may forbid public works which endanger the military interests of the Confederation.

ART. 24. The Confederation has the right of superintendence over dike and forest police in the upper mountain regions. It may coöperate in the straightening and embankment of torrents as well as in the afforesting of the districts in which they rise. It may prescribe the regulations necessary to assure the maintenance of these works, and the preservation of existing forests.

ART. 25. The Confederation has power to make legislative enactments for the regulation of the right of fishing and hunting, particularly with a view to the preservation of the large game in the mountains, as well as for the protection of birds useful to agriculture and forestry.

ART. 26. Legislation upon the construction and operation of railroads is in the province of the Confederation.

ART. 27. The Confederation has the right to establish, besides the existing Polytechnic School, a Federal University and other institutions of higher instruction, or to subsidize institutions of such nature. The Cantons provide for primary instruction, which shall be sufficient, and shall be placed exclusively under the direction of the secular authority. It is compulsory and, in the public schools, free. The public schools shall be such that they may be frequented by the adherents of all religious sects, without any offense to their freedom of conscience or of belief. The Confederation shall take the necessary measures against such Cantons as shall not fulfill these duties.

ART. 28. The customs are in the province of the Confederation. It may levy export and import duties.

ART. 29. The collection of the federal customs shall be regulated according to the following principles: 1. Duties on imports: (a) Materials necessary for the manufactures and agriculture of the country shall be taxed as low as possible. (b) It shall be the same with the necessities of life. (c) Luxuries shall be subjected to the highest duties. Unless there are imperative reasons to the contrary, these principles shall be observed also in the conclusion of treaties of commerce with foreign powers. 2. The duties on exports shall also be as low as possible. 3. The customs legislation shall include suitable provisions for the continuance of commercial and market intercourse across the frontier. The above provisions do not prevent the Confederation from making temporary exceptional provisions, under extraordinary circumstances.

ART. 30. The proceeds of the customs belong to the Confederation. The indemnity ceases which hitherto has been paid to the Cantons for the redemption of customs, for road and bridge tolls, customs duties and other like dues. By exception, and on account of their international alpine roads, the Cantons of Uri, Grisons, Ticino, and Valais receive an annual indemnity, which, considering all the circumstances, is fixed as follows: Uri, 80,000 francs. Grisons, 200,000 francs. Ticino, 200,000 francs. Valais, 50,000 francs. The Cantons of Uri and Ticino shall receive in addition, for clearing the snow from the Saint Gotthard road, an annual indemnity of 40,000 francs, so long as that road shall not be replaced by a railroad.

ART. 31. The freedom of trade and of industry is guaranteed throughout the whole extent of the Confederation. The following subjects are excepted: (a) The salt and gunpowder monopoly, the federal customs, import duties on wines and other spirituous liquors, and other taxes on consumption expressly permitted by the Confederation, according to article 32. (b) [Added by Amendment of Dec. 22, 1885.] The manufacture and sale of alcohol, under Article 32 (ii). (c) [Added by Amendment of Dec. 22, 1885.] Drinking places, and the retail trade in spirituous liquors; but nevertheless the Cantons may by legislation subject the business of keeping drinking places, and the retail trade in spirituous liquors, to such restrictions as are required for the public welfare. (d) [Originally (b)] Measures of sanitary police against epidemics and cattle diseases. (e) [Originally (c)] Provisions in regard to the exercise of trades and manufactures, in regard to taxes imposed thereon, and in regard to the police of the roads. These provisions shall not contain anything contrary to the principle of freedom of trade and manufacture.

ART. 32. The Cantons are authorized to collect the import duties on wines and other spirituous liquors, provided in Article 31 (a), always under the following restrictions: (a) The collection of these import duties shall in no wise impede transportation: commerce shall be obstructed as little as possible and shall not be burdened with any other dues. (b) If the articles imported for consumption are reexported from the Canton, the duties paid on importation shall be refunded, without further charges. (c) Products of Swiss origin shall be less burdened than those of foreign countries. (d) The existing import duties on wines and other spirituous liquors of Swiss origin shall not be increased by the Cantons which already levy them. Such duties shall not be established upon such articles by Cantons which do not at present collect them. (e) The laws and ordinances of the Cantons on the collection of import duties shall, before their going into effect, be submitted to the federal government for approval, in order that it may, if necessary, cause the enforcement of the preceding provisions. All the import duties now levied by the Cantons, as well as the similar duties levied by the Communes, shall cease, without indemnity, at the end of the year 1890.

ART. 32 (ii). [Amendment of Dec. 22, 1885.] The Confederation is authorized by legislation to make regulations for the manufacture and sale of alcohol. In this legislation those products which are intended for exportation, or which have been subjected to a process excluding them

from use as a beverage, shall be subjected to no tax. Distillation of wine, fruit, and their by-products, of gentian root, juniper berries, and similar products, is not subject to federal legislation as to manufacture or tax. After the cessation of the import duties on spirituous liquors, provided for in Article 32 of the Constitution, the trade in liquors not distilled shall not be subjected by the Cantons to any special taxes or to other limitations than those necessary for protection against adulterated or noxious beverages. Nevertheless, the powers of the Cantons, defined in Article 31, are retained over the keeping of drinking places, and the sale at retail of quantities less than two liters. The net proceeds resulting from taxation on the sale of alcohol belong to the Cantons in which the tax is levied. The net proceeds to the Confederation from the internal manufacture of alcohol, and the corresponding addition to the duty on imported alcohol, are divided among all the Cantons, in proportion to the actual population as ascertained from time to time by the next preceding federal census. Out of the receipts therefrom the Cantons must expend not less than one tenth in combating drunkenness in its causes and effects. [For additional articles of this Amendment see Temporary Provisions, Article 6, at the end of this Constitution.]

ART. 33. The Cantons may require proofs of competency from those who desire to practice a liberal profession. Provision shall be made by federal legislation by which such persons may obtain certificates of competency which shall be valid throughout the Confederation.

ART. 34. The Confederation has power to enact uniform provisions as to the labor of children in factories, and as to the duration of labor fixed for adults therein, and as to the protection of workmen against the operation of unhealthy and dangerous manufactures. The transactions of emigration agents and of organizations for insurance, not instituted by the State, are subject to federal supervision and legislation.

ART. 34 (ii). [Amendment of Dec. 17, 1890.] The Confederation shall by law provide for insurance against sickness and accident, with due regard for existing sick-benefit funds. The Confederation may require participation therein, either by all persons or by particular classes of the population.

ART. 35. The opening of gaming houses is forbidden. Those which now exist shall be closed Dec. 31, 1877. The concessions which may have been granted or renewed since the beginning of the year 1871 are declared invalid. The Confederation may also take necessary measures concerning lotteries.

ART. 36. The posts and telegraphs in all Switzerland are controlled by the Confederation. The proceeds of the posts and telegraphs belong to the federal treasury. The rates shall, for all parts of Switzerland, be fixed according to the same principle and as fairly as possible. Inviolable secrecy of letters and telegrams is guaranteed.

ART. 37. The Confederation exercises general oversight over those roads and bridges in the maintenance of which it is interested. The sums due to the Cantons mentioned in Article 30, on account of their international alpine roads, shall be retained by the federal government if such roads are not kept by them in suitable condition.

ART. 38. The Confederation exercises all the exclusive rights pertaining to coinage. It has the sole right of coining money. It establishes the monetary system, and may enact provisions, if necessary, for the rate of exchange of foreign coins.

[ART. 39. *(Abrogated by the article following it).* The Confederation has the power to make by law general provisions for the issue and redemption of bank notes. But it shall not create any monopoly for the issue of bank notes, nor make such notes a legal tender.]

ART. 39. [Substitute for former Art. 39, adopted Oct. 18, 1891.] The Confederation has the exclusive power to issue bank notes and other like currency. The Confederation may exercise the exclusive power over the issue of bank notes through a National Bank carried on under a special department of administration; or it may assign the right to a central joint stock bank hereafter to be created, which shall be administered under the coöperation and supervision of the Confederation; but the privilege to take over the bank, by paying a compensation, shall be retained. The bank possessed of the exclusive right to issue notes shall have for its chief function to regulate the circulation of money in Switzerland and to facilitate exchange. To the Cantons shall be paid at least two-thirds of the net profits of the bank beyond a reasonable interest or a reasonable dividend to the stockholders, and the necessary transfers to the reserve fund. The bank and its branches shall not be subjected to taxation by the Cantons. The Confederation shall not make bank notes and other like currency legal tender, except in urgent need in time of war. The principal office of the bank and the details of its organization, as well as in general the carrying into effect this article, shall be determined by federal law.

ART. 40. The Confederation fixes the standard of weights and measures. The Cantons, under the supervision of the Confederation, enforce the laws relating thereto.
